- (a) Those directly related to waterfront or directly needing foreshore facilities;
- Explanation: The expression "foreshore facilities" means those activities permissible under this notification and they require waterfront for their operations such as ports and harbours, jetties, quays, wharves, erosion control measures, breakwaters, pipelines, lighthouses, navigational safety facilities, coastal police stations and the like.;
- (b) Projects of Department of Atomic Energy;
- (c) Facilities for generating power by non-conventional energy sources and setting up of desalination plants in the areas not classified as CRZ-I(i) based on an impact assessment study including social impacts.;
- (d) Development of green field Airport already permitted only at Navi Mumbai;
- (e) Reconstruction, repair works of dwelling units of local communities including fishers in accordance with local town and country planning regulations.
- (ii) Manufacture or handling oil storage or disposal of hazardous substance as specified in the notification of Ministry of Environment and Forests, No. S.O.594 (E), dated the 28th July 1989,

S.O.No.966(E), dated the 27th November, 1989 and GSR 1037 (E), dated the 5th December, 1989 except,-

- (a) transfer of hazardous substances from ships to ports, terminals and refineries and vice versa;
 - (b) facilities for receipt and storage of petroleum products and liquefied natural gas as specified in Annexure-II appended to this notification and facilities for regasification of Liquefied Natural Gas (hereinafter referred to as the LNG) in the areas not classified as CRZ- I (i) subject to implementation of safety regulations including guidelines issued by the Oil Industry Safety Directorate in the Ministry of Petroleum and Natural Gas and guidelines issued by MoEF and subject to further terms and conditions for implementation of ameliorative and restorative measures in relation to environment as may be stipulated by in MoEF.
 - (c) Provided that facilities for receipt and storage of fertilizers and raw materials required for manufacture of fertilizers like ammonia, phosphoric acid, sulphur, sulphuric acid, nitric acid and the like, shall be permitted within the said zone in the areas not classified as CRZ-I (i).
 - (iii) Setting up and expansion of fish processing units including warehousing except hatchery and natural fish drying in permitted areas:
 - (iv) Land reclamation, bunding or disturbing the natural course of seawater except those,
 - (a) required for setting up, construction or modernisation or expansion of foreshore
 - (b) facilities like ports, harbours, jetties, wharves, quays, slipways, bridges, sealink, road on stilts, and such as meant for defence and security purpose and for other facilities that are essential for activities permissible under the notification;
 - (c) measures for control of erosion, based on scientific including Environmental Impact Assessment (hereinafter referred to as the EIA) studies
 - (d) maintenance or clearing of waterways, channels and ports, based on EIA studies;
 - (e) measures to prevent sand bars, installation of tidal regulators, laying of storm water drains or for structures for prevention of salinity ingress and freshwater recharge based on carried out by any agency to be specified by MoEF.
 - (v) Setting up and expansion of units or mechanism for disposal of wastes and effluents except facilities required for,
 - (a) discharging treated effluents into the water course with approval under the Water (Prevention and Control of Pollution) Act, 1974 (6 of 1974);
 - (b) storm water drains and ancillary structures for pumping;
 - (c) treatment of waste and effluents arising from hotels, beach resorts and human settlements located in CRZ areas other than CRZ-I and disposal of treated wastes and effluents;
 - (vi) Discharge of untreated waste and effluents from industries, cities or towns and other human settlements. The concerned authorities shall implement schemes for phasing out existing discharge of this nature, if any, within a time period not exceeding two years from the date of issue of this notification.
 - (vii) Dumping of city or town wastes including construction debris, industrial solid wastes, fly ash for the purpose of land filling and the like and the concerned authority shall implement schemes for phasing out any existing practice, if any, shall be phased out within a period of one year from date of commencement of this notification
- Note:-The MoEF will issue a separate instruction to the State Governments and Union territory Administration in respect of preparation of Action Plans and their implementation as also monitoring including the time schedule thereof, in respect of paras (v), (vi) and (vii).
- (viii) Port and harbour projects in high eroding stretches of the coast, except those projects classified as strategic and defence related in terms of EIA notification, 2006 identified by MoEF based on

scientific studies and in consultation with the State Government or the Union territory Administration.

- (ix) Reclamation for commercial purposes such as shopping and housing complexes, hotels and entertainment activities.
- (x) Mining of sand, rocks and other sub-strata materials except,-
 - (a) Those rare minerals not available outside the CRZ area,
 - (b) Exploration and exploitation of Oil and Natural Gas.
- (xi) Drawl of groundwater and construction related thereto, within 200mts of HTL; except the following:-
 - (a) In the areas which are inhabited by the local communities and only for their use.
 - (b) In the area between 200mts-500mts zone the drawl of groundwater shall be permitted only when done manually through ordinary wells for drinking, horticulture, agriculture and fisheries and where no other source of water is available.

Note:-Restrictions for such drawl may be imposed by the Authority designated by the State Government and Union territory Administration in the areas affected by sea water intrusion.

- (xii) Construction activities in CRZ-I except those specified in para 8 of this notification.
- (xiii) Dressing or altering the sand dunes, hills, natural features including landscape changes for beautification, recreation and other such purpose.
- (xiv) Facilities required for patrolling and vigilance activities of marine/coastal police stations.

4. Regulation of permissible activities in CRZ area.- The following activities shall be regulated except those prohibited in para 3 above,

- (i)
 - (a) Clearance shall be given for any activity within the CRZ only if it requires waterfront and foreshore facilities;
 - (b) For those projects which are listed under this notification and also attract EIA notification, 2006 (S.O.1533 (E), dated the 14th September, 2006), for such projects clearance under EIA notification only shall be required subject to being recommended by the concerned State or Union territory Coastal Zone Management Authority (hereinafter referred to as the CZMA).
 - (c) Housing schemes in CRZ as specified in paragraph 8 of this notification;
 - (d) Construction involving more than 20,000 sq.m. built-up area in CRZ-II shall be considered in accordance with EIA notification, 2006 and in case of projects less than 20,000 sq.m. built-up area shall be approved by the concerned State or Union territory Planning authorities in accordance with this notification after obtaining recommendations from the concerned CZMA and prior recommendations of the concern CZMA shall be essential for considering the grant of environmental clearance under EIA notification, 2006 or grant of approval by the relevant planning authority.
 - (e) MoEF may under a specific or general order specify projects which require prior public hearing of project affected people.
 - (f) Construction and operation for ports and harbours, jetties, wharves, quays, slipways, ship construction yards, breakwaters, groynes, erosion control measures;
- (ii) The following activities shall require clearance from MoEF, namely:-
 - (a) Those activities not listed in the EIA notification, 2006.

- (b) Construction activities relating to projects of Department of Atomic Energy or Defence requirements for which foreshore facilities are essential such as, slipways, jetties, wharves, quays; except for classified operational component of defence projects. Residential buildings, office buildings, hospital complexes, workshops of strategic and defence projects in terms of EIA notification, 2006.;
- (c) Construction, operation of lighthouses;
- (d) Laying of pipelines, conveying systems, transmission line;
- (e) Exploration and extraction of oil and natural gas and all associated activities and facilities thereto;
- (f) Foreshore requiring facilities for transport of raw materials, facilities for intake of cooling water and outfall for discharge of treated wastewater or cooling water from thermal power plants. MoEF may specify for category of projects such as at (f), (g) and (h) of para 4;
- (g) Mining of rare minerals as listed by the Department of Atomic Energy;
- (h) Facilities for generating power by non-conventional energy resources, desalination plants and weather radars;
- (i) Demolition and reconstruction of (a) buildings of archaeological and historical importance, (ii) heritage buildings; and buildings under public use which means buildings such as for the purposes of worship, education, medical care and cultural activities;

4.2 Procedure for clearance of permissible activities.- All projects attracting this notification shall be considered for CRZ clearance as per the following procedure, namely:

- (i) The project proponents shall apply with the following documents seeking prior clearance under CRZ notification to the concerned State or the Union territory Coastal Zone Management Authority,-
 - (a) Form-1 (Annexure-IV of the notification);
 - (b) Rapid EIA Report including marine and terrestrial component except for construction projects listed under 4(c) and (d)
 - (c) Comprehensive EIA with cumulative studies for projects in the stretches classified as low and medium eroding by MoEF based on scientific studies and in consultation with the State Governments and Union territory Administration;
 - (d) Disaster Management Report, Risk Assessment Report and Management Plan;
 - (e) CRZ map indicating HTL and LTL demarcated by one of the authorized agency (as indicated in para 2) in 1:4000 scale;
 - (f) Project layout superimposed on the above map indicated at (e) above;
 - (g) The CRZ map normally covering 7km radius around the project site.
 - (h) The CRZ map indicating the CRZ-I, II, III and IV areas including other notified ecologically sensitive areas;
 - (i) No Objection Certificate from the concerned State Pollution Control Boards or Union territory Pollution Control Committees for the projects involving discharge of effluents, solid wastes, sewage and the like.
- (ii) The concerned CZMA shall examine the above documents in accordance with the approved CZMP and in compliance with CRZ notification and make recommendations within a period of sixty days from date of receipt of complete application,
 - (a) MoEF or State Environmental Impact Assessment Authority (hereinafter referred to as the SEIAA) as the case may be for the project attracting EIA notification, 2006;
 - (b) MoEF for the projects not covered in the EIA notification, 2006 but attracting para 4(ii) of the CRZ notification;

- (iii) MoEF or S E I A A shall consider such projects for clearance based on the recommendations of the concerned CZMA within a period of sixty days.
- (iv) The clearance accorded to the projects under the CRZ notification shall be valid for the period of five years from the date of issue of the clearance for commencement of construction and operation.
- (v) For Post clearance monitoring –
 - (a) It shall be mandatory for the project proponent to submit half-yearly compliance reports in respect of the stipulated terms and conditions of the environmental clearance in hard and soft copies to the regulatory authority(s) concerned, on 1st June and 31st December of each calendar year and all such compliance reports submitted by the project p r o p o n e n t shall be published in public domain and its copies shall be given to any person on application to the concerned CZMA.
 - (b) The compliance report shall also be displayed on the website of the concerned regulatory authority.
- (vi) To maintain transparency in the working of the CZMAs it shall be the responsibility of the CZMA to create a dedicated website and post the agenda, minutes, decisions taken, clearance letters, violations, action taken on the violations and court matters including the Orders of the Hon'ble Court as also the approved CZMPs of the respective State Government or Union territory.

5. Preparation of Coastal Zone Management Plans.

- (i) The MoEF may obtain the CZMPs prepared through the respective State Government or Union territory;
- (ii) The CZMPs may be prepared by the coastal State Government or Union territory by engaging reputed and experienced scientific institution(s) or the agencies including the National Centre for Sustainable Coastal Management (hereinafter referred to as the NCSCM) of MoEF and in consultation with the concerned stakeholders;
- (iii) The hazard line shall be mapped by MoEF through Sol all along the coastline of the country and the hazard line shall be demarcated taking into account, tide, waves, sea level rise and shoreline changes;
- (iv) For the purpose of depicting the flooding due to tides, waves and sea level rise in the next fifty and hundred years, the contour mapping of the coastline shall be carried out at 0.5m interval normally upto 7km from HTL on the landward side, and the shoreline changes shall be demarcated based on historical data by comparing the previous satellite imageries with the recent satellite imageries;
- (v) Mapping of the hazard line shall be carried out in 1:25,000 scale for macro level planning and 1:10,000 scale or cadastral scale for micro level mapping and the hazard line shall be taken into consideration while preparing the land use plan of the coastal areas;
- (vi) The coastal States and Union Territory will prepare within a period of twenty four months from the date of issue this notification, draft CZMPs in 1:25,000 scale map identifying and classifying the CRZ areas within the respective territories in accordance with the guidelines given in Annexure-I of the notification, which involve public consultation;
- (vii) The draft CZMPs shall be submitted by the State Government or Union territory to the concerned CZMA for appraisal, including appropriate consultations, and recommendations in accordance with the procedure(s) laid down in the Environment (Protection) Act, 1986;
- (viii) The State Government or Union territory CZMA shall submit the draft CZMPs to MoEF alongwith its recommendations on the CZMP within a period of six months after incorporating the suggestions and objections received from the stakeholders;

- (ix) MoEF shall thereafter consider and approve the CZMPs within a period of four months from the date of receipt of the CZMPs complete in all respects;
- (x) All developmental activities listed in this notification shall be regulated by the State Government, Union Territory Administration, the local authority or the concerned CZMA within the framework of such approved CZMPs as the case may be in accordance with provisions of this notification;
- (xi) The CZMPs shall not normally be revised before a period of five years after which, the revision of the maps following the above procedures;
- (xii) The CZMPs already approved under CRZ notification, 1991 shall be valid for a period of twenty four months unless the aforesaid period is extended by MoEF by a specific notification subject to such terms and conditions as may be specified therein.

6. Enforcement of the CRZ, notification, 2011-

- (a) For the purpose of implementation and enforcement of the provisions this notification and compliance with conditions stipulated thereunder, the powers either original or delegated are available under Environment (Protection) Act, 1986 with the MoEF, State Government or the Union territory Administration NCZMA and SCZMAs;
- (b) The composition, tenure and mandate of NCZMA and State Government or the Union territory CZMAs have already been notified by MoEF in terms of Orders of Hon'ble Supreme Court in Writ Petition 664 of 1993;
- (c) The State Government or the Union territory CZMAs shall primarily be responsible for enforcing and monitoring of this notification and to assist in this task, the State Government and the Union territory shall constitute district level Committees under the Chairmanship of the District Magistrate concerned containing atleast three representatives of local traditional coastal communities including from fisherfolk;
- (d) The dwelling units of the traditional coastal communities including fisherfolk, tribals as were permissible under the provisions of the CRZ notification, 1991, but which have not obtained formal approval from concerned authorities under the aforesaid notification shall be considered by the respective Union territory CZMAs and the dwelling units shall be regularized subject to the following condition, namely-
 - (i) These are not used for any commercial activity
 - (ii) These are not sold or transferred to non-traditional coastal community.

7. Classification of the CRZ – For the purpose of conserving and protecting the coastal areas and marine waters, the CRZ area shall be classified as follows, namely:

(i) CRZ-I:

A. The areas that are ecologically sensitive and the geomorphological features which play a role in the maintaining the integrity of the coast,

- (a) Mangroves, in case mangrove area is more than 1000 sq.m., a buffer of 50 meters along the mangroves shall be provided;
- (b) Corals and coral reefs and associated biodiversity;
- (c) Sand Dunes;
- (d) Mudflats which are biologically active;
- (e) National parks, marine parks, sanctuaries, reserve forests, wildlife habitats and other protected areas under the provisions of Wild Life (Protection) Act, 1972 (53 of 1972), the

Forest (Conservation) Act, 1980 (69 of 1980) or Environment (Protection) Act, 1986 (29 of 1986); including Biosphere Reserves;

- (f) Salt Marshes;
- (g) Turtle nesting grounds;
- (h) Horse shoe crabs habitats;
- (i) Sea grass beds;
- (j) Nesting grounds of birds;
- (k) Areas or structures of archaeological importance and heritage sites.

B. The area between Low Tide Line and High Tide Line;

(ii) CRZ-II:

The areas that have been developed upto or close to the shoreline.

Explanation.- For the purposes of the expression “developed area” is referred to as that area within the existing municipal limits or in other existing legally designated urban areas which are substantially built-up and has been provided with drainage and approach roads and other infrastructural facilities, such as water supply and sewerage mains.

(iii) CRZ-III:

Areas that are relatively undisturbed and those do not belong to either CRZ-I or II which include coastal zone in the rural areas (developed and undeveloped) and also areas within municipal limits or in other legally designated urban areas, which are not substantially built.

(iv) CRZ-IV:

- A. The water area from the Low Tide Line to twelve nautical miles on the seaward side;
- B. Shall include the water area of the tidal influenced water body from the mouth of the water body at the sea upto the influence of tide which is measured as five parts per thousand during the driest season of the year.

(v) Areas requiring special consideration for the purpose of protecting the critical coastal environment and difficulties faced by local communities,

A.(i) CRZ area falling within municipal limits of Greater Mumbai;

- (ii) The CRZ areas of Kerala including the backwaters and backwater islands;
- (iii) CRZ areas of Goa.

B. Critically Vulnerable Coastal Areas (CVCA) such as Sunderbans region of West Bengal and other ecologically sensitive areas identified as under Environment (Protection) Act, 1986 and managed with the involvement of coastal communities including fisherfolk.

8. Norms for regulation of activities permissible under this notification,

(i) The development or construction activities in different categories of CRZ shall be regulated by the concerned CZMA in accordance with the following norms, namely:

Note:- The word existing use hereinafter in relation to existence of various features or existence of regularisation or norms shall mean existence of these features or regularisation or norms as on 19.2.1991 wherein CRZ notification, was notified.

I. CRZ-I,

- (i) No new construction shall be permitted in CRZ-I except,-
 - (a) Projects relating to Department of Atomic Energy;
 - (b) Pipelines, conveying systems including transmission lines;
 - (c) Facilities that are essential for activities permissible under CRZ-I;
 - (d) Installation of weather radar for monitoring of cyclones movement and prediction by Indian Meteorological Department;
 - (e) Construction of trans harbour sea link and without affecting the tidal flow of water, between LTL and HTL.
 - (f) Development of green field airport already approved at only Navi Mumbai;

- (ii) Areas between LTL and HTL which are not ecologically sensitive, necessary safety measures will be incorporated while permitting the following, namely:
 - (a) Exploration and extraction of natural gas;
 - (b) Construction of dispensaries, schools, public rain shelter, community toilets, bridges, roads, jetties, water supply, drainage, sewerage which are required for traditional inhabitants living within the biosphere reserves after obtaining approval from concerned CZMA.
 - (c) Necessary safety measure shall be incorporated while permitting such developmental activities in the area falling in the hazard zone;
 - (d) Salt harvesting by solar evaporation of seawater;
 - (e) Desalination plants;
 - (f) Storage of non-hazardous cargo such as edible oil, fertilizers and food grain within notified ports;
 - (g) Construction of trans harbour sea links, roads on stilts or pillars without affecting the tidal flow of water.

II. CRZ-II,

- (i) Buildings shall be permitted only on the landward side of the existing road, or on the landward side of existing authorized structures;
- (ii) Buildings permitted on the landward side of the existing and proposed roads or existing authorized structures shall be subject to the existing local town and country planning regulations including the 'existing' norms of floor space index or floor area ratio: provided that no permission for construction of buildings shall be given on landward side of any new roads which are constructed on the seaward side of an existing road:
- (iii) Reconstruction of authorized building to be permitted subject with the existing floor space index or floor area ratio norms and without change in present use;
- (iv) Facilities for receipt and storage of petroleum products and liquefied natural gas as specified in annexure-ii appended to this notification and facilities for regasification of liquefied natural gas subject to the conditions as mentioned in sub-paragraph (ii) of paragraph 3;
- (v) Desalination plants and associated facilities;
- (vi) Storage of non-hazardous cargo, such as edible oil, fertilizers and food grain in notified ports;

- (vii) Facilities for generating power by non-conventional power sources and associated facilities;

III. CRZ-III,

A. Area upto 200mts from HTL on the landward side in case of seafront and 100mts along tidal influenced water bodies or width of the creek whichever is less is to be earmarked as “No Development Zone (NDZ)”,

- (i) The NDZ shall not be applicable in such area falling within any notified port limits;
- (ii) No construction shall be permitted within NDZ except for repairs or reconstruction of existing authorized structure not exceeding existing Floor Space Index, existing plinth area and existing density and for permissible activities under the notification including facilities essential for activities; Construction/reconstruction of dwelling units of traditional coastal communities including fisherfolk may be permitted between 100 and 200 metres from the HTL along the seafront in accordance with a comprehensive plan prepared by the State Government or the Union territory in consultation with the traditional coastal communities including fisherfolk and incorporating the necessary disaster management provision, sanitation and recommended by the concerned State or the Union territory CZMA to NCZMA for approval by MoEF;
- (iii) However, the following activities may be permitted in NDZ –
 - (a) Agriculture, horticulture, gardens, pasture, parks, play field, and forestry;
 - (b) Projects relating to department of atomic energy;
 - (c) Mining of rare minerals;
 - (d) Salt manufacture from seawater;
 - (e) Facilities for receipt and storage of petroleum products and liquefied natural gas as specified in annexure-ii;
 - (f) Facilities for re-gasification of liquefied natural gas subject to conditions as mentioned in subparagraph (ii) of paragraph 3;
 - (g) Facilities for generating power by non-conventional energy sources;
 - (h) Foreshore facilities for desalination plants and associated facilities;
 - (i) Weather radars;
 - (j) Construction of dispensaries, schools, public rain shelter, community toilets, bridges, roads, provision of facilities for water supply, drainage, sewerage, crematoria, cemeteries and electric sub-station which are required for the local inhabitants may be permitted on a case to case basis by CZMA;
 - (k) Construction of units or auxiliary thereto for domestic sewage, treatment and disposal with the prior approval of the concerned pollution control board or committee;
 - (l) Facilities required for local fishing communities such as fish drying yards, auction halls, net mending yards, traditional boat building yards, ice plant, ice crushing units, fish curing facilities and the like;
 - (m) Development of green field airport already permitted only at Navi Mumbai.

B. Area between 200mts to 500mts,

The following activities shall be permissible in the above areas;

- (i) Development of vacant plot in designated areas for construction of hotels or beach resorts for tourists or visitors subject to the conditions as specified in the guidelines at Annexure-III ;
- (ii) Facilities for receipt and storage of petroleum products and liquefied natural gas as specified in Annexure-II;

- (iii) Facilities for re-gasification of liquefied natural gas subject to conditions as mentioned in sub-paragraph (ii) of paragraph 3;
- (iv) Storage of non-hazardous cargo such as, edible oil, fertilizers, food grain in
- (v) Notified ports;
- (vi) Foreshore facilities for desalination plants and associated facilities;
- (vii) Facilities for generating power by non-conventional energy sources;
- (viii) Construction or reconstruction of dwelling units so long it is within the ambit of traditional rights and customary uses such as existing fishing villages and goathans. Building permission for such construction or reconstruction will be subject to local town and country planning rules with overall height of construction not exceeding 9mts with two floors (ground + one floor);
- (ix) Construction of public rain shelters, community toilets, water supply drainage, sewerage, roads and bridges by CZMA who may also permit construction of schools and dispensaries for local inhabitants of the area for those panchayats, the major part of which falls within CRZ if no other area is available for construction of such facilities;
- (x) Reconstruction or alteration of existing authorized building subject to sub-paragraph (vii), (viii);
- (xi) Development of green field airport already permitted only at Navi Mumbai.

IV. In CRZ-IV areas,-

The activities impugning on the sea and tidal influenced water bodies will be regulated except for traditional fishing and related activities undertaken by local communities as follows:-

- (a) No untreated sewage, effluents, ballast water, ship washes, fly ash or solid waste from all activities including from aquaculture operations shall be let off or dumped. A comprehensive plan for treatment of sewage generating from the coastal towns and cities shall be formulated within a period of one year in consultation with stakeholders including traditional coastal communities, traditional fisherfolk and implemented;
- (b) Pollution from oil and gas exploration and drilling, mining, boat house and shipping;
- (c) There shall be no restriction on the traditional fishing and allied activities undertaken by local communities.

V. Areas requiring special consideration -

1. CRZ areas falling within municipal limits of the Greater Mumbai.

- (i) Developmental activities in the CRZ area of the Greater Mumbai because of the environmental issues, relating to degradation of mangroves, pollution of creeks and coastal waters, due to discharge of untreated effluents and disposal of solid waste, the need to provide decent housing to the poor section of society and lack of suitable alternatives in the inter connected islands of Greater Mumbai shall be regulated as follows, namely:
 - A. Construction of roads - In CRZ-I areas indicated at sub-paragraph (i) of paragraph 7 of the notification the following activities only can be taken up:
 - (a) Construction of roads, approach roads and missing link roads approved in the Developmental Plan of Greater Mumbai on stilts ensuring that the free flow of tidal water is not affected, without any benefit of CRZ-II accruing on the landward side of such constructed roads or approach roads subject to the following conditions:-

- (i) All mangrove areas shall be mapped and notified as protected forest and necessary protection and conservation measures for the identified mangrove areas shall be initiated.
 - (ii) Five times the number of mangroves destroyed/cut during the construction process shall be replanted.
- B. Solid waste disposal sites shall be identified outside the CRZ area and thereafter within two years the existing conventional solid waste sites shall be relocated outside the CRZ area.
- (ii) In CRZ-II areas
- (a) The development or redevelopment shall continue to be undertaken in accordance with the norms laid down in the Town and Country Planning Regulations as they existed on the date of issue of the notification dated the 19th February, 1991, unless specified otherwise in this notification.
 - (b) SLUM REHABILITATION SCHEMES,-
 1. In the Greater Mumbai area there are large slum clusters with lakhs of families residing therein and the living conditions in these slums are deplorable and the civic agencies are not able to provide basic infrastructure such as drinking water, electricity, roads, drainage and the like because the slums come up in an unplanned and congested manner and the slums in the coastal area are at great risk in the event of cyclones, storm surges or tsunamis, in view of the difficulties in providing rescue, relief and evacuation.
 2. To provide a safe and decent dwelling to the slum dwellers, the State Government may implement slum redevelopment schemes as identified as on the date of issue of this notification directly or through its parastatal agencies like Maharashtra Housing and Area Development Authority (MHADA), Shivshahi Punarvasan Prakalp Limited (SPPL), Mumbai Metropolitan Region Development Authority (MMRDA) and the like.:

Provided that,

 - (i) Such redevelopment schemes shall be undertaken directly or through joint ventures or through public private partnerships or other similar models ensuring that the stake of the State Government or its parastatal entities shall be not less than 51%;
 - (ii) The Floor Space Index or Floor Area Ratio for such redevelopment schemes shall be in accordance with the Town and Country Planning Regulations prevailing as on the date on which the project is granted approval by the competent authority;
 - (iii) It shall be the duty of the project proponent undertaking the redevelopment through conditions (i) (2) above along with the State Government to ensure that all legally regularized tenants are provided houses in situ or as per norms laid down by the State Government in this regard.
 - (c) REDEVELOPMENT OF DILAPIDATED, CESSSED AND UNSAFE BUILDINGS:
 1. In the Greater Mumbai, there are, also a large number of old and dilapidated, cessed and unsafe buildings in the CRZ areas and due to their age these structures are extremely vulnerable and disaster prone and therefore there is an urgent need for the redevelopment or reconstruction of these identified buildings.
 2. These projects shall be taken up subject to the following conditions and safeguards:
 - (i) Such redevelopment or reconstruction projects as identified on the date of issue of this notification shall be allowed to be taken up involving the owners of these buildings either above or with private developers in accordance with the prevailing Regulation, directly or through joint ventures or through other similar models.

- (ii) The Floor Space Index or Floor Area Ratio for such redevelopment schemes shall be in accordance with the Town and Country Planning Regulations prevailing as on the date on which the project is granted approval by the competent authority
 - (iii) Suitable accommodation to the original tenants of the specified buildings shall be ensured during the course of redevelopment or reconstruction of the buildings by the project proponents, undertaking the redevelopment through condition 2(i) above.
- (d) Notwithstanding anything contained in this notification, the developmental activities for slums and for dilapidated, cessed and unsafe buildings as specified at paras (b) and (c) above shall be carried out in an accountable and transparent manner by the project proponents mentioned therein which shall include the following pre-condition measures, wherever applicable:-
- 1.(i) applicability of the Right to Information Act, 2005 to all redevelopment or reconstruction projects granted clearance by the Competent Authorities;
 - (ii) MoEF shall issue an order constituting the CPIO and the first Appellate Authority of appropriate ranks in consultation with Government of Maharashtra;
 - (iii) details of the Slum Rehabilitation Scheme, including the complete proposal and the names of the eligible slum dwellers will be declared suo-moto as a requirement of Section 4 of compliance of the Right to Information Act, 2005 by the appropriate authority in the Government of Maharashtra in one month before approving it;
 - (iv) the implementing or executing agency at the State Government with regard to projects indicated at sub-item (b) and (c) of item (iii) of sub-paragraph V shall display on a large notice boards at the site and at the office of the implementing or executing agency the names of the eligible builders, total number of tenements being made, names of eligible slum dwellers who are to be provided the dwelling units and the extra area available for free sale.
 - (v) Projects being developed under sub-items (b) and (c) of item (iii) of sub-paragraph V shall be given permission only if the project proponent agree to be covered under the Right to Information Act, 2005.
 2. MoEF may appoint statutory auditors, who are empanelled by the Comptroller and auditor General (hereinafter referred to as the C&AG) to undertake performance and fiscal audit in respect of the projects relating to redevelopment of dilapidated, cessed and unsafe buildings and the projects relating to Slum Rehabilitation Scheme shall be audited by C&AG.
 3. A High Level Oversight Committee may be set up by the Government of Maharashtra for periodic review of implementation of V(iii)(b) and (c) which shall include eminent representatives of various Stakeholders, like Architects, Urban Planner, Engineers, and Civil Society, besides the local urban bodies, the State Government and the Central Government.
 4. The individual projects under V(iii)(b) and (c) shall be undertaken only after public consultation in which views of only the legally entitled slum dweller or the legally entitled tenant of the dilapidated or cessed buildings shall be obtained in accordance with the procedures laid down in EIA notification, 2006.
- (e) In order to protect and preserve the 'green lung' of the Greater Mumbai area, all open spaces, parks, gardens, playgrounds indicated in development plans within CRZ-II shall be categorized as CRZ-III, that is, 'no development zone'.
 - (f) The Floor Space Index upto 15% shall be allowed only for construction of civic amenities, stadium and gymnasium meant for recreational or sports related activities and the residential or commercial use of such open spaces shall not be permissible.

- (g) Koliwada namely, fishing settlement areas as identified in the Development Plan of 1981 or relevant records of the Government of Maharashtra, shall be mapped and declared as CRZ-III so that any development, including construction and reconstruction of dwelling units within these settlements shall be undertaken in accordance with applicable as per local Town and Country Planning Regulations.
- (h) Reconstruction and repair works of the dwelling units, belonging to fisher communities and other local communities identified by the State Government, shall be considered and granted permission by the Competent Authorities on a priority basis, in accordance with the applicable Town and Country Planning Regulations.

2. CRZ for Kerala

In view of the unique coastal systems of backwater and backwater islands alongwith space limitation present in the coastal stretches of the State of Kerala, the following activities in CRZ shall be regulated as follows, namely:-

- (i) All the islands in the backwaters of Kerala shall be covered under the CRZ notification;
- (ii) The islands within the backwaters shall have 50mts width from the High Tide Line on the landward side as the CRZ area;
- (iii) Within 50mts from the HTL of these backwater islands existing dwelling units of local communities may be repaired or reconstructed however no new construction shall be permitted;
- (iv) Beyond 50mts from the HTL on the landward side of backwater islands, dwelling units of local communities may be constructed with the prior permission of the Gram panchayat;
- (v) Foreshore facilities such as fishing jetty, fish drying yards, net mending yard, fishing processing by traditional methods, boat building yards, ice plant, boat repairs and the like, may be taken up within 50mts width from HTL of these backwater islands.

3. CRZ of Goa.

In view of the peculiar circumstances of the State Goa including past history and other developments, the specific activities shall be regulated and various measures shall be undertaken as follows:-

- (i) The Government of Goa shall notify the fishing villages wherein all foreshore facilities required for fishing and fishery allied activities such as traditional fish processing yards, boat building or repair yards, net mending yards, ice plants, ice storage, auction hall, jetties may be permitted by Grama Panchayat in the CRZ area;
- (ii) Reconstruction, repair works of the structures of local communities including fishermen community shall be permissible in CRZ;
- (iii) Purely temporary and seasonal structures customarily put up between the months of September to May;
- (iv) The eco sensitive low lying areas which are influenced by tidal action known as khazan lands shall be mapped;
- (v) The mangroves along such as khazan land shall be protected and a management plan for the khazan land prepared and no developmental activities shall be permitted in the khazan land;
- (vi) Sand dunes, beach stretches along the bays and creeks shall be surveyed and mapped. No activity shall be permitted on such sand dune areas;
- (vii) The beaches such as Mandrem, Morjim, Galgiba and Agonda has been designated as turtle nesting sites and protected under the Wildlife Protection Act, 1972 and these areas shall be surveyed and management plan prepared for protection of these turtle nesting sites;

- (viii) No developmental activities shall be permitted in the turtle breeding areas referred to in subparagraph (vii).
4. (a) Critical Vulnerable Coastal Areas (CVCA) which includes Sunderbans and other identified ecological sensitive areas which shall be managed with the involvement of the local coastal communities including the fisher folk;-
- (b) The entire Sunderbans mangrove area and other identified ecologically important areas such as Gulf of Khambat and Gulf of Kutchchh in Gujarat, Malvan, Achra-Ratnagiri in Maharashtra, Karwar and Coondapur in Karnataka, Vembanad in Kerala, Gulf of Mannar in Tamil Nadu, Bhaitarkanika in Orissa, Coringa, East Godavari and Krishna in Andhra Pradesh shall be declared as Critical Vulnerable Coastal Areas (CVCA) through a process of consultation with local fisher and other communities inhabiting the area and depend on its resources for their livelihood with the objective of promoting conservation and sustainable use of coastal resources and habitats;
- (c) The process of identifying planning, notifying and implementing CVCA shall be detailed in the guideline which will be developed and notified by moef in consultations with the stakeholders like the State Government, local coastal communities and fisherfolk and the like inhabiting the area;
- (d) The Integrated Management Plans (imps) prepared for such CVCA shall interalia keep in view the conservation and management of mangroves, needs of local communities such as, dispensaries, schools, public rain shelter, community toilets, bridges, roads, jetties, water supply, drainage, sewerage and the impact of sea level rise and other natural disasters and the imps will be prepared in line with the para 5 above for preparation of Coastal Zone Management Plans;
- (e) Till such time the imps are approved and notified, construction of dispensaries, schools, public rain shelters, community toilets, bridges, roads, jetties, water supply, drainage, sewerage which are required for traditional inhabitants shall be permitted on a case to case basis, by the CZMA with due regards to the views of coastal communities including fisherfolk.

[F.No.11-83/2005-IA-III]
J. M. MAUSKAR, Addl. Secy.

Annexure I

GUIDELINES FOR PREPARATION OF COASTAL ZONE MANAGEMENT PLANS

I. A. Demarcation of High Tide Line

1. Demarcation of High Tide Line (HTL) and Low Tide Line (LTL) shall be carried out by one of the agencies authorised by MoEF based on the recommendations of the National Centre for Sustainable Coastal Management (NCSCM).
2. Demarcation of the High Tide Line or LTL shall be made on the Coastal Zone Management (CZM) Maps of scale 1:25,000 prepared by the agencies identified by the MoEF.
3. Local level CZM Maps shall be prepared for use of officials of local bodies for determination of the CRZ.

4. The local level CZM Maps shall be prepared on a Cadastral scale in accordance with the CZM Maps approved by the Central Government.

B. Preparation of CZM Maps

5. Base Maps of 1:25,000 scale shall be acquired from the Survey of India (SOI) and wherever 1:25,000 maps are not available, 1:50,000 maps shall be enlarged to 1:25,000 for the purpose of base map preparation and these maps will be of the standard specification given below:

Unit	:	7.5 minutes X 7.5minutes
Numbering	:	Survey of India Sheet Numbering System
Horizontal Datum	:	Everest or WGS 84
Vertical Datum	:	Mean Sea Level (MSL)
Topography	:	Topography in the SOI maps will be updated using latest satellite imageries or aerial photographs
6. The High Water Level (HWL) and Low Water Level (LWL) marked on the Base maps will be transferred to the CZM maps.
7. Coastal geomorphological signatures in the field or satellite imageries or aerial photographs will be used for appropriate adjustment, in the HWL or LWL for demarcating HTL or LTL in accordance with the CRZ notification.
8. The following geomorphological features shall be considered while demarcating in HTL or LTL: Landward (monsoonal) berm crest in the case of sandy beaches Rocks, Headlands, Cliffs Seawalls or revetments or embankments
9. 500 meter and 200 metre lines will be demarcated with respect of HTL.
10. HTL (as defined in the CRZ notification) and LTL shall also be demarcated in the CZM maps along the banks of tidal influenced inland water bodies with the help of the geomorphological signatures or features.
11. Classification of different coastal zones shall be done as per the CRZ notification
12. Standard national or international colour codes shall be used to highlight sub-classification of data.

C. Local level CZM Maps

Local level CZM Maps are for the use of local bodies and other agencies to facilitate implementation of the Coastal Zone Management Plans

13. Cadastral (village) maps in 1:3960 or the nearest scale, shall be used as the base maps.
14. These maps are available with revenue Authorities and are prepared as per standard norms.
15. HTL (as defined in the CRZ notification) and LTL will be demarcated in the cadastral map based on detailed physical verification using coastal geomorphological signatures or features in accordance with the CZM Maps approved by the Central Government.
16. 500metre and 200metre lines shall be demarcated with respect to the HTL thus marked.
17. HTL (as defined in the CRZ notification, 1991) and LTL will also be demarcated along the banks of tidal influenced inland water bodies with the help of geomorphological signatures or features.
18. Classifications shall be transferred into local level CZM maps from the CZM Plans.
19. Symbols will be adopted from CZM Maps.
20. Colour codes as given in CZM Maps shall be used.

21. Demarcation of cadastral maps will be done by local agencies approved by the Central Government. The local agencies shall work under the guidance of the concerned State Government or Union Territory Coastal Zone Management Authorities.

D. Hazard mapping

II. Classification of CRZ areas

1. The CZM Maps shall be prepared in accordance with para 5 of the CRZ notification demarcating CRZ I, II, III, IV and V.
2. The CZM Maps shall clearly demarcate the land use plan of the area and lists out the CRZ-I areas. All the CRZ-I areas listed under para 7(I)A and B shall be clearly demarcated and colour codes given so that each of the CRZ-I areas can be clearly identified.
3. Buffer zone along mangrove areas of more than 1000 sq.m. shall be stipulated with a different colour distinguishing from the mangrove area.
4. The buffer zone shall also be classified as CRZ-I area.
5. The hazard line to be drawn up by MoEF shall be superimposed on the CZM maps in 1:25,000 scale and also on the cadastral scale maps.
6. The CRZ-II areas shall be those areas which have been substantially built-up with a ratio of built-up plots to that of total plots is more than 50%.
7. In the CRZ areas, the fishing villages, common properties of the fishermen communities, fishing jetties, ice plants, fish drying platforms or areas infrastructure facilities of fishing and local communities such as dispensaries, roads, schools, and the like, shall be indicated on the cadastral scale maps. States shall prepare detailed plans for long term housing needs of coastal fisher communities in view of expansion and other needs, provisions of basic services including sanitation, safety, and disaster preparedness.
8. No developmental activities other than those listed above shall be permitted in the areas between the hazard line and 500mts or 100mts or width of the creek on the landward side. The dwelling unit of the local communities including that of the fishers will not be relocated if the dwelling units are located on the seaward side of the hazard line. The State Government will provide necessary safeguards from natural disaster to such dwelling units of local communities.
9. The water areas of CRZ IV shall be demarcated and clearly demarcated if the water body is sea, lagoon, backwater, creek, bay, estuary and for such classification of the water bodies the terminology used by Naval Hydrographic Office shall be relied upon.
10. The fishing Zones in the water bodies and the fish breeding areas shall be clearly marked.
11. The water area shall be demarcated indicating the pollution levels as per Central Pollution Control Board standards on water quality.
12. In the CRZ V areas the land use maps shall be superimposed on the Coastal Zone Management Plan and clearly demarcating the CRZ I, II, III, IV.
13. The existing authorized developments on the sea ward side shall be clearly demarcated
14. The features like cyclone shelters, rain shelters, helipads and other infrastructure including road network may be clearly indicated on the CZM Maps for the purpose of rescue and relief operations during cyclones, storms, tsunami and the like.

III. CZMPs approved by MoEF in accordance with CRZ notification, 1991

1. While preparing the CZMPs under CRZ notification, 2011, the CZMPs that have been approved under the CRZ Notification, 1991 shall be compared. A justification shall be

provided by the concerned CZMA in case the CZMPs prepared under CRZ notification, 2011 varies with respect to the approved CZMP prepared under CRZ notification, 1991.

IV. Public Views on the CZMP.

- a) The draft CZMPs prepared shall be given wide publicity and suggestions and objections received in accordance with the Environment (Protection) Act, 1986. Public hearing on the draft CZMPs shall be held at district level by the concerned CZMAs.
- b) Based on the suggestions and objections received the CZMPs shall be revised and approval of MoEF shall be obtained.
- c) The approved CZMP shall be put up on the website of MoEF, concerned website of the State, Union Territory CZMA and hard copy made available in the panchayat office, District collector office and the like.

V. Revision of Coastal Zone Management Plans

1. Whenever there is a doubt the concerned State or Union territory Coastal Zone Management Authority shall refer the matter to the National Centre for Sustainable Coastal Management who shall verify the CZMP based on latest satellite imagery and ground truthing.
2. The rectified map would be submitted to MoEF for its record.

Annexure-II

List of petroleum and chemical products permitted for storage in [CRZ except CRZ-I(A)]

- (i) Crude oil;
- (ii) Liquefied Petroleum Gas;
- (iii) Motor spirit;
- (iv) Kerosene;
- (v) Aviation fuel;
- (vi) High speed diesel;
- (vii) Lubricating oil;
- (viii) Butane;
- (ix) Propane;
- (x) Compressed Natural Gas;
- (xi) Naphtha;
- (xii) Furnace oil;
- (xiii) Low Sulphur Heavy Stock;
- (xiv) Liquefied Natural Gas;
- (xv) Fertilizers and raw materials for manufacture of fertilizers.

Annexure-III

Guidelines for development of beach resorts or hotels in the designated areas of CRZ-III and CRZ-II for occupation of tourist or visitors with prior approval of the Ministry of Environment and Forests

I. Construction of beach resorts or hotels with prior approval of MoEF in designated areas of CRZ-II and III for occupation of tourist or visitors shall be subject to the following conditions, namely:-

- a) The project proponent shall not undertake any construction within 200 meters in the landward side of High Tide Line and within the area between Low Tide Line and High Tide Line;
- b) The proposed constructions shall be beyond the hazard line or 200mts from the High Tide Line whichever is more;
- c) Live fencing and barbed wire fencing with vegetative cover may be allowed around private properties subject to the condition that such fencing shall in no way hamper public access to the beach;
- d) No flattening of sand dunes shall be carried out;
- e) No permanent structures for sports facilities shall be permitted except construction of goal posts, net posts and lamp posts;
- f) Construction of basement may be allowed subject to the condition that no objection certification is obtained from the State Ground Water Authority to the effect that such construction will not adversely affect fee flow of groundwater in that area;
- g) The State Ground Water Authority shall take into consideration the guidelines issued by Central Government before granting such no objection certificate;
- h) Though no construction is allowed in the no development zone for the purposes of calculation of Floor Space Index, the area of entire plot including the portion which falls within the no development zone shall be taken into account;
- i) The total plot size shall not be less than 0.4 hectares and the total covered area on all floors shall not exceed 33 percent of the plot size i.e., the Floor Space Index shall not exceed 0.33 and the open area shall be suitably landscaped with appropriate vegetal cover;
- j) The construction shall be consistent with the surrounding landscape and local architectural style;
- k) The overall height of construction upto the highest ridge of the roof, shall not exceed 9metres and the construction shall not be more than two floors (ground floor plus one upper floor);
- l) Groundwater shall not be tapped within 200metre of the High Tide Line; within the 200metre 500metre zone it can be tapped only with the concurrence of the Central or State Ground Water Board;
- m) Extraction of sand, levelling or digging of sandy stretches except for structural foundation of building, swimming pool shall not be permitted within 500metres of the High Tide Line;
- n) The quality of treated effluents, solid wastes, emissions and noise levels and the like, from the project area must conform to the standards laid down by the competent authorities including the Central or State Pollution Control Board and under the Environment (Protection) Act, 1986;
- o) Necessary arrangements for the treatment of the effluents and solid wastes must be made and it must be ensured that the untreated effluents and solid wastes are not discharged into the water or on the beach; and no effluent or solid waste shall be discharged on the beach;
- p) To allow public access to the beach, at least a gap of 20metres width shall be provided between any two hotels or beach resorts; and in no case shall gaps be less than 500metres apart; and
- q) If the project involves diversion of forestland for non-forest purposes, clearance as required under the Forest (Conservation) Act, 1980 shall be obtained and the requirements of other Central and State laws as applicable to the project shall be met with; and
- r) Approval of the State or Union territory Tourism Department shall be obtained.

II. In ecologically sensitive areas (such as marine parks, mangroves, coral reefs, breeding and spawning grounds of fish, wildlife habitats and such other area as may be notified by the Central or State Government Union territories) construction of beach resorts or hotels shall not be permitted

Annexure 3**Guidelines for Development of Holiday Resorts/Homes**
(Refer Regulation 2.2.1.2 and 2.2.4.2)

1. The minimum area of the land for holiday resorts or holiday homes shall not be less than 1.00 Ha.
2. The entire land shall vest in single ownership. It shall not be sub-divided at any time, the individual structures or building shall not be sold to different persons.
3. The facilities provided shall be used by the holiday makers for temporary occupation only. The structures shall not be used for regular and permanent residence.
4. Adequate infrastructural facilities such as access road, water supply, liquid and solid waste collection and disposal facilities shall be provided by the owner at his own cost. so as to keep the entire area clean and hygienic.
5. The structures shall not be more than ground + 1 upper floor. However, ground storied structures with slopping roofs constructed as far as possible out of local material, compatible with the surrounding environment, would be preferred.
6. Existing trees shall be preserved and if any trees are cut, five times the number shall be planted and grown to their full height. In addition, 15 trees per 1000 sq.m. of open land shall be planted as a part of the landscaping of the area.
7. The owner of the land shall submit to the Planning Authority a suitable layout of the site, landscape plan, building plans and a project report along with the recommendation from the Maharashtra Tourism Development Corporation. The Planning Authority shall not approve the project or grant Development Permission without first obtaining concurrence of the MMRDA.
8. The entire construction/development programme shall be completed within a period of 3 years from the date of grant of development permission failing which the development permission shall automatically lapse. For fresh development permission MMRDA's concurrence will be necessary.
9. Necessary setbacks shall be provided from the classified roads.
10. The total built up area of all types of structures shall not exceed 20% of the total area i.e. (FSI 0.20) of the land under development.

Guidelines for Permitting Quarries
(Refer Regulation 2.4.5)

1. No quarrying operations shall be carried out without obtaining Development Permission of the Planning Authority under the provisions of the Maharashtra Regional and Town Planning Act, 1966.
2. The application for Development Permission for quarrying shall include:-
 - a) A Location Plan at 1:5000 scale of the quarry site and an area upto 500 meters around the quarry site showing important natural and manmade features and contours;
 - b) A site plan at 1:500 scale showing site boundaries, contours, all existing natural and man-made features such as hills, water courses, trees and other important landscape features, access roads, building and other structures;
 - c) Proposed excavation plan and cross sections at 1:500 or larger scale showing proposed phasing; terracing; stepping; benching slopes; locations of process equipment; diversion of water courses; impounding lake; storage areas for top soil, waste material, quarried material; workers housing; landscaping including screen planting, mounding, and measures against visual intrusion etc;
 - d) A restoration plan including landscaping proposals, phasing and proposal for reuse of the area after quarrying ;
 - e) A report supplementing the excavation and restoration plans, costs and implementation programme;
3. No quarrying shall commence until the excavation plan is approved also by the Director of Geology and Mining.
4. The Restoration Plan approved by the Planning Authority shall be carried out in consultation with concerned Conservator of Forest or District Forests Officer.
5. Natural gradient of slope should be maintained during quarrying operations, slope of the footwall side (Slope in the direction in which mining does not exist) should be properly stabilised by planting adequate trees of suitable species so as to have soil binding vegetation.
6. In the case of murum quarrying entire weathered soil or murum shall not be excavated exposing hard rock; instead, a capping of at least half a metre be left so that it can support vegetation and plantation that will be done later on.
7. Water course, if any from a higher slope, should be properly diverted out of quarry area so that minimum water flows into the quarry and is safely channeled out of any nearby human settlement.
8. During quarrying operations, the water should be sprayed at least once in a day over the roads at quarry sites and nearby area.
9. Kachha road leading to quarry site shall be invariably sprayed by water during the period when trucks use carrying murum. In addition, in order to minimise dust pollution, measures such as adoption of hoods at transfer points, vulcanizing of conveyer belt joints, under belt cleaning devices, apart from installation of dust suppressions and/or dust extrication system for

conveyance shall be adopted. The kachha road leading to the quarry shall have roadside plantation in order to arrest the dust pollution.

10. No blasting shall be permitted if a public road, railway line or any human settlement is located within 500 meters from the quarrying site.
11. Residences for labourers and related temporary structures should be constructed at least 500 meters away from the place of blasting as well as from the place of quarrying. Heavy blasting by use of heavy machinery shall be prohibited.
12. The Development Permission for quarrying shall be granted for a specific period, after which fresh permission for further quarrying will be necessary. In granting such fresh permission, the Planning Authority shall have regard to the applicant's performance in observing the approved excavation plans and restoration plans, and in carrying out the quarrying operations in accordance with these guidelines.

Annexure 5

Special Township Projects
 Urban Development Department
 Mantralaya, Mumbai 400 032, dated 10th March 2006
 Notification
 (Refer Regulation 2.2.1.2 and 2.2.4.2)

MAHARASHTRA REGIONAL AND TOWN PLANNING ACT, 1966.

No. TPS. 1205/MMR DCR/CR-48/06/UD-12 - Whereas Government has sanctioned the Regional Plan for Mumbai Metropolitan Region (hereinafter referred to as "the said Regional Plan") vide Notification No. TPS. 1297/1094/CR-116/97/UD-12, dated 23rd September 1999 as per the provisions of section 15 of the Maharashtra Regional and Town Planning Act, 1966 (hereinafter referred to as "the said Act") which has come into force with effect from 1st December 1999 ;

And whereas, Development Control Rules of the said Regional Plan does not contain the provisions for Special Township;

And whereas. Public Housing has been one of the major concerns of policy planning. It has been realised that there is a need to incentivise investment by private sector in development of housing. With this in mind, Government of India announced its policy to permit 100 direct foreign investment for development of integrated towns. Government of Maharashtra in collaboration with Maharashtra Economic Development Council had organised an International Infrastructure Summit in 2002. A concept paper was presented by the Urban Development, which was widely appreciated. Consultations with planners, architects and developers were held and the "Government of Maharashtra finally approved the Special Township Scheme in the year 2004. The idea is to promote private investment in housing sector to facilitate housing at reasonable prices and also to create a hassle free atmosphere for investors. The new policy has to form a part of the existing DCR of Municipal Corporation/ Councils and Development Control Regulations for regional plan areas.

And whereas, accordingly. Development Control Regulations (DCRs) exclusively for Special Townships (hereinafter referred to as "the said Regulations") have been prepared and it is proposed to incorporate the said Regulations, in the Development Control Regulation of all the Municipal Corporations, New Town Development Authorities, Special Planning Authorities, Municipal Councils (hereinafter referred to as "the said Authorities") and also in the Development Control Regulations of all the Regional Plans of the State, by taking recourse to procedure laid down in Section 37 and 20 (as the case may be) of the said Act thereby modifying the relevant Development Plan/Regional Plan in as much as Regulation thereof are concerned (hereinafter referred to as "the said modification").

And whereas, under the powers conferred by sub-section (3) of section 20 of the said Act, Government in Urban Development Department had published a notice No. TPB. 4302/2080/CR-215/02/UD-11, dated 21st August 2004 (hereinafter referred to as "the said notice") which appeared in Maharashtra Government Gazette Part-1, Konkan Division on 24th August 2004 at pages 51 to 56 in respect of Mumbai Metropolitan Regional Plan to invite suggestions and objections from the general public on the said modification.

And whereas, thereafter the said Act has been amended to include the provision for Special Township Project vide Maharashtra Act No-XXIII of 2005 which appeared in Maharashtra Government Gazette (Extra Ordinary) dated 19th May 2005 ;

to the said Regional Plan and for that purpose amends the Urban Development Department Notification No. TPS. 1297/1094/CR-116/97/UD-12, dated 23rd September 1999 ;

In the schedule of modifications of the Mumbai Metropolitan Regional Plan. After the last entry following new entry shall be added :-

ENTRY

“Regulations for Special Township Project given in Schedule-A appended hereto are added to the Development Control Rules “.

Note - (A) A copy of the sanctioned Regulations for Development of Special Township in area under Mumbai Metropolitan Regional Plan i.e. Schedule-A is kept open for inspection by the general public in the offices of the following officers for the period of one month :-

- (1) Dy. Director of Town Planning, Konkan Division, Konkan Bhavan, Navi Mumbai.
- (2) The Collector, Thane, Raigad.
- (3) Assistant Director of Town Planning, Thane Branch, Thane.
- (4) Assistant Director of Town Planning, Alibag Branch, Nirdhar Tilak Chowk, Alibag, Dist. Raigad.

(B) This notification is also available on Govt. web site www.urban.maharashtra.gov.in

SCHEDULE 'A'

Regulations for Development of Special Townships In Area Under Mumbai Metropolitan Regional Plan

A. GENERAL REQUIREMENTS

1. Applicability:- These Regulations would be applicable to the area under sanctioned Mumbai Metropolitan Regional Plan excluding the area under jurisdiction of Municipal Corporations, Municipal Councils, Cantonment Boards, Maharashtra Industrial Development Corporation and Special Planning Authority, if any.

1.1 Area Requirement

Any suitable area having access by means of an existing or a proposed road not less than 18 mt. can be identified for the purpose of development as “Special Township Project”. The area notified under the Special Township Project shall be one, contiguous, unbroken and uninterrupted and in any case shall not be less than 40 Ha. (100 acres) at one place which shall not include the area under forest, water bodies like river, creek canal, reservoir, lands falling within the belt of 500 mt. from the High Flood Line HFL of major lakes, dams and its surrounding restricted area, lands in the command area of irrigation Projects, land falling within the belt of 200 mt. from the historical monuments and places of Archaeological importance, Archaeological monuments, Heritage precincts and places, any restricted areas, notified National parks, existing and proposed industrial zone; gaathan areas or congested areas, truck terminus specially earmarked on Regional Plan, wildlife corridors and biosphere reserves, Eco-sensitive Zone/area, quarry Zone, Green Zone (G-2) and other environmentally sensitive areas, recreational tourism zone catchment areas of water bodies. Defence areas, Cantonment areas, notified area of SEZ, designated Port/ Harbour areas and designated Airport areas.

1.2 Manner of Declaration

Any area identified above and if found suitable can be Notified by Government in Urban Development Department by following procedure under section 20 read with section 18 of the Maharashtra Regional and Town Planning Act, 1966 and also in such other manner as may be determined by it for the purpose of development as “ Special Township Project

However, in cases where the proposal of Special Townships is submitted by the land owners by themselves or by the Developer who holds rights to develop the whole land under the Special

Township the area shall be notified by Govt. following procedure under section 18 of the said Act. In such cases procedure under section 20 shall not be necessary.

1.3 Infrastructure Facilities

The entire Township should be an integrated one with all facilities within the boundaries of declared townships. All the onsite infrastructure, i.e. roads, including R.P. roads, approach road, street lights, water supply and drainage system shall be provided and maintained in future by the developer till urban local body is constituted for such area and the developer shall also carry out development of amenity or proposals, if any designated in the Regional plan, in accordance with the prevailing regulations.

- (a) **Water supply** - The developer shall be required to develop the source for drinking water (excluding the groundwater source) or secure firm commitment from any water supply authority for meeting the daily water requirement of minimum 140 litres per capita per day exclusive of requirement of water for fire fighting and gardening. The storage capacity of the same shall be at least 1.5 times of the actual required quantity as determined by expected population (Resident and Floating) and other uses. The developer would be required to develop proper internal distribution and maintenance systems and shall specially undertake rain water harvesting, groundwater recharging and waste water recycling projects within the Township.
- (b) **Drainage and Garbage disposal** - The developer shall make suitable and environment friendly arrangements for the disposal and treatment of sewage and solid waste as per requirements of Maharashtra Pollution Control Board. Recycling sewage for gardening shall be undertaken by the developer.
The developer shall develop Eco-friendly garbage disposal system by adopting the recycling and bio-degradation system in consultation with Maharashtra Pollution Control Board.
- (c) **Power** - The developer shall ensure continuous and good quality power supply to township area. The developer may draw the power from existing supply system or may go in for arrangement of captive power generation with the approval from concerned authority. If power is drawn from an existing supply system, the developer shall before commencement of development, procure a firm commitment of power for the entire township from the power supply company.

1.4 Environment

The development contemplated in townships shall not cause damage to ecology, hi no case it shall involve topographical changes, changes in alignment of cross section of existing water course in any in the scheme area or adjacent to scheme area. Environmental clearance shall be obtained from the Ministry of Environment and Forest, Government of India as per directions issued by the MoEF's notification dated 7th July 2004. The Township shall provide at least 20 of the total area as park/garden/playground as mentioned in 4 (f) below, with proper landscaping and open uses designated in the Township shall be duly developed by owner/developer. This amenity shall be open to general public without any restriction or discrimination.

2. SPECIAL CONCESSIONS

- (a) N.A. Permission - Non-agriculture permission will be automatic. As soon as the scheme is notified, lands notified under Special Township area as per 1.2 will be deemed to have been converted into non-agriculture and no separate permission is required. Non-agriculture assessment however will commence from the date of sanction of scheme as per Regulation No.7(c).
- (b) Stamp Duty - The stamp duty rates applicable in Notified Special Township area shall be 50 of prevailing rates of the Mumbai Stamp Act.
- (c) Grant of Government Land. - Any Government land falling under township area shall be leased out to the developer at the prevailing market rate on usual terms and conditions, without any subsidy.
- (d) Relaxation from Mumbai Tenancy and Agriculture Land Act - The condition that only the agriculturist will be eligible to buy the agriculture land shall not be applicable in Special Township area.

- (e) Ceiling of agriculture land. - There shall be no ceiling limit for holding agriculture land to be purchased by the owner/developer for such project.
- (f) Exemption from Urban Land (Ceiling and Regulation) Act, 1976 - Special Township Projects will be exempted from the purview of Urban Land (Ceiling and Regulation) Act; 1976.
- (g) Scrutiny fee. - A Special Township Project shall be partially exempted from payment of scrutiny fee being levied by the Collector/Planning Authority for processing the development proposal on certain terms and conditions as may be decided by the Collector/Planning Authority.
- (h) Floating FSI - There will be floating FSI in the township. Unused FSI of one plot can be used anywhere in the whole township.
- (i) Special benefits / concessions in respect of Star Category Hotels, Hospitals and Multiplexes / Property Tax shall be provided.

3. PLANNING CONSIDERATIONS –

The Township Project has to be an Integrated Township Project. The project should necessarily provide land for following users:-

- a) Residential
- b) Commercial
- c) Educational
- d) Amenity Spaces
- e) Health Facilities
- f) Parks, Gardens and Play Grounds
- g) Public Utilities

4. GENERAL NORMS FOR DIFFERENT LAND USES –

The overall planning of the special townships shall be such that the project fairly meets with the specifications spelt out in the prevailing planning standards approved by Government. Further, the planning of Special Township shall take care of following land uses in particular.

- (a) **Residential** - The residential area should be well defined in clusters or neighborhoods or in plotted development with proper road grid. Out of the total floor area proposed to be utilised which is permissible as proportionate to zoning of area under such Special township projects at least 60% of the floor area may be used for purely residential development.
The Area earmarked for social housing for the Economically Weaker Section(E.W.S)/Lower Income Group (L.I.G) shall be governed by Regulation No.5.1(I) & 5.1(ii),in such a way that the building permission for the residential component of the special Township Project shall be given pro rata in accordance with the development of Social Housing for the E.W.S/L.I.G.
- (b) **Commercial** - The commercial area shall be properly distributed in hierarchical manner such as convenient shopping, community centre etc.
- (c) **Educational** - Comprehensive educational system providing education from primary to secondary should be provided as per the requirement. The area allocation should be on projected population base and as far as possible the educational complex should not be concentrated at one place. All such complexes should have area adequate allocation for playground. Minimum area required for educational purpose shall be as per prevailing planning standards.
- (d) **Amenity Spaces** - The area allocation for amenity space providing for amenities like market, essential shopping area, recreation centers, town hall, library etc. should not be less than 5 of gross area and should be evenly placed.
- (e) **Health Facilities** - Adequate area allocation for health facilities for primary health should be provided for. Minimum area required for health facilities shall be as per prevailing planning standards.
- (f) **Parks, Gardens and Play grounds** - The Township shall also provide adequate area as parks/ gardens/play grounds. This should be exclusive of the statutory open spaces to be kept in smaller layout and should be distributed in all residential clusters. This 20% area should be developed by the developer for such purposes and kept open to all general public.

(g) **Public Utilities** - Appropriate area allocation should be provided for (a) power receiving station/substation, (b) water supply system, (c) sewerage and garbage disposal system, police station

(e) **public parking, (f) cemetery/cremation ground, (g) bus station, fire brigade station** and other public utilities as per requirements.

(h) **Transport and Communication** - The entire area of township shall be well knitted with proper road pattern, taking into consideration the linkages with existing roads within the township and outside area as well. All such roads shall be developed by the developer as per standard and road widths shall be as given below:

Classified Road	- as prescribed.
Main road/Ring road	- 18 to 24 meter wide.
Internal road	- as per prevailing byelaws applicable to Regional Plan subject to minimum road width 9 mt.

(i) **Service Industries** - In the Special Township area, lands required for commercial uses, industrial uses, permissible in residential user, may also be earmarked. However, the predominated land use would be residential use.

(j) In order to make the Special Township Projects self-contained micro-centers of urban growth, the Special Township Project shall ideally be centered one or more key Economic activities like Trade /commerce, Education, Healthcare, on-Polluting Industries, Service industries, Township Project shall compulsorily provide minimum 20% Built-up Area for such economic activities and development of the Residential Component of the special Township Projects Shall be permissible pro rates, in accordance with the development of economic activity.

Explanation:-

- Educational activity and Healthcare activity mentioned above shall not include Primary/secondary schools and primary/secondary Healthcare facilities respectively.
- The total Built-up area for commercial activities under regulation No.4(b) And the total commercial built-up area under regulation No.4 (d) shall be counted toward the built-up area for the aforesaid Economic Activities.

Notes - (I) All the amenities referred to above shall be inclusive of designated amenities and Amenity space required as per regulations of Regional Plan.

(II) Regional Plan roads in the township area shall be developed and maintained by developer and the same shall be always open for general public without any restrictions there upon.

(III) Minimum parking shall be provided as per standardised Development Control and Promotion Regulations for Regional plan.

5. Development Control Regulations

Prevailing Development Control Regulations of sanctioned Regional Plan, along with the standardised Development Control and Promotion Regulation for Regional Plan as well as provision of MoEF CRZ Notification issued from time to time shall be applicable mutatis mutandis to the special Township Project, except for those expressly provided in these Regulations.

5.1 Special Township in Urbanisable (U2), Green (G1), (G2) Zone –

(i) The admissible FSI in respect of a Special Township Project in the U-1 Zone and U-2 Zone within the Regional Plan Area shall be as given below:-

Sr. No.	Area of Township in Ha.	Basic FSI on Gross Plot Area	Additional FSI (@ 20% of the basic FSI) for social hsg. for EWS/LIG (compulsory)	Additional FSI against payment of premium (optional)	Maximum Total Permissible FSI on Gross Plot Area
1	40 to 100	1.00	0.2	0.3	1.5
2	Above 100 to 200	1.00	0.2	0.4	1.6
3	Above 200	0.5	0.1	0.40	1.00

(ii) Special Township Project in G-1 Zone:-

Development of a Special Township Project in G-1 Zone contained in the regional plan shall be permissible, subject to the condition that 50 percent of the gross area of the Special Township Project shall be kept one while such project shall be execute on the remaining 50 percent land with basic FSI of 0.50, worked out the entire gross area of the Project. Further, while developing such Project, it shall be obligatory on the part of Developer to provide and develop all the infrastructure facilities, including the site required for the public purpose, as per the prescribed planning norms. As regards 50 per cent of the gross area which is required to be kept open, the same shall be made free of encumbrances and no development except town level open amenities, shall be permissible thereon.

Provide that over and above to built-up area corresponding to the basic FSI of 0.50, the Developer shall have to compulsorily provide built-up area, for the EWS (i.e 0.10 FSI on gross plot area) which shall not be count towards the total FSI of the Project.

(iii) Subject to the limits imposed by the overall FSI admissible under these Regulation to the Special Township Project, there shall be no limit on the total built up area / FSI utilization for the development of any individual plot in the Special Township Project Maximum height of any building shall be as per Standardised Development Control and Promotion Regulation for Regional plan.

However, the height of a building may be increased further, subject to provision of fire fighting arrangements, with prior approval of the director of a building above 36 mtr. The norms and the guidelines for marginal distances as specified in the National Building Code, as amended from time to time, shall be followed.

(iv) The planning & design of social Housing Component for EWS/LIG shall not be amenable to combining one or more flats to make larger flats.

(v) The tenements for EWS/LIG shall be constructed as per the specification given by the government and such constructed tenements of EWS/LIG shall be handed over MHADA at construction cost as per the ASR of the year in which commencement certificate is issued and MHADA shall distribute the same as per the prevailing policy of the Government.

- a) The Landowner / developer shall construct the stock of the EWS/LIG tenements in the same Special Township Project and the planning authority or the collector as the case may be ,shall ensure that the Occupation Certificate for the rest of the development under the Special Township Project is not issued till the occupation certificate is issued for the EWS/LIG tenements under said special Township Project.
- b) The completion of EWS/LIG tenements under the Special Township Project, along with necessary particulars including the copy of the Occupation certified granted by the planning Authority or the Collector, as the cause may be , in respect thereof shall be immediately intimated by the Landowner / developer to MHADA upon such imitation MHADA, within a period of six months from the date of purchase such EWS/LIG tenements or allot such tenements to the allot tees selected by MHADA through a system of lottery ,drawn after such EWS/LIG tenements have been granted Occupation certificate and thereafter, the Landowner / Developer shall dispose of such treatments to MHADA or such allottees, as the case may be , at the construction rates in the Annual Statements of Rates (ASR) prepared by the inspector General of Registration and controller of stamps applicable to the land under the project on the date of grant of occupation land under the project on the date of grant of occupation certificate to such EWS/LIG tenements.
- c) The Landowner /developer may also be permitted to utilies 1/4th of the total 20% FSI earmarked for the Special Township Project.

50% of the gross area of the project shall be kept open while the project of Special Township shall be executed on the remaining 50% land with gross built-up area/ FSI of 0.50 worked out on the entire gross area of the project. Further, while developing such projects, it would be obligatory on the part of the developer to provide and develop all the infrastructure facilities including sites required for public purposes as per the prescribed planning norms. As regards

50% of land which is required to be kept open, the same shall be made free of encumbrances and no development except town level open amenities shall be permissible thereon.

5.2 Other Special Regulations –

- (i) In every Special Township proposal the structural designer of developer has to submit declaration with project report to Collector / Planning Authority about the construction of building as below: 'I have confirmed that the proposed construction in the scheme are as per norms as specified by Indian Standards Institute, for the resistance of earthquake, fire safety and natural calamities'.
- (ii) Upper and lower ground floor type construction shall not be allowed.
- (iii) The following shall not be included in covered area for built up area and F.S.I. calculations :-
 - (a) Area covered by the staircase rooms for stair flights of width 0.75 m. & above, in case of row housing & pent houses and duplexes, 1 mt. in case of residential building, 1.2 mt. & above in case of commercial (mercantile) buildings, 2.00 mt. & above in the case of public & semi-public building, subject to payment of premium in consultation with Town Planning & Valuation Department.
 - (b) Area covered by lift room for a building with height upto 16 mt.
 - (c) Stilt floor space (exclusively for parking space) constructed under building of maximum cleared height 2.4 mt. and which shall be open atleast from three sides.
 - (d) Balcony or balconies of a minimum width of one mt. may be permitted free of F.S.I at any upper floor, subject to maximum of 1/3rd length of perimeter of building and such balcony projection shall be subject to the following conditions:
 - 1) No balcony shall be allowed on ground floor.
 - 2) Balcony or balconies shall be permitted to project in the marginal open space of not less than 3 mt. in width.
 - 3) Notwithstanding anything contained in any other laws, rules, regulations or bye-laws in force, a balcony shall not be permitted to be enclosed.
 - 4) In special Township schemes at the rate of minimum 150 trees per ha. and 400 trees per ha. respectively shall be planted and maintained by the developer.
 - 5) Once the proposal for special Township is submitted to the Government under Regulation No. 7(A) no change of zone proposal in such Township area shall be considered by Government.

6. Sale Permission –

It would be obligatory on the part of the developer firstly to provide for basic infrastructure and as such no permission for sale of plot/ flat shall be allowed unless the basic infrastructure as per Regulation No. 1.3 is completed by the developer to the satisfaction of the Collector. In case the development is proposed in Phases & sale permission is expected after completion of Phasewise basic infrastructure, such permission may be granted by the Collector. Before granting such sale permission, Developer has to submit undertaking about the basic infrastructure to be provided & completed phasewise by Developer. The plots earmarked for amenities, facilities, and utilities shall be also simultaneously developed phase-wise alongwith residential/allied development.

7. Procedure

- a) **Locational Clearance.** - The proposal for development of Special Township, alongwith details of ownership of land or Development rights of lands in the proposal scheme, site plan, part plan of sanction regional plan, shall be submitted to Government in Urban Development Department alongwith a copy to Director of Town Planning Maharashtra State, Pune Environment Department of Maharashtra State, Irrigation Department for grant of locational clearance. Upon receipt of such proposal, depending upon the merits of the case, locational clearance may be granted by Government u/s 18/2 of MR&TP Act, 1966 in consultation with the Director of Town Planning and Environment Department and other respective

departments of the State Government within a period of 90 days from the date of receipt of the proposal & after completion of all prescribed procedure specified in Regulation No. 1.2 above and compliance of any such document as may be required by Government. This locational clearance will be valid for one year from the date of issue and if within such period the letter of intent and final approval is not taken or not applied for, such clearance/approval will stand lapsed unless it is renewed by Govt. for sufficient reasons. Application for renewal has to be made to Govt. before expiry of one year. **In that case these special Regulations shall not be applicable to the area under such scheme.**

- b) **Letter of intent.** - Upon receipt of locational clearance from the Government, the developer shall submit the proposal in respect of Special Township to Collector, Thane & Raigad alongwith the environmental clearance as mentioned in Regulation No. 1.4 for issue of letter of intent. The proposal shall contain ownership rights/development rights, document in respect of at least 50 % of area under scheme and other particulars as decided and directed by Collector, Thane & Raigad. Details of qualified technical staff and consultant in technical and law field. Letter of intent shall be issued within a period of 45 days from the date of receipt of the completed full & final proposal. The letter of intent shall be valid for six months unless renewed.
- c) **Final Approval.** –
- (i) The Developer shall submit the layout plan of the entire township area, sector-wise detailed building plans and details of phasing, for final sanction to the Collector, Thane & Raigad. The developer shall also submit an undertaking and execute an agreement about development and maintenance of basic infrastructural amenities in future with bank guarantee of 15 of its development costs. The Collector, Thane & Raigad shall conduct proper enquiry and ensure the correctness of title and ownership etc. Only after such verification, Collector, Thane and Raigad shall grant approval to layout plan and sectorwise detailed building plan in consultation with Deputy Director of Town Planning, Konkan Division, Navi Mumbai within the stipulated period on terms and conditions as may be determined by Collector & Deputy Director of Town Planning, Konkan Division, Navi Mumbai. The period required by the Collector for Technical consultation with Deputy Director of Town Planning, Konkan Division, Konkan Bhavan, Navi Mumbai shall not be computed. Any one aggrieved by an order passed under prevailing Byelaws may within forty days of the date of communication of the order prefer an appeal to the Director of Town Planning, Maharashtra State, Pune. The appeal shall be cleared within 60 days.
 - (ii) Every application shall be accompanied by –
 - (a) Ownership Document: 7/12 extract/ Property Card, ownership right Document in original with list of such documents.
 - (b) Extent: Village maps showing the extent of area and authenticated measurement plan
 - (c) Authenticated copies of locational clearance and letter of intent environmental clearance is applicable.
 - (d) Layout and building (Prepared & signed by experts in respective field and team headed by an Architect Town Planner)
 - i. Layout plan showing all details of area utilized under roads, open spaces for parks, garden and playground amenities.
 - ii. Detail layout plan building plans of all development with area of all sector and individual plots and built up area/FSI proposed on each sector and plot.
 - iii. Detail Report comprising of expected population, requirement of amenities and proposed amenities with reference to prevailing planning standards approved by Government and sources of all basic amenities and it's details about implementation and maintenance & Taxes.
 - iv. Details of zoning of all areas included in the Scheme as per sanctioned R.P. and area under such zone.

- v. Details of FSI/Total built-up area proposed to be utilized in scheme.
- vi. Details of Eco friendly amenities provided
- vii. Plan showing "Road hierarchy and road widths, pedestrian facility, street furniture, plantation, side walk., subways with area details.
- viii. Details of solid waste management plan/ gut book of the land in original and list of such documents.
- ix. Plan showing HFL of major lakes, river if any certified by Irrigation Department.
- x. Plan showing details of distribution of total built-up area/space.
- xi. Plan showing water supply distribution system, including reservoirs, recycling system, details of rainwater harvesting system.
- xii. Details of storm water drainage scheme.
- xiii. Details of fire fighting mechanism, fire brigade station.
- xiv. All other documents as determined and directed by Collector, Thane, Raigad.

d) Transition Policy:

Any special township project in respect of which locational clearance has previously been granted and any Megacity scheme which is previously notified under section 20(4) of the Maharashtra Regional and Town Planning Act, 1996 and any Megacity scheme which is previously approved by MMRDA, prior to the date of coming into force of these modified provision (here in after referred to as modified scheme), may be allowed to be converted into a special Township project under the Modified scheme with the prior approval of the government , subjected to the following conditions:-

- i. FSI as per the Modified scheme shall be only on the balance unbuilt, unencumbered and buildable land parcel, having a minimum area of 8 Ha. If such balance unbuilt, unencumbered and buildable area is 8 Ha. or more but less than 40 Ha. then, admissible FSI on such land parcel, upon conversion shall be admissible on the basis of area of such land parcel as per the minimum given in Regulation 5.1(i) above for the respective zones. If such land parcel is more than 40 Ha. then, the admissible FSI shall be calculated as per the area wise entitlement given in regulation 5 for the respective zones.
- ii. Development on the balance area as per above shall be strictly in conformity with the planning Standards, Standardised Development Control and Promotion Regulation Plan etc. No relaxation shall be granted in respect of the marginal spaces, road width etc.
Note. - The above prescribed periods shall be computed after compliance of all the requirements listed above and any other additional information called for from the owner/developer by the Government / Collector.

8. Implementation & completion

- i. Development of Basic infrastructure & amenity shall be completed by the developer to the satisfaction of the Collector (consultation with Assistant Director of Town Planning, Thane/ Alibaug) as per phases of scheme. Development of the scheme shall be completed within 10 years from the date of final sanction to the layout plan of scheme.
- ii. No building in the scheme is permitted to be occupied in any manner unless occupancy certificate is issued by Collector, in consultation with local Branch Officer of Town Planning & Valuation Department.
- iii. Final completion certificate for the scheme is to be issued by Collector in consultation with Local Branch Officer of Town Planning and Valuation Department, Maharashtra Pollution Control Board, Forest Department as far as tree plantation is concerned and Fire Officer of state Government

- iv. Application for occupation certificate or final completion certificate shall be submitted along with a declaration and undertaking by the developer and his structural consultant. Architect Town Planner as follows :-
- a. We confirm that all buildings constructed in the scheme area are as per norms as specified by Indian Standard Institute for the resistance of earthquake, fire safety and natural calamities.
 - b. Work is done as per sanctioned plan.
 - c. Built-up area and FSI consumed in scheme is as per sanctioned plan
 - d. No balcony is enclosed.
 - e. If it is found that extra built up area/FBI is consumed in the scheme at any time, it shall be demolished by developer at his own cost as directed by Collector, Thane/ Raigad.

9. *Interpretation*

If any question or dispute arises with regard to interpretation of any of these regulations, the matter shall be referred to the State Government. The Government after considering the matter and, if necessary, after giving hearing to the parties, shall give a decision on the interpretation of the provisions of the Regulations. The decision of Government on the interpretation of these Regulation shall be final and binding on all concerned.

By order and in the name of the Governor of *Maharashtra*,

SUDHAKAR NANGNURE,
Deputy Secretary to Government

STANDARDISED DEVELOPMENT CONTROL AND PROMOTION REGULATIONS FOR REGIONAL PLAN AREAS IN MAHARASHTRA

PART – I ADMINISTRATION

1.0 SHORT TITLE, EXTENT AND COMMENCEMENT

1.1 These Regulations shall be called as “Development Control and Promotion Regulations for **Regional Plan Areas** in Maharashtra”

1.2 These Regulations shall apply to the building activity and development works on lands within the **Regional Plans in Maharashtra.**

1.3 (a) These Regulations shall come into force from the date of notification and these shall replace existing building bye-laws and Development Control Rules / Regulations of A, B, C Class Municipal Councils which were adopted in the Regional Plan

1.4 Provisions in Regional Plan:-

i) **Special provisions in Regional Plan** - Special provisions or express provisions made or special regulations as mentioned in respective sanctioned regional plans under the provisions of Maharashtra Regional & Town Planning Act, 1966, which are not covered under these Regulations, shall prevail, except Regulation for Special Township Projects.

ii) **CRZ Provisions:-** Wherever applicable, any development within CRZ areas shall be governed by the Coastal Regulation Zone Notification No.S.O.19(F), dated 6th January, 2011 as amended from time to time.

iii) **Heritage Regulations:-** Wherever applicable, the Heritage Regulations, establishment of Heritage Conservation Committee and the list of Heritage Sites shall be applicable as previously sanctioned by the Government/ concerned Competent Authority.

1.5 **Conflicts in provisions:** If there is any conflict between the provisions in sanctioned Regional Plan and the provisions in the sanctioned Development Control and Promotion Regulations for Regional Plan area in Maharashtra, in that case, the matter shall be referred to the Director of Town Planning, Maharashtra State, Pune whose decision shall be final.

1.6 **Savings:** Notwithstanding anything contained herein, any permission granted or any action taken under the Regulations in force prior to these Regulations shall be valid and continue to be so valid, unless otherwise specified.

2.0 DEFINITIONS

2.1 General

2.1.1 In these Regulations, unless the context otherwise requires, the definitions given hereunder shall have meaning indicated against each of them.

2.1.2 Words and expressions which are not defined in these Regulation shall have the same meaning or sense as in the -

- i) Maharashtra Municipal Councils, Nagar Panchayats and Industrial Townships Act, 1965
- ii) The Maharashtra Regional and Town Planning Act, 1966 and
- iii) National Building Code (2005 or amended from time to time)

2.2 Act –Act in these Regulations means

The Maharashtra Regional and Town Planning Act, 1966;

2.3 Authority - Authority means an Authority which has been created by a statute and which for the purpose of administering the Regulations may authorize a **Technical** Committee or an official **having a professional skill** to act on its behalf;

2.4 Alteration :- Any change in existing authorized building or change from one occupancy to another, or a structural change, such as an addition to the area or height, or the removal of part of a building, or any change to the structure, such as the construction of, cutting into or removal of any wall, partition, column, beam, joist, floor, roof or other support or a change to or closing of any required means of ingress or egress or a change to the fixtures of equipment as provided under these regulations. However modification in respect of gardening, white washing, painting, plastering, pointing, paving and retiling shall not be deemed to be alteration.

2.5 Advertising Sign :- Any surface of structure with characters, letters or illustrations applied thereto and displayed in any manner whatsoever outdoor for purposes of advertising or to give information regarding or to attract the public to any place, person, public performance, article or merchandise whatsoever, and which surface or structure is attached to, or forms a part of building, or is connected with any building or is fixed to a tree or to the ground or to any pole, screen, fence or hoarding or displayed in space

2.6 Air-conditioning :-The process of treating air so as to control simultaneously its temperature, humidity, cleanliness and distribution to meet the requirement of conditioned space

2.7 Accessory Building :-A building separate from the main building on a plot and containing one or more rooms for accessory use such as servants quarters, garage, store rooms or such areas as may be classified by the Director of Town Planning.

2.8 Accessory / Ancillary Use :-Any use of the premises subordinate to the principal use and incidental to the principal use.

2.9 Amenity Space :- For the purpose of these Regulations, amenity space means a statutory space kept in any layout to be used for any of the amenities such as open spaces, parks recreational grounds, playgrounds, sports complex, gardens, convenience shopping, parking lots, primary and secondary schools, clinics, dispensaries, nursery, health club, sub post-office, police station, electric substation, ATM of banks, electronic cyber library, open market, garbage bin, water supply installation, electricity supply installation, sewage treatment plant and includes other utilities, services and conveniences.

2.10 Access :- Clear approach to a plot or a building.

2.11 Architect :- An Architect who is an associate or corporate member of the Indian Institute of Architects or who holds a degree or diploma which makes him eligible for such membership for such qualification listed in Schedule XIV of the Architects Act, 1972, and being duly registered with the Council of Architecture under the Act.

2.12 Balcony :- A Horizontal cantilever or projection shown in the figure below, including parapet and handrail balustrade to serve as a passage or sitting out place with at least one side fully open, except being provided with railing or parapet wall for safety.

Balcony

SECTION

PLAN

- 2.13 Basement:** - The lower storey of a building below or partly below the ground level.
- 2.14 Building:-** Any structure for whatsoever purpose and of whatsoever materials constructed and every part thereof whether used as human habitation or not and includes foundation, plinth, walls, floors, roofs, chimneys, wells, door steps, fencing, plumbing and building services, fixed - platforms, verandahs, balcony; cornice or projection, part of a building or anything affixed thereto or any wall fence enclosing or intended to enclose any land or space and signs and outdoor display structures. However, tents, shamianas and the tarpaulin shelters erected for temporary and ceremonial occasions with the permission of the Authority shall not be considered as building.
- 2.15 Built up Area:-** The area covered by a building on all floors including cantilevered portion, mezzanine floors , if any, but excepting the areas excluded specifically under these Regulations.
- 2.16 Building Line:-** The line upto which the plinth of a building adjoining a street or an extension of a street or on a future street may lawfully extend.
- 2.17 Building Height :-** The vertical distance measured in the case of flat roofs, from the average level of the ground around and contiguous to the building or as decided by the Authority to the terrace of last livable floor of the building adjacent to the external walls; to the highest point of the building and in the case of pitched roofs, up to the point where the external surface of the outer wall intersects the finished surface of the sloping roof; and in the case of gable facing road, the mid-point between the eaves level and the ridge. Architectural features serving no other function except that of decoration shall be excluded for the purpose of measuring heights.
- 2.18 Builder :-“Builder”** means a person who is legally empowered to construct or to execute work on a building unit, building or structure, or where no person is so empowered, the owner of the building unit, building or structure.
- 2.19 Cabin :-** A non - residential enclosure constructed of non - load bearing, non masonry partitions **having area not exceeding 3.00 sq.m.**
- 2.20 Carpet Area :-** The net usable floor area within a building excluding that covered by the walls or any other areas specifically exempted from floor space index computation in these regulations.
- 2.21 Chajja :-**A sloping or horizontal structural overhang usually provided over openings on external walls to provide protection from sun and rain and for purpose of architectural appearance.
- 2.22 Chimney :-** An upright shaft containing one or more flues provided for the conveyance to the outer air of any product of combustion resulting from the operation of heat producing appliance or equipment employing solid, liquid or gaseous fuel.
- 2.23 Combustible Material :-** A material, if it burns or adds heat to a fire when tested for combustibility in accordance with IS - 3808 - 1966 Method of Test for combustibility of building materials, given in the National Building Code.

- 2.24 Control Line :-** A line on either side of a highway or part of highway beyond the building line fixed in respect of such highway by the Highway Authority.
- 2.25 Courtyard or Chowk :-**A space permanently open to sky enclosed on sides fully or partially by buildings and may be at ground level or any other level within or adjacent to a building.
- 2.26 Canopy :-**A projection over any entrance.
- 2.27 Congested Area -** A Congested Area means the congested area as shown on the Development Plan
- 2.28 Convenience Shopping :-** Means shops for domestic needs having area upto 10.00 sq.m
- 2.29 Corridor :-**A common passage or circulation space including a common entrance hall.
- 2.30 Detached Building :-** A building whose walls and roofs are independent of any other building with open space on all sides as specified.
- 2.31 Development :-** Development with its grammatical variations means the carrying out of buildings, engineering, mining or other operations in, on, over, or under land or the making of any material change, in any building or land or in the use of any building or land or any material or structural change in any Heritage building or its precinct and includes demolition of any existing building, structure or erection of part of such building, structure of erection and reclamation, redevelopment and layout or sub-division of any land and to develop shall be construed accordingly.
- 2.32 i)Development Plan :-**“Development Plan” means a plan for the development of the area within the jurisdiction of a Planning Authority and includes revision of a development plan and proposals of a Special Planning Authority for development of land within its jurisdictions.
- ii)Regional Plan:-**“Regional Plan” means a plan for the development or redevelopment of a region which is approved by the State Government and has come into operation under Maharashtra Regional & Town Planning Act, 1966.
- 2.33 Drain :-**The word “Drain” shall have the same meaning assigned thereto as under Maharashtra Municipal Councils, Nagar Panchayats& Industrial Townships Act, 1965.
- 2.34 Dwelling Unit /Tenement :-**An independent housing unit with separate facilities for living, cooking and sanitary requirements.
- 2.35 Density :-**The residential density expressed in terms of the number of dwelling units per hectare.
- 2.36 Enclosed Stair- case :-** A stair case separated by fire resistant walls and door (s) from the rest of the building.
- 2.37 Existing Building or Use:-** A building, structure or its use existing authorisedly.
- 2.38 Exit: -** A passage, channel or means of egress from any building, storey or floor area to a street or other open space of safety.
- 2.38.1 Vertical Exit: -**A vertical exit is a means of exit used for ascension or descension between two or more levels including stairways, smoke proof towers, ramps, escalators and fire escapes.
- 2.38.2 Horizontal Exit:-** A horizontal exit is a protected opening through or around a firewall or a bridge connecting two buildings.
- 2.38.3 Outside Exit :-** An outside exit is an exit from the building to a public way, to an open area leading to a public way, to an enclosed fire resistive passage to a public way.
- 2.39 External Wall: - External Wall means** an outer wall of a building, not being a party wall even though adjoining to a wall of another building and also means a wall abutting on an interior open space of any building.
- 2.40 Escalator -** A power driven, inclined, continuous stairway used for raising or lowering passengers.

- 2.41 Fire and/ or Emergency Alarm System :-** An arrangement of call points or detectors, sounders and other equipment's for the transmission and indication of alarm signals, for - testing of circuits and, whenever required, for the operation of auxiliary services. This device may be workable automatically or manually to alert the occupants in the event of fire or other emergency.
- 2.42 Fire lift :-** One of the lifts specially designed for use by fire service personnel in the event of fire.
- 2.43 Fire Proof Door :-** A door or shutter fitted to a wall opening, and constructed and erected with the requirement to check the transmission of heat and fire for a specified period.
- 2.44 Fire Resisting Material:-** Material which has certain degree of fire resistance.
- 2.45 Fire Resistance :-** The time during which a material fulfills its function of contributing to the fire safety of a building when subjected to prescribed conditions of heat and load or restraint. The fire resistance test of structures shall be done in accordance with "IS -3809 - 1966 Fire Resistance Test of Structures".
- 2.46 Fire Separation :-** The distance in meters measured from any other building on the site, or from other site, or from the opposite side of a street or other public space to the building.
- 2.47 Fire Service Inlets :-** A connection provided at the base of a building for pumping up water through in-built firefighting arrangements by fire service pumps in accordance with the recommendations of the Fire Services Authority.
- 2.48 Fire Tower :-** An enclosed staircase which can only be approached from the various floors through landings or lobbies separated from both the floor areas and the staircase by fire resisting doors, and open to the outer air.
- 2.49 Floor :-** The lower surface in a storey on which one normally walks in a building. The general term floor unless otherwise specifically mentioned shall not refer to a mezzanine floor.
Note :- The sequential numbering of floor shall be determined by its relation to the determining entrance level. For floor at or wholly above ground level, the lowest floor in the building with direct entrance from / to road or street shall be termed as ground floor. The other floors above ground floor shall be numbered in sequence as Floor 1, Floor 2, etc., with the number increasing upwards.
- 2.50 Floor space index (F. S. I) :-** The quotient obtained by dividing the total covered area (plinth area) on all floors, excluding exempted areas as given in Regulation No.15.4.2 by the area of the plot.
- $$\text{F.S.I.} = \frac{\text{Total covered areas on all floors}}{\text{Plot area}}$$
- 2.51 Footing:-**A foundation unit constructed in brick work, masonry or concrete under the base of a wall or column for the purpose of distributing the load over a large area.
- 2.52 Foundation :-**That part of the structure which is in direct contact with and transmitting loads to the ground.
- 2.53 Front :-** The space between the boundary line of plot abutting the means of access / road / street and the building line. In case of plots facing two or more means of accesses / roads / streets, the plot shall be deemed to front on all such means of access / road / streets.
- 2.54 Gallery :-** An intermediate floor or platform projecting from a wall or an auditorium or a hall providing extra floor area, additional seating accommodation etc. These shall also include the structures provided for seating in stadia.
- 2.55 Garage-Private:-** A building or portion thereof, designed and used for parking of privately owned motor driven or other vehicles.
- 2.56 Garage-Public :-**A building or portion thereof, designed as other than a private garage, operated for gain, designed or used for repairing, servicing, hiring, selling or storing or parking motor driven or other vehicles.

- 2.57 Group Housing Scheme :-** Group Housing Scheme means a building or a group of buildings constructed or to be constructed with one or more floors, consisting of more than one dwelling units and having common service facilities. Common service facilities means facilities like stair case, balcony, corridor, and varandaha, lift, etc
- 2.58 Ground Level :-** The average level of ground in a plot (site).
- 2.59 Habitable Room :-** Habitable room or living room means, a room constructed or intended for human habitation.
- 2.60 Home Occupation :-** Customary home occupation other than the conduct of an eating or a drinking place offering services to the general public, customarily carried out by a member of the family residing on the premises without employing hired labour, and for which there is no display to indicate from the exterior of the building that it is being utilized in whole or in part for any purpose other than a residential or dwelling use, and in connection with which no article or service is sold or exhibited for sale except that which is produced therein, which shall be non-hazardous and not affecting the safety of the inhabitants of the building and the neighborhood and provided that no mechanical equipment is used except for what is customarily used for purely domestic or household purposes and / or employing licensable goods. If motive power is used, the total electricity load should not exceed 0.75 KW. 'Home Occupation' may also include such similar occupations as may be specified by the Authority with the approval of Director of Town Planning and subject to such terms and conditions as may be prescribed.
- 2.61 High Rise Building :-** The Buildings 15 m. or above in height, excluding chimneys, cooling towers, boiler, rooms / lift machine rooms, cold storage and other non-working areas in case of industrial buildings, and water tanks, and architectural features in respect of other buildings shall be considered as high rise building.
- 2.62 Information Technology Establishment (ITE) :-** ITE means an establishment which is in the business of developing either software or hardware relating to computers or computer technology as approved by Director of Industries.
- 2.63 Layout Open Space / Recreational Open Space :-** Layout Open Space means a statutory common open space kept in any layout exclusive of margins and approaches, at a height not more than ground level of the building unit.
- 2.64 Ledge or Tand :-** A shelf like projection, supported in any manner whatsoever, except by vertical supports within a room itself but not having projection wider than half a meter.
- 2.65 Licensed Engineer / Structural Engineer / Supervisor :-** A qualified Engineer/Structural Engineer / Supervisor licensed by the concerned district officer of the Town Planning Directorate.
- 2.66 Lift :-** An appliance designed to transport persons or materials between two or more levels in a vertical or substantially vertical direction, by means of a guided car platform.
- 2.66a Lift Machine:** Part of the lift equipment comprising the motor(s) and the control gear there with, reduction gear (if any), brakes and winding drum or sheave, by which the lift car is raised or lowered.
- 2.66b Lift Well:** Unobstructed space within an enclosure provided for the vertical movement of the lift car(s) and any counter weights, including the lift pit and the space for top clearance.
- 2.67 Loft :-** Loft means, an intermediate floor between two floors, with a maximum height of 1.5 m., which is constructed and used for storage purpose. The loft if provided, in a room shall not cover more than 30% of the floor area of the room or a residual space in a pitched roof, above normal floor level which is constructed and used for storage purposes.
- 2.68 Laying out of New Street :-** It includes provision of road for leveling, formation, metalling or paving of a road and footpaths, etc. including layout of the services such as water supply, drainage, etc.

- 2.69 Mall:-** A large enclosed shopping area.
- 2.70 Marginal Open Space / Set back :-** Minimum distance required to be left open to sky between the boundary of the building plot and the building excluding court yard/chowk, which is an integral part of the plot.
- 2.71 Masonry :-** An assemblage of masonry units properly bound together with mortar.
- 2.72 Mezzanine floor :-** An intermediate floor between two floors of any story, forming an integral part of floor below, overhanging or overlooking a floor beneath, not being a loft between the floor and the ceiling of any storey.
- 2.73 Means of Access :-** These shall include the road/street/vehicular access way, pathway upto the plot and to the building within a plot.
- 2.74 Net plot area:** The net plot area shall be as defined in Regulation No.13.4.1.
- 2.75 Non -Combustible Material: -** A material which does not burn nor add heat to a fire when tested for combustibility in accordance with IS: 3808 - 1966 'Method of Test for Combustibility of Building Materials'.
- 2.76 Non-conforming User: -** Any lawful use / building existed on the site but which does not conform to the zoning shown on the Development Plan.
- 2.77 Occupancy or Use Group :-** The principal occupancy or use for which a building or a part of a building is used, or intended to be used, for the purposes of classification of a building according to the occupancy, an occupancy shall be deemed to include subsidiary occupancies which are contingent upon it. Buildings with mixed occupancies are those buildings in which more than one occupancy are present in different portions of the building. The occupancy classification shall have the meaning given from 2.77.1 to 2.77.11 unless otherwise spelt out in Development Plan.
- 2.77.1 Residential Buildings:-** These shall include any building in which sleeping accommodation is provided for normal residential purposes with or without cooking or dining or both facilities. It includes one or two or multi-family dwellings, lodging or rooming houses, residential hotels, hostels, dormitories, dharmshalas, apartment houses, flats, service apartment, studio apartment and private garages incidental thereto.
- 2.77.2 Educational Buildings :-**A building exclusively used for a school or college recognized by the appropriate Board or University, or any other competent authority involving assembly for instruction, education or recreation incidental to educational use, and including a building for such other users incidental thereto such as library, coaching class or a research institution. It shall also include quarters for essential staff required to reside in the premises and a building used as a hostel attached to an educational institution whether situated in its campus or not and, also includes buildings used for daycare purposes more than 8 hours per week.
- 2.77.3 Institutional Buildings :-** A building constructed or used by Government, Semi - Government organization or registered trusts or persons and used for medical or other treatment, a hostel for working women or an auditorium or complex for cultural and allied activities or for an Hospice care of persons suffering from physical or mental illness, handicap, disease or infirmity, care of orphans, abandoned women, children and infants, convalescents, destitute or aged persons and for penal or correctional detention with restricted liberty of the inmates ordinarily providing sleeping accommodation, and includes hospitals, sanatoria, custodial and penal institutions such as jails, prisons, mental hospitals, houses of correctional detention and reformatories.

- 2.77.4 Assembly Buildings :-** These shall include any building or part of building where groups of people congregate or gather for amusement, recreation or, social, religious, patriotic, civil, travel and similar purposes, e.g. theatres, motion picture house, drive-in-theatres, multiplexes, assembly halls, city halls, town halls, auditoria, exhibition halls, museums, mangalkaryalaya, cultural centre, skating rinks, places of worship, dance theatres, club & gymkhana, passenger stations and terminals of air, surface and other public transportation services, recreation piers and stadia.
- 2.77.5 Business Buildings:-** These shall include any building or part of building, which is used for transaction of business for the keeping of accounts and records for similar purposes; offices, banks, professional establishments, I.T. establishments, call centre, offices for private entrepreneurs, court houses, libraries shall be classified in this group in so far as principal function of these is transaction of public business and the keeping of books and records.
- 2.77.6 Office Building / Premises:-** The premises whose sole or principal use is to be used as an office or for office purpose; "office purposes" shall include the purpose of administration, clerical work, handling money, telephone/ telegraph/ computer operations and "clerical work" shall include writing, book-keeping, sorting papers, typing, filing, duplicating, drawing of matter for publication and the editorial preparation of matter for publication.
- 2.77.7 Mercantile Buildings :-**These shall mean and include any building or part of a building, which is used as shops, stores, market, malls for display and sale of merchandise either wholesale or retail, Office, storage and service facilities incidental to the sale of merchandise and located in the same building shall be included under this group.
- 2.77.8 Wholesale Establishments: -**These shall mean and include establishments wholly or partly engaged in wholesale trade, manufactures, wholesale outlets including related storage facilities, A.P.M.C. establishments, warehouses and establishments engaged in truck transport including truck transport booking agencies.
- 2.77.9 Industrial Buildings :-** These shall mean and include any building or part of a building or structure, in which products or materials of all kinds and properties are fabricated, assembled or processed like assembling plants, laboratories, power plants, smoke houses,refineries,gas plants, mills, dairies, factories etc.
- 2.77.10 Storage Buildings :-** These shall mean and include any building or part of a building used primarily for the storage or sheltering of goods, wares or merchandise, like ware houses, cold storage, freight depots, transit sheds, godowns, store houses, public garages, hangars, truck terminals, grain elevators, barns and stables.
- 2.77.11 Hazardous Buildings :-** These shall mean and include any building or: part of a building which is used for the storage, handling, manufacture or processing of highly combustible or explosive materials or products which are liable to burn with extreme rapidity and / or which may produce poisonous gases or explosions during storage, handling, manufacturing or processing, which involve highly corrosive, toxic or noxious alkalis, acids or other liquids or chemicals producing flames, fumes and explosive, mixtures of dust or which result in the division of matter into fine particles subject to spontaneous ignition.
- 2.78 Owner: -** The person who has legal title for land or building.
- 2.79 Parapet: -** A low wall or railing built along the edge of a roof, terrace, balcony, verandah etc.
- 2.80 Parking Space :-** An enclosed or unenclosed, covered or open area sufficient in size to park vehicles. Parking space shall be served by a driveway connecting them with a street or alley and permitting ingress or egress of vehicles.
- 2.81 Permit / Permission: -** A permission or authorisation in writing by the Authority to carry out the work regulated by these Regulations.

- 2.82 Plinth:** - The portion of a structure between the surface of the surrounding ground and surface of the floor immediately above the ground.
- 2.83 Plot / Site:** -A parcel or piece of land enclosed by definite boundaries and approved by an authority as a building site, under these Regulations.
- 2.84 Porch:** -A covered surface supported on pillars or otherwise for the purpose of pedestrian or vehicular approach to a building.
- 2.85 Road / Street :-** Any highway, street, lane, pathway, alley, stairway, passageway, carriageway, footway, square place or bridge, whether a thoroughfare or not, over which the public have a right of passage or access or have passed and had access uninterruptedly for a specified period, whether existing or proposed in any scheme, and includes all bunds, channels, ditches, storm-water drains, culverts, sidewalks, traffic islands, roadside trees and hedges, retaining walls, fences, barriers and railings within the street lines.
- 2.86 Road / Street Line:** - The line defining the side limit of a road / street.
- 2.87 Room Height:** - The vertical distance measured from the finished floor surface to the finished ceiling/ slab surface. In case of pitched roofs, the room height shall be the average height between bottom of the eaves and bottom of ridge.
- 2.88 Row Housing:** -A row of houses with only front, rear and interior open spaces.
- 2.89 Semi Detached Building:** - A building detached on three sides with open spaces as specified.
- 2.90 Site corner :-** The side at the junctions of and fronting on two or more intersecting streets.
- 2.91 Site, Depth of :-** The mean horizontal distance between the front and rearside boundaries.
- 2.92 Site, Double Frontage:** -A site, having a frontage on two streets other than a corner plot.
- 2.93 Site, Interior or Tandem:** - A site, access to which is by a passage from a street whether such passage forms part of the site or not.
- 2.94 Smoke Stop Door:** - A door for preventing or checking the spread of smoke from one area to another.
- 2.95 Stair Cover :-**A structure with a covering roof over a stair case and its landing built to enclose only the stair for the purpose of providing protection from weather and not used for human habitation.
- 2.96 Stilts or Stilt Floor :-** Stilts or stilt floor means portion of a building above ground level consisting of structural column supporting the super structure with at least two sides open for the purpose of parking vehicles, scooters, cycles, etc.
- 2.97 Storage :-** A place where goods are stored.
- 2.98 Store Room :-**A room used as storage space.
- 2.99 Storey :-** The portion of a building included between the surface of any floor and the surface of the floor next above it, or if there be no floor above it, then the space between any floor and the ceiling next above it
- 2.100 Tenement :-**An independent dwelling unit with a kitchen or cooking alcove.
- 2.101 Terrace:-** A flat open to sky roof of a building or a part of a building having parapet, not being a cantilever structure.
- 2.102 To Erect :-** To erect a building means
- (a) to erect a new building on any site whether previously built upon or not;
 - (b) to re-erect any building of which portions above the plinth level have been pulled down, burnt or destroyed; and
 - (c) conversion from one occupancy to another.
- 2.103 Travel Distance :-** The distance from the remotest point on a floor of a building to a place of safety, be it a vertical exit, horizontal exit or an outside exit measured along the line of travel.

- 2.104 Tower like structure :-** A structure in which the height of the tower like portion is at least twice the width of the broader base.
- 2.105 Unsafe Building :-** Unsafe buildings are those which are structurally unsafe, unsanitary or not provided with adequate means of ingress or egress which constitute a fire hazard or are otherwise dangerous to human life or which in relation to existing use constitute a hazard to safety or health or public welfare, by reason of inadequate maintenance, dilapidation or abandonment.
- 2.106 Verandah :-** A covered area with at least one side open to the outside with the exception of 1 m. high parapet on the upper floors to be provided on the open side.
- 2.107 Water Closet (WC) :-**A privy with arrangement for flushing the pan with water. It does not include a bathroom.
- 2.108 Water Course :-** A natural channel or an artificial one formed by draining or diversion of a natural channel meant for carrying storm water and waste water.
- 2.109 Width of Road :-** The whole extent of space within the boundaries of road when applied to a new road, as laid down in the city surveys map or Regional plan or prescribed road lines by any Act or Law and measured at right angles to the course or intended course of direction of such road whichever is more.
- 2.110 Window :-**An opening to the outside other than the door which provides all or part of the required natural light, ventilation or both, to the interior space.

3.0 APPLICABILITY OF REGULATIONS

- 3.1** These regulations shall apply to all development, redevelopment, erection and/or re-erection of a building, change of user etc. as well as to the design, construction or reconstruction of, and additions and alteration to a building. These regulations shall also apply to any revision of the Development Permissions/Building Permissions granted earlier under any Development Control Regulations Further these Regulations shall apply to development work defined in Regulation No.3.2 to 3.4.
- 3.2 Part Construction:** - Where the whole or part of a building is demolished or altered or reconstructed, removed, except where otherwise specifically stipulated, these Regulations apply only to the extent of the work involved.
- 3.3 Change of Occupancy / User:** -Where the occupancy or the user of a building is changed, except where otherwise specifically stipulated, these Regulations shall apply to all parts of the building affected by the change.
- 3.4 Reconstruction:** - The reconstruction in whole or part of a building which has ceased to exist due to an accidental fire, natural collapse or demolition, having been declared unsafe, or which is likely to be demolished by or under an order of the Authority and for which the necessary certificate has been given by the said Authority shall be allowed subject to the provisions in these Regulations.

4.0 INTERPRETATION

- 4.1** In these Regulations, the use of present tense includes the future tense, the masculine gender includes the feminine and the neutral, the singular number includes the plural and the plural includes the singular. The word 'person' includes a corporation/company 'writing' includes 'printing' and 'typing' and 'signature' includes thumb impression made by a person who cannot

write if his name is written near such thumb impression.

- 4.2 Whenever sizes and dimensions of rooms and spaces within buildings are specified, they shall mean clear dimensions unless otherwise specified in these Regulations.

5. DEVELOPMENT PERMISSION AND COMMENCEMENT CERTIFICATE.

- 5.0 No person shall carry out any Development, in contravention of the Development Plan / Regional Plan proposals.

- 5.1 No person shall carry out any development work including development of land by laying out into suitable plots or amalgamation of plots or development of any land as group housing scheme or to erect, re-erect or make alterations or demolish any building or cause the same to be done without first obtaining a separate building permit / commencement certificate for each such development work / building from the Authority.

- 5.2 No temporary construction shall be carried out without obtaining prior approval of the Planning Authority, which may be granted subject to such conditions as may be deemed necessary by the Planning Authority.

5.3 Development undertaken on behalf of Government :-

The office in-charge of the Government Department shall inform in writing to the concern Authority if any, or elsewhere the Collector, of the intention to carry out its purpose along with details of such development or construction as specified below :-

- i) An official letter by the authorized officer of Government Department addressed to the Authority, giving full particulars of the development work or any operational construction.
- ii) Ownership document and measurement plan issued by the Competent Authority of Land Records Department.
- iii) Development / building plans conforming to the provisions of Development Plan and these Regulations for the proposed development work to the scale specified in these Regulations.
- iv) The proposals of the Regional/ Plan or Town Planning Scheme affecting the land.
- v) A Site Plan (with required number of copies) of the area proposed to be developed to the scale.
- vi) Detailed plan (with required number of copies) showing the plan, sections and elevations of the proposed development work to the scale, including existing buildings specified either to be retained or to be demolished.

- 5.3.1 The operational construction of the Government, whether temporary or permanent which is necessary for the operation, maintenance, development or execution of any of the following services shall be exempted from the provisions of these Regulations:-

- (i) Railways;
- (ii) National Highways;
- (iii) National Waterways;
- (iv) Airways and Aerodromes;
- (v) Major Ports;
- (vi) Posts and Telegraphs, telephones, wireless, broadcasting and other like forms of communication, excluding mobile towers;
- (vii) Regional grid for electricity;

- (viii) Defence Authorities;
- (ix) Any other essential public service as may be notified by the State Government.

All such constructions shall however, conform to the prescribed requirements for the provision of essential services, water supply connection, drains, etc. to the satisfaction of the Authority.

5.3.2 However the following constructions of the Government Departments do not come under the purview of operational construction for the purpose of exemption under Regulation No.5.3.1

- (i) New residential building (other than gate lodges, quarters for limited essential operational staff and the like), roads and drains in railway colonies, hospitals, clubs, institutes and schools in case of Railways; and
- (ii) New building, new construction or new installation or any extension thereof, in case of any other services.

5.3.3 However, no permission shall be necessary for the following types of works:-

- i) The carrying out of works in compliance with any order or direction made by any authority under any law for the time being in force.
- ii) The carrying out of work by any Authority in exercise of its powers under any law for the time being in force.
- iii) The carrying out of any works by the Central or State Government or any local authority-
 - (a) required for the maintenance or improvement of highway, road or public street, being works carried out on land within the boundaries of such highway, road or public street; or
 - (b) required for or the purpose of inspecting, repairing or renewing any drains, sewers mains, pipes, cable, telephone or cables, or other apparatus including the breaking open of any street, or other land for the purpose.

Provided that the concerned authority shall inform the local authority, in writing, one month before carrying out such development.

- iv) The excavation (including excavation of wells) made in the ordinary course of agricultural operation.
- v) The construction of a road intended to give access to land solely for agricultural purpose.
- vi) Normal use of land which has been used temporarily for other purposes like marriage pandals or for festive occasions; and
- vii) In case of land, normally used for one purpose and occasionally used for any other purpose, such occasional use of land for that other purpose.

6.0 PROCEDURE FOR OBTAINING DEVELOPMENT PERMISSION / BUILDING PERMIT / COMMENCEMENT CERTIFICATE.

6.1 Notice: - Every person who intends to carry out development and erect, re-erect or make alterations in any place in a building or demolish any building, shall give notice in writing to the Authority of his said intention in the prescribed form (See Appendix A1 or A2) and such notice shall be accompanied by the payment receipt of required scrutiny fee and any other fee/ charges prescribed by the Authority from time to time and the plans and statements in sufficient copies (See Regulation No. 6.1.1), as required under Regulation No. 6.2 and 6.3. The plans may be ordinary prints on Ferro paper or any other type (prints only). One set of plans shall be retained in the office of the Authority for record after the issue of permit or refusal. For the sake of

scrutiny the plans may be submitted in the form of soft copy as specified by the Authority from time to time.

6.1.1 Copies of Plans and Statements: - Minimum four copies of plans and statements shall be made available along with the notice. In case of building schemes, where clearance is required from other agencies like Fire Services, number of copies of plans required shall be as decided by the Authority.

6.2 Information Accompanying Notice: - The notice shall be accompanied by the key (location plan), site plan, sub-division layout plan, building plan, services plans, specifications and certificate of supervision and ownership title as prescribed in Regulation No. 6.2.1 to 6.2.13.

6.2.1 Size of drawing sheets and colouring of plans.

6.2.1.1 The size of drawing sheets shall be any of those specified in **Table 1**.

Table No 1-DRAWING SHEET SIZES

Sr. No.	Designation	Trimmed Size, (In mm)
(1)	(2)	(3)
1	AO	841 x 1189
2	A1	594 x 841
3	A2	420 x 594
4	A3	297 x 420
5	A4	210 x 297

If necessary, submission of plans on sheets bigger than A0 size is also permissible.

6.2.1.2 Colouring Notations for Plans: - The Plans shall be coloured as specified in Table 2 herein under. Prints of plans shall be on one side of paper only.

6.2.1.3 Dimensions: All dimensions shall be indicated in metric units.

**Table No -2
COLOURING OF PLANS**

Sr. No.	Item	Site Plan		Building Plan	
		White Plan	Ammonia Print	White Plan	Ammonia Print
(1)	(2)	(3)	(4)	(5)	(6)
1.	Plot lines	Thick Black	Thick Black	Thick Black	Thick Black
2.	Existing Street	Green	Green
3.	Future street if any	Green dotted	Green dotted
4.	Permissible Building lines	Thick dotted black	Thick dotted black

5.	Marginal Open Spaces	No Colour	No Colour	No Colour	No Colour
6.	Existing work	Black (outline)	Blue	Black	Blue
7.	Work proposed to be demolished	Yellow hatched	Yellow hatched	Yellow hatched	Yellow hatched
8.	Proposed work	Red filled in	Red	Red	Red
9.	Drainage & sewerage work	Red dotted	Red dotted	Red dotted	Red dotted
10.	Water supply work	Black dotted thin	Black dotted thin	Black dotted thin	Black dotted thin
11.	Deviations from the sanctioned plan	Red hatched	Red hatched	Red hatched	Red hatched
12.	Recreational open space / Ground / layout open space	Green wash	Green wash	Green wash	Green wash
Note:-	For land development/sub-division/layout/building plan, suitable colouring notations shall be used which shall be indexed.				

6.2.2 Ownership title and area: - Every application for development permission and commencement certificate shall be accompanied by the following documents for verifying the ownership and area etc. of the land.

- (a) Attested copy of original registered sale / lease - deed / power of attorney / enabling ownership document wherever applicable.
- (b) V.F. No. 7/12 extracts or property register card of a date not more than six months prior to the date of submission and a certified copy of the Measurement Plan of the property under development proposal.
- (c) Statement of area of the holding by triangulation method from the qualified licensed technical personnel or architect with an affidavit from the owner with regard to the area in the form prescribed by the Authority.
- (d) Any other document prescribed by the Authority.
- (e) Wherever third party interest is created by way of agreement to sale or mortgage etc. the registered consent of such interested persons shall be submitted with the application.
- (f) A certified copy of approved sub-division / amalgamation / layout of land from the concerned authority.
- (g) In the case of land leased by the Government or local authorities, no objection certificate of Government or such authorities shall be obtained if there is deviation from lease conditions and shall be attached to the application for development permission in respect of such land.

6.2.3 Key Plan or Location Plan:- A key plan drawn to a scale of not less than 1:10,000 shall be submitted as a part of building plan / development proposal alongwith the application for a building permit and commencement certificate; showing the boundary and location of the site with respect to neighbourhood landmarks or with respect to the area within the radius of 200 m. from the site, whichever is more.

6.2.4 Site Plan: The site plan shall be submitted with an application for building permission drawn to a scale of 1:500 or more as may be decided by the Chief Officer. This plan shall be based on the

measurement plan duly authenticated by the appropriate officer of the Department of Land Records. This plan shall have the following details :-

- a) The boundaries of the site and of any contiguous land belonging to the neighbouring owners;
- b) The position of the site in relation to neighbouring streets ;
- c) The name of the street, if any, from which the building is proposed to derive access;
- d) All existing buildings contained in the site with their names (where the buildings are given names) and their property numbers;
- e) The position of the building and of other buildings, if any, which the applicant intends to erect, upon his contiguous land referred to in (a) above in relation to;
 - (i) The boundaries of the site and, in a case where the site has been partitioned, the boundaries of the portions owned by others;
 - (ii) All adjacent streets, buildings (with number of storeys and height) and premises within a distance of 12 m. of the work site and of the contiguous land (if any) referred to in (a), and
- f) The means of access from the street to the building and to all other buildings (if any) which the applicant intends to erect upon.
- g) The space to be left around the building to secure free circulation of air, admission of light and access;
- h) The width of the street (if any) in front and the street (if any) at the side of or near the building, including the proposed roads;
- i) The direction of the north line relative to the plan of the building;
- j) Any existing physical features, such as wells, tanks, drains, pipe lines, high tension line, railway line, trees, etc.;
- k) The ground area of the whole property and the break-up of the covered area on each floor;
- l) A plan indicating parking spaces as required and provided under these regulations;
- m) Overhead electric supply lines, if any, including space for electrical transformer / substation according to the requirements of the electric distribution company.
- n) Any water course existing on site;
- o) Existing alignments of water supply and drainage line;
- p) Such other particulars as may be prescribed by the Authority.

6.2.5 Sub - Division/ Layout Plan :- In the case of development of land, the notice shall be accompanied by the sub -division/ layout plan which shall be drawn to a scale of not less than 1:500, however, for layout having area of 4.0 ha. and above, the plan shall be drawn to a scale of not less than 1:1000, containing the following:

- (a) Scale used and north point;
- (b) The location of all proposed and existing roads with their existing /proposed widths within the land;
- (c) Dimension of plots;
- (d) The location of drains, sewers, public facilities and services, electrical lines, natural water courses, water bodies and streams etc.
- (e) Table indicating size, area and use of all plots in the sub-division/ layout plan;
- (f) The statement indicating the total area of the site, area utilized under roads, recreational open spaces, play ground, recreation spaces and development plan reservation / roads, schools, shopping and other public places along with their percentage with reference to the total area of the site proposed to be sub-divided / laid out;

- (g) In case of plots which are sub-divided in built-up areas, in addition to the above, the means of access to the sub-division from existing streets.
- (h) Contour plan of site, wherever necessary.

6.2.6. Building Plan:-

The plans of the buildings with elevations and sections accompanying the notice shall be drawn to a scale of 1:100 and shall -

- (a) include floor plans of all floors together with the covered area clearly indicating the sizes of rooms and the position and width of staircases, ramps and other exit ways, lift-wells, lift machine rooms and lift pit details. It shall also include ground floor plan as well as basement plans and shall indicate the details of parking spaces, loading and unloading spaces provided around and within building as also the access ways and the appurtenant open spaces with projections in dotted lines, distance from any building existing on the plot in figured dimensions along with accessory building;
- (b) show the use or occupancy of all parts of the building;
- (c) show exact location of essential services e.g. WC, sink, bath and the like;
- (d) include sectional drawings of the building showing all sectional details;
- (e) show all street elevations;
- (f) give dimensions of the projected portions beyond the permissible building line;
- (g) include terrace plan indicating the drainage and the slopes of the roof;
- (h) give indication of the north point relative to the plans; and
- (i) give dimensions and details of doors, windows and ventilators;

6.2.6.1 Building Plans for Special Buildings :- For

- (i) multistoried buildings which are more than 15m. height;
- (ii) special buildings like educational, assembly, mercantile, institutional, industrial, storage and hazardous buildings;
- (iii) mixed occupancies with any of the aforesaid occupancies having area more than 500 sq. m., the following additional information shall be furnished/indicated in the Building Plans, in addition to the items (a) to (i) of Regulation No. 6.2.6.
 - (a) access to fire appliances/vehicles with details of vehicular turning circle and clear motorable access way around the building;
 - (b) size (width) of main and alternate staircases along with balcony approach, corridor, ventilated lobby approach;
 - (c) location and details of lift enclosures;
 - (d) location and size of fire lift;
 - (e) smoke stop lobby/door, where provided;
 - (f) refuse chutes, refuse chamber, service duct, etc.;
 - (g) vehicular parking spaces;
 - (h) refuse area, if any;
 - (i) details of Building Services :-Air-conditioning system with position of fire dampers, mechanical ventilation system, electrical services, boilers, gas pipes etc.,
 - (J) details of exits including provision of ramps, etc. for hospitals and buildings requiring special fire protection measures,
 - (k) location of generator, transformer and switch gear room;
 - (l) smoke exhaustor system, if any;

- (m) details of fire alarm system network;
- (n) location of centralized control, connecting all fire alarm systems, built in fire protection arrangements and public address system etc.
- (o) location and dimensions of static water storage tank and pump room alongwith fire service inlets for mobile pump and water storage tank;
- (p) location and details of fixed fire protection installations such as sprinklers, wet risers, hose reels, drenchers, CO₂ installation etc.;
- (q) location and details of first aid, firefighting equipment's / installations.

- 6.2.7 Service Plan:-** Plans, elevations and sections of private water supply, sewage disposal system and details of building services, where required by the Authority, shall be made available on a scale not less than 1:100 in general and 1:1000 for layout.
- 6.2.8 Specifications -** General specifications of the proposed constructions, giving type and grade of materials to be used, in the form given in Appendix A, duly signed by a licensed Architect / Engineer / Structural Engineer, as the case may be, shall accompany the notice.
- 6.2.9 Supervision -** The notice shall be further accompanied by a certificate of supervision in the prescribed form given in Appendix B, by a licensed Architect/ Engineer/ Structural Engineer, as the case may be. In the event of the said licensed technical person ceasing to be employed for the development work, further development work shall stand suspended till a new licensed technical person is appointed.
- 6.2.10 Scrutiny Permit Fee:-** The notice shall be accompanied by an attested copy of Receipt of payment of scrutiny Fee. The scrutiny fee shall be as decided by the Authority from time to time, subject to Government orders, if any.
- 6.2.11 Security Deposit Fee:-** For ensuring faithful compliance of regulations and the directions given in the sanctioned plan and other terms and conditions, a security fee shall be charged at rates as specified by the Authority. The same shall be returned to the owner after the issue of full occupancy certificate for the building by the Authority.
- 6.2.12 No Objection Certificate:-** In case of development / construction of buildings requiring clearance from the authorities like Civil Aviation Authority, Railways, Directorate of Industries, Maharashtra Pollution Control Board, District Magistrate, Inspectorate of Boilers and Smoke Nuisance, Defence Authorities, Maharashtra Coastal Zone Management Authority, Archeological Department etc., the relevant no objection certificates from these authorities, applicable to the occupancy, shall also accompany the application.
In case of a building identified in Regulation No.6.2.6.1, the building scheme shall also be cleared by the Fire Officer of the Local Authority or in absence of such officer from the Directorate of Maharashtra Fire Services.
- 6.2.13 Development Charges:** Development charges wherever applicable under Section 124A of the Maharashtra Regional and Town Planning Act, 1966 shall be deposited with the Authority before issue of development permission/ commencement certificate. In case of revised permission where no development is carried out in pursuance of the earlier permission, amount of difference of development charges, if any, shall be levied and recovered.

6.2.14 Premium Charges: Premium charges as may be required to be recovered under these regulations shall be paid to the Authority before issue of development permission / commencement certificate. The amount of premium collected shall be kept in a separate account and it shall be utilised for development of civic amenities and infrastructure.

6.2.15 Tax receipt for tax clearance: Wherever applicable the notice shall also be accompanied by an attested copy of the tax receipt.

6.3 Signing the Plan - All the plans shall be duly signed by the owner, co-owner, if any, and the Architect or Licensed Engineer / Structural Engineer / Supervisor and shall indicate his name, address and license number allotted by the District officer of the Town planning Department.

6.4 Qualification and Competence of the Architect / Licensed Engineer / Structural Engineer/ Supervisor and Registration of Developer: Architect/ Engineer/Structural Engineer/ Supervisor referred to in Clause 6.3 shall be registered / licensed by the District officer of the Town planning Department as competent to plan and carry out various works as given in Appendix "C". The qualification and procedure for registration and licensing of the Engineer / Structural Engineer / Supervisor / Developer shall be as given in Appendix- "C".

6.5 Delegation of Powers and Discretionary Powers:-

6.5.1 Delegation of Powers- Any of the powers, duties or functions conferred or imposed upon or vested in the Authority/Collector may be exercised, performed or discharged under the Authority, control and subject to revision by him and to such conditions and limitations, if any, as he shall think fit to prescribe, by district officer of the Town Planning Department whom on his behalf and in each of the said regulations the word Authority/Collector shall to that the extent, be deemed to include such officer. The decision of the such officer to whom such powers have been delegated shall be subject to review, if necessary by the Authority/Collector.

6.5.2 Discretionary Powers.

6.5.2.1 In conformity with the intent and spirit of these Regulations, the Authority/Collector may, in consultation with the Divisional Head of the concerned division of the Town Planning Directorate.

- (i) decide on matters where it is alleged that there is an error in any order, decision, determination or interpretation made by him in the application of these Regulations;
- (ii) determine and establish the location of zonal boundaries in exceptional cases, or in cases of doubt or controversy;
- (iii) interpret the provisions of these regulations where the street layout actually on the ground varies from the street layout as shown on the Development Plan;
- (iv) modify the limit of a zone where the boundary line of the zone divides a plot; and
- (v) authorize erection of a building or use of premises for a public service undertaking for public utility purposes only, where he finds such authorisation to be reasonably necessary for the public convenience and welfare, even if it is not permitted in any Land Use Classification.

6.5.2.2 Temporary Constructions –The Authority/Collector may grant permission for temporary construction for a period not exceeding six months at a time and in the aggregate not exceeding

for a period of one year, such a permission may be given by him for the construction of the following, viz.:-

- (i) Structures for protection from the rain or covering of the terraces during the monsoon only.
- (ii) Pandals for fairs, ceremonies, religious function, etc.
- (iii) Structures for godowns/storage of construction materials within the site.
- (iv) Temporary site offices and watchman chowkies within the site only during the phase of construction of the main building.
- (v) Structures of exhibitions/ circuses etc.
- (vi) Structures for storage of machinery, before installation for factories in industrial lands within the site.
- (vii) Structures for ancillary works for quarrying operations in conforming zones.
- (viii) MAFCO stalls, government milk booths and telephone booths.
- (ix) Transit accommodation for persons to be rehabilitated in a new construction.
- (x) Structures for educational and medical facilities within the site of the proposed building during the phase of planning and constructing the said permanent buildings.

(xi) Ready mix concrete plant.

Provided that, temporary constructions for structures etc. mentioned at (iii), (iv), (vi), (ix) and (x) may be permitted to be continued temporarily by the Authority/Collector but in any case not beyond completion of construction of the main structure or building and that structure in (vii) may be continued on annual renewal basis by the Authority/Collector beyond a period of one year.

Provided further that approval of Fire Officer of the authority shall be obtained wherever necessary.

- 6.5.2.3** In specific cases, where a clearly demonstrable hardship is caused, the authority/Collector in consultation with the Divisional Head of the concerned division of the Town Planning Directorate, may by special written permission – permit any of the dimensions / provision prescribed by these regulations to be modified provided the relaxation sought does not violate the health safety, fire safety, structural safety and public safety of the inhabitants of the buildings and the neighbourhood. However, no relaxation from the setback required from the road boundary or FS.I. or parking requirements shall be granted under any circumstances. While granting permission under (i) conditions may be imposed on size, cost or duration of the structure, abrogation of claim of compensation, payment of deposit and its forfeiture for noncompliance.

6.6 Grant of Permit or Refusal:

- 6.6.1** The Authority may either sanction or refuse the plans or may sanction them with such modifications or directions as it may deem necessary after having recovered the necessary charges and there upon shall communicate its decision to the person giving the notice in the prescribed form given in Appendix D1/D2/D3 and E1/E2 as wherever required.
- 6.6.2** (i) The building plans for buildings identified in Regulation No. 6.2.6.1 shall also be subject to the scrutiny of the Chief Fire Officer, Fire Brigade and the sanction / building permit shall be issued by the Authority after the clearance from the authorised Fire Officer.
- (ii) In case of land subdivision or plotted layout, tentative layout shall be recommended for demarcation at first instance. After having demarcated the layout by the Land Records

Department, the owner shall submit the demarcated layout for final approval to the Authority and the Authority shall examine the provision laid down in Regulation No.6.8 and grant final approval if it is in accordance with the layout recommended for demarcation and confirming to the regulations. This shall also be mandatory to Group Housing Scheme.

- 6.6.3** On receipt of the notice, alongwith necessary fees/ deposit under 6.2.10, 6.2.11 of the regulations, the Authority shall approve or reject the proposal within the time limit prescribed in the relevant Act.

Any development carried out in pursuance of such deemed permission which is in contravention of the provisions of the these regulations, shall be deemed to be an unauthorised development and shall be subject to action under relevant Acts.

Provided further that necessary explanation shall be called from the concerned officer of the Authority for not processing and disposing of the proposal within the 60 days.

- 6.6.4** After the plan has been scrutinised and objections have been pointed out, the owner giving notice shall modify the plan, comply with the objections raised and resubmit it. The prints of plans submitted for final approval, shall not contain superimposed corrections. The authority shall grant or refuse the commencement certificate / building permit within prescribed time limit. No new objections may generally be raised when they are resubmitted after compliance of earlier objections, except in circumstances to be quoted for additional compliances.

- 6.6.5 Board of Appeals (for areas outside Municipal Council/ Nagar Panchayat):**As mentioned in Part XIII, Regulation No.48

- 6.7 Commencement of work** - Commencement certificate/development permission shall remain valid for 4 years in the aggregate but shall have to be renewed every year from the date of its issue. The application for renewal shall be made before expiry of one year if the work is not already commenced. Such renewal can be done for three consecutive terms of one year after which proposals shall have to be submitted to obtain development permission afresh. If application for renewal is made after expiry of the stipulated period during which commencement certificate is valid, then the Authority/Collector may condone the delay for submission of application for renewal by charging necessary fees; but in any case, commencement certificate shall not be renewed beyond 4 years from the date of commencement certificate/ development permission.

Provided that no such renewal shall be necessary if the work is commenced within the period of valid permission.

For the purpose of this regulation, "Commencement" shall mean as under:-

(a)	For a building work including additions and alterations.	Upto plinth level.
(b)	For bridges and overhead tanks construction	Foundation and work up to the base floor
(c)	For underground works/	Foundation and work upto floor of underground floor.

(d)	For layout, sub-division and amalgamation	Final demarcation and provision of water bound macadam roads complete.
-----	---	--

6.8 In case of land subdivision / group housing schemes, it shall be the responsibility of the owner / developer to construct all infrastructure including roads, storm water drains, sewer lines, water supply lines, development of open spaces etc. In case of land subdivision, these works shall be completed within two years and phase wise building permission shall be granted depending upon the percentage of infrastructure work completed. In case of group housing scheme, these works shall be completed before completion of project.

7.0 PROCEDURE DURING CONSTRUCTION.

7.1 Owner's liability :- Neither the grant of permission nor approval of the drawing nor inspection by the Authority/Collector during erection of the building, shall in any way relieve the owner of such building / developer from full responsibility for carrying out the work in accordance with these Regulations and safety norms as prescribed by the Bureau of Indian Standards.

7.2 Documents at site –

(i) Results of tests- where tests of any material are made to ensure conformity with the requirements of these Regulations, records of the test data shall be kept available for inspection during the construction of the building and for such period thereafter as required by the Authority/Collector.

(ii) Development Permission: The person to whom a development permission is issued shall during construction, keep -

(a) Posted in a conspicuous place on the site for which permission has been issued, copy of a development permission; and

(b) A copy of the approved drawings referred to in regulation 6.6 on the site for which the permit was issued.

(iii) Display board mentioning name of the owner, name of architects, name of structural engineer, except for small individual plot holders.

7.3 Checking of plinth, columns upto plinth level :- The owner through his licensed surveyor, engineer, structural engineer or supervisor or his architect, as the case may be, shall give notice in the form of Appendix - F to the Authority/Collector on completion of work up to plinth level to enable and ensure that the work conforms to the sanctioned plans. The Authority/Collector may inspect the work jointly with the licensed technical personnel or architect within 15 (fifteen) days from the receipt of such notice and either grant or refuse permission for further construction as per the sanctioned plans in the form in Appendix -G . If within this period, the permission is not refused it shall be deemed to have been granted, provided the work is carried out strictly according to the sanctioned plans.

7.4 Deviation during constructions:- If during construction of a building any departure of a substantial nature from the sanctioned plans is intended by way of internal or external additions, sanction of the Authority/Collector shall be necessary. A revised plan showing the deviation shall be submitted and the procedure laid down for the original plans shall apply to all such amended plans. Any work done in contravention of the sanctioned plans, without prior approval of the Authority/Collector shall be deemed as unauthorised.

- 7.5 Completion Certificate:-** The owner through his licensed surveyor / engineer / structural engineer / supervisor or his architect, as the case may be, who has supervised the construction, shall furnish a building completion certificate to the Authority/Collector in the form in Appendix 'H'. This certificate shall be accompanied by three sets of plans of the completed development.
- 7.6 Occupancy certificate:-** The Authority/Collector after inspection of the work and after satisfying himself that there is no deviation from the sanctioned plans, issue an occupancy certificate in the form in Appendix- I or refuse to sanction the occupancy certificate in Appendix - J within 21 days from the date of receipt of the said completion certificate, failing which the work shall be deemed to have been approved for occupation, provided the construction conforms to the sanctioned plans. One set of plans, certified by the Authority/Collector shall be returned to the owner alongwith the occupancy certificate. Where the occupancy certificate is refused or rejected, the reasons for refusal or rejection shall be given in intimation of the rejection or the refusal.
- 7.7 Part occupancy certificate:-** When requested by the holder of the development permission, the Authority/Collectormay issue a part occupancy certificate for a building or part thereof, before completion of the entire work, as per development permission, provided sufficient precautionary measures are taken by the holder to ensure public safety and health. The occupancy certificate shall be subject to the owners indemnifying the Authority/Collector in the form in Appendix `K'.

8.0 INSPECTION.

The Authority/Collector shall have the power to carry out inspection of the work under the provisions of the Act, at various stages to ascertain whether the work is proceeding as per the provisions of regulations and sanctioned plan.

9.0 UNSAFE BUILDINGS.

All unsafe buildings shall be considered to constitute danger to public safety and hygiene and sanitation and shall be restored by repairs or demolished or dealt with as otherwise directed by the Authority. The relevant provisions of the regulation No. 24.12of D.C.R. shall apply for procedure of actions to be taken by the Authority/Collector for unsafe buildings.

10.0 OFFENCES AND PENALTIES

- 10.1 Offences and penalties:-**Any person who contravene any of the provisions of these regulations / any requirements or obligations imposed on him by virtue of these regulations including the maintenance of fire protection services and appliances and lifts in working order or who interferes with or obstructs any person in the discharge of his duties shall be guilty of an offence and upon conviction shall:

- (a) be punished with a fine as fixed by the Authority/Collector under the relevant Act
- (b) further the Authority may take suitable actions including demolition of unauthorised works as decided by the Authority.
- (c) in case of Licensed Engineer / Structural Engineer / Supervisor, the District Officer of the Town Planning Directoratemay take suitable action against himwhich may include cancellation of license and debarring him from further practice / business for a period as

decided by him;

- (d) in case of registered architects, the District Officer of the Town Planning Directorate may report to the Council of Architectures to take suitable action against the Registered Architect as per the provisions of Architect Act, 1972.

10.2. REVOCATION OF PERMISSION:-

1) Without prejudice to the powers of revocation conferred by Section 51 of the The Authority/Collector may, after giving the opportunity of being heard, revoke any development permission issued under these regulations where it is noticed by him that there had been any false statement or any misrepresentation of material fact in the application on the basis of which the development permission was issued and thereupon the whole work carried out in pursuance of such permission shall be treated as unauthorised.

2) In the case of revocation of the permission under sub- regulation (1), no compensation shall be paid.

PART II
GENERAL PLANNING AND BUILDING REQUIREMENTS

11.0. REQUIREMENTS OF SITES.

- 11.1.** No piece of land shall be used as a site for the construction of building
- (a) If the Authority considers that the site is insanitary or that it is dangerous to construct a building on it;
 - (b) If the site is within a distance of 9 m. from the edge of water mark of a minor water course (like nallah) and 15 m. from the edge of water mark of a major water course (like river) shown on Development Plan or village/city survey map or otherwise, provided that where a minor water course passes through a low lying land without any well defined banks, the owner of the property may be permitted by the Authority or Collector to restrict and or to re-align the same within the same land alongwith cross section as determined by the Authority or Collector;
 - (c) If the site is not drained properly or is incapable of being well drained;
 - (d) If the owner of the building has not shown to the satisfaction of the Authority all the measures required to safeguard the construction from constantly getting damp;
 - (e) If the building is for assembly uses, for cinemas and theatres as well as for public worship which has not been previously approved by the Authority or Collector;
 - (f) If the building is proposed on any area filled up with carcasses, excreta, filth and offensive matter till the production of certificate from the Authority or Collector to the effect that it is safe from the health and sanitary point of view, to be built upon;
 - (g) If the use of the site is for the purpose, which in the opinion of the Authority will be a source of annoyance to the health and comfort of the inhabitants of the neighbourhood;
 - (h) If the plot has not been approved as a building site by the Authority or Collector (i) If the proposed occupancy of the building on the site does not conform to the land use proposals in the development plans or Zoning Regulations, and
 - (j) If the level of the site is less than prescribed datum level depending on topography and drainage aspects.
 - (k) If it doesn't derive access from an authorised street/means of access described in these Regulations,
 - (l) If it is within the river/lake boundary and blue flood line of the river (prohibitive zone).
 - (m) If the site is within the boundary of Coastal Regulation Zone-1.
 - (n) If the site is not developable by virtue of restrictions imposed under any law or guidelines of any government department.
 - (o) If the site is hilly and having gradient more than 1:5.

- 11.2 Distance of site from Electric Lines:** No structure including verandah or balcony shall be allowed to be erected or re-erected or any additions or alterations made to a building on a site within the distance quoted in Table No. 3 below in accordance with the prevailing Indian Electricity Rules and its amendments from time to time between the building and any overhead electric supply line.

Table No. 3

Electric Lines	Vertically (m.)	Horizontally (m.)
(1)	(2)	(3)
(a) Low and medium voltage Lines and Service Lines.	2.5	1.2
(b) High voltage lines up to and including 33,000 V.	3.7	2.0
(c) Extra High voltage beyond 33,000 V.	3.7	2.0
	(Plus 0.3 m. for every additional 33,000 V. or part thereof)	(Plus 0.3 m. for every additional 33,000 V. or part thereof)
Note : The minimum clearance specified above shall be measured from maximum sag for vertical clearance and from maximum deflection due to wind pressure for horizontal clearance.		

- 11.3 Construction within blue and red flood line –**
The construction within blue and red flood line along the river side may be permitted at a height of 0.50 m. above the red flood line.
- 11.4 Development within 30 m. from Railway boundary –**
For any construction within 30 m. from railway boundary, No Objection Certificate from Railway Authority shall be necessary.

12.0 MEANS OF ACCESS

- 12.1** Every plot / building whether existing or proposed, shall have means of access as required in these Regulations.
- 12.2** Every person who erects a building shall not at any time erect or cause or permit to erect or re-erect any building which in any way encroaches upon or diminishes the area set apart as means of access.
- 12.3 Width of Means of Access:-**

A) For Residential Development -The plots shall abut on a public means of access like street / road. Minimum width of access / layout road / internal road in any development proposal / subdivision / group housing shall be as given in Table No.4.

Table No-4

S.No.	Length of Means of access in mt	Width of Means of access in mt
i	upto150	9.00
ii	above 150 and to upto300	12.00
iii	more than 300	15.00

B) For Other than Residential Development –The minimum width of access / layout road / internal road in any development proposal other than residential (for commercial/industrial use) shall be as given in Table No.4(a).

Table 4(a)		
Sr. no.	Length of Mean of Access in m.	Width of Means of Access in m.
i	Upto 75	12
ii	75 to 150	15
iii	Above 150	18 or more

NOTE -1 The means of access shall be clear of required marginal open spaces from the existing building line. In no case, development on plots shall be permitted unless it is accessible by the the authorized public street existing prior to coming in to force of these Regulations or road from the layout sanctioned prior to these Regulations.

- 12.3.1 Pathways:** -A pedestrian approach to the buildings from road / street / internal means of access wherever necessary, shall be through paved pathway of width not less than 2.0 m., 3.0 & 4.5 m. provided its length measured from exit way of the building is not more than 20 m. 40 m and 60m. respectively from the main / internal means of access. If the length is more than 60 m., then regular street as provided in Table No.4 shall be necessary. This provision shall also apply to group housing scheme or layout of building for other uses except development under regulation no.24.4.
- 12.3.2** The length of means of access shall be determined by the distance from the farthest plot (building) to the public street. The length of the subsidiary access way shall be measured from the point of its origin to the next wider road on which it meets.
- 12.3.3** In the interest of general development of an area, the Authority or Collector may require the mean of access to be of larger width than that required under regulation No. 12.3.
- 12.3.4** In case where a private passage is unrestrictedly used by public for more than 10 years as a means of access of width not less than 9 m. to a number of plots, the Authority or Collector may take steps including improvement under, the provision of relevant Act to declare it as a public street
- 12.3.5** In congested areas in the case of plots facing street / means of access less than 4.5 m. in width the plot boundary shall be shifted to be away by 2.25 m. from the central line of the street/ means of access way to give rise to a new street / means of access way of width of 4.5 m. clear from the

structural projections.

12.4. Means of access shall be levelled, metalled, flagged, paved, sewered, drained, channelled, lighted, laid with water supply line and provided with trees for shade (wherever necessary) to the satisfaction of the Authority, free of encroachment and shall be maintained in a condition to the satisfaction of the Authority or Collector.

12.4.1. If any private street or any other means of access to a building is not constructed & maintained as specified above, the authority may by written notice require the owner or owners of the several premises fronting or adjoining the said street or other means of access or abutting thereon or to which access is obtained through such street or other means of access or which shall benefit by works executed to carry out any or more of the aforesaid requirements in such manner and within such time as the authority shall direct. If the owner or owners fail to comply with this direction, the authority may arrange for its execution and recover the expenses incurred from the owner/ owners.

12.5. Access from the Highways/classified roads: Generally the plot / building along Highway and classified roads shall derive access from service road. However, highway amenities like petrol pump; hotel etc. may have an access direct from Highways and such other roads having a width of 30 m. or more. The above will be subject to the provisions of State Highways Act, 1965 and National Highway Act 1956.

Provided that in suitable cases, the planning authority may suspend the operation of this rule till service roads are provided.

12.6. For building identified in Regulation No. 6.2.6.1, the following additional provisions of means of access shall be ensured;

(a) The width of the main street on which the building abuts shall not be less than 12 m. and one end of this street shall join another street of width not less than 12 m. in width subject to Regulation No.12.3.

(b) The approach to the building and open spaces on its all sides (see Regulation No. 15.1 shall be 6 m. and the layout for the same shall be approved in consultation with the Fire Officer, Fire Brigade Authority and the same shall be of hard surface capable of taking the weight of fire engine, weighing up to 45 tones. The said open space shall be kept free of obstructions and shall be motorable.

(c) Main entrances to the plot shall be of adequate width to allow easy access to the fire engine and in no case it shall measure less than 4.5 m. The entrance gate shall fold back against the compound wall of the premises, thus leaving the exterior access way within the plot free for movement of fire engine / fire service vehicles. If main entrance at boundary wall is built over, the minimum clearance shall be 4.5 m.

13.0 REGULATIONS FOR LAND SUB -DIVISION AND LAYOUT

13.1 Layout or Sub-division proposal shall be submitted for the following:

(i) When more than one building excepting for accessory buildings in the case of residential building is proposed on any land, the owner of the land shall submit proposal for proper layout of building or sub-division of his entire contiguous holding.

(ii) When development and redevelopment of any tract of land which includes division and sub-division or amalgamation of plots for various land uses within a colony.

(iii) When group housing scheme or campus /cluster planning of any use is proposed.

13.2 Roads / streets in Land Sub-division or Layout.

- 13.2.1 The width of roads/ streets/ public and internal access way including pathway shall conform to provisions of Regulation No. 12.3 to 12.6.
- 13.2.2 In addition to the provisions of Regulation No. 12.3 Cul-de-sacs giving access to plots and extending upto 150 m. normally and 275 m. maximum with an additional turning space at 150 m. shall be allowed only in residential area, provided that Cul-de-sacs would be permissible only on straight roads and further provided that cul-de-sacs ends shall be higher in level than the level of starting point. The turning space, in any case shall be not less than 81 sq. m. in area with no dimension being less than 9 m.
- 13.2.3 **Intersection of Roads:-** At junctions of roads meeting at right angles, the rounding off at the intersection shall be done, unless otherwise directed by the Authority or Collector, with the tangent length from the point of intersection to the curve being $1/2$ the road width across the direction of tangent as given below: The building shall also set back at required marginal distance from this rounding off.

Fig. 1- Rounding off intersections at junctions

Fig.2. - Rounding off intersection at junctions.

- 13.2.3.1 For junctions of road meetings at less than 60 degree, the rounding off or cut or similar treatment shall have tangent length of U and V from the intersections point as shown in diagram 2. The tangent length at obtuse angle junction shall be equal to half the width of the road from which the vehicle enters as shown in diagram 2. Provided however, that the radius for the junction rounding shall not be less than 6 m.
- 13.2.3.2 While granting the development permission for land sub-division or group housing/campus planning, it shall be necessary to coordinate the roads in the adjoining lands.
- 13.2.3.3 Whenever called upon by the Authority/Collector to do so, areas under roads shall be handed over to the Authority /Collector by way of deed after development of the same for which nominal amount of Re 1/- shall be paid by the Authority.

13.3 Recreational open spaces:

13.3.1 In any layout or subdivision or any development of land for any use/zone admeasuring 0.40 Ha. or more after deducting D.P.road and reservation area, if any, 10% of the entire holding area shall be reserved as recreational open space which shall as far as possible be provided in one place. In case of land admeasuring more than 0.8 ha. recreational open space may be allowed to be left at different locations in the same layout provided that the size and other dimensions conform to the provisions herein below.

In case of development of land for educational purpose, 40% of the gross area (or as decided by the Government from time to time) shall be earmarked for playground which shall be inclusive of 10% recreational open space. Notwithstanding anything contained in this rule, the shape and location of such open space shall be such that it can be properly utilised as playground.

Provided that, the above-mentioned area of 0.4 Ha. or 0.8 Ha. shall be measured with reference to original holding as on 11th January 1967 and not with reference to sub-divided holding in revenue / city survey record thereafter without the permission under the Maharashtra Regional & Town Planning Act, 1966. If such sub-divided holding in revenue/city survey record admeasures less than 0.4 or 0.8 Ha., then 10% open space shall be left which shall not be in any case less than 250 sq.mt.

Provided further that, in case of lands declared surplus or retainable under Urban Land (C & R) Act, 1976, if the entire retainable holding or entire surplus holding independently admeasures 0.4 Ha. or more, then 10 percent recreational open space shall be necessary in respective holding.

Provided further that, no such open space shall be necessary in case of layout or subdivision of plots from already sanctioned layout by the Planning Authority where the requisite recreational open space has already been left in the sanctioned layout.

Provided further that no such open space shall be necessary for development of the reservations in the development plans designated for the purpose other than residential.

13.3.2. The owner shall have to give an undertaking that the recreational open space shall be for the common use of all the residents or occupants of the layout / building unit.

a) On sanction of the development permission, the recreational open space shall deem to have vested in the society / association of the residents / occupants. In case such society or association is to be formed, the possession / custody of recreational open space shall remain with the Authority or Collector until such association / society is formed. The recreational open space shall not be sold to any other person and it shall not be put to any other user except for the common use of residents / occupants.

b) If the authority is convinced that there is misuse of open spaces; in such case the authority shall take over the land of recreational open space.

13.3.3 No permission shall be granted to delete / reduce open spaces of the existing sanctioned layout / subdivision. However, while revising the layout, such recreational open space may be rearranged without decrease in area subject to minimum prescribed area under these regulations with the majority consent of plot / tenement holders / co-owners; but such revision of recreational open space area shall ordinarily not be allowed after a period of 4 years from the first sanction.

13.3.4 The open spaces shall be exclusive of location of accesses / internal roads / designations or

reservations in development plan roads and areas for road widening.

- 13.3.5.** No such recreational open spaces shall admeasure less than 400 sq. m.
- 13.3.6** Minimum dimensions -The minimum dimensions of such recreational open space shall be not less than 10 m. and if the average width of such recreational open space is less than 20 m. the length thereof shall not exceed 2 ½ times the average width.
- 13.3.7** Such recreational open space shall also be necessary for group housing scheme or campus/ cluster planning for any use / zone.
- 13.3.8** If required, structure and uses which can be permitted free of FSI in the recreational open spaces shall be as under:
There shall be two storeyed structure with maximum 15% built up area of recreational open space, out of which 10% built up area shall be allowed on ground floor and remaining 5% can be permitted on 1st floor. In case of stilt, additional floor may be allowed.
- 2) The structures used for the purpose of pavilion or gymnasia or club house or vipashyana and yoga center or crèche or kindergarten or library or water tank, health out post if required by the Authority or other structures for the purpose of sports and recreation activity may be permitted. Convenience Shopping below pavilion facing on road on payment of premium at the rate of 10 % of the land rate in ASR with requisite side margin required for stadium may be allowed.
 - 3) No detached toilet block shall be permitted.
 - 4) A swimming pool may also be permitted in such a recreational open space. The ownership of such structures and other appurtenant users shall vest in all the owners on account of whose cumulative holdings, the recreational open space is required to be kept in the layout of subdivision of the land.
 - 5) The proposal for the construction of such structure should come as a proposal from the owner/s, owners' society / societies or federation of owners' societies and shall be meant for the beneficial use of the owners / members of such society / societies / federation of societies.
 - 6) Such structure shall not be used for any other purpose, except for recreational activity.
 - 7) The remaining area of the recreational open space shall be kept open to sky and properly accessible to all members as a place of recreation, garden or a playground.
 - 8) The owners' society / societies, the federation of the owners' societies shall submit to the Authority or Collector, a registered undertaking agreeing to the conditions in (5) to (7) above while obtaining permission for the above said construction.
- 13.3.9** Every plot meant for a recreational open space shall have an independent means of access, unless it is approachable directly from every building in the layout.
- 13.3.10** In case of sub-division of land admeasuring 8000 sq. m. or more in area in an industrial zone, 5 percent of the total area in addition to 10 percent stipulated in Regulation No 13.3.1, shall be reserved as amenity open space which, shall also serve as general parking space. When the additional amenity open space exceeds 1500 sq. m., the excess area may be used for construction of buildings for banks, canteens, welfare centre, health centre, offices, convenient shopping, crèches and other common purposes considered necessary for industrial users as approved by the Authority or Collector. However, such amenity space shall not be required in case of permission governed under Regulation No.22.4.2.1 (v).
-

13.3.11 Amenities for layouts of larger areas in Residential Zone: For layouts admeasuring more than 2.0 Ha. provision of 5% of the total area shall be made for amenity space in the layout for purposes such as defined in Regulation No.2.9 or as approved by the Authority or Collector. The area earmarked for such amenities shall be developed for the same purpose.

Provided that such amenity space shall not be required in case of permission governed under Regulation No. 22.4.2.1(v)

Provided further that where provisions in the Regional Plan or Zone Plan or any other plan has a provision of amenity space more than what is stipulated in this regulation, then amenity space as required under such plan shall prevail and in that case amenity space as per this regulation shall not be required.

13.4 Plot area, plot width for various uses:

Minimum plot areas and widths for various uses shall be as given below in the Table No. 5.

Table No 5				
MINIMUM PLOT AREA, PLOT WIDTH FOR VARIOUS USES				
Sr. No	Uses	Plot area (in sq.m.)	Min. Plot Width	Type of Development
(1)	(2)	(3)	(4)	(5)
1	Residential and Commercial (except those in 2, 3 & 4 below)	i) 30 and above but upto 125	As per Table No.1	Row
		ii) Above 125 but less than 250		Semi-detached / Detached
		iii) 250 & above		Detached
2	Plots in EWS Housing / High Density Housing / Sites and Services / Slum Upgradation / Reconstruction Scheme by public authority.	25 and above but upto 125	As per Table No.1	Row
3	Petrol Filling station-			
	(a) Without service bay	545	16.75 m	Detached
	(b) With service bay	1100	30.5 m	Detached.
4.	Industrial	300	10 m	Detached.
Notes-				

- | |
|---|
| i) The plot width to depth ratio shall be 1 : 1.5 to 1 : 2.5; as far as possible. |
| ii) In Public Housing Schemes for E.W.S. undertaken by government or semi-government organisations, marginal spaces shall be as per their respective schemes and rules. |
| iii) The front setback for already existing layouts / roads shall be as per existing schemes. |

13.4.1 Net Plot Area and computation of FSI-

For the purpose of computing FSI/Built - up area, the net area of the plot shall only be considered.

- i) In case of a layout/subdivision /development such net area shall be calculated at 90 % of the gross plot area, after deducting from the gross area of plot, the area covered by amenity space under regulation no 13..3.11 and Development Plan proposals, if any.
- ii) In case of group housing scheme on land having original holding more than 0.40 Hect, net plot area shall be 90 %.excluding area covered by amenity space under regulation no 13..3.11 and Regional Plan proposals, if any.
- iii) In case of plotted layout, such FSI of 0.90 of gross area shall be distributed on all plots on prorata basis.
- iv) In case of plots from the approved layouts , the same plot shall be treated as net plot area and shall be eligible for full permissible FSI under these Regulation.
- iv) In case of amalgamated plots, the net plot area is equal to gross plot area after amalgamation for computation of FSI provided original land hodling of each plot does not exceed 0.40 Hect.

13.5 Amalgamation of Plots:

- 13.5.1 Amalgamation of plots shall be permissible if they form a sizable plot from planning point of view and are contiguous.
- 13.5.2
 - a) Amalgamation of plot having different tenure / incompatible zoning in development plan shall not be allowed.
 - b) Amalgamation of plot which is not desirable from planning point of view (eg. as shown in below) shall not be permitted.

14.0 LAND USE CLASSIFICATION AND PERMISSIBLE USES.

- 14.1 The various building uses and occupancies and premises to be permitted in the various zones are

given in Part III of these Regulations. The Authority or Collector may modify the specified uses given in Part III of these Regulations with the prior approval of the Director of Town Planning, Maharashtra State, Pune.

14.2 No building or premises shall be changed or converted to a use which is not in conformity with the provisions of these Regulations.

14.3 Uses to be in Conformity with the zone: Where the use of buildings or premises is not specifically designated on the Development/Regional Plan, it shall be in conformity with the zone in which they fall. Any lawful non-conforming use of premises existing prior to the date of enforcement of these regulations, shall continue upto a period as may be specified in the Development /Regional Plan; provided further that a non-conforming use shall not be extended or enlarged except as provided in Regulation No. 14.4 and that when a building, containing non-conforming use is pulled down or has fallen down, the use of the new building shall be in conformity with these Regulations.

14.4 Non-Conforming Uses:-

Any lawful non-conforming use may be allowed to be continued or expanded to the extent of 50 percent of the existing built up subject to availability of FSI as per the provisions of these regulations applicable to such use except in Hill Top-Hill Slope Zone of any plan.

15.0. OPEN SPACE, SETBACK AREA AND HEIGHT LIMITATIONS

15.1 Exterior Open Spaces –

15.1.1 Provisions for open spaces at the front side/sides and rear of the building shall be as given in Part IV of these Regulations.

15.1.2 Buildings Abutting Two or More Streets: When a Building abuts two or more streets, the setbacks from the streets shall be such as if the building is fronting each such street.

15.1.3 Open Spaces Requirements :

(a) Side or rear open space in relation to the height of the building for light and ventilations:

- i) The open space on all sides shall be as per Table No.13 for building height upto 14 m. For building height above 14 m. and upto height of 24 m., the open space on all sides except the front side of a building shall be minimum $(H/2) - 4$ subject to a minimum of 3.0 m. for residential building and 4.5 m. for commercial building.
- ii) For buildings above 24 m height, the open space on all sides except the front side of a building shall be minimum $H/3$.

Provided that if the length or depth of a building exceeds 40 m., add 10 percent of length or depth of building minus 4.0 m. to the above margin.

Where H = Height of the building above ground level.

(b) Front margin – Front margin shall be as per Regulation No.23.2.1 or as given below whichever is more.

i)	Height above 14 m. & upto 24 m.	6.00 m.
----	---------------------------------	---------

ii)	Height above 24 m. & upto 37.5 m.	9.00 m.
iii)	Height above 37.5 m.	12.00 m.

15.2 Interior & Exterior chowk

15.2

15.2.1. (a) Interior chowk : Wherever habitable rooms or kitchen derives ventilation from inner chowk or interior open space, the size of such interior open space shall not be less than 3 m. x 3 m. upto height of 14 m. and for height more than 14 m., the interior open space shall not be less than H/5 m. x H/5 m. where H = height of highest wall of the chowk.

(b) Exterior chowk : The minimum width of the exterior chowk for the purpose of light and ventilation, shall not be less than 2.4 m. and depth shall not exceed 1.5 times the width for buildings upto 15 m. height and for height more than 14 m., the exterior open space shall not be less than H/6 m. x H/6 m. where H = height of highest wall of the chowk. If the width of the exterior chowk is less than 2.4 m. it shall be treated as a notch.

15.2.2 Where only water closet, bathroom, combined bathroom and water closet are abutting on the interior open space, the size of the interior open space shall be in line with the provision for ventilation shaft as given in Regulation No.17.12.4.

15.3 Area and Height limitations - The area and height limitations, height of buildings, floor space index, abutting different road widths shall be as given in Part IV and Regulation No. 15.5.

15.4 Permissible Structures / Projections in marginal open spaces.

15.4.1 The following projections shall be permissible in marginal open spaces:

(a) Projections into open spaces:- Every open space provided either interior or exterior shall be kept free from any erection thereon and shall be open to the sky and no cornice, chajja, roof or weather shade more than 0.75 m. wide shall overhang or project over the said open space so as to reduce the width to less than the minimum required. However, sloping chajja provided over balcony/ gallery etc. may be permitted to project 0.3 m. beyond balcony projections at an angle of 30 degree from horizontal level.

(b) A canopy not exceeding 5m. in length and 2.5 m. in width in the form of cantilever and unenclosed over the main entrance providing a minimum clear height of 2.40 m. below the canopy. The canopy shall not have access from upper floors (above floors), for using as sitting out place. There shall be a minimum clearance of 1.5 m. between the plot boundaries and canopy.

(c) Balconies :- Balcony or balconies of a minimum width of 1.00 m. may be permitted free of F.S.I. at any floor, not more than 15% of the built up area of the same floor and such balcony projection shall be subject to the following conditions.

(i) In non-congested area, no balcony shall reduce the marginal open space to less than 2 m. In congested area balcony may be permitted on upper floors projecting in front setbacks except over lanes having width 4.50 m. or less.

(ii) No balcony shall be allowed on ground floor which shall reduce minimum required front setback or marginal open space.

(iii) The width of the balcony will be measured perpendicular to the building upto the outermost edge of balcony.

(iv) Balconies may be allowed to be enclosed on payment of premium at the rate of 10% of

market value for land as per Annual Statement of Rates. The area taken for computing premium shall be equal to the built up area of enclosed balcony.

(v) Balconies in excess of 15% of built up area shall be calculated in FSI.

(d) A **projection** of maximum 30 cm. on roof top terrace level may be allowed throughout the periphery of the building. In case of pitched roof projection of maximum 45 cm. at roof top terrace level throughout periphery of the building shall be allowed.

(e) **Accessory buildings**:- The following accessory buildings may be permitted in the marginal open spaces :-

(i) In an existing building where toilet is not provided, a single storeyed toilet subject to a maximum area of 4.0 sq. m. in the rear or side open space and at a distance of 7.5 m. from the road line or the front boundary and 1.5 m. from other boundaries may be permissible. The Authority or Collector may reduce 1.5 m. margin in exceptional cases to avoid hardship.

(ii) Parking lock up garage not exceeding 2.4 m. in height shall be permissible in the rear corner of the plot with independent bungalow. Parking lock up garage when attached to main building shall be 7.5 m. away from the road line and shall be of such constructions giving fire resistance of 2 hours. The area of sanitary blocks excluding 20 sq.mt. and parking lock up garage shall be taken into account for the calculation of FSI.

(iii) Suction tanks, soak pits, pump room, electric meter room, garbage shaft, space required for fire hydrants, electrical and water-fittings, water tanks, dustbins etc.

(iv) One watchman's cabin / booth not more than 3 sq. m. in built up area having min. 1.20 m. width or diameter of cabin / booth.

Note :- When a building abuts on three or more roads then above mentioned user, except (iv), shall be permissible in front setback facing the smaller road or less important from traffic point of view.

(f) "Ramp" in basement shall be allowed subject to 6.0 m. clear marginal distance for movement of fire fighting vehicle.

(g) Fire escape staircase of single flight not less than 1.2 m.

(h) Staircase mid-landing of 1.2 m. width with clear minimum headway of 2.1 m. below the mid-landing. However, clear distance from edge of landing to the plot boundary shall not be less than 1.8 m.

15.4.2. Exclusion of structures / projections for FSI calculation

(a) Structures / Projections mentioned in Regulation 15.4.1 (a), (b), (c), (d), (e), (f), (g), (h) and mentioned in Regulation No.17.6.

(b) Stilt / Multi-storeyed floor space used as parking.

(c) Electrical cabin or sub-station, watchman booth of minimum size of 3.00 sq. m. with a minimum width or diameter of 1.2 m., pump house, garbage shaft, space required for location of fire hydrants, electric fitting and water tanks.

(d) A basement/s under a building and used for stores, meter room, air-conditioning plant, electric sub-station and parking spaces (use as accessory to the principal use).

(e) Areas covered by (i) Lofts (ii) Meter rooms, (iii) Porches, (iv) Canopies, (v) Air conditioning plant rooms (vi) Electric sub-stations, (vii) Service floor of height not exceeding 1.5 m. for hotels rating with three stars and above and hospitals .

- (f) Area of structure for an effluent treatment plant as required as per the requirements of the Maharashtra Pollution Control Board or other relevant authorities.
- (g) Areas covered by service ducts, pumps, rooms, electric sub-station, stilts and additional amenity of lift.
- (h) Rockery, well and well structures, plant, nursery, water pool, swimming pool (if uncovered), platform around a tree, fountain bench, chabutara with open top and unenclosed sides, ramps, compound wall, gate slide / swing, steps outside the buildings, domestic working place (open to sky), overhead water tank on top of the building, fire escape stair case and refuge area for high rise buildings.
- (i) Fitness Centre, Crèche, society office cum letter box room, sanitary blocks for servants and lockup garages admeasuring area of not exceeding 20 sq.m.
- (j) Area of one public telephone booth and one telephone exchange (PBX) per building.
- (k) Area of one room for installation of telephone concentrates as per requirement of Telephone Authority but not exceeding 20 sq. m. per building.
- (l) Area covered by new lift and passage thereto in an existing building with height upto 15 m. in gaathan/ congested area.
- (m) Telecommunication tower, antenna and construction of a room having upto 20 sq.m. area for allied activities.
- (n) Atrium in shopping malls, public buildings.
- (o) Escalators as provided in Regulation No.19.4.9.2.

15.4.3 Exclusion of structures / projections for FSI calculation subject to payment of premium:

- (a) Supported double height terraces (open terraces with railing having minimum height equal to two floors) within the building line, not exceeding 20 % of the built up area of the same floor.
- (b) Such terraces in excess of 20 % area shall be calculated in FSI.

15.5 Height of Building –

- (a) The maximum height of building shall not exceed 1.5 times total of the width of road abutting plus front open space subject to other restrictions, if any.
Provided that the building of greater height may be allowed with prior approval of the Director of the Fire Services Government of Maharashtra.
- (b) If a building abuts on two or more streets of different widths, the height of building shall be regulated by the street of greater width.
- (c) For building in the vicinity of aerodromes, the maximum height of such buildings shall be subject to values framed by the Civil Aviation Authorities or the development permission shall be considered only after applicant produces NOC from Air Port Authority.
- (d) In addition to (c) for Industrial Chimneys coming in the vicinity of aerodromes, it shall be of such height and character as prescribed by Civil Aviation Authorities and all Industrial Chimneys shall be of such character as prescribed by the Chief Inspector of Steam Boilers and Smoke Nuisance, and
- (e) Buildings intended for hazardous godowns storage of inflammable materials and storage of explosives shall be single storied structures only.

Note : For the purpose of regulation No. 15.5 (a) the width of the street may be prescribed width of the street, shown on Development /Regional Plan or width resulting from the prescription of a regular line of street under the relevant act whichever is more.

15.6 (i) Height Exemptions :-

The appurtenant structures such as roof tanks and their supports, ventilating, air-conditioning, lift rooms and similar service equipment, stair cover, chimneys and parapet walls and architectural features not exceeding 1 m. in height shall not be included in computation of height of building.

16.0 PARKING, LOADING AND UNLOADING SPACES: -**16.1 Parking spaces –**

Wherever a property is to be developed or redeveloped, parking spaces at the scale laid down in these Regulations shall be provided. When additions are made to an existing building, the new parking requirements will be reckoned with reference to the additional space only and not to the whole of building but this concession shall not apply where the use is changed. The provisions for parking of vehicles shall be as given in Table No.7 & 8. Area required for parking spaces shall be increased by 50 % for Metropolitan areas.

16.1.1 General space requirements:-

- (i) **Types:** The parking spaces mentioned below include parking spaces in basements or on a floor supported by stilts, or on upper floors, covered or uncovered spaces in the plot and / or lock up garages. The height of the stilt shall generally be allowed upto 3 m.
- (ii) **Size of parking space:** The minimum sizes of parking spaces to be provided shall be as shown below in **Table No.6:-**

Table No- 6		
S.No.	Type of Vehicle	Minimum Size/ area of parking space
(1)	(2)	(3)
(a)	Motor vehicle	2.5 m X 5 m
(b)	Scooter, Motor Cycle.	1.0 m. x 2.0 m.
(c)	Bicycle	0.50 m x 1.4 m.
(d)	Transport vehicle	3.75 m. X 7.5 m.
Note:	In the case of parking spaces for motor vehicle, upto 50 percent of the prescribed space may be of the size of 2.3 m. X 4.5 m.	

- (iii) **Marking of parking spaces:** Parking space shall be paved and clearly marked for different types of vehicles.
- (iv) **Maneuvering and other ancillary spaces:** Off street parking space must have adequate vehicular access to a street and the area shall be exclusive of drives, aisles and such other provisions required for adequate maneuvering of vehicles.
- (v) **Ramps for Basement parking :-** Ramps for parking in basement should conform to the requirement of Regulation No.19.4.6

Table No 7
Off Street Parking Spaces

Sr. No.	Occupancy	One parking Space for every	Congested Area			Non Congested Area		
			Car	Scooter	Cycle	Car	Scooter	Cycle
1	2	3	4	5	6	7	8	9
1	Residential i) Multi family residential	(a) 2 Tenements having built-up area more than 100sq.m.	1	1	1	1	2	2
		(b) 3 tenements having built-up area between 50 to 100sq.m.	0	2	4	1	3	3
		(c) 4 tenements having built-up are upto50 sq.m.	0	4	4	0	5	5
	ii) Lodging establishments tourist homes, hotels with lodging accommodation.	(a) For every five guest rooms	1	2	2	1	3	3
	iii) Restaurants	(a) For hotel, eating houses 25sq.m. of area of restaurant including kitchen, pantry hall, dining rooms etc.	0	1	2	1	1	1
2	Institutional (Hospital, Medical Institutions)	For 100 sq.m. carpet area or fraction thereof.	1	2	2	1	4	4
3.	Assembly (theatres, cinema houses, concert halls, auditoria, assembly halls including those of college and hostels)	For every 40 Seats.	1	2	5	1	5	5
4.	MangalKaryalaya / Marriage Halls, Cultural Halls	For every 100 sq.m. built up area or fraction thereof.	1	2	3	2	4	6
			38					

5	Educational – i)Primary School	100 sq.m.built up area or fraction thereof the administration area.	0	2	2	1	2	2
	ii)Secondary School	100 sq.m.built up area or fraction thereof of the entire built up area.	0	1	4	0	2	8
	iii) College	100 sq.m.built up area or fraction thereof the administration area and public service area.	0	2	5	1	2	8
6.	Government or semipublic or private business buildings.	100 sq. m. built up area or fraction thereof	1	1	2	1	3	3
7.	Mercantile (markets, department al stores, shops and other Commercials users) including wholesale markets	100 sq. m. built up area or fraction thereof	1	1	2	1	3	3
8.	Industrial	300 sq. m.built up area or fraction thereof	0	2	2	1	3	3
9.	Storage (any type)	300 sq. m.built up area or fraction thereof	0	1	1	1	1	1
9.	Plots less than 200 sq.m. (any use)		0	1	1	0	1	1
Note-1) Plots upto 100 sq. m. as in the case of shops, row houses parking space need not be insisted.								
2) Fraction of parking unit need not be provided. However, in case where proportional number of vehicles is less than 1 (i.e. fraction) it will be rounded to the next full number.								
3)In case of independent single family residential bungalows having plot area upto 300 sq. m., parking space need not be insisted separately.								
4)Further a garage shall be allowed in rear or side marginal distance at one corner having minimum dimension of 2.5 m. x 5.0 m. & maximum dimension 3 m. x 6 m. i.e. minimum 12.5 sq.m. and maximum 18.0 sq.m. built up area.								
5)Mechanical Parking shall be permissible in case of parking provided over and above the requisite parking requirements stipulated under these regulations.

			40					

5.	Educational – i)Primary School	100 sq.m.built up area or fraction thereof the administration area.	0	3	3	1	4	4
	ii)Secondary School	100 sq.m.built up area or fraction thereof of the entire built up area.	0	1	5	0	2	10
	iii) College	100 sq.m.built up area or fraction thereof the administration area and public service area.	0	2	6	1	4	10
6.	Government or semipublic or private business buildings.	100 sq. m. built up area or fraction thereof	1	2	4	2	4	4
7.	Mercantile (markets, department al stores, shops and other Commercial users) including wholesale markets	100 sq. m. built up area or fraction thereof	1	3	3	1	4	4
8.	Industrial	300 sq. m.built up area or fraction thereof	1	2	2	1	4	4
9.	Storage (any type)	300 sq. m.built up area or fraction thereof	0	2	2	1	2	2
9.	Plots less than 200 sq.m. (any use)		0	1	1	0	1	1

Note 1. -For plots upto 100 sq. m. as in the case of shops, row houses parking space need not be insisted.

Note 2.- Fraction of parking unit need not be provided. However, in case where proportional number of vehicles is less than 1 (i.e. fraction) it will be rounded to the next full number.

Note 3 :- In case of independent single family residential bungalows having plot area upto 300 sq. m., parking space need not be insisted separately.

Note 4 :- Further a garage shall be allowed in rear or side marginal distance at one corner having minimum dimension of 2.5 m. x 5.0 m. & maximum dimension 3 m. x 6 m. i.e. minimum 12.5 sq.m. and maximum 18.0 sq.m. built up area.

Note 5 - Mechanical Parking shall be permissible in case of parking provided over and above the requisite parking requirements stipulated under these regulation

- 16.2 Off street parking space shall be provided with adequate vehicular access to a street, and the area of drives, aisles and such other provisions required for adequate maneuvering of vehicle shall be exclusive of the parking space stipulated in these regulations.
- 16.3 To meet the parking requirements as per these regulations, common parking area for group of buildings, open or multi-storeyed, may be allowed in the same premises.
- 16.4 In addition to the parking spaces provided for building of Mercantile (Commercial) like office, market, departmental store, shopping mall and building of industrial and storage, loading and unloading spaces shall be provided at the rate of one space for each 1000 sq. m. of floor area or fraction thereof exceeding the first 200 sq. m. of floor area, shall be provided. The space shall not be less than 3.75 m. x 7.5 m.
- 16.5 Parking lock up garages shall be included in the calculation for floor space for F.S.I. calculations.
- 16.6 The space to be left out for parking as given in Regulation 16.1 to 16.5 shall be in addition to the open spaces left out for lighting and ventilation purposes as given in Regulation No.15. Those spaces may be used for parking provided minimum distance of 3 m. around the buildings is kept free of any parking or loading and unloading spaces excepting the buildings as mentioned in Regulation No.16.5.
- 16.7 In case of parking spaces provided in basements, at least two separate ramps of adequate width and slope for entry and exit (as per Regulation No. 19.4.6) shall be provided preferably at opposite ends.
- 16.8 In case of Special Townships Areas , in addition to the regular parking area as per Regulation No.16, a space of 3.0 m. wide strip along the road on front shall be provided as visitors parking for the buildings with commercial or any use mixed with commercial. In such case, minimum front margin shall be 6.0 m. inclusive of 3.0 m. wide strip as above irrespective of the lesser front margin requirement in the applicable regulations.

17.0 REQUIREMENTS OF PARTS OF BUILDINGS

17.1 Plinth:

- 17.1.1 **Main Building:** The plinth or any part of a building or out house shall be so located with respect to surrounding ground level that adequate drainage of the site is assured but height shall not be less than 45 cm. above the surrounding ground level. In areas subject to flooding, the height of the plinth shall be at least 60 cm. above the high flood level.
- 17.1.2 **Interior Courtyards:** Every interior Courtyard shall be raised at least 15 cm. above the surrounding ground level and shall be satisfactorily drained.

17.2 Habitable Rooms:-

- 17.2.1 **Size :-** A habitable room shall have a carpet area of minimum 9.00 sq.m. except those in the hostels attached to recognised educational institutions, the minimum size of a habitable room for the residence of a single person shall be 7.5 sq. m; the minimum width of a habitable room shall be 2.4 m. One full side of a habitable room shall abut on the open space. Where there is more than one room, one shall be

not less than 9.00 sq.m. and other 6.50 sq.m.

- 17.2.1.1** The size of the room in a single room tenement shall not be less than 12.5 sq. m. with a minimum width of 2.4 m.
- 17.2.2** **Height:-**The height of all rooms for human habitation shall not be less than 2.75 m. measured from the surface of the floor to the lowest point of the ceiling (bottom of slab). The minimum clear head room under beam shall be 2.4 m. In case of centrally air conditioned building, height of the habitable room shall not be less than 2.4 m, measured from the surface of the floor to the underside of the slab or to the underside of the false ceiling.
- 17.2.2.1** In the case of pitched roof, the average height shall not be less than 2.75 m. and the minimum height at eaves level shall not be less than 2.1 m.
- 17.2.2.2** However, the maximum room height shall be 4.40 m. in case of all buildings excepting Residential Hotels of the category of 3 starred and above, Assembly, Institutional, Educational, Industrial, Hazardous and Storage occupancies, and in case of portions common to two floors of duplex flats. Duplex flats shall mean a residential flat divided on two floors with an internal staircase connecting the two floors.
- 17.2.2.3** Height of room for Information Technology Establishment (I. T. E.) for any telematic equipment storage erection facility can have a height as required for effective functioning of that system.

17.3 Kitchen:

- 17.3.1** **Kitchen size :-** The area of the kitchen shall not be less than 3.3 sq. m. with a minimum width of 1.5m.
- 17.3.1.1** In the case of special housing scheme as given in Regulation No. 17.2.1 .1 no provision for kitchen is necessary. Where alcoves (a cooking space having direct access from the main room without any inter communicating door) are provided, the size shall not be less than 2.4 sq.m. with a minimum width of 1.2 m.
- 17.3.2** **Height:** The room height of a kitchen measured from the surface of the floor to the lowest point in the ceiling (bottom of slab) shall not be less than 2.75 m., subject to provisions of 17.2.2.1.
- 17.3.3** **Other Requirement:** Every room to be used as kitchen shall have-
- (a) Means for the washing of kitchen utensils which shall lead directly or through a sink to grated and trapped connection to the waste pipe;
 - (b) Impermeable floor.
 - (c) Window of not less than 1.0 sq. m. area, opening directly on to an interior or exterior open space, but not into a ventilation shaft.
 - (d) In case multi-storeyed residential buildings more than 15 m. in height provision for refuse chutes shall be necessary.

17.4 Bath Rooms, Water Closets, combined bath room plus water closet

- 17.4.1** **Size -** The minimum size shall be as under-
- (a) Independent Bathroom 1.00 x 1.2 m.
 - (b) Independent Water closet 0.9 m. x 1.2 m.
 - (c) Combined bath room and water closet. 1.80 sq. m. with minimum width of 1.00 m.
- 17.4.2** **Height:-** The Height of a bathroom or water closet measured from the surface of the floor to the lowest point in the ceiling (bottom of slab) shall be not less than 2.1 m.
- 17.4.3** **Other Requirements -** Every bathroom or water closet shall -
- (a) be so situated that at least one of its wall shall open to external air with the size of opening (windows, ventilators, louvers) not less than 0.3 sq. m. in area and side not less than 0.3 m. (See Regulation No. 17.12.3)
 - (b) have the platform or seat made of water tight non absorbent material,

(c) be enclosed by walls or partitions and the surface of every such wall or partitions shall be finished with a smooth impervious material to a height of not less than 1 m. above the floor of such a room; and

(d) be provided with an impervious floor covering, sloping towards the drain with a suitable grade and not towards verandah or any other room.

17.4.4 No room containing water closets shall be used for any purpose except as a lavatory and no such room shall open directly into any kitchen or cooking space by a door, window or other opening. Every room containing water closet shall have a door completely closing the entrance to it.

17.5 Loft-

The maximum depth of a loft shall be 1.5 m. and the loft may be provided, over residential kitchens, habitable rooms, bath rooms, corridors and over shop floor, built up to an area 25 per cent over kitchens and full space of bath rooms, water closets and corridors. In the shops loft over an area upto 33% of the carpet area may be provided. However, loft will not be allowed where mezzanine floor is provided.

17.5.1 The clear head room under loft shall not be less than 2.1 m.

17.5.2 Loft in commercial areas and industrial buildings shall be located 2 m. away from the entrance.

17.6 Cupboards & Shelves

The projections (cantilever) of cupboards and shelves may be permitted except on ground floor and would be exempted from covered area and built up area calculations. Such projections may project upto 45cm, in the setbacks for residential buildings provided the width of such cupboard/shelves does not exceed 2.4 m. and each room shall not have more than one such cupboard/ shelf. Moreover such projection shall be at least 2 m. from plot boundary.

17.7 Mezzanine floor

17.7.1 Size: The aggregate area of the mezzanine floor shall not exceed 50 % of the built up area of that floor. The minimum size of a mezzanine floor if it is used as a habitable room shall not be less than 9.00sq.m.

Note :- Mezzanine floor area shall be counted towards F. S. I.

17.7.2 Height -The minimum height of a mezzanine floor shall be 2.2 m. The headroom under mezzanine room shall not be less than 2.10 m.

17.7.3 Other Requirements: A mezzanine floor may be permitted in a room, provided that it conforms to the standards of habitable rooms as regards lighting and ventilation.

17.8 Store Room :-

17.8.1 Size :- The floor area of a store room in a residential building where light ventilation and height are provided at special standards lower than as required for living room shall not be more than 3 sq. m.

17.8.2 Height- The height of a store room shall not be less than 2.10 m.

17.9 Garage

17.9.1 Size:- The size of a garage in individual residential building shall be not less than 2.5 m. X 5 m. and not more than 3 m. X 6 m. The area of parking lock up garage shall be included in FSI calculations.

17.9.2 Height:-The maximum head room in a garage shall be 2.4 m.

17.9.3 The plinth of garage located at ground level shall not be less than 15 cm. above the surrounding ground level.

17.9.4 The garage shall be setback behind the building line for the street / road on to which the plot abut, and shall not be located affecting the access ways to the building.

17.9.5 **Corner Site:** When the site fronts on two streets, the location of a garage (in a corner plot) (if provided within the open spaces) shall be on diagonally opposite the point of intersections.

17.10 Roofs

17.10.1 The roof of a building shall be so constructed or framed as to permit effective drainage of the rain water there from by means of sufficient rain water pipes of adequate size, wherever required, so arranged, jointed and fixed as to ensure that the rain water is carried away from the building without causing dampness in any part of the walls or foundations of the building or those of an adjacent building.

17.10.2 The **Authority/Collector** may require rain water pipes to be connected to a storm water drain through a covered channel formed beneath the public footpath or in any other approved manner, if not used for rain water harvesting

17.10.3 Rainwater pipes shall be affixed to the outside of the walls of the building or in such other manner as may be approved by the **Authority/Collector** .

17.10.4 Terrace of a building shall not be sub-divided and it shall have only common access.

17.11 Basement:

17.11.1 Basement shall be constructed within the prescribed setbacks and prescribed building line in one or two level and may be put to only following uses:

(a) Following user shall be permissible free of FSI.

(i) Air conditioning equipment and other machine used for services and utilities of the building;

(ii) Parking spaces and

(iii) Strong room, bank cellars etc.

17.11.2 The basement shall not be used for any other user than mentioned above.

17.11.3 Multilevel basements may be permitted if the basement is used for parking. The ramps of minimum 3.0m.width for entry and exit of vehicle separately shall be provided. In case of bona-fide hardship, the Chief Officer may allow only one ramp with not less than 6.0 m. in width.

17.11.4 The basement shall have the following requirements -

(a) Every basement shall be in every part at least 2.4 m. in height from the floor to the soffit of beam.

(b) Adequate ventilation shall be provided for the basement with a ventilation area not less than 2.5% of the area of the basement. Any deficiency may be met by providing in addition adequate mechanical ventilation in the form of blowers, exhaust fans, air conditioning systems etc.

(c) The minimum height of the ceiling of any basement shall ordinarily be 0.9 m. and maximum of 1.2 m. above the average surrounding ground level. However it does not apply to the mechanically ventilated basements.

(d) Adequate arrangement shall be made such that surface drainage does not enter the basement.

(e) The walls and floor of the basement shall be water-tight and be so designed that the effect of the surrounding soil and moisture, if any, are taken into account in design and adequate damp proofing treatment is given; and

(f)The access to the basement shall be separate from the main and alternate staircase providing access and exit from higher floors. Where the staircase is continuous in case of building served by more than one staircase, the same shall be of enclosed type serving as a fire separation from the basement floor and higher floors [see Regulation No. 19.4.3 (m)] Open ramps shall be permitted

if they are constructed within the building line subject to the provision of (d).

17.12 Lighting and Ventilation of Rooms.

- 17.12.1** The minimum aggregate area of opening of habitable rooms and kitchens excluding doors shall be not less than 1/10th of floor area. In case of Kokan region, it shall not be less than 1/6th of floor area.
- 17.12.2** No portion of a room shall be assumed to be lighted if it is more than 7.5 m. from the opening assumed for lighting / ventilation of the portion, provided additional depth of living room beyond 7.5 m. may be permitted subject to provision of proportionate increase in the opening.
- 17.12.3** Where the lighting and ventilation requirements are not met through day lighting and natural ventilation, the same shall be ensured through artificial lighting and mechanical ventilation as per latest version of Part VIII - Building Services Section, Lighting and Ventilation of National Building Code of India published by the Bureau of Indian Standards. In the case of special types of buildings requiring artificial lighting and air-conditioning for special types of manufacturing or other process the requirements about natural day lighting and ventilation may be relaxed

17.12.4. Ventilation Shaft:-

For ventilating the space for water closets and bath room, if not opening on the exterior side of a building, open on the ventilation shaft, the size of which shall not be less than the values given below in Table No.9:

Table No.9

Height of building in m.	Size of ventilation every side in sq.m	Minimum width of shaft in m.
Up to 10	1.2	0.90
Up to 12	3.0	1.50
Up to 18	4.5	1.80
Up to 24	5.4	1.80
Up to 30	8.0	2.40
Above 30	9.0	

- 17.12.5** In residential lodging hotels where attached toilets are provided with mechanical ventilation system installed as per Regulation No. 17.12.3., the size of ventilation shaft may be relaxed by Authority/Collector .

17.13 Parapet:

Parapet walls and handrails provided on the edges of roof terraces, balcony etc. shall not be less than 1.05 m. and not more than 1.20 m. in height.

17.14 Wells:

Wells intended for supply of water for human consumption or domestic purposes where provided, shall comply with the requirements of Regulation No. 17.14.1 and 17.14.2.

17.14.1 Location: The well shall be located:

- Not less than 15 m. from soak pit, refuse pit, earth closet or privy and shall be located on a side upwards from the earth closet or privy.
- Not less than 18 m. from any cess pit, soak way or borehole latrine and shall be located on a site upwards from the earth closet or privy.
- Such that contamination by the movement of sub soil or other water is unlikely; and

- (d) Not under a tree or otherwise it should have a canopy over it so that leaves and twigs do not fall into the well and rot.

17.14.2 Requirements: The well shall:

- (a) have minimum internal diameter of not less than 1 m.;
- (b) be constructed to a height not less than 1 m. above the surrounding ground level to form a parapet or curb and to prevent surface water from following into a well, and shall be surrounded with a paving constructed of impervious material which shall extend for a distance of not less than 1.8 m. in every direction from the parapet or the curb forming the well head and the upper surface for such paving shall be sloped away from a well;
- (c) be a sound and permanent construction (PUCCA) throughout;
- (d) the interior surface of the lining or walls of the well shall be rendered impervious for depth of not less than 1.8 m. measured from the level of the ground immediately adjoining the well-head.

17.15 Septic Tanks:

- Where a septic tank is used for sewage disposal, the location, design and construction of the septic tank shall conform to requirements of 17.15.1 and 17.15.2.

17.15.1 Location of Septic Tanks and Subsurface Absorption System:- A subsoil dispersion system shall not be closer than 12.00 m. of any source of drinking water, so as to avoid the possibility of bacterial pollution of water supply. It shall also be as far removed from the nearest habitable building as economically feasible but not closer than 6 m. to avoid damage to the structures.

17.15.2 Requirements:

- (a) **Dimensions of Septic Tanks:** Septic tanks shall have minimum width of 75 cm., minimum depth of 1 m. below the water level and a minimum liquid capacity of 1 cu.m. Length of tanks shall be 2 to 4 times the width.
- (b) Septic tanks may be constructed of brick work, stone masonry, concrete or other suitable materials as approved by **Authority/Collector** .
- (c) Under no circumstances should effluent from a septic tank be allowed into an open channel drain or body of water without adequate treatment.
- (d) Minimum nominal diameter of pipe shall be 100 mm. further, at junctions of pipes in manholes, 'direction' of flow from a branch connection should not make an angle exceeding 45 degree with the direction of flow in the main pipe.
- (e) The gradients of land drains under drainage as well as the bottom of dispersion trenches and soak way should be between 1:300 and 1:400.
- (f) Every septic tank shall be provided with ventilating pipe of at least 50 mm diameter. The top of the pipe shall be provided with a suitable cage of mosquito proof wire mesh.

The ventilating pipe shall extend to a height, which would cause no smell nuisance to any building in the area. Generally, the ventilating pipe may extend to a height of about 2 m. when the septic tank is at least 15 m. away from the nearest building and to a height of 2 m. above the top of the building when it is located closer than 15 m.

- (g) When the disposal of septic tank effluent is to seepage pit, the seepage pit may be of any suitable shape with the least cross sectional dimension of 90 cm. and not less than 100 cm. in depth below the invert level of the inlet pipe. The pit may be lined with stone, brick or concrete blocks with dry open joints which should be backed with at least 7.5 cm. of clean coarse aggregate. The lining above the inlet level should be finished with mortar. In the case of pits of large dimensions, the top portion may be narrowed to reduce the size of the RCC cover slabs. Where no lining is used, specially near trees, the entire pit should be filled with loose stones. A masonry ring may be

constructed at the top of pit to prevent damage by flooding of the pit by surface run off. The inlet pipe may be taken down to a depth of 90 cm. from the top as an anti-mosquito measure

- (h) When the disposal of septic tank effluent is to a dispersion trench, the dispersion trench shall be 50 to 100 cm. deep and 30 to 100 cm. wide excavated to a slight gradient and shall be provided with 15 to 25 cm. of washed' gravel of crushed stones Open jointed pipes placed inside the trench shall be made of unglazed earthenware clay or concrete and shall have minimum internal diameter of 75 to 100 mm. Each dispersion trench should not be longer than 30 m. and trenches should not be placed closer than 1.8 m.

17.15.2.1 Septic Tank Requirements:- Requirements specified by State and Central Government, public Health Institutes such as NEERI, for modern methods of disposal, may also be permissible.

17.16 Boundary Wall:-

The requirements of the boundary wall are given below:

- (a) Except with the special permission of the Chief Officer the maximum height of the compound wall shall be 1.5 m. above the centre line of the front street. Compound wall upto 2:4 m. height may be permitted if the top 0.9m. is of open type construction (railings).
- (b) In case of corner plot the height of boundary wall shall be restricted to 0.75 m. for a length of 10 m. on the front and side of the intersections and balance height of 0.75 m. if required in accordance with (a) may be made of open construction (railings),
- (c) However, the provisions of (a) and (b) are not applicable to boundary wall of jails. In industrial buildings, electric sub stations, transformer stations institutional buildings like sanatoria, hospitals, industrial buildings like workshops, factories and educational buildings like schools, colleges, including the hostels, and other uses of public utility undertakings. Height upto 2.4 m. to boundary walls of these types of building may be permitted by the Authority/Collector .
- (d) The compound gate should open entirely inside the property and shall not open on any access/pathway/ road/street.

17.17 Office-cum-Letter Box Room :

In the case of multi-storeyed multi-family dwelling apartments constructed by existing or proposed Cooperative Housing Societies or Apartment Owners Associations, limited companies and proposed societies, an office-cum-letter box room of maximum dimension 3.6 m. x 3 m. shall be provided on the ground floor. In case the numbers of flats are more than 20, maximum size of the office-cum-letter box shall be 20 sq.m.

17.18 Meter Rooms:-

Meter room size shall be minimum of 3.00 m. x 5.00 m. Depending upon the requirements, the size shall be increased in consultation with M.S.E.D.C.L

- 17.18.1** The spaces for provision of transformers shall be provided as per the requirements of M.S.E.D.C.L.

17.19. Chimneys

- 17.19.1** Chimneys, where provided shall conform the requirements of IS 145-1960 of latest version.
- 17.19.2** Notwithstanding the provisions of Regulation No. 17.19.1, the Chimneys shall be built at least 0.9 m. above parapet wall. In the case of sloping roofs, the chimney top shall not be less than, 0:6 m. above the ridge of the roof in which the chimney penetrates.

18.0 PROVISION OF LIFTS

- 18.1** Provision of lift shall be made for all buildings more than 15 m. in height (See Regulation No. 19.4.9)

19.0 EXIT REQUIREMENTS

19.1 General-The following general requirement shall apply to exits.

- (a) Every building meant for human occupancy shall be provided with exits sufficient to permit safe escape of occupants in case of fire or other emergency;
- (b) In every building, exits shall comply with the minimum requirements of this part, except those not accessible for general public use;
- (c) All exits shall be free of obstructions;
- (d) No building shall be altered to reduce the number, width or protection of exits to less than that required;
- (e) Exits shall be clearly visible and the routes to reach the exits shall be clearly marked and sign posted to guide the occupants to the floor concerned;
- (f) All exit ways shall be properly illuminated;
- (g) Fire fighting equipment where provided along exits shall be suitably located and clearly marked but must not obstruct the exit way and yet there should be clear indication about its location from either side of the exit way;
- (h) Alarm devices shall be installed for buildings above 15m. in height, to insure prompt evacuation of the occupants concerned through the exits;
- (I) All exits shall provide continuous means of egress to the exterior of a building or to an exterior open space leading to a street and;
- (j) Exits shall be so arranged that they shall be reached without passing through another occupied unit.

19.2 Types of exits -

Exits shall be either of horizontal or vertical type. An exit may be doorway, corridor, and passageways to an internal staircase or external staircase, ramps or to a verandah and/or terraces which have access to the street or to roof of a building. An exit may also include a horizontal exit leading to an adjoining building at the same level. Lifts and escalators shall not be considered as exits.

19.3 Number and Size of Exits

-The requisite number and size of various exits shall be provided, based on number of occupants in each room and floor based on the occupant load, capacity of exits; travel distance and height of building as per provisions of Regulation No. 19.3.1. to 19.3.3 –

All buildings specified in Regulation No. 6.2.6.1 shall have minimum two staircases. They shall be of enclosed type; at least one of them shall be on external walls of building and shall open directly to the exterior, interior open space or to an open place of safety. Further, the provision of alternative staircase shall be subject to requirement of travel distance being complied with.

19.3.1. Arrangement of Exits

-Exits shall be so located so that the travel distance on the floor shall not exceed as given below:

Type of Building	Travel Distance
1) Residential, Educational, Institutional and Hazardous occupancies	22.5 m
2) Assembly, Business, Mercantile, Industrial and Storage occupancies	30.0 m

Wherever more than one exit is required for a floor of a building, they shall be placed as remote from each other as possible. All the exits shall be accessible from the entire floor area at all floor levels

19.3.2 Occupant Load -

For determining the exits required the number of persons within any floor area or the occupant load shall be based on the actual number of occupants but in no case, less than that specified in Table 10.

**Table No -10
Occupant Load**

Sr. No.	Group of Occupancy	Occupant Load Gross Area*in sqm per person
(1)	(2)	(3)
1	Residential	12.5
2	Educational	04.00
3	Institutional	15 (see Note-1)
4	Assembly	
	(a) with fixed or loose seats and dance floors	0.6 (see Note-2)
	(b) without seating facilities including dining rooms	1.5 (see Note-2)
5	Mercantile	
	(a) Street floor and sales basement	3
	(b) Upper sale floors	6
6	Business and industrial	10
7	Storage	30
8	Hazardous	10

*The gross area shall mean plinth area or covered area

Note 1 - Occupant load in dormitory portions of homes for the aged, orphanages, insane asylums, etc. where sleeping accommodation is provided shall be calculated @ not less than 7.5 sq.m. gross area/ person.

Note 2 - The gross area shall include, in addition to the main assembly room or space, any occupied connecting room or space in the same storey or in the storeys above or below where entrance is common to such rooms and spaces and they are available for use by the occupants of the assembly space. No deductions shall be made in the gross area for corridors, closets or other sub-divisions. The area shall include all space serving the particular assembly occupancy.

19.3.3 Capacity of Exits -

The capacity of exits (doors and stairways) indicating the number of persons that could be safely evacuated through a unit exit width of 50 cm. shall be as given in **Table -11**.

**Table No -11
Occupants per Unit Exit Width**

S.No.	Group or Occupancy	Number of Occupants		
		Stairways	Ramps	Doors
1	Residential	25	50	75
2	Educational	25	50	75
3	Institutional	25	50	75
4	Assembly	40	50	60
5	Business	50	60	75
6	Mercantile	50	60	75

7	Industrial	50	60	75
8	Storage	50	60	75
9	Hazardous	25	30	40

19.3.4 For all buildings identified in Regulation No. 6.2.6.1 there shall be a minimum of two staircases. They shall be of an enclosed type stairway.

At least one of them shall be on the external walls of buildings and shall open directly to the exterior, interior open space or to any open place of safety

19.3.5 **The following minimum width provisions shall be made for stairways;**

Residential Buildings (dwelling)	1.2 m
for Individual House & Row housing with G+2 storeys	0.75 m
Residential Hotel Buildings	1.50 m
Assembly buildings like auditoria, theatres, Cinemas etc., mangalkaryalaya, marriage halls.	2.00 m
Institutional Buildings like hospitals & Educational	2.00 m
All other public buildings	1.50 m

19.4 **Other Requirements of Individual Exits-** The detailed requirements of individual exits are given in regulation No. 19.4.1 to 19.4.6.

19.4.1 Doorways:

- (a) Every exit doorway shall open into an enclosed stairway, a horizontal exit or a corridor or passage way providing continuous and protected means of egress
- (b) No exit doorway shall be less than 90 cm in width in case of residential and 100 cm. in width in case of other buildings. Doorways shall be not less than 200 cm. in height. Doorways for bathrooms, water closet, stores etc. shall be not less than 75 cm. wide.
- (c) Exit doorways shall open outwards, that is away from the room but shall not obstruct the travel along any exit. No door, when open, shall reduce the required width of stairway or landing to less than 90 cm. Overhead or sliding doors shall not be installed.
- (d) Exit door shall not open immediately upon a flight of stairs, a landing equal to at least the width of the door shall be provided in the stairway at each doorway. Level of landing shall be the same as that of the floor which it serves.
- (e) Exit doorways shall be openable from the side which they serve without the use of a key.

19.4.2 Revolving Doors :

- a) Revolving doors shall not be used as required exits except in residential, business and mercantile occupancies, but shall not constitute more than half the total required door width;
- b) When revolving doors are considered as required exit way the following assumptions shall be made;
 - (i) Each revolving door shall be credited one half a unit exit width; and
 - (ii) Revolving doors shall not be located at the foot of a stairway. Any stairway served by a revolving door shall discharge through a lobby or foyer

19.4.3 Stairways:

- a) Interior stair shall be constructed of non-combustible materials throughout;
- b) Interior staircase shall be constructed as a self-contained unit with at least one side adjacent to an

- external wall and shall be completely enclosed;
- c) A staircase shall not be arranged around a lift shaft unless the latter is entirely enclosed by a material of required fire- resistance rating. For buildings more than 15m. in height, the staircase location shall be to the satisfaction of Fire Officer, Fire Brigade Authority.
 - d) Hollow combustible construction shall not be permitted.
 - e) The minimum width of an internal staircase shall be as per the provisions of regulation No. 19.3.5
 - f) The minimum width of treads without nosing shall be 25 cm. for an internal staircase for residential buildings. In the case of other buildings, the minimum treads shall be 30 cm. The treads shall be constructed and maintained in a manner to prevent slipping.
 - g) The maximum height of riser shall be 20 cm. in the case of residential buildings and 15 cm. in the case of other buildings. They shall be limited to 12 per flight. For low income housing scheme in narrow plots, the riser may be provided in one flight.
 - h) Handrails shall be provided with a minimum height of 90 cm. from the tread,
 - i) The minimum unobstructed headroom in a passage under the landing of a staircase and under the staircase shall be 2.2 m.
 - j) No living space, store or other fire risk spaces shall open directly into the external staircase or staircases.
 - k) External exit door of staircase enclosure at ground level shall open directly to the open spaces or can be reached without passing through a large lobby.
 - l) In the case of assembly, institutional, residential, hotels, industrial and hazardous occupancies, the exit sign with arrow indicating the way to the escape route shall be provided on the wall / floor and shall be illuminated by electric light connected to corridor circuits. All exit way marking signs should be flush with the wall and so designed that no mechanical damage shall occur to them due to moving of furniture or other heavy equipments. Further all landings of floor shall have floor indication boards indicating the floor number. The floor indication board shall be placed on the wall immediately facing the flight of stairs and nearest to the landing. It shall be of appropriate size.
 - m) In case of single staircase it shall terminate at the ground floor level and the access to the basement shall be by a separate staircase. Wherever the building is served by more than one staircase, one of the staircases may lead to basement levels, provided the same is separated at ground level by either a ventilated lobby or cut-off screen wall without opening, having a fire resistance of not less than 2 hours with discharge point at two different ends or through enclosures. It shall also be cut off from the basement areas at various basement levels by a protected and ventilated lobby / lobbies. The staircase shall be lighted and ventilated and the minimum size of openings on walls abutting to open spaces shall be 0.3 sq. m. per landing.

19.4.4 Fire escape or external stairs –

For buildings above 15 m. in height fire escape stairs shall be provided subject to the following conditions:

- (a) Fire escape shall not be taken into account in calculating the evacuation time of building;
- (b) All fire escapes shall be directly connected to the ground;
- (c) Entrance to fire escape shall be separate and remote from the internal staircase;
- (d) The route to fire escape shall be free of obstructions at all times, except a doorway leading to the fire escape; which shall have the required fire resistance;
- (e) Fire escape shall be constructed of non-combustible materials;
- (f) Fire escape stairs shall have straight flights not less than 75 cm. wide with 25 cm. treads and risers

- not more than 20 cm. The number of risers shall be limited to 16 per flight.
- (g) Handrail shall be of height not less than 90 cm.
 - (h) Fire escape staircase shall be connected to other staircases through common passage at every floor.
 - (i) Unprotected steel frame staircase will not be accepted as means of escape. However, steel staircase in an enclosed fire rated compartment of 2 h. will be accepted as means of access.

19.4.5 Spiral stairs (fire escape) -

The use of spiral staircase shall be limited to low occupant load and to a building of height 9 m. unless they are connected to platforms, such as balconies and terraces to allow escapee to pause. A spiral fire escape shall not be less than 150 cm. in diameter and shall be designed to give adequate headroom.

19.4.6 Ramps:

(1) Ramps for pedestrians.-

- (a) Ramps with a slope of not more than 1 in 10 may be substituted for and shall comply with all the applicable requirements of required stairways as to enclosure capacity and limiting dimensions. Ramps shall be surfaced with approved non-slipping material;
- (b) The minimum width of the ramps in hospitals shall be 2.25 m;
- (c) Handrails shall be provided on both sides of the ramp.

(2) Ramps for basement or storeyed parking - For parking spaces in a basement and upper floors, at least two ramps of minimum 3 m. width and slope of not steeper than 1:8, shall be provided preferably to the opposite ends. In case of bona-fide hardship, the Chief Officer may allow only one ramp, if proposed to be provided due to space restriction, it shall not less than 6.0 m. in width. Such ramps may be permitted in the side and rear marginal open spaces after leaving sufficient space as mentioned in Regulation No.15.4 for movement of firefighting vehicles. Provided that when a building abutting 3 or more roads, then ramps shall be allowed in front marginal open spaces facing the smaller road or less important road from traffic point of view.

19.4.7 Corridors:

- a) The minimum width of a corridor other than internal passages shall be calculated based on the provisions of a regulation No.19.3.1 to 19.3.3 as per the corresponding width of staircase;
- (b) In case of more than one main staircase of the building interconnected by a corridor or other enclosed space, there shall be at least one smoke stop door across the corridor or enclosed space between the doors in the enclosing walls of any two staircases.
- (c) The passages (covered or uncovered) including an arcade, a courtyard, a porch or portico, spaces to be left open to sky in accordance with these Regulations, in any premises shall not be used for any other purpose than the one permissible.

19.4.8 Refuge Area

: For buildings more than 24 m in height, refuge area of 15 sq.m. or an area equivalent to 0.3 sq.m. per person to accommodate the occupants of two consecutive floors whichever is higher shall be provided as under:

The refuge area shall be provided on the periphery of the floor or preferably on a cantilever projection and open to air at least on one side protected with suitable railings.

a) For floors above 24 m and upto 39 m – One refuge area on the floor immediately above 24 m.

b) For floors above 39 m – One refuge area on the floor immediately above 39 m and so on after every

15 m. Refuge area provided in excess of the requirements shall be counted towards FSI.

Note : Residential flats on multi-storeyed buildings with balcony, need not be provided with refuge area. However, flats without balcony or with enclosed balconies shall be provided with refuge area as given above. All refuge areas shall be accessible from common passages/staircases.

19.4.9 Lifts and Escalators:-

19.4.9.1 Lifts:

- (a) All the floors shall be accessible for 24 hours by the lifts. The lifts provided in the buildings shall not be considered as a means of escape in case of emergency.
- (b) Grounding switch at ground floor level to enable the fire service to ground the lift cars in any emergency shall also be provided;
- (c) The lift machine room shall be separate and no other machinery shall be installed therein.

19.4.9.2 Escalators :

Escalators may be permitted in addition to required lifts. Such escalators may be permitted in atrium area in shopping malls / public buildings.

19.4.10 Fire Lift

Where applicable, fire lifts shall be provided with a minimum capacity for 8 passengers and fully automated with emergency switch on ground level. In general, buildings 15 m in height or above shall be provided with fire lifts. In case of fire, only fireman shall operate the fire lift. In normal course, it may be used by other persons. Each fire lift shall be equipped with suitable inter-communication equipment for communicating with the control room on the ground floor of the building. The number and location of fire lifts in a building shall be decided after taking into consideration various factors like building population, floor area, compartmentation, etc.

20.0 FIRE PROTECTION REQUIREMENTS

All buildings shall be planned, designed and constructed to ensure fire safety and this shall be done in accordance with the regulations mentioned in Part VI of these regulations and Part IV of Fire Protection of National Building Code of India and Maharashtra Fire Prevention and Life Safety Measures Act, 2006, unless otherwise specified in these regulations. In case of buildings identified in Regulation No. 6.2.6.1. the building schemes shall also be cleared by the Fire Officer Fire Brigade Authority.

21.0 SPECIAL REQUIREMENTS OF OTHER BUILDINGS:-

21.1 Educational buildings.

- 21.1.1** Educational buildings shall not be permissible within 60 m. from the existing assembly building and 90 m. from the existing petrol pump.
Educational building shall only be permitted if 40% area is available for playground. However, this provision shall not be applicable to already approved existing building wherein construction of additional floor is proposed.
- 21.1.2** No classroom shall admeasure less than 38 sq. m. with a min dimension of 5.50 m
- 21.1.3** The height of any classroom shall not be less than 3.60 m.
- 21.1.4** Exit Requirements -This shall conform to Regulation No. 19

21.1.5 Requirements of Water Supply, Drainage and Sanitation:- This shall conform to requirements of part VII of these regulations.

21.1.6 Parking spaces - This shall conform to regulation No.16.

21.1.7 FSI - FSI permissible shall be as per regulation no 13.4.1

21.2 Institutional Buildings-(Hospital, Maternity Homes and Health Centre, Sanatoria).

21.2.1 Hospitals and Sanatoria shall be constructed on independent plot.

21.2.2 Any Special ward in the hospital building shall not admeasure less than 9.0. sq.m. in area with no side less than 3 m

21.2.3 Area of the general wards shall not admeasure less than 40 sq. m. with no side less than 5.5. m

21.2.4 Every building shall have a refuge collection area of minimum 7.50 sq. m. size with cover on top and unclosed on at least three sides. The same shall not be allowed in marginal open spaces. Modern method of incineration of the refuge may be adopted.

21.2.5 **Exit Requirements**-This shall conform to regulation No. 19

21.2.6 Requirements of Water Supply, Drainage and Sanitation - This shall conform to requirements of Regulation No. 30.1 and 30.2 and Tables 15, 27 and 28.

21.2.7 **Parking Spaces** - This shall conform to Regulation No.16.

21.2.8 FSI - FSI permissible shall be as per regulation no 13.4.1

21.3 Cinema Theatre/Multiplex

21.3.1 Plot for Cinema theatres shall not be located within a distance of 60 m. from the plot boundary of existing or proposed educational or medical or institutional user.

21.3.2. They shall conform to the provisions of Maharashtra Cinema (Regulations) Rules, 1966, as amended from time to time.

21.3.3. **Exit Requirements** -This shall conform to regulations No.19.

21.3.4. Requirements of Water Supply Drainage and Sanitation -This shall conform to the requirements of part VII of these regulations.

21.3.5. **Parking Spaces** - This shall conform to regulation No. 16,

21.3.6 FSI - FSI permissible shall be as per regulation no 13.4.1

21.4 Mercantile Buildings.

21.4.1 Minimum area of shop shall be 6 Sq. m. in R-1 zones with a minimum width of 2.0 m. and 10 Sq. m. in R-2 and other zones with a minimum width of 3 m.

21.4.2 FSI - FSI permissible shall be as per regulation no 13.4.1

21.5 Industrial Building

21.5.1 In addition of provisions of these regulations, regulations prescribed under Factory Act shall be applicable.

21.5.2 In the case of Industrial Buildings with different operations/processes, the different (gaseous, solid, liquid) effluents shall be so treated, subject to the approval of Maharashtra Prevention of Water Pollution Control Board and Chief Inspector of Steam Boilers and Smoke Nuisance, before letting it out in to the air, ground or water course.

21.5.3 **Exit Requirements** -This shall conform to Regulation No.19.

21.5.4 Requirements of Water Supply, Drainage and Sanitation:- This shall conform to part VII of these regulations

21.5.5 **Parking spaces/Loading and unloading spaces**-This shall conform to regulation No.16

21.5.6 For construction of industrial building, buffer zone of 23 m. wide shall be left from residential or incompatible zone, wherever necessary. Such buffer zone may be part of sizable required recreational open space. In such case, FSI of the area under the buffer zone / open space shall not be permissible.

Whenever a buffer zone is required to be left in between industrial zone and any incompatible zones, as mentioned in this Regulation, it shall not be a bar for availing FSI of that area; unless it is a part of required recreational open space or road.

PART III LAND USE CLASSIFICATION AND PERMISSIBLE USES.

22.0 GENERAL-

The different land uses classification & different uses permissible in that land use are given below.

22.1 PURELY RESIDENTIAL ZONE - R 1

(Plot abutting on roads below 12 m. width In non -congested area and 9 m. in congested area)

22.1.1 The following uses and accessory uses to the principal use shall be permitted in buildings or premises in purely Residential Zone:

- (i) Any residences.
- (ii) Customary Home occupation, i.e. occupations customarily carried out by the members of household without employing hired labour and shall include stitching embroidery, button making, etc, with or without motive power. If motive power is used, the total electricity load should not exceed 1 H. P.
- (iii) Medical and Dental Practitioner's Dispensaries including pathological laboratory, diagnostic clinics, polyclinics, to be permitted on any floor. However, maternity homes, clinics, nursing home with indoor patients on ground or stilt floor or on first floor with separate means of access of staircase from within the building or outside, but not within the prescribed marginal open spaces.
- (iv) Maternity Homes in independent buildings.
- (v) Professional Offices in residential tenement not exceeding carpet area of 20 sq. m. each.
- (vi) Community halls, welfare centre, gymnasias (each not exceeding 80 sq.m.)
- (vii) Primary and nursery schools including students' hostels except trade schools on roads not more than 24 m. width.
- (viii) Religious buildings.
- (ix) Public Libraries and Museums in independent structures.
- (x) Club Houses, Parks and Playgrounds not being used for business purpose.
- (xi) Bus shelters, Taxi stands.
- (xii) Convenience shops not more than 10 sq. m. such as ration shops, pan shops, Dhobi/ Dry cleaning Shops, Darners, Tailors, Groceries, Confectionary and other general provisions. Hair Dressing Saloon and Beauty Parlour, Bicycle Hire and Repair; Shoe Repair, umbrella repair, Vegetable & Fruit Stalls, Milk Shops. Dispensaries, Floweriest, Bangles and other articles needed by women, Small Bakeries, Newspaper Stalls, Tea Shops, ATM, etc.
- (xiii) Police Chowky, Telephone exchanges, Government and Municipal Sub -Offices, Post and Telegraph Offices, Branch offices of Banks with Safe Deposit Vaults, electrical sub-stations, fire station. Civil Defence and home guard warden posts, First Aid posts, municipal bit offices, pumping stations and water Installations and ancillary structures thereof required to cater to the local area.
- (xiv) Information Technology Establishment (ITE) (pertaining to software only) on the plots/ premises fronting on roads having width more than 9.00 m. and above.

- (xv) Flour mill and wet / dry masala grinding subject to following conditions:
 - (a) It is located on ground floor.
 - (b) Adequate care has been taken in structural design.
 - (c) It does not cause any nuisance to the neighbour and residents of upper floor.
 - (d) Power requirement does not exceed 10 hp.
- (xvi) Roads, Bridge, culverts and construction for any mode of transportation.
- (xvii) Burial grounds, cremation grounds and essential public utilities on a road having width 9 m. and above.
- (xviii) Raisin production.
- (xix) Agricultural, Horticultural and allied uses (except agro-based industries).
- (xx) Public conveniences.
- (xxi) Any other use allowed in consultation with the Director of Town Planning, Maharashtra State in accordance with the intend and spirit of these Regulations.

22.2 RESIDENTIAL ZONE R-2

(Residential plots abutting on road having width 12 m. and above in non-congested area and 9 m. and above in congested area) in this zone the following uses, mix uses may be permitted:

22.2.1 All Uses permitted in R1 zone shall be permitted in R 2 zone.

22.2.2 Other uses permissible -A building or premises may be used only for the purpose indicated at 22.2.2.1 subject to the following conditions

(a) 50 % commercial use may be permitted irrespective of floor restriction.

Such additional user shall in no case consume FSI of more than 0.5 in both congested and non-congested areas except in buildings on independent plots.

Notwithstanding anything contained above a pedestrianised shopping precinct extending to a depth of more than 12 m. (40 ft.) may be allowed subject to the condition that no shop in such pedestrianised precinct shall be allowed to open directly on the road in front. The minimum width of pedestrian way provided shall be 3 m. clear of all steps or projections and bollards shall be placed at the entrance of such pedestrian passage to prevent entry of vehicles provided further that satisfactory arrangements for natural or artificial ventilation are made as may be directed by the Authority/Collector

b) Where the building or premises abut on two or more streets, no direct opening of such shop shall be permissible on the street, which is less than 9 m. in congested and 12 m. in non -congested area.

c) All goods offered for sale and brought for repair shall be displayed and kept within the building and

shall not be kept in the passages or footpaths or roads.

d) No trade and business involving any danger of fire, explosion, offensive noise, vibrations, smoke, dust glare heat or other objectionable influence may be allowed

22.2.2.1 Uses permissible in R-2 zone :

- i) Stores or shops for the conduct of retail business including departmental stores. Storage and sale of combustible materials shall not normally be permitted except with the special permission of the concerned authority.
- ii) Personal service establishments: professional offices.
- iii) Radio broadcasting stations and studio, telephone exchanges, mobile towers.
- iv) Frozen food lockers, fast food and vending stalls.
- v) Tailor shops not employing more than 9 persons and embroidery shops and button - hole making shops not employing more than 9 persons with individual motors not exceeding 1 H. P. and total H. P. not exceeding 3.
- vi) Shops for goldsmiths, locksmiths, watch and clock repairs, optical glass grinding and repairs, musical instrument repairs, picture framing, radio and household appliances repairs, upholstery and diamond cutting and polishing not employing, more than 9 persons with individual motors not exceeding 1 H. P. and total H. P. not exceeding 3 H. P.
- vii) Coffee grinding with electric motive power not exceeding 1 H.P.
- viii) Auto part stores and show rooms for motor vehicles and machinery.
- ix) Sale of used or second hand goods or merchandise (not junk, cotton waste, rage or other materials of offensive nature).
- x) Club houses or other recreational activities, conducted as business.
- xi) Storage of furniture and household goods.
- xii) Repairs to all household articles (excluding auto vehicle).
- xiii) Veterinary dispensaries and hospitals.
- xiv) Animal pounds.
- xv) Repair, cleaning shops and analytical, experimental or testing laboratories not employing more than 15 persons in the industrial activity but not including cleaning and dyeing establishment using a cleaning or dyeing fluid having a flash point lower than 60 degree C. and machines with dry load capacity of 30 kg. for any establishment carrying on activities that are noxious or offensive because of emission of odour, dust, smoke, gas, noise or vibration or other-wise dangerous to public health and safety, provided that the motive power requirement of such establishment does not exceed 10 H. P.
- xvi) Accessory uses customarily incidental to any permitted principal use including storage space, upto 50 percent of the total floor area used for the principal use.
- xvii) Paper box manufacturing including paper cutting, not employing more than 9 persons, with motive power not exceeding 5 H. P. and area not more than 50 sq. m.
- xviii) Mattress making and cotton cleaning, not employing more than 9 persons with motive power not exceeding 3 H.P. and area not more than 50 sq. m.
- xix) Establishment requiring power for sealing tin, packages, etc. not employing more than 9 persons, with motive power not exceeding 3 H.P.
- xx) Commercial halls, exhibition halls, community halls, welfare centre, gymnasias, etc.
- xxi) Art galleries, aquariums;
- xxii) Research, experimental and testing laboratories not involving any danger of fire or explosion nor of any noxious nature and located on a site not less than 4 Ha. in area and when the laboratory is kept at least 30 m. from any of the boundaries of the site and the necessary residential buildings 30 m from the laboratory.

- xxiii) Restaurants, eating houses, cafeteria, ice - cream and milk bars.
 - xxiv) Establishment for preparation and sale of eatables not occupying for production an area in excess of 75 sq. m. per establishment and not employing more than 9 persons. Sugarcane and fruit juice crushers not employing more than 6 persons with 1.5 H.P. with area not more than 25 sq.m. shall also come under that sub - rule.
 - xxv) Trade or other similar schools not involving any danger of fire or explosion nor of offensive noise, vibration, smoke, dust, odour, glare, heat or other objectionable influences
 - xxvi) Repairing garages not employing more than 9 persons and 2 H.P. motive power in the industrial activity with no floor above.
 - xxvii) Battery charging and repairing, not employing more than 6 persons with an area not more than 25 sq.m. and not more than 2 chargers with power not exceeding 5 KW.
 - xxviii) Photographic studios and laboratories with not more than 50 sq. m. area, not employing more than 9 persons and not using power more than 3 H. P.
 - xxix) Showroom for Distribution and sale of LPG; and
 - xxx) Coal and Firewood Shops.
 - xxxxi) Polyclinics on separate floors, preferably ground floor, pathology laboratories.
 - xxxii) Residential Hotels, Boarding and Lodging shall be permitted in independent building or parts of building, but on separate floors.
 - xxxiii) Book Depot, Medicine and chemist shops.
 - xxxiv) Business/ corporate office on any floor.
- Note.** The Chief Officer Authority/Collector may from time to time add to amend the above list with the approval of Director of Town Planning, Maharashtra State, Pune

22.2.3 Uses to be permitted in independent premises / buildings.

The following uses shall be permitted in independent premises / building:

- i) Drive - in - theatres, theatres, cinema houses multiplex, club houses, assembly or concert halls, dance and music studios and such other places of entertainment.
- ii) Petrol filling and CNG service stations.
- iii) Colleges, Secondary Schools, Trade or other similar schools.
- iv) Storage and sale of kerosene not exceeding 1000 liters in groceries and approved ration shops on retail basis.
- v) Bulk storage and sale of kerosene not exceeding 13000 liters in separate godowns confirming to the existing regulations of Chief Controller of Explosives, Government of India provided further that the applicant shall make adequate fire fighting arrangements at his cost in his plot to the entire satisfaction of the Authority/Collector .
- vi) Storage and sale of LPG in cylinders not exceeding 100 kg. in showrooms / distribution centre.
- vii) Storage and sale of LPG in cylinders not exceeding 6300 kg in a separate godown confirming to the existing regulations of Chief Controller of Explosives, Government of India provided further that the applicant shall make adequate fire fighting arrangements at his cost in his plot to the entire satisfaction of the Authority/Collector
- viii) Parking of automobiles and other light vehicles on open plots even as a business.
- ix) Vegetable, fruit, flour, fish or meat market place.
- x) General Agriculture and Horticulture (including domestic poultry) upto the use of 20 birds per plot and with a space requirement of 0.25 sq. m. per bird.
- xi) Correctional and mental institutions, institutions for the children, the aged or widows, sanatoria and hospitals in independent building facing on roads of width not less than 15 m. (except veterinary hospitals) provided that those principally for contagious diseases, the insane or for correctional

purposes shall be located not less than 45 m. from any residential premises.

xii)**Service Industries** - The Service Industries may be permitted in independent building (independent designated plot) in R2 and Commercial zones along with the limitation of area, maximum number of persons to be employed, maximum permissible power requirement and the special conditions if any as given in Table No. 12 for service industries.

Note:- The user of Cinema/ Drama Theatre shown as existing user on Development Plan should be regarded as designated user and in case of re-development of property, a similar user with similar or more capacity shall be provided along with any other user that may be permissible in accordance with zoning applicable for the particular plot as decided by the Government from time to time and as permissible under The Bombay Cinemas (regulation) Act, 1953.

Table No. 12

SCHEDULE FOR SERVICE INDUSTRIES

Sr. No.	Category of Industry	Service Industry Class -A (Permitted in R2 and C) Criteria for Classification and special condition			
		Maximum Permissible			
		Power requirement (in H.P.)	Employment (in persons)	Floor area (in sq. m.)	Special Conditions if any
(1)	(2)	(3)	(4)	(5)	(6)
I.	Food Product				
1	Preservation of meat, canning preserving and processing of fish crust aces and similar foods	-	-	-	-
2	Manufacture of milk and dairy products such as butter, ghee, etc.	10	9	50	-
3	Canning & preservation of Fruits & Vegetables including production of Jam, Jelly, Sauce, etc.	-	-	-	-
4	(a) rice huller (b) Groundnut decorticators (c) Grain Mill for production of flour (d) Manufacture of supari and Masala grindings (in separate building). (e) Baby oil expellers	10 10 10 10 10	9 9 9 9 9	50 50 50 50 50	-
5	Manufacture of bakery products with no Floor above	10	9	75	(i) shall not be permitted under or above a dwelling unit(ii) operation shall be permitted only between 8.00 hrs. to 20.00 hrs. (iii) Fuel used shall be electricity, gas or smokeless coal.
6.	Manufacture of cocoa, chocolate, Sugar confectionary	-	-	-	-
7.	Coffee, curing roasting and grinding	2	9	50	-

8.	Cashewnut processing like drying,shelling, roasting, salting etc.	-	-	-	-
9.	Manufacture of Ice	45	20	250	-
10.	Sugarcane crushing & Fruit Juice	2	9	25	-
II.	BEVERAGES & TOBACCO				
11.	Manufacture of soft drinks and carbonated water	-	Not included	-	-
12.	Manufacture of bidi	No Power to be used	as permitted	250	To be permitted in R-1 zone only
III.	TEXTILE & TEXTILEPRODUCTS				
13.	Handloom / powerloom of yarn for a maximum of 4 looms.	5	9	50	To be permitted in R-1 zone in areas designated by the Authority/Collector.
14.	Printing dyeing & bleaching cotton, woolen & silk textiles	-	Not included	-	-
15.	Embroidery & making of crape laces and fringes	5	9	50	-
16.	Manufacture of all types of textile garments including wearing apparel.	3	9	50	
17.	Manufacture of made up textiles goods such as curtains, mosquito net, mattresses, bedding material pillow cases, textile bags. etc.	3	9	50	
IV.	WOOD PRODUCTS AND FURNITURE				
18	Manufacture of wooden & cane boxes & packing cases.	-	-	-	-
19	Manufacture of structural wooden goods such as beams, posts, doors and windows	-	-	-	-
20	Manufacture of wooden furniture and fixtures	1	9	50	i)Shall not be permitted under or adjoining a dwelling unit. ii)operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
21.	Manufacture of bamboo and cane furniture and fixtures	1	9	50	

22.	Manufacture of wooden products such as utensils, toys, art wares etc	-	-	-	-
V.	PAPER PRODUCTS AND PRINTING PUBLISHING				
23	Manufacture of cartons and boxes from papers and paper board, paper pulp.	5	9	50	Manufacture with paper pulp not permitted.
24	Printing & Publishing newspaper.	5	9	50	-
25	Printing & Publishing periodicals, books journals, atlases, maps, envelope, printing picture, post-card, embossing				i) Shall not be permitted under or adjoining a dwelling unit. ii) Operation shall be permitted only between 8.00 hrs. and 20.00 hrs. iii) No restrictions of power, number of employees, area of hours of operation shall apply if located in a building, in separate plot not less than 500 sq. m. and if Spl. Permission of the Authority/Collector is obtained
26.	Engraving etching block making etc.	10	9	120	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
27.	Book binding	10	9	120	-
VI.	LEATHER PRODUCTS				
28.	Manufacture of leather footwear		Not Included		
29.	Manufacture of wearing apparel like coats, gloves etc.		Not Included		
30.	Manufacture of leather consumers goods such as upholstery suitcases pocket books, cigarette and key cases, purses etc.		Not Included		
31	Repair of footwear and other leather	5	9	50	

VII.	RUBBER AND PLASTIC :				
32.	Re-treading and vulcanizing works	2	9	50	
33.	Manufacture of rubber balloons, hand gloves and allied products	2	9	50	
VIII	NON-METALLIC MINERAL PRODUCTS				
34.	Manufacture of structural stone goods, stone dressing, stone crushing and polishing		Not Included		
35.	Manufacture of earthen & plaster states and images, toys and art wares.		Not Included		
36.	Manufacture of cement concrete building components, concrete jellies, septic tank, plaster or paris work lime mortar etc.		Not Included		
IX.	METAL PRODUCTS :				
37	Manufacture of furniture and fixtures primarily of metal.				
38	Plating & Polishing and buffing of metal products				
39	Manufacture of metal building components such as grills, gates. Doors and window frames, water tanks, wire nets, etc.	5	9	50	
40	Manufacture and repair of sundry ferrous engineering products done by jobbing concerns such as mechanical works, shops with lathes, drills, grinders, welding equipment etc				
41	Total sharpening and razor sharpening works	1	6	25	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
X	ELECTRICAL GOODS :				
42.	Repairs of household electrical appliances such as radio set. Television set, tape recorders, heaters, irons, shavers, vacuum cleaners, refrigerators, air-conditioners,	3	9	50	(i) Operation shall be permitted only between 8.00 hrs. 20.00 hrs. (ii) No spray painting permitted.

	washing machines, electric cooking ranges, motor rewinding works etc.				
XI	TRANSPORT EQUIPMENT				
43	Manufacturing of push cart, hand cart, etc.	10	9	50	
44	(a) Servicing of motor vehicles and motor cycles with no floor above (b) Repair of motor vehicles and motor cycles with no floor above. (c) Battery charging and repairs.	10 5	9 6	50 25	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs. No spray painting permitted
45	Repairs of bicycles and cycle rickshaws	5	6	50	No spray painting permitted
XII.	OTHER MANUFACATURING AND REPAIR INDUSTRIES AND SERVICES				
46.	Manufacture of jewellery and related articles	3	9	50	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
47.	Repair of watch, clock and jewellery	3	9	50	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
48	Manufacture of sports and athletic goods	-	-	-	-
49	Manufacture of Musical instruments and its repair.	3	9	50	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
50	Mass manufacture of miscellaneous Products such as costume, jewellery, costume novelties, feather, plumes, artificial flowers, brooms, brushes, lamp shades, tobacco, pipes, cigarette holders, ivory goods, bandages, wigs and similar articles.	-	-	-	
51	(a)Repairs of locks, stoves, umbrellas, sewing machines, gas burners, buckets & other sundry household equipment. (b) Optical glass grinding and repairs	3 3	9 9	50 50	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
52.	Petrol filling stations	10	9	(i) 30.5x16.75m. (ii) 36.5x30.5m	Plot size to be line with IRC recommendations depending on service bay or not.

53.	Laundries, Laundry service and cleaning, dyeing, bleaching and dry cleaning	5	9	50	(i) Cleaning & dyeing fluid used shall not have flash point lower than 138 ⁰ F. (ii) Operation shall be permitted between 8.00 hrs. to 20.00 hrs. (iii) Machinery having day load capacity of 20 kg and above.
54	Photo processing laboratories.	5	9	50	Operation shall be permitted between 8.00 hrs. to 20.00 hrs.
55	Electronic Industry of assembly type (and not of manufacturing type including heating load).	10	20	250	In independent structure on independent plot with special permission of the Chief officer
56	Bio-technology Unit	--	--	--	As per Regulation No.24.5
57	Information Technology Unit	--	--	--	As per Regulation No.24.7
Note : The Chief Officer may from time to time add to or alter or amend the above list with the approval of Director of Town Planning, Maharashtra State, Pune.					

22.3 COMMERCIAL ZONE

22.3.1 In commercial zones, buildings or premises shall be used only for the uses and purposes given in Regulation No. 22.3.2 subject to the following conditions:

- (a) all goods offered for sale shall be displayed within the building excluding passages;
- (b) when the commercial zone boundary falls short of a street, the frontage along such street shall not be permitted to be developed for uses which would not be permissible along such streets and;
- (c) when user other than those permissible in a residential zone without a shop line (R1) have an access from the side or rear open spaces, the width of the such open spaces shall not be less than 7m.

22.3.2 Uses Permissible in Commercial Zone :

- i) Any use permitted in residential zone without area and floor restrictions.
- ii) Club, business houses, veterinary- dispensaries, testing labs, paper and plastic packing bags and boxes manufacturing, mattress making.
- iii) Business Offices and exchanges.
- iv) Whole -sale establishments with storage area not exceeding 200 sq. m. subject to fire protection requirements.
- v) Public utility buildings.
- vi) Headquarters organisations.

22.4 INDUSTRIAL ZONE

The following users shall be permissible in Industrial Zone.

22.4.1 Service Industries :

The service industries may be permitted as given in Table No.12.

22.4.2 Other Industries

Industries shall include any building or part of a building or structure, in which products or materials of all kinds and properties are fabricated, assembled or processed, for example - assembly plants, laboratories, dry cleaning plants, power plants, pumping station; smoke houses, laundries, gas plants, refineries, dairies and saw - mills.

22.4.2.1 Uses Permissible in Industrial Zone -

- i) Any industry / industries may be permitted only with the special permission of the Authority/Collector who may grant it after such scrutiny as may be necessary to ensure that the location is appropriate and is not likely to cause nuisance and hazard to adjoining owners. Before granting any such permission, the Authority/Collector may prescribe special conditions about minimum size of plot and minimum buffer open spaces from the industrial building/ industrial use to residential or habitable zone / use, which shall not however be less than 23 m.
- ii) Building or premises in industrial zone may be used for any industrial as well as accessory uses like banks, canteens, welfare center and such other common purposes considered necessary for the industrial workers, quarters of watchman, caretakers or other essential staff required to be maintained on the premises. Such residential/commercial/other uses may be permitted up to 25 % of the permissible FSI.

iii) Information Technology Establishments

iv) Following uses may also be permitted:

- (a) Petrol Pumps and Service Stations as per the provisions contained in Regulation No.23.2.2, Table No.14.
- (b) Parking lots.
- (c) Electric Sub - station.
- (d) Building of public utility concerns except residence.
- (e) The branches of Scheduled Banks.
- (f) Storage Buildings.
- (g) Drive-in -Theaters, cinema or theaters, subject to provision of separate entries and exits for the cars

(v) Allowing Residential / Commercial User In Industrial Zone :- (Conversion of Industrial Zone to Residential Zone)

- (a) With the previous approval of the Authority/Collector in consultation with the concerned Divisional Head of Town Planning and on such conditions as deemed appropriate by him, the existing or newly built-up area of a unit, in the Industrial zone may be permitted to be utilised for residential or commercial purposes.
- (b) With the previous approval of the Authority/Collector, in consultation with the concerned Divisional Head of Town Planning, lands in the Industrial Zone including lands in Industrial Zone in Town Planning Scheme area, may be permitted to be utilised for any of the permissible users in the Residential and Commercial Zone or the Residential Zone subject to the following conditions :
 - (i) Residential/ Commercial user in respect of industries which are not in operation shall not be permitted unless NOC from Labour Commissioner, Maharashtra State, Mumbai, stating that all legal dues have been paid to the workers or satisfactory arrangements between management and workers have been made, is obtained. However, in respect of any open land in the Industrial Zone where industry never existed, NOC from Labour Commissioner shall not be required.
 - (ii) In the layout or sub-division of such land measuring upto 2 Ha., 10% land for public utilities and amenities, like electric sub-station, bus-station, sub-post office, police out-post and such other amenities/utilities, as may be considered necessary shall be provided.
 - (iii) In such layouts or sub-division, having area more than 2 Ha., 20% land shall be provided for public utilities and amenities like electric sub-station, bus-station, sub-post office, police out-post, garden, playground, school, dispensary and such other amenities/utilities as may be considered necessary.
 - (iv) The land under public utility / amenity shall be handed over to the Authority with proper access and basic land development and shall always be open for general public without any restriction. These areas will be in addition to the recreational space as required to be provided under these regulations.
- (c) The required segregating distance between the Industrial Zone and the area over which Residential use is permitted under this Regulation shall be provided within such land intended to be used for residential or commercial purpose.
- (d) Such residential or local commercial development shall be allowed within the permissible FSI of the nearby Residential or Commercial Zone.

Note : Residential/Commercial User may be allowed over the part area of the land holding, subject to the condition that total area of the entire land holding shall be considered for deciding the percentage of the land to be reserved for public amenity/ utility spaces, as per this regulation.

22.5 AGRICULTURAL ZONE / NO DEVELOPMENT ZONE

The following uses shall be permissible:-

- (i) All agricultural uses including stables of domestic animals, piggeries, poultry farms accessory building, tents.
- (ii) Garden, forestry, nursery, public parks, private parks; play fields, summer camps for recreation of all types.
- (iii) Golf Course and Links, Race tracks, and shooting ranges.
- (iv) L.P.G. Godown subject to the following conditions -
 - a) Minimum area of the plot shall be 4000 sq. m.
 - b) Maximum permissible F.S.I. shall be 0.2.
 - c) Only ground floor structure shall be permitted.
 - d) No Objection Certificate from the Controller of Explosives and the Chief Fire Officer shall be submitted along with the proposal.
 - e) Any additional condition as may be imposed by the Authority/Collector.
- (v) Brick, tile or pottery manufacture.
- (vi) Fish Farming.
- (vii) Sand clay or gravel quarries.
- (viii) Storage and drying of fertilizer.
- (ix) Public utility establishments such as electric sub-stations, receiving stations, sewage disposal water works along with residential quarters for essential staff for such works.
- (x) **Farm houses** subject to following conditions:-
 - (a) Minimum plot area under above use shall be 0.4 Ha.
 - (b) The land in which it is to be constructed is actually put under agricultural use.
 - (c) Farm house shall be permitted by the Authority/Collector only after the requisite permission for farm house is obtained by the owner from the Authority/Collector under the provisions of Maharashtra Land Revenue Code, 1966 and attested certified copy of such permission is attached with the application under Section 44 of the The Maharashtra Regional and Town Planning Act, 1966.
 - (d) The FSI shall not exceed 0.0375 subject to a maximum built up area of 400 sq.m. in any case. Only ground floor structure with or without stilt shall be permissible.
- (xi) Swimming 'pools / sports and games, health clubs, cafeteria, canteen, tennis courts, etc.
- (xii) Amusement park with minimum plot area of 1.00 hect. and with ground floor structures, excluding essential staff quarters. Maximum permissible FSI shall be 0.04.
- (xiii) Mobile Phone Towers with ancillary equipment
- (xiv) ITE with ancillary development subject to following conditions:-
 - a) Total FSI shall not exceed 0.2.
 - b) Ancillary residential development shall not have FSI of more than 0.10.
 - c) On 50% of plot area, trees shall be planted at the rate of 500 trees per hect.
 - d) Plot shall front on 12 m. wide road.
- (xv) Raisin
- (xvi) Mining and quarrying operations subject to stipulations mentioned in Part XI.

(xvii) **Research and Development Centers** on following conditions.

1. The area of land shall be minimum 10 hectare.
2. Maximum 10% of plot area shall be allowed for construction (Plinth area) and FSI permissible shall be maximum 0.20.
3. Out of the total allowable, plinth area up to 1% shall be used for office use and up to 1% for staff Quarters.
4. Total strength of the employees shall be limited to 10 per hect.
5. The research and development work for inflammable and hazardous chemicals in the industries is not allowed.
6. Maximum ground plus one upper storey is allowed.
7. At least 500 trees per hectare shall be planted and maintained.
8. The violation of any of above 1 to 7 clauses will lead to cancellation of permission.

xviii) **Ancillary service industries** for agriculture produce marketing and management, Ancillary service uses for agro related products like flowers, fruits, vegetables, poultry products, marine products related collection centers, auctionhall, godowns, grading services and packing units, knowledge parks, coldstorages, utility services (like banking, insurance, post office services) as service industries for agriculture produce marketing on the land owned by individuals / organizations after deducting development plan reservations if any, with construction up to a maximum of 20 % (FSI=0.20).

xix) **Bio-technology** unit as per stipulations given in Part V (regulation no. 24.5) with maximum permissible FSI of 0.20.

xx) **Petrol Pump/LPG Pump/CNG Pump:** Petrol Pump, LPG Pump, CNG Pump shall be permissible in No Development Zone subject to following conditions:-

- a) The minimum size of plot shall be,
 - i) 30.50 m x 16.75 m. in the case of Petrol/LPG/CNG Filling Station with kiosk without service bay;
 - ii) 36.50 m x 30.50 m. in the case of Petrol/LPG/CNG Filling Station with service bay.
- b) Plot shall be located /fronting on National Highway, State Highway, Major District Road, Other District Road or Village Road or other road with a minimum width of 12.00 m. or more.
- c) Permission from Government of India, Petroleum Ministry and Chief Controller of Explosives shall be necessary.
- d) NOC from Public Works Department and other related departments shall be obtained as per the prevailing rules. as regards service road / building line / control line, the Government Resolution, Public Works Department, No. RBD-1081/ 871/Raste-7, dated 09 March 2001 and the circulars issued in this regard from time to time shall be observed. Instructions contained in Government of India, Ministry of Road Transport and Highways letter dated 25/09/2003 and 17/10/2003 and its enclosures as amended from time to time shall be observed.
- e) The plot on which a petrol filling station with or without service bays is proposed shall be an independent plot on which no other structure shall be constructed.
- f) Petrol/LPG/CNG station shall not be permitted within a distance of 90 meter from junction of roads having minimum width of 12 m. each. Also Petrol station shall not be sited within a distance of 90 m. from the nearest premises of school, hospital and theatre, place of assembly or stadium.

- g) In the case of kiosks and other buildings for sales office, snack bars etc. within the plot for Petrol/LPG/CNG filling stations, the setbacks from the boundaries shall be 4.50 m. Further the other clearances for the installations shall be as per the Petroleum Rules of 1937.
- xxi) Solid waste management, land fill sites, bio-gas plants, power generation from waste.
- xxii) Power generation from non-conventional sources of energy.
- xxiii) Highways amenities such as motels, way-side restaurants, service stations, service godowns, factory outlets, Highway malls, Hyper Malls alongwith public conveniences like toilets.
- xxiv) Any other compatible use not specified above may be permitted with prior approval of the Director of Town Planning, Maharashtra State.

Note - The permissible FSI for uses in No Development Zone shall be 0.1 on gross plot area, if not specified.

22.6 PUBLIC /SEMI PUBLIC ZONE.

The following uses shall be permissible:

- (i) Pre-primary schools, Primary Schools, High Schools, Technical / Trade Schools, Colleges, Educational Complex, Hostels for students and essential staff quarters.
- (ii) Hospital, Sanatoria, Dispensary, Maternity Homes, Health Centre, Complex of such uses, Dharmashala for the visitors to patients, pilgrims and like, essential staff quarters, veterinary hospital, auditorium exhibition hall and gallery.
- (iii) Training institutions, Home for the aged, essential quarters.
- (iv) Government/ Semi -Government/ Local Self Government offices, Court buildings, essential staff quarters.
- (v) Post Office, Telegraph office, Telephone Exchange, Radio Station, Complex of such uses, Staff quarters and similar public /Semi-public uses.
- (vi) Library, MangalKaryalaya, Gymnasium, Gymkhana, Water tanks, Stadium, Community hall, Religious Structures, etc.
- (vii) Commercial use upto 15% shall be permissible subject to following conditions:
 - (a) Convenience shopping, Branch of Bank small hotels etc. shall be permissible. However, hotels/shops for liquor, pan, cigarette, tobacco, lottery tickets and such other uses which do not serve public purpose, and outlets / Godowns for domestic gas, kerosene shops/ godowns which are dangerous to public health shall not be permitted.
 - (b) For parking, sufficient area shall be kept in the plot.
 - (c) Additional F. S. I. shall be allowed only on the plot area remaining after deducting the plot area utilised for commercial user.
 - (d) The Authority/Collector shall not allow sub - division of S. No. / Gat No. / Plot No. on which such a Development which may cause/ has taken place/ would take place.
 - (e) The commercial user is permitted upto a depth of 12 m.
 - (f) The plots in which there is an existing development; such commercial use shall be restricted to maximum 15% of the existing and proposed development taken together.
 - (g) The landowner / developer / institution shall give guarantee in writing to the Authority/Collector for following all the stipulated conditions scrupulously.
- (viii) **Petrol/LPG/CNG Pumps as per Regulation No. 23.2.2.**

Note: With prior approval of the Director of Town Planning, Maharashtra State, Pune; the Authority/Collector may include other items of public interest in the list which are not covered in the above list.

PART IV
MARGINAL SPACES, SETBACKS, HEIGHT, PERMISSIBLE F.S.I.

23.0 General:

Following regulations for congested area shall be applicable for the lands included in congested area as shown on the plan. For the areas outside congested area in the development plan, regulation for outside-congested area shall apply. However, in congested area, if the original land holding is more than 0.40 Hect., then regulations of non-congested area shall apply.

23.1 MARGINAL OPEN SPACES, AREA AND HEIGHT LIMITATIONS AND PERMISSIBLE FSI FOR BUILDINGS SITUATED WITHIN CONGESTED AREA

23.1.1 RESIDENTIAL BUILDINGS

(a) Floor Space Index.

Maximum permissible FSI shall be 1.50 for purely residential building and in case of mix residential with commercial or other user, additional FSI, limited to 0.5 only in R-2 zone for non-residential user may be permitted

(b) Marginal Open Spaces/Setback - The minimum front setback from the existing or proposed road shall be as under:-

S.No.	Road width	For Purely Residential	For Mixed Users
(i)	For streets 7.5 m. to less than 12 m. in width	1.00 m.	2.00 m.
(ii)	For streets 12 m to less than 18 m. in width	1.50 m	2.50 m.
(iii)	For streets 18 m & above in width	2.00 m	3.00 m

c) Side & rear open spaces in meter shall be as below :

Residential Plot Area	Side	Rear
Upto 250 sq. m	0.00	0.00
Above 250 & upto 500 sq. m	1.00	1.00
Above 500 sq. m. & upto 1000 sq.m	2.00	2.00
Above 1000 sq.m.	As per regulation no 13	

NOTE :-

- i) For light and ventilation, provisions in Regulation No.15.2 shall apply.
- ii) For common wall construction, length of common wall shall not be more than 8 m.
- d) For streets less than 7.5 m. in width, no setback shall be prescribed subject to condition that no lane shall be less than 4.5 m. in width clear of structural projection. For lanes less than 4.5 m. in width, a setback of 2.25 m. shall be prescribed from the centre line of such lane. Streets less than 4.5 m. shall be treated as lanes only when they serve as access to the properties fronting on them
- e) Structural projections such as balconies, cornices, weather sheds, roof projections etc. shall be allowed in the setback distance prescribed above as per regulation No. 15.4

f)Height- The height of the building shall be governed by Regulation No. 15.5.

g)Ground Coverage-The maximum ground coverage shall be 60% of the net plot area

23.1.2 Cinema Theatre, multiplex, assembly-building, shopping malls and like buildings: For these buildings, regulations prescribed in non- congested area,except FSI, shall apply.

23.1.3 Educational, Medical, Institutional, Commercial, Mercantile, and Other Buildings:

(a) Floor Space Index - Maximum FSI permissible shall be 2.00.

(b) Open Space - For these buildings open spaces shall be 3 m. on all sides.

(c) Ground Coverage – The maximum ground coverage shall be 50% of the net plot area

23.1.4 Pathway for access to the internal building or interior part of the building,
The pathway shall not be less than 3.6m. (12 ft) in width.

23.1.5 If the width of property is less than 3.6 m. (12 ft), the entire ground floor shall be on stilts.

23.1.6 Front open space as prescribed by the Highway or any other rules shall be applicable if they are over and above as prescribed in these regulations.

23.1.7 The provisions mentioned in above Rule No.23.1 to 23.1.5 may be relaxed by the Authority/Collector in consultation with the Divisional Head of concerned division of the Town Planning Department, in special circumstances

23.2 MARGINAL OPEN SPACES, AREA AND HEIGHT LIMITATIONS AND PERMISSIBLE FSI FOR BUILDINGS SITUATED OUTSIDE CONGESTED AREA.

23.2.1 Residential Buildings:

(a) The provisions as given in Table 13 shall apply for the residential buildings, residential with shop line on ground floor permissible in non-congested areas and ancillary residential buildings permissible in industrial areas.

Table NO. 13

FRONT/REAR/SIDE MARGINS/HEIGHTS FOR BUILDINGS IN RESIDENTIAL ZONE IN NON-CONGESTED AERA

S No	Description of Road	Minimum Required					Normal FSI permissible on net plot area	FSI with payment of premium	Remarks
		Plot Zize	Width Of Plot	Set Back from road front	Side Open Space	Rear Open Space			
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1.	National/ State Highway	450	15	4.5 m. from road line or as specified by Highway rules whichever is more.	3.0	3.0	1.20	0.20	
2.	M.D.R./ O.D.R.	450	15	4.5 m. from road line or as specified by Highway rules whichever is more	3.0	3.0	1.20	0.20	
3.	Other roads 24 m. wide and above	300	12	4.5 m.	3.0	3.0	1.2	0.20	
4.	Roads of width below 24m. wide and up to 15m.	250	10	3.00	3.0	3.0	1.10	0.20	
5.	Road of width below 15 m. and above 9 m.	150	10	3.0 m	1.5	1.5	1.00	0.20	
6.	Road of width upto9 m.	100	7	3.0 m.	1.5	1.5	1.00	0.20	Only G + 2 structure shall be allowed.

7.	Row housing on roads of width 12m. and below	30 to 125	3.50	2.25 m.	0.00 (in case of corner plot, 1.5 or building line of the adjoining road whichever is more)	1.5	1.00	0.20	(G+1) or (Stilt+2) may be allowed.
8.	Row housing for L.I.G. EWS/High Density Housing, Slum Upgradation etc. by public authority	20 to 50	3.00	0.90 m. from pathway 2.25 m. from road boundary	-do-	0.90	1.00	0.20	(G+1) or (Stilt+2) may be allowed.

Note :

- (1) Where the height of the building exceeds 14 m., then side and rear marginal spaces shall be left as per Regulation No. 15.1.3 subject to minimum of 3 m.
- (2) Row-housing plots at the junction of two roads shall be larger to maintain the setback from both roads. Not more than 8 and not less than 4 plots shall be allowed in each block of row housing. Each block shall be separated from the other by 6 m. road or 6 m. side margin distance of the plot.
- (3) No garage shall be permitted in a building having stilt or basement provided for parking.
- (4) Construction of ottas, railings, barricades or supporting columns for canopy or porch shall not be allowed in front marginal open space. However, steps may be permitted within 1.2 m. from the building line.
- (5) If the plot is from approved land subdivision layout, then plot area shall be treated as net area. The computation of FSI & net plot area shall be as per Regulation No.13.4.1.
- (6) For clinics having in area of less than 100 sqm, above regulation shall apply.
- (7) In no case ribbon development rules shall be relaxed without consent of the Highway Authority.
- (8) Rate of payment of premium for the additional FSI mentioned in Column No.9 of above Table shall be as decided by the Director of Town Planning, by general order, from time to time.

23.2.2	Other Buildings : The Provision as given in Table No.14 below shall apply for different categories of buildings
---------------	--

Table No - 14

Sr. No.	Type of Building	Min. road width required	Min Open Spaces	Normal Permissible FSI on the net plot area	Additional FSI with payment of premium	Other Stipulation
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1	Hospital, Maternity Homes, Health Club, Public-Semipublic buildings	12 m.	6 m. on all sides	1.00	0.20	-
2	Educational buildings					
	i) Pre-primary School	9m. & not more than 18 m.	As per Table No. 13	1.00	0.20	-
	ii) Primary School	9m.& not more than 18 m.	6 m. on all sides	1.00	0.20	-
	iii) Other Educational Buildings	15 m.	--do--	1.00	0.20	-
3	Cinema Theatre/ Drama Theatre/ Assembly Hall/ Multiplex / Shopping Malls	15 m.	Front – 12 m. All sides – 6 m.	1.00	0.20	The minimum distance between boundary of site for Cinema Theatre / /Drama Theatre/ Multiplex/ Assembly Hall & boundary of educational & hospital buildings shall not be less than 60 m.
4	MangalKaryalaya like buildings	15 m.	--do--	1.00	0.20	-
5	Petrol/Fuel Filling Stations with or without service bays	12 m.		0.20	----	i) Should not be located within the distance of 90 m. from any junction of roads having min. width 12 m. each from nearest gate of a school, hospital, theatre, place of assembly or stadium. ii) Restrictions imposed by Ribbon Development Rules, IRC,

						MoRTH shall apply. iii) Petrol filling station shall not be sited on the convex side of a road curve. In case the curve is not very sharp and cars moving out of the station are completely visible to the traffic from a distance of at least 90 m. and vice versa, a petrol station may be permitted on such a convex curve.
6	Mercantile / Business / Commercial buildings	12	Front 4.5 m. Side & rear 3.0 m.	1.00	0.20	-
7	Stadium / Pavilion	12	6 m. on all sides	0.10	--	Covered portion shall not exceed 20% of plot area. The spectators' gallery of the stadium shall not be counted towards FSI. Shops below spectator's gallery may be permissible.

NOTE:

- i) In case of plots fronting on National Highway, State Highway and Major District Roads, the building line shall be as per Ribbon Development Rules as given in Table above, whichever is more.
- ii) Side and rear marginal open spaces mentioned in above Table shall be subject to Regulation No.15, whichever is more.
- iii) A stadium shall generally accommodate 400 m. running track.
- iv) Rate of payment of premium for the additional FSI mentioned in Column No.6 of above table shall be as decided by the Director of Town Planning, by general order, from time to time.

23.3	Industrial buildings					
	Minimum plot area height limitation for industrial building shall be as per the Table given below.					
Table No - 15						
AREA, HEIGHT LIMITATIONS FOR INDUSTRIAL BUILDING						
Sr. No.	Plot Size in sq.m.	Max. Ground Coverage (%)	Min. Front Margins	Min. Side & Rear Margins	Normal Permissible FSI	FSI with payment of premium
1	300 to 1000	50	4.5	3.0	1.00	0.20
2	1001 to 2500	50	6.0	4.5	1.00	0.20
3	2501 to 5000	50	6.0	6.0	1.00	0.20
4	5001 & above	50	9.0	9.0	1.00	0.20
NOTE :						
i) In case of plots fronting on National Highway, State Highway and Major District Roads, the building line / control line shall be as per Ribbon Development Rules as given in Table above, whichever is more.						
ii) Side and rear marginal open spaces mentioned in above Table shall be subject to Regulation No.15, whichever is more.						
iii) Rate of payment of premium for the additional FSI mentioned in Column No.7 of above table shall be as decided by the Director of Town Planning, by general order, from time to time.						

PART V
ADDITIONAL FSI IN CERTAIN CATEGORIES
IN NON-CONGESTED AREAS

24.0 General:-

Additional Floor space index may be allowed in certain categories as mentioned below and subject to following conditions:

- a) No relaxation shall be granted in case of marginal distances, parking & other requirement as per these regulations.
- b) The percentage of additional FSI shall be applicable on normal FSI permissible in the said area.
- c) The amount recovered by way of premium for additional FSI shall be deposited in separate infrastructure development fund and shall be utilised for development/up-gradation of infrastructure related to the concerned projects.

24.1 Road widening and construction of new roads:

The Authority/Collector may permit on the same plot, additional FSI on 100 percent of the area required for road widening or for construction of a new road proposed under the Regional Plan and also for road widening / service road proposed to N.H./ S.H./M.D.R./O.D.R. whether shown on Regional Plan or not. If the owner (including the lessee) of such land surrenders such land for road widening or construction of new road without claiming any compensation in lieu thereof and hand over the same free of encumbrances to the satisfaction of the Authority/Collector. Such 100 percent of the FSI on land so surrendered to the Authority/Collector may be utilised on the remaining plot. Thereafter, the road shall be transferred in the city survey records in the name of Authority/Collector and shall vest in it becoming part of a public street. Provided further that this concession shall not be granted in respect of

- a) Roads in the areas of Town Planning Scheme which are the proposals of the scheme.
- b) Where layout is already sanctioned and there was no commitment on the part of authority to grant FSI of such new road / road widening.

Note : This regulation shall also be applicable to congested area

24.2 Educational/Medical /Institutional buildings and Starred category Hotels :-

The Authority/Collector may with the previous approval of the Director of Town Planning, Maharashtra State and such other terms and conditions as he may specify, permissible FSI may be allowed to be exceeded in respect of educational, medical and institutional buildings of Government or public Authorities or of registered public charitable trusts, three star category hotels built on independent plot and approved by the Department of Tourism, GOI (in case of starred category hotels). Provided the maximum additional FSI over the prescribed normal FSI admissible under these regulations shall not exceed-

- (i) 100 percent in the case of educational, medical and institutional buildings; and
- (ii) 100 percent in the case of three, four and five star category hotels as stipulated under regulation.
- (iii) Premium shall be levied as decided by Government from time to time.
- (iv) Out of the total premium as may be fixed by the Director of Town Planning, Maharashtra State, Pune 50 percent shall be payable to the Authority/Collector and 50 per cent to the government.

24.3 Buildings of Government and Semi-Government Offices and Public Sector Undertakings:

The Authority/Collector in consultation with Director of Town Planning, Maharashtra State, Pune may permit the prescribed floor space indices to be exceeded by 150 % in the case of buildings of government and Semi-government offices and public sector undertakings. Such additional FSI shall be granted without payment of premium.

24.4 Development/Redevelopment of Housing Schemes of Maharashtra Housing and Area Development Authority.

- 1) The FSI for a new scheme on vacant lands of low Cost Housing Scheme for Economically Weaker Section, Low Income Groups and Middle Income Groups of MHADA having at least 60 percent built-up area of the tenements under EWS, LIG and MIG categories, shall be 2.50
- 2) For redevelopment of any existing housing scheme of MHADA, undertaken by the MHADA departmentally or jointly with societies /occupiers of buildings or housing societies/ occupiers of building or by lessees of MHADA or by developer, the FSI shall be as under:-
 - a) Total permissible FSI shall be maximum 2.5 on gross plot area.
 - b) The incentive FSI admissible against the FSI required for rehab shall be as under:-
 - i) In congested area, for the area upto 4000 sq. m., the incentive FSI admissible will be 50 percent.
 - ii) In congested area, for the area above 4000 sq.m, the incentive FSI admissible will be 60 percent.
 - iii) In outside congested area, for the area upto 4000 sqm, the incentive FSI admissible will be 60 percent
 - iv) In outside congested area, for the area above 4000 sq.m., the incentive FSI will be 75 percent.
 - c) Difference between 2.5 FSI and the FSI required for “rehab + incentive” shall be shared between MHADA and Occupiers Society/ developer in the ratio of 2:1
 - d) In the scheme, for the land allotted for societies of MIG and HIG and developed plot allotted individually to MIG and HIG group, the permissible FSI shall be as per prevailing Development Control Regulations
- 3) In case of grant of NOC with additional permissible built-up area outside congested area over and above the permissible FSI as per sanctioned DCR prevailing at the time of allotment by MHADA for the purpose of undertaking Redevelopment / Utilisation, MHADA shall charge premium at the rate decided by Government in Housing Department from time to time.
- 4) For the purpose of calculating the FSI, the entire area of the layout including development plan roads and internal roads but excluding the land under the reservation of public amenities shall be considered. Sub-division of plots will be permissible on the basis of compulsory recreational open space as in these Regulations. For low cost Housing Schemes of MHADA for EWS, LIG categories, the Regulations in the Schedule below shall apply.
- 5) For the purpose of this Regulation, the carpet areas for EWS, LIG or MIG tenements shall be as determined by the Government from time to time.
- 6) For the offsite infrastructure, MHADA shall pay to the municipal council 12.5 percent of the charges collected by MHADA for the grant of additional FSI (FSI over and above the normally permissible FSI) for the Redevelopment Schemes
- 7) In any Redevelopment Scheme where the Co-operative Housing Society / Developer appointed by the Co-operative Housing Society has obtained No Objection Certificate from the MHADA thereby sanctioning additional balance FSI with a consent of 70 percent of its members and where such NOC holder has made provision for alternative accommodation in the proposed

building (including transit accommodation) then it shall be obligatory for all the occupiers/ members to participate in the Redevelopment Scheme and vacate the existing tenements, for the purpose of redevelopment. In case of failure to vacate the existing tenements the provisions of Section 95-A of the MHADA Act mutatis mutandis shall apply for the purpose of getting the tenements vacated from the non co-operative members

- 8) A corpus fund, as may be decided by MHADA, shall be created by the Developer which will remain with societies for its maintenance.

SCHEDULE

The following provisions shall be applicable only for Low Cost Housing Schemes i.e. Economically Weaker Sections and Low Income Group Housing Schemes only undertaken by Maharashtra Housing & Area Development Authority (MHADA)

1. Minimum Plot Size :-

- (a) In the case of a growing house for EWS and LIG category a plot of 25 sq. m., a room of minimum size of 5.57 sq.m. (60 sq.ft) with toilet arrangement in the first phase shall be permitted. In the second phase, one room of 9.30 sq.m. (100 sq.ft.) may be allowed to be added. However, commencement and occupation certificates shall be granted initially to the first phase only and subsequent certificates for second phase issued as required.
- (b) **Multi-purpose rooms:-** A multi-purpose room shall be allowed with size upto 12.5 sq.m. with a minimum width of 2.4 m.
- (c) **Cooking space (alcove) :-** Provision of separate kitchen shall not be necessary. However, cooking space shall be allowed with a minimum size of 2.4 sq.m. with minimum width of 1.2m.
- (d) **Combined toilet :-** A combined toilet shall be permitted for more than one tenement with a minimum area of 1.85 sq.m. with minimum width of one meter.
- (e) **Height :-** The average height for a habitable room with sloping roof shall be minimum 2.5 m. with minimum height of 2 m. at the eaves. In the case of a flat roof, minimum clear height shall be 2.6 m. for a habitable room. Kitchen areas shall have minimum clear height/average height of 2.4 m. and bath and water closet (without loft) shall have a clear minimum height of 2.2 m.
- (f) **Plinth :-** The minimum plinth height shall be 30 cm. and in areas subject to flooding the plinth shall be higher than the high flood level.

2. External walls :- 115 mm, thick external brick wall without plaster shall be permitted

3. Staircases :- Single flight staircases without landing between the two floors shall be permitted.

4. Front open space :- The front open space from roads having width of 9.14 m. and below shall be a minimum of 1.5 m for buildings with height of upto 10 m.

5. Open space (side and rear) :- The distance between two ground floor structures shall be of a minimum of 4.5 m for purpose of light and ventilation of habitable rooms. In case of toilets deriving light and ventilation from open space, the distance between the two ground floor structures shall be a minimum of 1.5 m.

6. Pathways :-

The widths of pathways shall be as follows :-

- (i) 1.5 m. width of pathways upto 20 m. in length;
(ii) 2.0 m. width for pathways upto 30 m. in length;
(iii) 2.5 m. width for pathways upto 40 m. in length;
(iv) 3.0 m. width for pathways upto 50 m. in length

7. **Flushing cistern** :- In water closets, flushing cistern shall not be essential and toilets without this provision may be permitted
8. **Water closet pan size** :- The water closet seat shall be of a minimum of 0.46 m. (18 inches) in length.
9. **Septic tank and leaching pits (soak pits).**-A septic tank shall be provided with capacity of 141.6 litres (five cubic feet) per capita. Where the municipal services are likely to be available within four to five years or so, pour flush water seal latrines (NEERI type) shall be permitted where the municipal sewerage system is not available and the water table in the area is not high.
10. **Convenience shopping** :- Convenience Shopping as defined in these Regulations shall be permitted along layout roads with width of 12.2 m. to 18.49 m. provided that a minimum set-back of 1.5m and a minimum plot area of 25.2 sq.m is available and is provided.
11. **Recreation Ground:** - In the layouts, provision for recreation ground shall be on the lines prescribed in these Regulations
12. **Ancillary structures** :- Ancillary structures such as underground tank, overhead tank, substations etc. shall be permissible in the compulsory recreation open space subject to the condition that not more than 10 percent of such space shall be utilised for such purposes.
13. Other provisions of these regulations shall continue to be applicable for such schemes.

24.5 Biotechnology Units/ Parks:

Subject to approval by Director of Industries, the Authority/Collector, in consultation with Director of Town Planning, may permit the floor space indices specified in these regulations to be exceeded to the extent of 100% over and above the permissible FSI (including for Biotechnology Units/Parks located in NDZ / Green Zone / Agriculture Zone proposed in the Development Plan/Regional Plan) for biotechnology units/ parks subject to following conditions:

- (i) Out of total built up area minimum 90% shall be used for Biotechnology purpose and maximum 10% (by deducting parking spaces) shall be used for ancillary users such as specified in the Govt. Resolution of Industry, Energy & Labour Department No. BTP 2008/CR-1608/Ind-2, dated 10/2/2009, as amended from time to time.
- (ii) Additional FSI to Biotechnology units would be available to Biotechnology Parks duly approved by the Directorate of Industries and after observance of all the regulations of environment
- (iii) Parking spaces, as per the provision of Development Control Regulations shall be provided subject to minimum requirement of one parking space per 100sq.m. built-up area

24.6 Buildings of Police Department:

In case of buildings of Department of Police, Police Housing Corporation, Jail and Home Guard of Government of Maharashtra for use as their Staff Quarters, the Authority/Collector, in consultation with Divisional Head of Town Planning, may permit the Floor Space Index to be exceeded up to 2.5 subject to following conditions:

- (i) It shall be permissible to submit a composite scheme for the development / redevelopment of land of Department of Police, Police Housing Corporation, Jail and Home Guard. For the utilisation of permissible commercial user under D.C. Regulations; commercial potential of one plot can be shifted to other plot, provided the aggregate FSI on any plot shall not exceed 2.5.

- (ii) For reconstruction / redevelopment of the buildings of Department of Police, Police Housing Corporation, Jail and Home Guard of Government of Maharashtra, constructed prior to 1940; the FSI shall be 2.5 or consumed Floor Space Index of existing old building plus 50% incentive FSI, whichever is more.
- (iii) In the cases of development or redevelopment of land of Department of Police, Police Housing Corporation and Home Guard, commercial user may be permitted up to 25% of the total permissible built-up area.
- (iv) Such 2.50 FSI shall be used for development and construction of buildings for police department only.

24.7 Information Technology Establishment:-

Subject to approval by Director of Industries, the Authority/Collector, in consultation with Divisional Head of concerned division of the Town Planning Department, may permit the floor spaces indices specified in these regulations to be exceeded to the extent of 100% over and above the permissible FSI (including IT/ITES units located in Residential / Industrial Zone / NDZ / Green Zone / Agriculture Zone proposed in the Development Plan) subject to following conditions:-

- i) 100% additional FSI shall be made available to all IT/ITES units in public IT Parks.
- ii) 100% additional FSI shall be made available to all registered IT/ITES units located in private IT Parks approved by the Directorate of Industries.
- iii) Permission for erecting towers and antenna up to the height permitted by the Civil Aviation Department shall be granted by Authority/Collector as per the procedure followed for development permission.
- iv) Additional FSI to IT/ITES units would be available only upon full utilisation of basic admissible FSI.
- v) The additional FSI shall be granted on payment of premium. Such premium shall be recovered at the rate of 25% of the present day market value of the land under reference as indicated in the Ready Reckoner or as decided by the government from time to time.
- vi) In the event, the developer comes forward for provision of such off site infrastructure at his own cost, then the Authority/Collector may determine the estimated cost of the works and shall also prescribe the standards for the work. After completion of the works, the Authority/Collector shall verify as to whether the same is as per prescribed standards and thereafter, by deducting the cost of works, the balance amount of premium shall be recovered by the Authority/Collector
- vii) While developing site for IT/ITES with additional FSI, users ancillary to the principal users as may be approved by the Directorate of Industries, shall also be allowed.

24.8 Religious Building:

The **Authority/Collector**, in consultation with the Director of Town Planning, Maharashtra State, Pune may permit the floor space indices to be exceeded in respect of buildings in independent plots for religious purpose of registered Public Trust by 0.50 FSI subject to following terms & condition

- i) The religious building shall be on independent plot.
- ii) No Objection Certificate shall be obtained from concerned Police Authority and Collector

before applying for permission.

- iii) Additional FSI shall be used for religious purpose only ancillary residential user may be permissible within 10% of total area. No commercial user shall be permissible.
- iv) The additional FSI shall be permissible to existing authorised religious users subject to structural stability.
- v) The additional FSI shall be permissible subject to payment of premium of 25% of ready reckoner value of respective year or as decided by the government from time to time.
- vi) The minimum area of plot shall be 500 sq.m.
- vii) The proposal shall be consistent with the Development Plan /Regional Plan proposals.

24.9 YatriNiwas, Youth Hostel:

The **Authority/Collector**, in consultation with the Director of Town Planning, Maharashtra State may permit the floor space indices to be exceeded by 0.5 in respect of buildings to be constructed by charitable trusts for yatriniwas, youth hostel subject to following conditions

- i) The building shall be on independent plot having minimum plot area of 1000 sq.mt.
- ii) The additional FSI shall be permissible subject to payment of premium of 25% of ready reckoner value of respective year or as decided by the government from time to time.

24.10 The Land in possession of Maharashtra State Road Transport Corporation:-

Land in possession of Maharashtra State Road Transport Corporation shall be allowed to be developed for additional 0.5 FSI over and above the permissible FSI subject to following condition:

- i) Out of total FSI, maximum 1.00 FSI shall be allowed to be developed for commercial use and remaining FSI shall be for the selfuse of the said Corporation permissible as per the Development Plan / Regional Plan.
- ii) For additional 0.5 FSI, premium shall not be charged.

24.11 Redevelopment of existing buildings:

While reconstructing any existing building in whole or in part, the permissible FSI for reconstruction shall be limited to authorisedlyutilised FSI, additional FSI, if any.

24.12 Redevelopment of dangerous buildings with tenants:

Reconstruction in whole or in part of any user which existed prior to these regulations which has ceased to exist in consequence of accidental fire / natural collapse or demolition for the reasons of the same having been declared unsafe by or under a lawful order of the Authority/Collector shall be allowed with FSI of original authorised building or FSI Permissible as per these regulations, whichever is maximum plus 15% incentive FSI and shall be subject to following conditions:

- (a) The new building may be permitted to be reconstructed in pursuance of an agreement to be executed on stamp paper by at least 70 percent of the owners in the original building with developer. Such agreement shall make a provision for accommodation for the all owners in the new building on agreed terms and a copy of such agreement shall be deposited with the Authority/Collector before granting permission of the new building.

24.13 Basic shelter for urban poor

Any housing scheme undertaken by public authority, government / semi government organisation, under the basic shelter for urban poor or similar programme / scheme of the Central / State Government, may be allowed FSI upto 2.5, subject to following condition:

- (i) The said scheme shall be for EWS/LIG housing

PART IX FIRE PROTECTION REQUIREMENTS

25.1 General

In addition to the general provisions given in these regulations, the Authority may insist on suitable protection measures given in this chapter for buildings covered by Regulation No.6.2.6.1. Further such buildings shall be planned, designed and constructed to ensure fire safety and this shall be done in accordance with the provisions of the Maharashtra Fire Prevention and Life Safety Measures Act, 2006 as amended from time to time and requirements given in Part IV of National Building Code, 2005.

25.2 Construction materials

- 25.2.1 All materials of constructions in load bearing elements, stairways and corridors and facades shall be non-combustible.
- 25.2.2 The interior finish materials shall not have a flame spread ability rating exceeding Class I (see 3.4.15.2 of Part 4 of National Building Code)
- 25.2.3 The internal walls or staircase shall be of brick or reinforced concrete with a minimum of 2 h. fire rating.
- 25.2.4 The staircase shall be ventilated to the atmosphere at each landing and a vent at the top; the vent openings shall be of 0.5sq.m in the external wall and the top. If the staircase cannot be ventilated, because of location or other reasons, a positive pressure 50 Pa shall be maintained inside. The mechanism for pressurising the staircase shall operate automatically with the fire alarm. The roof of the shaft shall be 1 m. above the surrounding roof. Glazing or glass bricks, if used in staircase, shall have fire resistance rating of minimum 2 h.

25.3 Lifts

General requirements of lifts shall be as follows:

- a) Walls of lift enclosures shall have a fire rating of 2 h; lifts shall have a vent at the top of area not less than 0.2 sq.m.
- b) Lift motor room shall be located preferably on top of the shaft and separated from the shaft by the floor of the room.
- c) Landing doors in lift enclosures shall have a fire resistance of not less than 1 h.
- d) The number of lifts in one row for a lift bank shall not exceed 4 and the total number of lifts in the bank (of two rows) shall not exceed 8. A wall of 2 h. fire rating shall separate individual shafts in a bank.
- e) Lift car door shall have a fire resistance rating of half an hour.
- f) Collapsible gates shall not be permitted for lifts and shall have solid doors with fire resistance of at least 1 h.
- g) If the lift shaft and lobby is in the core of the building, a positive pressure between 25 and 30 Pa shall be maintained in the lobby and a positive pressure of 50 Pa shall be maintained in the lift shaft. The mechanism for pressurisation shall act automatically with the fire alarm; it shall be possible to operate this mechanically also.
- h) Exit from the lift lobby, if located in the core of the building, shall be through a self-closing smoke stop door of half an hour fire resistance.

- i) Lifts shall not normally communicate with the basement; if, however, lifts are in communication, the lift lobby of the basements shall be pressurised as in (g), with self-closing door as in (h).
- j) Grounding switch(es), at ground floor level, shall be provided on all the lifts to enable the fire service to ground the lifts.
- k) Telephone or other communication facilities shall be provided in lift cars for building of 30 m. in height and above. Communication system for lifts shall be connected to fire control room for the building.
- l) Suitable arrangements such as providing slope in the floor of lift lobby, shall be made to prevent water used during fire fighting, etc., at any landing from entering the lift shafts.
- m) A sign shall be posted and maintained on every floor at or near the lift indicating that in case of fire, occupants shall use the stairs unless instructed otherwise. The sign shall also contain a plan for each floor showing the locations of the stairways. Alternate source of power supply shall be provided for all the lifts through a manually operated changeover switch.
- n) **Fire Lifts** – Following details shall apply for a fire lift :
 - i) To enable fire services personnel to reach the upper floors with the minimum delay, one fire lift per 1200 sq.m. of floor area shall be provided and shall be available for the exclusive use of the firemen in an emergency.
 - ii) The lift shall have a floor area of not less than 1.4 sq.m. It shall have loading capacity of not less than 545 kg (8 persons lift) with automatic closing doors of minimum 0.8 m. width.
 - iii) The electric supply shall be on a separate service from electric supply mains in a building and the cables run in a route safe from fire, that is, within the lift shaft. Lights and fans in the elevators having wooden paneling or sheet steel construction shall be operated on 24 V supply.
 - iv) Fire fighting lift should be provided with a ceiling hatch for use in case of emergency, so that when the car gets stuck up, it shall be easily openable.
 - v) In case of failure of normal electric supply, it shall automatically trip over to alternate supply. For apartment houses, this changeover of supply could be done through manually operated changeover switch. Alternatively, the lift shall be so wired that in case of power failure, it comes down at the ground level and comes to stand-still with door open.
 - vi) The operation of a fire lift is by a simple toggle or two-button switch situated in a glass-fronted box adjacent to the lift at the entrance level. When the switch is on, landing call-points will become inoperative and the lift will be on car control only or on a priority control device. When the switch is off, the lift will return to normal working. This lift can be used by the occupants in normal times.
 - vii) The words 'Fire Lift' shall be conspicuously displayed in fluorescent paint on the lift landing doors at each floor level.
 - viii) The speed of the fire lift shall be such that it can reach the top floor from ground level within 1 minute.

25.4 Basements –

25.4.1 Each basement shall be separately ventilated. Vents with cross-sectional area (aggregate) not less than 2.5 percent of the floor area spread evenly round the perimeter of the basement shall be provided in the form of grills or breakable stall board lights or pavement lights or by way of

shafts. Alternatively, a system of air inlets shall be provided at basement floor level and smoke outlets at basement ceiling level. Inlets and extracts may be terminated at ground level with stall board or pavement lights as before, but ducts to convey fresh air to the basement floor level have to be laid. Stall board and pavement lights should be in positions easily accessible to the fire brigade and clearly marked 'SMOKE OUTLET' or 'AIR INLET' with an indication of area served at or near the opening.

25.4.2) The staircase of basements shall be of enclosed type having fire resistance of not less than 2 h and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such positions that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storeys of the building and shall communicate with basement through a lobby provided with fire resisting self closing doors of 1 h resistance. For travel distance, see Regulation No19.3.1. If the travel distance exceeds as given therein, additional staircases shall be provided at proper places.

25.4.3) In multi-storey basements, intake ducts may serve all basement levels, but each basement levels and basement compartment shall have separate smoke outlet duct or ducts. Ducts so provided shall have the same fire resistance rating as the compartment itself. Fire rating may be taken as the required smoke extraction time for smoke extraction ducts.

25.4.4) Mechanical extractors for smoke venting system from lower basement levels shall also be provided. The system shall be of such design as to operate on actuation of heat / smoke sensitive detectors or sprinklers, if installed, and shall have a considerably superior performance compared to the standard units. It shall also have an arrangement to start it manually.

25.4.4.1) Mechanical extractors shall have an internal locking arrangement, so that extractors shall continue to operate and supply fans shall stop automatically with the actuation of fire detectors.

25.4.4.2) Mechanical extractors shall be designated to permit 30 air changes per hour in case of fire or distress call. However, for normal operation, air changes schedule shall be as given in Part 8, Building Services, Section 3, Air-conditioning, Heating and Mechanical Ventilation of National Building Code.

25.4.4.3) Mechanical extractors shall have an alternative source of supply.

25.4.5) Ventilating ducts shall be integrated with the structure and made out of brick masonry or reinforced cement concrete as far as possible and when this duct crosses the transformer area or electrical switchboard, fire dampers shall be provided.

25.4.6) Use of basements for kitchens working on gas fuel shall not be permitted, unless air conditioned. The basement shall not be permitted below the ward block of a hospital/nursing home unless it is fully sprinkled building services such as electrical sub-stations, boiler rooms in basements shall comply with the provisions of the Indian Electricity Act / Rules.

25.4.7) If cutouts are provided from basements to the upper floors or to the atmospheres, all sides cutout openings in the basements shall be protected by sprinkler head at close spacing so as to form a water curtain in the event of a fire.

25.4.8) Openable windows on external wall shall be fitted with such locks that can be opened by a fireman's axe.

25.4.9) All floors shall be compartmented with area not exceeding 750 sq.m by a separation wall with 2 h fire rating, for floors with sprinklers the area may be increased by 50 percent. In long building, the fire separation walls shall be at distances not exceeding 40 m. For departmental stores, shopping centers and basements, the area may be reduced to 500 sq.m for compartmentation. Where this is not possible, the spacing of the sprinklers, care should be taken to prevent spray from one sprinkler impeding the performance of an adjacent sprinkler head.

25.4.10) It is essential to make provisions for drainage of any such water on all floors to prevent or minimise water damage of the contents. The drain pipes should be provided on the external wall for drainage of water from all floors. On large area floors, several such pipes may be necessary which should be spaced 30 m. apart. Care shall be taken to ensure that the construction of the drain pipe does not allow spread fire / smoke from floor to floor.

25.5 Service Ducts/Shafts

- a) Service ducts and shafts shall be enclosed by walls of 2 h and doors of 1 h. fire rating. All such ducts/shafts shall be properly sealed and fire stopped at all floor levels.
- b) A vent opening at the top of the service shaft shall be provided having between one-fourth and one-half of the area of the shaft.

25.6 Refuse chutes

shall have opening at least 1 m. above roof level for venting purpose and they shall have an enclosure wall of non-combustible material with fire resistance of not less than 2 h. They shall not be located within the staircase enclosure or service shafts, or air-conditioning shafts inspection panel and doors shall be tight fitting with 1 h fire resistance; the chutes should be as far away as possible from exit.

25.7 Refuge Area

Provisions contained in 19.4.8 shall apply for all buildings except multi-family dwellings. Refuge area of not less than 15 sq.m shall be provided on the external walls.

25.8 Electrical services

Electrical services shall conform to the following :

- (a) The electric distribution cables / wiring shall be laid in a separate duct. The duct shall be sealed at every floor with non-combustible materials having the same fire resistance as that of the duct. Low and medium voltage wiring running in shaft and in false ceiling shall run in separate conduits;
- (b) Water mains, telephone lines, intercom lines, gas pipes or any other service line shall not be laid in the duct for electrical cables; use of bus ducts / solid rising mains instead of cables is preferred;
- (c) Separate circuits for fire fighting pumps, lifts, staircases and corridor lighting and blowers for pressurizing system shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes, so that fire in one circuit will not affect the

others. Such circuits shall be protected at origin by an automatic circuit breaker with its no-volt coil removed. Master switches controlling essential service circuits shall be clearly labelled;

- (d) The inspection panel doors and any other opening in the shaft shall be provided with air-tight fire doors having fire resistance of not less than 2 h;
- (e) Medium and low voltage wiring running in shafts, and within false ceiling shall run in metal conduit. Any 230 V wiring for lighting or other services above false ceiling, shall have 660 V grade insulation. The false ceiling including all fixtures used for its suspension, shall be of non-combustible material and shall provide adequate fire resistance to the ceiling in order to prevent spread of fire across ceiling. Reference may be made to good practice;
- (f) An independent and well ventilated service room shall be provided on the ground level or first basement with direct access from outside or from the corridor for the purpose of termination of electric supply from the licensees' service and alternative supply cables. The doors provided for the service room shall have fire resistance of not less than 2 h.
Note : If service room is located at the first basement, it should have automatic fire extinguishing system.
- (g) If the licensees agree to provide meters on upper floors, the licensees' cable shall be segregated from consumers' cable by providing a partition in the duct. Meter rooms on upper floors shall not open into staircase enclosures and shall be ventilated directly to open air outside; and
- (h) Suitable circuit breakers shall be provided at the appropriate points.

25.9 Gas supply

Gas supply shall conform to the following:

- a) Town Gas / L.P. Gas Supply Pipes – Where gas pipes are run in buildings, the same shall be run in separate shafts exclusively for this purpose and these shall be on external walls, away from the staircases. There shall be no interconnection of this shaft with the rest of the floors. LPG distribution pipes shall always be below the false ceiling. The length of these pipes shall be as short as possible. In the case of kitchen cooking range area, apart from providing hood, covering the entire cooking range, the exhaust system should be designed to take care of 30 cu.m. per minute per sq.m. of hood protected area. It should have grease filters using metallic grill to trap oil vapours escaping into the fume hood.
Note : For detailed information on gas pipe installations, reference may be made to Para.9 'Plumbing Services, Section 3 Gas Supply', of National Building Code of India.
- b) All wiring in fume hoods shall be of fiberglass insulation. Thermal detectors shall be installed into fume hoods of large kitchens for hotels, hospitals and similar areas located in high rise buildings. Arrangements shall be made for automatic tripping of the exhaust fan in case of fire. If LPG is used, the same shall be shut off. The voltage shall be of 24 V or 100 V dc operated with the external rectifier. The valve shall be of the hand re-set type and shall be located in an area segregated from cooking ranges. Valves shall be easily accessible. The hood shall have manual facility for steam or carbon dioxide gas injection, depending on duty condition; and
- c) Gas meters shall be housed in a suitably constructed metal cupboard located in a well-ventilated space, keeping in view the fact that LPG is heavier than air and town gas is lighter than air.

25.10 Illumination of Means of Exit

Staircase and corridor lights shall conform to the following:

- a) The staircase and corridor lighting shall be on separate circuits and shall be independently connected so as it could be operated by one switch installation on the ground floor easily accessible to fire fighting staff at any time irrespective of the position of the individual control of the light points, if any. It should be of miniature circuit breaker type of switch so as to avoid replacement of fuse in case of crisis;
- b) Staircase and corridor lighting shall also be connected to alternative supply. The alternative source of supply may be provided by battery continuously trickle charged from the electric mains;
- c) Suitable arrangements shall be made by installing double throw switches to ensure that the lighting installed in the staircase and the corridor does not get connected to two sources of supply simultaneously. Double throw switch shall be installed in the service room for terminating the stand-by supply.
- d) Emergency lights shall be provided in the staircase and corridor; and
- e) All wires and other accessories used for emergency light shall have fire retardant property.

25.11 A stand-by electric generator

A stand-by electric generator shall be installed to supply power to staircase and corridor lighting circuits, fire lifts, the stand-by fire pump, pressurisation fans and blowers, smoke extraction and damper systems in case of failure of normal electric supply. The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously. If the stand-by pump is driven by diesel engine, the generator supply need not be connected to the stand-by pump. Where parallel HV / LV supply from a separate sub-station is provided with appropriate transformer for emergency, the provision of generator may be waived in consultation with the Authority.

25.12 Transformers

Transformers shall conform to the following:

- a) A sub-station or a switch-station with oil filled equipment shall not be located in the building. The sub-station structure shall have separate fire resisting walls/surroundings and shall necessarily be located at the periphery of the floor having separate access from fire escape staircase. The outside walls, ceiling, floor, openings including doors and windows to the sub-station area shall be provided with a fire resisting door of 2 h fire rating. Direct access to the transformer room shall be provided, preferably from outside fire escape staircase.
- b) The sub-station area needs to be maintained at negative air pressures and area in sub-station shall not be used as storage / dump areas.
- c) When housed inside the building, the transformer shall be of dry type and shall be cut off from the other portion of premises by walls/ doors / cutouts having fire resistance rating of 4 h.

25.13 Air-conditioning

Air-conditioning shall conform to the following:

- a) Escape routes like staircases, common corridors, lift lobbies, etc. shall not be used as return air passage.
- b) The ducting shall be constructed of substantial gauge metal in accordance with good practice.
- c) Wherever the ducts pass through fire walls or floors, the opening around the ducts shall be sealed with materials having fire resistance rating of the compartment.

- d) Where duct crosses a compartment which is fire rated, the ducts shall be fire rated for same fire rating. Further depending on services passing around the duct work, which may get affected in case of fire temperature rising, the ducts shall be insulated.
- e) As far as possible, metallic ducts shall be used even for the return air instead of space above the false ceiling.
- f) Where plenum is used for return air passage, ceiling and its fixtures shall be of non-combustible material.
- g) The materials used for insulating the duct system (inside or outside) shall be of non-combustible material, glass wool shall not be wrapped or secured by any material of combustible nature.
- h) Area more than 750 sq.m. on individual floor shall be segregated by a fire wall and automatic fire dampers for isolation shall be provided.
- j) Air ducts serving main floor areas, corridors, etc. shall not pass through the staircase enclosure.
- k) The air-handling units shall be separate for each floor and air ducts for every floor shall be separated and in no way inter-connected with the ducting of any other floor.
- m) If the air-handling unit serves more than one floor, the recommendations given above shall be compiled with in addition to the conditions given below:
 - i) Proper arrangements by way of automatic fire dampers working on smoke detector / or fusible link for isolating all ducting at every floor from the main riser shall be made.
 - ii) When the automatic fire alarm operates, the respective air-handling units of the air-conditioning system shall automatically be switched off.
- n) The vertical shaft for treated fresh air shall be of masonry construction.
- o) The air filters of the air-handling units shall be of non-combustible materials.
- p) The air-handling unit room shall not be used for storage of any combustible materials.
- q) Inspection panels shall be provided in the main trunking to facilitate the cleaning of ducts of accumulated dust and to obtain access for maintenance of fire dampers.
- r) No combustible material shall be fixed nearer than 150 mm to any duct unless such duct is properly enclosed and protected with non-combustible material (glass wool or spyglass with neoprene facing enclosed and wrapped with aluminum sheeting) at least 3.2 mm thick and which would not readily conduct heat.
- s) **Fire Dampers:**
 - i) These shall be located in conditioned air ducts and return air ducts/ passages at the following points:
 - a) At the fire separation wall.
 - b) Where ducts/passages enter the central vertical shaft.
 - c) Where the ducts pass through floors.
 - d) At the inlet of supply air duct and the return air duct of each compartment on every floor.
 - ii) The dampers shall operate automatically and shall simultaneously switch off the air-handling fans. Manual operation facilities shall also be provided. (**Note-** For blowers, where extraction system and duct accumulators are used, dampers shall be provided).
 - iii) Fire/smoke dampers (for smoke extraction shafts) for buildings more than 24 m in height.
 - a) For apartment houses in non-ventilated lobbies / corridors operated by fusible link / smoke detectors and with manual control.
 - b) For other buildings on operation of smoke detection system and with manual control.
 - iv) Automatic fire dampers shall be so arranged as to close by gravity in the direction of air movement and to remain tightly closed on operation of a fusible link / smoke detector.

25.14 Provisions of boiler and boiler rooms

Provisions of boiler and boiler rooms shall conform to Indian Boiler Act. Further, the following additional aspects may be taken into account in the location of boiler room:

- a) The boilers shall not be allowed in sub-basement, may be allowed in the basements away from the escape routes.
- b) The boilers shall be installed in a fire resisting room of 4 h fire resistance rating and this room shall be situated on the periphery of the basement. Catch-pits shall be provided at the low level.
- c) Entry to this room shall be provided with a composite door of 2 h fire resistance.
- d) The boiler room shall be provided with fresh air inlets and smoke exhausts directly to the atmosphere.
- e) The furnace oil tank for the boiler, if located in the adjoining room shall be separated by fire resisting wall of 4 h rating. The entrance to this room shall be provided with double composite doors. A curb of suitable height shall be provided at the entrance in order to prevent the flow of oil into the boiler room in case of tank rupture.
- f) Foam inlets shall be provided on the external walls of the building near the ground level to enable the fire services to use foam in case of fire.

25.15 Provision of first-aid and fire fighting appliances

The first-aid fire fighting equipment shall be provided on all floors, including basements, lift rooms, etc. in accordance with good practice in consultation with the Authority.

25.16 Fire alarm system :

25.16.1) All buildings with heights of 15 m or above shall be equipped with manually operated electrical fire alarm (MOEFA) system automatic fire alarm system in accordance with good practice. However, apartment buildings between 15 m and 30 m in height may be exempted from the installation of automatic fire alarm system provided the local fire brigade is suitably equipped for dealing with fire in a building of 15 m in height or above and in the opinion of the Authority, such building does not constitute a hazard to the safety of the adjacent property or occupants of the building itself.

25.16.1.1) Manually operated electrical fire alarm system shall be installed in a building with one or more call boxes located at each floor. The call boxes shall conform of good practice.

25.16.1.2) The installation of call boxes in hostels and such other places where these are likely to be misused shall as far as possible be provided. Location of call boxes in dwelling units shall preferably be inside the building.

25.17 Lightning protection of buildings

The lightning protection for buildings shall be provided as given in Para.8 'Building Services, Section 2, Electrical Installations' of National Building Code of India.

25.18 Fire control room

For all buildings 15 m in height or above and apartment buildings with a height of 30 m and above, there shall be a control room on the entrance floor of the building with communication system (suitable public address system) to all floors and facilities for receiving the message from different floors. Details of all floor plans alongwith the details of fire fighting equipment and installations shall be maintained in the fire control room. The fire control room shall also have facilities to detect the fire on any floor through indicator board connections; fire detection and alarm systems on all floors. The fire staff in-charge of the fire control room shall be responsible for the maintenance of the various services and fire fighting equipment and installations in co-ordination with security,

electrical and civil staff of the building.

25.19 Fire officer for hotels, business and mercantile buildings with height more than 30 m

25.19.1)A qualified Fire Officer with experience of not less than 3 years shall be appointed who will be available on the premises.

25.19.2)The Fire Officer shall:

- i) maintain the firefighting equipment in good working condition at all times,
- ii) prepare fire orders and fire operational plans and get them promulgated,
- iii) impart regular training to the occupants of the buildings in the use of firefighting equipment's provided on the premises and keep them informed about the fire emergency evacuation plan,
- iv) keep proper liaison with City Fire Brigade, and
- v) ensure that all fire precautionary measures are observed at the times.

Note: Competent Authority having jurisdiction may insist on compliance of the above rule in case of buildings having very large areas even if the height is less than 30 m

25.20 House keeping

To eliminate fire hazards, good housekeeping, both inside and outside the building, shall be strictly maintained by the occupants and / or the owner of the building.

25.21 Fire drills and fire orders

Fire notices/orders shall be prepared to fulfill the requirements of firefighting and evacuation from the buildings in the event of fire and other emergency. The occupants shall be made thoroughly conversant with their actions in the event of emergency, by displaying fire notices at vantage points and through regular training. Such notices should be displayed prominently in broad lettering.

For guidelines for fire drills and evacuation procedures for high-rise buildings, Annexure E of National Building Code of India may be referred.

25.22 Compartmentation

The building shall be suitably compartmentalised so that fire/smoke remain confined to the area where fire incident has occurred and does not spread to the remaining part of the building.

25.23 Helipad

For high-rise buildings above 60 m in height, provision for helipad should be made.

25.24 Materials for interior decoration / furnishing

The use of materials, which are combustible in nature and may spread toxic fume / gases should not be used for interior decoration / furnishing, etc.

For various types of occupancies, requirements given in National Building Code, Part IV shall be followed.

PART VII
STRUCTURAL SAFETY, WATER SUPPLY, DRAINAGE & SANITARY
REQUIREMENTS, OUTDOOR DISPLAY AND OTHER SERVICES

26.0 STRUCTURAL DESIGN

- 26.1** The structural design of foundations, elements made of masonry, timber, plain concrete; reinforced concrete, pre-stressed concrete and structural steel shall be carried out in accordance with Part 6. Structural design Section 1-Loads, courses and effects, Section 2- Soils and Foundation, Section 3— Timber and Bamboo, Section 4-Masonry, Section 5-Concrete, Section 6-Steel, Section-7 Prefabrication, systems building and mixed / composite construction of National Building Code of India, amended from time to time.

27.0 QUALITY OF MATERIALS AND WORKMANSHIP

- 27.1** All materials and workmanship shall be of good quality conforming generally to accepted standards of Public Works Department of Maharashtra and Indian Standard Specifications and Codes as included in Part 5 - Building Materials and Part 7 - Construction Practices and Safety of National Building Code of India, amended from time to time
- 27.2** All borrow pits dug in the course of construction and repair of buildings, roads, embankments etc. shall be deep and connected with each other in the formation of a drain directed towards the lowest level and properly stopped for discharge into a river stream, channel or drain and no person shall create any isolated borrow pit which is likely to cause accumulation of water which may breed mosquitoes.

28.0 ALTERNATIVE MATERIALS, METHODS OF DESIGN & CONSTRUCTION AND TESTS

- 28.1** The provision of the regulations are not intended to prevent the use of any material or method of design or construction not specifically prescribed by the regulations, provided any such alternative has been approved.
- 28.1.1** The provision of these regulations is also not intended to prevent the adoption for architectural planning and layout conceived as an integrated development scheme.
- 28.2** The authority may approve any such alternative provided it is found that the proposed alternative is satisfactory and conform to the provisions of relevant parts regarding material, design, and construction and that material, method or work offered is, for the purpose intended, at least equivalent to that prescribed in the rules in quality, strength, compatibility, effectiveness, fire rating and resistance, durability and safety.
- 28.3 Tests:** Whenever there is insufficient evidence of compliance with the provisions of the regulations of evidence that any material or method of design or construction does not conform to the requirements of the rules or in order to substantiate claims for alternative materials, design or methods of construction, the Authority/Collector may require tests sufficient in advance as proof of compliance. These tests shall be made by an approved agency at the expense of the owner
- 28.3.1** Test method shall be as specified by the regulations for the materials or design or construction in question. If there are no appropriate test methods specified in the regulations, the Authority shall determine the test procedure. For methods of tests for building materials; reference may be made to relevant Indian standards as given the National Building Code of India, published by the Bureau of

Indian Standards. The latest version of the National building Code of India shall be taken into account at the time of enforcement of these rules.

- 28.3.2** Copies of the results of all such tests shall be retained by the authority for a period of not less than two year after the acceptance of the alternative material.

29.0 BUILDING SERVICES

- 29.1** The planning, design and installation of electrical installations, air-conditioning and heating work shall be carried out in accordance with Part 8 - Building Services, Section 2-Electrical and allied Installations, Section 3 Air Conditioning, heating and mechanical ventilation of National building Code of India, amended from time to time.
- 29.2** The planning design including the number of lifts, type of lifts, capacity of lifts depending on occupancy of building; population on each floor based on occupant load, height of building shall be in accordance with Section-5 installation of Lifts and Escalators of National Building Code of India, amended from time to time. In existing buildings, in case of proposal for one additional floor, existing lift may not be raised to the additional floor.
- 29.2.1 Maintenance of Lift in working order:** The lifts shall be maintained in working order in line with provisions of Regulation P-4.

30.0 WATER SUPPLY, DRAINAGE AND SANITARY REQUIREMENTS.

- 30.1** The planning, design, construction and installation of water supply, drainage and sanitation and gas supply systems shall be in accordance with the provisions of Part 9 - Plumbing Services- Section 1 Water Supply, Drainage and Sanitation, Section 2 – Gas supply of National Building Code of India as amended from time to time.
- 30.2 Requirements of water supply in building.**
The total requirements of water supply shall be calculated based on the population as given below:

Occupancy	Basis
Residential Building	5 persons per tenement
Other Buildings	No. of persons on occupant load and area of floors given in Table 10.

- 30.2.1.** The requirements of water supply for various occupancies shall be as given in Table 15, 16 and 17 or as specified by the Authority/Collector from time to time.

Table No. 15		
PER CAPITA WATER REQUIREMENTS FOR VARIOUS OCCUPANCIES/USES		
Sr. No	Type of Occupancy	Consumption per head per day (in liters)
1	Residential	
	(a) in living units	135
	(b) Hotels with lodging accommodation (per bed)	180

2	Educational:	
	(a) Day Schools	45
	(b) Boarding Schools	135
3	Institutional (Medical Hospitals):	
	(a) No. of beds not exceeding 100	340
	(b) No. of beds exceeding 100	450
	(c) Medical quarters and hostels	135
4	Assembly-Cinema theatres, auditorium etc. (per seat of accommodation).	15
5	Government and Semi-public business.	45
6	Mercantile (Commercial)	
	(a) Restaurants (per seat)	70
	(b) Other business buildings.	45
7	Industrial	
	(a) Factories where bathrooms are to be provided	45
	(b) Factories where no bath-rooms are required to be provided.	30
8	Storage (including warehousing)	30
9	Hazardous	30
10	Intermediate / Stations (excluding mail and express stops).	45 (25)*
11	Junction Stations	70 (45)*
12	Terminal / Stations.	45
13	International and domestic Airports.	70

The value in parenthesis is for stations where bathing facilities are not provided.

NOTE: The number of persons for Sr. No. (10) to (13) shall be determined by the average No. of passengers: handled by the station daily; due consideration may be given to the staff and workers likely to use the facilities.

Table No. 16		
FLUSHING STORAGE CAPACITIES		
Sr.No.	Classification of building	Storage capacity.
(1)	(2)	(3)
1	For tenements having common convenience	900 liters net per w. c. seat.
2	For residential premises other than tenements having common convenience	270 liters net for one w. c. seat and 180 liters for each additional seat in the same flat.
3	For Factories and Workshops	900 liters per w. c. seat and 180 liters per urinal seat.
4	For cinemas, public assembly halls, etc.	900 liters per w. c. seat and 350 liters per urinal seat.

Table No. 17			
DOMESTIC STORAGE CAPACITIES			
Sr. No.	No. of Floors	Storage Capacity	Remarks
(1)	(2)	(3)	(4)
For premises occupied as tenements with common conveniences			
1.	Floor (Ground)	NIL	Provided no down take fittings are installed.
2.	Floors 1, 2, 3, 4, 5 and upper floors	500* liters	per tenements
For premises occupied as Flats or blocks			
1.	Floor (Ground)	NIL	Provided no down take fittings are installed.
2.	Floors 1,2,3,4,5 and upper floors	500* liters.	
NOTE 1:	If the premises are situated at a place higher than the road level in the front of the premises, storage at ground level shall be provided on the same line as on floor 1.		
NOTE 2 :	The above storage may be permitted to be installed provided that the total domestic storage calculated on the above basis is not less than the storage calculation on the number of down take fittings according to the scales given.		
	Down take taps		70 liters each
	Showers		135 liters each
	Bathtubs		200 liters each
	*Subject to provisions of water supply and drainage rules.		

31.0 DRAINAGE AND SANITATION REQUIREMENTS

31.1 General

There should be at least one water tap and arrangement for drainage in the vicinity of each water-closet or group of water-closets in all the buildings.

31.1.1 Each family dwelling unit on premises (abutting on a sewer or with a private sewage disposal system) shall have, at least, one water-closet and one kitchen type sink. A bath or shower shall also be installed to meet the basic requirement of sanitation and personal hygiene.

31.1.2 All other structures for human occupancy or use on premises, abutting on a sewer or with a private sewage disposal system, shall have adequate sanitary facilities, but in no case less than one water-closet and one other fixture for cleaning purposes.

31.2 For Residences

31.2.1 Dwelling with individual convenience shall have at least the following fitments:

- a) One bathroom provided with a tap and a floor trap,
- b) One water-closet with flushing apparatus with an ablution tap; and
- c) One tap with a floor trap or a sink in kitchen or wash place.

31.2.2 Dwelling without individual conveniences shall have the following fitments:

- a) One water tap with floor trap in each tenement,
- b) One water-closet with flushing apparatus and one ablution tap, bath for every two tenements, and
- c) One bath with water tap and floor trap for every two tenements.

31.3 For Buildings Other than Residences

31.3.1 The requirements for fitments for drainage and sanitation in the case of buildings other than residences shall be in accordance with Table 18 to Table 31. The following shall be, in addition, taken into consideration:

- a) The figures shown are based upon one (1) fixture being the minimum required for the number of persons indicated or part thereof.
 - b) Building categories not included in the tables shall be considered separately by Authority/Collector
 - c) Drinking fountains shall not be installed in the toilets.
 - d) Where there is the danger of exposure to skin contamination with poisonous, infectious or irritating material, washbasin with eye wash jet and an emergency shower located in an area accessible at all times with the passage / right of way suitable for access to a wheel chair, shall be provided.
 - e) When applying the provision of these tables for providing the number of fixtures, consideration shall be given to the accessibility of the fixtures. Using purely numerical basis may not result in an installation suited to the need of a specific building. For example, schools should be provided with toilet facilities on each floor. Similarly toilet facilities shall be provided for temporary workmen employed in any establishment according to the needs; and in any case one WC and one washbasin shall be provided.
 - f) All buildings used for human habitation for dwelling work, occupation, medical care or any purpose detailed in the various tables, abutting a public sewer or a private sewage disposal system, shall be provided with minimum sanitary facilities as per the schedule in the tables. In case the disposal facilities are not available, they shall be provided as a part of the building design for ensuring high standards of sanitary conditions in accordance with this section.
-
-

- g) Workplaces where crèches are provided, they shall be provided with one WC for 10 persons or part thereof, one washbasin for 15 persons or part thereof, one kitchen sink with floor tap for preparing food / milk preparations. The sink provided shall be with a drinking water tap.
- h) In all types of buildings, individual toilets and pantry should be provided for executives and for meeting / seminar / conference rooms, etc. as per the user requirement.
- j) Where food is consumed indoors, water stations may be provided in place of drinking water fountains.

32.0 SIGNS AND OUTDOOR DISPLAY STRUCTURES

- 32.1** The display of advertising signs on buildings and land shall be in accordance with Part 10, Section 2 "Signs and outdoor display structures" of National Building Code of India as amended from time to time.
- 32.2** Prohibition of advertising signs and outdoor display structure in certain cases - Notwithstanding the provisions of sub-regulations no advertising sign or outdoor display structures shall be permitted on buildings of architectural, aesthetical, historical or heritage importance as may be decided by the Authority/Collector or on Government Buildings save that in the case of Government buildings only advertising signs or outdoor display structure may be permitted if they relate to the activities for the said buildings' own purposes or related programmers.

**Table 18
Office Buildings**

Sr. No	Fixtures	Public Toilets		Staff Toilets	
		Male	Female	Male	Female
1	2	3	4	5	6
i)	Executive Rooms and Conference Halls in Office Buildings Toilet suite comprising one WC, one washbasin (with optional shower stall if building is used round the clock at user's option) Pantry optional as per user requirement	Unit could be common for Male / Female or separate depending on the number of user of each facility		For individual officer rooms	
ii)	Main Office Toilets for Staff and Visitors	1 per 25	1 per 15	1 per 25	1 per 15
	a) Water-closet	1 per 25	1 per 15	1 per 25	1 per 15
	b) Ablution tap with each water-closet	1 in each water-closet			
	c) Urinals	Nil up to 6 1 for 7-20 2 for 21-45 3 for 46-70 4 for 71-100	-	Nil up to 6	-
	Add @ 3% for	101-200			
	Add @ 2.5 %	Over 200			
	d) Washbasins	1 per 25	1 per 25	1 per 25	1 per 25
	e) Drinking water fountain	1 per 100	1 per 100	1 per 100	1 per 100
	f) Cleaner's sink	1 per floor			

**Table 19
Factories**

Sr. No.	Fixtures	Offices/Visitors		Workers

PART VIII
SPECIAL PROVISIONS IN CERTAIN BUILDINGS

33.0 PROVISION OF FACILITIES FOR PHYSICALLY HANDICAPPED PERSONS:

1. Definitions

2.1. Non-ambulatory Disabilities: – Impairments that, regardless of cause or manifestation, for all practical purposes, confine individuals to wheelchairs.

2.2. Semi - ambulatory Disabilities: - Impairments that cause individuals to walk with difficulty or insecurity, individuals using braces or crutches, amputees, arthritics, spastics, and those with pulmonary and cardiac ills may be semi-ambulatory.

2.3 Hearing Disabilities:- Deafness or hearing handicaps that might make an individual insecure in public areas because he is unable to communicate or hear warning signals.

2.4 Sight Disabilities: - Total blindness or impairments, which affect sight to the extent that the individual, functioning in public areas, is insecure or exposed to danger.

2.5 Wheel Chair: - Chair used by disabled people for mobility. The standard size of wheel chair shall be taken as 1050 mm x 750 mm.

3. Scope

These regulations are applicable to all buildings and facilities used by the public such as educational, institutional, assembly, commercial, business, mercantile buildings constructed on plot having an area of more than 2000 sq.m. It does not apply to private and public residences.

4. Site development

Level of the roads, access paths and parking areas shall be described in the plan along with specification of the materials.

4.1. Access Path / Walk Way: - Access path from plot entry and surface parking to building entrance shall be minimum of 1800 mm wide having even surface without any steps. Slope, if any, shall not have gradient greater than 5%. Selection of floor material shall be made suitably to attract or to guide visually impaired persons (limited to coloured floor material whose colour and brightness is conspicuously different from that of the surrounding floor material or the material that emits different sound to guide visually impaired persons; hereinafter referred to as “guiding floor material” (Annexure-I). Finishes shall have a non-slip surface with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.

4.2. Parking: For parking of vehicles of handicapped people, the following provisions shall be made-

- i) Surface parking for two car spaces shall be provided near entrance for the physically handicapped persons with maximum travel distance of 30.0 m. from building entrance.
- ii) The width of parking bay shall be minimum 3.6 meter.
- iii) The information stating that the space is reserved for wheel chair users shall be conspicuously displayed.
- iv) Guiding floor materials shall be provided or a device, which guides visually impaired persons with audible signals, or other devices, which serves the same purpose, shall be provided.

5. Building requirements

The specified facilities for the buildings for physically handicapped persons shall be as follows:

1. Approach to plinth level
2. Corridor connecting the entrance/exit for the handicapped.

3. Stair-ways
4. Lift
5. Toilet
6. Drinking Water

5.1. Approach to plinth level - Every building should have at least one entrance accessible to the handicapped and shall be indicated by proper signage. This entrance shall be approached through a ramp together with the stepped entry.

5.1.1. Ramped Approach – Ramp shall be finished with non-slip material to enter the building. Minimum width of ramp shall be 1800mm with maximum gradient 1:12. Length of ramp shall not exceed 9.0 meter having 800mm high hand rail on both sides extending 300mm beyond top and bottom of the ramp. Minimum gap from the adjacent wall to the hand rail shall be 50mm.

5.1.2. Stepped Approach:- For stepped approach size of tread shall not be less than 300mm and maximum riser shall be 150mm. Provision of 800mm high hand rail on both sides of the stepped approach similar to the ramped approach.

5.1.3. Exit/Entrance Door:- Minimum & clear opening of the entrance door shall be 900mm and it shall not be provided with a step that obstructs the passage of a wheel chair user. Threshold shall not be raised more than 12mm.

5.1.4. Entrance Landing:- Entrance landing shall be provided adjacent to ramp with the minimum dimension 1800mm x 2000mm. The entrance landing that adjoins the top end of a slope shall be provided with floor materials to attract the attention of visually impaired person's (limited to coloured floor material whose colour and brightness is conspicuously different from that of the surrounding floor material or the material that emits different sound to guide visually impaired persons hereinafter referred to as "guiding floor material" (Annexure-I). Finishes shall have a non-slip surface with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.

5.2. Corridor connecting the entrance / exit for the handicapped: The corridor connecting the entrance / exit for handicapped leading directly outdoors to a place where information concerning the overall use of the specified building can be provided to visually impaired persons either by a person or by signs, shall be provided as follows:

- a)'Guiding floor materials' shall be provided or device that emits sound to guide visually impaired persons.
- b)The minimum width shall be 1500mm.
- c)In case there is a difference of level, slope ways shall be provided with a slope of 1:12.
- d)Hand rails shall be provided for ramps/slope ways.

5.3. Stair-ways - One of the stair-ways – near the entrance / exit for the handicapped shall have the following provisions:

- a) The minimum width shall be 1350 mm.
- b)Height of the riser shall not be more than 150 mm and width of the tread 300mm. The steps shall not have abrupt (square) nosing.
- c)Maximum number of risers on a flight shall be limited to 12.
- d)Hand rails shall be provided on both sides and shall extend 300 mm on the top and bottom of each flight of steps.

5.4. Lifts - Wherever lift is required as per bye-laws, provision of at least one lift shall be made for the wheel chair user with the following cage dimensions of lift recommended for passenger lift of 13 person's capacity of Bureau of Indian Standards.

Clear internal width	1100 mm
Clear internal width	2000 mm
Entrance door width	900 mm

- a) A hand rail not less than 600mm long at 1000mm above floor level shall be fixed adjacent to the control panel.
- b) The lift lobby shall be of an inside measurement of 1800 mm x 1800 mm or more.
- c) The time of an automatically closing door should be minimum 5 seconds and the closing speed should not exceed 0.25 m/ sec.
- d) The interior of the cage shall be provided with a device that audibly indicates the floor, the cage has reached indicates that the door of the cage of entrance/exit is either open or closed.

5.5 Toilets - One special W.C. in a set of toilets shall be provided for the use of handicapped with essential provision of washbasin near the entrance for the handicapped.

- a) The minimum size shall be 1500 mm x 1750 mm.
- b) Minimum clear opening of the door shall be 900mm and the door shall swing out.
- c) Suitable arrangement of vertical/horizontal handrails with 50mm clearance from wall shall be made in the toilet.
- d) The W.C. seat shall be 500mm from the floor.

5.6 Drinking Water:- Suitable provision of drinking water shall be made for the handicapped near the special toilet provided for them.

5.7 Designing for Children - In the buildings meant for the pre-dominant use of the children, it will be necessary to suitably alter the height of the handrail and other fittings & fixtures, etc.

Explanatory notes:

Guiding / Warning Floor Material:

The floor material to guide or to warn the visually impaired persons with a change of colour or material with conspicuously different texture and easily distinguishable from the rest of the surrounding floor materials is called guiding or warning floor material. The material with different texture gives audible signals with sensory warning when a person moves on this surface with walking stick. The guiding/warning floor material is meant to give the directional effect or warn a person at critical places. This floor material shall be provided in the following areas:

- a) The access path to the building and to the parking area.
- b) The landing lobby towards the information board, reception, lifts, staircases and toilets.
- c) Immediately at the beginning/end of walkway where there is a vehicular traffic.
- d) At the location abruptly changing in level or beginning/end of a ramp.
- e) Immediately in front of an entrance/exit and the landing.

Proper signage:

Appropriate identification of specific facilities within a building for the handicapped persons should be done with proper signals. Visually impaired persons make use of other senses such as hearing and touch to compensate for the lack of vision, whereas visual signals benefit those with hearing disabilities.

Signs should be designed and located so that they are easily legible by using suitable letter size (not less than 20 mm high). For visually impaired persons, information board in brail should be installed on the wall at a suitable height and it should be possible to approach them closely. To ensure safe walking, there should not be any protruding sign which creates obstruction in walking. Public Address System may also be provided in busy public areas.

The symbols/information should be in contrasting colour and properly illuminated because people with limited vision may be able to differentiate amongst primary colours. International Symbol Mark for wheel chair be installed in a lift, toilet, staircase, parking areas, etc., that have been provided for the handicapped.

34.0 INSTALLATION OF SOLAR ASSISTED WATER HEATING SYSTEM:

1. Solar water heating systems should be made in the building for hospitals, hotels, hostels, guest houses, police men/ army barracks, canteens, laboratories and research institutions, schools and colleges and other institutes.
2. The solar water heating system should be mandatory in the hospitals and hotels, where the hot water requirements are of continuous nature. These buildings must be provided with auxiliary back-up system.
3. The use of solar water heating system is recommended in the following type of buildings in Government/ Semi-Government and Institutional buildings where the hot water requirements may not be continuous/ permanent.
 - i. Guest Houses
 - ii. Police men/Army barracks
 - iii. Canteens
 - iv. Laboratory & Research Institutions where hot water is needed.
 - v. Hostels, Schools, Colleges and Other Institutes.
4. The Installation of the electrical back up in all such water heating system shall be optional depending on the nature of requirements of the hot water.
5. It is suggested that solar heating systems of the capacity of about 100 liters per day based on thermosyphonic with necessary electrical back-up be installed at residential buildings like hostels.
6. In order to facilitate the installation of the solar water heating systems, the new buildings shall have the following provisions:

All such buildings where solar water heating systems are to be installed will have open sunny roof area available for installation of solar water heating system.

 - a) The roof loading adopted in the design of such building should be at least 50 kg per sq. m. for the installation of solar water heating system.
 - b) A solar water heating system can also be integrated with the building design. These either can be put on the parapet or could be integrated with the south facing vertical wall of the building. The best inclination of the collector for regular use throughout the year is equal to the local latitude of the place. The Collectors should be facing south. However, for only winter use the optimum inclination of the Collector would be (Latitude + 15 degrees of the south.). Even if the Collectors are built in south facing vertical wall of building the output from such Collectors during winter month is expected to be within 32% output from the optimum inclined Collector.

- c) All the new buildings to be constructed shall have an installed hot water line from the rooftop and insulated distribution pipelines to each of the points where hot water is required in the building.
- d) The capacity of the solar water heating system to be installed on the building shall be described on the basis of the average occupancy of the building. The norms for hospitals, hotels and other functional buildings are given below:

Sr. No.	Type of Buildings	Capacity recommended - liters per capita per day
1	Hospitals	100
2	Hotels	150
3	Hostels & other such Building	25
4	Canteen	As required
5	Laboratory & Research Institutions	As required

- e) An Open area of 3 sq.m. would be required for installation of a collector which supplies about 100 liters of water per day. At least 60% of the roof area may be utilized for installation of the system.
- f) The specification for the solar water heating system laid down by the Ministry of Non-Conventional Energy Sources can be followed. Flat plate collector conforming to Bureau of Indian Standards - latest standard should be used in all such solar water heating systems.

35.0. RAIN WATER HARVESTING:

The provision for Rain Water Harvesting shall be made as under:

- a) All the layout open spaces/amenity spaces of housing societies and new constructions/reconstruction/ additions on plots having area not less than 500 sq.mt. in non gaothan areas of all towns shall have one or more Rain Water Harvesting structures having a minimum total capacity as detailed in Schedule.

Provided that the Authority/Collector may approve the Rain Water Harvesting structures of specifications different from those in Schedule, subject to the minimum capacity of Rain Water Harvesting being ensured in each case.

- b) The owner/society of every building mentioned in the (a) above shall ensure that the Rain Water Harvesting structure is maintained in good condition for storage of water for nonpotable purposes or recharge of groundwater at all times.
- c) The Authority may impose a levy of not exceeding Rs.1000/- per annum for every 100 sq.m. of built-up area for the failure of the owner of any building mentioned in the (a) above to provide or to maintain Rain Water Harvesting structures as required under these regulations

SCHEDULE

Rain Water Harvesting in a building site includes storage or recharging the ground water by rainwater falling on the terrace or any paved or unpaved surface within the building site.

1. The following systems may be adopted for harvesting the rainwater drawn from terrace and the paved surface.
 - i) Open well of a minimum 1m dia and 6m in depth into which rain water may be channeled and allowed to filter for removing silt and floating material. The well shall be provided with ventilating covers. The water from the open well may be used for non-potable

- domestic purposes such as washing, flushing and for watering the garden etc.
- ii) Rain Water Harvesting for recharge of groundwater may be done through a bore-well around which a pit of 1m width may be excavated upto a depth of at least 3m and refilled with stone aggregate and sand. The filtered rain water may be channeled to the refilled pit for recharging the bore-well.
 - iii) An impressive surface/underground storage tank of required capacity may be constructed in the setback or other open spaces and the rain water may be channeled to the storage tank. The storage tank shall always be provided with ventilating covers and shall have draw-off taps suitably placed so that rain water may be drawn off for domestic, washing, gardening and such other purposes. The storage tank shall be provided with an overflow.
 - iv) The surplus rain water after storage may be recharged in to ground through percolation pits or trenches or combination of pits and trenches. Depending on the geomorphological and topographical conditions, the pits may be of the size of 1.20 m width X 1.20 m length X 2 m to 2.50 m depth. The trenches can be of 0.60 m width X 2 to 6 m length X 1.50 to 2 m depth. Terrace water shall be channeled to pits or trenches. Such pits or trenches shall be back filled with filter media comprising the following materials :-
 - a) 40 mm stone aggregate as bottom layer upto 50% of the depth.
 - b) 20 mm stone aggregate as lower middle layer upto 20% of the depth.
 - c) Coarse sand as upper middle layer upto 20% of the depth.
 - d) A thin layer of fine sand as top layer.
 - e) Top 10% of the pits/trenches will be empty and a splash is to be provided in this portion in such a way that roof top water falls on the splash pad.
 - f) Brick masonry wall is to be constructed on the exposed surface of pits/trenches and the cement mortar plastered. The depth of wall below ground shall be such that the wall prevents loose soil entering into pits/ trenches. The projection of the wall above ground shall at least be 15 cm.
 - g) Perforated concrete slabs shall be provided on the pits/trenches.
 - h) If the open space surrounding the building is not paved, the top layer up to a sufficient depth shall be removed and refilled with coarse sand to allow percolation of rain water into ground
- 2) The terrace shall be connected to the open well/bore-well/storage tank/ recharge pit/trench by means of HDPE / PVC pipes through filter media. A valve system shall be provided to enable the first washing from roof or terrace catchment, as they would contain undesirable dirt. The mouth of all pipes and opening shall be covered with mosquito (insect) proof wire net. For the efficient discharge of rain water, there shall be at least two rain water pipes of 100 mm dia. for a roof area of 100 sq.m.
- 3) Rain Water Harvesting structures shall be sited as not to endanger the stability of building or earthwork. The structure shall be designed such that no dampness is caused in any part of the walls or foundation of the building or those of an adjacent building.
- 4) The water so collected/recharged shall as far as possible be used for non-drinking and non-cooking purpose. Provided that when the rain water in exceptional circumstances will be utilised for drinking and/or cooking purpose, it shall be ensured that proper filter arrangement and the separate outlet for bypassing the first rain water has been provided.
- It will be ensured that for such use, proper disinfectants and the water purification arrangements have been made.

PART IX

ADDITIONAL PERMISSIBLE USES IN CERTAIN CATEGORIES

36.0 Commercial use of lands owned by ZillaParishad, PanchayatSamiti& Gram Panchayat:

Notwithstanding anything contained in these Regulations or the Development Plan/Regional Plan, the land owned by ZillaParishad, PanchayatSamiti& Gram Panchayat (excepting the lands reserved for the appropriate authority other than ZillaParishad, PanchayatSamiti& Gram Panchayat) shall be allowed to be developed for commercial use up to the maximum extent of 33% of the Floor Space Index available & subject to the general restrictions applicable otherwise to such development & also in accordance with Rural Development and Water Conservation Departments Resolution No. Sankul 2004/ Pra.Kra.54/ Para – 8, dated 30-04-2004 & as may be modified from time to time subject to the following conditions. –

- i) The lands must be owned by ZillaParishad / PanchayatSamiti / Gram Panchayat as the case may be.
- ii) These lands are not reserved for any other appropriate authority in Development Plan/**Regional Plan** Town Planning Schemes.
- iii) Independent access of appropriate width shall be separately provided for each commercial user and original user.
- iv) Parking requirement as prescribed for each type of user shall have to be provided

37.0. Commercial use of lands in the possession of Maharashtra State Road Transport Corporation

Notwithstanding anything contained in these regulations or the Development Plan/Regional Plan, land in the possession of Maharashtra State Road Transport Corporation shall be allowed to be developed for commercial use to the extent specified in Regulation No.24.10.

38.0. Uses permissible below Flyover.

Garden.

PART X

REGULATIONS FOR SPECIAL ACTIVITIES

39.0. Mining or Quarrying Operations:-

With the prior approval of the Authority/Collector, Mining or Quarrying operations may be permitted on following conditions:

- i) In areas within the region such pits and holes created in the process of mining and quarrying should be appropriately filled up and not left open.
- ii) The site shall be restored so as to make it safe either by raising a garden or in addition by planting fruit growing trees around it or by making it a water reservoir.
- iii) Mining & quarrying operation should be in a controlled manner, such as starting operation initially on a site away from crowded areas and later gradually extending it to the other
- iv) Hill tops and hill slopes from which rain water flow should not be allowed to be used for mining and quarrying.
- v) The natural landscape and environment are not to be adversely affected..
- vi) Quarrying shall be regulated in accordance with the method to be prescribed by the District Collector
- vii) Regulations prescribed by the Revenue authorities regarding the resettlement and restoration of environment shall be strictly followed.
- viii) Quarrying shall not be permitted within 500m from the gaathan / village settlements and from the rivers, forts, historical places and places of tourist interest and within 500 m from the High Tide Line along the coast.
- ix) The conditions prescribed under Maharashtra Minor Mineral Extraction Rules and Regulations shall be observed.

40.0. Erection of mobile towers:

Erection of mobile towers shall be in accordance with the guidelines approved by the Government from time to time in this regards.

PART XI
SPECIAL SCHEMES

41.0. Special Township Projects in Regional Plan area –

Special Township Projects within the Regional Plan area shall be governed by the Regulations applicable with respective Regional Plan area.

42.0 Tourism Development Activities

The Authority / Collector shall allow the development of tourism activities as per following terms & conditions-

General Conditions –

- 1) These guidelines shall be applicable for Tourism Development Zone in No Development Zone & other Zones, too as set out herein below..
- 2) Tourism Development Zone can be developed by individual or company or partnership firm or Government / Semi-government Organisations / Corporations
- 3) Tourism Development Zone Committee – Proposals for lands to be specified as Tourism Development Zone shall be recommended for consideration of Government in Urban Development Department by a committee consisting of -

SR.NO	NAME	POSITION
(i)	Secretary, Tourism Development Department, Mantralaya	Chairman
(ii)	Divisional Commissioner	Member
(iii)	Authority/Collector	Member
(iv)	Deputy Director of Town Planning / Divisional Head of the Town Planning Department	Member
(v)	Representative of Hotel Industries	Member
(vi)	Environmentalist	Member
(vii)	Architect, having 20 years experience in Architectural practices	Member

This Committee may be called “Tourism Development Zone Committee” (TDZC). The Persons at Sr. No. (v), (vi) & (vii) of the Committee may be nominated by Secretary, Tourism Development Department and the tenure of these members shall change after every 3 years, provided however that the same person shall be eligible for reappointment as a member.

4) Size of plot & FSI – Minimum requirements regarding the size of the plot for Tourism Development Zone other features shall be as follows

- i) Tourism Development Zone as identified in Developable Zone shall be granted FSI as permissible for that zone in the sanctioned DCR.
- ii) TDZ area identified in No Development Zone shall be granted FSI as per the Table No.33 given below –

Table No.33

No Development Zone		
Total NDZ holding	Max. TDZ (area permissible fixed)	Max. built up area permissible (FSI)
Area in hectare	Area in hectare	Area in sq. m.
2.00	1.00	5000 square meter
2.00-3.00	1.10	5500 square meter 6000
3.00-4.00	1.20	square meter 7000 square
4.00-5.00	1.40	meter
5.00-6.00	1.60	8000 square meter 8500
6.00-7.00	1.70	square meter
7.00-8.00	1.80	9000 square meter 9500
8.00-9.00	1.90	square meter
9.00-10.00	2.00	10000 square meter
Above 10.00	1/5 th of the holding	Half of the area of TDZ (0.5 FSI of TDZ area.)

Note:

- i) After deducting the area of Tourism Development Zone, remaining land in No Development Zone shall be entitled for FSI as permissible in No Development Zone.
- ii) For plots each more than 2 hectare in area in No development Zone, no sub-division of plots shall be permitted.

5)Smaller Plots: - For existing landholders having smaller plots in No Development Zone, the provisions of promotion of tourism through bed & breakfast type of the arrangement for tourism shall be permissible as recommended by Tourism Development Zone Committee & approved by Government in Urban Development Department. There shall be the same FSI as in No Development Zone for plots, according to Development Control Regulations.

6)Prohibition for inclusion in TDZ - Lands falling in categories specified below shall not be included in Tourism Development Zone and hence shall not be considered for the purpose -

- a) Lands affected beyond permissible levels by pollution in land, water or air, as may be decided and certified by the Maharashtra Pollution Control Board.
- b) Lands covered by mangroves.
- c) Areas from No Development Zone directly abutting the Residential Zone without being separated by road having width not less than 18 m.

7)Infrastructural Facilities – All the infrastructural facilities required in site as specified by **Authority/Collector** and also as suggested by Tourism Development Zone Committee shall be provided by the developer at his own cost on the site. Proper arrangement for treatment and disposal of sewage and sullage and solid waste shall be made to the satisfaction of Authority/Collector & Maharashtra Pollution Control Board. No untreated effluent shall be allowed to pass into the sea or any water body.

8)Reserved sites for TDZ – Where the lands are located in unique/unusual area, particularly suitable for development of tourism in view of existing water body, scenic beauty, tree plantation or geological formation etc. but are designated/ reserved in the Regional Plan for the purpose of park or gardens or recreation ground or private garden or private recreational ground, it can be specified as Tourism Development Zone. The minimum area of such site, however, shall not be less than 1.00 Ha. The floor space index available for development in such a site shall be 0.20. This FSI is to be consumed on only 15% of the area of the lands declared as Tourism Development Zone; out of the site designated for open user such as Recreation Ground, Parks etc

9)Environment & Education – Places where rare species of migratory birds are known to visit and where there is a heritage of flora & fauna shall be given preference for development as Tourism Development Zone. Efforts should be made for creating environmental awareness among the local population & especially among school going children in nearby area.

43.0 Innovative Development Proposals

If any development proposal is submitted by the owner or developer, consisting of new concepts, innovative ideas, then such proposal may be approved by the Authority in consultation with the Director of Town Planning, Maharashtra State, Pune, if it is, otherwise, in accordance with the spirit of these regulations.

PART XII
SUPPLEPAENTARY AND MISCELLANEOUS PROVISIONS

44.0. Clarification.

If any question or dispute arises with regard to interpretation of any of these Regulations the matter shall be referred to the Director of Town Planning, Maharashtra State who after considering the matter and after giving hearing to the parties, if necessary, shall give a decision on the interpretation of the provisions of these Regulations. The decision of the Director of Town Planning, Maharashtra State on the interpretation of these Regulations shall be final and binding on the concerned party or parties.

45.0. Power to delegate.

The Director of Town Planning, Maharashtra State may, by an order, delegate any of the powers under these Regulations, exercisable by him, subject to such conditions, as he may consider appropriate, to any officer of the Directorate of Town Planning, not below the rank of Deputy Director of Town Planning

46.0 Board of Appeals

Any person aggrieved by an order / communication made by an authority/Collector under these Regulations may prefer an appeal before the Board of Appeals. The board shall be constituted at division level consisting of the Divisional Head of Town Planning Department of the concerned division as President and concerned ADTP/TP of the district as a member.

APPENDIX A-1
FORM FOR CONSTRUCTION OF BUILDING OR LAYOUT OF BUILDING /
GROUP HOUSING

Application for permission for development under Section 18 Maharashtra Regional and
Town Planning Act, 1966.

From _____
(Name of the owner)

To,
The Collector,
Dist.-----

Sir,

I intend to carry out the under mentioned development in the site/plot of land, on Plot No..... Town and Revenue S.No.....City Survey No.....Maujesituated at Road / Street Societyin accordance with Section 18 Maharashtra Regional and Town Planning Act, 1966.

I forward herewith the following plans and statements (Item 1 to 6) wherever applicable, in quadruplicate, signed by me (Name in block letters)and the Architect / Licensed Engineer / Structural Engineer / Supervisor, (License No.....), who has prepared the plans, designs and a copy of other statements /documents as applicable

- i) Key Plan (Location Plan);
- ii) Site Plan (in quadruplicate) of the area proposed to be developed;
- iii) a detailed building plan (in quadruplicate) showing the plan, section and elevations of the proposed development work;
- iv) Particulars of development in Form enclosed (to be submitted for development other than individual buildings);
- v) An extract of record of rights, property register card (any other document showing ownership of land to be specified) alongwith consent of co-owners where third party interest is created.
- vi) Attested copy of receipt of payment of scrutiny fees;
- vii) Latest property tax receipt;
- viii) No Objection Certificate, wherever required.

I request that the proposed development/ construction may be approved and permission accorded to me to execute the work

FORM GIVING PARTICULARS OF DEVELOPMENT

(PART OF APPENDIX A-.....ITEM 4)

1.	(a) (i) Full Name of Applicant	-----
	(ii) Address of applicant	-----
	(iii) e-mail ID	-----
	(iv) Mobile No.	-----
	(b) Name and address of Architect/ licensed Engineer/ Structural Engineer/ Supervisor employed.	-----
	(c) No. and date of issue of License	-----
2.	Is the plot affected by any reservations or road lines? If yes, are these correctly and clearly marked on the block plan?	-----
3.	(a) What is the total area of the plot according to the document?	-----
	(b) Does it tally with the Revenue/CTS Record	-----
	(c) What is the actual area available on site measured by Architect/licensed Engineer/Structural Engineer / Supervisor	-----
	(d) Is there any deduction in the original area of the plot on account of road lines or reservation. Please state the total area of such deductions?	-----
	(e) If so, what is the net area?	-----
	The permission shall be based on the area whichever is minimum. (Note: Above details shall also be mentioned on building plan submitted for approval)	
4.	Are all plans as required under Regulation No.6.2 enclosed?	-----
5.	(a) Is the plot of a city Triangulation Survey Number, Revenue Survey Number or Hissa Number of a Survey Number or a Final Plot Number of a Town Planning Scheme or a part of an approved layout?	-----
	(b) Please state Sanction Number and Date of Sub-division / Layout	-----
6.	(a) In what zone does the plot fall?	-----
	(b) What is the permissible F.S.I. of the zone?	-----
7.	(a) Is the use of every room in the proposed work marked on the plans?	-----
	(b) Is it in accordance with the regulations?	-----
	(c) Does the use of the building, fall in the category of special types of buildings like, cinema halls, theatres assembly halls, stadia, buildings for religious purpose, hospital buildings, educational buildings, markets and exhibition halls etc.?	-----
8.	If the work is in connection with an industry :	-----
	(a) Please briefly describe the main and accessory process.	-----

	(b) Please state the maximum number of workmen and the total horse power likely to be employed per shift in the factory	-----
	(c) Is the proposal for relocation of an existing industry, if so give the name and address of existing industry?	-----
	(d) Will the building be at 23 m. away from the boundary of a residential and commercial zone?	-----
	(e) Nature and quantum, of industrial waste/effluents and method of disposal.	-----
9.	(a) What is the average?	
	(i) prescribed width of road on which plot is fronting?	
	(ii) existing width of the street? (If the plot abuts on two or more streets, the above information in respect of all streets should be given)	
	(b) What is the height of the building above the average ground level of the plot	
	(c) Does it comply with the Regulation	
10.	(a) If there are existing structures on the plot	
	(i) Are they correctly marked and numbered on the site plan?	
	(ii) Are those proposed to be demolished Immediately and hatched in yellow colour?	
	(iii) What is the plinth area and total floor area of all existing structures to be retained? (Please give details confirming to the plan submitted)	
	(b) What is the plinth area and total floor area of the proposed work? (Please give details confirming to the plan submitted)	
11.	(a) Please state the plinth area and total floor area, existing and proposed (total of Item No.10 (a)(iii) and 10(b))	
	(b) Please state the overall F.S.I. (Item 11 (a) divided by Item 3 (e))	
	(c) Does the work consume the full F.S.I. of the plot, as given in Item 6 (b)?	
	(d) Is the Building proposed with setbacks on upper floors?	
12.	(a) What is the width of the front open space? If the building abuts two or more streets, does the front open space comply with Regulation?	
	(b) Please state which of the following rule is applicable for the front open spaces : Chapter IV and does the front open space comply with that rule?	

13.	(a) What is :									
	(i) the width of the side open space (s)?									
	(ii) the width of the rear open space(s)?									
	(iii) the distance between buildings?									
	(b) Are there two or more wings to the buildings ? If so, are the open spaces separate or distinct for each wing?									
14.	(a) What are the dimensions of the inner or outer chowk?									
	b) (i) Is / are room (s) dependent for its light and ventilation on the chowk ? If so, are the dimensions of the chowk as required for each wing of the building?									
	(ii) If not, is the area equal as per Regulation No.15.2?									
15.	If the height of the building is more than 14 meter above the average ground level, is provision for lifts made ?									
	(a) If so, give details of lift.	<table border="1"> <thead> <tr> <th>Type</th> <th>Passenger Capacity</th> <th>No. of Lifts</th> <th>Type of Doors</th> </tr> </thead> <tbody> <tr> <td>(1)</td> <td>(2)</td> <td>(3)</td> <td>(4)</td> </tr> </tbody> </table>	Type	Passenger Capacity	No. of Lifts	Type of Doors	(1)	(2)	(3)	(4)
	Type	Passenger Capacity	No. of Lifts	Type of Doors						
(1)	(2)	(3)	(4)							
(b) Details of Fire Lift.										
16.	(a) Does the building fall under purview of Regulation No.6.2.6.1?									
	(b) If so, does the proposed fire protection requirements confirm to Part V?									
	(c) If not, give reasons for non conformity									
	(i)									
	(ii)									
17.	(a) (i) What are the requirements of parking spaces under the Regulations ?									
	(ii) How many are proposed?									
	(b) (i) Are loading-unloading spaces necessary?									
	(ii) If so, what is the requirement?									
18.	(a) (i) What are the maximum widths of balconies ?									
	(ii) Will they reduce the required open spaces to less than the provisions of Regulations ?									

	(iii) Do they serve as a passage to any part of the building?	
	(iv) What is their total area?	
	(b) What is the maximum width of weather frames, Sunshades (Chajja), Sun breakers, cornice, eaves or other projection ?	
	(c) (i) Are any porches / Canopies proposed ?	
	(ii) Are they in compliance with Regulation No.15.4.1(b)?	
19.	(a) What is the width of the means of access ?	
	(b) Will it be paved, drained & kept free of encroachment?	
20.	Is recreational or amenity open space provided as required under Regulation No.13.3 & 13.3.11?	
	(a) Are any accessory buildings proposed? If so, for what purpose?	
	(b) What are their heights?	
	(c) Are they 7.5 m away from the street or front 1.5 m. from other boundary?	
	(d) Is their area calculated in F.S.I.?	
21.	(a) What is the proposed height of the compound /boundary wall? Is it at a junction?	
	(b) Is it in compliance with Regulation No.17.16?	
22.	(a) Is the proposal in the Air Port Zone?	
	(b) Is a "No. Objection certificate" for height is obtained?	
23.	Does the proposal fall in any of the restricted zones?	
24.	(a) Does any natural water source pass through the land under development ?	
	(b) Is necessary setback provided as per Regulation No.11.1.(b)?	
25.	Is the plinth level proposed to be above the level of the surrounding ground level?	
26.	The details of the materials to be used in construction with specification are as below:	
	Roofs	
	Floors	
	Walls	
	Columns	
	Any other material	

27.	The number of water closet, urinals, kitchens, washbasins, baths to be provided are as follows –																		
	<table border="1" style="margin-left: auto; margin-right: auto; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;"></th> <th style="width: 15%;">Water closets</th> <th style="width: 15%;">Baths</th> <th style="width: 15%;">Urinals</th> <th style="width: 15%;">Wash Basins</th> <th style="width: 15%;">Kitchens</th> </tr> </thead> <tbody> <tr> <td>Existing</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>Proposed</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>		Water closets	Baths	Urinals	Wash Basins	Kitchens	Existing						Proposed					
	Water closets	Baths	Urinals	Wash Basins	Kitchens

APPENDIX A-2

FOR SUB-DIVISION OF LAND AS PLOTTED LAYOUT

Application for permission for development under Section 18 Maharashtra Regional and Town Planning Act, 1966.

From
(Name of the owner)

To,
TheCollector,
Dist.-----

Sir,

I intend to carry out the under mentioned development in the site/plot of land, bearing S.No./Gut No. City Survey No....., Mouje situated at Road / Street in accordance with Section 18 Maharashtra Regional and Town Planning Act, 1966.

I forward herewith the following plans and statements (Item 1 to 6) wherever applicable, in quadruplicate, signed by me (Name in block letters) and the Architect / Licensed Engineer / Structural Engineer / Supervisor (License No.....), who has prepared the plans, designs and a copy of other statements /documents as applicable (Items 7 to 10).

- (1) Key Plan (Location Plan);
- (2) a site plan (in quadruplicate) showing the surrounding land and existing access to the land included in the layout;
- (3) a layout plan (in quadruplicate) showing -
 - (i) sub-divisions of the land or plot with dimensions and area of each of the proposed sub-divisions and its use according to prescribed regulations;
 - (ii) width of the proposed streets; and
 - (iii) dimensions and area of open spaces provided in the layout for the purpose of recreational open space or any like purpose.
- (4) Anextract of record of rights property register card (any other document showing ownership of land to be specified) alongwith consent of co-owners where third party interest is created.
- (5) Attested copy of Receipt for payment of scrutiny fees.
- (6) No Objection Certificate, wherever required.

I request that the proposed layout may please be approved and permission accorded to me to execute the work.

**FORM GIVING PARTICULARS OF DEVELOPMENT
(PART OF APPENDIX 1.....ITEM 6)**

1.	(a) (i) Full Name of Applicant	
	(ii) Address of applicant	
	(iii) e-mail ID	
	(iv) Mobile No.	
	(b) Name and address of Architect/ licensed Engineer employed.	
	(c) No. and date of issue of License	
2.	Is the land affected by any reservations or road lines? If yes, are these correctly and clearly marked on the block plan ?	
3.	*(a) What is the total area of the land according to the document?	
	*(b) Does it tally with the Revenue (7/12) /CTS Record	
	*(c) What is the actual area available on site measured by Architect/licensed Engineer.	
	(d) Is there any deduction in original area of the land on account of road lines or reservation. Please state the total area of such deductions?	
	(e) If so, what is the net area?	
4.	* The permission shall be based on the area whichever is minimum	
5.	(a) Is the land of a city Triangulation Survey Number, Revenue Survey Number or Hissa Number of a Survey Number or a Final Plot Number of a Town Planning Scheme?	
	(b) Whether the certified measurement plan of the land issued by the Land Records Department is submitted with the proposal?	
6.	In what zone does the land fall?	
7.	What is the average	
	(i) prescribed width of access road?	
	(ii) existing width of the street?	
8.	Whether the internal roads proposed in the layout conform to the Regulation No.12.	
9.	How much recreational open space is proposed?	
10.	Whether amenity space required is as per regulation? If so, how much is proposed?	
11.	Does the proposal fall in any of the restricted zones?	

12.	Does any natural water source pass through the land under development?	
-----	--	--

I hereby declare that I am the owner / lessee in possession of the plot on which the work is proposed and that the statements made in this form are true and correct to the best of my knowledge.

19.14	Restrictive Zone	77
19.15	Afforestation Zone	77
PART - IV GENERAL BUILDING REQUIREMENTS – SETBACK, MARGINAL DISTANCE, HEIGHT AND PERMISSIBLE FSI		
20.0	General	79
20.1	Regulations for Congested area	79
20.2	Regulations for Outside Congested Area	80
20.2.1	Marginal distances for residential building height 15 m. and below	80
20.2.2	Marginal distances for other buildings	83
20.3	Permissible FSI	85
20.4	Industrial Building	86
20.5	FSI of Green Belt	86

PART – V HIGHER FSI FOR CERTAIN USERS		
21.0	General	87
21.1	Permissible Marginal Spaces, Permissible Basic FSI, Additional FSI for Buildings in Non-Congested Area	88
21.2	Entitlement of FSI for road widening or construction of new roads / surrender of Reserved land	96
21.3	Development/ re-development for construction of staff quarters of the State Government or its statutory bodies or PMRDA on private lands	96
21.4	Development / re-development of Housing Schemes by MHADA	97
21.5	Redevelopment of Existing Buildings belonging to EWS /LIG group	101
21.6	Redevelopment of Old /Dilapidated and Dangerous Building	101
21.7	Redevelopment of Existing Buildings	103
21.8	Transit Oriented Development (TOD)	103
21.9	Development of Housing for EWS/LIG/PMAY	107
21.10	Regulation for development of IT establishment	108
21.11	Regulation for Development of Bio-Technology Park	110
21.12	Development of Public Toilet	111
PART VI FIRE PROTECTION REQUIREMENTS		
22.1	General	112
22.2	Construction Materials	112
22.3	Lifts	112
22.4	Basement	113
22.5	Service Ducts/Shafts	115
22.6	Refuse Chutes	115
22.7	Refuge Area	115
22.8	Electrical Services	115
22.9	Gas Supply	116
22.10	Illumination of Means of Exit	116
22.11	Stand-by Electric Generator	116
22.12	Transformer	116
22.13	Air Conditioning	117
22.14	Provision of Boiler and Boiler Room	118
22.15	Provision of First Aid and Fire Fighting Appliance	118
22.16	Fire Alarm System	118
22.17	Lightening Protection of Buildings	118
22.18	Fire Control Room	119
22.19	Housekeeping	119
22.20	Fire Drills and Fire Orders	119
22.21	Compartmentation	119
22.22	Material for Interior Decoration and Furnishing	119
22.23	Fire Escape Chutes / Controlled Lowering Device for Evacuation	119
22.24	Fire Check Floor	120
22.25	Fire Infrastructure Charges	120
22.26	Fire Officer for hotels, business and mercantile buildings with height more than 30m	120
PART – VII STRUCTURAL SAFETY, WATER SUPPLY, DRAINAGE & SANITARY REQUIREMENTS, OUTDOOR DISPLAY STRUCTURES		
23.0	Structural Design	121
24.0	Quality of Materials and Workmanship	121
25.0	Alternative Materials, Methods of Design and Construction and Tests	121
26.0	Building Services	122
27.0	Water Supply, Drainage and Sanitary Requirements	122
28.0	Drainage and Sanitary Requirements	124
29.0	Signage and Outdoor Display Structures	125
PART – VIII		

SPECIAL PROVISIONS IN CERTAIN BUILDINGS		
30.0	Provisions of Facilities for Differentially Aabled Persons	126
31.0	Installation of Solar assisted Water Heating (SWH) System/ Roof Top Photovoltaic (RTPV) System	126
32.0	Rain Water Harvesting	126
33.0	Regulations for Waste Water Recycling	128
34.0	Solid Waste Management	130
35.0	Incentives for Green Buildings	130

PART-I ADMINISTRATION

1.0 SHORT TITLE, EXTENT, AND COMMENCEMENT

1.1 These Regulations shall be called as —Development Control and Promotion Regulations for **Pune Metropolitan Region (PMR), 2018**, referred to herein after as **these Regulations**.

1.2 **Extent-** These Regulations shall apply to the building activities and development works on lands within the **PMR under the jurisdiction of Pune Metropolitan Regional Development Authority (PMRDA)**.

1.3(a) These Regulations shall come into force from the date of notification.

1.3(b) **Repeal:** These shall replace existing building bye-laws applicable in PMR Area, standardized development control and promotional regulations for regional plan areas in Pune, Maharashtra, Special Regulation related to areas falling under 10 kms from Pune and Pimpri Chinchwad Municipal Corporations, development control rules / regulations of A, B and C municipal councils and the development control regulations of regional plan of Pune region with amendments made to them from time to time, and any guidelines/directions issued by any authorities in the past.

1.4 Provisions in Regional Plan:
Land use zoning provisions in the sanctioned Regional Plan of Pune shall govern unless otherwise specifically mentioned in these regulations. Special Provisions or Express Provisions made or Special Regulations as mentioned in Sanctioned Regional Plan which are not covered under these regulations shall prevail.

1.5 Conflicts in provisions: If there is any conflict between the provisions in sanctioned Regional Plan along with the provisions in the sanctioned Development Control and Promotion Regulations for Regional Plan area in Maharashtra and Development Control and Promotion Regulations for Pune Metropolitan Region (PMR) in that case, the matter shall be referred to the Director of Town Planning M.S., whose decision shall be final. Wherever, there is a discrepancy between the National Building Code and these Regulations, then in such cases these Regulations shall prevail.

1.6 Savings: Notwithstanding anything contained in these regulations, any development permission granted or any development proposal for which any action is taken under the erstwhile Regulations shall be valid and continue to be so valid, unless otherwise specified in these Regulations.

Provided that, permission granted earlier shall be eligible for renewal as per provisions of the Act. Provided further that, the words 'action taken' in this regulation shall also include the issuance of Demand note for granting the development permission;

Provided also that, it shall be permissible for the owner to –

a) either continue to develop the project under the erstwhile regulations in toto and for that limited purpose erstwhile regulation shall remain in force, or

b) apply for grant of revised permission under the new regulations, if the project is on-going and the occupation certificate, has not been granted fully.

2.0 DEFINITIONS:

2.1 General

2.1.1 In these Regulations, unless the context otherwise requires, the definitions given hereunder shall have meaning indicated against each of them.

2.1.2 Words and expressions that are not defined in these regulations shall have the same meaning or sense as in any of following Acts.

- i) The Maharashtra Regional and Town Planning Act, 1966.
- ii) National Building Code (2005 or amended from time to time); however, these regulations shall prevail in case of any overlaps/conflicts.
- iii) Maharashtra Metropolitan Region Development Authority Act, 2017.

2.2 “**Act**”- Act in these Regulations shall mean the Maharashtra Regional and Town Planning Act, 1966;

2.3 “**Annual Statements of Rates**” means *ASR* published by Inspector General of Registration, Maharashtra State, Pune;

2.4 “**Authority**” means Metropolitan Commissioner of PMRDA unless otherwise specified;

2.5 “**Alteration**” means any change in existing authorized building or change from one occupancy to another, or a structural change, such as an addition to the area or height, or the removal of part of a building, or any change to the structure, such as the construction of, cutting into or removal of any wall, column, beam, joist, floor, roof or other support or a change to or closing of any required means of ingress (entry) or egress (exit) as provided under these regulations. However, modification in respect of gardening, white washing, painting, plastering, pointing, paving and retailing shall not be deemed to be alteration;

2.6 “**Advertising Sign**” means any surface or structure with characters, letters or illustrations applied thereto and displayed in any manner whatsoever outdoor for purposes of advertising or to give information regarding or to attract the public to any place for public performance, article or merchandise whatsoever, or is attached to, or forms a part of building, or is connected with any building or is fixed to a tree or to the ground or to any pole, screen, fence or hoarding or displayed in space, in or over any waterbody;

2.7 “**Accessory Building**” means a building separate from the main building on a plot and containing one or more rooms for accessory use such as servant quarters, garage, store rooms etc;

2.8 “**Accessory / Ancillary Use**” means any use of the premises subordinate to the principal use and incidental to the principal use;

2.9 “**Amenity**”-Includes open spaces, parks, recreational facilities and grounds, sports complex, library, hospital, cafeteria, convenience shopping, parking lots, primary and secondary schools, clinics, dispensaries, health club, sub post office, police station, electrical sub stations, ATM’s, banks, electronic cyber library, open market, garbage bins, play grounds, yoga center, gardens, water supply, electric supply, street lighting, sewerage, drainage, public works and other utilities, club house, services and conveniences, fire brigade, staff quarters of PMRDA and a public utility, Student Hostels and working women’s hostel, (in case of Student Hostels, working women’s hostel, the plot shall not be less than 2000 sq. mt. and a minimum of 50% of the plot area shall be used for open users such as open space, parks, recreational facilities, parking lots etc.) and such additional public utility users as decided by the Metropolitan Commissioner of PMRDA.

2.10 “**Access**” means a clear approach to a plot or a building;

2.11 “**Architect**” means a person registered with Council of Architecture(COA) as per Architects Act, 1972 as an Architect with a valid (COA) Registration Number;

2.12 “**Architectural projection**” means Chajja, Cornice, Ledge etc. which is a protrusion from the

building facade or window line of the building used for non-habitable uses.;

- 2.13 **“Atrium”** means a sky lighted naturally/mechanically ventilated area in buildings, with no intermediate floors, used as circulation space or entrance *foyer*;
- 2.14 **“Balcony”** means a horizontal cantilever projection, including parapet and handrail balustrade to serve as a passage or sitting out place with at least one side fully open, except being provided with railing or parapet wall for safety;

- 2.15 **“Basement”** means the lower storey of a building below or partly below the ground level with one or more than one levels;
- 2.15.1 **“Building”** means any structure for whatsoever purpose and of whatsoever materials constructed and every part thereof whether used as human habitation or not and includes foundation, plinth, walls, floors, roofs, chimneys, wells, door steps, fencing, plumbing and building services, fixed platforms, verandas, balcony; cornice or projection, part of a building or anything affixed thereto or any wall fence enclosing or intended to enclose any land or space and signs and outdoor display structures. However, tents, shamianas and the tarpaulin shelters erected for temporary and ceremonial occasions with the permission of the Metropolitan Commissioner shall not be considered as building;
- 2.16 **“Built up Area”** means the area covered by a building on all floors including cantilevered portion, mezzanine floors if any but excepting the areas excluded specifically from FSI under these Regulations;
- 2.17 **“Building Line”** means the line upto which the plinth of a building adjoining a street or an extension of a street or on a future street may lawfully extend. It includes the lines prescribed, if any, in any scheme and / or Regional/Development Plan, or under any other law in force;
- 2.18 **“Building Height”** means the vertical distance measured in the case of flat roofs, from the average level of the ground around and contiguous to the building to the terrace of last floor of the building adjacent to the external walls; to the highest point of the building and in the case of pitched roofs, up to the point where the external surface of the outer wall intersects the finished surface of the sloping roof; and in the case of gable facing road, the mid-point between the eaves level and the ridge. Architectural features serving no other function except that of decoration shall be excluded for the purpose of measuring heights;
- 2.19 **“Builder / Developer”** means a person who is legally empowered to construct or to execute work on a building unit, building or structure and/or land development or where no person is empowered, the owner of the building unit, building or structure.
- 2.20 **“Bio-Technology Unit”** means an Unit or a Park which is certified as such by the Development Commissioner (Industries);

- 2.21 "Carpet area"** means the net usable floor area of an apartment, excluding the area covered by the external walls, areas under services shafts, exclusive balcony or veranda area and exclusive open terrace area, but includes the area covered by the internal partition walls of the apartment.
- Explanation.— For the purpose of this clause, the expression "exclusive balcony or veranda area" means the area of the balcony or veranda, as the case may be, which is appurtenant to the net usable floor area of an apartment, meant for the exclusive use of the allottee; and "exclusive open terrace area" means the area of open terrace which is appurtenant to the net usable floor area of an apartment, meant for the exclusive use of the allottee;
- 2.22 "Chajja"** means a sloping or horizontal structural overhang usually provided over openings on external walls to provide protection from sun and rain and for purpose of architectural appearance;
- 2.23 "Chimney"** means an upright shaft containing one or more flues provided for the conveyance to the outer air of any product of combustion resulting from the operation of heat producing appliance or equipment employing solid, liquid or gaseous fuel;
- 2.24 "Cluster"** means any defined area with proper access;
- 2.25 "Control Line"** means a line on either side of a highway or part of highway beyond the building line fixed in respect of such highway by the Highway Authority from time to time;
- 2.26 "Courtyard or Chowk"** means a space permanently open to sky enclosed on sides fully or partially by buildings and may be at ground level or any other level within or adjacent to a building;
- 2.27 "Canopy"** means a projection over any entrance;
- 2.28 "Congested Area"** means the area shown as congested on the Regional/Development Plan;
- 2.29 "Convenience Shopping"** means shops for domestic needs each with carpet area not exceeding 20 sq.m.;
- 2.30 "Corridor"** means a common passage or circulation space including a common entrance hall;
- 2.31 "Detached Building"** means a building whose walls and roofs are independent of any other building with marginal distances on all sides as specified;
- 2.32 "Development"** with its grammatical variations means the carrying out of buildings, engineering, mining or other operations in, or over, or under land or the making of any material change, in any building or land or in the use of any building or land or any material or structural change in any Heritage building or its precinct and includes demolition of any existing building, structure or erection of part of such building, structure of erection and reclamation, redevelopment and layout or sub-division of any land and to develop shall be construed accordingly;
- 2.33 "Regional/Development Plan"** means i) **Development Plan** :-"Development Plan" means a plan for the development of the area within the jurisdiction of a Planning Authority and includes revision of a development plan and proposals of a Special Planning Authority for development of land within its jurisdictions.
ii) **Regional Plan**:-"Regional Plan" means a plan for the development or redevelopment of a region which is approved by the State Government and has come into operation under Maharashtra Regional & Town Planning Act, 1966.
- 2.34 "Dwelling Unit /Tenement"** means an independent housing unit with separate facilities for living, cooking and sanitary requirements;

- 2.35 “Enclosed Stair- case”** means a staircase separated by fire resistant walls and door (s) from the rest of the building;
- 2.36 “Existing Building or Use”** means a building, structure or its use existing authorisedly;
- 2.37 “Exit”** means a passage, channel or means of egress from any building, storey or floor area to a street or other open space of safety;
- 2.37.1 “Vertical Exit”** means exit used for ascension or descension between two or more levels including stairways, smoke proof towers, ramps, escalators and fire escapes;
- 2.37.2 “Horizontal Exit”** means a protected opening through or around a firewall or a bridge connecting two buildings;
- 2.37.3 “Outside Exit”** means an exit from the building to a public way, to an open area leading to a public way, to an enclosed fire resistive passage to a public way;
- 2.39 “External Wall”** means an outer wall of a building, not being a party wall even though adjoining to a wall of another building and also means a wall abutting on an interior open space of any building;
- 2.40 “Escalator”** means a power driven, inclined, continuous stairway used for raising or lowering passengers;
- 2.41 “Fire and/ or Emergency Alarm System”** means an arrangement of call points or detectors, sounders and other equipments for the transmission and indication of alarm signals, for testing of circuits and, whenever required, for the operation of auxiliary services. This device may be workable automatically or manually to alert the occupants in the event of fire or other emergency;
- 2.42 “Fire lift”** means a lift specially designed for use by fire service personnel in the event of fire;
- 2.43 “Fire Proof Door”** means a door or shutter fitted to a wall opening, and constructed and erected with the requirement to check the transmission of heat and fire for a specified period;
- 2.44 “Fire Resisting Material”** means a material which has certain degree of fire resistance;
- 2.45 “Fire Resistance”** means the time during which a material fulfils its function of contributing to the fire safety of a building when subjected to prescribed conditions of heat and load or restraint. The fire resistance test of structures shall be done in accordance with "IS -3809 - 1966 Fire Resistance Test of Structures";
- 2.46 “Fire Separation”** means the distance in meters measured from any other building on the site, or from other site, or from the opposite side of a street or other public space to the building;
- 2.47 “Fire Service Inlets”** means a connection provided at the base of a building for pumping up water through in-built fire-fighting arrangements by fire service pumps in accordance with the recommendations of the Fire Services Authority;
- 2.48 “Fire Tower”** means an enclosed staircase which can only be approached from the various floors through landings or lobbies separated from both, the floor areas and the staircase by fire resisting doors and open to the outer air;
- 2.49 “Floor”** means the lower surface in a storey on which one normally walks in a building. The general term floor unless otherwise specifically mentioned shall not refer to a mezzanine floor;

Note - The sequential numbering of floor shall be determined by its relation to the determining entrance level. For floor at or above ground level, with direct entrance from / to road or street shall be termed as ground floor. The other floors above ground floor shall be numbered in sequence as Floor 1, Floor 2, etc., with the number increasing upwards. The stilt shall be termed as stilt floor or Stilt floor 1, Stilt floor 2 etc. and floors above shall be numbered as Floor 1, Floor 2, etc.,

2.50 “Floor space index (F. S. I)” means the quotient obtained by dividing the total built-up area on all floors, excluding exempted areas as given in Regulation no.17.7 by the area of the plot;

$$\text{F.S.I.} = \frac{\text{Total built-up area on all floors}}{\text{Plot area}}$$

- 2.51 “Premium FSI”** means the FSI that may be available on payment of premium as may be prescribed under these regulation;
- 2.52 “Fitness centre”** means and includes the built up premises, including toilet facilities, provided in the building including gymnasium for the benefit of its inmates and for the purpose of fitness, physical exercises, yoga and such other activities as may be permitted by the Commissioner from time to time.
- 2.53 “Footing”** means a foundation unit constructed in brick work, masonry or concrete under the base of a wall or column for the purpose of distributing the load over a large area;
- 2.54 “Foundation”** means that part of the structure which is in direct contact with and transmitting loads to the ground;
- 2.55 “Front Margin”** means the distance between the boundary line of plot abutting the means of access/ road/ street and the building. In case of plots facing two or more means of accesses / roads / streets, the plot shall be deemed to front on all such means of access / road /streets;
- 2.56 “Gallery”** means an intermediate floor or platform projecting from a wall of an auditorium of a hall providing extra floor area, additional seating accommodation etc. These shall also include the structures provided for seating in stadia.
- 2.57 “Garage Private”** means a building or portion thereof, designed and used for parking of privately owned motor driven or other vehicles;
- 2.58 “Garage-Public”** means a building or portion thereof designed as other than a private garage, operated for gain, designed or used for repairing, servicing, hiring, selling or storing or parking motor driven or other vehicles.;
- 2.59 “Group Housing Scheme”** means a building or a group of buildings constructed or to be constructed with one or more floors, consisting of more than one dwelling units and having common service facilities. Common service facilities means facilities like stair case, balcony, corridor, and veranda, lift, etc;
- 2.60 “Ground Level”** means the average level of ground in a plot (Site);
- 2.61 “Guest house”** means a premise for housing the staff of Government, semi –government, public undertaking and private limited company for short duration.
- 2.62 “Habitable Room”** means, a room constructed or intended for human habitation;
- 2.63 “Home Occupation”** means occupation, other than an eating or a drinking place, offering services to the general public, customarily carried out by a member of the family residing on the premises without employing hired labour, and for which there is no display to indicate from the exterior of the building that it is being utilized in whole or in part for any purpose other than a residential or dwelling use, and in connection with which no article or service is sold or exhibited for sale except that which is produced therein, which shall be non-hazardous and not affecting the safety of the inhabitants of the building and the neighbourhood and provided that no mechanical equipment is used except for what is customarily used for purely domestic or household purposes and / or employing licensable goods;

- 2.64 “Information Technology Establishment (ITE)”** means an establishment which is in the business of developing either software or hardware relating to computers or computer technology as approved by Director of Industries;
- 2.65 “Ledge or Tand”** means a shelf like projection, supported in any manner whatsoever, except by vertical supports within a room itself but not having projection wider than 0.60m.;
- 2.66 “Licensed Engineer / Structural Engineer / Supervisor”** means a qualified Engineer/ Structural Engineer / Supervisor licensed by the Metropolitan Commissioner;
- 2.67 “Lift”** means an appliance designed to transport persons or materials between two or more levels in a vertical or substantially, vertical direction, by means of a guided car platform;
- 2.67.1 “Lift Well”** means an unobstructed space within an enclosure provided for the vertical movement of the lift car(s) and any counter weights, including the lift pit and the space for top clearance;
- 2.68 “Loft”** means, an intermediate floor between two floors, with a maximum height of 1.5 m., which is constructed and used for storage purpose, fully defined in regulation no. 18.5;
- 2.69 “Mall”** means a large enclosed shopping area;
- 2.70 “Marginal distance / Set back”** means a minimum distance required to be left open to sky between the boundary of the building plot and the building excluding court yard/chowk, which is an integral part of the plot;
- 2.71 “Mezzanine floor”** means an intermediate floor between two floors of any story, forming an integral part of floor below, overhanging or overlooking a floor beneath, not being a loft between the floor and the ceiling of any storey;
- 2.72 “Means of Access”** shall include the road/street/vehicular access way, pathway upto the plot and to the building within a plot;
- 2.73 “Net plot area”** means the area as per Regulation no.15.7;
- 2.74 “Newly merged area”** means area included in the jurisdiction of PMRDA.
- 2.75 “Non-Combustible Material”** means a material which does not burn nor add heat to a fire when tested for combustibility in accordance with IS: 3808 – 1966 _Method of Test for Combustibility of Building Materials‘;
- 2.76 “Non-conforming User”** means any lawful use / building existed on the Site but which does not conform to the zoning shown on the Regional/Development Plan;
- 2.77 “Occupancy or Use Group”** means the principal occupancy or use for which a building or a part of a building is used, or intended to be used, for the purposes of classification of a building according to the occupancy. Occupancy shall be deemed to include subsidiary occupancies which are contingent upon it. Buildings with mixed occupancies are those buildings in which more than one occupancy are present in different portions of the building. The occupancy classification shall have the meaning given from **2.77.1 to 2.77.13**;
- 2.77.1 “Residential Buildings”** means any building in which sleeping accommodation is provided for normal residential purposes with or without cooking or dining or both facilities. It includes one or two or multi-family dwellings, lodging or rooming houses, residential hotels, hostels, dormitories, dharmshalas, apartment houses, flats, service apartment, studio apartment and private garages incidental thereto;

- 2.77.2 “Educational Buildings”** means a building exclusively used for a school or college recognized by the appropriate Board or University, or any other competent authority involving assembly for instruction, education or recreation incidental to educational use, and including a building for such other users incidental thereto such as library, a research institution. It shall also include quarters for essential staff required to reside in the premises and a building used as a hostel attached to an educational institution whether situated in its campus or not and, also includes buildings used for day-care purposes more than 8 hours per week;
- 2.77.3 “Institutional Buildings”** means a building constructed or used by Government, Semi-Government organization or registered trusts or persons and used for medical or other treatment, or an auditorium or complex for cultural and allied activities or for an Hospice care of persons suffering from physical or mental illness, handicap, disease or infirmity, care of orphans, abandoned women, children and infants, convalescents, destitute or aged persons and for penal or correctional detention with restricted liberty of the inmates ordinarily providing sleeping accommodation, and includes hospitals, sanatoria, custodial and penal institutions such as jails, prisons, mental hospitals, houses of correctional detention and reformatories;
- 2.77.4 “Assembly Buildings”** means any building or part of building where groups of people congregate or gather for amusement, recreation or social, religious, patriotic, civil, travel and similar purposes, e.g. theatres, motion picture house, drive-in-theatres, multiplexes, assembly halls, city halls, town halls, auditoria, exhibition halls, museums, mangalkaryalaya, cultural centre, skating rinks, places of worship, dance theatres, club & gymkhana, passenger stations and terminals of air, surface and other public transportation services, recreation piers and stadia having built up area more than 1000 sq.m.;
- 2.77.5 “Business Buildings”** means any building or part of building, which is used for transaction of business for the keeping of accounts and records for similar purposes; offices, banks, professional establishments, I.T. establishments, call centre, offices for private entrepreneurs, court houses, libraries shall be classified in this group in so far as principal function of these is transaction of public business and the keeping of books and records;
- 2.77.6 “Office Building / Premises”** means the premises whose sole or principal use is to be used as an office or for office purpose; —office purposes shall include the purpose of administration, clerical work, handling money, telephone/ telegraph/ computer operations and —clerical work shall include writing, book-keeping, sorting papers, typing, filing, duplicating, drawing of matter for publication and the editorial preparation of matter for publication;
- 2.77.7 “Mercantile (Commercial) Buildings”** means any building or part of a building, which is used as shops, stores, market, malls for display and sale of merchandise either wholesale or retail Office, storage and service facilities incidental to the sale of merchandise and located in the same building shall be included under this group;
- 2.77.8 “Public-Semi-public Building”** means a building constructed or used by Government, Semi Government Organization, Government Undertaking, Local Authorities, for conducting public semi-public use like municipal office, post office, telephone office, etc.;
- 2.77.9 “Wholesale Establishments”** means an establishments wholly or partly engaged in wholesale trade, manufactures, wholesale outlets including related storage facilities, A.P.M.C. establishments, warehouses and establishments engaged in truck transport including truck transport booking agencies;

- 2.77.10 “Industrial Buildings”** means any building or part of a building or structure, in which products or materials of all kinds and properties are fabricated, assembled or processed like assembling plants, laboratories, power plants, smoke houses, refineries, gas plants, mills, dairies, factories etc.;
- 2.77.11 “Storage Buildings”** means any building or part of a building used primarily for the storage or sheltering of goods, wares or merchandise, like ware houses, cold storage, freight depots, transit sheds, godowns, store houses, public garages, hangars, truck terminals, grain elevators, barns and stables;
- 2.77.12 “Hazardous Buildings”** means any building or: part of a building which is used for the storage, handling, manufacture or processing of highly combustible or explosive materials or products which are liable to burn with extreme rapidity and / or which may produce poisonous gases or explosions during storage, handling, manufacturing or processing, which involve highly corrosive, toxic or noxious alkalis, acids or other liquids or chemicals producing flames, fumes and explosive, mixtures of dust or which result in the division of matter into fine particles subject to spontaneous ignition;
- 2.77.13 “Special Buildings”** means
- (i) multi-storied buildings for any user having height more than 15 meter in height measured from ground; or,
 - (ii) buildings for the purposes of educational, assembly, mercantile, institutional, public and semi-public, industrial, storage and for hazardous material, buildings having built-up area more than 500 sq. m on each any floor, irrespective of the height of the building; or,
 - (iii) multi-storied buildings for any user having mixed occupancies, with any of the aforesaid occupancies mentioned in (ii) above, having built-up area more than 500 sq. m on each floor;
- 2.78 “Owner”** means a person who has legal title for land or building;
- 2.79 “Parapet”** means a low wall or railing built along the edge of a roof, terraces, balcony, veranda etc.;
- 2.80 “Parking Space”** means an enclosed or unenclosed, covered or open area sufficient in size to park vehicles. Parking space shall be served by a driveway connecting them with a street or alley and permitting ingress or egress of vehicles;
- 2.81 “Permit / Permission”** means a permission or authorisation in writing by the Authority to carry out the work regulated by these Regulations;
- 2.82 “Plinth”** means a portion of a structure between the surface of the surrounding ground and surface of the floor immediately above the ground;
- 2.83 “Plot / Site”** means a parcel or piece of land enclosed by definite boundaries;
- 2.84 “Porch”** means a covered surface supported on pillars or otherwise for the purpose of pedestrian or vehicular approach to a building;
- 2.85 “Podium”** means a continuous projecting base or pedestal around a building, generally used for parking and movement of vehicles, as specified in these regulations;
- 2.86 “Recreational Open Space / Layout open space”** means a statutory common open space kept in any layout or group housing scheme or campus planning, exclusive of margins and approaches, on ground only;

- 2.87 “Record Plan”** means a Plan to be prepared and submitted to the authority on basis of which a final occupancy certificate is issued.;
- 2.88 “Restaurant”** means a premises used for serving food items on commercial basis including cooking facilities and seating arrangements in residential building. And for commercial premises restaurant may be allowed of any built up area situated on any floor with a separate parking and garbage disposal facility.
- 2.89 “Road / Street”** means any highway, street, lane, pathway, alley, stairway, passageway, carriageway, footway, square place or bridge, whether a thoroughfare or not, over which the public have a right of passage or access or have passed and had access uninterruptedly for a specified period, whether existing or proposed in any scheme, and includes all bunds, channels, ditches, storm-water drains, culverts, sidewalks, traffic islands, roadside trees and hedges, retaining walls, fences, barriers and railings within the street lines;
- 2.90 “Road / Street Line”** means the line defining the side limit of a road / street;
- 2.91 “Road/Street Level or Grade”** means the officially established elevation or grade of the centre line of the street upon which a plot fronts and if there is no officially established grade, the existing grade of the street at its mid – points.
- 2.92 “Room Height”** means the vertical distance measured from the finished floor surface to the finished ceiling/ slab surface. In case of pitched roofs, the room height shall be the average height between bottom of the eaves and bottom of ridge;
- 2.93 “Row Housing”** means a row of houses with front and rear marginal distances;
- 2.94 “Semi Detached Building”** means a building detached on three sides with marginal distances as specified;
- 2.95 “Service Apartment”** means a premise in which rooms are let out on short/long term basis.;
- 2.96 “Service Floor”** means a non-habitable floor generally provided in multi-storied buildings and especially in starred hotels where from services like water supply, sewerage disposal system, electricity etc. are co-ordinated/maintained. Height of such floor shall not be more than 1.8m. from floor level to soffit of outer beam and shall not be counted in FSI.
- 2.97 “Site, corner”** means a site at the junction of and fronting on two or more intersecting streets;
- 2.98 “Site, Depth of”** means the mean horizontal distance between the front and rear side boundaries;
- 2.99 “Site, Double Frontage”** means a site, having a frontage on two streets other than a corner plot;
- 2.100 “Site, Interior or Tandem”** means a site, access to which is by a passage from a street whether such passage forms part of the site or not;
- 2.101 “Smoke Stop Door”** means a door for preventing or checking the spread of smoke from one area to another;
- 2.102 “Stair Cover”** means a structure with a covering roof over a stair case and its landing built to enclose only the stair for the purpose of providing protection from weather and not used for human habitation;

- 2.103 “Stilts or Stilt Floors”** means the portion of a building above ground level consisting of structural column supporting the super structure with at least two sides open and without any enclosures for the purpose of parking vehicles, scooters, cycles, etc.;
- 2.104 “Store Room”** means a room used as storage space;
- 2.105 “Storey”** means the portion of a building included between the surface of any floor and the surface of the floor next above it, or if there be no floor above it, then the space between any floor and the ceiling next above it;
- 2.106 "Supported Double Height Terrace"** means open terraces with railing having minimum height equal to two floors within building line.
- 2.107 “Telecommunication Cell Site/Base Station (TCS/BS)”** means tower of requisite height and dimensions, delta, single pole antennae, microwave antenna, cabin of requisite dimensions for housing equipment, telecom transceiver machinery, related civil work, requisite wires and cables, power supply equipment, Diesel Generator (DG) Set/ Alternate power supply mechanism, cabin /cupboard for housing any or all of the aforesaid items as necessary;
- 2.108 “Tenement”** means an independent dwelling unit with a kitchen or cooking alcove;
- 2.109 “Terrace”** means a flat, open to sky roof of a building or a part of a building having parapet;
- 2.110 “To Erect” - To erect a building means**
- (a) to erect a new building on any site whether previously built upon or not;
 - (b) to re-erect any building of which portions above the plinth level have been pulled down, burnt or destroyed; and
 - (c) conversion from one occupancy to another;
- 2.111 “Travel Distance”** means the distance from the remotest point on a floor of a building to a place of safety, be it a vertical exit, horizontal exit or an outside exit measured along the line of travel;
- 2.112 “Tower like structure”** means a structure in which the height of the tower like portion is at least twice the width of the broader base;
- 2.113 “Unsafe Building”** means those buildings which are structurally unsafe, unsanitary or not provided with adequate means of ingress or egress which constitute a fire hazard or are otherwise dangerous to human life or which in relation to existing use constitute a hazard to safety or health or public welfare, by reason of inadequate maintenance, dilapidation or abandonment;
- 2.114 “Veranda”** means a covered area with at least one side open to the outside with the exception of 1 m. high parapet on the ground floor to be provided on the open side;
- 2.115 “Water Closet (WC)”** means a privy with arrangement for flushing the pan with water. It does not include a bathroom;
- 2.116 “Water Course”** means a natural channel or an artificial one formed by draining or diversion of a natural channel meant for carrying storm water and waste water;
- “Major Water Course”** means a water course which carried strong water discharging from a contributing area of not less than 160 Ha.;
- “Minor Water Course”** means a water course which is not major;

- 2.117 “Width of Road”** means the whole extent of space within the boundaries of road when applied to a new road, as laid down in the city surveys map or Regional/Development Plan or prescribed road lines by any Act or Law and measured at right angles to the course or intended course of direction of such road whichever is more;
- 2.118 “Window”** means an opening to the outside other than the door which provides all or part of the required natural light, ventilation or both, to the interior space;

3.0 APPLICABILITY OF REGULATIONS

- 3.1** These regulations shall apply to all development, redevelopment, erection and/or re-erection of a building, change of user etc. as well as to the design, construction or reconstruction of, and additions and alteration to a building. These regulations shall also apply to any revision of the development permissions/building permissions granted earlier under any Development Control Regulations. Further, these Regulations shall apply to development work defined in Regulation No.3.2 to 3.5. However, features approved by earlier permission shall remain intact unless it contradicts the provisions of FSI under these regulations.
- 3.2 Construction/ Part Construction** - Where the whole or part of a building is demolished or altered or reconstructed, removed, except where otherwise specifically stipulated, or part is proposed to be newly constructed or revised, these Regulations apply only to the extent of the work involved.
- 3.3 Change of Occupancy / User:** -Where the occupancy or the user of a building is changed, except where otherwise specifically stipulated, these Regulations shall apply to all parts of the building affected by the change.
- 3.4 Reconstruction** - The reconstruction, in whole or part of a building which has ceased to exist due to an accidental fire, natural collapse or demolition, having been declared unsafe, or which is likely to be demolished by or under an order of the PMRDA and for which the necessary certificate has been given by the PMRDA, shall be allowed subject to the provisions in these Regulations.
- 3.5 Revised permission** – Any development permission granted earlier may be revised. While granting the revised permission, the approved plans and commencement certificate of the earlier permission with the owner and office, shall be stamped as **‘CANCELLED’** by the Authority.
- 3.6 Development of sites or land sub-division or amalgamation of land** –Where land is to be developed, sub-divided or two or more plot are to be amalgamated or a layout is to be prepared, these Regulations shall apply to the entire area under development, sub-division, amalgamation and layout.

Provided that, where a part of an existing layout is being altered, these regulations shall apply only to that part which is being altered, without adversely affecting the requirement of layout roads, recreational open space, etc of earlier sanctioned layout.

4.0 INTERPRETATION

Section of general clauses Act, 1897 shall be applicable in case of standard terms and phrases as defined and interpreted therein.

- 4.1** In these Regulations, the use of present tense includes the future tense, the masculine gender includes the feminine and the neutral, the singular number includes the plural and the plural includes the singular. The word "person" includes a corporation/company, "—writing" includes "printing and typing" and "signature" includes thumb impression made by a person who cannot write if his name is written near such thumb impression or digital signature in case of ‘e’ submissions.

- 4.2** Whenever sizes and dimensions of rooms and spaces within buildings are specified, they shall mean clear dimensions unless otherwise specified in these Regulations. However, sizes and dimensions may not be disputed with reference to finished/unfinished surfaces unless it differs overall dimensions of the building.

5.0 DEVELOPMENT PERMISSION AND COMMENCEMENT CERTIFICATE

- 5.1** No person shall carry out any development, in contravention of the Development Plan proposals.
- 5.2** No person shall carry out any development work including development of land by laying out into suitable plots or amalgamation of plots or development of any land as group housing scheme or to erect, re-erect or make alterations or demolish any building or cause the same to be done without first obtaining a separate building permit / commencement certificate for each such development work / building from the Metropolitan Commissioner.
- 5.3** No temporary construction shall be carried out without obtaining prior approval of the Metropolitan Commissioner, which may be granted subject to such conditions as may be deemed necessary by him. However, temporary site office/watchman cabin/labour- material shed/toilet may be constructed without permission after the development permission is granted. These temporary constructions shall be removed after the completion of construction under development permission.

5.4 Development undertaken on behalf of Government -

As per the provisions of Section 58 of The Maharashtra Regional and Town Planning Act, 1966, the office in-charge of the Government Department shall inform in writing to the Metropolitan Commissioner of the intention to carry out its purpose along with details of such development or construction as specified below :-

- i) An official letter by the authorised officer of Government Department addressed to the Metropolitan Commissioner, giving full particulars of the development work or any operational construction.
- ii) Ownership documents and measurement plan issued by the Competent Authority of Land Records Department.
- iii) Development / building plans conforming to the provisions of Regional/Development Plan and these Regulations for the proposed development work to the scale specified in these Regulations.
- iv) The proposals of the Regional/Development Plan or Town Planning Scheme affecting the land.
- v) A Site Plan of the area proposed to be developed to the scale.
- vi) Detailed plan showing the plan, sections and elevations of the proposed development work to the scale, including existing building specified either to be retained or to be demolished.

- 5.4.1** The operational construction of the Government or Government undertaking, whether temporary or permanent which is necessary for the operation, maintenance, development or execution of any of the following services shall be exempted from the provisions of these Regulations:-

- i) Railways;
- ii) National Highways;
- iii) National Waterways;
- iv) Airways and Aerodromes;
- v) Posts and Telegraphs, telephones, wireless, broadcasting and other like forms of communication, excluding mobile towers;
- vi) Regional grid for electricity;
- vii) Defence Authorities;

viii) Any other essential public service as may be notified by the State Government.

All such constructions shall however, conform to the prescribed requirements for the provision of essential services, water supply connection, drains, etc.

5.4.2 However the following constructions of the Government Departments do not come under the purview of operational construction for the purpose of exemption under Regulation no.5.4.1.

- i) New residential building (other than gate lodges, quarters for limited essential operational staff and the like), roads and drains in railway colonies, hospitals, clubs, institutes and schools in case of Railways and commercial development;
- ii) New building, new construction or new installation or any extension thereof, in case of any other services.

5.4.3 However, no permission shall be necessary for the following types of works:-

- i) The carrying out of any works by the Central or State Government or any public sector undertaking or any local authority-
 - (a) required for the maintenance or improvement of highway, road or public street, being works carried out on land within the boundaries of such highway, road or public street; or
 - (b) required for the purpose of inspecting, repairing or renewing any drains, sewers mains, pipes including gas pipes, telephone and electric cables, or other apparatus including the breaking open of any street, or other land for the purpose.
Provided that the concerned authority shall inform the local authority, in writing at the earliest and pay the necessary restoration charges to the PMRDA within a month. The restoration charges shall not be more than the expenditure incurred by the PMRDA to restore the road etc and supervision charges, if any.
- ii) The carrying out of works in compliance with any order or direction made by any Authority under any law for time being in force
- iii) The carrying out of works by any Authority in exercise of its powers under any law for time being in force.
- iv) The excavation (including excavation of wells) made in the ordinary course of agricultural operation.
- v) The construction of a road intended to give access to land solely for agricultural purpose.
- vi) Normal use of land which has been used temporarily for other purposes like marriage pandals or for festive occasions; and
- vii) In case of land normally used for one purpose and occasionally used for any other purpose, such occasional use of land for that other purpose.

6.0 PROCEDURE FOR OBTAINING DEVELOPMENT PERMISSION /BUILDING PERMISSION (COMMENCEMENT CERTIFICATE)

6.1 Notice/ Application - Every person who intends to carry out development and erect, re-erect or make alterations in any place in a building or demolish any building, shall give notice/ application in writing through registered Architect or Licensed Engineer / Structural Engineer / Supervisor, to the Authority of his said intention in the prescribed form (See Appendix A1 or A2)It will be mandatory to submit complete information in the form accompanied with Appendix A-1 and A-2.Such notice shall be accompanied by the payment receipt of required scrutiny fee and any other fee/ charges prescribed by the Metropolitan Commissioner from time to time and the plans and statements in sufficient copies (See Regulation no. 6.1.1), and as per the requirement under Regulation no.6.2 and 6.3. One set of plans shall be retained in the office of the Metropolitan Commissioner for record after the issue of permission or refusal. The plans may be submitted in electronic form as may be specified by the Metropolitan Commissioner from time to time.

Provided that, the applicant owner/developer shall have an option of choosing the process of approvals of Building Permission on Fast Track based on Risk Based categorization as mentioned in Appendix-U.

6.1.1 Copies of Plans and Statements - Four copies of plans and statements shall be made available along with the notice. Where clearance is required from other agencies, number of copies of plans required shall be as decided by the Metropolitan Commissioner.

6.2 Information Accompanying Notice/Application - The Notice/Application shall be accompanied with the key (location plan), site plan, sub-division layout plan/ building plan, services plans, specifications and certificate of supervision and ownership title etc., as prescribed in Regulation no.6.2.1 to 6.2.13.

6.2.1 Size of drawing sheets and colouring of plans.

6.2.1.1 The size of drawing sheets shall be of A0 to A4. If necessary, submission of plans on sheets bigger than A0 size shall also be permissible. Prints of plans shall be on one side of paper only. All dimensions shall be indicated in metric units.

6.2.1.2 Colouring Notations for Plans: - The Plans shall be coloured as specified in following Table:

**Table No.1
COLOURING OF PLANS**

Sr. No.	Item	Site Plan		Building Plan	
		White Plan	Ammonia	White Plan	Ammonia Print
(1)	(2)	(3)	(4)	(5)	(6)
1.	Plot lines	Thick Black	Thick Black	Thick Black	Thick Black
2.	Existing Street	Black	Blue
3.	Future street if any	Black dotted	Blue dotted
4.	Permissible Building lines	Thick dotted black	Thick dotted blue
5.	Existing work	Black (outline)	Blue	Black	Blue
6.	Work proposed to be demolished	Yellow hatched	Yellow hatched	Yellow hatched	Yellow hatched
7.	Proposed work	Red filled in	Red	Red	Red
8.	Drainage & sewerage work	Red dotted	Red dotted	Red dotted	Red dotted
9.	Water supply work	Black dotted thin	Black dotted thin	Black dotted thin	Black dotted thin
10.	Deviations from the sanctioned plan	Red hatched	Red hatched	Red hatched	Red hatched
Note:-	For land development/sub-division/layout/building plan, suitable colouring notations shall be used which shall be indexed.				

6.2.2 Ownership title and area - Every application for development permission and commencement certificate shall be accompanied by the following documents for verifying the ownership and area etc. of the land:-

- a) Latest Property card(s) or 7/12 extract(s) of a date not more than one month prior to the

date of submission, power of attorney, wherever applicable.

- b) Measurement Plan of the property issued by Land Record Department.
- c) Statement of area of the holding by triangulation method /CAD (computer added designs and drafting based software) from the qualified licensed technical personnel or architect with an affidavit from the owner with regard to the area in the form prescribed by the Metropolitan Commissioner.
- d) Any other document prescribed by the Metropolitan Commissioner.
- e) Wherever third party interest is created by way of agreement to sale or mortgage etc. the registered consent of such interested persons shall be submitted with the application.
- f) A certified copy of approved sub-division / amalgamation / layout of land from the concerned authority.
- g) In the case of land leased by the Government or local authorities, no objection certificate of Government or such authorities shall be obtained if there is deviation from lease conditions and shall be attached to the application for development permission in respect of such land.

6.2.3 Key Plan or Location Plan - A key plan drawn to a scale of not less than 1:10,000 shall be submitted as a part of building plan / development proposal along with the application for a building permit and commencement certificate; showing the boundary and location of the site with respect to neighbourhood landmarks or with respect to the area within the radius of 200 m. from the site, whichever is more.

6.2.4 Site Plan - The site plan shall be submitted with an application for building permission drawn to a scale of 1:500 or more as may be decided by the Metropolitan Commissioner. This plan shall be based on the measurement plan duly authenticated by the appropriate officer of the Department of Land Records. This plan shall have the following details:-

- a) The boundaries of the site and of any contiguous land belonging to the neighbouring owners;
- b) The position of the site in relation to neighbouring streets;
- c) The name of the street, if any, from which the building is proposed to derive access;
- d) All existing buildings contained in the site with their names (where the buildings are given names) and their property numbers;
- e) The position of the building and of other buildings, if any, which the applicant intends to erect, upon his contiguous land referred to in (a) above in relation to:
 - (i) The boundaries of the site and, in a case where the site has been partitioned, the boundaries of the portions owned by others;
 - (ii) All adjacent streets, buildings (with number of storeys and height) and premises within a distance of 12 m. of the work site and of the contiguous land (if any) referred to in (a)
- f) The means of access from the street to the building and to all other buildings (if any) which the applicant intends to erect upon.
- g) The space to be left around the building to secure free circulation of air, admission of light and access;
- h) The width of the street (if any) in front and the street (if any) at the side of or near the building, including the proposed roads;
- i) The direction of the north line relative to the plan of the building;

- j) Any existing physical features, such as wells, tanks, drains, pipe lines, high tension line, railway line, trees, etc.;
- k) The ground area of the whole property and the break-up of the built-up area on each floor;
- l) A plan indicating parking spaces as required and provided under these regulations;
- m) Overhead electric supply lines, if any, including space for electrical transformer / sub-station according to these regulations or as per the requirements of the electric distribution company.
- n) Any water course existing on Site or adjacent to site;
- o) Existing alignments of water supply and drainage line;
- p) Such other particulars as may be prescribed by the Metropolitan Commissioner.

6.2.5 (i) Sub-Division/ Layout Plan– In the case of development of land, the notice shall be accompanied by the sub-division/ layout plan which shall be drawn to a scale of not less than 1:500, however, for layout having areas of 4.0 ha. and above, the plan shall be drawn to a scale of not less than 1:1000, containing the following:

- (a) Scale used and north point;
- (b) The location of all proposed and existing roads with their existing /proposed widths within the land;
- (c) Dimension of plots;
- (d) The location of drains, sewers, public facilities and services, electrical lines, natural water courses, water bodies and streams etc.
- (e) Table indicating size, area and use of all plots in the sub-division/ layout plan;
- (f) The statement indicating the total area of the site, area utilized under roads, recreational open spaces, amenity spaces, playground, recreation spaces and Regional/Development Plan reservations/ roads, schools, shopping and other public places along with their percentage with reference to the total area of the site proposed to be sub-divided / laid out;
- (g) In case of plots which are sub-divided in built-up areas, in addition to the above, the means of access to the sub-division from existing streets;
- (h) Contour plan of site, wherever necessary.

(ii) Amalgamation Plan:-Where two or more plots / holdings are to be amalgamated, plan showing such amalgamation drawn to a scale not less than 1:500. Instead of submitting a separate plan, such amalgamation may be allowed to be shown on building / layout-plan itself. However, 7/12 extract or property card of amalgamated plot shall be submitted before occupation certificate.

6.2.6 Building Plan - The plans of the buildings with elevations and sections accompanying the notice shall be drawn to a scale of 1:100 or to a scale as may be directed by the Metropolitan Commissioner and shall

- a) include floor plans of all floors together with the built-up area, clearly indicating the sizes of rooms and the position and width of staircases, ramps and other exit ways, lift- wells, lift machine rooms and lift pit details. It shall also include ground floor plan as well as basement plans and shall indicate the details of parking spaces, loading and unloading spaces provided around and within building as also the access ways and the appurtenant open spaces with projections in dotted lines, distance from any building existing on the plot in figured dimensions along with accessory building;
- b) show the statement of built-up area and Carpet area of every flat or shop or any unit along with proportionate common built-up area attached to it and area of balcony and double

- height terraces, if any attached to the said unit;
- c) show the use or occupancy of all parts of the building;
- d) show exact location of essential services e.g. wc, sink, bath and the like;
- e) include sectional drawings of the building showing all sectional details including staircase;
- f) show all street elevations;
- g) give dimensions of the projected portions beyond the permissible building line;
- h) include terrace plan indicating the drainage and the slopes of the roof;
- i) give indications of the north point relative to the plans; and
- j) give dimensions and details of doors, windows and ventilators.
- k) give such other particulars as may be required to explain the proposal.

6.2.6.1 Building Plans for Special Buildings :-

The following additional information shall be furnished/indicated in the Building Plans of Special Building as mention in regulation no 2.77.13 in addition to the items (a) to (k) of Regulation no. 6.2.6.:-

- (a) access to fire appliances/vehicles with details of vehicular turning circle and clear motorable access way around the building of minimum 6 m. width;
- (b) size (width) of main and alternate staircases, wherever necessary, along with balcony approach, corridor, ventilated lobby approach;
- (c) location and details of lift enclosures;.
- (d) location and size of fire lift;
- (e) smoke stop lobby/door, where provided;
- (f) refuse chutes, refuse chamber, service duct, etc.;
- (g) vehicular parking spaces;
- (h) refuge area, if any;
- (i) details of Building Services :-Air-conditioning system with position of fire dampers, mechanical ventilation system, electrical services, boilers, gas pipes etc.,
- (j) details of exits including provision of ramps, etc. for hospitals and buildings requiring special fire protection measures,
- (k) location of generator, transformer and switch gear room;
- (l) smoke exhauster system, if any;
- (m) details of fire alarm system network;
- (n) location of centralized control, connecting all fire alarm systems, built in fire protection arrangements and public address system etc.
- (o) location and dimensions of static water storage tank and pump room along with fire service inlets for mobile pump and water storage tank;
- (p) location and details of fixed fire protection installations such as sprinklers, wet risers, hose reels, drenchers, CO2 installation etc.;
- (q) location and details of first aid, fire fighting equipment's /installations.
- (r) certificate of structural engineer about structural and earth-quake safety;

Provided that, the provision of fire escape stair case shall be made as per Regulation No.18.28.4

6.2.7 Service Plan - Plans, elevations and sections of water supply, grey water supply, sewage disposal system and details of building services, where required by the Metropolitan Commissioner, shall be made available on a scale not less than 1:100 in general and 1:1000 for layouts.

6.2.8 Supervision - The notice shall be further accompanied by a certificate of supervision in the prescribed form given in Appendix B, by a licensed Architect/ Engineer/ Structural Engineer, as

the case may be. In the event of the said licensed technical personnel ceasing to be employed for the development work, further development work shall stand suspended till a new licensed technical person is appointed.

6.2.9 Building/ Layout Permission Fee- The notice shall be accompanied by receipt of Building/ Layout Permission Fee. The building permission fee or layout /subdivision of land fees shall be as decided by the Metropolitan Commissioner from time to time. Provided that, such fees shall not be applicable for the development proposals implemented by Government / Government departments or Public Authorities of State or Central Government.

6.2.10 Development Charges- Development charges as required under Section 124A of the Act shall be deposited with the Planning Authority before issue of development permission/ commencement certificate. In case of revised permission where no development is carried out in pursuance of the earlier permission, amount of difference of development charges, if any, shall be levied and recovered. In case of revised permission, where development is commenced in pursuance of earlier permission, development charges shall be levied on the land and built-up area, over and above the area covered in the earlier permission.

6.2.11 Premium charges - Premium charges as may be required to be recovered under these regulations shall be paid to the Planning Authority before issue of development permission/ commencement certificate. The amount of premium collected shall be kept in a separate development fund called as **PMRDA Infrastructure fund'** and shall be utilized for the purpose of developing new/ up-gradation of infrastructure as well as implementation of Regional/Development Plan proposals and creation of civic amenities.

6.2.12 Tax clearance – Deleted

6.2.13 The notice/application shall be further accompanied by a certificate of supervision in the prescribed form as given in Appendix B, by a licensed Architect or Licensed Engineer / Structural Engineer / as the case may be. In the event of the said licensed technical personnel ceasing to be employed for the development work, further development work shall stand suspended till a new licensed technical person is appointed

6.3 Signing the Plan -

All the plans shall be duly signed by the owner, co-owner, if any, and the Architect or Licensed Engineer / Structural Engineer / Supervisor and shall indicate his name, address and license number allotted by the Authority.

6.4 Qualification and Competence of the Architect / Licensed Engineer / Structural Engineer/ Supervisor -

Architect/ Engineer/Structural Engineer/ Supervisor referred to in regulation no 6.3 shall be registered / licensed by the Metropolitan Commissioner as competent to plan and carry out various works as given in Appendix "C". The qualification and procedure for registration and licensing of the Engineer / Structural Engineer / Supervisor / Developer shall be as given in **Appendix- "C"**. Architects registered with council of Architecture shall not be required to register with the Authority.

6.5 Discretionary Powers:-

6.5.1 Interpretation.

In conformity with the intent and spirit of these regulations, the Metropolitan Commissioner may by order in writing -;

- (i) decide on matters where it is alleged that there is an error in any order, requirement decision, and determination on interpretation made by him or officer authorised by him in the

application of these regulations.

- (ii) decide the extent of the proposal of regional/development plan with respect to survey number, where boundaries of the survey number shown on development plan varies with the boundaries as per revenue record/ measurement plan/ city survey sheets.
- (iii) determine and establish the location of zonal boundaries in exceptional cases, or in cases of doubt or controversy;
- (iv) decide the alignment of regional/development plan road, where the street layout actually on the ground varies from the street layout as shown on the Regional/Development Plan;
- (v) decide the alignment of blue and red flood line on Regional/development plan where it varies with the said lines given by the irrigation department or any other Government institutions dealing with the subject, from time to time;
- (vi) authorise erection of a building or use of premises for a public service undertaking for public utility purposes only, where he finds such authorisation to be reasonably necessary for the public convenience and welfare, even if it is not permitted in any Land Use Classification,
- (vii) modify the limit of a zone where the boundary line of the zone divides the plot. In such cases, the zone over the larger portion of the plot having area more 50% shall be considered.

6.5.2 Relaxation:

In specific cases, where a clearly demonstrable hardship is caused, the Metropolitan Commissioner by order in writing and subject to payment of premium; if any, may permit any of the dimensions / provision prescribed by these regulations to be modified provided the relaxation sought does not violate the health safety, fire safety, structural safety and public safety of the inhabitants of the buildings and the neighbourhood. However, no relaxation for the setback required from the road boundary (front marginal distance), F.S.I. or minimum required parking shall be granted under any circumstances, unless otherwise specified in these regulations.

While granting such relaxation, conditions may be imposed on size, cost or duration of the structure, abrogation of claim of compensation, payment of deposit and its forfeiture for noncompliance.

6.5.3 Temporary Constructions- The Metropolitan Commissioner may grant permission for temporary construction for a period not exceeding six months at a time and in the aggregate not exceeding for a period of one year, such a permission may be given by him for the construction of the following, viz.: -

- (i) Structures for protection from the rain or covering of the terraces during the monsoon only.
- (ii) Pandals for fairs, ceremonies, religious function, etc.
- (iii) Structures for godowns/storage of construction materials within the site.
- (iv) Temporary site offices and watchman chowkies within the site only during the phase of construction of the main building.
- (v) Structures of exhibitions/ circuses etc.
- (vi) Structures for storage of machinery, before installation for factories in industrial lands within the site.
- (vii) Structures for ancillary works for quarrying operations in conforming zones.
- (viii) Government milk booths , telephone booths and ATM Centers.
- (ix) Transit accommodation for persons to be rehabilitated in a new construction.
- (x) Structures for educational and medical facilities within the site of the proposed building during the phase of planning and constructing the said permanent buildings.

(xi) Ready mix concrete plant.

Provided that, temporary constructions for structures etc. mentioned at (iii), (iv), (vi), (ix) (x) and (xi) may be permitted to be continued temporarily by the Metropolitan Commissioner, but in any case not beyond completion of construction of the main structure or building and that structure in (vii) and (viii) may be continued on annual renewal basis by the Metropolitan Commissioner beyond a period of one year.

6.5.4 Delegation of Powers- Except the discretionary powers, and where the Metropolitan Commissioner's special permission is expressly stipulated, the powers or functions vested in him/her by these Regulations may be delegated to any official under his/her control, subject to his/her revision if necessary and to such conditions and limitations, if any, as he/she may prescribe.

6.5.5 Drafting error –Draftsman errors which are required to be corrected as per actual situation on site or as per the city survey record or sanctioned layout etc. may be corrected by the Metropolitan Commissioner, after consultation with the Director of Town Planning, Maharashtra State, Pune. The 'draftsman's errors' shall include errors on Regional / Development Plan in respect of typographical errors in S.No./G.No./C.T.S. No./F.P.No., errors in boundaries of such land parcels, errors in showing alignment of existing Nalas, river, canal, lake and like water bodies, etc. by taking into account a Revenue/Land Record or as the case may be, the record of concerned Town Planning Scheme.

6.6 Grant or Refusal of permission

6.6.1 After receipt of the notice/ application as mentioned in Regulation No. 6.1 above, the Authority may either sanction or refuse the plans or may sanction them with such modifications or directions as it may deem necessary after having recovered the necessary charges and there upon shall communicate its decision to the person giving the notice in the prescribed form given in Appendix D1/D2/D3 and E1/E2 as the case may be. Such approval shall also be deemed to have been granted under relevant provisions of the PMRDA.

6.6.2 (i) In case of special buildings, the building scheme shall also be subject to the norms of Maharashtra Fire Prevention and Life Safety Act, 2006 and shall also be subject to the scrutiny of the Chief Fire Officer, of the PMRDA and the sanction / development permission shall be issued by the Metropolitan Commissioner after the clearance from the Chief Fire Officer of the PMRDA.

(ii) In case of land subdivision or plotted layout, tentative layout shall be recommended for demarcation at first instance. After having demarcated the layout by the Land Records Department, the owner shall submit the demarcated layout for final approval to the Authority and the Authority shall examine the provision laid down in Regulation no.6.8 and grant final approval if it is in accordance with the layout recommended for demarcation and confirming to the regulations. This shall also be mandatory to Group Housing Scheme where roads in the adjoining layouts/Regional Plan/ Development Plan roads are to be coordinated and/or amenity space is to be earmarked.

6.6.3 If within sixty (60) days of receipt of the notice, the Authority fails to intimate in writing to the person who has given the notice, of its refusal or sanction or sanction with such modifications or directions, the notice with its plans and statements shall be deemed to have been sanctioned.

Provided, nothing shall be construed to authorise any person to do anything on the site of the work in contravention or against the terms of lease or titles of the land.

Provided further that, the development proposal, for which the permission was applied for, is

strictly in conformity with the requirements of provisions of these regulations, or regulations framed in this behalf under any law for the time being in force and the same in no way violates either provisions of any draft or final plan or proposals published by means of notice, submitted for sanction under the Act.

Provided further that, any development carried out in pursuance of such deemed permission which is in contravention of the provisions mentioned above, shall be deemed to be an unauthorised development for purposes of Sections 52 to 57 of the Maharashtra Regional and Town Planning Act, 1966 and other relevant Acts.

Provided further that, upon receipt of intimation of any claim for deemed permission, the Authority shall within fifteen days from the date of receipt of such claim, communicate its remarks, if any, regarding deemed permission to the applicant, failing which, the proposal shall be approved and commencement certificate and one set of duly approved plans for proposed development shall be issued to the applicant within fifteen days thereafter.

Provided further that, necessary explanation shall be called from the concerned officer of the Authority for not processing and disposing of the proposal within 60 days.

- 6.6.4** After the plan has been scrutinised and objections have been pointed out, the owner giving notice shall modify the plan, comply with the objections raised and resubmit it. The prints of plans submitted for final approval, shall not contain superimposed corrections. The authority shall grant or refuse the commencement certificate / building permit within 60 days from the date of resubmission. No new objections shall be raised when they are resubmitted after compliance of earlier objections, except in circumstances to be quoted for additional compliances.

6.7 Commencement of work

The commencement certificate/development permission shall remain valid for 4 years in the aggregate but shall have to be renewed every year from the date of its issue. The application for renewal shall be made before expiry of one year if the work is not already commenced. Such renewal can be done for three consecutive terms of one year after which proposals shall have to be submitted to obtain development permission afresh. If application for renewal is made after expiry of the stipulated period during which commencement certificate is valid, then the Authority may condone the delay for submission of application for renewal by charging necessary fees; but in any case, commencement certificate shall not be renewed beyond 4 years from the date of commencement certificate/ development permission.

Provided that, no such renewal shall be necessary if the work is commenced within the period of valid permission and such permission shall remain valid till the work is completed.

For the purpose of this regulation, "**Commencement**" shall mean as under: -

(a)	For layout, sub-division and amalgamation	Final demarcation and provision of water bound macadam roads complete.
(b)	For a building work including additions and alterations.	Construction of basement upto ground level slab or construction of building at plinth level whichever is minimum.
(c)	For bridges and overhead tanks construction.	Foundation and work up to the base floor.
(d)	For underground works	Foundation and work upto floor of underground floor.

- 6.8** In case of land subdivision / group housing schemes, it shall be the responsibility of the owner / developer to construct all infrastructure including roads with asphaltting, storm water drains, sewer lines, water supply lines, development of recreational open spaces etc. In case of land subdivision, these works shall generally be completed within two years and phase wise building

permission shall be granted depending upon the percentage of infrastructure work completed. The layout plots should be released for construction in stages according to infrastructure work completed. The condition to that effect shall be incorporated in the commencement certificate. In case of group housing scheme, these works shall be completed before completion of the project and occupancy certificate shall be granted phase wise as per completion of infrastructure work.

After handing over roads and infrastructure to the PMRDA on completion of scheme, the responsibility of maintenance of such road and infrastructure shall lie with the PMRDA.

7.0 PROCEDURE DURING CONSTRUCTION

7.1 Owner / Architect / Developer / Engineer / Structural Engineer / Supervisor or any licensed Technical persons' liability: - Neither the grant of permission nor approval of the drawing nor inspection by the Authority during erection of the building, shall in any way relieve the Owner / Architect / Developer / Engineer / Structural Engineer / Supervisor or any licensed Technical persons of such building / development, from full responsibility for carrying out the work in accordance with these Regulations and safety norms as prescribed by the Bureau of Indian Standards.

7.2 Documents at site –

- (i) **Development Permission:** The person to whom a development permission is issued shall during construction, keep -
 - (a) posted at a conspicuous place on the site for which permission has been issued, a copy of a development permission; and
 - (b) a copy of the approved drawings on the site for which the permission was granted.
- (ii) **Display board:** Display board mentioning name of the owner, name of architect, name of structural engineer, except for small individual plot holders.

7.3.1 Plinth Checking- the owner shall give notice in prescribed form given in Appendix-F to the Authority after the completion of work upto plinth level with a view to enable the Authority to ensure that the work is carried out in accordance with the sanctioned plans. The Authority shall carry out inspection jointly with Architect / liasoning technical person within 7 days from the receipt of such notice and decide the application. If it is sanctioned then, the Authority shall grant such certificate as prescribed in Appendix-G.

Provided that, if the Authority has not taken decision on such application within a period as stipulated above, the permission shall be deemed to have been granted. In such circumstances, the applicant shall get the plinth checked from the registered Technical Personnel along with correctness certificate and submit it to the Authority for record. Thereafter no separate permission shall be required from the Authority for continuing of work. Such certificate shall clearly indicate the correctness of execution of plinth on site in consonance with the sanctioned plan.

7.3.2 Deviation during constructions-If during construction of a building any departure of a substantial nature from the sanctioned plans is intended by way of internal or external additions, sanction of the Authority shall be necessary. A revised plan showing the deviation shall be submitted and the procedure laid down for the original plans shall apply to all such amended plans. Any work done in contravention of the sanctioned plans, except any changes made within the internal layout of a residential or commercial unit which do not violate FSI or other regulations, without prior approval of the Metropolitan Commissioner shall be deemed as unauthorised. However, any changes made within the internal layout of a residential or commercial unit, which do not violate FSI or other regulations, shall not be treated as unauthorised. Such changes shall be incorporated in plan along with completion certificate.

7.4 Completion Certificate - The owner through his licensed surveyor / engineer / structural engineer / supervisor or his architect, as the case may be, who has supervised the construction,

shall furnish a building completion certificate to the Authority in the form in Appendix 'H'. This certificate shall be accompanied by three sets of plans of the completed development, the certificate about the operation of the lift from consultant and certificate of structural stability / compliance issued by R.C.C. consultant, wherever necessary.

In case of special buildings, the completion certificate shall also be accompanied with the NOC along with completion plans from Chief Fire Officer of PMRDA.

7.5 Occupancy certificate - The Metropolitan Commissioner after inspection of the work and after satisfying himself that there is no deviation from the sanctioned plans, issue an occupancy certificate in the form in Appendix- I or refuse to sanction the occupancy certificate in Appendix –J within 8 days from the date of receipt of the said completion certificate, failing which the work shall be deemed to have been approved for occupation, provided the construction conforms to the sanctioned plans. One set of plans, certified by the Metropolitan Commissioner, shall be returned to the owner along with the occupancy certificate. Where the occupancy certificate is refused or rejected, the reasons for refusal or rejection shall be given in intimation of the rejection or the refusal.

The applicant may request for deemed occupancy certificate if eligible as above. Metropolitan Commissioner shall issue the deemed occupancy certificate within 8 days of the application.

7.6 Part occupancy certificate:- When requested by the holder of the development permission, the Authority may issue a part occupancy certificate for a building or part thereof, before completion of the entire work, as per development permission, provided sufficient precautionary measures are taken by the holder to ensure public safety and health. The occupancy certificate shall be subject to the owners indemnifying the Authority in the form in Appendix `K'.

8.0 INSPECTION

The Authority shall have the power to carry out inspection of the work under the provisions of the Act, at various stages to ascertain whether the work is proceeding as per the provisions of regulations and sanctioned plan.

9.0 UNSAFE BUILDINGS

All unsafe buildings shall be considered to constitute danger to public safety and hygiene and sanitation and shall be restored by repairs or demolished or dealt with as otherwise directed by the Metropolitan Commissioner. The redevelopment of such buildings shall be as per the provisions stipulated in these regulations.

10.0 OFFENCES AND PENALTIES

10.1 Offences and penalties:- Any person who contravenes any of the provisions of these regulations / any requirements or obligations imposed on him by virtue of these regulations including the maintenance of fire protection services and appliances and lifts in working order or who interferes with or obstructs any person in the discharge of his duties shall:

- (a) be guilty of an offence and upon conviction shall be punished with a fine as fixed by the Metropolitan Commissioner and as stipulated in Section 52 of The Maharashtra Regional and Town Planning Act, 1966;
- (b) be subject to further suitable actions including demolition of unauthorised works, as stipulated under Section 53 of The Maharashtra Regional and Town Planning Act, 1966;
- (c) in case of Licensed Engineer / Structural Engineer / Supervisor, subject to suitable action against him which may include cancellation of license and debarring him from further

practice/ business for a period as decided by the Authority;

- (d) in case of registered architects, subject to action of the Council of Architecture as per the provisions of Architects Act, 1972 on the report of the Metropolitan Commissioner.

10.2. Revocation of Permission:-

- 1) Without prejudice to the powers of revocation conferred by Section 51 of the Act the Authority may, after giving the opportunity of being heard, revoke any development permission issued under these regulations where it is noticed by it that there had been any false statement or any misrepresentation of material fact in the application on the basis of which the development permission was issued and thereupon the whole work carried out in pursuance of such permission shall be treated as unauthorised.
- 2) In the case of revocation of the permission under sub- regulation (1), no compensation shall be paid.
- 3) Further the concerned person/applicant is subject to proceedings under the Indian Penal Code for making false statement before the public Authority. However, the decision to file a case shall be done under the express permission of the Metropolitan Commissioner.

11.0 AMENDMENT TO APPENDICES

The Metropolitan Commissioner shall be authorised to amend the **Appendices A to K** (except Appendix C) in these regulations, as and when necessary.

12.0 Provision with respect to NBC

Any aspect not covered in these regulations or in particular the planning, design and construction of building and its appurtenant services shall be done to the satisfaction of Metropolitan Commissioner for which, the NBC shall be reference document for conformity regarding the various aspect. The latest version to the NBC shall be referred at the time of enforcement of these regulations.

PART II GENERAL LAND DEVELOPMENT REQUIREMENTS

13.0 REQUIREMENTS OF SITE

13.1 SITES NOT ELIGIBLE FOR CONSTRUCTION OF BUILDING:

No piece of land shall be used as a site for the construction of building

- (a) If the Authority considers that the site is insanitary, incapable of being well drained or it is dangerous to construct a building on it;
- (b) If the entire site is within a distance of 9 m. from the edge of water mark of a minor water course (first order stream) and 15 m. from the edge of water mark of a major water course shown on Regional Plan or village/city survey map or otherwise;
Provided that where a minor water course passes through a low lying land without any well- defined banks, the owner of the property may be permitted by the Authority to restrict and or to realign the same within the same land according to cross section available with the PMRDA, modified from time to time without changing the position of the inlet and outlet of the water course. In such case marginal open spaces shall be as required under these regulations subject to minimum 4.50 m. from the edge of the trained nala;
- (c) Notwithstanding anything contained hereinabove, the Authority shall be entitled to take cognizance of the existence of all water courses whether shown on the Regional Plan or not, while sanctioning layouts and no person shall take any action without the permission of the Authority which results in reducing the water way or closing or filling up of any existing water course. If any watercourse, whether shown in the Regional Plan/Revenue Record or not, but existing on the site/land, owned by private person, the area under such water course shall not be deducted for computation of FSI.
- (d) If the owner of the plot has not shown to the satisfaction of the Authority all the measures required to safeguard the construction from constantly getting damped;
- (e) If the building is proposed on any area filled up with carcasses, excreta, filth and offensive matter till the production of certificate from the Competent Authority to the effect that it is safe from the health and sanitary point of view, to be built upon;
- (f) If the use of the site is for the purpose, which will be a source of annoyance to the health and comfort of the inhabitants of the neighbourhood;
- (g) If the plot has not been approved as a building site by the Metropolitan Commissioner;
- (h) If the proposed use of land or occupancy of the building on the site does not conform to the land use proposals in the Regional/Development Plans or Zoning Regulations;
- (i) If the level of the site is less than prescribed datum level depending on topography and drainage aspects;
- (j) If it doesn't derive access from an authorised street/means of access described in these Regulations;
- (k) If the land is within a prohibited distance from the Defence Establishments as decided by The Ministry of Defence, Government of India;
- (l) If it is within the river / lake boundary and blue flood line of the river (prohibitive zone);
- (m) If the site is hilly and having gradient more than 1:5 whether shown on the Regional Plan or not;
- (n) If the site is not developable / buildable by virtue of restrictions imposed under any law or guidelines of any Government department.

- 13.2 Distance of site from Electric Lines:** No structure including verandah or balcony shall be allowed to be erected or re-erected or any additions or alterations made to a building on a site within the distance quoted in Table No. 2 below in accordance with the prevailing Indian Electricity Rules and its amendments from time to time between the building and any overhead electric supply line. Amenity space shall not be shown under the overhead electric supply lines.

Table No. 2

Electric Lines	Vertically	Horizontally
	(m.)	(m.)
- 1 -	-2-	-3-
(a) Low and medium voltage Lines and Service Lines.	2.5	1.2
(b) High voltage lines up to and including 33,000 V.	3.7	2
(c) Extra High voltage beyond 33,000 V.	3.7	2
	(Plus 0.3 m. for every additional 33,000 V. or part thereof)	(Plus 0.3 m. for every additional 33,000 V. or part thereof)
Note: The minimum clearance specified above shall be measured from maximum sag for vertical clearance and from maximum deflection due to wind pressure for horizontal clearance.		

13.3 CONSTRUCTION WITHIN FLOOD LINE:

- i) Area between the river bank and blue flood line (Flood line towards the river bank) shall be prohibited zone for any construction except parking, open vegetable market, garden, lawns, open space, cremation and burial ground, or like uses without any form of construction or any form of earthwork with external dumping, provided the land is feasible for such utilization.
- ii) Area between blue flood line and red flood line shall be restrictive zone for the purposes of construction. The construction in the area may be permitted at a height of 0.45 m. above the red flood line.
- iii) If the area between the river bank and blue flood line or red flood line forms the part of the entire plot in developable zone i.e. residential, commercial, public-semi-public, industrial, then, FSI of this part of land may be allowed to be utilised on remaining land.
- iv) The blue and red flood line shall be as marked by the Irrigation Department or any other Government institutions dealing with the subject.

13.4 DEVELOPMENT WITHIN 30 M. FROM RAILWAY BOUNDARY:

Any construction within 30 m. from railway boundary shall be subject to restrictions as may be specified by the Railway Authority from time to time.

13.5 ENVIRONMENTAL COMPLIANCE:

Environment compliance/implementation of Green norms shall be carried out as per the provisions of Government Notifications issued from time to time.

13.6 RESTRICTIONS IN THE VICINITY OF AIRPORT:

Height restriction in the vicinity as well as the funnel of the Airport, as may be specified by the concerned authority from time to time, shall be observed.

13.7 RESTRICTIONS IN THE VICINITY OF ANCIENT MONUMENTS:

- 1) The Restrictions for Development in the vicinity of the declared monuments as prescribed under the Ancient Monuments and Archaeological Sites and Remains Act, 1958 and amendments made to it from time to time shall be observed.
- 2) The Restrictions for Development in the vicinity of the ancient monuments as prescribed under Ancient Monuments and Archaeological Sites and Remains Act, 1960 and amendments made to it from time to time shall be observed.

13.8 DEVELOPMENT ALONG HIGHWAYS / CLASSIFIED ROADS:

The development along the highways shall be subject to the provisions of National Highways Act, 1956 and State Highways Act, 1955 and orders issued by Ministry of Surface Transport, GoI and Public Works Department of the State Government, in these regards, from time to time.

A service road of 12 m. wide shall be provided along National and State Highways on both sides. These service roads may not be provided in piecemeal where authorized development / construction have already been taken place without the provisions of service road.

13.9 DISTANCE FROM LAND FILL SITES:

For any residential/commercial development, segregating distance from the land fill site (as determined by the Competent Authority) shall be observed as specified under Solid Waste Management Rules in force from time to time or as specified by Competent Authority.

13.10 AUTHORITIES TO SUPPLY COMPLETE INFORMATION TO THE PMRDA:

The PMRDA shall obtain information on restrictions to be imposed on developments from the concerned Government agencies as per their respective legislations/regulations/rules as mentioned above. This information shall be published by the PMRDA on its portal/website as and when it is updated by the concerned department. However, it is the duty of the applicant to ensure that restrictions informed by the authorities are followed scrupulously. The Metropolitan Commissioner shall ensure compliance of the restriction informed by the concerned authorities while sanctioning the development permission.

14.0 MEANS OF ACCESS

- 14.1 Every plot / building whether existing or proposed, shall have means of access as required in these Regulations.
- 14.2 Every person who erects a building shall not at any time erect or cause or permit to erect or re-erect any building which in any way encroaches upon or diminishes the area set apart as means of access.

14.3 Width of Means of Access:-

A) For Residential Development -The plots shall abut on a public means of access like street / road. Minimum width of access / layout road / internal road in any development proposal / subdivision / group housing shall be as given in Table No.3.

Table No-3

S.No.	Length of Means of access in mt	Width of Means of access in mt
i	upto150	9.00
ii	above 150 and to upto300	12.00
iii	more than 300	15.00

B) For Other than Residential Development –The minimum width of access / layout road / internal road in any development proposal other than residential (for commercial/industrial use) shall be as given in Table No.3(a).

Table 3(a)		
Sr. no.	Length of Mean of Access in m.	Width of Means of Access in m.
i	Upto 75	12
ii	75 to 150	15
iii	Above 150	18 or more

NOTE -1 The means of access shall be clear of required marginal open spaces from the existing building line. In no case, development on plots shall be permitted unless it is accessible by the authorized public street existing prior to coming in to force of these Regulations or road from the layout sanctioned prior to these Regulations.

- 14.3.1 Pathways:** -A pedestrian approach to the buildings from road / street / internal means of access wherever necessary, shall be through paved pathway of width not less than 2.0 m., 3.0 & 4.5 m. provided its length measured from exit way of the building is not more than 20 m. 40 m and 60m. respectively from the main / internal means of access. If the length is more than 60 m., then regular street as provided in Table No.3 shall be necessary. This provision shall also apply to group housing scheme or layout of building for other uses except development under regulation no.21.4.
- 14.3.2** The length of means of access shall be determined by the distance from the farthest plot (building) to the public street. The length of the subsidiary access way shall be measured from the point of its origin to the next wider road on which it meets.
- 14.3.3** In the interest of general development of an area, the Metropolitan Commissioner may require the means of access to be of larger width than that required under regulation No. 14.3.
- 14.3.4** In case where a private passage is unrestrictedly used by public for more than 10 years as a means of access of width not less than 9 m. to a number of plots, the Metropolitan Commissioner may take steps including improvement under, the provision of relevant Act to declare it as a public street
- 14.3.5** In congested areas in the case of plots facing street / means of access less than 4.5 m. in width the plot boundary shall be shifted to be away by 2.25 m. from the central line of the street/ means of access way to give rise to a new street / means of access way of width of 4.5 m. clear from the structural projections.
- 14.4.** Means of access shall be levelled, metalled, flagged, paved, sewered, drained, channelled, lighted, laid with water supply line and provided with trees for shade (wherever necessary) to the satisfaction of the Authority, free of encroachment and shall be maintained in a condition to the satisfaction of the Metropolitan Commissioner.
- 14.4.1.** If any private street or any other means of access to a building is not constructed & maintained as specified above, the authority may by written notice require the owner or owners of the several premises fronting or adjoining the said street or other means of access or abutting thereon or to which access is obtained through such street or other means of access or which shall benefit by works executed to carry out any or more of the aforesaid requirements in such manner and within such time as the authority shall direct. If the owner or owners fail to comply with this direction, the authority

may arrange for its execution and recover the expenses incurred from the owner/ owners.

- 14.5. Access from the Highways/classified roads: Generally the plot / building along Highway and classified roads shall derive access from service road. However, highway amenities like petrol pump; hotel etc. may have an access direct from Highways and such other roads having a width of 30 m. or more. The above will be subject to the provisions of State Highways Act, 1965 and National Highway Act 1956. Provided that in suitable cases, the planning authority may suspend the operation of this rule till service roads are provided.
- 14.6. For building identified in Regulation No. 6.2.6.1, the following additional provisions of means of access shall be ensured;
 - (a) The width of the main street on which the building abuts shall not be less than 12 m. and one end of this street shall join another street of width not less than 12 m. in width subject to Regulation No.14.3.
 - (b) The approach to the building and open spaces on its all sides (see Regulation No. 17.1, 17.2 and 17.3) shall be minimum 6 m. and the layout for the same shall be approved in consultation with the Fire Officer, Fire Brigade Authority and the same shall be of hard surface capable of taking the weight of fire engine, weighing up to 45 tones. The said open space shall be kept free of obstructions and shall be motorable.
 - (c) Main entrances to the plot shall be of adequate width to allow easy access to the fire engine and in no case it shall measure less than 4.5 m. The entrance gate shall fold back against the compound wall of the premises, thus leaving the exterior access way within the plot free for movement of fire engine / fire service vehicles. If main entrance at boundary wall is built over, the minimum clearance shall be 4.5 m.

15.0 REGULATIONS FOR LAND SUB -DIVISION AND LAYOUT

15.1 Layout or Sub-division proposal shall be submitted for the following:

- (i) When more than one building excepting for accessory buildings in the case of residential building is proposed on any land, the owner of the land shall submit proposal for proper layout of building or sub-division of his entire contiguous holding.
- (ii) When development and redevelopment of any tract of land which includes division and sub- division or amalgamation of plots for various land uses within a colony.
- (iii) When group housing scheme or campus /cluster planning of any use is proposed.

15.2 Roads / streets in Land Sub-division or Layout.

15.2.1 The width of roads/ streets/ public and internal access way including pathway shall conform to provisions of Regulation No. 14.3 to 14.6.

15.2.2 In addition to the provisions of Regulation No. 14.3 Cul-de-sacs giving access to plots and extending upto 150 m. normally and 275 m. maximum with an additional turning space at 150 m. shall be allowed only in residential area, provided that Cul-de-sacs would be permissible only on straight roads and further provided that cul-de-sacs ends shall be higher in level than the level of starting point. The turning space, in any case shall be not less than 81 sq. m. in area with no dimension being less than 9 m.

15.2.3 **Intersection of Roads:-** At junctions of roads meeting at right angles, the rounding off at the intersection shall be done, unless otherwise directed by the Metropolitan Commissioner, with the tangent length from the point of intersection to the curve being 1/2 the road width across the direction of tangent as given below: The building shall also set back at required marginal distance from this rounding off.

Fig. 1- Rounding off intersections at junctions

Fig.2. - Rounding off intersection at junctions.

- 15.2.3.1** For junctions of road meetings at less than 60 degrees, the rounding off or cut or similar treatment shall have tangent length of U and V from the intersections point as shown in diagram 2. The tangent length at obtuse angle junction shall be equal to half the width of the road from which the vehicle enters as shown in diagram 2. Provided however, that the radius for the junction rounding shall not be less than 6 m.
- 15.2.3.2** While granting the development permission for land sub-division or group housing/campus planning, it shall be necessary to coordinate the roads in the adjoining lands. Also, proper hierarchy of roads shall be maintained while deciding width of road in addition to the regulations no. 14.0 and 15.2. The design of roads in PMRDA area shall be as per Annexure I.
- 15.2.3.3** Whenever called upon by the Metropolitan Commissioner to do so, areas under roads shall be handed over to the Metropolitan Commissioner by way of deed after development of the same for which nominal amount of Re 1/- shall be paid by the Authority.

15.3 Recreational open spaces:

15.3.1.1 In any layout or subdivision or any development of land for any use/zone admeasuring 0.20 Ha. or more, after deducting D.P / R.P. road and reservation area, if any, 10% of the net plot area shall be reserved as recreational open space, which shall as far as possible be provided in one place. In case of land admeasuring more than 0.8 ha. recreational open space may be allowed to be reserved at different locations in the same layout provided that the size and other dimensions conform to the provisions herein below.

- i) The above-mentioned area of 0.2 Ha. shall be measured with reference to original holding as on 11th January 1967 and not with reference to sub-divided holding in revenue / city survey record thereafter without the permission under the Maharashtra Regional & Town Planning Act, 1966. However, this provision shall not be applicable to plots compulsorily got subdivided below 0.4 hec due to the DP reservations / RP/DP Roads/ Road widening/deemed reservations or any other proposal of the PMRDA.

For the land which are sub-divided after 11th January 1967 without taking prior permission from the Planning Authority and having plot area below 0.20 hectare, prior to the coming in to force of these regulations, the applicant may adopt any option of -

- a) providing 10% open space subject to minimum 200 sq. m., or
 - b) availing the reduced FSI on such land to 75% of the basic FSI as otherwise permissible. In such cases premium FSI or loading of TDR shall be permissible on such plot proportionately.
- ii) For the plots having area upto 0.20 Ha., regularised under the Maharashtra Gunthewari Development (Regularisation, Upgradation and Control) Act, 2001, no such open space shall be required for the development permission on such plot having area upto 0.20 Ha.
 - iii) Notwithstanding anything contained in the definition of —Open Space in this regulation, such recreational open space may be permitted on podium in congested / non congested area subject to Regulation no.18.12

Provided that, in case of lands declared surplus or retainable under Urban Land (C & R) Act, 1976, if the entire retainable holding or entire surplus holding independently admeasures 0.2Ha., or more, then 10% recreational open space shall be necessary in respective holding.

Provided further that such recreational open space shall also be necessary for group housing scheme or campus/ cluster planning for any use / zone.

Provided further that, no such open space shall be necessary in case of layout or subdivision of plots from already sanctioned layout by the Authority where the requisite recreational open space has already been left in the sanctioned layout.

Provided further that no such open space shall be necessary for development of the reservations in the Regional/Development Plans designated for the purpose other than residential.

In case of development of land for educational purpose, in lieu of 10% recreational open space, atleast 40% of the gross area, excluding the area under Regional/Development Plan road and reservations in Regional/Development Plan, (or as decided by the Government from time to time) shall be earmarked for playground. Notwithstanding anything contained in this regulation, the shape and location of such open space shall be such that it can be properly used as playground. Provided that, the area of such playground shall not be deducted for computation of FSI.

15.3.2 The owner shall give an undertaking that the recreational open space shall be for the common use of all the residents or occupants of the layout / building unit.

- a) On sanction of the development permission, the recreational open space shall deemed to have vested in the society / association of the residents / occupants except otherwise specified. In case such society or association is yet to be formed, the owner shall give undertaking to the Metropolitan Commissioner that he will transfer the recreational opens pace to the society/ association whenever it is formed. The recreational open space shall not be sold / leased out / allotted/ transferred for any purpose, to any other person and it shall not be put to any other user except for the common use of residents/ occupants as mentioned in Regulation no.15.3.7.
- b) If the Metropolitan Commissioner is convinced that, such open space is being used in violation of the provisions as prescribed in these regulations, then, he shall take over possession of such land of recreational open space for maintaining it for the uses permissible in these regulation, subject to condition that it shall not be further handed over or allotted to any person/institute/authority to that effect.

Provided that, it shall not bar to return the possession of such open space to the original society/ association of plot owners, after taking due undertaking to that effect.

15.3.3 No permission shall be granted to delete / reduce open spaces of the existing sanctioned layout/ subdivision. However, while revising the layout, such recreational open space may be rearranged without decrease in area subject to minimum prescribed area under these Regulations with the consent of plot / tenement holders / co-owners.

15.3.4 The open spaces shall be exclusive of means of accesses / internal roads / designations or reservations in Regional/Development Plan roads and areas for road widening.

15.3.5 Such recreational open space may be allowed to be earmarked, partly or fully, in green belt area shown on the Regional/Development Plan after leaving distance of 15 m. from river and 9.0m. from nala, provided, such recreational space is sizable as required under this regulation. Provided that, the only user and concerned structures as may be permissible under the regulation no.19.8 in respect of Green belt, may be permitted in such open space.

15.3.6 Minimum dimensions -The minimum dimensions of such recreational open space shall be not less than 10m. and if the average width of such recreational open space is less than 20m. the length thereof shall not exceed 2 ½ times the average width.

15.3.7 Structures permitted in Open Space- If required, structure and uses which can be permitted without counting in FSI in the recreational open spaces shall be as under:

- 1) There may be maximum two storeyed structure with maximum 15% built up area of recreational open space, out of which maximum 10% built up area shall be allowed on

- ground floor and remaining can be permitted on 1st floor.
- 2) The structures used for the purpose of pavilion, gymnasium, fitness centre, club house, vipashyana and yoga centre, crèche, kindergarten, library, water tank, (underground or elevated), electric substation, generator set, pump houses, garbage treatment, public health out post/ centre or other structures for the purpose of sports and recreational activity (indoor or outdoor stadiums, etc. as per availability of area) may be permitted.
 - 3) The remaining area of the recreational open space shall be kept open to sky and properly accessible to all members as a place of recreation, garden, or a playground without any obstructions. At least 20% of the open spaces as required by these regulations shall be made of pervious material. Use of grass pavers, paver blocks with at least 50% opening, landscape would be considered as pervious surface.
 - 4) No detached toilet block shall be permitted.
 - 5) A swimming pool may also be permitted in such a recreational open space. The ownership of such structures and other appurtenant users shall vest in all the owners on account of whose cumulative holdings, the recreational open space is required to be kept in the land.
 - 6) The proposal for the construction of such structure should come as a proposal from the owner/s, owners' society / societies or federation of owners' societies and shall be meant for the beneficial use of the owners / members of such society / societies / federation of societies.
 - 7) The remaining area of the recreational open space shall be kept open to sky and properly accessible to all members as a place of recreation, garden or a playground.
 - 8) The owners' society / societies, the federation of the owners' societies shall submit to the Authority, a registered undertaking agreeing to the conditions in (5) & (6) above while obtaining permission for the above said construction.

15.3.8 Every plot meant for a recreational open space shall have an independent means of access. In case of group housing scheme, if such recreational open space is surrounded by buildings and is meant for use by the occupants of those buildings, then independent means of access may not be insisted.

15.4 PROVISION FOR AMENITY SPACE

In any layout or sub division of plots or development proposal for residential/commercial users, having area 0.4 ha. or more, amenity space of 15% on gross area excluding area under Regional Plan road and reservation in Regional Plan/Development Plan, if any, shall be provided while granting permission to the layout / development proposal. These Amenity Space shall be deemed to be for public purpose for the use of PMRDA and Floor Space Index (FSI) in lieu thereof may be made available in-situ (on remaining land). The calculation of this in-situ FSI shall be shown on the layout / building plan. If the owner desires to have TDR against it, instead of in-situ FSI, then he may be awarded TDR. The generation of TDR or in-situ FSI shall be equivalent to the quantum mentioned in Regulation no. 46.0 in respect of TDR.

Provided that, the Metropolitan Commissioner shall ensure that amenity space shall be earmarked in the layout so that after amalgamating the amenity spaces in the adjacent layouts, it becomes larger in area. It shall be approachable by minimum 12 m. wide road except the cases where 12 m. approach road to the site is not available.

Provided that, in case of sub-division of land admeasuring 8000 sq. m. or more in area in an industrial zone, 5 percent of the total area in addition to 10 percent stipulated in Regulation No 15.3.1, shall be reserved as amenity open space which, shall also serve as general parking space. When the additional amenity open space exceeds 1500 sq. m., the excess area may be

used for construction of buildings for banks, canteens, welfare centre, health centre, offices, convenient shopping, crèches and other common purposes considered necessary for industrial users as approved by the Metropolitan Commissioner. However, this regulation shall not be applicable to Regulation no.19.6(v), (i.e. Regulation for allowing Residential /Commercial user in Industrial Zone), wherein separate provision for land for public amenities / utilities is made.

Provided that, it shall not be necessary to provide such Amenity space, if the land is proposed to be developed for IT or ITES users only and having area upto 2.00 Hectare.

Provided further that, this regulation shall not be applicable where entire development permission is for amenities specified in definition of amenity space.

Provided further that, this regulation shall not be applicable for revision of earlier sanctioned development permissions granted under the regulations in force prior to these regulations, where no such amenity space is provided, or such amenity space is allowed to be developed by the owner in earlier sanctioned development permission.

Provided further that, the option of development of amenity space by the owner or handing over of amenity space to PMRDA shall be open to the owner in case of earlier approved layouts/development permissions, subject to the written permission for the specific public use as defined in regulation no. 2.9.

Provided further that, the entire amenity space required to be shown as above shall be shown at a single location.

However, if some amenity space is provided in the earlier permission, then quantum of such amenity space in the revised permission –

- i) shall be limited to the area provided in earlier permission.
- ii) shall not be reduced even though area of such amenity space is more than what is specified in this regulation.

15.4.1 DEVELOPMENT OF AMENITY SPACE

Development of amenity space may be carried out by the PMRDA either on its own or through the private participation for monetization of land. The priority for development of particular amenity in particular Residential area shall be decided by the Metropolitan Commissioner. Amenity Space may be allowed to be utilized for uses mentioned in these regulations as per 2.9

15.5 PROVISION FOR ELECTRIC SUB-STATION

In case of development/re-development of any land, building or premises mentioned below, provision for electric sub-stations may be made as under.

Sr. No.	Plot Area	Maximum requirements
1	Plot above 2000 sq.m.	One single transformer sub-station of the size of 5m.x5m. and height of not more than 5m.
2	Layout or sub-division of a plot measuring 2 .0 ha. or more.	A suitable site for an electric sub-station.

Provided that the sub-station, if required, may be constructed in such a manner that it is away from main building at a distance of at least 3 m. and does not affect the required side marginal distances or prescribed width of internal access or larger open space.

15.6 PLOT AREA, PLOT WIDTH FOR VARIOUS USES:

Minimum plot areas and widths for various uses shall be as given below in the **Table No.4**

Table No. 4				
MINIMUM PLOT AREA, MINIMUM WIDTH, FOR VARIOUS USES				
Sr. No.	Uses	Plot area (in sq.m.)	Min. Plot Width	Type of Development
(1)	(2)	(3)	(4)	(5)
1	Residential and Commercial (except those in 2,3 & 4 below)	i) 30 and above but upto 125	As per Table No. 16	Row
		ii) Above 100 but less than 250		Semi-detached/ Detached
		iii) 250 & above		Detached
2	Plots in EWS Housing / High Density Housing / Sites and Services/ Slum Up-gradation / Reconstruction Scheme by public authority.	25 and above but upto 125	As per Table No.16	Row
3	Auto Fuel Filling station -			
	(a) Without service bay	510	16.75 m	Detached
	(b) With service bay	1100	30.5 m	Detached.
4.	Industrial	300	10 m	Detached.
<p>Note : In case of sr.no.1, pattern of development permissible within a plot shall be shown in dotted line while approving the layout. However change in pattern may be permitted in future, if it fits in to above pattern of development and does not disturb the overall pattern of development already approved.</p>				

15.7 NET PLOT AREA AND COMPUTATION OF FSI

For the purpose of computing FSI/Built-up area, **the net area of the plot** shall be as under:

- i) In case of a plotted layout/sub-division /group housing scheme / any development, net area shall be the balance plot area, after deducting the area covered by amenity space under Regulation no 15.4 which is deemed reservations and Regional/Development Plan proposals, if any, from the total area of plot.
- ii) For the purpose of computation of FSI/built-up area, the net area of the plot shall only be considered.
- iii) In case of plotted layout, the basic FSI of such net area shall be distributed on all plots on pro-rata basis or on certain plots to which land owner desires, subject to maximum receiving potential prescribed in these regulations.
- iv) In case of plots from already approved layouts, the plot area shall be treated as net plot area.
- v) The above regulations in respect of net plot area and computation of FSI shall apply to proposals in all land use zones.

15.8 Relocation of DP / RP Sites / DP / RP Proposals while approving the layout of land:

If the land proposed to be laid out for any development is affected by any reservations for public purposes, the Metropolitan commissioner may allow adjustment in the location of such reservation to suit development without altering the area of such reservation. Provided that no such shifting of the reservations shall be permitted:

- (a) if the reservation proposed to be relocated is in parts;

- (b) beyond 200 mts. of the location in the Development Plan / Regional Plan;
- (c) beyond the holding of the owner in which such reservation is located;
- (d) unless the alternative location and size is at least similar to the location and size of the development plan / regional plan as regards access, levels, etc.;
- (e) unless the relocation is within area covered by the layout or development permission under sanction; and
- (f) if the reservation is already shifted under these regulations.
- (g) if the land is reserved in view of its geographical location like eco sensitive, Nala, training reservation etc.

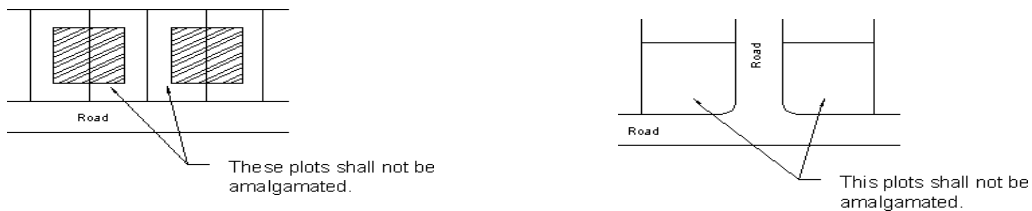

The Development Plan / Regional Plan shall be deemed to be modified to that extent.

15.9 Adjustment of the boundaries of the reservation: The Metropolitan Commissioner with the consent of the owner may adjust the boundaries of the reservation in the same land and location provided that the area of such reservation is not reduced.

15.10 AMALGAMATION OF PLOTS

Amalgamation of plots shall be permissible if they are contiguous permissible subject to following:

- a) Amalgamation of plot having incompatible zoning in Regional/Development Plan shall not be allowed.
- b) Amalgamation of plot which is not desirable from planning point of view (eg. as shown in below) shall not be permitted.

16.0 LAND USE CLASSIFICATION AND PERMISSIBLE USES

- (1) In case of Development / re-development of any land, building or premises, the intended use shall conform to the land use, purpose of designation, allocation or reservation, assigned to it in the Regional Plan as the case may be, unless specified otherwise.
- (2) **Lawful existing non-conforming uses** - Any lawful non-conforming use of premises existing prior to the date of enforcement of these regulations, shall continue and may be allowed to be expanded within the holding in the original sanction, unless in the opinion of the Metropolitan Commissioner the activity poses danger to public safety and/ or life and that when a building, containing non-conforming use is pulled down or has fallen down, the use of the new building shall be in conformity with these Regulations or with lawful existing use.

Provided further, that non-conforming cattle stables and industries causing nuisance shall be shifted to a conforming area within such period as may be decided by the Metropolitan Commissioner.

- (3) **Existing features shown on Regional Plan** – The existing features shown on Regional Plan are indicative and stand modified on Regional Plan as per actual position. Mention of particular use on Regional Plan, shall not bar the owner from permission allowed in the zone shown for such land. Also, boundaries of s. no./gat. no, alignment of existing road / nalla, water bodies and other physical features of land shall be as per measurement plan of Land Records Department.
- (4) **Development of Parking** – The Metropolitan Commissioner may develop any land in any developable zone, owned by or in possession of the PMRDA, for public parking single or multi-storeyed, underground or above ground.

- (5) **Discontinuance of Zoning in pursuance of existing use**– If any land is shown in Public semi –public zone, Public Utility, because of the activity existed there-on, such lands shall be deemed to have been shown in the adjacent predominant Zone after such activity ceases to exist and thereupon, the development shall be permissible as per the adjoining predominant zone, with the special permission of Metropolitan Commissioner.
- (6) **Development permission granted as per the I to R provisions** - In industrial zone on which Residential/ Commercial permission is granted is deemed to be converted into Residential/ Commercial zone to the extent of that area, after issuance of full and final occupation certificate to the project.

17.0 OPEN SPACE, SETBACK AREA AND HEIGHT LIMITATIONS

17.1 Exterior Open Spaces:

Provisions for open spaces at the front side/sides and rear of the building shall be as given in Part IV of these Regulations.

17.2 Buildings Abutting Two or More Streets:

When a Building abuts two or more streets, the setbacks from the streets shall be such as if the building is fronting on each such street.

17.3 Marginal distances for Buildings of Higher Heights

- (a) **Front Margin** - Front margin shall be as given below with reference to height of building

i)	Height above 15 m. & upto 24 m.	4.5 m for residential and 6.00 m. for residential with mix use
ii)	Height above 24 m. & upto 36 m.	6.0 m.
iii)	Height above 36 m. & upto 50 m.	9.00 m.

Provided that, in case of group housing scheme where building abuts on internal road, the minimum 3.0 m. set back from internal road or distance between two buildings whichever is more shall be provided. For Regional /development plan road or classified road or through road, passing through Group Housing Scheme or any deemed public road, the setback as prescribed in the regulations shall be provided.

- (b)**Side or rear marginal distance** - Side or rear marginal distance **in relation to the height** of the building for light and ventilation shall be as below

The marginal distance on all sides shall be as per **Table No. 16** for building height 15.0 m. and below. For height more than 15.0 m., the marginal distance on all sides except the front side of a building shall be minimum **H/4** (Where H = Height of the building above ground level) subject to a minimum of 3.0 m. for residential building, 4.5 m. for commercial building and 6.0 m. for special building mentioned in definition no. 2.77.13. Provided that such marginal distance shall be subject to maximum of 16.0 m. If the land owner wishes to keep higher margins he may be allowed to do so.

Provided further that the building height for the purposes of this regulation and for calculating the marginal distances shall be exclusive of height of parking floors upto 6.0 m.

Provided also that, for building having shops / commercial user on any floor, 50% of front marginal distances shall be made available exclusively for pedestrians.

17.3.1 In case of layout of two or more buildings of any users:-

i) Distance between two buildings- The distance between two buildings shall be the side/rear marginal distance required for the taller building between the two adjoining buildings.

ii) Provided that, the path way / internal road may be allowed to be proposed in such marginal distance by keeping 3.0 m. distance on both side from such internal road.

Provided also that, where rooms do not derive light and ventilation from the exterior open space, the distance between the two buildings may be reduced by 1 m. subject to a minimum of 3 m. (if necessary 6.0 m. in case of special building) and maximum of 8.0 m. No projections shall be permitted in this exterior space.

17.3.2 In case of group housing scheme where building abuts on internal road, the minimum 3.0 m. set back from internal road or distance between two buildings whichever is more shall be provided. For Regional/Development Plan road or classified road or through road, passing through Group Housing Scheme, the setback as prescribed in the regulations shall be provided.

17.4 Interior & Exterior chowk:

17.4.1 (a) Interior chowk: Wherever habitable rooms or kitchen derives ventilation from inner chowk or interior open space, the size of such interior open space shall not be less than 3m. x 3m. upto height of 18m. and for height more than 18m., the interior open space shall not be less than $H/6$ m. x $H/6$ m. where H = height of highest wall of the chowk.

(b) Exterior chowk: The minimum width of the exterior chowk for the purpose of light and ventilation, shall not be less than 2.4 m. and depth shall not exceed 2 times the width, for buildings upto 17m. height and for height more than 17m., the exterior open space shall not be less than $H/7$ m. x $H/7$ m. where H = height of highest wall of the chowk. If the width of the exterior chowk is less than 2.4 m. it shall be treated as a notch and shall not be considered for deriving ventilation.

However, for (a) and (b) above maximum distance shall be subject to the maximum limit prescribed for distance between two buildings.

17.4.2 Where only water closet, bathroom, combined bathroom and water closet are abutting on the interior open space, the size of the interior open space shall be in line with the provision for ventilation shaft as given in Regulation no.18.15.ii)

17.5 Area and Height limitations - The area and height limitations, height of buildings, floor space index, abutting different road widths shall be as given in Part IV and Regulation No. 15.6.

17.6 Permissible Structures / Projections in marginal open spaces/ distances

The following projections shall be permissible in marginal distances:

(a) Projections into distances: - Every open space provided either interior or exterior shall be kept free from any erection thereon and shall be open to the sky and no cornice, chajja, roof or weather shade more than 0.75 m. wide shall overhang or project over the said marginal distances so as to reduce the width to less than the minimum required. However, sloping/horizontal chajja provided over balcony/ gallery etc. may be permitted upto balcony projections at horizontal level.

(b) Balconies - as specified in regulation no 18.13

(c) A canopy not exceeding 5m. in length and 2.5 m. in width in the form of cantilever and unenclosed over the main entrance providing a minimum clear height of 2.40 m. below the beam bottom of canopy. The canopy shall not have access from upper floors (above floors), for using as sitting out place. There shall be a minimum clearance of 1.5 m. between the plot boundaries and canopy. Provided that, more than one canopy may be allowed in case of special buildings, as per requirement.

(d) A projection of maximum 30 cm. on roof top terrace level may be allowed throughout the periphery of the building. In case of pitched roof projection of maximum 45 cm. at rooftop terrace level

throughout periphery of the building shall be allowed.

(e) Accessory buildings:- The following accessory buildings may be permitted in the marginal open spaces :-

i) In an existing building where toilet is not provided, a single storeyed toilet subject to a maximum area of 4.0 sq. m. in the rear or side open space and at a distance of 7.5 m. from the road line or the front boundary and 1.5 m. from other boundaries may be permissible. The Commissioner may reduce 1.5 m. margin in exceptional cases to avoid hardship.

ii) Parking lock up garage not exceeding 2.4 m. in height shall be permissible in the rear corner of the plot with independent bungalow. Parking lock up garage when attached to main building shall be 7.5 m. away from the road line and shall be of such constructions giving fire resistance of 2 hours. The area of sanitary blocks and parking lock up garage shall be taken into account for the calculation of FSI.

iii) Suction tanks, soak pits, pump room (maximum 10 sq.m.), electric cabin of sub-station of gen-set area, electric meter room as per requirements, garbage shaft for wet and dry garbage separately with collection chamber, space required for fire hydrants, electrical and water-fittings, water tanks, dustbins etc.

iv) One watchman's cabin / booth not more than 5 sq. m. in built up area having min. 1.80 m. width or diameter. Cabin / booth shall be as per as possible at the entrance to the campus.

Note :- When a building abuts falling on three or more roads then above mentioned user, except (iv), shall be permissible in front setback facing the smaller road of less important from traffic point of view.

f) "Ramp" for basement in side and rear marginal distances subject to provisions under these regulations.

g) Fire escape staircase of single flight not less than 1.2 m.

h) Staircase mid-landing of 1.2 m. width with clear minimum headway of 2.1 m. below the mid-landing. However, clear distance from edge of landing to the plot boundary shall not be less than 1.8 mt.

i) Architectural projections - Architectural projections upto 1m. which will not reduce the side marginal spaces by 3 m., sky signs and Hoardings as per the policy approved by the Metropolitan Commissioner.

j) Construction of ottas, railings, barricades or supporting columns for canopy or porch shall not be permitted within the minimum required front marginal distances. However, steps may be permitted within 1.2 m. from the building line.

k) Supported double height terraces (within the building line) as mentioned in regulation no.18.26

l) Open parking spaces excluding the area under the fire driveways.

17.7 Exclusion of structures / projections for FSI calculation

i) Structures/ Projections /features / ornamental projection of glass façade permitted in marginal open spaces as mentioned in Regulation No.17.6 (a),(b),(c),(d) , (e)(iii), (f), (g), (h),(i), (j), (k).

ii) Stilt / Multi-storied floors /podium/ basement used as parking including passage therein.

iii) Areas covered by Porches, Entrance lobby / foyer, canopies, Air conditioning / air handling plant rooms, lift well, machine room and service floor of height not exceeding 1.8 m. for hospitals, shopping malls, plazas and Star category hotels (rating with three stars and above) on payment of premium as may be decided by the Commissioner.

iv) Area of structure for an effluent treatment plant as required as per the requirements of the Maharashtra Pollution Control Board or other relevant authorities.

- v) Rockery, Well and well structures, plant, Nursery, Water pool platform around a tree, Fountain bench, Chabutara with open top and unenclosed sides, Ramps, Compound wall, Gate slide / swing, Steps outside the buildings, Domestic working place (open to sky), Overhead water tank on top of the building, Stair Case, Refuge area for high rise buildings as specified in Regulation No. 18.28.6
- vi) Telecommunication tower, antenna and allied activities.
- vii) Atrium in shopping malls, public buildings on payment of premium as may be decided by the Metropolitan Commissioner.
- viii) Open to sky swimming pool of the top terrace and top most podium.
- ix) Structures permissible in recreational open space as per regulation No.15.3.7

17.8 Height of Building

17.8.1 (a) Height of building is allowed to the extent that is required to consume the maximum building potential on plot as given in the table under regulation no. 17.1 & 17.3, subject to other restrictions as per these regulations, and prior approval of Chief Fire Officer, PMRDA, if required under this regulation.

Notwithstanding anything contained in these regulations, for the building having height more than 36.0 mt., the minimum road width shall be 12.0 mtr. and for building having height equal to or more than 50.0 m., the minimum road width shall be 15.0 mtr.

17.9 Height Exemptions -

The appurtenant structures such as roof tanks and their supports, ventilating, air-conditioning, lift rooms and similar service equipment, stair cover, chimneys and parapet walls and architectural features not exceeding 1.20 m. in height and **Parking floors not exceeding 6.0 m in height**, shall not be included in computation of height of building **for the purposes of marginal distances only**.

17.10 Deleted

17.11 PARKING, LOADING AND UNLOADING SPACES: -

17.11.1 Parking spaces –

Wherever a property is to be developed or redeveloped, parking spaces at the scale laid down in these Regulations shall be provided. When additions are made to an existing building, the new parking requirements will be reckoned with reference to the additional space only and not to the whole of building but this concession shall not apply where the use is changed. The provisions for parking of vehicles shall be as given in Table No.7 & 8. Area required for parking spaces shall be increased by 50 % for PMRDA area.

17.11.2 General space requirements:-

- (i) **Types:** The parking spaces mentioned below include parking spaces in basements or on a floor supported by stilts, or on upper floors, covered or uncovered spaces in the plot and / or lock up garages. The height of the stilt shall generally be allowed upto 3 m.
- (iii) **Size of parking space:** The minimum sizes of parking spaces to be provided shall be as shown below in **Table No.6:-**

Table No- 6		
S.No.	Type of Vehicle	Minimum Size/ area of parking space
(1)	(2)	(3)
(a)	Motor vehicle	2.5 m X 5 m
(b)	Scooter, Motor Cycle.	1.0 m. x 2.0 m.
(c)	Bicycle	0.50 m x 1.4 m.
(d)	Transport vehicle	3.75 m. X 7.5 m.
Note:	In the case of parking spaces for motor vehicle, upto 50 percent of the prescribed space may be of the size of 2.3 m. X 4.5 m.	

- (iii) **Marking of parking spaces:** Parking space shall be paved and clearly marked for different types of vehicles.
- (iv) **Maneuvering and other ancillary spaces:** Off street parking space must have adequate vehicular access to a street and the area shall be exclusive of drives, aisles and such other provisions required for adequate maneuvering of vehicles.
- (v) **Ramps for Basement parking :-** Ramps for parking in basement should conform to the requirement of Regulation No.18.11

Table No 7
Off Street Parking Spaces

Sr. No.	Occupancy	One parking Space for every	Congested Area			Non Congested Area		
			Car	Scooter	Cycle	Car	Scooter	Cycle
1	2	3	4	5	6	7	8	9
1	Residential i) Multi family residential	(a) 2 Tenements having built-up area more than 100sq.m.	1	1	1	1	2	2
		(b) 3 tenements having built-up area between 50 to 100sq.m.	0	2	4	1	3	3
		(c) 4 tenements having built-up are upto50 sq.m.	0	4	4	0	5	5
	ii) Lodging establishments tourist homes, hotels with lodging accommodation.	(a) For every five guest rooms	1	2	2	1	3	3
	iii) Restaurants	(a) For hotel, eating houses 25sq.m. of area of restaurant including kitchen, pantry hall, dining rooms etc.	0	1	2	1	1	1
2	Institutional (Hospital, Medical Institutions)	For 100 sq.m. carpet area or fraction thereof.	1	2	2	1	4	4
3.	Assembly (theatres, cinema houses, concert halls, auditoria, assembly halls including those of college and hostels)	For every 40 Seats.	1	2	5	1	5	5
4.	MangalKaryalaya / Marriage Halls, Cultural Halls	For every 100 sq.m. built up area or fraction thereof.	1	2	3	2	4	6

5	Educational – i)Primary School	100 sq.m.built up area or fraction thereof the administration area.	0	2	2	1	2	2
	ii)Secondary School	100 sq.m.built up area or fraction thereof of the entire built up area.	0	1	4	0	2	8
	iii) College	100 sq.m.built up area or fraction thereof the administration area and public service area.	0	2	5	1	2	8
6.	Government or semipublic or private business buildings.	100 sq. m. built up area or fraction thereof	1	1	2	1	3	3
7.	Mercantile (markets, department al stores, shops and other Commercial users) including wholesale markets	100 sq. m. built up area or fraction thereof	1	1	2	1	3	3
8.	Industrial	300 sq. m.built up area or fraction thereof	0	2	2	1	3	3
9.	Storage (any type)	300 sq. m.built up area or fraction thereof	0	1	1	1	1	1
9.	Plots less than 200 sq.m. (any use)		0	1	1	0	1	1
Note-1) Plots upto 100 sq. m. as in the case of shops, row houses parking space need not be insisted.								
2) Fraction of parking unit need not be provided. However, in case where proportional number of vehicles is less than 1 (i.e. fraction) it will be rounded to the next full number.								
3)In case of independent single family residential bungalows having plot area upto 300 sq. m., parking space need not be insisted separately.								
4)Further a garage shall be allowed in rear or side marginal distance at one corner having minimum dimension of 2.5 m. x 5.0 m. & maximum dimension 3 m. x 6 m. i.e. minimum 12.5 sq.m. and maximum 18.0 sq.m. built up area.								
5)Mechanical Parking shall be permissible in case of parking provided over and above the requisite parking requirements stipulated under these regulations.

	iii) College	100 sq.m.built up area or fraction thereof the administration area and public service area.	0	2	6	1	4	10
								1982
6.	Government or semipublic or private business buildings.	100 sq. m. built up area or fraction thereof	1	2	4	2	4	4
7.	Mercantile (markets, department al stores, shops and other Commercials users) including wholesale markets	100 sq. m. built up area or fraction thereof	1	3	3	1	4	4
8.	Industrial	300 sq. m.built up area or fraction thereof	1	2	2	1	4	4
9.	Storage (any type)	300 sq. m.built up area or fraction thereof	0	2	2	1	2	2
9.	Plots less than 200 sq.m. (any use)		0	1	1	0	1	1

Note 1. -For plots upto 100 sq. m. as in the case of shops, row houses parking space need not be insisted.

Note 2.- Fraction of parking unit need not be provided. However, in case where proportional number of vehicles is less than 1 (i.e. fraction) it will be rounded to the next full number.

Note 3 :- In case of independent single family residential bungalows having plot area upto 300 sq. m., parking space need not be insisted separately.

Note 4 :- Further a garage shall be allowed in rear or side marginal distance at one corner having minimum dimension of 2.5 m. x 5.0 m. & maximum dimension 3 m. x 6 m. i.e. minimum 12.5 sq.m. and maximum 18.0 sq.m. built up area.

Note 5 - Mechanical Parking shall be permissible in case of parking provided over and above the requisite parking requirements stipulated under these regulation.

17.11.3 Off street parking space shall be provided with adequate vehicular access to a street, and the area of drives, aisles and such other provisions required for adequate maneuvering of vehicle shall be exclusive of the parking space stipulated in these regulations.

17.11.4 To meet the parking requirements as per these regulations, common parking area for group of buildings, open or multi-storeyed, may be allowed in the same premises.

17.11.5 In addition to the parking spaces provided for building of Mercantile (Commercial) like office, market, departmental store, shopping mall and building of industrial and storage, loading and unloading spaces shall be provided at the rate of one space for each 1000 sq. m. of floor area or fraction thereof exceeding the first 200 sq. m. of floor area, shall be provided. The space shall not be less than 3.75 m. x 7.5 m.

17.11.6 Parking lock up garages shall be included in the calculation for floor space for F.S.I. calculations.

- 17.11.7 The space to be left out for parking as given in this Regulation shall be in addition to the marginal distances left out for lighting and ventilation purposes. However, those spaces may be used for parking provided minimum distance of 3 m. (6.0 m. in case of special building) around the buildings is kept free of any parking or loading and unloading spaces. Such parking area may be allowed to cover on top by sheet roofing so as not to infringe the marginal distances to be kept open.
- 17.11.8 In case of parking spaces provided in basements, at least two separate ramps of adequate width and slope for entry and exit (as per Regulation No. 18.11) shall be provided preferably at opposite ends.
- 17.11.9 In case of Special Townships Areas, in addition to the regular parking area as per Regulation No.17.11, a space of 3.0 m. wide strip along the road on front shall be provided as visitors parking for the buildings with commercial or any use mixed with commercial. In such case, minimum front margin shall be 6.0 m. inclusive of 3.0 m. wide strip as above irrespective of the lesser front margin requirement in the applicable regulations.

18.0 REQUIREMENTS OF PARTS OF BUILDINGS:

This part sets out the standard space requirements of various parts of building, light and ventilation, the building services, fire safety, etc. The following parts of a building, wherever present, shall conform to the requirements given herein:

18.1 Plinth

- 18.1.1 The plinth of building shall be so located with respect to the surrounding ground level that adequate drainage of the site is assured. The height of the plinth shall not be less than 45 cm above the surrounding ground level. In areas subjected to flooding, the height of the plinth shall be at least 45cm. above the high flood level or greater than 45 cm. as may be decided by the Planning Authority in deserving cases.
- 18.1.2 **Interior Courtyards:** Every interior Courtyard shall be raised at least 0.15 m. above the surrounding ground level and shall be satisfactorily drained.
- 18.1.3 In the case of special housing schemes undertaken by public agencies for low income group and economically weaker section of society, the minimum height of plinth shall be not less than 30 cm.

18.2 Habitable Rooms

18.2.1 Size and dimension of Habitable Rooms

Internal dimensions and size of rooms for various uses and occupancies shall be as in table no.9 below.

Table No.9			
No	Occupancy	Minimum Area in sq. m.	Minimum width in m.
(1)	(2)	(3)	(4)
1	a) Any habitable room in residential building / room from any other occupancy like hostels, residential hotel, lodging & boarding/housing etc except kitchen.	9.5	2.4
	b) Any Habitable room from any other occupancy like hostels, residential hotel, lodging & boarding-houses etc.	9.5	2.4

2	Room in a single – room tenement in Housing scheme for EWS & LIG.	12.5	3.0
3	a) Room in two-room tenements-		
	i) one of the rooms	9.5	2.4
	ii) other room	7.5	2.4
	b) Room in a two-room tenement in Housing scheme for EWS & LIG		
	i) one of the room	9.0	2.5
	ii) other room	6.5	2.1
4	Single bedded room in a hostel of a recognized educational institutions	7.5	2.4
5	a) Shop in R 1 zone	6.0	1.8
	b) Shop in other than R 1 zones	10	2.0
6	Class room in an educational building	38	5.5
7	Institutional building (Hospital)		
	a) Special room	9.5	3
	b) General Ward	40	5.5
8	Cinema Hall, auditorium assembly hall etc.	In conformity with the Maharashtra Cinema Rules	

Note : Where enclosed balcony area is to be counted in minimum dimensions required for a room, then such enclosed width shall not be more than 1/3 of the dimension of that room.

18.2.2 Height of Habitable Rooms

The minimum and maximum height of a habitable room shall be given in Table No. 10 hereunder:

Table No. 10			
Height of Habitable Rooms			
No.	Occupancy	Minimum Height (m)	Maximum Height (m)
(1)	(2)	(3)	(4)
1	Flat Roof -		
	a) Any habitable room	2.75	4.2
	b) Habitable room in LIG Housing	2.6	4.2
	c) Air-conditioned habitable room	2.4	4.2

	d) Assembly Halls, Residential Hotels of 3 star category and above, Institutional, Educational, Industrial, Hazardous or storage occupancies, Departmental Stores, Malls, IT Buildings, Office Buildings, Entrance Halls and Lobbies to department stores and assembly halls.	3.6	4.2 Subject to written permission of the Metropolitan Commissioner greater height may be permitted.
	e) shops	3.0	4.2
2	Pitched roof-		
	a) Any habitable room	2.75	4.2
	b) Habitable room in EWS / LIG Housing.	2.6(average with 2.0 m. at the lowest point)	4.2(average with 3.2 m. at the lowest point)

Provided that -

- i) the minimum head-way under any beam shall be 2.4m.
- ii) in all occupancies, except those included in serial no. 1 (d) in the Table above, any height in excess of 4.2 m. shall be deemed to have consumed additional FSI of 50 % of the relevant floor area.

18.3 Kitchen

18.3.1 Kitchen size -

- i) The area of the kitchen where separate dining area is provided shall be not less than 5.5sq.m. with a minimum width of 1.8m, where a kitchen, which is intended for use as a dining area also, shall have a floor area of not less than 7.5 sq.m. with a minimum width of 2.1m.
- ii) In case of special housing scheme for low income group and economically weaker section of the society, PMAY, the size of a cooking alcove serving as cooking space shall not be less than 2.4sq.m. with a minimum width of 1.2m.. The size of individual kitchen provided in a two-roomed house shall be not less than 3sq.m. with a minimum width of 1.5 m.

18.3.2 Height: The room height of a kitchen measured from the surface of the floor to the lowest point in the ceiling (bottom of slab) shall not be less than 2.75 m.

18.3.3 Other Requirement: Every room to be used as kitchen shall have-

- i) unless separately provided, means for the washing of kitchen utensils which shall lead directly or through a sink to grated and trapped connection to the waste pipe;
- ii) an impermeable floor;
- iii) a flue, if found necessary,
- iv) window of not less than 1 sq.m. in area, opening directly on to an interior or exterior open space (in case of naturally ventilated space).

18.3.4 Requirements regarding pantry:-

A pantry shall have –

- i) A floor area of not less than 3 sq.m. with the smaller side not less than 1.4 m.
- ii) A sink for the cleaning of kitchen's utensils which shall drain through a grated and trapped connection to the waste water pipe where water borne sewerage system is not available and the grated connection shall be made to the pucca surface drain leading to soak pit. or other approved system of disposal; and
- iii) An impermeable floor and an impermeable dado 0.9 m. high.

18.4 Bath Rooms, Water Closets, Combined bath room and water closet

18.4.1 Size of bathroom and water closet -

- i) The size of a bathroom shall be not less than 1.5 sq.m. with a minimum width 1.0 m. The size of a water closet shall be not less than 1.0 sq.m with a minimum width of 0.9m. The minimum area of a combined bathroom and water-closet shall be 2.4 sq.m. with a minimum width of 1.0 m.
- ii) In the case of EWS/LIG/PMAY housing scheme the sizes of bathroom and water-closets shall be as follows:-
 - a) The size of independent water-closet shall be at least 0.90sq.m. with minimum width of 0.9m.
 - b) The size of independent bathroom shall be at least 1.20sq.m. with a minimum width of 1.00m
 - c) The size of combined bathroom & water-closet shall be atleast 1.80sq.m. with minimum width of 1.0m.

18.4.2 Height:- The Height of a bathroom or water closet measured from the surface of the floor to the lowest point in the ceiling (bottom of slab) shall be not less than 2.1 m.

18.4.3 Other Requirements - Every bathroom or water closet shall -

- i. be so situated that at least one of its walls shall open to external air unless mechanically ventilated;
- ii. not be directly over or under any room other than another water-closet, washing place, bath or terrace, unless it has a water-tight floor;
- iii. have platform or seat made of water-tight non-absorbent material;
- iv. be enclosed by walls or partitions and the surface of every such wall or partition shall be finished with a smooth impervious material to a height of not less than 1 m. above the floor of such a room;
- v. every water closet and/or a set of urinals shall have a flushing cistern of adequate capacity attached to it. In EWS/LIG/PMAY housing, however, no such flushing cistern need be provided;
- vi. be provided with an impervious floor covering sloping towards the drain with a suitable grade and not towards veranda or any other room;
- vii. in High Density housing, pour flush water seal latrines (NEERI type) may be permitted when the sewerage system is not available and the water table in the area is nothigh;
- viii. all the sewerage outlets shall be connected to the sewerage system. Where no such systems exist a septic tank shall be provided within the plot conforming to the appropriate standardized issued by NBC / CPHEEO.
- ix. have a window or ventilator, opening to a shaft or open space, of area not less than 0.3 sq.m. with side not less than 0.3m, unless mechanically ventilated.

18.4.4 Restriction on use of room containing water closet.

No room containing water closets shall be used for any purpose except as a lavatory and no such room shall open directly into any kitchen or cooking space by a door, window or other opening. Every room containing water closet shall have a door completely closing the entrance to it.

18.5 Ledge or Tand / Loft :-

Location and extent - Lofts may be provided over kitchen, habitable rooms, bathrooms, water closets, and corridor within a tenement in residential buildings, over shops and in industrial building, as mentioned in below Table No.11 subject to the following restrictions-

- i) The clear head room under the loft shall not be less than 2.2 m.
- ii) Loft in commercial areas and industrial building shall be located 2 m. away from the entrance.
- iii) Loft shall not interfere with the ventilation of the room under any circumstances.
- iv) The minimum headroom of Ledge or Tand / Loft shall be 2.2m.
- v) The maximum height between loft and ceiling shall be 1.5m.

Table No. 11		
Provision of Loft		
Sr. No.	Rooms over which Permitted	Maximum Coverage (Percentage to area or room below)
(1)	(2)	(3)
1	Kitchen/Habitable room	25
2	Bathroom, water closet, corridor	100
3	Shops with width up to 3m.	33
4	Shops with width exceeding 3m.	50
5	Industrial	33

18.6 Mezzanine floor

18.6.1 Size of mezzanine floor : The minimum size of a mezzanine floor, if it is used as a habitable room shall not be less than 9.50 sq.m. The aggregate area of the mezzanine floor shall not exceed 50 % of the built up area of that floor.

Note :- Mezzanine floor area shall be counted towards FSI

18.6.2 Height -The minimum height of a mezzanine floor shall be 2.2 mt. The headroom under mezzanine room shall not be less than 2.20 mt.

18.6.3 Other Requirements of mezzanine floor :

A mezzanine floor may be permitted over a room or a compartment provided:

- i) it conforms to the standards of living rooms as regards lighting and ventilation in case the size of mezzanine floor is 9.50 sq.m. or more.
- ii) it is so constructed as not to interfere, under any circumstances, with the ventilation of the space over & under it.
- iii) such mezzanine floor or any part thereof will not be used as a kitchen. iv) it is at least 1.8 mt. away from front wall of such rooms.
- v) access to the mezzanine floor is from within the respective room only.
- vi) in no case shall a mezzanine floor be closed so as to make it liable to be converted into unventilated compartments.

18.7 Store Room :-

18.7.1 Size :- The floor area of a store room in a residential building where light ventilation and height are provided at standards lower than as required for living room shall not be more than 3 sq. m. One or more store rooms may be allowed considering size of flat. Prayer/Pooja room may be allowed in same manner.

18.7.2 Height- The height of a store room shall not be less than 2.20m.

18.8 Garage

18.8.1 Size of private Garage :- The size of a garage in individual residential building shall be not less than 2.5 m. X 5 m. and not more than 3 mt. X 6 mt. The garage, if located in the side open space, shall not be constructed within 3.0m. from the main building, but at least 7.5mt away from any access road.

18.8.2 Size of Public Garage. The size of a public garage shall be calculated based on the number of vehicles to be parked.

18.8.3 Height of private Garage :-The minimum and maximum height of garage shall be 2.4 mt. and 2.75 mt. respectively.

18.8.4 Plinth of private Garage :-The plinth of garage located at ground level shall not be less than 15 cm. above the surrounding ground level.

18.8.5 Set back of Private Garage :-

The garage shall setback behind the building line for the street / road on to which the plot abut, and shall not be located affecting the access ways to the building. If the garage is not set-back as aforesaid, the Planning Authority may require the owner or occupier of the garage to discontinue use, of premises or to take such other measures as the Planning Authority may consider necessary in order to prevent danger or obstruction to traffic along the street.

18.8.6 Location of Garage in case of Corner Site:

When the site fronts on two streets, the location of a garage (in a corner plot) (if provided within the marginal distances) shall be on diagonally opposite the point of intersections.

18.9 Roofs

The roof of a building shall be so constructed or framed as to permit effective drainage of the rain water there from by means of sufficient rain water pipes of adequate size, wherever required, so arranged, jointed and fixed as to ensure that the rain water is carried away from the building without causing dampness in any part of the walls or foundations of the building or those of an adjacent building.

The Metropolitan Commissioner may require rain water pipes to be connected to a storm water drain through a covered channel formed beneath the public footpath or in any other approved manner, if not used for rain water harvesting

Rainwater pipes shall be affixed to the outside of the walls of the building or in recesses or cut formed in such walls.

Top Terrace of a building shall not be sub-divided and it shall have only common access. However, intermediate terraces may be allowed to be attached with flat.

18.10 Basement

One or more basements may be permissible for following uses and shall be constructed after leaving the prescribed set-back / required front open space / required front margin, and prescribed building lines:

- a) storage of household or other goods or ordinarily non-combustible material;
- b) strong rooms, bank lockers, safe deposit vaults, radio/laser therapy unit, mortuary and medical allied uses, etc.;
- c) air-conditioning equipments and other machines used for services and utilities of the building;
- d) parking spaces;
- e) D.G. set room, meter room and Electric substation (which will conform to required safety requirements);
- f) Effluent Treatment Plant, suction tank, pump room;
- g) users strictly ancillary to the Principal user.

Provided that the users mentioned at (a) & (b) above shall be permitted only by counting in F.S.I. subject to the following conditions:

- i) All requirements regarding access, safety (including fire safety), ventilations, etc. shall be complied with.
- ii) All the planning standards (particularly as regarding parking) should be strictly adhered to. The basement shall not be used for residential purpose. iii) Users other than (a) and (b) shall not be counted in FSI.

Provided that,

- i) If the basement is proposed flushing to average surrounding ground level, then such basement can be extended in side and rear margins upto 3 mt. from the plot boundary. If the basement is proposed to be constructed below podium then marginal distances shall be as that of podium.
- ii) Multilevel basements may be permitted if the basement is used for parking. The ramps of minimum 3.0 m. width for entry and exit of vehicles separately shall be provided. In case of bonafide hardship, the Metropolitan Commissioner may allow only one ramp with not less than 6.0 m. in width.

The basement shall have the following requirements -

- (i) Every basement shall be in every part at least 2.4 mt. in height from the floor to the underside of the roof slab or ceiling soffit of beam.
- (ii) Adequate ventilation shall be provided for the basement with a ventilation area not less than 2.5% of the area of the basement. The standard of ventilation shall be the same as required by the particular occupancy according to these regulations. Any deficiency may be met by providing additional adequate mechanical ventilation in the form of blowers, exhaust fans, air conditioning systems etc.
- (iii) The minimum height of the ceiling of any basement shall ordinarily be 0.9 mt. and maximum shall be 1.2 mt. above the average surrounding ground level. However it does not apply to the mechanically ventilated basements. In such cases, basement may also be allowed flushing to the average ground level.
- (iv) Adequate arrangement shall be made such that surface drainage does not enter the basement.
- (v) The walls and floor of the basement shall be water-tight and be so designed that the effect of the surrounding soil and moisture, if any, is taken into account in design and adequate damp proofing treatment is given; and
- (vi) The access to the basement shall be separate from the main and alternate staircase providing access and exit from higher floors. Where the staircase is continuous the same shall be of enclosed type serving as a fire separation from the basement floor and higher floors Open ramps shall be permitted if they are constructed within the building line subject to the provision of (iv) above.

18.11 Ramp**A) Non Vehicular Ramp-**

All the requirements of stairways in Regulation No 18.27 shall apply mutatis mutandis to non-vehicular ramp. In addition, the following requirement shall be complied with:

- a) Ramps with a slope of not steeper than 1 in 10 may be substituted for and shall comply with all the applicable requirements of required stairways as to enclosure, capacity and limited dimensions. In certain cases steeper slopes may be permitted but in no case greater than 1 in 8. Ramps shall be surfaced with approved non-slip slipping material. Provided that in the case of public offices, hospitals, assembly halls, etc. the slope of the ramp shall not be more than 1: 12.
- b) The minimum width of the ramps in hospitals shall be 2.25 m.
- c) Handrails shall be provided on both sides of the ramp.
- d) Ramps shall lead directly to outside open space at ground level or courtyards or safe place.
- e) For building above 24 m. in height access to ramps from any floor of the building shall be through smoke stop door.
- f) When there is a difference in level between connected areas for horizontal exits, ramps not more than 1 in 10 slope shall be provided; steps shall not be used.
- g) For High Rise building, if marginal open space is greater than minimum 6 m. then ramps may be permitted.

B) Ramp to basements and upper Storeys for vehicles-

For parking spaces in a basement and upper floors, at least two ramps of minimum 3.00mt. width or one ramp of 6.00 meter width and slope not more than 1:10 shall be provided preferably at the opposite ends.

C) In case of special building mentioned in Regulation No 2.77.13, ramp may be permitted in the side and rear marginal distances after leaving 6.0 mt distance from the plot boundary for movement of fire-fighting vehicles. Provided that when a building abutting 3 or more roads, then ramps may be allowed in front marginal distances facing the smaller road or less important road from traffic point of view.

18.12 Podium

Podium for parking of the vehicle may be permitted with following requirements / conditions

- i) Height of podium shall be at least 2.4 m. in height from the floor to the soffit of beam;
- ii) Podium shall not be provided in front setback space. Podium shall be allowed at a distance of **6.00 m.** from the plot boundary;
- iii) Podium shall only be used for parking and it shall be designed to take load of fire engine;
- iv) Podium shall be permissible for plots admeasuring 2000 sq.m. and above;
- v) Podium shall be permissible for joining two or more separate buildings in a plot buildings or wings of buildings subject to availability of manoeuvring space for Fire Engine. In such case the distance between two buildings/wings of the building shall be provided as otherwise required under these regulations;
- vi) The consent from the Chief Fire Officer, PMRDA shall be necessary before permitting the aforesaid podium;
- vii) For the plots having area 2000Sq.m. or more, recreational open space may be permitted on Podium subject to condition that out of required open/recreational space , at least 50% shall be provided on ground.

18.13 Balcony

Balcony or balconies of a minimum width 1.00m. and maximum of 2.00m. may be permitted at any floor except ground floor, not more than 15% of the built up area of the same floor and such balcony projection shall be subject to the following conditions:

- (i) No balcony shall reduce the marginal open space to less than 3 m. upto 24 m. building height. For height 24 m. and more no balcony shall reduce the marginal open space to less than 6mt;
- (ii) No balcony shall be allowed on ground floor which shall reduce minimum required front setback or marginal distance;
- (iii) The width of the balcony shall be measured perpendicular to the building up to the outermost edge of balcony;
- (iv) The balcony should not be enclosed and declaration regarding this shall be submitted by the owner/developer/Architect at the time of approval to the building permission and the same shall be mention in the agreement or sale deed;
- (v) Nothing shall be allowed beyond the outer edge of balcony.

18.14 Stilt-

Stilt may be permitted on any floor subject to height of floor upto the soffit of the beam shall not be less than 2.4 m. In case of stilt on ground floor, plinth shall not be more than 15 cm from surrounding ground level.

18.15 Lighting and Ventilation of Rooms

i) Adequacy and manner of provision-

The minimum aggregate area of opening of habitable rooms and kitchens excluding doors shall be not less than 1/10th of floor area.

No portion of a room shall be assumed to be lighted if it is more than 7.5 m. from the opening assumed for lighting / ventilation of the portion, provided additional depth of any room beyond 7.5 m. may be permitted subject to provision of proportionate increase in the opening.

Where the lighting and ventilation requirements are not met through day lighting and natural ventilation, the same shall be ensured through artificial lighting and mechanical ventilation as per latest version of Part VIII - Building Services Section, Lighting and Ventilation of National Building Code of India published by the Bureau of Indian Standards. In the case of special types

of buildings requiring artificial lighting and air-conditioning for special types of manufacturing or other process the requirements about natural daylighting and ventilation may be relaxed.

ii) Ventilation Shaft:-

For naturally ventilating the space for water closets and bath room of staircase, if not opening on the exterior side of a building, open on the ventilation shaft, the size of which shall not be less than the values given below in **Table No. 12**

Table No. 12		
Height of building in m.	Size of ventilation in sq. m	Minimum width of shaft in m.
Up to 10	1.2	0.90
Up to 12	2.4	1.20
Up to 18	4.0	1.50
Up to 24	5.4	1.80
Up to 30	8.0	2.40
Above 30	9.0	3.0

- iii)** Artificial Lightning and Mechanical ventilation - where lighting and ventilation requirements are not met through day-lighting and natural ventilation, they shall be ensured through artificial lighting and mechanical ventilation in accordance with the provisions of Part 8, Building Services- Section 1, Lighting and Ventilation, **National Building Code of India, 2005.**
- iv)** In residential lodging hotels and other establishments where attached toilets are provided with mechanical ventilation system the size of ventilation shaft prescribed in this regulation stand relaxed.

18.16 Overhead Tanks:

Every overhead water storage tank shall be maintained in a perfectly mosquito-proof condition by providing a properly fitting hinged cover and every tank more than 1.5 m. in height shall be provided with a permanently fixed iron ladder.

18.17 Parapet

Parapet walls and handrails provided on the edges of roof terraces, balcony etc. shall not be less than 1.05 mt. and not more than 1.20 mt. in height from the finished floor level.

18.18 Cabin:

Where cabins are provided, a clear passage not less than 0.9 m. wide will be maintained. The size of a cabin shall not be less than 3 sq.m. and the distance from the farthest space of cabin to the nearest exit shall not be more than 18.5 mt if the cabin does not derive direct light and ventilation from any open spaces / mechanical means, its maximum height shall be 2.2 m.

18.19 Society Office:

In the case of multi-storied multi-family dwelling apartments constructed for co-operative housing societies or apartment owner's co-operative societies, a Society Office upto 12 sq.m. shall be provided on the ground floor or uppermost floor. If the number of flats are more than 20 the maximum size of the Society Office shall be of dimension of 20 sq.m.

18.20 Wells

Wells intended for supply of water for human consumption or domestic purposes may be permitted at suitable place.

18.20.1 Requirements: The well shall:

- (a) have minimum internal diameter of not less than 1 m.;
- (b) be constructed to a height not less than 1 m. above the surrounding ground level to form a parapet or curb and to prevent surface water from following into a well, and shall be surrounded with a paving constructed of impervious material which shall extend for a distance of not less than 1.8 m. in every direction from the parapet or the curb forming the well head and the upper surface for such paving shall be sloped away from a well;
- (c) be a sound and permanent construction (PUCCA) throughout. Temporary exposed (KUTCHA) wells shall only be permitted in fields or gardens for purposes of irrigation; and;
- (d) the interior surface of the lining or walls of the well shall be rendered impervious for depth of not less than 1.8 m. measured from the level of the ground immediately adjoining the well-head.

18.21 Septic Tanks

Every building, group of buildings together shall be either connected to the public Drainage system or provided with sub-soil dispersion system in the form of septic tank which shall be governed by the following or any other alternative design and specifications

1. Design of septic tank:-

Where a septic tank is used for sewage disposal, the location, design and construction of the septic tank shall conform to requirements of the following Regulation

2. Location of Septic Tanks and Subsurface Absorption System:- A subsoil dispersion system shall not be closer than 18.00 m. of any source of drinking water such as well, to mitigate the possibility of bacterial pollution of water supply. It shall also be as far removed from the nearest habitable building as economically feasible but not closer than 6 m. to avoid damage to the structures.

3. Requirements:

- (a) **Dimensions of Septic Tanks:** Septic tanks shall have minimum width of 75 cm., minimum depth of 1 m. below the water level and a minimum liquid capacity of 1 cu.m. Length of tanks shall be 2 to 4 times the width;
- (b) Septic tanks may be constructed of brick work, stone masonry, concrete or other suitable materials;
- (c) Under no circumstances should effluent from a septic tank be allowed into an open channel drain or body of water without adequate treatment;
- (d) Minimum nominal diameter of pipe shall be 100 mm. further, at junctions of pipes in manholes; direction of flow from a branch connection should not make an angle exceeding 45 degree with the direction of flow in the main pipe;
- (e) The gradients of land drains under drainage as well as the bottom of dispersion trenches and soak way should be between 1:300 and 1:400;
- (f) Every septic tank shall be provided with ventilating pipe of at least 50 mm diameter. The top of the pipe shall be provided with a suitable cage of mosquito proof wire mesh. The ventilating pipe shall extend to a height, which would cause no smell nuisance to any building in the area. Generally, the ventilating pipe may extend to a height of about 2 m. when the septic tank is at least 15 m. away from the nearest building and to a height of 2 m. above the top of the building when it is located closer than 15 m;
- (g) When the disposal of septic tank effluent is to seepage pit, the seepage pit may be of any suitable shape with the least cross sectional dimension of 90 cm. and not less than 100 cm. in depth below the invert level of the inlet pipe. The pit may be lined with stone, brick or concrete blocks with dry open joints which should be backed with at least 7.5 cm. of clean coarse aggregate. The lining above the inlet level should be finished with mortar. In the case of pits of large dimensions, the top portion may be narrowed to reduce the size of the RCC

cover slabs. Where no lining is used, especially near trees, the entire pit should be filled with loose stones. A masonry ring may be constructed at the top of pit to prevent damage by flooding of the pit by surface run off. The inlet pipe may be taken down to a depth of 90 cm. from the top as an anti-mosquito measure;

- (h) When the disposal of septic tank effluent is to a dispersion trench, the dispersion trench shall be 50 to 100 cm. deep and 30 to 100 cm. wide excavated to a slight gradient and shall be provided with 15 to 25 cm. of washed gravel of crushed stones. Open jointed pipes placed inside the trench shall be made of unglazed earthenware clay or concrete and shall have minimum internal diameter of 75 to 100 mm. No dispersion trench should not be longer than 30 m. and trenches should not be placed closer than 1.8 mt.

18.22 Boundary Wall

The requirements of the boundary wall are given below:

- (a) Except with the special permission of the Metropolitan Commissioner the maximum height of the compound wall shall be 1.5 m. above the centre line of the front street. Compound wall upto 2:4 m. height may be permitted if the top 0.9 mt is of open type construction (railings). However Metropolitan Commissioner may allow the plinth and the boundary wall up to 0.90 m. above ground level and balance height may be of open railing or as decided by him;
- (b) In case of corner plot the height of boundary wall shall be restricted to 0.75 m. for a length equal to fanning of the road on the front and side of the intersections and balance height of 0.75 m. if required in accordance with (a) may be made of open construction (railings);
- (c) However, the provisions of (a) and (b) are not applicable to boundary wall of jails. In industrial buildings, electric sub stations, transformer stations institutional buildings like sanatoria, hospitals, industrial buildings like workshops, factories and educational buildings like schools, colleges, including the hostels, and other uses of public utility undertakings. Height upto 2.4 m. to boundary walls of these types of building may be permitted by the Metropolitan Commissioner.

18.23 Letter Box Room

A letter box of appropriate dimensions shall be provided on the ground floor of residential and commercial buildings with five and more storeys.

18.24 Meter Rooms

For all buildings above 15 m in height and in special occupancies, like educational, assembly, institutional, industrial, storage, hazardous and mixed occupancies with any of the aforesaid occupancies having area more than 500sq.m. on each floor, provision shall be made for an independent and ventilated meter (service) room, as per requirements of electric (service) supply undertakings on the ground floor with direct access from outside for the purpose of termination of electric supply from the licensee's service and alternative supply cables. The door/doors provided for the service room shall have fire resistance of not less than two hours.

18.25 Chimneys

Chimneys, where provided, shall conform to the requirements of IS: 1646-1960 Indian Standard Code of Practice for Fire Safety of Building. Provided that the Chimneys shall be built at least 0.9 m. above flat roof. In the case of sloping roofs, the chimney top shall not be less than, 0:6 m. above the ridge of the roof in which the chimney penetrates.

18.26 Supported Double Height Terrace (within the building line)

Supported double height terraces (open terraces with railing having minimum height equal to two floors) within the building line, not exceeding 20% of the built up area of the same floor may be permitted without counting in FSI subject to payment of premium as decided by Metropolitan Commissioner.

18.27 EXIT REQUIREMENTS

18.27.1 General-The following general requirements shall apply to exits.

- (a) An exit may be a doorway; corridor, passageway(s) to an internal staircase, or external staircase, or to a VERANDA or terrace(s), which have access to the street, or to the roof of a building or a refuge area. An exit may also include a horizontal exit leading to an adjoining building at the same level;
- (b) Lifts and escalators shall not be considered as exits;
- (c) Every exit, exit access or exit discharge shall be continuously maintained free of all obstructions or impediments to full use in the case of fire or other emergency;
- (d) Every building meant for human occupancy shall be provided with exits sufficient to permit safe escape of occupants in case of fire or other emergency;
- (e) In every building, exits shall comply with the minimum requirements of this part, except those not accessible for general public use;
- (f) No building shall be altered to reduce the number, width or protection of exits to less than that required;
- (g) Exits shall be clearly visible and the routes to reach the exits shall be clearly marked and sign posted to guide the occupants to the floor concerned;
- (h) The floors of area covered for the means of exit shall be properly illuminated;
- (i) All exits shall provide continuous means of egress to the exterior of a building or to an exterior open space leading to a street and;
- (j) Exits shall be so arranged that they shall be reached without passing through another occupied unit.

18.27.2 Types of exits -

Exits shall be either of horizontal or vertical type. An exit may be doorway, corridor, and passageways to an internal staircase or external staircase, ramps or to a veranda and/or terraces which have access to the street or to roof of a building. An exit may also include a horizontal exit leading to an adjoining building at the same level. Lifts and escalators shall not be considered as exits.

18.27.3 Number and Size of Exits

The requisite number and size of various exits shall be provided, based on number of occupants in each room and floor based on the occupant load, capacity of exits; travel distance and height of building as per provisions of Regulation no. 18.27.5 to 18.27.8

18.27.4 Arrangement of Exits

Exits shall be so located so that the travel distance on the floor shall not exceed 22.5 m. for residential, education, institutional and hazardous occupancies and 30 m. for assembly business, mercantile, industrial, storage & hazardous occupancies. Wherever more than one exit is required for a floor of a building, they shall be placed as remote from each other as possible. All the exits shall be accessible from the entire floor area at all floor levels.

18.27.5 Occupant Load -

For determining the exits required the number of persons within any floor area or the occupant load shall be based on the actual number of occupants but in no case, less than that specified in **Table No. 13** below:

Table No. 13 Occupant Load		
Sr. No.	Group of Occupancy	Occupant Load floor Area in sq.mt. per person
(1)	(2)	(3)
1	Residential	12.5
2	Educational	4.00
3	Institutional	15 (See Note-1)
4	Assembly	
	(a) with fixed or loose seats and dance floors	0.6 (See Note-2)
	(b) without seating facilities including dining rooms	1.5 (See Note-2)
5	Mercantile	
	(a) Street floor and sales basement	3
	(b) Upper sale floors	6
6	Business and industrial	10
7	Storage	30
8	Hazardous	10

Note 1 - Occupant load in dormitory portions of homes for the aged, orphanages, asylums, etc. where sleeping accommodation is provided shall be calculated at not less than 7.5 sq.m. floor area per person.

Note 2 - The gross area shall include, in addition to the main assembly room or space, any occupied connecting room or space in the same storey or in the storeys above or below where entrance is common to such rooms and spaces and they are available for use by the occupants of the assembly space. No deductions shall be made in the gross area for corridors, closets or other sub-divisions. The area shall include all space serving the particular assembly occupancy.

18.27.6 Capacity of Exits -

- 1) Occupants per unit exit width shall be in accordance with **Table No.14**

Table No. 14				
Occupants per Unit Exit Width				
Sr.No.	Group or Occupancy	Number of Occupants		
		Stairways	Ramps	Doors
1	Residential	25	50	75
2	Educational	25	50	75
3	Institutional	25	50	75
4	Assembly	40	50	60
5	Business	50	60	75
6	Mercantile	50	60	75
7	Industrial	50	60	75
8	Storage	50	60	75
9	Hazardous	25	30	40

- 2) For the dormitory portions of homes for the aged, orphanages, mental hospitals, etc. these multipliers will be doubled.
- 3) The gross floor area shall include, in addition to the main assembly rooms or space, any occupied connecting room or space in the same storey or in the storey above or below where entrance is common to such rooms and space and they are available for use by the occupants of the assembly place.
- 4) No deductions shall be made in the gross area of the corridors, closets or other sub-divisions; the area shall include all space serving the particular assembly occupancy shall be reckoned.

18.27.7 Provision for Staircase-

All buildings having height more than ground floor shall have provision of staircase. The special buildings shall have two staircases out of which one shall be fire escape staircase. They shall be of enclosed type. At least one of them shall be on external walls of buildings and shall open directly to the exterior, interior open space or to an open place of safety. Further, the provision or otherwise of alternative staircases shall be subject to the requirements of travel distance being complied with.

Provided that for purely residential building/residential building along with ground floor mix use having height upto 24 meters and built up area on any floor does not exceed 500 sq.mts. an additional staircase shall not be insisted. Provided also that in such cases width of stair case shall be minimum 1.50 mt.

18.27.8 Width of Stairways-

Notwithstanding anything contained in regulations, the following minimum width provision shall be made for staircases flight/corridor.

Table No. 15		
Type of Building	Built-up area on floor served by single staircase	
	upto 5 sq.m.	More than 500 sq.m.
Multi-Storeyed Residential Buildings	1.20 m.	1.50 m
Residential Hotel Buildings	1.50 m.	1.80 m
Assembly buildings like auditoria, theatres, Cinemas etc., Mangalkaryalaya, marriage halls.	1.80 m.	2.00 m.
Institutional Buildings like hospitals & Educational	2.00 m.	2.30 m.
All other public buildings including commercial buildings.	1.50 m.	1.80 m.

Note:-

- i) for individual house and row housing with 2 storey's, the minimum shall be 0.75m.
- ii) The width of the mid-landing/quarter landing should not be more than 1.5 times and the floor landing should not be more than two times of the width of the stair flight.

18.28 Other Requirements of Individual Exits- The detailed requirements of individual exits are given in Regulation no. **18.28.1 to 18.28.8.**

18.28.1 Doorways:

- (i) Every exit doorway shall open into an enclosed stairway, a horizontal exit or a corridor or passage way providing continuous and protected means of egress;
- (ii) No exit doorway shall be less than 90 cm in width in case of residential and 100 cm. in width in case of other buildings. Doorways shall be not less than 200 cm. in height. Doorways for bathrooms, water closet, stores etc. shall be not less than 75 cm. wide;
- (iii) Exit doorways shall open outwards, that is away from the room but shall not obstruct the travel along any exit. No door, when open, shall reduce the required width of stairway or landing to less than 90 cm. Overhead or sliding doors shall not be installed;
- (iv) Exit door shall not open immediately upon a flight of stairs, a landing equal to at least the width of the door shall be provided in the stairway at each doorway. Level of landing shall be the same as that of the floor which it serves;
- v) Exit doorway shall be openable from the side which they serve without the use of a key;
- vi) Mirrors shall not be placed in exit ways or exit doors to avoid confusion regarding the direction of exit.

18.28.2 Revolving Doors :

Revolving doors shall not be used as required exits except in residential, business and mercantile occupancies, but shall not constitute more than half the total required door width.

18.28.3 Stairways:

- i) Interior stair shall be constructed of non-combustible materials throughout;
- ii) Interior staircase shall be constructed as a self-contained unit with at least one side adjacent to an external wall and shall be completely enclosed;
- iii) A staircase shall not be arranged around a lift shaft;
- iv) Hollow combustible construction shall not be permitted;
- v) The minimum width of treads without nosing shall be 25 cm. for an internal staircase for residential buildings. In the case of other buildings, the minimum treads shall be 30 cm. The treads shall be constructed and maintained in a manner to prevent slipping;
- vi) The maximum height of riser shall be 19 cm. in the case of residential buildings and 15 cm. in the case of other buildings. They shall be limited to 15 per flight;
- vii) Handrails shall be provided with a minimum height of 100 cm. from the centre of tread, to the top of the handrails. Balusters / railing shall be provided such that the width of staircase does not reduce;
- viii) Floor indicator - The number of each floor shall be conspicuously painted in figures at least 15 cm. large on the wall facing the flights of a stairway or at such suitable place as is distinctly visible from the flights;
- ix) The minimum headroom in a passage under the landing of a staircase shall be 2.2 m;
- x) For building more than 15m. in height or more access to main staircase shall be gained through at least half an hour fire resisting automatic closing doors placed in the enclosing wall of the staircase. It shall be a swing type door opening in the direction of the escape;
- xi) No living space, store or other fire risk spaces shall open directly into the external staircase;
- xii) External exit door of staircase enclosure at ground level shall open directly to the open spaces or should be reached without passing through any door other than a door provided to form a large lobby;
- xiii) In the case of assembly, institutional, residential hotels, industrial and hazardous occupancies, the exit sign with arrow indicating the way to the escape route shall be provided at a height of 0.5m. from the floor level on the wall and shall be illuminated by electric light connected to corridor circuits. All exit way marking signs should be flush with the wall and so designed that no mechanical damage shall occur to them due to moving of furniture or other heavy equipments. Further all landings of floor shall have floor indication boards indicating the floor number. The floor indication board shall be placed on the wall immediately facing the flight of stairs and nearest to the landing. It shall be of size not less than 0.5m. x 0.5m;
- xiv) In case of single staircase it shall terminate at the ground floor level and the access to the basement shall be by a separate staircase. Wherever the building is served by more than one staircase, one of the staircases may lead to basement levels, provided the same is separated at ground level by either a ventilated lobby or cut-off screen wall without opening, having a fire resistance of not less than 2 hours with discharge point at two different ends or through enclosures. It shall also be cut off from the basement areas at various basement levels by a protected and ventilated lobby / lobbies.

18.28.4 Fire escape or external stairs –

Fire escape staircase, when provided, shall comply the following:

- i) External stairs shall always be kept in sound operable conditions;
- ii) All external stairs shall be directly connected to the ground;
- iii) Entrance to the external stairs shall be separate and remote from the internal staircase;
- iv) Care shall be taken to ensure that no wall opening or window opens on to or close to an external stair;
- v) The route to the external stairs shall be free of obstructions at all times;
- vi) The external stairs shall be constructed of non-combustible materials, and any doorway leading it shall have the required fire resistance;
- vii) No external staircase, used as a fire escape, shall be inclined at an angle greater than 45 degree from the horizontal;

- viii) External stairs shall have straight flight not less than 1250 mm wide with 250 mm treads and risers not more than 190 mm. The number of risers shall be limited to 15 per flight;
- ix) Handrails shall be of a height not less than 1000 mm and not exceeding 1200 mm. There shall be provisions of balusters with maximum gap of 150 mm.
- x) The use of spiral staircase shall be limited to low occupant load and to a building not exceeding 9 m in height. A spiral stair case shall be not less than 1500 mm in diameter and shall be designed to give adequate headroom;
- xi) Unprotected steel frame staircase will not be accepted as means of escape. However, steel staircase in an enclosed fire rated compartment of 2 h will be accepted as means of escape.

18.28.5 Corridors and passageways:

- i) The minimum width of a corridor shall not be less than 75cm. in the case of 2 storeys row housing residential buildings and 100cm. In the case of other buildings and actual width shall be calculated based on the provision of Regulations No 18.27.3 to 18.27.5 (both inclusive);
- ii) Where there is more than one staircase serving a building, there shall be at least one smoke-stop door in the space between the staircases;
- iii) Exit corridors & passageways shall be of width not less than the aggregate required width of exit doorways leading from them in the direction of travel of the exterior/stairways;
- iv) Where stairways discharge through corridors & passageways the height of the corridors & passageways shall not be less than 2.4 mt;
- v) All means of exit including staircases, lifts, lobbies & corridors shall be adequately ventilated.

18.28.6 Refuge Area

For buildings more than 24 m in height, refuge area of 15 sq.m. or an area equivalent to 0.3 sq.m. per person to accommodate the occupants of two consecutive floors whichever is higher shall be provided as under:

The refuge area shall be provided on the periphery of the floor or preferably on a cantilever projection and open to air at least on one side protected with suitable railings.

- a) For floors above 24 m and upto 39 m—One refuge area on the floor immediately above 24m.
- b) For floors above 39 m—One refuge area on the floor immediately above 39 m and so on after every 15 m. Refuge area provided in excess of the requirements shall be counted towards FSI. However, area remained in excess because of planning constraints shall not more than 10% of required refuge area shall not be counted in FSI.

18.28.7 Lifts and Escalators:-

a) Lifts :-

Provision of lift shall be made for all buildings more than 15mt in height. In case the height of the building is more than 24.0 mt , at least two lifts shall be provided. However, in the case of a proposal to add one additional floor to an existing building having a lift, it will not be necessary to raise the existing lift to the additional floor.

- (a) All the floors shall be accessible for 24 hours by the lifts. The lifts provided in the buildings shall not be considered as a means of escape in case of emergency;
- (b) Grounding switch at ground floor level to enable the fire service to ground the lift cars in any emergency shall also be provided;
- (c) The lift machine room shall be separate and no other machinery shall be installed therein;
- (d) The planning and design of lifts including their number, type and capacity depending on the occupancy of the building, the population of each floor based on the occupant load and the building height shall be in accordance with **Section 5 - Installation of Lifts and Escalators of Part 8- Building Services, of the National Building Code of India, 2005.**

b) Escalators :

Escalators may be permitted in addition to required lifts. Such escalators may be permitted in atrium area in shopping malls / public buildings.

18.28.8 Fire Lift

Where applicable, fire lifts shall be provided with a minimum capacity for 8 passengers and fully automated with emergency switch on ground level. In general, buildings 15 m in height or above shall be provided with fire lifts. In case of fire, only fireman shall operate the fire lift. In normal course, it may be used by other persons. Each fire lift shall be equipped with suitable inter- communication equipment for communicating with the control room on the ground floor of the building. The number and location of fire lifts in a building shall be decided after taking into consideration various factors like building population, floor area, compartmentation, etc.

18.28.9 FIRE PROTECTION REQUIREMENTS

All buildings shall be planned, designed and constructed to ensure fire safety and this shall be done in accordance with Part IV of Fire Protection of National Building Code of India and Maharashtra Fire Prevention and Life Safety Measures Act, 2006, as prescribed in Part VI of these Regulations. The provisions of Part VI shall deem to be modified time to time as per the Fire Protection of National Building Code of India and Maharashtra Fire Prevention and Life Safety Measures Act, 2006. In case of special buildings, the building schemes shall also be cleared by the Chief Fire Officer of the PMRDA.

18.29 Additional requirements in case of Housing Schemes:

Following amenities shall be provided in a housing scheme and shall not be counted in FSI:

- i. Fitness Centre, Crèche, society office cum letter box room, laundry room, admeasuring area of about 20 sq.m. in schemes having minimum 100 flats and thereafter additional 20 sq.m. area for every 300 flats.
- ii. Sanitary block for servants having maximum area of 3.00 sq.m. in schemes having minimum 100 flats and thereafter additional 3.00 sq.m. area for every 200 flats.
- iii. Drivers room of size 12 sq.m. with attached toilet in schemes having minimum 100 flats and thereafter additional 10 sq.m. area for every 300 flats.

PART – III
LAND USE CLASSIFICATION AND PERMISSIBLE USES.

19.1 RESIDENTIAL ZONE - R 1

Residential Zone R1 includes Residential plots abutting on roads below 9 m. in congested area and below 12 m. width in outside congested area.

19.1.1 The following uses and accessory uses to the principal use shall be permitted in buildings or premises in Zone R1, subject to other regulations:

- (i) Any residences.
- (ii) Hostels for students / working men/women, with or without boarding facilities.
- (iii) Old age home in independent building on road having width 9.00 meter and above,
- (iv) Customary Home occupation i.e. occupations customarily carried out by the members of the household without employing hired labour and shall include stitching, embroidery, button making etc. with or without motive power. If motive power is used, the total electricity load should not exceed 1 HP.
- (v) Medical and Dental Practitioner's Dispensaries including pathological laboratory, diagnostic clinics, polyclinics, counselling centre, clinics, to be permitted on any floor. Maternity homes, clinics, nursing home with indoor patients on ground or stilt floor or on first floor with separate means of access of staircase from within the building or outside, may be permitted but not within the prescribed marginal open spaces in any case and with the special permission of Commissioner. Maternity Homes and Hospitals are permitted for maximum 20 beds.
- (vi) Professional Offices in residential tenement for own purpose not exceeding carpet area of 50 sq. m. each.
- (vii) Community halls, welfare centre, gymnasias (each not exceeding 150 sq.m.)
- (viii) Primary and nursery schools including students' hostels in independent buildings, on widths of roads 9.00 m. or above and nursery schools on road having width 6.00 meter or above.
- (ix) Crèche, Day-care centre in an independent building or parts of building upto 50 sq.m.
- (x) Private coaching classes, mess in an independent building or parts of building upto 50 sq.m. with strictly subjected to separate parking facility in the same premises.
- (xi) Religious buildings.
- (xii) Public/ City Libraries and Museums in independent building or on any floor of the building with special permission of Metropolitan Commissioner if the user will not create nuisance to the occupant of the building.
- (xiii) Club Houses or gymkhanas, not conducted as a business, on independent plots which may have an extension counter or only branch of a bank, in such club-houses or gymkhana.
- (xiv) Public Parks or Private Parks, gardens, Yoga Centres and play field in independent plots not being used for business purpose, but not amusement parks.
- (xv) Bus shelters, Taxi-Rickshaw stands trolley bus shelters, Railway Station, Metro station, BRT stand, cycle stand.
- (xvi) Convenience shops not more than 20 sq. m., each only on ground floor, for the purposes of food grain shops (Ration shops). Pan shops Tobacconist, Shops for collection and distribution of cloths and other materials for cleaning and dyeing establishments, Darners, Tailors, Groceries, Confectionery and other general provisions. Hair dressing saloon and Beauty Parlour, bicycle hire and repair, Hat repair, shoe repair and shining shops, vegetable and fruit stalls/ shops, fish or/and meat shops, Milk shops, Floweriest, Bangles and Newspaper stalls, wood, coal and fuel merchants, Book and stationery etc. Medicine and Chemist shops, watch & mobile repairs and motorcycle repair shops. The Commissioner may from time to time add or alter or amend the above list.
- (xvii) Police Station, police chowky, Government and Metropolitan sub-offices, posts and Telegraph Offices, Branch offices of Banks, with safe Deposit Vaults, Electrical substations, Fire Aid posts along with home-guards and Civil Defence Centres, essential Public utility and Pumping stations and water installations and ancillary structures thereof required to cater to the local area.

- (xviii) Electronic Industry of the Assembly type (not manufacturing type) with the following restrictions –
 - (a) Motive Power shall not exceed 1 H.P.
 - (b) Area occupied shall not exceed 100 sq.m.
- (xix) Information technology establishment (ITE) (pertaining to software only) on the plots/ premises fronting on roads having width 9.00 m. and above.
- (xx) Flour mill and wet / dry masala grinding / book binding subject to following conditions:
 - (a) It is located on ground floor.
 - (b) Adequate care has been taken in structural design.
 - (c) It does not cause any nuisance to the neighbour and residents of upper floor.
 - (d) Power requirement does not exceed 10 hp. Additional H.P. if required, may be granted with special written permission of Commissioner.
- (xxi) Places for disposal, for human bodies, like Burial grounds, cremation grounds on a road having width of 9 m. and above subject to the approval from PMRDA.
- (xxii) Agricultural, horticultural and allied uses (except agro-based industries).
- (xxiii) Raisin Production
- (xxiv) Roads, bridges, culverts and construction of any modes of transportation.
- (xxv) Any other use allowed in consultation with the Metropolitan Commissioner, PMRDA in accordance with the intend and spirit of these Regulations.

19.2 RESIDENTIAL ZONE R-2

Residential Zone R2 includes Residential plots abutting on road having existing or proposed width 9 m. and above in congested area and 12 m. and above in outside congested area

19.2.1 In this zone the following uses, along with their ancillary uses, mix uses may be permitted:

- i) All uses permissible in R-1 shall be permitted in R-2 zone, without restrictions on built-up area.
- ii) Shopping malls, Stores or shops for the conduct of retail business including departmental stores. Storage and sale of combustible materials shall not normally be permitted except with the special permission of the concerned authority.
- iii) Any activity of Government or semi- Government and of their authorities, including offices, training centres and like uses.
- iv) Personal service establishments: professional offices.
- v) Radio broadcasting stations and studio, telephone exchanges, mobile towers.
- vi) Frozen food lockers, fast food and vending stalls.
- vii) Tailor shops, embroidery shops and button – hole making shops, not employing more than 9 persons with individual motors not exceeding 1 H. P. and total H. P. not exceeding 3.
- viii) Cleaning and pressing establishments for clothes not employing solvents with flash point lower than 1380F machines with dry load capacity exceeding 30 kg and more than 9 persons and provided that total power requirement does not exceed 4 KW;
- ix) Shops for goldsmiths, locksmiths, watch and clock repairs, optical glass grinding and repairs, musical instrument repairs, picture framing, radio and household appliances repairs, upholstery and diamond cutting and polishing not employing, more than 9 persons with individual motors not exceeding 1 H. P. and total H. P. not exceeding 3 H. P.
- x) Coffee grinding with electric motive power not exceeding 1 H.P.
- xi) Bakeries with no floor above not occupying for production and area in excess of 75 sq.m. and not employing more than 9 persons ,provided that the power requirements does not exceed 4KW.
- xii) Printing press as per table of service industries, posters, flex board printing shops.
- xiii) Electronic industry of assembly type (and not manufacturing type)
- xiv) Diamond cutting and polishing; not employing more than 6persons with motive power and exceeding 1/2 H.P.
- xv) Auto part stores and show rooms for motor vehicles and machinery.

- xxvi) Sale of used or second hand goods or merchandise (not junk, cotton waste, rage or other materials of offensive nature).
- xxvii) Club houses or other recreational activities, conducted as business.
- xxviii) Storage of furniture and household goods.
- xix) Repairs to all household articles (excluding auto vehicle).
- xx) Veterinary dispensaries and hospitals.
- xxi) Animal pounds.
- xxii) Repair, cleaning shops and analytical, experimental or testing laboratories not employing more than 15 persons in the industrial activity but not including cleaning and dyeing establishment using a cleaning or dyeing fluid having a flash point lower than 60 degree C. and machines with dry load capacity of 30 kg. for any establishment carrying on activities that are noxious or offensive because of emission of odour, dust, smoke, gas, noise or vibration or other-wise dangerous to public health and safety, provided that the motive power requirement of such establishment does not exceed 10 H. P.
- xxiii) Accessory uses customarily incidental to any permitted principal use including storage space, upto 50% of the total floor area used for the principal use.
- xxiv) Paper box manufacturing including paper cutting, not employing more than 9 persons, with motive power not exceeding 5 H. P. and area not more than 50 sq. m.
- xxv) Mattress making and cotton cleaning, not employing more than 9 persons with motive power not exceeding 3 H.P. and area not more than 50 sq. m.
- xxvi) Establishment requiring power for sealing tin, packages, etc. not employing more than 9 persons, with motive power not exceeding 3 H.P.
- xxvii) Commercial halls, exhibition halls, community halls, welfare centre, gymnasias, etc.
- xxviii) Air-conditioned Cinema theatres & Multiplex.
- xxix) Art galleries, aquariums;
- xxx) Museums in independent structures or restricted to ground floors or on first floor in a stilted building;
- xxxi) Research, experimental and testing laboratories not involving any danger of fire or explosion nor of any noxious nature and located on a site not less than 4 Ha. in area and when the laboratory is kept at least 30 m. from any of the boundaries of the site and the necessary residential buildings 30 m from the laboratory.
- xxxii) Restaurants, eating houses, cafeteria, ice - cream and milk bars.
- xxxiii) Establishment for preparation and sale of eatables not occupying for production an area in excess of 75 sq. m. per establishment and not employing more than 9 persons. Sugarcane and fruit juice crushers not employing more than 6 persons with 1.5 H.P. with area not more than 25 sq.m. shall also come under that sub regulation
- xxxiv) Repairing garages not employing more than 9 persons and 2 H.P. motive power in the industrial activity with no floor above.
- xxxv) Battery charging and repairing, not employing more than 6 persons with an area not more than 25 sq.m. and not more than 2 chargers with power not exceeding 5 KW.
- xxxvi) Photographic studios and laboratories with not more than 50 sq. m. area, not employing more than 9 persons and not using power more than 3 H. P.
- xxxvii) Showroom for Distribution and sale of LPG;
- xxxviii) Coal and Firewood Shops.
- xxxix) Group medical centres, Polyclinics, on separate floors, preferably ground floor, pathology laboratories.
- xl) Residential Hotels, Boarding and Lodging shall be permitted in independent building or parts of building, but on separate floors.
- xli) Book Depot, Medicine and chemist shops.
- xlii) Business/ corporate office on any floor.
- xliii) IT buildings & office buildings
- xliv) Office and showroom of LPG cylinders, not exceeding 100 kg.in aggregate, without storage of cylinders.
- xlv) Photographic studios and laboratories not using power more than 5 H.P. and employing not more than 9 persons;
- xlvi) Highway amenities as permitted in Agriculture zone with FSI at par with residential zone.

- xlvi) Trade or other similar schools not involving any danger of fire or explosion nor of offensive noise, vibration, smoke, dust, odour, glare, heat or other objectionable influences
- xlviii) Repairing garages
- xlix) Yoga centres
- xlx) All other commercial users as may be deemed fit by the Metropolitan Commissioner.

Note: The Metropolitan Commissioner may from time to time add to amend the above list in consultation with Director of Town Planning, Maharashtra State, Pune.

19.2.2 The following uses shall be permitted only if it is conducted in independent premises / building:

The following uses shall be permitted in independent premises / building:

- i) Drive - in - theatres, theatres, cinema houses multiplex, club houses, assembly or concert halls, Mangal karyalaya, dance and music studios and such other places of entertainment.
- ii) Petrol filling and CNG service stations with ancillary facilities including convenience shopping.
- iii) Colleges, Secondary Schools, Trade or other similar schools.
- iv) Storage and sale of kerosene not exceeding 1000 liters in groceries and approved ration shops on retail basis.
- v) Bulk storage and sale of kerosene not exceeding 13000 liters in separate godowns confirming to the existing regulations of Chief Controller of Explosives, Government of India, provided further that the applicant shall make adequate fire fighting arrangements at his cost in his plot to the entire satisfaction of the Metropolitan Commissioner.
- vi) Storage and sale of LPG in cylinders not exceeding 6300 kg. in a separate godown confirming to the existing regulations of Chief Controller of Explosives, Government of India provided further that the applicant shall make adequate fire fighting arrangements at his cost in his plot to the entire satisfaction of the Metropolitan Commissioner.
- vii) Parking of automobiles and other light vehicles on open plots even as a business.
- viii) General Agriculture and Horticulture, domestic poultry upto the use of 20 birds per plot and with a space requirement of 0.25 sq. m. per bird.
- ix) Correctional and mental institutions, institutions for the children, the aged or widows, sanatoria and hospitals in independent building facing on roads of width not less than 15 m. (except veterinary hospitals) provided that those principally for contagious diseases, the insane or for correctional purposes shall be located not less than 45 m. from any residential premises.
- x) Residential hotels of 2 to 5 star categories.
- xi) Vegetable, fruit, flour, fish or meat market place
- xii) Service Industries- The Service Industries may be permitted in independent building (independent designated plot) in R2 and Commercial zones along with the limitation of area, maximum number of persons to be employed, maximum permissible power requirement and the special conditions if any as given in Appendix – L, for service industries. The Service Industries shall also be permissible in the buffer zone falling within 5 km distance from the PMC and PCMC Boundaries.

Note: - Drive-in theatres, theatres, cinemas, club-houses, assembly or concert halls and such other places of entertainment shall be allowed on roads having width exceeding 15m and more. These users may be permitted in combination with permissible non-residential uses except that of petrol pump, with the special permission of the Metropolitan Commissioner. However, in the case of a cinema/theatre the front open space shall be minimum 12m. and the side and rear open spaces shall not be less than 6m. Provided that, in the case of development and/or re-development of a cinema/theatre the user as mentioned above may be permitted in combination with the permissible users in a residential R-2 zone.

However, residential user in combination with that of a cinema/theatre may not be allowed in the same building.

Provided further that, on plot/lands where there is an existing cinema Theatres, redevelopment of the plots shall be allowed subject to the condition that at least 1/3rd of the existing seats shall be retained, which shall not be below 150 seats and may be developed in combination with user permissible in R2 zone. Provided also that, if redevelopment of existing cinema theatre is not possible considering the other requirement in these regulations, in such case user permissible in adjoining land shall be permissible with the special permission of Metropolitan Commissioner.

19.3 SLUM IMPROVEMENT ZONE - Deleted

19.4 COMMERCIAL ZONE

19.4.1 In commercial zones, buildings or premises shall be used only for the uses and purposes given in Regulation No. 19.4.2 subject to the following conditions:

- (a) all goods offered for sale shall be displayed within the building excluding passages;
- (b) when the commercial zone boundary falls short of a street, the frontage along such street shall not be permitted to be developed for uses which would not be permissible along such streets and;
- (c) when user other than those permissible in a residential zone without a shop line (R1) have an access from the side or rear open spaces, the width of the such open spaces shall not be less than 7m.

19.4.2 Uses Permissible in Commercial Zone :

- i) Any use permitted in residential zone without area and floor restrictions.
- ii) Club, business houses, veterinary- dispensaries, testing labs, paper and plastic packing bags and boxes manufacturing, mattress making.
- iii) Business Offices and exchanges.
- iv) Whole -sale establishments with storage area not exceeding 200 sq. m. subject to fire protection requirements.
- v) Public utility buildings.
- vi) Headquarters organizations.

19.5 CENTRAL BUSINESS DISTRICT ZONE – Deleted

19.6 INDUSTRIAL ZONE

Industries shall include any building or part of a building or structure, in which products or materials of all kinds and properties are fabricated, assembled or processed, for example assembly plants, laboratories, dry cleaning plants, power plants, pumping station; smoke houses, laundries, gas plants, refineries, dairies and saw - mills.

The following users shall be permissible in Industrial Zone.

- i) The service industries as listed in Appendix –L without restrictions on power requirement, employment, floor area and other restrictions.
- ii) Any industry / industries may be permitted only if the location is appropriate and is not likely to cause nuisance or hazard to adjoining owners. Minimum buffer open space / set back (which may include marginal distance and road width if any) from the boundary of industrial zone to residential or habitable zone/ use, shall not be less than

23 m. such buffer open space shall be kept in the land falling in the industrial zone.

Provided that, the area under such buffer setback shall not be deducted for computation of FSI.

Provided further that, if the land under industrial zone is utilized entirely for IT / ITES purposes, such buffer open space shall not be necessary.

- iii) Building or premises in industrial zone may be used for any industrial as well as accessory uses like banks, canteens, welfare centre and such other common purposes considered necessary for the industrial workers, quarters of watchmen, caretakers or other essential staff required to be maintained on the premises. Such residential/commercial/other uses may be permitted up to 25% of the total proposed built-up area of such industrial use.

Provided that, the Industries shall also be permissible in the buffer zone falling within 5 km distance from the PMC and PCMC Boundaries.

- iv) Following uses may also be permitted (Subject to provisions of separate entry & exit) to such users:

- (a) Parking lots,
- (b) Building of public utility concerns,
- (c) The buildings of Banks,
- (d) Residential Hotels, Restaurants,
- (e) Storage Buildings,
- (f) Drive-in -Theatres, cinema or theatres, subject to provision of provision of the Maharashtra Cinemas (Regulation) Act,
- (g) Highway amenities as permitted in Agriculture zone with FSI at par with Industrial zone,
- (h) Industrial training centre/ institute,
- (i) Information Technology Establishments. (IT/ITES),
- (j) Bio technology units,
- (k) Petrol pumps and service Station.

v) Allowing Residential / Commercial User In Industrial Zone (I to R Provision):-

- a) With previous approval of the Metropolitan Commissioner in consultation with the Divisional Head of concerned division of the Town Planning Directorate and on such conditions as deemed appropriate by him, the existing or newly built-up area of Industrial unit, in the Industrial zone may be permitted to be utilised for residential or commercial purposes.
- b) With the previous approval of the Metropolitan Commissioner, in consultation with the Divisional Head of Town Planning Directorate, the lands in the Industrial Zone including lands in industrial zone in Town Planning Scheme area, may be utilised for any of the permissible users in the Residential and Commercial Zone subject to the following conditions:
 - i) Such user shall be allowed only on payments of Premium at the rate 20 % of the land value arrived as per Annual Statement of rates (without considering the guidelines therein) of the respective year.
 - ii) The Residential/ Commercial user in respect of industries which are not in operation shall not be permitted unless NOC from Labour Commissioner, Maharashtra State, Mumbai stating that all legal dues have been paid to the workers or satisfactory arrangement between management and workers have been made, is obtained. However, in respect of any open land in the

- Industrial Zone where industry never existed, NOC from Labour Commissioner shall not be required.
- iii) In the layout or sub-division of such land admeasuring upto 2 Ha., 10% land for public utilities and amenities, like electric sub-station, bus-station, sub-post office, police out- post and such other amenities/utilities as may be considered necessary shall be provided.
 - iv) In such layouts of sub-division having area more than 2 Ha. and upto 5 hect., 20% land shall be provided for public utilities and amenities like electric sub-station, bus-station, sub- post office, police out- post, garden, playground, school, dispensary and such other amenities/utilities as may be considered necessary.
 - v) In such layout or sub division each more than 5Ha. in area, 25% land for public utilities and amenities like electric, sub-station, bus- station, sub-post office, police out post, garden, playground, school dispensary and such other amenities shall be provided.
 - vi) With the special written permission of the Metropolitan Commissioner, the land having area up to 0.20 hectare in size which are allocated for industrial use may be permitted to be used for Residential purpose or any other permissible users in Residential Zone. Provided that, in such case the owner / developer shall be required to provide either by providing 10% amenity space in the form of open land or 5% built up space in the proposed construction at appropriate location preferably on ground floor.
 - vii) The land under public utility / amenity shall be handed over to the Authority in lieu of FSI / TDR with proper access and basic land development. These areas will be in addition to the recreational space as required to be provided under these regulations.

Provided that, at least 50% of total land provided for public amenity/ utility space shall be reserved for unbuildable purposes such as garden, recreational ground, etc.

Provided also that irrespective of land use zone, where the provisions of Development Control and Promotion Regulations provide for amenity Space in Residential area which is more than what is stipulated in these regulations, then Amenity Space which is more shall only be provided.

- c) The required segregating distance between Industrial Zone and the area over which Residential use is permitted under this regulation, shall be provided within such land intended to be used for residential or commercial purpose.
- d) Such residential or local commercial development shall be allowed within the permissible FSI of the nearby Residential or Commercial Zone.
- e) Provision for Amenity Spaces shall be considered to be reservations in the Regional Plan and Transferable Development Rights against such amenity as per Regulation No.15.4 may be given or FSI of the same equivalent to the TDR quantum shall be available for utilisation on the remaining land. Moreover, the owner shall be entitled to develop remaining land with permissible TDR potential including the land under amenity space subject to maximum permissible limit of FSI (Maximum Building Potential) as mentioned in Regulation No.20.3.
provided that,

- i) Residential/Commercial user may be allowed on the part area of the land holding subject to the condition that total area of the entire land holding shall be considered for deciding the percentage of the land to be reserved for public amenity/ utility spaces, as per these regulations.
- ii) If Regional Plan/Development Plan Reservations (excluding RP/DP Road/Road widening) are in the land under I to R conversions, then such reservation may be adjusted in amenity space as mentioned in the following manner:
 - a) If the area under Regional Plan/Development Plan reservation is less than the required area of public amenity space as per the said regulation, then only the difference between the area shall be provided for public amenity spaces.
 - b) If the area under Regional Plan/Development Plan reservation is more than the required area of public amenity spaces as per the said regulation, then the area for public amenity spaces shall be provided equal to Regional Plan/Development Plan reservation area.
- iii) Out of the total area proposed to be utilised for residential development, 20% of the same shall be built for residential tenements having built up area 30 sq.m. and upto 50 sq.m. or in the plotted development, 20 % area shall be of plots upto 150 sq.m.
- iv) While allowing such conversion minimum 20 % built up area shall be used for offices and commercial purpose.

19.7 AGRICULTURAL ZONE / NO DEVELOPMENT ZONE

The following uses shall be permissible:-

- (i) All agricultural uses including stabling of Cattles up to the limit of 10 animals per hectare.
- (ii) Poultry Farms.
- (iii) Public/semi-public sector utility establishments such as electric sub-stations, receiving stations, switch yards, over-head line corridors, radio and television stations, receiving stations, main stations for public gas distribution, sewage treatment and disposal works, water works along with residential quarters for essential staff required for such works, with the special permission of Metropolitan Commissioner.
- (iv) Garden, forestry, nursery, public parks, private parks; play fields, summer camps for recreation of all types.
- (v) Golf Course and Links, Race tracks, and shooting ranges with necessary safety measures.
- (vi) L.P.G. Godown, subject to following conditions:
 - a) Area of plot shall not be less than 1000 Sq.m.
 - b) The maximum permissible FSI shall be 20% on this plot.
 - c) Only ground floor structure shall be permissible.
 - d) It is necessary to obtain —No Objection Certificatel from Controller of Explosives and competent fire authority.
- (vii) Petrol/ Diesel /LPG /CNG, Pump subject to FSI upto 20% on gross area and subject to other provisions prescribed in regulations for special occupancies.
- (viii) Pottery manufacture.
- (ix) Storage and drying of fertilizer.
- (x) **Farm houses** subject to following conditions:-
 - (a) Minimum plot area under above use shall be 0.4 Ha.
 - (b) The land in which it is to be constructed is actually put under agricultural use.
 - (c) Farm house shall be permitted by the Metropolitan Commissioner only after the requisite permission for farm house is obtained by the owner from the Metropolitan Commissioner under the provisions of Maharashtra Land Revenue Code, 1966 and attested certified copy of such permission is attached with the application under

Section 44 of the The Maharashtra Regional and Town Planning Act, 1966.

- (d) The FSI shall not exceed 0.0375 subject to a maximum built up area of 400 sq.m. in any case. Only ground floor structure with or without stilt shall be permissible.
- (xi) Swimming pools / sports and games, health clubs, cafeteria, canteen, tennis courts, etc.
- (xii) Amusement park.
- a) Amusement park with minimum plot area of 1.00 hect. With recreational and amusement devices like a giant wheel, roller coaster, merry-go-round or similar rides both indoor and outdoor, oceanic -park, swimming pool, magic mountain and lake, ethnic village, shops for souvenirs/citations, toys, goods, as principal uses and ancillary activities such as administrative offices, exhibition hall or auditorium, open air theatre, essential staff quarters, store buildings, fast food shops, museum, souvenir and small shops, ancillary structures to swimming pool ancillary constructions. Maximum permissible FSI shall be 0.20 .i.e. FSI of 0.15 for principal activity and 0.05 for ancillary activities.
 - b) The required infrastructure, like proper and adequate access to the park, water supply, sanitation, conservancy services, sewage disposal and adequate off-street parking will have to be provided and maintained by the promoters of the project at their cost and to the satisfaction of the Metropolitan Commissioner.
 - c) The promoters of the project shall provide adequate facilities for collection and disposal of garbage at their cost, and to the satisfaction of the Metropolitan Commissioner and will keep, at all times, the entire environment clean, neat and hygienic.
 - d) Structures permitted in the amusement park (except those intended for park apparatus, entertainment such as magic mountain etc. and other equipment) should be ground floor structures, with the construction blending with the surrounding environment and landscape.
 - e) Except for minor dressing, hills and natural features, if any, shall be maintained in their natural condition and beautified with planting of trees etc.
 - f) All trees already growing on the land shall be preserved to the extent possible, except that if it becomes necessary to cut any tree, the required permission of the Metropolitan Commissioner should be obtained under the relevant Act. At least 5 trees (of indigenous species) per 100 sq. m. shall be planted and grown within the area of the park.
 - g) Sufficient parking facilities and ancillary facilities for cars, buses, transport vehicles etc. shall be provided on site as prescribed by and to the satisfaction of the Metropolitan Commissioner.
 - h) The promoters of the project will prepare a suitable layout with appropriate landscaping of the recreational and other facilities and obtain approval of the Metropolitan Commissioner.
 - i) The development shall be regulated according to other requirements of these and all applicable rules and Regulations and subject to all other clearances as may be required.
 - j) Proper arrangements for safety, Regulations of traffic approaches to the park etc. shall be made to the satisfaction of the Metropolitan Commissioner and Police, from the law and order and traffic aspects.
- (xiii) Mobile Phone Towers with ancillary equipment as specified in Regulation no.45.0
- (xiv) The following users shall be permitted as per the policies decided by the Government from time to time:
- a) IT/ITES parks/units in no development zone.
 - b) Research and Development institutions / Centers on following conditions:
 1. The area of land shall be minimum 10 hectare.
 2. FSI permissible shall be maximum 0.20 on gross plot area after deducting area under R.P. Road/D.P. Road/ Reservation/deemed reservation, if any.
 3. Construction of staff quarters related to such institutions/center shall be permissible to the extent of 50% of the total proposed built-up area for such institution/center.
 4. Trees of indigenous species shall be planted at the rate of 500 trees per hectare.
 5. Research and Development of hazardous chemical and explosives may

be permitted with the special permission of Metropolitan Commissioner which may be granted after compliance of all safety measures and certification from concerned Government Authorities.

c) Bio-technology unit / B.T. Park.

d) Integrated highways amenities such as motels, way-side restaurants, fuel pumps, service stations, restroom and canteen for employees working on site and truck drivers, service godowns, factory outlets, highway malls, hyper market along with public conveniences like toilets, trauma centre, medicine shop, bank ATMs and like activities with FSI of 0.5 on gross area.

The Integrated highways amenities shall be allowed subject to following conditions:

a) Minimum area of plot shall be 10000 Sq.mt.

b) 10 % amenity space shall be provided which shall be handed over to planning authority.

- (xv) Ancillary service industries for agriculture produce marketing and management, ancillary service uses for agro related products like flowers, fruits, vegetables, poultry products, marine products, related collection centres, auction hall, godowns, grading services and packing units, knowledge parks, cold storages, utility services (like banking, insurance, post office services) as service industries for agriculture produce marketing on the land owned by individuals / organizations with FSI of 0.20
- (xvi) Solid waste management, land fill sites, bio-gas plants, power generation from waste.
- (xvii) Power generation from non-conventional sources of energy. Area covered under solar panels shall not be counted in FSI.
- (xviii) Brick, tile manufacture.
- (xix) Fish Farming.
- (xx) Religious buildings subject to conditions as may be prescribed by Planning Authority.
- (xxi) Slaughter house or Facilities for processing and disposal of dead animals with the special permission of PMRDA.
- (xxii) Cemeteries and crematoria and structure incidental thereto.
- (xxiii) Mangal karyalaya / lawns.
 - a) Minimum area for mangal karyalaya shall be 0.40 hect. with FSI of 0.20. It may be permitted along with essential guest rooms not exceeding 30% of the area of mangal karyalaya. Area for parking shall be 40% of gross area which shall be properly earmarked and bounded by bifurcating wall.
 - b) Lawns for ceremony shall be 0.80 hect. with FSI of 0.10. Area for parking shall be 40% of gross area.
 - c) The plot for mangal karyalaya or lawn shall abut on road having width of minimum 15m.
 - d) Such user (Mangal karyalaya and Lawns) shall be allowed only on payments of premium at the rate 10 % of the land value arrived as per Annual Statement of rates (without considering the guidelines therein) of the respective year.
- (xxiv) Bus Terminus.
- (xxv) public or private road.
- (xxvi) In the villages where no specific residential zone is shown, residential development may be permitted -
 - a. within a belt of 500 meters from the gaathan limits of settlements having a population of less than or equal to 5000 as per the latest Census and,
 - b. within a belt of 1500 meters from the gaathan limits in the case of non-municipal settlements having a population of more than 5000 as per the latest Census.
 - c. in case of settlements of both the categories, mentioned above, falling in the planning areas of Zone Plans, such distance from the gaathan limits shall be 500 meters only.
 - d. in the case of village settlements in the western ghat hilly area of the district, such residential development may be restricted to a belt of 200 meters from the gaathan limits.

For the purpose of this regulation, Western Ghat area shall be the area as declared and notified by the Ministry of Environment and Forests Department, New Delhi vide their Notification No.F.No.1-4/ 2012-RE(Pt.) Dt.13/11/2013 and amended from time to time.

Provided that such Residential development in the aforesaid belt in all the categories mentioned above (i) to (iv) shall not be permissible on lands which deserve preservation or protection from environmental considerations, viz, hills and hill-tops, and belts of 200 meters from the H.F.L.s of major lakes etc.

Provided further that for the Residential Zone available considering latest population as mentioned in (i) to (iii) above, the Metropolitan Commissioner shall prepare proper road network plan for the villages falling under their jurisdiction considering the existing roads and sanctioned Regional Plan proposals within a stipulated time of six months from the date of sanction of this modification and take preliminary approval from Director of Town Planning, Maharashtra State, Pune and submit the same to the State Government for modification to the Regional Plan under Section 20 of MR & TP Act, 1966. The Developer / Land Owners shall incorporate such proposed road network in their development proposals. However the sanctioning process of plans shall not be stopped during the course of preparation of such road network plan. Such road network subsequently be incorporated while preparing Development Plan for the PMRDA area.

Notwithstanding anything contained in the above regulation, such residential development in Agriculture/No development Zone shall be permitted only on payment of premium of the total area of land. Such premium shall be calculated considering 30 % rate of the said land as prescribed in the Annual Statement of Rates of the year granting such residential developments.

Provided further that where more than 50 percent of area of the Survey Number/Gat Number is covered within the above peripheral distance then the remaining whole of such Survey Number / Gat Number within one ownership shall be considered for development on payment of premium as above.

Provided further that, the "distance from gaathan" criteria shall also be applicable to the plots from the nearest gaathan of any village.

- (xxvii) Development of buildings of educational and medical institutions, run by Government / Public Authorities or run by Public Charitable Trusts may be permitted in Agriculture / No Development Zone with built up area upto 1/5th (i.e. 20%) of the net plot area, having at the most ground plus one storey, subject to plantation of trees at the rate of 5 trees per Are on the plot.

Provided that additional FSI over and above the basic FST permissible above may be granted by the Metropolitan Commissioner as per the following Table and subject to the conditions mentioned below: -

Sr. No.	Land Fronting on Road	Basic Permissible FSI on Net Plot Area	Additional FSI*	Maximum Permissible FSI	Note
1	2	3	4	5	6
1	Road having width of 12 mt. and above but less than 18 mt.	0.2	0.5	0.7	The building height above 15 mt. subject to maximum upto 30 mt. or as mentioned in Maharashtra Fire Prevention and Life Safety Measure Act, 2006 shall be allowed after clearance / No Objection Certificate from the Fire Advisor/Chief Fire Officer
2	Road having width of 18 mt. above	0.2	0.8	1.0	

Conditions:-

- (a) The additional FSI as mentioned in Column No. 4 of the Table above is to be granted only on payment of premium calculated considering 30% rate of the said land as prescribed in the Annual Statement of Rates (ASR) of the year of granting such

additional FSI. The Land Area considered for premium shall be equal to additional FSI / Built-Up area granted.

- (b) In case the educational use involves the nursery and elementary Schools, such nursery and elementary Schools shall be housed in single building with maximum Ground+ 2 floor.
- (c) Regulation No. 21 of the Standardised Development Control and Promotion Regulations shall apply to the above buildings constructed under this Regulation.

xxviii) Additional FSI in Agriculture / No-Development Zone for three stars and above category Hotels along National and State Highways shall be permissible subject to following conditions: -

- (a) Development of buildings for three stars and above category Hotels in No Development Zone along National and State Highways shall be permissible on independent plot upto FSI limit of 0.10 on gross plot area.
- (b) Additional FSI upto 0.90 on gross plot area, over and above the basic FSI permissible under clause (a) above, may be granted by the Metropolitan Commissioner on payment of premium calculated considering 35% rate of the said land as prescribed in the Annual Statement of Rates (ASR) for the year in which such additional FSI is granted. The land area considered for premium shall be equal to additional FSI/Built-Up area granted.
- (c) All other regulations, as applicable to Residential Zone, shall apply to the layout and buildings constructed under this Regulation.

19.8 GREEN BELT

19.8.1 Following uses shall be permissible

- (i) Agriculture,
- (ii) Tree Plantation, Gardens, Landscaping, public park Landscaping, Forestry and Nursery etc.
- (iii) River front development by Metropolitan PMRDA, or any institution authorised on behalf of Metropolitan Commissioner, PMRDA.
- (iv) Development of pedestrian pathways, Jogging track, Cycle track, Boat club etc.
- (v) Swimming pool, club house, recreational facilities after leaving marginal distance of 15 m. belt along river bank and 9.0m. from river and nalas, respectively subject to FSI of 10% with ground floor structure only, provided that no such construction shall be allowed within the blue line.
- (vi) Public toilets as per requirement, provided that no such construction shall be allowed within the blue line.
- (vii) Recreational open space of any layout/ sub-division/ development proposals, if submitted along with the developable land adjoining to such green belt, after leaving marginal distances of minimum 15m. and 9.0m. from river and nalas, respectively, (clarification – it is clarified that the FSI of the land under green belt zone shall be permissible to be utilized on the land adjoining but outside such green belt zone.)

19.8.2 The users and its extent shall be permissible in such Recreational open space, as prescribed in the regulation of Green Belt as mentioned above, provided that no such construction shall be allowed within the blue line.

19.8.3 If the land under green belt zone, excepting open space therein if any, is required by Metropolitan Commissioner for the public purposes mentioned above, the owner shall hand over the possession of such land for the development and maintenance of public purposes. Thereafter, such land shall remain open and accessible to general public for recreational activities.

Provided that, FSI of such land under Green Belt zone shall be permissible only after handing over such land to the PMRDA free of cost and free from encumbrances.

19.8.4 The side/rear marginal distances for the proposed building adjoining to river / nala shall be maximum of-side / rear marginal distance, to be measured from river/nala, as required according to height of building or 4.5 m. from the dividing line between green belt zone and the other developable zone.

19.9 Hill Top & Hill Slope Zone in PMR: These areas shall be exclusively used for tree plantation & no construction of any sort including farmhouse/forest house shall be permitted in this zone.

19.10 PUBLIC /SEMI PUBLIC ZONE.

A) User to be permitted- The following uses shall be permissible:

- (i) Schools, Colleges, Educational Complex, Training institutions, Hostels for students and essential staff quarters.
- (ii) Home for the aged, Hospitals, Sanatoria, Dispensary, Maternity Homes, Health Centre, and related health facilities with ancillary structures like quarters, Dharmashala, veterinary hospital, etc,
- (iii) Offices and essential staff quarters of the Government/ Semi Government and/or its authority/ Local Self-Government.
- (iv) Public/semi-public sector utility and transport establishments / institutions of research, education and health
- (v) Library, Mangal karyalaya, Gymnasium, Gymkhana, Stadium, Community hall, Civic and Cultural Centres, Religious Structures, auditorium etc.
- (vi) Commercial use upto 15% of proposed built-up area by considering the permissible basic FSI, subject to following conditions
 - a) Shop/permit rooms for liquor/wine/beer, pan, cigarette, tobacco, lottery tickets and such other uses which do not serve public purpose, similarly storage of domestic gas cylinders, kerosene etc., which are dangerous to public health, shall not be permitted.
 - b) Additional F. S. I., if otherwise permissible under these regulations, shall be permitted only on the plot area remained after deducting the notional plot area utilised for commercial user.
 - c) The Metropolitan Commissioner shall not allow sub - division of S. No. / Gat No. / Plot No. on which such a Development which may cause/ has taken place/ would take place.
 - d) The retail commercial user is permitted upto a depth of 12 m. or in separate building
 - e) The plots in which there is an existing development; such commercial use shall be restricted to maximum 15% of the existing and proposed development taken together.
 - f) The land owner / developer / institution shall give guarantee in writing to the Metropolitan Commissioner for following all the stipulated conditions scrupulously. Provided that, in case of lands owned by Zilla Parishad and Panchayat Samiti, which are earmarked as public and semi-public zone, the limit of such commercial user shall be upto 33%.
- (vii) Petrol/LPG/CNG Pumps as per Regulation no.20.2.2(5).
- (viii) Nursery, crèches, Spastic rehabilitation centres, orphanages, hostel for Autistic persons and Mentally Retarded persons.
- (ix) Fire stations,
- (x) Traffic and Transport related facilities,
- (xi) Student Hostels and working women's hostel, Special Housing Schemes such as EWS, HDH, PMAY, Old Age Homes and such additional public utility users as decided by the Metropolitan Commissioner of PMRDA.

B) In case any private property is included within the boundary of public and semi-public use and if the owner can establish that the private/ individual ownership of land vest with him, the land use existing/ adjoining to the PSP zone shall be assigned to this piece of land with special written permission of the Metropolitan Commissioner.

19.11 TRAFFIC AND TRANSPORTATION ZONE – Deleted

19.12 DEFENCE ZONE - The developments as may be required by the Ministry of Defence or its Authorities, as per their requirements, shall only be permissible on the lands owned and possessed by the Ministry of Defence or its Authorities.

19.13 FOREST ZONE - The developments as may be required by the Ministry of Forest or its Authorities, as per their requirements shall only be permissible on the lands owned and possessed by the Ministry/ Department of Forest or its Authorities.

19.14 RESTRICTIVE ZONE – The area affected by the notification under Works of Defence Act- 1903, is earmarked in the Regional Plan as such and no any development in contravention with the notification shall be permissible.

Provided that, it shall be permissible to treat the area under such restrictive zone as marginal distance at time of construction of any building proposed on contiguous unaffected area.

Provided further that, it shall be permissible to utilise the FSI and also the receiving potential of the land under this zone, as otherwise permissible, on the remaining contiguous unaffected land of the same land owner.

19.15 AFFORESTATION ZONE: The following uses shall be permissible:

In addition to the plantation of trees, forest houses, farm houses meant for the servants/technicians/owner and for storing of fertilizes/forest tourist etc., may be permitted subject to the following regulations-

- A. Building for the residential purposes such as forest house, farm house shall have built-up area not exceeding 100 sq.mt. provided that, forest plot area is not less than 0.4 hect., Additional area of 50 sq.mt. may also be permitted for ancillary users. Structures to be erected for these purposes should be of ground floor only and should not have height more than 5 mt. and should be of such material as would blend with the surroundings:

Provided further that, no forest house, farm house should be permitted unless owner has planted at least 800 trees per hect. (or such lesser nos. on the basis of the species selected and approved by the forest department), and only after such trees are reared for one year.

Provided further that, no forest house, farm house will be permitted i) within distance of 100 mtrs, from H.F.L./F.S.L. of the lake ii) and on hill slope steeper than 1:5. Layout of the forest houses may be permitted for areas more than 0.4 hect.

B. Tourist Resort Complexes as per Regulation No. 38.8.

C. Land in the afforestation zone may be permitted to be used for agricultural purposes.

D. Construction of buildings including quarters for essential staff for public utility concerns such as electrical substations, receiving stations, chilling plants, waterworks, sewage disposal works etc.

E. Construction of any communication route, road, railway, airstrips, electric lines etc.

F. In a village, residential development may be permitted within a belt of 200 mts. of gaathan limit along with social amenities necessary with such development. Such developments shall be governed by the Regulations laid under the Residential Zone of these Regulations, provided that the restrictions as laid down in Regulation No. 13.1 (SITES NOT ELIGIBLE

FOR CONSTRUCTION OF BUILDING) shall apply to these developments.

- G. Ropeway Projects as stipulated in Regulation No. 40.2
- H. Planetarium / Astronomical / Astrophysical facilities / projects as stipulated in Regulation No. 40.3
- I. Trekking Routes / nature trails / nature walks as stipulated in Regulation No. 40.4.
- J. Uses stipulated in 19.7 (xiv. d)
- K. Registered Public & Private Institutions of repute, mainly engaged in community development, Human Resources Development & ancillary Development, rural upliftment, public health, education & charitable activities may be permitted with F.S.I. restricted to 0.20 of net plot area with structures not more than ground plus one storeyed and trees are planted at the rate of 500 trees per hectare.

PART - IV
GENERAL BUILDING REQUIREMENTS –
SETBACK, MARGINAL DISTANCE, HEIGHT AND PERMISSIBLE FSI

20.0 GENERAL

Following regulations for congested area shall be applicable for the lands included in congested area as shown on the plan. For the areas outside congested area in the development plan, regulation for outside-congested area shall apply. However, in congested area, if the original land holding is more than 0.40 Hect., then regulations of non-congested area shall apply.

20.1 REGULATIONS FOR CONGESTED AREA

20.1.1 MARGINAL OPEN SPACES, AREA AND HEIGHT LIMITATIONS AND PERMISSIBLE FSI FOR BUILDINGS SITUATED WITHIN CONGESTED AREA

20.1.2 RESIDENTIAL BUILDINGS

(a) Floor Space Index.

Maximum permissible FSI shall be 1.50 for purely residential building and in case of mix residential with commercial or other user, additional FSI, limited to 0.5 only in R-2 zone for non-residential user may be permitted

(b) Marginal Open Spaces/Setback - The minimum front setback from the existing or proposed road shall be as under:-

S.No.	Road width	For Purely Residential	For Mixed Users
(i)	For streets 7.5 m. to less than 12 m. in width	1.00 m.	2.00 m.
(ii)	For streets 12 m to less than 18 m. in width	1.50 m	2.50 m.
(iii)	For streets 18 m & above in width	2.00 m	3.00 m

(c) Side & rear open spaces in meter shall be as below :

Residential Plot Area	Side	Rear
Upto 250 sq. m	0.00	0.00
Above 250 & upto 500 sq. m	1.00	1.00
Above 500 sq. m. & upto 1000 sq.m	2.00	2.00
Above 1000 sq.m.	As per regulation no. 15	

NOTE :-

- i) For light and ventilation, provisions in Regulation No.17.4 shall apply.
- ii) For common wall construction, length of common wall shall not be more than 8 m.

d) For streets less than 7.5 m. in width, no setback shall be prescribed subject to condition that no lane shall be less than 4.5 m. in width clear of structural projection. For lanes less than 4.5 m. in width, a setback of 2.25 m. shall be prescribed from the centre line of such lane. Streets less than 4.5 m. shall be treated as lanes only when they serve as access to the properties fronting on them

e) Structural projections such as balconies, cornices, weather sheds, roof projections etc. shall be allowed in the setback distance prescribed above as per regulation No. 17.6.

f) Height- The height of the building shall be governed by Regulation No. 17.8.

g) Ground Coverage-The maximum ground coverage shall be 60% of the net plot area

- 20.1.3 Cinema Theatre, multiplex, assembly-building, shopping malls and like buildings:** For these buildings, regulations prescribed in non- congested area, except FSI, shall apply.
- 20.1.4 Educational, Medical, Institutional, Commercial, Mercantile, and Other Buildings:**
- (a) **Floor Space Index** - Maximum FSI permissible shall be 2.00.
 - (b) **Open Space** - For these buildings open spaces shall be 3 m. on all sides.
 - (c) **Ground Coverage** – The maximum ground coverage shall be 50% of the net plot area
- 20.1.5** Pathway for access to the internal building or interior part of the building. The pathway shall not be less than 3.6m. (12 ft) in width.
- 20.1.6** If the width of property is less than 3.6 m. (12 ft), the entire ground floor shall be on stilts.
- 20.1.7** Front open space as prescribed by the Highway or any other rules shall be applicable if they are over and above as prescribed in these regulations.
- 20.1.8** The provisions mentioned in above Rule No.20.1.1 to 20.1.6 may be relaxed by the Metropolitan Commissioner in consultation with the Divisional Head of concerned division of the Town Planning Department, Pune, in special circumstances.

20.2 REGULATIONS FOR OUTSIDE CONGESTED AREA.

20.2.1 Marginal Distances for Residential Buildings Height 15 mt. and Below.

The provisions for minimum marginal distances as given in **Table No. 16 below** shall apply for the Residential buildings, Residential with mix uses permissible in non-congested areas and ancillary Residential buildings permissible in industrial zones having height upto 15 m. and below.

Table No. 16							
Sr. No.	Description of the road	Min Plot Size in Sq. m.	Min width of plot in meter	Min set back from road side in meter	Min. side margins in meter	Min. rear margins in meter	remarks
1	NH/SH	450	15	6.0 mt. for NH and 4.5 m. for SH or as specified by Highway rule whichever is more	3.0	3.0	--
2	MDR/ODR	450	15	6.00 mt. or as specified by Highway rule whichever is more	3.0	3.0	--
3	Roads 24 meters and above	300	12	4.50 mt for residential & 6.00 m. for residential with mix use	3.00	3.0	--
4	Roads of width below 24 m and upto 18 m.	250	10	4.50 mt for residential & 6.00 m. for residential with mix use	3.00	3.0	--
5	Roads of width below 18 m. and upto 15 m.	250	10	3.00 mt for residential & 4.50 m. for residential with mix use	2.25	2.25	--
6	Roads of width below 15 m. and above 9 m.	150	8	3.00 mt for residential & 4.50 m. for residential with mix use	1.50 (in case of semi-detached building, only one side open space shall be permissible)	1.50	Side and rear margins shall be 2.25 m. for building more than G+2 or stilt + 3 structure

7	Road of width upto 9 mt.	100	7	3.00	1.50 (in case of semi-detached building, only one side open space shall be permissible)	1.50	--do-
8	Row Housing on roads of 12 mt. and below	30 to 125	3.50	2.25	0.00(In case of corner plot, 1.50 or building line of adjoining road whichever is more)	1.50	Side and rear margins in this row only for G+1 or stilt + 2 structure
9	Row Housing for EWS/LIG/Slum Up gradation etc. by public authority.	20 to 50	3.00	0.90 mt from pathway or 2.25 mt from road boundary	0.00(In case of corner plot, 1.50 or building line of adjoining road whichever is more)	0.90m	Side and rear margins in this row only for G+1 or stilt + 1 structure

Note-

- (1) Higher height may be permitted subject to marginal distance mentioned in Regulation No.17.3.
- (2) The minimum area of plots fronting on service roads along highways shall be with reference to the width of service road.
- (3) For semidetached buildings, side margin shall be on one side only.
- (4) Row-housing plots at the junction of two roads shall be larger to maintain the setback from both roads. Not more than 12 and not less than 3 plots shall be allowed in each block of row housing. Each block shall be separated from the other by 6 m. road or 6 m. side margin distance of the plot or space including side marginal distance of the plot.
- (5) No garage shall be permitted in a building having stilt or basement provided for parking.
- (6) Construction of ottas, railings, barricades or supporting columns for canopy or porch shall not be allowed in front marginal distances. However, steps may be permitted within 1.2 m. from the building line. Also supporting columns for canopy or porch may be allowed within building line.
- (7) In no case ribbon development rules shall be relaxed without consent of the Highway Authority.
- (8) In case of special building, marginal distances shall be as per said regulations.
- (9) The plot width to depth ratio shall be 1:1.5 to 1:2.5, as far as possible in case of plotted layout development permission.
- (10) In Public Housing Schemes for E.W.S. undertaken by government or semi-government organizations, marginal distances shall be as per their respective schemes and rules.
- (11) The front setback set-out in already approved and partially developed layouts / schemes, may be retained as per said approval, so as to maintain the building line.

- (12) The pattern of development like semi-detached, row housing, etc. in already approved layout shall be as per said approved layout.
- (13) Where commencement certificate is granted prior to publication of any draft/ revision of Regional/ Development Plan and the said plot is affected by new road proposed in the Revised Regional/Development Plan, then front margin stands relaxed to that extent.

20.2.2 Other Buildings: The Provision as given in Table No.17. below shall apply for different categories of other buildings.

Table No. 17				
Sr. no.	Type of building	minimum road width required	Minimum marginal distances	Other stipulations
1	2	3	4	5
1	Medical buildings			
	a) Hospital, Maternity Homes, Health Club, Public Semi-public buildings being special building	12 m.	6 m. on all sides	Other requirements shall be as mentioned in the table no.20 of regulation no.21.1
	b) Hospital, Maternity Homes, Health Club, Public Semi-public buildings not being special buildings	12 m.	Margins as per Table no. 16	Other requirements shall be as mentioned in the table no.20 of regulation no.21.1
	c) Clinics on plot upto area 300 sq.m.	9 m.	Margins as per Table no. 16	
2.	Educational buildings			
	a) Pre-primary School	6m.	Margins as per Table no. 16	Other requirements shall be as mentioned in the table no.20 of regulation no.21.1
	b) Primary School	9m.	4.5m. on all sides	
	c) Other Educational Buildings	12 m.	6.00 m. on all sides	
3.	Cinema Theatre/ Drama Theatre/ Assembly Hall/ Multiplex / Shopping Malls	15 m.	Front – 12 m. (only on one major road) Remaining 6 m. on all sides	Construction of Cinema Theatre/Multiplex shall confirm to the provisions of Maharashtra Cinema (Regulations) Rules, 1966 and as amended from time to time.
4.	Mangal karyalaya like buildings	12 m.	Front – 12 m. (only on one major road) Remaining 6 m. on all sides	-

5.	Petrol/Fuel Filling Stations with or without service bays	12 m.	6.00 m. on all sides	<p>1) Fuel filling station shall not be permitted within a distance of 90 meter from the nearest gate of school, hospital and theatre, place of assembly or stadium.</p> <p>2) In the case of kiosks and other buildings for sales office, snack bars etc. within the plot for fuel filling stations, the setbacks from the boundaries shall be 4.50 m. Further the other clearances for the installations shall be as per the Petroleum Rules of 1937.</p>
6.	Mercantile/ Business/ hotel/ Commercial/ mix use with residential buildings.	12	Front 6.00 m. Side & rear 4.5 m.	<p>i) Shops may also be allowed fronting side and rear margins.</p> <p>ii) Minimum area of Shops shall be 6 Sq.mt with a minimum width of 2.00 m.</p>
7.	Stadium / Pavilion	12	6 m. on all sides	<p>Covered portion shall not exceed 20 % of plot area. The spectators' gallery of the stadium shall not be counted towards FSI. Shops below spectator's gallery may be permissible.</p>

NOTE:

- i) In case of plots fronting on National Highway, State Highway and Major District Roads, the building line shall be as per Ribbon Development Rules as given in Table above, whichever is more.
- ii) Side and rear marginal distances mentioned in above Table shall be subject to Regulation No.17.3, whichever is more.
- iii) In case of special building, marginal distances shall be as per said regulations.

20.3 PERMISSIBLE FSI:-

Permissible basic FSI, additional FSI on payment of premium, Permissible TDR Loading on a plot in non-congested area for **Residential and Residential with mix uses** shall be as per the following Table No. 18

Table No. 18					
Sr.no.	Road width in meter	Basic FSI	Additional FSI on payment of premium	Maximum permissible TDR loading	Maximum building potential on plot
1	2	3	4	5	6
1	Below 9.0 meter	1.0	0.20	0.00	1.20
2	9.00 meter and upto 12.00 meter	1.0	0.20	0.20	1.40
3	12.00 meter and upto 15.00 meter	1.00	0.20	0.30	1.50
4	15.00 meter and upto 24.00 meter	1.10	0.20	0.40	1.70
5	24.00 meter and upto 30.00 meter	1.20	0.20	0.50	1.90
6	30.00 meter and above	1.20	0.20	0.60	2.00

Note-

- i) The above FSI shall be applicable for existing as well as proposed roads, provided that the plot is physically made accessible as per Regulation No. 14.3.
- ii) The Premium FSI shall not be allowed without utilization of TDR.
- iii) Maximum permissible building potential on plot mentioned at column no.6 shall be inclusive of FSI allowed for handing over RP/DP Road and the Amenity Space to the PMRDA. Such in-situ FSI may be considered as a part of maximum permissible TDR loading given in column no. 5.
- iv) The restrictions of road width mentioned above shall not be applicable in cases where, the permissible FSI is more than the basic FSI in various schemes such as, MHADA buildings, MRTs and BRTs routes, TPS Area and any special projects of Govt. of Maharashtra/Public Undertakings etc.
- v) The maximum limits of FSI prescribed above shall be applicable to fresh permission and also to an existing building which has not been granted full occupation certificate but subject to production of stability certificate from structural engineer in respect of such existing building. However, in no case the rights of the flat owner / unit holders shall be adversely affected.
- vi) **Premium** - Rate of premium for the additional FSI as mentioned in column no 4 above shall be decided by Government from time to time. The premium collected shall be shared 50:50 between State Government & PMRDA respectively. The premium of the Government shall be deposited by the planning authority in a Government head account.
- vii) The Metropolitan Commissioner shall deposit the amount collected through the charges for premium in a separate development fund called as — PMRDA Infrastructure fund and shall utilize the same only for the purpose of developing new/ up-gradation of infrastructure as well as implementation of Regional Plan/Development Plan proposals and creation of civic amenities.
- viii) Basic FSI for the plots of sizes having area up to 0.2 ha shall be 0.75 and the values of column no. 4, 5 and 6 shall vary proportionately.

20.4 INDUSTRIAL BUILDINGS

Minimum plot area, marginal space, Permissible FSI, Additional FSI with payment of premium for industrial building shall be as per the Table No. 19 given below:-

Minimum plot area, marginal space, Permissible FSI-

Table No. 19						
Sr. No.	Min. road width	Plot Size in sq.m.	Basic Permissible FSI	Additional FSI on payment of premium	Min. Front Margins	Min. Side & Rear Margins
1	2	3	4	5	6	7
1	12m.	Upto1000	1.10	0.20	4.50	3.00
2	12m.	1001 to 5000	1.10	0.20	6.00	4.50
3	12m.	5000 and above	1.10	0.20	9.00	6.00

Note-

- i) In case of plots fronting on National Highway, State Highway and Major District Roads, the building line / control line shall be as per Ribbon Development Rules as given in Table above, whichever is more.
- ii) Front, side and rear marginal open spaces shall be as per above Table.
- iii) Minimum and maximum height shall be 3.60 m. & 4.2 m. respectively for industrial buildings. The greater height maybe permitted as per the requirement.
- iv) In addition of provisions of these regulations, regulations prescribed under Factory Act shall be applicable.
- v) **Premium** - Rate of premium for the additional FSI as mentioned in column no 5 above shall be decided by Government from time to time. The premium collected shall be shared 50:50 between State Government & PMRDA respectively. The premium of the Government shall be deposited by the planning authority in a Government head account
- vi) **Buffer open space**-For construction of industrial building, buffer open space of 23 m. wide shall be left from residential or incompatible zone, wherever necessary. Such buffer open space shall be part of sizable required recreational open space. Roads and marginal distance is may also be treated as a part of Buffer open space. However, area of such buffer open space shall be counted in gross area for computation of FSI. Where green belt is shown in Regional/Development Plan between residential and industrial zone, area of such green belt shall be counted in gross area for calculation of FSI. Provided also that marginal distance for a building shall not be exclusive of buffer open space. The floor height for industrial building shall be as per requirement.

20.5 FSI of Green Belt

FSI of the green belt zone shown on the regional plan/development plan may be allowed on remaining land of the owner by counting area of green belt in gross area of plot subject to condition that the area shall always be under tree cover. The owner shall plant trees in this area with proper planning at the rate of minimum 100 trees per hectare and should have been survived for at least one year prior to issuance of occupation certificate.

Provided that, such FSI shall not be allowed if such green belt area is included in recreational open space to be left as per regulation no. 15.3.5

PART - V
HIGHER FSI FOR CERTAIN USERS

21.0 GENERAL

Additional/higher Floor space index may be allowed in certain categories in non-congested area, except as otherwise specified and subject to following conditions:

- a) Permissible **additional FSI** for the buildings as mentioned in Table no. 20 shall be the maximum permissible building potential according to road width as mentioned in Table no. 18 of Regulation no. 20.3 (wherever applicable) **minus** Basic FSI. No restriction to avail the additional FSI in the form of FSI only.
- b) Such additional FSI shall be available for use for which additional FSI is granted only and other permissible uses shall be allowed within the basic Permissible FSI.
- c) **Premium** –Premium for additional F.S.I. shall be per column 4 of the table. Rate of the premium is based on the land rate mentioned in ASR for respective S.No./CTS No. The premium collected shall be shared 50:50 between State Government & PMRDA respectively. Premium to be paid to the Government shall be deposited in the concerned Account Head of Urban Development Department at Government Treasury by the Planning Authority. The following quantum of premium shall be subject to the orders of the Government from time to time.
- d) The additional FSI shall also be permissible to existing authorised users subject to structural stability.
- e) The other conditions as mentioned in the Government Directives issued under section 154 of the M.R.&T.P.Act 1966 vide Resolution no TPS-1815/2647/CR-13/15/UD 13/Dated 14/03/2016 shall also be applicable.
- f) If the owner / developer desire to avail such additional FSI in future for new buildings , then while seeking building permission at first instance, the building plan shall be submitted considering the Marginal distances as required for the height of buildings for such additional FSI. No condonation in the required open spaces, parking and other requirements in these regulations shall be allowed. However for the existing building proposals, such condition need not be insisted. But proposal shall be cleared only after strictly confirming structural and fire safety norms.
- g) Exit Requirements, Requirements of Water Supply, Drainage and Sanitation Parking spaces requirements, Fire provision requirements shall conform the provisions as mentioned in these regulations
- h) No Amenity Spaces shall be required to be provided for the uses mention in Table No.20, except at sr.no.(I)

Table No. 20												
21.1 - Permissible Marginal spaces, permissible basic FSI, Additional FSI for buildings in non-congested area												
Categories of the other buildings	Basic FSI	additional FSI	Rate of the Premium	Conditions if any,								
1	2	3	4	5								
A) Educational	As per Regulation No. 20.3, wherever required	Maximum Building Potential limit as per road width as mentioned in Table No. 18 (wherever required) minus basic FSI	10 %	Educational building excepting buildings for Pre-primary School, nursery Kinder garden and Special Educational Institute for Physically handicapped/Mentally ill. a) if the total area of the plot is not less than 0.4 hect. except lands reserved in Regional/Development Plan, and for the redevelopment of existing Municipal Schools, b) area as mentioned below is available for playground.								
i) Pre-primary School, nursery Kinder garden and Special Educational Institute for Physically handicapped/Mentally ill.												
ii) Primary School					As per Regulation No. 20.3 wherever required	20 %	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Sr.No.</th> <th style="text-align: center;">Area of land</th> <th style="text-align: center;">Area of Play Ground</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">(i)</td> <td style="text-align: center;">Upto 5 Hect.</td> <td style="text-align: center;">40%</td> </tr> <tr> <td style="text-align: center;">(ii)</td> <td style="text-align: center;">Above 5 Hect.</td> <td style="text-align: center;">For first 5 hect. 40% and for remaining 20%</td> </tr> </tbody> </table>	Sr.No.	Area of land	Area of Play Ground	(i)	Upto 5 Hect.
Sr.No.	Area of land	Area of Play Ground										
(i)	Upto 5 Hect.	40%										
(ii)	Above 5 Hect.	For first 5 hect. 40% and for remaining 20%										
iii) Other Educational Buildings including boys/ girls / youth hostels within 500 m. periphery from the recognised educational institutions.	As per Regulation No. 20.3 wherever required	30 %	Provided that, it shall not be necessary to increase area of existing playground; if any, when utilisation of additional FSI as otherwise permissible in these regulations, is proposed on upper floor of existing building. Provided further that, in case of existing building wherein utilisation of additional FSI is proposed, area of playground shall not be less than 40% or the existing area of playground whichever is minimum. Provided further that, in case of existing building wherein utilisation of additional FSI on upper floors is not possible and it is necessary to expand the existing building to accommodate number of students, then in such exceptional circumstances, area of playground may be permitted to be reduced, with the prior permission of Government.									

				<p>Other Conditions-</p> <ul style="list-style-type: none">i) The Educational Institute shall be of Government/Semi Government public authorities, Charitable Institutions or Private Institutionsii) Educational buildings shall not be permissible within 60 m. from the existing assembly building and 90 m. from the existing petrol pump.iii) Educational building shall only be permitted if 40% area is available for playground. However, this provision shall not be applicable to already approved existing building wherein construction of additional floor is proposed.iv) No classroom shall admeasure less than 38 sq. m. with a minimum dimension of 5.50 m. The height of any classroom shall not be less than 3.60 m.v) While granting Additional FSI to Educational Institutions offering primary and secondary education 5 % seats shall be reserved for admission for Government nominees. Deputy Director, Education Department shall be competent to decide such nominations. However, this condition shall not be applicable for Higher Education, Technical Education and Medical Education.vi) As and when required, some rooms of Educational Buildings shall be made available to the Government by the concerned institutions.vii) The Educational Institution shall maintain records regarding free / concessional education rendered to the needy persons, which shall

				<p>be made available to the Director of School Education, Higher and Technical Education on demand.</p> <p>viii) The Director of School Education, Government of Maharashtra shall be the competent authority to monitor as to whether the Educational Institution is observing the terms and conditions referred to at (i), (ii) and (iii) above and, in case of any breach thereof or in case the Education being rendered by the Educational Institution are not to the satisfaction of the said Department, the Director of School Education shall have the right to suitably penalise the Education Institution.</p> <p>ix) The Educational Institution shall file an undertaking that it shall abide by the above enumerated terms and conditions.</p> <p>x) Adequate Parking facilities as required per prevailing Development Control Regulation shall be provided.</p> <p>xi) While granting occupation certificate the Metropolitan Commissioner shall intimate to the Director of school Education for compliance of afore said condition along with copy of occupation certificate and plan.</p> <p>xii) Maximum of height of Educational building shall be as per The Maharashtra Fire protection and Life Safety Measure, Act, 2006</p> <p>xiii) Hostels shall not be misused and converted into other use. If it is found that the hostels are used for other purpose, Metropolitan Commissioner Authorised to take action as per the law.</p>
--	--	--	--	---

<p>B)Medical Institutions- Hospital, Maternity Homes, Health Club, buildings</p>	<p>As per Regulation No. 20.3, wherever required</p>	<p>Maximum Building Potential limit as per road width as mention in Table No. 18 (wherever required) minus basic FSI</p>	<p>i)No premium for Government, Semi Government, public authorities, hospitals.</p>	<p>i) The Medical Institutions of Government, Semi Government, public authorities, Charitable Institutions or private owner. ii) Free medical treatment to the extent of atleast 20% of the total number of beds shall be given to persons from Economically Weaker Sections of society or to persons below the poverty line. In addition, 10% of the total number of patients in OPD shall be provided treatment at concessional rates, viz. rates that are being charged in government hospitals. The Medical Institution shall furnish the requisite periodical statements to the Director of Health Services in this regard. iii) The Medical Institution shall maintain records regarding free/concessional medical treatment rendered to the needy persons, which shall be made available to the Director of Health Services on demand. iv) Any Special ward in the hospital building shall not admeasure less than 9.0. sq.m. in area with no side less than 3 m. v) Area of the general wards shall not admeasure less than 40 sq. m. with no side less than 5.5. m. vi) Every building shall have a refuge collection area of minimum 7.50 sq. m. size with cover on top and unclosed on at least three sides. The same shall not be allowed in marginal open spaces. Modern method of incineration of the refuge may be adopted.</p>
--	--	--	---	--

		<p>However maximum building potential shall be consider as 4.00 for Government Hospitals and 3.00 for other hospitals subject to Roads width 18 mt and more.</p>	<p>ii) 30% for Charitable Institutions iii) 40% for private hospitals</p>	<p>vii) Minimum and maximum height shall be 3.00 m. & 4.2 m. respectively. The greater height may be permitted by the Authority as per the requirement. viii) The Director of Health Services, Government of Maharashtra shall be the Competent Authority to monitor as to whether the Medical Institution is observing the terms and conditions referred above and in case of any breach thereof or in case the medical services being rendered by the Medical Institution are not to the satisfaction of the Director of Health Services, the Director of Health Services shall have the right to suitably penalise the Medical Institution. ix) While granting occupation certificate the Metropolitan Commissioner shall intimate to the Director of Health Services, Government of Maharashtra for compliance of afore said condition along with copy of occupation certificate and plan. x) Maximum of height of building for hospitals, sanatorium and nursing homes, shall be as per The Maharashtra Fire protection and Life Safety Measure, Act, 2006.</p>
--	--	--	---	--

<p>C) Institutional buildings/ Nationalised banks/ District Banks/ Central Bank/ Scheduled Bank/ Co- operative Bank.</p>	<p>As per Regulation No. 20.3 wherever required</p>	<p>Maximum Building Potential limit as per road width as mention in Table No. 18 (wherever required) minus basic FSI</p>	<p>30%</p>	<p>i) The institutional Buildings shall be of Government, Semi Government, public authorities or registered Charitable Institutions. ii) Minimum and maximum height shall be 3.60 m. & 4.2 m. respectively. The greater height may be permitted by the Authority as per the requirement.</p>
<p>D) Starred category hotels (two star and above)</p>	<p>(As per Regulation No. 20.3 wherever required</p>	<p>Maximum Building Potential limit as per road width as mention in Table No. 18 (wherever required) minus basic FSI. However maximum building potential shall be consider as 3.00 for Roads having width 18 mt. and more.</p>	<p>40% (up to four star) 50 % (five star and above)</p>	<p>i) The star category hotels shall be constructed on independent plot. ii) Certificate from the Tourism Department, GOI shall be necessary. iii) Minimum and maximum height shall be 3.60 m. & 4.2 m. respectively. The greater height may be permitted by the Authority as per the requirement. iv) While granting Additional FSI to starred category Residential Hotels 5% of rooms shall be reserved for Government nominees free of cost. Provided that such rooms be reserved for a period of not exceeding thirty days in a calendar year in a particular hotel. The head of respective authorities shall be competent to decide and monitor whether the institution is observing the terms and conditions as mentioned. v) While granting occupation certificate the Metropolitan Commissioner shall intimate to the Competent Authority for compliance of afore said condition along with copy of occupation certificate and plan.</p>

E)Buildings of Government and Semi-Government Offices, Local Authorities and Public Sector Undertakings:	As per Regulation No. 20.3 wherever required	Maximum Building Potential limit as per road width as mention in Table No. 18(wherever required) minus basic FSI. However maximum building potential shall be consider as 4.00 for Roads having width 18 mt and more.	Government and Semi-Gove Office – Local Authorities – Nil. Public Sector – 30%	i) The Metropolitan Commissioner with the previous approval of State Govt. may exceed the additional FSI. ii) Minimum and maximum room height shall be 3.60 m. & 4.2 m. respectively. The greater height may be permitted by the Authority as per the requirement.
F)Religious Building:	As per Regulation No. 20.3 wherever required	Maximum Building Potential limit as per road width as mention in Table No. 18(wherever required) minus basic FSI	15%	Structure used for worship like temple, church, mosque, gurudwara, agyari etc. (a) For any construction, addition or alteration or repairs of existing religious building prior permission from Home Department through Urban Development Department of Govt. of Maharashtra shall be mandatory. b) The proposal shall be in consistent with the Regional/Development Plan proposals. c) while granting occupation certificate the Metropolitan Commissioner shall intimate to the concerned Police Authority and Collector along with copy of occupation certificate and plan. d) subject to other conditions as decided by Metropolitan commissioner. e)It shall be necessary to obtain the No-Objection Certificate from concerned Police Authority and Collector, before grant of permission. f) Other ancillary user like, administration office, Dharmashala or Accommodation for devotees, eateries, convenience shops, etc.

G) Yatri Niwas, Youth Hostel	As per Regulation No. 20.3 wherever required	Maximum Building Potential limit as per road width as mention in Table No. 18(wherever required) minus basic FSI	15%	i) The building shall be on independent plot having minimum plot area of 1000 sq.mt. ii) Minimum and maximum height shall be 3.00 m. & 4.2 m. respectively. The greater height may be permitted by the Authority as per the requirement.
H) The Land in possession of Maharashtra State Road Transport Corporation, PMPML Pune, Metro Station	As per Regulation No. 20.3 wherever required	Additional FSI 0.5 over and above the basic permissible FSI.	No premium	Out of total FSI, maximum 1.00 FSI shall be allowed to be developed for commercial use and remaining FSI shall be for the self-use of the said principle use. Appropriate land shall be kept open for parking of buses, movement of buses and passengers.
I) Basic shelter for urban poor and Housing schemes developed for backward class of the society.	As per Regulation No. 20.3, wherever required	Maximum Building Potential limit as per road width as mention in Table No. 18(wherever required) minus basic FSI or FSI upto 2.5, whichever is maximum	No premium	Any housing scheme undertaken by planning authority, government / semi government organisation, under the basic shelter for urban poor or similar programme / scheme of the Central / State Government, may be allowed FSI upto 2.5, or as permissible in these regulations whichever is maximum subject to following condition. i) The said scheme shall be for EWS/LIG housing having minimum width of road 9 mt. ii) The scheme shall be implemented by the PMRDA / Government/semi-Government Authority stipulated by the Government, from time to time. iii) The use of the land under the Scheme shall be in consonance with the proposals of the sanctioned regional/development plan. iv) Total permissible floor space index for the scheme shall be 2.50 of the gross plot area (excluding the area affected by the D.P. Reservations) v) The entire 2.50 FSI as made permissible shall be utilised of the scheme only. vi) Amenity spaces as required under these regulation shall be provided under this scheme

21.2 ENTITLEMENT OF FSI FOR ROAD WIDENING OR CONSTRUCTION OF NEW ROADS / SURRENDER OF RESERVED LAND

The Metropolitan Commissioner may permit on the same plot, additional FSI of the area required for road widening or for construction of a new road proposed under the Regional/Development Plan and also for road widening / service road proposed to N.H./S.H./M.D.R./O.D.R. whether shown on Regional Plan or not, if the owner (including the lessee) of such land surrenders such land for road widening or construction of new road without claiming any monetary compensation in lieu thereof and hand over the same free of encumbrances to the satisfaction of the Metropolitan Commissioner. FSI generated against the surrender of land, shall be in proportion to the provisions mentioned in Regulation of TDR and may be utilised on the remaining land. If desired by the owner, TDR may be granted against such surrendered land instead of utilizing FSI on remaining land. Such TDR shall be allowed to be utilised as a Development Rights in accordance with the provisions of regulating Transfer of Development Rights (TDR). Thereafter, the road shall be transferred in the city survey records/revenue records in the name of the PMRDA and shall vest in it becoming part of a public street.

21.3 DEVELOPMENT / REDEVELOPMENT FOR CONSTRUCTION OF STAFF QUARTERS OF THE STATE GOVERNMENT OR ITS STATUTORY BODIES OR PMRDA ON PRIVATE LANDS

21.3.1 Regulation for staff quarters of the State Government or its statutory bodies or PMRDA on land belonging to such Authorities situated in developable zones such as Residential / Public Semi-public etc. except restricted zone such as Green Belt, Agricultural Zone, No development Zone, etc.

21.3.2 The basic FSI specified in these regulations may be allowed to be exceeded as per following table on the gross plot area solely for the project of construction of staff quarters (herein after referred to as —staff quarter project) for the employees of the Government, or its statutory bodies or the PMRDA, on land belonging to such User Authority, by the PWD of the Government of Maharashtra or MHADA or Maharashtra Police Housing Corporation or PMRDA or any other Public Agency nominated by the Government for this purpose, which also include any Special Purpose Vehicle, wherein the Government or a fully owned Company of the Government holds at least 51% equity share (hereinafter collectively referred to as —implementing Public Authority)

Road width and plot area	Maximum permissible FSI including basic FSI
18.0 mt or above minimum plot area 4000 sq.m. and above	2.50
12.0 mt. or above but below 18.0 mt.	2.50

21.3.4 For the purpose of calculating the FSI, the entire area of the plot excluding area under Regional/Development Plan roads and Regional/Development Plan reservations, if any, shall be considered.

21.3.5 The total permissible FSI under this regulation shall be utilised for construction of staff quarters for the User Authority, subject to the following:

21.3.5.1 The area of staff quarters for various categories of employees shall be as per the norms prescribed by the concerned User Authority and in no case shall the area of staff quarters exceed the maximum limit of carpet area as prescribed therein.

ii-a) Metropolitan Commissioner may also permit upto 1/3rd of the total permissible FSI under this regulation for construction of free sale area (hereinafter referred to as —free sale component) to be disposed of by the Implementing Public Authority as provided herein. The free sale component shall preferably be constructed in a separate block. Sub-division of plots shall be permissible on the basis of equitable distribution of FSI, in case construction of free sale component is permitted by the Metropolitan Commissioner.

The free sale component may be utilised for commercial use as per potential of plot as decided by the following committee. The extent of commercial use, if required shall be decided by the said committee strictly within the limits as specified in these regulations

1. Metropolitan Commissioner - Chairman
2. Collector of Concerned District – Member
3. Superintendent of Police, Pune - Member
4. Superintendent Engineer (Pune Circle) – Member

ii-b) If the User Authority required construction of staff quarters to the extent of full permissible FSI, then the User Authority shall pay full cost of construction + 5% of construction cost as establishment charges to the Implementing Public Authority.

ii-c) The flats constructed under the free sale component shall be first offered to the Central Government, its statutory bodies, Central /State PSUs for purchase as staff quarters and if the Central Government or its statutory Bodies or Central /State PSUs do not indicate willingness to purchase the same within the prescribed time limit, such flats shall be sold in open market.

21.3.6 i) Notwithstanding anything contained in these regulations, no amount shall be charged towards Premium, Scrutiny Fee etc., for the projects proposed under this regulation.

21.3.7 For any staff quarters project under this regulations, a development agreement shall be executed between the User Authority and the Implementing Public Authority, which, inter alia, shall authorise the Implementing Authority to dispose of the flats constructed under the free sale component of the project, wherever applicable. Such development agreement shall contain the details regarding the modalities and conditions of transferring such quarters (whether free of cost or on payment/ receipt of certain amount by the User Authority) to the user authority and also conditions modalities of disposing of the flats under the free sale components by the Implementing Public Authority.

21.4 DEVELOPMENT / REDEVELOPMENT OF HOUSING SCHEMES OF MAHARASHTRAHOUSING AND AREA DEVELOPMENT AUTHORITY

Development / re-development of housing schemes of Maharashtra Housing and Area Development Authority shall be subject to the following provision.

1) The FSI for a new scheme of Low Cost Housing, implemented by MHADA departmentally on vacant lands for Economically Weaker Sections (EWS), Low Income Group (LIG) and Middle Income Group (MIG) categories shall be 2.50 on the gross plot area and at least 60% built-up area in such scheme shall be in the form of tenements under the EWS, LIG and MIG categories, as defined by the Government in Housing Department from time to time.

- 2) For redevelopment of existing housing schemes of MHADA, containing (i) EWS/LIG and/or (ii) MIG and/or (iii) HIG houses with carpet area less than the maximum carpet area prescribed for MIG, the total permissible FSI shall be 2.50 on the gross plot area (exclusive of the Fungible FSI).

2.1) Where redevelopment of buildings in existing housing schemes of MHADA is undertaken by the housing co-operative societies or the occupiers of such buildings or by the lessees of MHADA, the Rehabilitation Area Entitlement, Incentive FSI and sharing of balance FSI shall be as follows:-

A) Rehabilitation Area Entitlement:

- i) Under redevelopment of buildings in existing Housing Schemes of MHADA, the entitlement of rehabilitation area for an existing residential tenement shall be equal to sum total of -
- a) a basic entitlement equivalent to the carpet area of the existing tenement plus 35% thereof, subject to a minimum carpet area of 300 sq.ft. and
 - b) an additional entitlement governed by the size of the plot under redevelopment, in accordance with the Table No. 21 below: -

Table No. 21	
Area of the Plot under Redevelopment	Additional Entitlement (As % of the Carpet Area of the Existing Tenement)
Upto 4000 sq.m.	Nil
Above 4000 sq.m. to 2 hect.	15%
Above 2 hect to 5 hect.	25%
Above 5 hect to 10 hect.	35%
Above 10 hect.	45%

Provided that the maximum entitlement of rehabilitation area shall in no case exceed the maximum limit of carpet area prescribed limit for MIG category by the Govt. as applicable on the date of approval of the redevelopment project. Provided further that the entitlement of rehabilitation area as admissible under this regulation shall be exclusive of the area of balcony.

- ii) Under redevelopment of buildings in existing Housing Schemes of MHADA, the entitlement of rehabilitation area of any existing commercial/amenity unit in the Residential Housing Scheme shall be equal to the carpet area of the existing unit plus 20% thereof.

B) Incentive FSI- Incentive FSI admissible against the FSI required for rehabilitation, as calculated in (a) above, shall be based on the ratio (hereinafter referred to as Basic Ratio) of Land Rate (LR) in Rs./Sq.m. of the plot under redevelopment as per the Annual Statements of Rates (ASR) and Rate of Construction (RC)* in Rs./Sq.m. applicable to the area as per the ASR and shall be as given in the Table No.22 below:-

Table No. 22	
Basic Ratio (LR/RC)	Incentive (As % of Admissible Rehabilitation Area)
Above 6.00	40%
Above 4.00 and upto 6.00	50%
Above 2.00 and upto 4.00	60%
Upto 2.00	70%

Explanation:

* RC is the rate of construction in respect of R.C.C. Construction, as published by the Chief Controlling Revenue Authority & Inspector General of Registration, Maharashtra State in the Annual Statements of Rates.

Provided that the above incentive shall be subject to the availability of the FSI on the Plot under redevelopment and its distribution by MHADA.

Provided further that in case there are more than one land rate applicable to different parts of the plot under redevelopment, a weighted average of all applicable rates shall be taken for calculating the Average Land Rate and the Basic Ratio.

Provided further that the Land Rate (LR) and the Rate of Construction (RC) for calculation of the Basic Ratio shall be taken for the year in which the redevelopment project is approved by the authority competent to approve it.

C) Sharing of the Balance FSI: -

The FSI remaining in balance after providing for the rehabilitation and the incentive components, calculated as per (a) and (b) above respectively, shall be shared between the Co-operative Housing Society and MHADA in the form of built-up area, as given in Table No. 23 below and the share of MHADA shall be handed over to MHADA free of cost.

Table No. 23		
Basic Ratio (LR/CR)	Sharing of balance FSI	
	Share of Co-operative Society	Share of MHADA
Above 6.00	30%	70%
Above 4.00 and upto 6.00	35%	65%
Above 2.00 and upto 4.00	40%	60%
Upto 2.00	45%	55%

2.2) Where redevelopment of buildings in the existing Housing Schemes of MHADA is undertaken by MHADA or jointly by the MHADA alongwith the housing societies or the occupiers of such building or by the lessees of MHADA, the Rehabilitation Area Entitlement, incentive FSI and sharing of balance FSI shall be as follows:

A) Rehabilitation Area Entitlement: The Rehabilitation Area Entitlement shall be increased by 10% of the existing carpet area, over and above the Rehabilitation Area Entitlement calculated in (A) of 2.1 above, subject to the maximum of the size of MIG

prescribed by the Government in the Housing Department.

- B) Incentive FSI:** Incentive FSI shall be the same as in (B) of 2.1 above.
- C) Sharing of the balance FSI:** Sharing of the balance FSI shall be the same as in 2.1.
- 3) For the purpose of calculating the FSI, the entire area of the layout including Regional/Development Plan roads and internal roads but excluding the land under the reservation of public amenities shall be considered. Sub-division of plots shall be permissible on the basis of the compulsory open spaces as in these Regulations. For low cost housing schemes of MHADA for EWS/LIG categories, the prevailing Regulations of the DCPR shall apply.

Provided that there shall be no restriction on the utilization of the FSI permissible under this Regulation except for the restrictions under any law, rule or regulation.

- 4) For the purpose of this Regulation the carpet areas for EWS, LIG or MIG tenements shall be as determined by the Government from time to time.
- 5) a) For providing the requisite infrastructure for the increased population, an infrastructure charge at the rate of 7% of the Land Rate as per the ASR of the year of approval of the redevelopment project shall be chargeable for the extra FSI (excluding the fungible FSI) granted over and above the normal FSI admissible for the redevelopment schemes. 50% of the Infrastructure Charge levied and collected by MHADA shall be transferred to the PMRDA for developing necessary off site infrastructure.
- b) No premium shall be charged for the FSI admissible as per the prevailing regulations
- (i) Construction of EWS/LIG and MIG tenements by MHADA on a vacant plot, or
 - (ii) in a redevelopment project for the construction of EWS/LIG and MIG tenements towards the share of MHADA, or
 - (iii) for rehabilitation component of a redevelopment project.
- 6) Notwithstanding anything contained in these Regulations, the relaxation incorporated in the prevailing Regulation shall apply to the Housing Schemes under this Regulation for tenements under EWS/LIG and MIG categories. However, the front open space shall not be less than 3.6m.
- 7) a) In any Redevelopment Scheme where the Co-operative Housing Society Developer appointed by the Co-operative Housing Society has obtained No Objection Certificate from the MHADA, thereby sanctioning additional balance FSI with the consent of 70% of its members and where such NOC holder has made provision for alternative accommodation in the proposed building (including transit accommodation), then it shall be obligatory for all the occupiers / members to participate in the Redevelopment Scheme and vacate the existing tenements for the purpose of redevelopment. In case of failure to vacate the existing tenements, the provisions of section 9A of the MHAD Act mutatis mutandis shall apply for the purpose of getting the tenements vacated from the not co-operative members.
- b) For redevelopment of buildings in any existing Housing Scheme of MHADA under clause 2.2 hereinabove, by MHADA, the consent of the Co-operative Housing Society in the form of a valid Resolution as per the Co-operative Societies Act, 1960 will be sufficient. In respect of members not co-operating as per approval of the redevelopment project, action under section 95(A) of the Maharashtra Housing and Area Development Act, 1976 may be taken by MHADA.

- 8) A corpus fund, as may be decided by MHADA, shall be created by the Developer which shall remain with the Co-operative Housing Societies for the maintenance of the new buildings under the Rehabilitation Component.

21.5 REDEVELOPMENT OF EXISTING BUILDINGS BELONGING TO EWS / LIG GROUPS.

Reconstruction / Redevelopment of **existing buildings of EWS / LIG undertaken by landlord and / or co-operative housing societies and / or occupiers having carpet area of all tenements less than the EWS / LIG norms prescribed by MHADA**, which existed prior to these regulations which has ceased to exist in consequence of accidental fire / natural collapse or demolition for the reasons of the same having been declared unsafe by or under a lawful order of the Metropolitan Commissioner, shall be allowed subject to following conditions:

- 1) FSI to be allowed for such redevelopment proposal shall be base FSI permissible under these regulations or the FSI consumed by the existing authorized building whichever is more. In addition to this minimum 15 sq. m. built up area per Residential flat shall be allowed as incentive to the owner excluding bungalow.
- 2) All the occupants of the old building shall be re-accommodated in the redeveloped building.
- 3) In case of fire gutted buildings, the conditions of more than 30 years age of buildings shall not be made applicable, provided the structural stability certificate from nearest Govt. Engineering College shall be necessary.
- 4) The Committee comprises of the Metropolitan Commissioner, Chief Engineer, PMRDA, Chief Fire Officer, PMRDA and the Head of department structural Engineering of Government Engineering College shall be set-up to decide whether the building is —dangerous or dilapidated or Unsafe.
- 5) Reconstruction of the building on the plots shall conform to the provisions of the sanctioned Regional/Development Plan and sanctioned Development Control and Promotion Regulations.

21.6 REDEVELOPMENT OF OLD DILAPIDATED/DANGEROUS BUILDINGS

Reconstruction / Redevelopment in whole or in part of any tenanted building which existed prior to these regulations which has ceased to exist in consequence of accidental fire / natural collapse or demolition for the reasons of the same having been declared dangerous or dilapidated or Unsafe by or under a lawful order of the Metropolitan Commissioner, shall be allowed subject to following conditions:

- a) Redevelopment of tenanted building undertaken by landlord and / or co-operative housing societies of landlord and / or occupiers shall be allowed, with an FSI equivalent to the Rehab Area plus 50% incentive FSI of the rehab area. Provided that Rehab Area will be the authorisedly utilised Area or 27.87 sq.mt. per tenement whichever is more.

However as per the road width if the potential of the Plot is more than what is mention above, then the balance potential available on plot after deducting rehab and incentive FSI may be allowed to be utilized to that extent by the way of TDR or Additional FSI in 50- 50 proportion subject to limitation of additional FSI as mentioned in Table No. 18, if any.

- b) All the certified tenants of the old building shall be re-accommodated in the redeveloped building. Each **tenant** shall be rehabilitated and given free of cost the carpet area occupied by him for residential purpose in the old building subject to the minimum carpet area of **27.87sq. mt.** or existing carpet area whichever is more **subject to** maximum carpet area upto 70 sq.mt. (753 sqft.) . In case of non-residential occupier the area to be given in the reconstructed building **shall** be equivalent to the area occupied in the old building.

Provided that if the carpet area under Residential use exceeds 70 sq.mt., the cost of construction **for Area exceeding 70 sq.mt.** shall be paid by tenant / occupant to the developer. The cost of construction shall be as per the ready reckoner rate of that year. The carpet area exceeding 70 sq.mt. shall be considered for rehab FSI but shall not be consider for incentive FSI.

- c) In case of fire gutted buildings the conditions of more than 30 years age of buildings shall not be made applicable, provided the structural stability certificate from nearest Govt. Engineering College shall be necessary.
- d) The Committee comprises of M e t r o p o l i t a n Commissioner, Chief Engineer, PMRDA, Metropolitan Planner, PMRDA, Chief Fire Officer, PMRDA and the Head of department structural Engineering of Government Engineering College shall be set-up to decide whether the building is —dangerous or dilapidated or unsafel.

Note-

1. For the purpose of deciding authenticity of the structure if the approved plans of existing structure are not available, the Metropolitan Commissioner shall consider other evidences such as Assessment Record or City Survey Record or Sanad.
2. In case where there are number of buildings. on plot, in such cases, equivalent land component of the buildings which is declared unsafe shall be worked out and incentive FSI shall be based on such land component.
3. Reconstruction of the building on the plot shall conform to the provisions of the sanctioned Regional/Development Plan and sanctioned Development Control and Promotion Regulations.
4. The new building may be permitted to be reconstructed in pursuance of an agreement to be executed on stamp paper by atleast 70 percent of the landlord / occupants in the original building, within the meaning of the Bombay Rents, Hotel and Lodging House Rents Control Act, 1947 or Apartment Act and its related provision and in such agreement provision for accommodation for all occupants in the new building on agreed terms shall be made and a copy of such agreement shall be deposited with the PMRDA before commencement or undertaking reconstruction of the new buildings.
The carpet area of part or parts of the new building intended to be used as non-residential use shall not exceed the carpet area of part or parts of the original building so used
5. No new tenancy shall be created
6. An amount as may be decided by the Government shall be paid by the Owner /Developer / Society as additional Development Cess for the built up area over and above the Base FSI. A corpus fund as decided by the Metropolitan Commissioner is to be created by the Developer which will take care of the maintenance of the building for a period of 10 years.

21.7 REDEVELOPMENT OF EXISTING BUILDINGS

Reconstruction / Redevelopment schemes undertaken by the PMRDA / Owners for the existing residential development.

The FSI to be allowed for such proposal shall be FSI permissible under these regulation no. 20.3 wherever applicable or the FSI consumed by the existing authorized building whichever is more.

21.8 TRANSIT ORIENTED DEVELOPMENT (TOD)

21.8.1 Definitions

- (i) **TOD zone:** - It is the area along/around the proposed MRTS/Metro corridor as will be delineated by PMRDA with approval of the State Government.
- (ii) **Base permissible FSI:** - It is the FSI that is otherwise permissible on any land with respect to zone shown as per the sanctioned Regional/Development Plan and the relevant provision of the Principal DCR excluding the TDR and the premium FSI, redevelopment incentive FSI that can be received.
- (iii) **Gross plot area:** - Gross Plot Area means total area of land after deducting area under reservation or deemed reservation like amenity space if any, area under R.P./D.P. Road and Road widening.
- (iv) **Principal DCPR:** - Principal DCPR means these DC&P Regulations excluding the provisions regarding TOD zone.

21.8.2 Date of coming into force :- The date of coming into force of these regulations shall be the date as notified by the Government.

21.8.3 Maximum Permissible FSI :- The maximum permissible total FSI in TOD zone shall be 4.00 including the base permissible FSI, subject to condition that, the additional FSI over and above the base permissible FSI shall be allowed within the overall limit of maximum permissible FSI, as given in the Table below-

Sr. No.	Road width in m.	Min. Plot Area in sq.m.	Maximum Permissible FSI
1	2	3	4
1	9 m. and up to 12 m.	Below 1000	2.00
2	12 m. and up to 18 m.	1000 or above	2.50
3	18 m. and up to 24 m.	2000 or above	3.00
4	24 m. and up to 30 m.	3000 or above	3.50
5	30 m. and above	4000 or above	4.00

Explanation: -

- 1) The maximum permissible FSI as per the above Table shall be determined by satisfaction of both the criteria's viz. Minimum Road width as well as plot area, simultaneously. However, in case, both these criteria's are not satisfied simultaneously, the maximum permissible FSI shall be the minimum of that permissible against each of these two criteria's, as illustrated below:

Illustrations: -

 Utilization of
FSI

Plot Area in sqm	Road width					
	Less than 9mt.	9 m. and up to 12 m	12 m. and up to 18 m	18 m. and up to 24 m.	24 m. and up to 30 m.	30 m. and above
Below 1000	Principal DCPR	2	2	2	2	2
1000 to below 2000	Principal DCPR	2	2.5	2.5	2.5	2.5
2000 to below 3000	Principal DCPR	2	2.5	3.0	3.0	3.0
3000 to below 4000	Principal DCPR	2	2.5	3.0	3.5	3.5
4000 or above	Principal DCPR	2	2.5	3.0	3.5	4.0

21.8.3.1 Premium to be Paid - Additional FSI over and above base permissible FSI of respective land use zones as per principal DCPR, may be permitted on the payment of premium equivalent as would be decided by Government from time to time.

21.8.3.2 Integrated Mobility Plan:- There shall be an Integrated Mobility Plan envisaging inter-linkages between different modes of mass transport, parking management, traffic management and pedestrianisation.

21.8.3.3 The maximum permissible FSI as given in Table under regulation 21.8.3 shall be calculated on the gross plot area.

21.8.3.4 In case of plot / plots falling partly within the TOD zone, the FSI permissible shall be as follows, provided that the total area of the plot (plot falling within TOD zone plus plot falling outside TOD zone) shall be as prescribed in the table in regulation no. 21.8.3 :-

1. Where 50% or more area of such plot / plots falls within TOD zone, these regulations including FSI shall apply to the total area of such plot / plots.
2. Where less than 50% area of such plot / plots falls within TOD zone, these regulations including FSI shall be applicable to the part of plot / plots falling within TOD zone, whereas for the part of plot / plots falling outside TOD zone, these regulations except provisions regarding FSI shall be applicable. The FSI permissible for the part falling outside TOD zone shall be as per Principal Development Control and Promotion Regulations.

Notwithstanding anything contained in any other provision of this DCPR the Parking, Double height terraces up to 20% and 15% balconies not enclosed, Stair cases, Lift wells with machine rooms, Refuge areas, Voids, Service Floor & Entrance lobbies of the building in TOD zone shall be free of FSI.

Notwithstanding anything contained in any other provisions of these regulations, TDR shall not be allowed to be received on the plots within TOD zone, irrespective of its location in congested area / non congested area as per the Regional/Development Plan of PMRDA.

21.8.4 Tenement Size

For any development or redevelopment within TOD zone, size of tenement shall be minimum 25 sqm and maximum 120 sqm of built-up area and out of total proposed tenements, the tenements equivalent to at least 50% of total FSI shall be of a size equal to or less than 60 sqm. These tenements shall not be allowed to be clubbed/amalgamated in any case.

21.8.5 Permissible mixed use in TOD zone:

Mixed use in the form of residential and commercial may be permissible on the residential plot in TOD zone fronting on the road width of 12 mt. and above.

21.8.6 Other provisions regarding marginal open spaces shall be governed by the proposed height of structure, as given in the provisions 21.8.7 below and should conform to the Maharashtra Fire Prevention and Life Safety Measures Act, 2006 (Maharashtra Act no. III of 2007) as amended from time to time. No building permission shall be issued without NOC of the Chief Fire Officer, PMRDA. Other regulations regarding room sizes, apertures for light and ventilation shall be as per the principal DCPR in force.

21.8.7 Marginal Spaces

Sr. No.	Building Height	Side and Rear Margins	Remark
a	15.0 mt and below	H/2-4	Minimum 3.0 mt. for Residential minimum 4.5 mt. for Commercial and Minimum 6.0 m. for Special Buildings.
b	Above 15.0 mt. and upto 24.0 mt.	H/4	
c	24.0 mt and above	H/5 subject to Maximum 12.0 mt.	

Note- However if Developer / Owner provides more than 12.00 mt. side and rear margins, it shall be permissible.

- 21.8.7.1** No projections shall be allowed in marginal spaces so that minimum 6 mt. marginal spaces remain free from all encumbrances for the movement of fire tenders. In case if ramp is necessary from accessibility, such ramp may be allowed after living 6 mt. clear margin.
- 21.8.7.2** For calculation of marginal distances the height of the parking floors (Maximum two floors above the Ground Level) shall not be taken in account, However height of such parking floors will be counted towards the total height of the building for deciding the building as high rise building and for civil Aviation purpose.
- 21.8.7.3** Car lift / mechanical parking shall be permissible, as per Principal DCPR as amended from time to time.

21.8.8 Parking

Parking in the TOD zone shall be provided as per the table given below:

Sr. No.	Occupancy	One parking space for every	Transit Oriented Development Influence Zone		
			Car	Scooter / Motorcycle	Cycle
1	Residential	For 4 units having carpet area From 25 and upto 40 sq.mt.	0	1	2
		For 2 units above 40 and upto 60 sq.mt.	1	1	2
		For every unit above 60 and upto 80 sq.mt.	1	2	2
		For every unit above 80 sq.mt	1	1	1
2	Govt. & Semi Govt. Private business buildings	100 sq.mt carpet area or fraction thereof	1	2	2

Note: i) Parking spaces for differently – abled persons shall be provided as per Indian Road Congress Code No. IRC 103:2012 in each new construction / development / re-development in the TOD zone.

ii) No on street parking shall be permissible, unless specifically allowed in the integrated mobility plan report.

21.8.8.1 Incentive for providing Public Parking in the area falling within the radius of 200 mt. from the Metro/MRTS Station.

If the owner / developer of the plot falling within the radius of 200 mt. from the Metro Station/MRTS, is willing to provide Public Parking space over and above the parking spaces required as per the table given in regulation No.21.8.8 of these regulations, the same shall be allowed and in that case the premium to be paid by such developer / owner as per regulation No.23.8.3.1 shall be reduced by the amount equal to the premium worked out for 25% of the area earmarked for such additional Public Parking space, subject to following conditions:-

1. Such parking area shall be in the built-up form and shall be handed over to PMRDA free of cost before granting the Occupation Certificate to the project. The PMRDA should enter into an agreement with owner / developer for such parking space at the time of granting Commencement Certificate to the project. Such Public Parking area shall be clearly shown on the proposed building plan / layout and a condition to above effect shall be incorporated in the Commencement Certificate.
2. The parking area shall have independent access from major road adjacent to the plot and with proper entry and exits.
3. The parking area to be made available at individual site shall be at minimum 100 sq.mt. at one place either at Ground floor / Stilt floor or first floor.
4. The maximum parking area that can be provided shall be decided by the Metropolitan Commissioner, PMRDA , as the case may be, on considering the location of such site and the parking requirement.
5. A board showing the location of such public parking space should be displayed at suitable places by the PMRDA.

6. Area covered under such parking shall not be counted towards FSI consumption.
7. Concerned land owner / developer / society / public company shall not be allowed to operate the public parking.
8. The proposed development shall be further subject to such conditions as may be decided by the Metropolitan Commissioner.

21.8.9 In case of metro rail, development or redevelopment, proposed by the Authority / individual applicant / any other Planning Authority, from the edge of the Metro Rail, within 20 mt. distance from the Metro Rail, on its either side, the concerned Planning Authority i.e. the PMRDA before granting such permission for development / redevelopment shall seek prior NOC from the concerned Metro Railway Authority as required under the Metro Railways (Construction of Works) Act, 1978/PMRDA from the point of view of safety of the Metro Railway and such other related matters.

21.8.10 In case of any conflict between these Regulations and any other Regulation/s of the DCPR, these Regulations shall prevail for the TOD zone.

21.8.11 No Compound wall / fencing shall be permissible on the boundary of plot fronting on road and 50% front marginal distance (subject to minimum of 3.0 mt.) shall be kept accessible and to be used as foot paths, for pedestrians. However, it shall be permissible for the applicant to construct / erect fencing, on the boundary, after leaving the space for pedestrians as specified above.

However, for the plots situated on 9mt. and 12mt. wide Roads having 100% residential use therefore above rule shall not be made applicable.

21.8.12 Large wholesale stores, car dealer showrooms, warehouses/storages, auto service centres, Garages etc. shall not be permissible in TOD zone.

21.8.13 Provision of Inclusive housing shall not be applicable in TOD zone.

21.8.14 For Gunthewari development regularized under the provisions of Maharashtra Gunthewari Development Act, 2001 and falling in TOD zone, seeking provisions for redevelopment, these regulations shall apply.

21.8.15 The width of passage shall be minimum 1.5 mt. for residential use & 2.0 mt. for commercial use.

21.9 DEVELOPMENT OF HOUSING FOR EWS/LIG/PMAY

If the owner constructs the housing for EWS / LIG / PMAY in the form of tenements of size upto 60 sq. mt. carpet area on his plot, then he shall be exempted from requirement of premium as mentioned in regulation No. 20.3 Table No. 18 subject to following conditions.

- i) Out of the total tenements, at least 40% tenements shall be of area not more than 30sq.mt.
- ii) Only one tenement should be sold to a family. Adjoining tenement should not be sold to a close relative of such tenement owner. Affidavit to that effect shall be obtained from the land owner / developer and purchaser.
- iii) The size of tenement of 30 or 60 sq. mt. shall be inclusive of common areas like staircases, passages etc. but exclusive of balcony, double height terraces.
- iv) Concessions in marginal spaces may be allowed by the Metropolitan Commissioner.

21.10 REGULATIONS FOR DEVELOPMENT OF INFORMATION TECHNOLOGY ESTABLISHMENT

Development of Information Technology Establishments shall be regulated as per the Information Technology & Information Technology Enabled Services (IT/ITES) Policy 2015 as declared by Industries Department vide Government Resolution No. ITP 2013/CR-265/IND-2 dated 25/08/2015, along with the special regulations sanctioned by the Government vide notification No. TPB 4316/CR-167/2016/(3)/UD-11/dated 15th July, 2016 and amended time to time which are mentioned below:

- 1) The Metropolitan Commissioner may permit additional FSI upto 200 % over and above the basic permissible F.S.I. to all registered Public and Private IT/ITES Parks/AVGC Parks /IT SEZs or IT Parks in SEZs / Stand-alone IT/ITES units in public IT Park (including IT/ITES units located in Residential / Industrial/No Development/ Green/Agriculture Zone or any other land-use zone in which such users are permissible), which have been approved by the Directorate of Industries, proposed to be set up or already set up under present / previous IT/ITES policies, (hereinafter referred to as the "said unit") by charging premium of 30% of the land rate for the said land as prescribed in Annual Statement of Rates for the relevant year of granting such additional F.S.I. for PMRDA

In case of the Navi Mumbai Notified Area, the CIDCO as land owner may recover lease premium for additional F.S.I. if applicable under land disposal policy of CIDCO.

Provided that additional FSI above 100% and upto 200% shall be permissible only on plots having an access road of minimum 18 meters width.

Provided further that, the premium so collected shall be shared between the Planning Authority and the Government in the proportion of 50 : 50. The share of the Government shall be paid to the concerned Branch office of the Town Planning Department. (Explanation: - Premium charges shall be calculated on the value of lands under such zones, determined by considering the land rates of the said land as prescribed in Annual Statement of Rates (ASR). These charges shall be paid at the time of permitting additional F.S.I. by considering the ASR for the relevant year without applying the guidelines)

- 2) No premium shall be chargeable in PMR areas, if they are covered under No Industry Districts and Naxalism affected areas of the State (as defined in the " Package Scheme of Incentives-2013" of the Industries, Energy & Labour Department of the State).
- 3) The total maximum permissible F.S.I. shall not exceed limit of 3.00.
- 4) Maximum 20% of total proposed Built-up area (excluding parking area) inclusive of such additional F.S.I. may be permitted for support services in IT Parks remaining built-up area shall be utilized for IT/ITES.
- 5) New said unit shall allocate at least 2% of the total proposed built-up area, for providing incubation facilities for new units. This area would be treated as a part of the Park to be used for IT activities and eligible for additional FSI benefits accordingly.
- 6) Premium to be received by the Planning Authority as per provisions in this regulation shall be deposited in a separate fund viz. "Critical Infrastructure Fund for IT/ITES Industries" and this fund shall be utilized only for creation of Critical Infrastructure for IT/ITES Industries;

Provided that in the event, the developer come forward for providing such off site infrastructure at his own cost, instead of paying premium as prescribed above, then the Planning Authority may determine the estimated cost of the work by using rates prescribed in District Schedule of Rates (DSR) of the relevant year, in which order for commencement of such work is issued. The Planning Authority shall also prescribe the standards for the work. After completion of the works, the Planning Authority shall verify and satisfy itself that the same is developed as per prescribed standards and thereafter, by deducting the cost of works, the balance amount of premium shall be recovered from such developer before issuing Occupancy Certificate.

Provided that, in case the cost of work is more than the premium to be recovered, such additional cost to be borne by such developer.

- 7) Permission for erecting towers and antenna up to height permitted by the Civil Aviation Department shall be granted by the Commissioner as per the procedure followed for development permission or otherwise as may be decided by the Government.
- 8) While developing site for IT/ITES with additional FSI, support services as defined in the IT Policy 2015, shall be allowed.
- 9) The sanctioned existing regulations in respect of I.T. Establishments, are proposed to be replaced suitably and for the Planning Authorities, which have no provisions in respect of I.T. Establishments, these regulations shall be proposed to be inserted as new regulations.
- 10) Notwithstanding anything contained in the Development Control Regulations of Planning Authorities, no amenity space is required to be left for development of plot/land upto 2.00 Hect. for IT/ITES.
- 11) Notwithstanding anything mentioned in these Regulations, special provisions mentioned in the existing Regulations of respective Planning Authority, which areas are not covered under these regulations shall continue to prevail unless otherwise specified.
- 12) The Directorate of industries will develop a web portal on which the developer of every IT park will be bound to provide / update detailed information about names of the units in the park, utilization of built-up area and activities being carried out, manpower employed in the It Park for IT/ITES and support services on yearly basis.

If a private IT park has availed additional FSI as per the provisions of IT/ITES policy and subsequently it is found that the built-up space in the park is being used for non IT/ITES / commercial activities / any other activity not permitted as per the IT/ITES policy under which the said park was approved, a penal action as below will be taken, the payment shall be shared between the concerned Planning Authority and the Government in the ratio of 3:1.

- a) The misuse shall be ascertained by physical site verification of the said private IT park by a team of officers from the Directorate of industries and the Planning Authority which has approved the building plans of the said private IT park.
- b) A per day penalty equal to 0.3% of the prevailing ready reckoner value of the built-up area that has been found to be used for non- IT/ITES activities.
- c) The penalty will be recovered from the date of commencement of unauthorized use till the day non IT use continues.

After payment of the penalty to the concerned Planning Authority which has sanctioned the building plans of the concerned private IT park, the said private IT Park will restore the use of premises to the original purpose for which LOI/ Registration was granted.

If the private IT Park fails to pay penalty and / or restore the use to its original intended use, the concerned Planning Authority will take suitable action under the Maharashtra Regional and Town Planning Act 1966, against the erring private IT Park under intimation to the Directorate of Industries. This provision will also be applicable to existing IT Parks.

21.11 REGULATION FOR DEVELOPMENT OF BIOTECHNOLOGY PARKS:

A. DEFINITION-

The Biotechnology Units/ Parks shall mean Biotechnology units/ parks which are certified by the Development Commissioner (Industries) or any officer authorised by him in his behalf. The Biotechnology Park and unit/units outside park shall have minimum land area of 2 acres or 20000 sq.ft. built up area. The said requirement of 20000 sq.ft. shall be as per normal permissible FSI and without considering permissible additional FSI/ TDR/ Free of FSI area.

B. BIOTECHNOLOGY UNITS/ PARKS TO BE ALLOWED IN INDUSTRIAL ZONE-

Biotechnology Units/Parks shall be permitted in Industrial Zone on all plots fronting on roads having width more than 12 meter.

C. BIOTECHNOLOGY UNITS/PARK TO BE ALLOWED IN NO DEVELOPMENT ZONE EARMARKED IN THE REGIONAL/DEVELOPMENT PLAN.

Biotechnology Units/Parks shall be permitted in No Development Zone subject to following conditions: -

- i) Maximum FSI limit shall be 0.20 and as far as possible the development shall be at one place of the total land.
- ii) The ground coverage shall not exceed 10% of the area of the plot.
- iii) Tree plantation shall be done at the rate of 500 Trees/Ha on the remaining land excluding the built up area and the surrounding open space/utility space.
- iv) The maximum height of buildings shall not exceed 24 mt.
- v) Essential residential development for the staff/ officer's accommodation shall be permitted upto the extent of 33% of the permissible built up area.
- vi) These users shall be permitted in No Development Zone, within a distance of 3 km. from the adjoining developable zone.
- vii) Development in plots affected by CRZ area shall be permissible subject to the notification issued by MOEF regarding CRZ.

D. ADDITIONAL FSI TO BIOTECHNOLOGY UNITS / PARK

Subject to approval by Director of Industries, the Commissioner/ Commissioner/ Competent Planning Authority or as the case may permit the floor space indices specified in these regulations to be exceeded to the extent of 100% over and above the permissible FSI (including for Biotechnology Units/Park located in No Development Zone proposed in the Regional/Development Plan) for biotechnology units/parks subject to following conditions:-

- i) Out of total built up area minimum 90% shall be used for Biotechnology purpose and maximum 10% (by deducting parking space) shall be used for ancillary users such as specified in the Govt. Resolution of Industry, Energy and Labour Department. No. BTP 2008/CR-1608/Ind-2, dated 10/2/09.
- ii) Additional FSI to Biotechnology units would be available to Biotechnology Parks duly approved by the Directorate of Industries and after observance of all the regulation of environment.
- iii) Parking spaces, as per the provision of Development Control Regulation shall be provided subject to minimum requirement of one parking space per 100 sq.mt. built up area.

- iv) The additional FSI shall be granted upon payment of premium which shall be paid in the manner as may be determined by the Government. Such premium shall be recovered at the rate of 25% of the present day market value of the land under reference as indicated in the Ready Reckoner.
- v) 25% of the total premium shall be paid to the Govt. and remaining 75% amount shall be paid to the said Authority.
- vi) The premium so collected by the Planning Authorities shall be primarily used for development of offsite infrastructure required for the Biotechnology Parks.
- vii) In the event, the developer comes forward for provision of such off site infrastructure at his own cost, then the said Planning Authority shall determine the estimated cost of the works and shall also prescribe the standards for the work. After completion of the works the said Planning Authority shall verify as to whether the same is as per prescribed standards and thereafter, by deducting the cost of works, the balance amount of premium shall be recovered by the said Planning Authority.
- viii) No condonation in the required open spaces, parking and other requirement prescribed in the regulations shall be allowed in case of additional FSI.
- ix) Development of biotechnology park shall be done as per the guidelines issued by Industries Department vide the said resolution.

21.12 DEVELOPMENT OF PUBLIC TOILET

The owner if constructs public toilet in addition to the number of toilets required for his proposed development at the location required and as prescribed by the Metropolitan Commissioner, preferably on ground floor having separate access, he may be granted additional FSI equal to the built up area of such additional toilets. Provided such toilet shall be maintained by the owner at his own cost to the satisfaction of Commissioner.

PART – VI

FIRE PROTECTION REQUIREMENTS

22.1 General: All buildings shall be planned, designed and constructed to ensure fire safety and this shall be done in accordance with Part IV of Fire Protection of National Building Code of India and Maharashtra Fire Prevention and Life Safety Measures Act, 2006. as amended from time to time, and Part IV of Fire Protection of National Building Code of India (for the provisions which are not covered in these regulations.) In case of special buildings, the building schemes shall also be cleared by the Fire Officer, Fire Brigade Department of the PMRDA.

22.2 Construction materials

All materials of constructions in load bearing elements, stairways and corridors and facades shall be non-combustible.

The interior finish materials shall not have a flame spread ability rating exceeding Class I (see 3.4.15.2 of Part 4 of National Building Code)

The internal walls or staircase shall be of brick or reinforced concrete with a minimum of 2 h. fire rating.

The staircase shall be ventilated to the atmosphere at each landing and a vent at the top; the vent openings shall be of 0.5sq.m in the external wall and the top. If the staircase cannot be ventilated, because of location or other reasons, a positive pressure 50 Pa shall be maintained inside. The mechanism for pressurizing the staircase shall operate automatically with the fire alarm. The roof of the shaft shall be 1 m. above the surrounding roof. Glazing or glass bricks, if used in staircase, shall have fire resistance rating of minimum 2 h.

22.3 Lifts

General requirements of lifts shall be as follows:

- a) Walls of lift enclosures shall have a fire rating of 2 h; lifts shall have a vent at the top of area not less than 0.2 sq.m.
- b) Lift motor room shall be located preferably on top of the shaft and separated from the shaft by the floor of the room.
- c) Landing doors in lift enclosures shall have a fire resistance of not less than 1 h.
- d) The number of lifts in one row for a lift bank shall not exceed 4 and the total number of lifts in the bank (of two rows) shall not exceed 8. A wall of 2 h. fire rating shall separate individual shafts in a bank.
- e) Lift car door shall have a fire resistance rating of half an hour.
- f) Collapsible gates shall not be permitted for lifts and shall have solid doors with fire resistance of at least 1 h.
- g) If the lift shaft and lobby is in the core of the building, a positive pressure between 25 and 30 Pa shall be maintained in the lobby and a positive pressure of 50 Pa shall be maintained in the lift shaft. The mechanism for pressurization shall act automatically with the fire alarm; it shall be possible to operate this mechanically also.
- h) Exit from the lift lobby, if located in the core of the building, shall be through a self closing smoke stop door of half an hour fire resistance.
- i) Lifts shall not normally communicate with the basement; if, however, lifts are in

- communication, the lift lobby of the basements shall be pressurized as in (g), with self-closing door as in (h)
- j) Grounding switch(es), at ground floor level, shall be provided on all the lifts to enable the fire service to ground the lifts.
 - k) Telephone or other communication facilities shall be provided in lift cars for building of 30 m. in height and above. Communication system for lifts shall be connected to fire control room for the building.
 - l) Suitable arrangements such as providing slope in the floor of lift lobby, shall be made to prevent water used during fire-fighting, etc., at any landing from entering the liftshafts.
 - m) A sign shall be posted and maintained on every floor at or near the lift indicating that in case of fire, occupants shall use the stairs unless instructed otherwise. The sign shall also contain a plan for each floor showing the locations of the stairways. Alternate source of power supply shall be provided for all the lifts through a manually operated changeover switch.
 - n) **Fire Lifts** -Following details shall apply for a fire lift :
 - i) To enable fire services personnel to reach the upper floors with the minimum delay, one fire lift per 1200 sq.m. of floor area shall be provided and shall be available for the exclusive use of the firemen in an emergency.
 - ii) The lift shall have a floor area of not less than 1.4 sq.m. It shall have loading capacity of not less than 545 kg (8 persons lift) with automatic closing doors of minimum 0.8 m. width.
 - iii) The electric supply shall be on a separate service from electric supply mains in a building and the cables run in a route safe from fire, that is, within the lift shaft. Lights and fans in the elevators having wooden paneling or sheet steel construction shall be operated on 24 V supply.
 - iv) Fire-fighting lift should be provided with a ceiling hatch for use in case of emergency, so that when the car gets stuck up, it shall be easily openable.
 - v) In case of failure of normal electric supply, it shall automatically trip over to alternate supply. For apartment houses, this changeover of supply could be done through manually operated changeover switch. Alternatively, the lift shall be so wired that in case of power failure, it comes down at the ground level and comes to stand-still with door open.
 - vi) The operation of a fire lift is by a simple toggle or two-button switch situated in a glass-fronted box adjacent to the lift at the entrance level. When the switch is on, landing call-points will become inoperative and the lift will be on car control only or on a priority control device. When the switch is off, the lift will return to normal working. This lift can be used by the occupants in normal times.
 - vii) The words 'Fire Lift' shall be conspicuously displayed in fluorescent paint on the lift landing doors at each floor level.
 - viii) The speed of the fire lift shall be such that it can reach the top floor from ground level within 1 minute.

22.4 Basements -

- i) Each basement shall be separately ventilated. Vents with cross-sectional area (aggregate) not less than 2.5% of the floor area spread evenly round the perimeter of the basement shall be provided in the form of grills or breakable stall board lights or pavement lights or by way of shafts.

Alternatively, a system of air inlets shall be provided at basement floor level and smoke outlets at basement ceiling level. Inlets and extracts may be terminated at ground level with stall board or pavement lights as before, but ducts to convey fresh air to the basement floor level have to be laid. Stall board and pavement lights should be in positions easily accessible to the fire brigade and clearly marked 'SMOKE OUTLET' or 'AIR INLET' with an indication of area served at or near the opening.

ii) The staircase of basements shall be of enclosed type having fire resistance of not less than 2 h and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such positions that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storeys of the building and shall communicate with basement through a lobby provided with fire resisting self-closing doors of 1 h resistance. For travel distance, if the travel distance exceeds as given therein, additional staircases shall be provided at proper places.

iii) In multi-storey basements, intake ducts may serve all basement levels, but each basement levels and basement compartment shall have separate smoke outlet duct or ducts. Ducts so provided shall have the same fire resistance rating as the compartment itself. Fire rating may be taken as the required smoke extraction time for smoke extraction ducts.

iv) Mechanical extractors for smoke venting system from lower basement levels shall also be provided. The system shall be of such design as to operate on actuation of heat / smoke sensitive detectors or sprinklers, if installed, and shall have a considerably superior performance compared to the standard units. It shall also have an arrangement to start it manually.

v) Mechanical extractors shall have an internal locking arrangement, so that extractors shall continue to operate and supply fans shall stop automatically with the actuation of fire detectors.

vi) Mechanical extractors shall be designated to permit 30 air changes per hour in case of fire or distress call. However, for normal operation, air changes schedule shall be as given in Part 8, Building Services, Section 3, Air-conditioning, Heating and Mechanical Ventilation of National Building Code.

vii) Mechanical extractors shall have an alternative source of supply.

viii) Ventilating ducts shall be integrated with the structure and made out of brick masonry or reinforced cement concrete as far as possible and when this duct crosses the transformer area or electrical switchboard, fire dampers shall be provided.

ix) Use of basements for kitchens working on gas fuel shall not be permitted, unless air conditioned. The basement shall not be permitted below the ward block of a hospital/nursing home unless it is fully sprinkled. Building services such as electrical sub-stations, boiler rooms in basements shall comply with the provisions of the Indian Electricity Act / Rules.

x) If cut-outs are provided from basements to the upper floors or to the atmospheres, all sides cut-out openings in the basements shall be protected by sprinkler head at close spacing so as to form a water curtain in the event of a fire.

xi) Openable windows on external wall shall be fitted with such locks that can be opened by a fireman's axe.

xii) All floors shall be compartmented with area not exceeding 750 sq.m. by a separation wall with 2 h fire rating, for floors with sprinklers the area may be increased by 50 percent. In long building, the fire separation walls shall be at distances not exceeding 40 m. For departmental stores, shopping centres and basements, the area may be reduced to 500 sq.m. for compartmentation.

Where this is not possible, the spacing of the sprinklers, care should be taken to prevent spray from one sprinkler impeding the performance of an adjacent sprinkler head.

22.5 Service Ducts/Shafts

- a) Service ducts and shafts shall be enclosed by walls of 2 h and doors of 1 h. fire rating. All such ducts/shafts shall be properly sealed and fire stopped at all floor levels.
- b) A vent opening at the top of the service shaft shall be provided having between one-fourth and one-half of the area of the shaft.

22.6 Refuse chutes

shall have opening at least 1 m. above roof level for venting purpose and they shall have an enclosure wall of non-combustible material with fire resistance of not less than 2 h. They shall not be located within the staircase enclosure or service shafts, or air-conditioning shafts inspection panel and doors shall be tight fitting with 1 h fire resistance; the chutes should be as far away as possible from exit.

22.7 Refuge Area

Provisions contained in Regulation No 18.28.6 shall apply for all buildings -

22.8 Electrical services shall conform to the following :

- (a) The electric distribution cables / wiring shall be laid in a separate duct. The duct shall be sealed at every floor with non-combustible materials having the same fire resistance as that of the duct. Low and medium voltage wiring running in shaft and in false ceiling shall run in separate conduits;
- (b) Water mains, telephone lines, intercom lines, gas pipes or any other service line shall not be laid in the duct for electrical cables; use of bus ducts / solid rising mains instead of cables is preferred;
- (c) Separate circuits for fire-fighting pumps, lifts, staircases and corridor lighting and blowers for pressurizing system shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes, so that fire in one circuit will not affect the others. Such circuits shall be protected at origin by an automatic circuit breaker with its no-volt coil removed. Master switches controlling essential service circuits shall be clearly labelled;
- (d) The inspection panel doors and any other opening in the shaft shall be provided with air-tight fire doors having fire resistance of not less than 2 h;
- (e) Medium and low voltage wiring running in shafts and within false ceiling shall run in metal conduit. Any 230 V wiring for lighting or other services above false ceiling shall have 660 V grade insulation. The false ceiling including all fixtures used for its suspension, shall be of non-combustible material and shall provide adequate fire resistance to the ceiling in order to prevent spread of fire across ceiling. Reference may be made to good practice;
- (f) An independent and well ventilated service room shall be provided on the ground level or first basement with direct access from outside or from the corridor for the purpose of termination of electric supply from the licensees' service and alternative supply cables. The doors provided for the service room shall have fire resistance of not less than 2 h.

Note : If service room is located at the first basement, it should have automatic fire extinguishing system.

- (g) If the licensees agree to provide meters on upper floors, the licensees' cable shall be segregated from consumers' cable by providing a partition in the duct. Meter rooms on upper floors shall not open into staircase enclosures and shall be ventilated directly to open air outside; and
- (h) Suitable circuit breakers shall be provided at the appropriate points.

22.9 Gas supply shall conform to the following:-

- a) Town Gas / L.P.Gas Supply Pipes – Where gas pipes are run in buildings, the same shall be run in separate shafts exclusively for this purpose and these shall be on external walls, away from the staircases. There shall be no interconnection of this shaft with the rest of the floors. LPG distribution pipes shall always be below the false ceiling. The length of these pipes shall be as short as possible. In the case of kitchen cooking range area, apart from providing hood, covering the entire cooking range, the exhaust system should be designed to take care of 30 cu.m. per minute per sq.m. of hood protected area. It should have grease filters using metallic grill to trap oil vapours escaping into the fume hood.

Note:- For detailed information on gas pipe installations, reference may be made to Para.9 ‘_Plumbing Services, Section 3 Gas Supply’, of National Building Code of India.

- b) All wiring in fume hoods shall be of fibre glass insulation. Thermal detectors shall be installed into fume hoods of large kitchens for hotels, hospitals and similar areas located in high rise buildings. Arrangements shall be made for automatic tripping of the exhaust fan in case of fire. If LPG is used, the same shall be shut off. The voltage shall be of 24 V or 100 V dc operated with the external rectifier. The valve shall be of the hand re-set type and shall be located in an area segregated from cooking ranges. Valves shall be easily accessible. The hood shall have manual facility for steam or carbon dioxide gas injection, depending on duty condition; and
- c) Gas meters shall be housed in a suitably constructed metal cupboard located in a well-ventilated space, keeping in view the fact that LPG is heavier than air and town gas is lighter than air.

22.10 Illumination of means of exit

Staircase and corridor lights shall conform to the following:

- a) The staircase and corridor lighting shall be on separate circuits and shall be independently connected so as it could be operated by one switch installation on the ground floor easily accessible to fire-fighting staff at any time irrespective of the position of the individual control of the light points, if any. It should be of miniature circuit breaker type of switch so as to avoid replacement of fuse in case of crisis;
- b) Staircase and corridor lighting shall also be connected to alternative supply. The alternative source of supply may be provided by battery continuously trickle charged from the electric mains;
- c) Suitable arrangements shall be made by installing double throw switches to ensure that the lighting installed in the staircase and the corridor does not get connected to two sources of supply simultaneously. Double throw switch shall be installed in the service room for terminating the stand-by supply.
- d) Emergency lights shall be provided in the staircase and corridor; and
- e) All wires and other accessories used for emergency light shall have fire retardant property.

22.11 A stand-by electric generator shall be installed to supply power to staircase and corridor lighting circuits, fire lifts, the stand-by fire pump, pressurisation fans and blowers, smoke extraction and damper systems in case of failure of normal electric supply. The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously. If the stand-by pump is driven by diesel engine, the generator supply need not be connected to the stand-by pump. Where parallel HV / LV supply from a separate sub-station is provided with appropriate transformer for emergency, the provision of generator may be waived in consultation with the Authority.

22.12 Transformers shall conform to the following:-

- a) A sub-station or a switch-station with oil filled equipment shall not be located in the building. The sub-station structure shall have separate fire resisting walls/surroundings and shall necessarily be located at the periphery of the floor having separate access from fire escape staircase. The outside walls, ceiling, floor, openings including doors and windows to the sub-station area shall be provided

with a fire resisting door of 2 h fire rating. Direct access to the transformer room shall be provided, preferably from outside fire escape staircase.

- b) The sub-station area needs to be maintained at negative air pressures and area in sub-station shall not be used as storage / dump areas.
- c) When housed inside the building, the transformer shall be of dry type and shall be cut off from the other portion of premises by walls/ doors / cut-outs having fire resistance rating of 4 h.

22.13 Air-conditioning shall conform to the following:

- a) Escape routes like staircases, common corridors, lift lobbies, etc. shall not be used as return air passage.
- b) The ducting shall be constructed of substantial gauge metal in accordance with good practice.
- c) Wherever the ducts pass through fire walls or floors, the opening around the ducts shall be sealed with materials having fire resistance rating of the compartment.
- d) Where duct crosses a compartment which is fire rated, the ducts shall be fire rated for same fire rating. Further depending on services passing around the duct work, which may get affected in case of fire temperature rising, the ducts shall be insulated.
- e) As far as possible, metallic ducts shall be used even for the return air instead of space above the false ceiling.
- f) Where plenum is used for return air passage, ceiling and its fixtures shall be of non-combustible material.
- g) The materials used for insulating the duct system (inside or outside) shall be of non-combustible material, glass wool shall not be wrapped or secured by any material of combustible nature.
- h) Area more than 750sq.m. on individual floor shall be segregated by a fire wall and automatic fire dampers for isolation shall be provided.
- i) Air ducts serving main floor areas, corridors, etc. shall not pass through the staircase enclosure.
- j) The air-handling units shall be separate for each floor and air ducts for every floor shall be separated and in no way inter-connected with the ducting of any other floor.
- k) If the air-handling unit serves more than one floor, the recommendations given above shall be compiled with in addition to the conditions given below:
 - i) Proper arrangements by way of automatic fire dampers working on smoke detector / or fusible link for isolating all ducting at every floor from the main riser shall be made.
 - ii) When the automatic fire alarm operates, the respective air-handling units of the air-conditioning system shall automatically be switched off.
- l) The vertical shaft for treated fresh air shall be of masonry construction.
- m) The air filters of the air-handling units shall be of non-combustible materials.
- n) The air-handling unit room shall not be used for storage of any combustible materials.
- o) Inspection panels shall be provided in the main trunking to facilitate the cleaning of ducts of accumulated dust and to obtain access for maintenance of fire dampers.
- p) No combustible material shall be fixed nearer than 150 mm to any duct unless such duct is properly enclosed and protected with non-combustible material (glass wool or spyglass with neoprene facing enclosed and wrapped with aluminium sheeting) at least 3.2 mm thick and which would not readily conduct heat.

q) Fire Dampers:-

- 1) These shall be located in conditioned air ducts and return air ducts/ passages at the following points:
 - i) At the fire separation wall.

- ii) Where ducts/passages enter the central vertical shaft.
 - iii) Where the ducts pass through floors.
 - iv) At the inlet of supply air duct and the return air duct of each compartment on every floor.
- 2) The dampers shall operate automatically and shall simultaneously switch off the air-handling fans. Manual operation facilities shall also be provided. (Note- For blowers, where extraction system and duct accumulators are used, dampers shall be provided).
- 3) Fire/smoke dampers (for smoke extraction shafts) for buildings more than 24 m in height.
- a) For apartment houses in non-ventilated lobbies / corridors operated by fusible link / smoke detectors and with manual control.
 - b) For other buildings on operation of smoke detection system and with manual control.
- 4) Automatic fire dampers shall be so arranged as to close by gravity in the direction of air movement and to remain tightly closed on operation of a fusible link / smoke detector.

22.14 Provisions of boiler and boiler rooms shall conform to Indian Boiler Act. Further, the following additional aspects may be taken into account in the location of boiler room:

- a) The boilers shall not be allowed in sub-basement, may be allowed in the basements away from the escape routes.
- b) The boilers shall be installed in a fire resisting room of 4 h fire resistance rating and this room shall be situated on the periphery of the basement. Catch-pits shall be provided at the low level.
- c) Entry to this room shall be provided with a composite door of 2 h fire resistance.
- d) The boiler room shall be provided with fresh air inlets and smoke exhausts directly to the atmosphere.
- e) The furnace oil tank for the boiler, if located in the adjoining room shall be separated by fire resisting wall of 4 h rating. The entrance to this room shall be provided with double composite doors. A curb of suitable height shall be provided at the entrance in order to prevent the flow of oil into the boiler room in case of tank rupture.
- f) Foam inlets shall be provided on the external walls of the building near the ground level to enable the fire services to use foam in case of fire.

22.15 Provision of first-aid and fire-fighting appliances.

The first-aid fire-fighting equipment shall be provided on all floors, including basements, lift rooms, etc. in accordance with good practice in consultation with the Authority.

22.16 Fire alarm system :

- i) All buildings with heights of 15 m or above shall be equipped with manually operated electrical fire alarm (MOEFA) system automatic fire alarm system in accordance with good practice. However, apartment buildings between 15 m and 30 m in height may be exempted from the installation of automatic fire alarm system provided the local fire brigade is suitably equipped for dealing with fire in a building of 15 m in height or above and in the opinion of the Authority, such building does not constitute a hazard to the safety of the adjacent property or occupants of the building itself.
- ii) Manually operated electrical fire alarm system shall be installed in a building with one or more call boxes located at each floor. The call boxes shall conform of good practice.
- iii) The installation of call boxes in hostels and such other places where these are likely to be misused shall as far as possible be provided. Location of call boxes in dwelling units shall preferably be inside the building.

22.17 Lightning protection of buildings:-

The lightning protection for buildings shall be provided as given in Para.8 __Building Services, Section 2, Electrical Installations‘ of National Building Code of India.

22.18 Fire control room:-

For all buildings 15 mt in height or above and apartment buildings with a height of 30 m and above, there shall be a control room on the entrance floor of the building with communication system (suitable public address system) to all floors and facilities for receiving the message from different floors. Details of all floor plans alongwith the details of fire-fighting equipment and installations shall be maintained in the fire control room. The fire control room shall also have facilities to detect the fire on any floor through indicator board connections; fire detection and alarm systems on all floors. The fire staff in-charge of the fire control room shall be responsible for the maintenance of the various services and fire-fighting equipment and installations in co- ordination with security, electrical and civil staff of the building.

22.19 Housekeeping:-

To eliminate fire hazards, good housekeeping, both inside and outside the building, shall be strictly maintained by the occupants and / or the owner of the building.

22.20 Fire drills and fire orders:-

Fire notices/orders shall be prepared to fulfil the requirements of fire-fighting and evacuation from the buildings in the event of fire and other emergency. The occupants shall be made thoroughly conversant with their actions in the event of emergency, by displaying fire notices at vantage points and through regular training. Such notices should be displayed prominently in broad lettering.

For guidelines for fire drills and evacuation procedures for high-rise buildings, Annexure E of National Building Code of India may be referred.

22.21 Compartmentation:-

The building shall be suitably compartmentalized so that fire/smoke remain confined to the area where fire incident has occurred and does not spread to the remaining part of the building.

22.22 Materials for interior decoration /furnishing

The use of materials, which are combustible in nature and may spread toxic fume / gases should not be used for interior decoration / furnishing, etc.

For various types of occupancies, requirements given in National Building Code, Part IV shall be followed.

22.23 Fire Escape Chutes/ Controlled Lowering Device for evacuation:-

(A) High rise building having height more than 70 mt., shall necessarily be provided with;

- (i) fire escape chute shaft/s for every wing adjacent to staircase.
- (ii) Walls of the shaft shall have 4 hours fire resistance.
- (iii) One side of the shaft shall be at external face of the building with proper ventilation.
- (iv) The dimension of the shaft shall not be less than 2.5 m X 1.5m.
- (v) The access to the fire escape chute's shaft shall be made at alternate floor level from staircase mid-landing with self-closing door having fire resistance of at least one hour.
- (vi) The fire chute shall be of staggered type with landing of each section at the vertical height of not more than 21 m.

Alternatively,

(B) For High rise building having height more than 70 mt., —Controlled Lowering Device for evacuation or —External Evacuation System as approved by Chief Fire Officer of PMRDA, shall be provided.

22.24 Fire Check Floor A high rise building having height more than 70 m, shall be provided with fire check floor (entire floor) at every 70 m. level. Height of the fire check floor shall not be more than 1.8 m. The fire check floor shall not be used for any purpose and it shall be the responsibility of the owner/occupier to maintain the same clean and free of encumbrances and encroachments at all times. Periphery of the Fire Check floor shall not be enclosed. Fire Drenchers shall be provided at the periphery of the each fire check floor externally.

22.25 The PMRDA shall charge Fire Infrastructure charges as may be decided by Metropolitan Commissioner with the approval of the Government, such charges shall be deposited in the separate account under the head of Fire Infrastructure charges and such amount shall only be used for establishment and expansion of Fire Infrastructure facilities.

22.26 Fire officer for hotels, business and mercantile buildings with height more than 30 m

22.26.1) A qualified Fire Officer with experience of not less than 3 years shall be appointed who will be available on the premises.

22.26.2) The Fire Officer shall:

- i) maintain the firefighting equipment in good working condition at all times,
- ii) prepare fire orders and fire operational plans and get them promulgated,
- iii) impart regular training to the occupants of the buildings in the use of firefighting equipment's provided on the premises and keep them informed about the fire emergency evacuation plan,
- iv) keep proper liaison with City Fire Brigade, and
- v) ensure that all fire precautionary measures are observed at the times.

Note: Competent Authority having jurisdiction may insist on compliance of the above rule in case of buildings having very large areas even if the height is less than 30 m.

PART – VII**STRUCTURAL SAFETY, WATER SUPPLY, DRAINAGE & SANITARY REQUIREMENTS, OUTDOOR DISPLAY AND OTHER SERVICES****23.0 STRUCTURAL DESIGN**

23.1 The structural design of foundations, elements made of masonry, timber, plain concrete; reinforced concrete, pre-stressed concrete and structural steel shall be carried out in accordance with Part 6. Structural design Section 1-Loads, courses and effects, Section 2-Soils and Foundation, Section-3-Timber and Bamboo, Section 4-Masonry, Section5-Concrete, Section 6-Steel, Section-7-Prefabrication, systems building and mixed / composite construction of National Building Code of India, amended from time to time. Proposed construction shall be as per the norms as specified by Indian Standard Institute, for the resistance of earthquake, Fire Safety and natural calamities. Certificate to that effect shall be submitted by the Licensed Structural Engineer of the developer / land owner, along with the proposal for development permission.

24.0 QUALITY OF MATERIALS AND WORKMANSHIP

24.1 All materials and workmanship shall be of good quality conforming generally to accepted standards of Public Works Department of Maharashtra and Indian Standard Specifications and Codes as included in Part 5 - Building Materials and Part 7 - Construction Practices and Safety of National Building Code of India, amended from time to time

24.2 All borrow pits dug in the course of construction and repair of buildings, roads, embankments etc. shall be deep and connected with each other in the formation of a drain directed towards the lowest level and properly stopped for discharge into a river stream, channel or drain and no person shall create any isolated borrow pit which is likely to cause accumulation of water which may breed mosquitoes.

25.0 ALTERNATIVE MATERIALS, METHODS OF DESIGN & CONSTRUCTION AND TESTS

25.1 The provision of the regulations are not intended to prevent the use of any material or method of design or construction, not specifically prescribed by the regulations, provided any such alternative has been approved.

25.2 The provision of these regulations is also not intended to prevent the adoption for architectural planning and layout conceived as an integrated development scheme.

25.3 The authority may approve any such alternative provided it is found that the proposed alternative is satisfactory and conform to the provisions of relevant parts regarding material, design, and construction and that material, method or work offered is, for the purpose intended, at least equivalent to that prescribed in the rules in quality, strength, compatibility, effectiveness, fire rating and resistance, durability and safety.

25.4 Tests: Whenever there is insufficient evidence of compliance with the provisions of the regulations of evidence that any material or method of design or construction does not conform to the requirements of the rules or in order to substantiate claims for alternative materials, design or methods of construction, the Metropolitan Commissioner may require tests sufficient in advance as proof of compliance. These tests shall be made by an approved agency at the expense of the owner.

25.5 Test method shall be as specified by the regulations for the materials or design or construction in question. If there are no appropriate test methods specified in the regulations, the Authority shall determine the test procedure. For methods of tests for building materials; reference may be made to relevant Indian standards as given the National Building Code of India, published by the Bureau of Indian Standards. The latest version of the National Building Code of India shall be taken into account at the time of enforcement of these rules.

25.6 Copies of the results of all such tests shall be retained by the authority for a period of not less than two years after the acceptance of the alternative material.

26.0 BUILDING SERVICES

- 26.1** The planning, design and installation of electrical installations, air-conditioning and heating work shall be carried out in accordance with Part 8 - Building Services, Section 2-Electrical and allied Installations, Section 3-Air Conditioning, heating and mechanical ventilation of National Building Code of India, amended from time to time.
- 26.2** The planning design including the number of lifts, type of lifts, capacity of lifts depending on occupancy of building; population on each floor based on occupant load, height of building shall be in accordance with Section-5 installation of Lifts and Escalators of National Building Code of India, amended from time to time. In existing buildings, in case of proposal for one additional floor, existing lift may not be raised to the additional floor.
- 26.3** The lifts shall be maintained in working order properly.

27.0 WATER SUPPLY, DRAINAGE AND SANITARY REQUIREMENTS.

27.1 The planning, design, construction and installation of water supply, drainage and sanitation and gas supply systems shall be in accordance with the provisions of Part 9 - Plumbing Services- Section 1 Water Supply, Drainage and Sanitation, Section 2 - Gas supply of National Building Code of India as amended from time to time.

27.2 Requirements of water supply in building.

The total requirements of water supply shall be calculated based on the population as given below:

Occupancy	Basis
Residential Building	5 persons per tenement
Other Buildings	No. of persons on occupant load and area of floors given in Table No.13.

27.2.1 The requirements of water supply for various occupancies shall be as given in Table No.24 and Table No.25 or as specified by the Metropolitan Commissioner from time to time.

Table No. 24		
PER CAPITA WATER REQUIREMENTS FOR VARIOUS OCCUPANCIES/USES		
Sr. No	Type of Occupancy	Consumption per head per day (in liters)
1	Residential	
	(a) in living units	135
	(b) Hotels with lodging accommodation (per bed)	180
2	Educational:	
	(a) Day Schools	45
	(b) Boarding Schools	135
3	Institutional (Medical Hospitals):	
	(a) No. of beds not exceeding 100	340
	(b) No. of beds exceeding 100	450
	(c) Medical quarters and hostels	135
4	Assembly-Cinema theatres, auditorium etc. (per seat of accommodation).	15
5	Government and Semi-public business.	45
6	Mercantile (Commercial)	
	(a) Restaurants (per seat)	70
	(b) Other business buildings.	45
7	Industrial	
	(a) Factories where bathrooms are to be provided	45
	(b) Factories where no bath-rooms are required to be provided.	30
8	Storage (including warehousing)	30
9	Hazardous	30
10	Intermediate / Stations (excluding mail and express stops).	45 (25)*
11	Junction Stations	70 (45)*
12	Terminal / Stations.	45
13	International and domestic Airports.	70

The value in parenthesis is for stations where bathing facilities are not provided.

Note: The number of persons for Sr. No. (10) to (13) shall be determined by the average number of passengers, handled by the station daily; due consideration may be given to the staff and workers likely to use the facilities.

Table No. 25		
FLUSHING STORAGE CAPACITIES		
Sr.No.	Classification of building	Storage capacity.
(1)	(2)	(3)
1	For tenements having common convenience	900 liters net per w. c. seat.
2	For residential premises other than tenements having common convenience	270 liters net for one w. c. seat and 180 liters for each additional seat in the same flat.
3	For Factories and Workshops	900 liters per w. c. seat and 180 liters per urinal seat.
4	For cinemas, public assembly halls, etc.	900 liters per w. c. seat and 350 liters per urinal seat.

2061

28.0 DRAINAGE AND SANITATION REQUIREMENTS

28.1 General

There should be at least one water tap and arrangement for drainage in the vicinity of each water-closet or group of water-closets in all the buildings.

28.1.1 Each family dwelling unit on premises (abutting on a sewer or with a private sewage disposal system) shall have, at least, one water-closet and one kitchen type sink. A bath or shower shall also be installed to meet the basic requirement of sanitation and personal hygiene.

28.1.2 All other structures for human occupancy or use on premises, abutting on a sewer or with a private sewage disposal system, shall have adequate sanitary facilities, but in no case less than one water-closet and one other fixture for cleaning purposes.

28.2 For Residences

28.2.1 Dwelling with individual convenience shall have at least the following fitments:

- a. One bathroom provided with a tap and a floor trap,
- b. One water-closet with flushing apparatus with an ablution tap; and
- c. One tap with a floor trap or a sink in kitchen or wash place.

28.2.2 Dwelling without individual conveniences shall have the following fitments:

- a. One water tap with floor trap in each tenement,
- b. One water-closet with flushing apparatus and one ablution tap, bath for every two tenements, and
- c. One bath with water tap and floor trap for every two tenements.

28.3 For Buildings Other than Residences

28.3.1 The requirements for fitments for drainage and sanitation in the case of buildings other than residences shall be in accordance with Tables given in Appendix-M (1 to 14). The following shall be, in addition, taken into consideration:

- a) The figures shown are based upon one (1) fixture being the minimum required for the number of persons indicated or part thereof.
- b) Building categories not included in the tables shall be considered separately by the Metropolitan Commissioner.
- c) Drinking fountains shall not be installed in the toilets.
- d) Where there is the danger of exposure to skin contamination with poisonous, infectious or irritating material, washbasin with eye wash jet and an emergency shower located in an area accessible at all times with the passage / right of way suitable for access to a wheel chair, shall be provided.
- e) When applying the provision of these tables for providing the number of fixtures, consideration shall be given to the accessibility of the fixtures. Using purely numerical basis may not result in an installation suited to the need of a specific building. For example, schools should be provided with toilet facilities on each floor. Similarly toilet facilities shall be provided for temporary workmen employed in any establishment according to the needs; and in any case one WC and one washbasin shall be provided.
- f) All buildings used for human habitation for dwelling work, occupation, medical care or any purpose detailed in the various tables, abutting a public sewer or a private sewage disposal system, shall be provided with minimum sanitary facilities as per the schedule in the tables. In case the disposal facilities are not available, they shall be provided as a part of the building design for ensuring high standards of sanitary conditions in accordance with this section.
- g) Workplaces where crèches are provided, they shall be provided with one WC for 10 persons or part thereof, one washbasin for 15 persons or part thereof, one kitchen sink with floor tap for preparing food / milk preparations. The sink provided shall be with a drinking water tap.
- h) In all types of buildings, individual toilets and pantry should be provided for executives and for meeting / seminar / conference rooms, etc. as per the user requirement.
- i) Where food is consumed indoors, water stations may be provided in place of drinking water fountains.

29.0 SIGNS AND OUTDOOR DISPLAY STRUCTURES

- 29.1** The display of advertising signs on buildings and land, shall be in accordance with Part 10, Section-2 "Signs and outdoor display structures" of National Building Code of India as amended from time to time and, shall be in accordance with respective rules/by-laws, directive given by Government, and also rules/by-laws framed by the PMRDA in this regards from time to time.

Prohibition of advertising signs and outdoor display structure in certain cases - Notwithstanding the provisions of sub-regulations no advertising sign or outdoor display structures shall be permitted on buildings of architectural, aesthetical, historical or heritage importance as may be decided by the Commissioner or on Government Buildings save that in the case of Government buildings only advertising signs or outdoor display structure may be permitted if they relate to the activities for the said buildings' own purposes or related programmers.

PART - VIII

SPECIAL PROVISIONS FOR CERTAIN BUILDINGS

30.0 PROVISIONS OF FACILITIES FOR DIFFERENTLY ABLED PERSONS

Provisions for Barrier Free access in buildings for differently abled persons (“Divyang”) shall be as given in **Appendix-N**

31.0 INSTALLATION OF SOLAR ASSISTED WATER HEATING (SWH) SYSTEM/ ROOF TOP PHOTOVOLTAIC (RTPV) SYSTEM

SWH or RTPV systems shall be mandatory in all types of buildings to be constructed on plot area of more than 4000 sq m

In order to facilitate the installation of SWH/RTPV System, the new buildings shall have the following provisions:

- i. All such buildings where SWH/RTPV are to be installed will have open sunny roof area available for the installation of SWH/RTPV.
- ii. The roof loading adopted in the design of such building should be atleast 50 kg per sq.m. for the installation of SWH/RTPV.
- iii. At least 25% of the roof area shall be utilized for installation of the SWH/RTPV system.
- iv. Precaution should be taken that architectural elevation treatment should not cast shadow on terrace space. As far as possible, parapet of south, east and west sides of the terrace shall be of railing type (above 1 feet) such that it will not cast shadow on the solar collectors and maximum terrace space can be utilized.
- v. All such new buildings installed with SWH shall have an installed hot water line from the rooftop and insulated distribution pipelines to each of the points where hot water is required in the building.

32.0 RAIN WATER HARVESTING

The provision for Rain Water Harvesting shall be made as under:

- i. All the layout open spaces/amenity spaces of housing societies and new constructions/ reconstruction/ additions on plots having area not less than 500sq.mt., in non-congested areas shall have one or more Rain Water Harvesting structures having a minimum total capacity as detailed in Schedule.

Provided that the Commissioner may approve the Rain Water Harvesting structures of specifications different from those in Schedule, subject to the minimum capacity of Rain Water Harvesting being ensured in each case.

- ii. The owner/society of every building mentioned in the (a) above shall ensure that the Rain Water Harvesting System is maintained in good condition for storage of water for non- potable purposes or recharge of groundwater at all times.
- iii. The Authority may impose a levy of not exceeding Rs.1000/- per annum for every 100 sq.mt. of built-up area for the failure of the owner of any building mentioned in the (a) above to provide or to maintain Rain Water Harvesting structures as required under these regulations. Failure to provide Rain Water Harvesting System shall deem to be breach of the conditions on which the development permission has been granted.

SCHEDULE

Rain Water Harvesting in a building site includes storage or recharging the ground water by rainwater falling on the terrace or any paved or unpaved surface within the building site.

1. The following systems may be adopted for harvesting the rainwater drawn from terrace and the paved surface.
 - i) Open well of a minimum 1.00 mt diameter and 6mt in depth into which rain water may be channelled and allowed to filter for removing silt and floating material. The well shall be provided with ventilating covers. The water from the open well may be used for non-potable domestic purposes such as washing, flushing and for watering the garden etc.
 - ii) Rain Water Harvesting for recharge of groundwater may be done through a bore-well around which a pit of 1m width may be excavated upto a depth of at least 3m and refilled with stone aggregate and sand. The filtered rain water may be channelled to the refilled pit for recharging the bore-well.
 - iii) An impressive surface/underground storage tank of required capacity may be constructed in the setback or other open spaces and the rain water may be channelled to the storage tank. The storage tank shall always be provided with ventilating covers and shall have drawn-off taps suitably placed so that rain water may be drawn off for domestic, washing, gardening and such other purposes. The storage tank shall be provided with an overflow.
 - iv) The surplus rain water after storage may be recharged in to ground through percolation pits or trenches or combination of pits and trenches. Depending on the geo-morphological and topographical conditions, the pits may be of the size of 1.20 m width X 1.20 m length X 2 m to 2.50 m depth. The trenches can be of 0.60 m width X 2 to 6 m length X 1.50 to 2 m depth. Terrace water shall be channelled to pits or trenches. Such pits or trenches shall be back filled with filter media comprising the following materials:
 - a) 40 mm stone aggregate as bottom layer upto 50% of the depth.
 - b) 20 mm stone aggregate as lower middle layer upto 20% of the depth.
 - c) Coarse sand as upper middle layer upto 20% of the depth.
 - d) A thin layer of fine sand as top layer.
 - e) Top 10% of the pits/trenches will be empty and a splash is to be provided in this portion in such a way that roof top water falls on the splash pad.
 - f) Brick masonry wall is to be constructed on the exposed surface of pits/trenches and the cement mortar plastered. The depth of wall below ground shall be such that the wall prevents loose soil entering into pits/ trenches. The projection of the wall above ground shall at least be 15 cm.
 - g) Perforated concrete slabs shall be provided on the pits/trenches.
 - h) If the open space surrounding the building is not paved, the top layer up to a sufficient depth shall be removed and refilled with coarse sand to allow percolation of rain water into ground.
 - v) The terrace shall be connected to the open well/bore-well/storage tank/ recharge pit/trench by means of HDPE / PVC pipes through filter media. A valve system shall be provided to enable the first washing from roof or terrace catchment, as they would contain undesirable dirt. The mouth of all pipes and opening shall be covered with mosquito (insect) proof wire net. For the efficient discharge of rain water, there shall be at least two rain water pipes of 100 mm dia. for a roof area of 100 sq.m.

- vi) Rain Water Harvesting structures shall be sited as not to endanger the stability of building or earthwork. The structure shall be designed such that no dampness is caused in any part of the walls or foundation of the building or those of an adjacent building.
- vii) The water so collected/recharged shall as far as possible be used for non-drinking and non-cooking purpose. Provided that when the rain water in exceptional circumstances will be utilised for drinking and/or cooking purpose, it shall be ensured that proper filter arrangement and the separate outlet for bypassing the first rain water has been provided. Provided further that, it will be ensured that for such use, proper disinfectants and the water purification arrangements have been made.

33.0 REGULATION FOR WASTE WATER RECYCLING

33.1 Type of Waste Water

The Waste Water is of following types:--

- i. Black Water.- means Waste Water from W.C. Urinals and M.S.W.
- ii. Grey Water.–means Waste Water from Bathrooms, Sinks, Shower and Wash Areas etc.
- iii. Apart from Residential Waste Water, Waste Water generated from Industrial, Medical, Commercial and Waste generated from Garbage shall also be treated as per the guidelines given by the Maharashtra Pollution Control Board.

33.2 APPLICABILITY

These Regulations shall be applicable to all Developments/ Redevelopments/part Developments for the uses as mention under (C-1) to (C-6) shall have the provision for treatment, recycling and reuse of Waste Water. The applicant shall along with his application for obtaining necessary layout approval/ building permission shall submit a plan showing the location of Waste Water Treatment Plant, furnishing details of calculations, references, implementation, etc. This Plan shall accompany with the applicant's commitment to monitor the system periodically from the date of occupation of the respective building.

33.3 REGULATIONS

33.3.1 (C-1) For Layout Approval/Building Permission

- (i) In case of Residential layouts, area admeasuring 10000 sq.m. or more, in addition to 10 % open space, prescribed in the bye- laws, a separate space for Waste Water Treatment and Recycling Plant should be proposed in the layout.
- (ii) On the layout Plan, all Drainage lines, Chambers, Plumbing lines should be marked in different colour and submit the layout for approval to the PMRDA.
- (iii) The Recycled Water shall be used for Gardening, Car Washing, Toilet Flushing, Irrigation, etc. and in no case for drinking, bathing, washing utensils, clothes, etc
- (iv) In the Estimate of Waste Water Recycling Plant only provision for basic civil work and required machinery will be proposed by the PMRDA other than these provisions, additional machinery, plumbing, Water tank pipe, landscape should be provided by Owner or Developer on his Own Cost.
- (v) A clause must be included by the Owner/ Developer in the purchase agreement that the purchaser, Owner of the Premises/Organization or Society of the purchasers shall ensure that:

- a. The Recycled Water is tested every six months either in Municipal Laboratory or in the laboratory approved by PMRDA or by State Government and the result of which shall be made accessible to the Competent Authority/ EHO of the respective Ward Office.
- b. Any recommendation from testing laboratory for any form of corrective measures that are needed to be adopted shall be compiled. Copy of any such recommendation and necessary action taken shall also be sent by the testing laboratories to the Competent Authority/ EHO of respective Wards.
- c. Maintenance of Recycling Plant should be done by the Developer or Housing Society or Owner.

33.3.2 (C-2) Group Housing/Apartment Building

In case of Group Housing if the area admeasuring 4000 sq.m. and above or if consumption of Water is 20,000 litres per day or if a multi-storeyed building where there are 20 or more tenements then Waste Water Recycling Plant as mentioned in (C-1) above should be constructed.

33.3.3 (C-3) Educational, Industrial, Commercial, Government, Semi-Government Organizations, Hotels, Lodgings etc.

For all above buildings having built-up area 1500 sq.m. or more or if Water consumption is 20,000 litre per day whichever is minimum, then provision for Waste Water Treatment Plant as mentioned in (C-1) is applicable.

33.3.4 (C-4) Hospitals

Those Hospitals having 40 or more beds, Waste Water Recycling Plant as mentioned in (C-1) is applicable.

33.3.5 (C-5) Vehicle Servicing Garages

All Vehicle servicing garages shall ensure that the Waste Water generated through washing of vehicles is treated and recycled back for the same use as mentioned in (C-1)

33.3.6 (C-6) Other Hazardous uses

All other Establishments/ Buildings where chances of Waste Water generated containing harmful chemicals, toxins are likely and where such water cannot be directly led into public sewers, the concerned Competent Authority may direct the Owners, users of such Establishments, Buildings to treat their Waste Water as per the directions laid in (C-1)

33.4 INCENTIVE

The Owner/Developer/Society setting up and agreeing to periodically maintain such Waste Water Treatment and Recycling Plant entirely through their own expenditure shall be eligible for an incentive in the form of fiscal benefits in Property Tax to the extent of 5% to Tenement holder/Society.

33.5 Penalty Clause

- (i) Any person / Owner / Developer / Organization / Society violating the provisions of these bye-laws, he shall be fined Rs. 2,500/- on the day of detection and if the violation continues, then he shall be fined Rs.100/- for every day as concrete action after written Notice from PMRDA.
- (ii) If any person / Owner /Developer / Organization / Society fails to operate as determined by the Authorised Officer of the PMRDA and from the observations of test results and/or physical verification of the Recycling plant, then he will be charged a penalty of Rs.300/- per day and disconnection of Water connection also.

34.0 SOLID WASTE MANAGEMENT

It shall be mandatory for:

- i. Housing complexes, Commercial establishments, hostels, hospitals having aggregate built-up area more than 4,000 sq.m. or more;
- ii. All three star or higher category hotels;

to establish a dedicated Solid waste management system to treat 100% wet waste and home-compostable plastic being generated in such buildings.

The treatment of wet waste shall be done through an organic waste composters/ vermiculture pits or other similar technologies of suitable capacity installed through reputed vendors.

The disposal of dry waste, e-waste, hazardous waste shall be carried out through authorised recyclers or any other system as specified by the Metropolitan Commissioner.

35.0 INCENTIVE FOR GREEN BUILDINGS

The PMRDA shall strive to promote green building concepts within the PMR area. In order to do so it may empanel agencies of repute as listed/ recognised by the State / Central Government. The following incentives shall be provided for green rated buildings.

- i. Green buildings shall be entitled for incentive FSI as below:

GRIHA Three star / IGBC Silver or equivalent rating – 3% incentive FSI on basic FSI.
GRIHA Four star / IGBC Gold or equivalent rating – 5% incentive FSI on basic FSI.
GRIHA Five star / IGBC Platinum or equivalent rating – 7% incentive FSI on basic FSI.

Provided, achieving minimum GRIHA Three star / IGBC Silver or equivalent rating for construction projects shall be mandatory for all buildings belonging to Government, Semi- Government, local bodies and public sector undertakings.

- ii. Incentive FSI will be awarded after pre-certification from the empanelled agency. This FSI shall be exclusive of the limits specified in this DCPR.
- iii. In case that the developer fails to achieve committed rating as per pre-certification at the time of final occupancy, a penalty shall be imposed at the rate 2 times of the land cost as per ASR for the incentive FSI for the rating not achieved.

PART - IX
SPECIAL SCHEMES/ ACTIVITIES

36.0 Deleted

37.0 SPECIAL REGULATION FOR DEVELOPMENT OF "INTEGRATED TOWNSHIP PROJECT (ITP)"

37.1.1 Applicability:-

These regulations shall be applicable to the areas under Pune Metropolitan Region under the jurisdiction of the PMRDA. If the ITP falls within the jurisdiction of more than one authority, in such cases the maximum area covered under the one authority shall have control over the entire ITP and the Development Control Regulations of the such Authority shall be applicable.

37.2 Requirements of Site:- The area proposed for Integrated Township shall fulfill the following requirements:-

- i. Any suitable area having area of 40 hect. (100 Acres) or more at one place.
- ii. The area shall be one, contiguous, unbroken and uninterrupted. Provided that, such area if divided by one or more watercourses (such as nalas, canals, etc.), existing or proposed roads of any width or by railways etc., shall be treated as one, contiguous, unbroken and uninterrupted, subject to condition that the Project Proponent/s shall construct necessary connecting roads or bridges as per site requirements at his own cost with due permission from concerned authorities. The Township Area may include Land, within the flood line, Hill Top & Hill Slope Zone as shown on Regional Plan subject to condition as mentioned in clause 37.7.1.3. However total of these areas shall be restricted to Maximum 40% of the total area under ITP.
- iii. The area shall have an access by means of an existing, or proposed road having minimum right of way of 18 m. In case of proposed road, such area shall have an access by existing road having width 12 m. or more only for the purpose of locational clearance of such project to be "Integrated Township Project" (ITP)
- iv. **Such area shall not include the area under:-**
 - a. Notified forest,
 - b. Water bodies like river, creek, canal, reservoir, etc.
 - c. Lands belonging to Tribal
 - d. Notified National Parks
 - e. Defence Estates
 - f. Cantonment Boards
 - g. Eco-sensitive Zone/Area Notified under Environmental (Protection) Act, 1986
 - h. Any restricted area.
 - i. Area of the Regional Plan having special regulation /character e.g. Sector „R of Pune Regional Plan.
 - j. Quarry Zone, notified SEZ, designated port/harbour areas, wildlife Corridor and biospheres reserves, Gaothan/Congested Area.
 - k. The historical and archeological places notified under the relevant act. Heritage properties along with its precincts.
 - l. Any other area that may be declared by the PMRDA/Govt. of Maharashtra from time to time.

37.3 Ownership of Lands:-

The project proponent/s shall have the ownership of all the land parcels under project. (**Explanation** – for this clause, ownership includes rights accrued vide one or more registered Development Agreement/s or Power of Attorney (PoA) for such development and disposal, on behalf of land owner/owners).

37.4 Permission and Declaration of Project by PMRDA:

- 37.4.1** The Project Proponent/s shall apply to the State Government for obtaining permission and declaration of such project to be a “Integrated Township Project”. Such application shall be accompanied by the following attested documents in two sets:-
- a) Details of ownership of land viz. extracts of V.F.No. 7/12 or Property Register Cards, in original having date not more than six months prior to the date of submission. In case of rights accrued through registered Development Agreement or PoA, attested copies of such documents.
 - b) Self-attested list of S.No./G.No./CTS showing name of owner as per record of rights, total area of such land parcel, area owned by the applicant in such land parcel, the name of person/ company owning the Development Rights, area proposed to be included in project from such land parcel.
 - c) Part plan of sanctioned Regional Plan, showing all the lands falling in the project.
 - d) No Objection Certificate from Water Resources Department in respect of lands falling in “Command Area” of any Irrigation Project.
 - e) Village maps showing the lands falling in the project.
 - f) Certificate from concerned Forest Officer not below the rank of Dy. Conservator of Forests, showing that the lands under project do not form part of and not included in reserved forest or protected forest or non-classified forest or not acquired under the provisions of the Maharashtra Private Forest (Acquisition) Act, 1975 and also, confirming that such lands do not form part of the Notified National Parks, prohibited area of Notified Wildlife Sanctuaries and Notified Bird Sanctuaries.
 - g) Certificate from the concerned revenue officer not below the rank of Tahsildar, showing the lands under project do not include lands belonging to tribal.
 - h) Certificate from the Director of Archaeological Department, Maharashtra State, showing that the lands under project do not include monuments notified by the Archaeological Department, Heritage buildings and Precincts. Such certificate should also mention the distance to be kept around such places, if any.
 - i) Receipt of processing fee (non-refundable) paid, at the PMRDA at the rate of Rs.5000/- per ha. for the current year with the yearly rise of Rs.500/- per ha. starting from the month of January every year or as per the rate decided by PMRDA from time to time.
- 37.4.2** On receipt of an application under Clause 37.4.1 above, the Government may, after consulting the Director of Town Planning, by notification in the Official Gazette, grant the locational permission and declare such project to be a “Integrated Township Project”, subject to such general and/or special conditions or, reject the application, under the provisions of Section 18(3)/44(2) of the said Act, within a period of 90 days from the date of receipt of application or reply from the Project Proponent/s in respect of any requisition made by State Government, whichever is later.
- 37.4.3** Every such permission and declaration shall remain in force for a period of two years, if not applied for Letter of Intent under Clause 37.5, from the date of issue of Locational Clearance Notification and thereafter it shall lapse. Provided that, the Director of Town Planning M.S. may, on application made by Project Proponent/s before expiry of the above period extend such period by two years in aggregate. Provided also that, it is not mandatory on Project Proponent/s to submit all the papers afresh as prescribed under Clause 37.4.1, however the affidavit regarding the ownership of land about any dispute shall be mandatory.
- 37.4.4** Such lapse shall not bar any subsequent application for fresh proposal.
- 37.4.5** The Director of Town Planning M.S., on the request of Project Proponent/s, by notification in the Official Gazette, may grant to add or delete any area, not exceeding 25% of the total area under Locational Clearance, subject to condition that the remaining area shall not be less than 40 Hect. The permissible FSI and other parameters shall increase or decrease accordingly.

37.5 Letter of Intent (LOI) by the District Collector:

- 37.5.1** The Project Proponent/s shall apply to the Collector for obtaining the Letter of Intent for such project. Such application shall be accompanied by the documents as prescribed in Clause 37.4.1(a) & 37.4.1(b) and also the documents as may be directed by the Metropolitan Commissioner in respect of ownership only.
- 37.5.2** The Collector shall verify and satisfy himself that Ownership and Development Rights of all the lands under project are with the Project Proponent/s before issuing the Letter of Intent.
- 37.5.3** On receipt of an application under Clause 37.5.1 the Collector shall grant the Letter of Intent for the whole area or separately for any part thereof, which shall not be less than 40 Ha. at the first instance, subject to conditions as may be deemed fit, or reject the application, within a period of 45 days from the date of receipt of application or reply from the Project Proponent/s in respect of any requisition made by the Collector, whichever is later. Provided that, in case of rejection, the Collector shall state the grounds for such refusal.
- 37.5.4** Every such Letter of Intent shall remain in force for a period of two years, if not applied for Development Permission under Clause 37.6, from the date of issue of Letter of Intent, unless renewed. Provided that, the Collector may, on application made by Project Proponent/s before expiry of the above period extend such period by two years in aggregate. Provided also that letter of intent granted by the Collector under earlier regulations may also be extended subject to other conditions of these regulations.

37.6 Master Layout Plan Approval by the Metropolitan Commissioner:

- 37.6.1** The project proponent/s shall apply to the Metropolitan Commissioner for obtaining the approval to the Master Layout Plan of the entire area as per Letter of Intent. Such application shall be accompanied by the documents in two sets as prescribed below:
- a) Attested copy of Gazette Notification issued by the Government under Clause 37.4.2.
 - b) Attested copy of Letter of Intent issued by Metropolitan Commissioner under Clause 37.5.
 - c) Part plan of sanctioned Regional Plan, showing the lands under the Master Layout Plan.
 - d) Village Map showing the lands under the Master Layout Plan.
 - e) In case, project has no access from existing road having right of way of 18 m. then documents showing the ownership of Project Proponent/s in lands proposed for 18 m. wide access road.
 - f) Bank Guarantee of requisite amount as prescribed in Clause 37.12.5
 - g) Undertaking and Affidavit as may be prescribed by PMRDA.
 - h) Copies of Master Layout Plan with or without Building Plans in three sets with sign of
 - i) Owner/developer and architect.
 - j) Contour map showing contour levels of lands under Master Layout Plan. Trueness of the contour shall be certified and attested by the surveying agency and the Project Proponent/s under their signature and seal.
 - k) Coloured satellite image showing lands under Master Layout Plan.
 - l) Phased Programme for development of infrastructure with amenities under project.
- 37.6.2** If the application is not accompanied by the documents mentioned in Clause 37.6.1, the Metropolitan Commissioner shall return the same to the Project Proponent/s immediately within 10 working days at his level only.
- 37.6.3** On receipt of application, complete in all respects, as prescribed under Clause 37.6.1, the Metropolitan Commissioner shall obtain technical consultation within 10 working days from PMRDA's technical team headed by Metropolitan Planner, PMRDA.
- 37.6.4** The technical team of PMRDA, shall send its remarks to the Metropolitan Commissioner within one month from the receipt of proposal from the Metropolitan Commissioner or receipt of reply from the Project Proponent/s in respect of any requisition made by him, whichever is later. Such master layout approval shall be given with the condition that project proponent shall not commence work without environmental clearance. Such environmental clearance shall be submitted at the time of sanction to the building permission.

- 37.6.5 Approval to the Master Plan and Building Plan:** The Metropolitan Commissioner shall grant development permission for master layout or reject the application, under requisite sections of the said Act, within one month from the receipt of technical scrutiny report.
- 37.6.6 Approval to the building plan:-**Detailed building permission under the master layout plan sanctioned as per clause 37.6.5 shall be granted by the PMRDA within 30 days from the receipt of the proposal from the project proponent as mentioned in 37.6.6.1.
- 37.6.6.1** The Project Proponent/s shall apply to the PMRDA for grant of building permission, alongwith all relevant documents and attested copy of Environment Clearance for the project from MoEF or the Authority empowered by the MoEF.
- 37.6.6.2** The Project Proponent/s shall submit the certificate of Architect regarding completion of plinth stating that the construction of plinth is strictly as per the submitted building drawings and also as per the approved building Plans to the PMRDA along with approved Plan. The PMRDA shall verify the same. If it is found that the construction of plinth is not as per the building permission sanctioned, the PMRDA shall reject such plinth checking certificate. In such circumstances, the Project Proponent/s shall demolish the said plinth and also the action against the Project Proponent/s and the concerned architect shall be initiated by the Metropolitan Commissioner. If it is found that the construction of plinth is as per the building permission sanctioned, then grant of plinth checking certificate shall not be necessary.

37.7. Planning Considerations:

37.7.1 Permissibility in respect of Zoning:-

- 37.7.1.1** Notwithstanding anything contained in any regulation for the time being in force, the project to be notified under this regulation may be permissible in any land-use zone/s of sanctioned Regional Plan, excepting areas mentioned in Clause 37.2(iv).
- 37.7.1.2** For the areas falling in zones, other than residential, commercial as per the sanctioned Regional Plan, the Project Proponent/s shall have to pay a premium for permitting project in such zones at the rates prescribed below:-

Sr. No.	Type of Zone	Premium Charges
a.	Afforestation Zone, Hill Top & Hill Slope Zone as shown on Regional Plan (Maximum 40% of the total area under ITP shall be permitted)	20 %
b.	Public / Semi-public Zone, Industrial Zone	10 %
c.	Agriculture/ No Development Zone/ and other zones excepting at Sr. No. a & b above.	15 %

(Explanation: Premium charges shall be calculated by considering the agriculture land rate of the said land as prescribed in Annual Statement of Rates (ASR) without applying the guidelines. Out of total premium 20% shall be paid at the time of Locational Clearance, 20% paid at the time of letter of Intent, 20 % at the time of sanctioning of Master Layout Plan and remaining 40 % shall be in four equal instalments per year)

37.7.1.3 No construction shall be permitted on the lands within the HFL. Also on land in Hill Top & Hill Slope Zone and lands having slope equal to or more than 1:5 in the said Project, whether specifically marked as such on the Regional Plan or not. No development of any sort and activity involving cutting / levelling / filling shall be permissible on such lands. Provided that, it shall be permissible to use such lands for Plantation, Park, Garden purposes, Access road to township development with minimum cutting and other users as otherwise permissible in respective Regional Plans and the FSI of such lands shall be permissible to the extent as prescribed in Clause 37.7.2.

37.7.2 Permissible Floor Space Index (FSI):-

37.7.2.1 Notwithstanding anything contained in any regulation for the time being in force, the basic permissible FSI for such project shall be 1.0, to be calculated on Gross Plot Area under Master Layout Plan without deducting any areas under the slopes, etc.

37.7.2.2 Further, additional built up area as mentioned below shall be permissible on payment of premium at the rate of 20 % of the weighted average land rate of the said land as prescribed in Annual Statement of Rates for the relevant year, without applying the guidelines therein. Such premium shall be paid at the time of Building permission.

Area under Township	Additional built-up area on payment of premium
40 hectand up to 200 Hectare.	Upto 70 % of basic permissible FSI
More than 200 hec. and up to 500 Hectare	Upto 80 % of basic permissible FSI
More than 500 hec.Hectare	Upto 100 % of basic permissible FSI

37.7.2.3 Over and above the FSI as prescribed above, an additional FSI in lieu of construction of tenements for social housing shall be permissible as prescribed in Clause 37.9, without charging premium.

37.7.2.4 It shall be permissible to utilise the maximum permissible built-up area as prescribed above, anywhere in the area under sanctioned Master Layout Plan.

37.7.3 Mandatory Town-Level Amenities - Area and FSI Allocations:- Master Layout Plan shall provide for town-level area and FSI allocation, to be kept at one or more places, as follows:-

a) Spaces for Recreation:-

Sr. No.	Particulars	Minimum Area Required	Conditions
i	Garden/s and Park/s	5% of Master Layout Area.(out of this 50% area may be allowed on Hill Top Hill Slop Zone)	Out of this at least 1000 sq. mt. area shall be kept open for Town Plaza/Town Square. Such area shall be kept open and may be allowed to be proposed at suitable places. Major public amenities/activities shall be cluster around this area.
ii	Play Ground/s	7.5% of Master Layout Area	Maximum 10% of area under Play Ground which may accommodate indoor games, stadiums and allied users only.

(Note: These spaces shall be exclusive of open spaces to be required at sector-level layouts)

b) Spaces for combined School/s (Primary School/s + High School/s) -

Sr. No.	Particulars	Minimum Area Required	Minimum Built-up Area required
i	for Master Layout area of 40 Ha.	5,000 sq.m.	5,000 sq.m.
ii	for Master Layout area more than 40 Ha.	To be increased proportionately with increase in Master Layout area and be proposed at one or more locations, as per requirements.	

Note:

- i) The requirements prescribed above are by considering School to be run in double shift.
- ii) Requirement of plot area and built up area shall be exclusive of Play Ground spaces. Hence it is mandatory to show separate Play Ground adjoining to school building at the rate of 7 sq. m. / student.

c) Community Health Care Facilities:-

Primary and Secondary Health Care Facilities like Dispensary, Maternity Home, Hospital etc.

Sr. No.	Particulars	Minimum Area Required	Minimum Built-up Area required
i	for Master Layout area of 40 Ha.	1,000 sq. m.	1500 sq. m.
ii	for Master Layout area more than 40 Ha.	To be increased proportionately with increase in Master Layout area and be proposed at one or more locations, as per requirements.	

d) Community Market:-

Sr. No.	Particulars	Minimum Area Required	Minimum Built-up Area required
(i)	Mutton Market		
	for Master Layout area up to & inclusive of 200 Ha.	1000 sq. m.	As per requirement
	for Master Layout area more than 200 Ha.	To be increased proportionately with increase in Master Layout area and be proposed at one or more locations, as per requirements.	
(ii)	Fish Market & Vegetable Market		
	for Master Layout area up to & inclusive of 200 Ha.	1000 sq. m.	As per requirement
	for Master Layout area more than 200 Ha.	To be increased proportionately with increase in Master Layout area and be proposed at one or more locations, as per requirements.	

Note: Users mentioned in (i) & (ii) above may be clubbed together for convenience purpose, without altering the requirements in plot area and built-up area.

e) **Public Assembly Facilities:-Town Hall and/or Auditorium including Library**

Sr. No.	Particulars	Minimum Area Required	Minimum Built-up Area required
(i)	for Master Layout area up to & inclusive of 200 Ha.	15000 sq.mt.	15000 sq.mt.
(ii)	for Master Layout area more than 200 Ha.	To be increased proportionately with increase in Master Layout area and be proposed at one or more locations, as per requirements.	

f) **Economic Activities:-**

Economic activities including users such as Market, Multiplex, Mall, Information Technology & Information Technology enabled Services (IT &ITeS) including SEZs, Essential Shopping, Recreational Centers, Trade & Commerce, Education, Hospitals, Non-polluting Industries, Service Industries, Entertainment, Tourism, Star Category Hotels, Convention Centers, Gymnasiums, Socio-economic activities, such as workshop, hostel for Autistic persons and Mentally Retarded persons except independent residential tenements, etc. as per requirements.

Sr. No.	Particulars	Minimum Area Required	Minimum Built-up Area required
i	for Master Layout area of 40 Ha.	40,000 sq.m.	80,000 sq.m
ii	for Master Layout area more than 40 Ha.	To be increased proportionately with increase in Master Layout area and be proposed at one or more locations, as per requirements.	

Note-

- i) Users as mentioned in b, c, d, e & f may be clubbed together, in Economic Activities Component, subject to condition that, total built-up area should not be less than the summation of minimum required for all such users, irrespective of their individual plot area requirements.
- ii) The required parking spaces for all such amenities as per norms shall be provided in same plot.

g) **Public Utilities:- For Master Layout area upto & inclusive of 200 Ha.**

Sr. No.	Particulars	Minimum Area Required	Permissible Built-up Area
i	Fire Brigade Station-	3000 sq.m. or as prescribed by the Director of Fire Services, Maharashtra State	As per recommendations of the Director of Fire Services, Maharashtra State.
ii	Sewage Waste Management Project (SWMP)	4000 sq.m.	As per requirements
iii	Cremation Ground	2000 sq.m.	As per requirements
iv	Burial Ground	2000 sq.m.	As per requirements
v	Bus Station / Transport Hub	3000 sq.m.	
vi	Police Station	1000 sq.m.	
vii	Electric Sub-station	As per requirement	
viii	Other Public Utilities	As per requirement	
ix	Public Parking Facilities	As per prevailing DCR	
x	Solid waste management	As per requirement	

Note:

- i) If the facility of Cremation Ground/ Burial Ground is available in the village where the Township is located in such case these requirements need not be insisted subject to NOCs of respective Gram Panchayat.
 - ii) If Police Station is available within 1k.m. area from the proposed Township, then such facility need not to be provided.
- h) Transport & Communication:-**
- i) The entire area of the project shall be well-knitted with proper road pattern, taking into consideration the linkages with existing roads within the project and outside area as well. All such roads shall be developed by the Project Proponent/s as per Annexure I.
 - ii) The width of the -
 - a. Classified Road should not be less than as may be prescribed by concerned public authority;
 - b. Main / Arterial / Ring Road should be minimum right of way of 18 mt.
 - c. Other Sub-Arterial roads, Collector streets, local streets, etc., shall be proposed as per the requirements to cater to the need of occupancies on such roads including for pedestrians.
 - d. Network of cycle track in entire Township area of minimum width of 3 meter shall be provided without clashing the vehicular traffic.
 - iii) It may be permissible for Project Proponent/s, to realign the Regional Plan Roads, and earlier existing roads passing through the project area, without changing the entry and exit points of such roads.
 - iv) All the Regional Plan Roads and all the Main / Arterial / Ring Roads, shall always be open for general public, irrespective of the fact that, they resides in the project ornot.

General Note for Amenities (a) to (h):

- a. The requirements prescribed above for items (a) to (f) are by considering FSI proposed for the project is only 1.0. If the FSI proposed is increased or decreased then the only built up area requirement shall be increased or decreased proportionately.
- b. The requirements prescribed above for items (g) are for Master Layout area up to & inclusive of 200 Ha. It shall be increased or decreased proportionately and may be proposed at one or more locations, as per requirements.

37.7.4 Residential Activities: -

Sr. No.	Particulars	Area	Built-up Area
i	Residential Activities (including Lands required for social housing, infrastructure such as waterstorage, drainage and garbage disposal, etc.)	The land excluding the land excluding the land required for purposes as shown in 37.7.3 (a) to (h). above purposes.as shown in 37.7.3 a to h	Remaining built-up area subject to minimum 60% of the total proposed built-up area.

37.8 Development Control Regulations:-

For those aspects which are not covered under this regulation, the prevailing provisions as prescribed in the DCPR (other than those covered in Appendix “M”) shall apply mutatis mutandis. The provisions of MoEF notifications amended from time to time shall also be applicable. However maximum height of building shall be allowed subject to provisions of National Building Code and Maharashtra Fire Prevention and Life safety measures Act 2006 and also any restriction imposed by Chief Fire Officer of PMRDA.

37.9 Social Housing:-

- 37.9.1** The Master Layout Plan shall provide sufficient space for construction of small tenements for persons from EWS and LIG categories (hereinafter referred to as the “Social Housing Component”), as a social responsibility with FSI as mention in Clause No 37.9.3. Out of this Social Housing Component 25 % FSI shall be utilised exclusively for construction of EWS tenements and remaining 75 % FSI shall be used for LIG tenements. Out of the total tenements constructed as Social Housing component, one third (1/3rd) tenements shall be kept for Rental Housing tenements which will be disposed on Rent only by the project Proponents.
- 37.9.2** Social Housing tenements shall be constructed with carpet area as specified by the MHADA for EWS and LIG category respectively.
- 37.9.3** The minimum Social Housing component shall be constructed at 15% of the Residential basic FSI of the area available for Residential Development as prescribed in Clause 37.7.4 (hereinafter referred to as the “Social Housing component”).
- 37.9.4** Social Housing tenements shall be constructed as per the general and special specifications prescribed by concerned unit of MHADA for their projects.
- 37.9.5** The Project Proponent/s, after getting commencement certificate of Social Housing component as per MHADA as mentioned above shall immediately intimate to MHADA regarding the numbers of Social Housing Component to be disposed by them to the allottee. Upon such intimation, MHADA within a period of six months, from the date of receipt of such intimation after following procedure of lottery system shall prepare the list of the allottee and forward it to the Project Proponent/s. The project proponent shall dispose of such EWS housing tenements to the allottees at the rate fixed by the MHADA from time to time.
- Provided that if the MHADA is unable to provide the list of the allottee as mentioned above then the project proponent shall dispose of such social housing tenements in the market at the rate fixed by the MHADA from time to time.
- 37.9.6** Every Occupation Certificate for the regular tenements shall be granted only along with the Occupation Certificate in proportionate with Social Housing component.
- 37.9.7** Amalgamation of such Social Housing tenements shall not be permitted in any case.
- 37.9.8** The purchaser of tenement under social housing shall deposit an amount equivalent to 10% of the construction cost of tenement, as prescribed in Annual Statement of Rates prevailing at the time of occupation, with the Project Proponent/s as one-time maintenance deposit for onsite infrastructure maintenance.
- 37.9.9** The Project Proponent/s shall maintain the premises and common spaces outside the building/s of social housing including concerned all basic infrastructure and amenities, in good condition in the same manner with the maintenance of remaining area of the project.
- 37.9.10** The purchaser of tenement under social housing shall have to pay all the government taxes, duties like stamp duty, VAT, service tax, etc. at actual, to the Project Proponent/s, as per the requirement, from time to time.

37.10 Liability of Project Proponent/s:-

37.10.1 The entire project shall be an integrated one with all facilities within the boundaries of such project. All the on-site infrastructure i.e. internal roads, approach road, street lights, water supply and drainage system shall be mandatory and constructed / maintained in future by the Project Proponent/s. Proposed internal roads and Open Spaces in the layouts shall be used only for ITP.

37.10.2 The Regional Plan Roads & Reservations which are included in ITP shall be developed by project proponent and after development made available to the general public. Such reservations may be allowed to shift within 500 mtrs (within Township Area Only) by Metropolitan Commissioner, PMRDA.

37.10.3 It shall be the responsibility of the Project Proponent/s to maintain all the infrastructure in good condition at his own cost and management, during and after completion of the project.

Provided that, the Project Proponent/s may handover the infrastructure, for maintenance purpose, only after the completion of the project, to the Urban Local Body, when constituted in the area comprised by the project.

37.10.4 Project Proponent/s shall mandatorily provide facilities for making the project SMART-

- i) The people residing in the project area, an efficient and timely public transportation system up to the nearest public transportation station/hub/depot/stand shall develop or tie with Government / Semi Government or private transport agency for such efficient public transportation. The number of buses and trips will be decided by MSRTC / Local Transport Authority.
- ii) Continuous unobstructed footpath of minimum 1.5 m. width on either sides of all street/ roads width ROW 12 m. or more.
- iii) Dedicated and physically segregated bicycle track with a width of 3 mt. or more ,should be provided for entire Township area.
- iv) Pedestrian friendly pathways, encouragement to non-motorized transport, intelligent traffic management, non -vehicle street / zones, smart parking, energy efficient street lighting visible improvement in the area i.e. replacing overhead electric wiring with underground wiring, encroachment free public areas.
- v) Generation of power through non-conventional energy sources like solar, wind and other shall be mandatorily provided with atleast 10% of total requirement;
- vi) Energy management by adopting advanced technology like installing Solar Water Heating System, Solar Lamps/Lights in common areas, LED Lamps, auto-operated street lights, solar pumps, etc. all external lighting shall be of LED, Solar Water Heating System, Solar Lamp shall be compulsorily provided;
- vii) Effective water management by adopting water harvesting techniques like rain water harvesting, recycling of used water, metered water supply to the users under project, double plumbing pipeline .The recycled water shall be used for flush system, gardening, carwash and industrial use;
- viii) Effective safety & security measures like CCTV surveillance at strategic locations, centralized control room, etc.;
- ix) Smart and fast internet/broad band connectivity to all residence, e-governance online system for grievance redressed;

- x) Citizens participations in decision making about public community issues.
- xi) Real time environmental monitoring i.e. air pollution, noise pollution etc. shall be observed;
- xii) e-DCR for building plans with BIM, 3-D maps on GIS of the utility services network and properties in the city, as recommended by the PMRDA, central command, control and emergency response center for all infrastructure facilities. Project Proponent/s shall also provide urban design concept plans along with Master Plan.
- xiii) It shall be obligatory on the part of Project Proponent/s to provide and be provided for, the infrastructure and green building norms that are necessary as per the guidelines as may be laid down by the PMRDA and Government, under the policy of development of “Smart City” from time to time.

37.10.5 Project Proponent/s shall also mandatorily provide for:-

- a) **Water Supply** - Safe and potable drinking water at the rate of 90 liters per capita per day, exclusive of requirement of water for firefighting and gardening purposes. The storage capacity of the same shall be at least 1.5 times of the actual required quantity as determined by expected population (Resident and Floating) and other uses. The Project Proponent/s would be required to develop proper internal distribution with double pipe plumbing and maintenance system along with smart metering and shall specially undertake rain water harvesting, groundwater recharging and waste water recycling within the project.

Provided that, the Project Proponent/s should not use groundwater as a source of water, to meet the above requirement.

- b) **Drainage and Garbage Disposal:-** The Project Proponent/s shall make suitable and environment friendly arrangements for the disposal and treatment of sewage and solid waste generated in the project at source , as per the norms of the Maharashtra Pollution Control Board. The Project Proponent shall provide zero discharged in ITP for solid as well as liquid based. The Project Proponent/s should provide facilities for water conservation by different means such as Rain Water Harvesting, Recycling of Waste Water, etc. and also set-up, in the project area itself, the Solid Waste Management Project (SWMP) with a sufficient capacity for processing of 100% garbage and solid waste so that it should be zero liquid discharge to city from the area.
- c) **Power:-** The Project Proponent/s shall ensure continuous and quality power supply for the project area. The Project Proponent/s may draw the power from any existing supply system or may go in for arrangement of captive power generation with the approval from the concerned authority. If power is drawn from any existing supply system, the Project Proponent/s shall, before commencement of development, procure a firm commitment of power for the entire Township from the power supply company. It shall be mandatory for the project proponent to adequate infrastructure for generation of minimum of grid interactive 10% power supply from new and renewable energy sources with net metering facility.

37.11 Occupancy Certificate:-

37.11.1 Application for obtaining the Occupancy Certificate for project, in full or part shall be submitted by Project Proponent/s to the PMRDA. Such application shall be accompanied by -

- a) All the relevant documents along with coloured satellite image showing the area under Master Layout Plan;
- b) Documents showing compliance of the conditions prescribed while according sanctions from time to time;

- c) Appropriate declaration/s and undertaking/s made by the Project Proponent/s and his technical personnel/s;
- d) Any other requirement as may be prescribed by the Metropolitan Commissioner.

37.11.2 The Metropolitan Commissioner shall grant Occupancy Certificate or reject the application within one month from the receipt of the application.

37.11.3 The Metropolitan Commissioner, before issuing the Occupancy Certificate for the project as a whole, shall verify and satisfy himself about the completion of erection / development / construction of all the basic required infrastructure in Master Layout plan. In case, an application for part occupancy, such completion shall be as prescribed in phase programme.

37.12 General Stipulations:-

37.12.1 Development of basic infrastructure and amenities shall be completed by the Project Proponent/s to the satisfaction of the Metropolitan Commissioner either for whole or as per phases, of the project.

37.12.2 It shall not be mandatory for the Project Proponent/s to provide Amenity Space as otherwise required as per regulation of Regional Plan, if any.

37.12.3 The Project Proponent/s shall plant indigenous trees at the rate of at least 150 trees per ha. and maintain it properly. The certificate to that effect issued by the Deputy Conservator of Forest or an officer nominated by him for this purpose shall be produced by Project Proponent/s at the time of application for Final Occupation Certificate under Clause 37.11.

37.12.4 All the amounts of scrutiny fees, charges, premium etc. shall be payable to the PMRDA.

37.12.5 The Project Proponent/s shall submit a bank guarantee of an amount equal to the 15% of estimated development cost required for development of the basic infrastructure such as roads, water supply, drainage & garbage disposal, installations for power supply, firebrigade station & fire engines. Such development cost be worked out as per respective phases taking into consideration the phased programme for development of infrastructure with amenities under project as submitted and as required under clause 37.6.1. Certificate regarding estimated development cost shall be produced by the respective Architect of the project.

37.12.6 The Project Proponent/s shall construct and maintain the Fire Station at their cost. The project proponent post a well-trained staff at fire station as per the recommendations of the Chief fire officer of PMRDA. The amount of all expenditure on such staff shall be the responsibility of the Project Proponent/s. After completion of fire station and as per requirement such firebrigade/station shall be handed over to PMRDA on the condition decided by the PMRDA and project proponent.

37.12.7 Developer shall complete the Integrated Township Project within 10 years from the approval to the master plan. However this period of completion may be extended by the PMRDA subject to terms and conditions as may be decided by the PMRDA considering the development of Township. Developer shall develop and maintain the infrastructure up to the completion of the ITP project. Within such period property tax shall be levied by the respective Grampanchayat at 50 % of normal rate as prescribed under the Grampanchayat Act. Respective Grampanchayat shall provide mandatory provisions like Birth and Death Registration Certificate etc. for the same period in such ITP. Provided that the utilities like firebrigade, police station/chauki etc. shall be handed over to the PMRDA as per the terms and conditions to be decided by the PMRDA.

37.12.8 A local Authority shall be formed under section 3 read with section 341 of the Maharashtra Municipal Council, Nagar Panchayat and Industrial Town ship Act 1965 according to population of such town ship. The newly formed respective authority shall take over the operation maintenance of infrastructure in the Integrated Township Project area with the previous approval of Government. However, if the area under ITPs merged in any Local Authority then operation and maintenance of

infrastructure in such Integrated Township Project area shall be made by the respective Local Authority.

37.12.9 Licensing to the Project Proponent/s - The respective Authority shall provide licenses to the Project Proponent/s for telephone Connection, Power and other utilities in the Township area. After granting the license from the respective Authority, the project proponent/s shall provide utilities in the Township area as per the terms and conditions laid down by the PMRDA

37.12.10 It shall be mandatory for the Project Proponent/s to provide atleast 9 mt. wide road to the land not owned by the project proponent which is surrounded by the Township Area

37.13 Special Concessions: -

37.13.1 Deemed conversion for Non-Agricultural (N.A.) Use:-The lands under approved Master Layout Plan shall be considered as deemed N.A. No separate permission shall be required under the provisions of Maharashtra Land Revenue Code, 1966.

37.13.2 Grant of Government land: -The Government land/s, if surrounded by the lands owned by the Project Proponent/s, may preferably be granted to the Project Proponent/s, as per the rules and regulations to that effect, by the Revenue and Forest Department of the State Government. Maximum 10% of the total area under township shall be allowed to be included in such township.

37.13.3 Concession in Stamp Duty: - For the first transaction, from Project Proponent/s to Purchaser, of any unit under any user, from approved Master Layout Plan or subsequent building plan under this Regulation, a concession to the extent of 50% of stamp duty as otherwise required under the Mumbai Stamp Act, shall be granted.

37.13.4 Exemption in payment of Development Charges:-The amount of Development Charges under subsection (3) of Section 124F of the said Act shall be exempted to the extent of 50% for, institution of use or, change of use of any land or building or, development of any land or building, proposed for project undertaken by a Project Proponent/s under this Regulation.

37.13.5 Relaxation from Mumbai Tenancy and Agriculture Land Act:-The condition that, only the agriculturist will be eligible to buy the agriculture land shall not be applicable to the Project Proponent/s for purchasing agriculture land for Integrated Township under this Regulation.

37.13.6 Exemption from Ceiling for holding agriculture land:-The limit for holding agriculture land, stipulated in the Maharashtra Agricultural Lands(Ceiling and Holdings) Act, 1961 shall not be applicable to the Project Proponent/s for development of Integrated Township Project under this Regulation.

37.14 Transition Policy:-

37.14.1 It shall be permissible for the Project Proponent/s, to whom Special Township Project has already been notified, to –

- a) Continue such Integrated Township Project under the erstwhile regulations and for that limited purpose erstwhile regulations for Integrated Township Project shall remain in force; or
- b) Apply for grant of Letter of Intent or Master Layout Plan as the case may be, under this regulation subject to payment of premium as prescribed in Clause 37.7.1 and 37.7.2, wherever applicable.

37.14.2 If in case as described in Clause 37.14.1(b), the construction of the project is on-going, it shall be permissible for the Project Proponent/s to opt for, this regulation subject to payment of premium as prescribed in Clause 37.7.1 and 37.7.2. Premium applicable as mention in clause 37.7.2 Social Housing Component as mention in clause 37.9 and economic activity as mentioned in 37.7.3 (f) shall be calculated on the difference of FSI permissible under clause 37.7.2 and FSI already sanctioned under erstwhile regulations.

37.15 Appeal: - Anyone aggrieved by an order passed under prevailing byelaws may within sixty days of the date of communication of the order prefer an appeal to the Government of Maharashtra.

37.16 Control by the State Government: - The Director of Town Planning M.S. is authorised on behalf of Government to monitor the Township Project who shall submit his report once in six months to the Government.

37.17 REGULATION FOR INCLUSIVE HOUSING

37.17.1 (a) For the sub-division or layout of the land admeasuring **10000 sq.mt.** or more for residential purpose minimum 20% of the net plot area shall have to be provided,

i) Either in the form of developed plots of 30 to 50 sq.mt. size for Economically Weaker Sections/ Low Income Groups (EWS/LIG), (hereinafter referred to as "affordable plots") in which plots of 30 sq.mt. size shall be kept for EWS; or,

ii) In the form of equivalent 20% net plot area, for constructing EWS/LIG tenements;

(b) The Land Owner/Developer shall sell the said affordable plots as mentioned at (i and ii) to MHADA at the land rate prescribed in the Annual Statement of Rates prepared by the Inspector General of Registration, Maharashtra State, Pune. If MHADA declines to purchase the same within a reasonable time of six months, then he can sale the affordable plots in the open market.

37.17.2 For a plot of land, admeasuring **10000 sq.mt.** or more to be developed for a Housing Scheme consisting of one or more buildings (hereinafter referred to as 'the said Scheme'), EWS/LIG Housing in the form of tenements of size ranging between 30 to 50 sq.mt, (hereinafter referred to as 'affordable housing tenements') shall be constructed at least to the extent of 20% of the basic zonal F.S.I., subject to the following conditions:-

a) The built-up area of the EWS/LIG tenements constructed under the Scheme shall not be counted towards F.S.I.

b) The Land Owner / Developer shall construct the stock of the affordable housing tenements in the same plot and the PMRDA shall ensure that the Occupation Certificate for the rest of the development 'under the said Scheme is not, issued till the Occupation Certificate is issued for the Affordable Housing tenements under the said Scheme.

Provided further that the Affordable Housing tenements of equivalent value as per ASR subject to minimum 20 % of built-up area as per original location may also be provided at some other location (s) within the same village.

c) The Project Proponent/s, after getting the Commencement Certificate for the scheme, shall immediately intimate to MHADA regarding the numbers of **affordable housing tenements** to be disposed by them to the allottee. Upon such intimation, MHADA within a period of six months from the date of receipt of such intimation shall duly after following procedure of lottery system prepare the list of the allottee and forward it to the Project Proponent/s. The project proponent shall dispose of such EWS housing tenements to the allottees at the construction cost in ASR applicable to the land under the Scheme plus 20 % additional cost. Out of this 20 % additional cost, 10 % shall be paid to MHADA towards their administration charges.

d) There shall be no obligation to construct affordable Housing tenements in the redevelopment project of any co- operative Housing Society in which the carpet area of all existing individual residential tenements does not exceed 80 sq.mt.

e) In case of Redevelopment of Individual bungalow these provisions shall not apply. However if redevelopment proposed on area more than 10000 sq.mt. these provisions shall be applicable.

f) There shall be no obligation to construct affordable housing tenements in accordance with these provisions in any Housing Scheme or residential development project wherein, owing to the relevant provisions of the Development Control and Promotion Regulations, 20% or more of the basic Zonal FSI is required to be utilized towards construction of residential tenements for the EWS/LIG and also for the development / redevelopment of any land, owned by the Government or any Semi-Government organization. Provided such development / redevelopment is undertaken by the Government or such Semi- Government Organization by itself or through any other agency under BOT or PPP model.

Provided that in case of Development of reservations of Public Housing, Housing for Dishoused, Public Housing / High Density Housing and the EWS/LIG tenements constructed under the provisions of any other Act, these provisions shall not be applicable.

37.17.3 Amalgamation of affordable plots / affordable tenements shall not be allowed.

37.17.4 These provisions shall be applicable prospectively and shall not be applicable to any Housing Scheme or residential development project wherein Commencement Certificate for full area had been issued prior to the date of coming into force of these provisions and was valid on such date. In case of revised approval this provision shall not be applicable. However, in case of part Commencement Certificate or revision of proposal where newly proposed area is more than 10000 sq.mt. then to that extent these regulations shall apply.

38.0 Tourism Development

38.1 The Metropolitan Commissioner, PMRDA shall allow the development of tourism activities as per following terms and conditions.

38.2 These regulations shall be applicable for Tourism Development in No Development Zone as set out herein below.

38.3 Tourism Development Project may be developed by individual or company or partnership firm or Government / Semi-government Organisations / Corporations

38.4 Size of plot & FSI – Minimum requirements regarding the size of the plot for Tourism Development Project and other features, shall be as follows:

i) Tourism Development Project shall be granted FSI as permissible as per Table No. 26 of these regulations.

Table No. 26

No Development Zone		
Total Area	Max. TD Project Area	Max. built up area permissible (FSI)
Area in hectare	Area in hectare	Area in sq. m.
2.0	1.0	5000 square meter
2.00-3.00	1.1	5500 square meter
3.00-4.00	1.2	6000 square meter
4.00-5.00	1.4	7000 square meter
5.00-6.00	1.6	8000 square meter
6.00-7.00	1.7	8500 square meter
7.00-8.00	1.8	9000 square meter
8.00-9.00	1.9	9500 square meter
9.00-10.00	2.0	10000 square meter
Above 10.00	1/5th of the holding	Half of the area of TDZ (0.5 FSI of TDZ area.)

Note:

- i) After deducting the area of Tourism Development, remaining land in No Development shall be entitled for FSI as permissible in respective zones.
- ii) For plots each more than 2 hectares in area in No Development Zone, no sub-division of plots shall be permitted.

38.4(a) Smaller Plots: - For existing landholders having smaller plots in No Development Zone, the provisions of promotion of tourism through bed & breakfast type of the arrangement for tourism shall be permissible. There shall be the same FSI as in No Development Zone for plots, according to Development Control Regulations.

38.5 Prohibition Tourism Development Project - Lands falling in categories specified below shall not be allowed for Tourism Development projects:

- a) Lands affected beyond permissible levels by pollution in land, water or air, as may be decided and certified by the Maharashtra Pollution Control Board.
- b) Areas from No Development Zone directly abutting the Residential Zone without being separated by road having width not less than 18 m.

38.6 Infrastructural Facilities – All the infrastructural facilities required in site as specified by the Metropolitan Commissioner, PMRDA shall be provided by the developer at his own cost on the site. Proper arrangement for treatment and disposal of sewage and sullage and solid waste shall be made to the satisfaction of Metropolitan Commissioner, PMRDA & Maharashtra Pollution Control Board. No untreated effluent shall be allowed to pass into the sea or any water body.

38.6(a) Reserved sites for TDZ – Where the lands are located in unique/unusual area, particularly suitable for development of tourism in view of existing water body, scenic beauty, tree plantation or geological formation etc. but are designated/ reserved in the Regional Plan for the purpose of park or gardens or recreation ground or private garden or private recreational ground, it can be specified as Tourism Development Zone. The minimum area of such site, however, shall not be less than 1.00 Ha. The floor space index available for development in such a site shall be 0.20. This FSI is to be consumed on only 15% of the area of the lands declared as Tourism Development Zone; out of the site designated for open user such as Recreation Ground, Parks etc.

38.7 Environment & Education – Places where rare species of migratory birds are known to visit and where there is a heritage of flora & fauna shall be given preference in development of Tourism Development Projects. Actions shall be taken by the developer for creating environmental awareness among the local population & especially among school going children in nearby area as directed by Metropolitan Commissioner, PMRDA.

38.8 In addition to above tourism development shall be permitted as following as per table no. 27 in the Afforestation Zone:

- i) Permissible Use

The following building user will be permissible in the Tourism Development Zones (T.D.Z.) as indicated in Table No. 27

- a) Conventional hotels, including cottages for Tourist.
 - b) Canteens/restaurants and tea stalls including pan and cigarette booths;
 - c) Baths and toilets for camping sites providing for tents/caravans;
 - d) Public utilities and services like information centre, tourist reception centre, telephone booths, first aid centre, structures for recreation purpose such as health farms, water sports facilities, marine jetties and pontoons for docking of boats, swimming pools, boat house, badminton halls and the like.
- ii) Minimum area of plot and maximum built up area etc, should be governed by the rules given in Table No. 27.

Table No. 27

Sub-Zone	Minimum area of plot/land	Maximum built up area (inclusive of temporary structures)	Maximum height of structures
1	2	3	4
1) Tourism Development Zones around lakes (a belt of 500 mtrs from FSL/HFL of Lake)	1 hect. (0.4 hect in case of development by local residents)	F.S.I. of 0.10 in case of tourist resort with minimum 10 rooms accommodation and ancillary users. Provided further that in case of Tourist Resort	1) Within a belt of 100 to 300 mtrs. From HFL/FSL of the Lake only Ground floor structures with maximum height of 5 mtrs with slooping roof.
		Development undertaken by local residents, concessional FSI of total 0.15 will be permitted for their already developed plots comprising extension of existing building. For Farm House/Forest House development 100 sq.mt. per 0.4 hect. Of plot + 50 sq.mt. per 0.4 hect. For ancillary structures	2) Within a belt of 300 to 500 mtrs. From HFL/FSL of the lake Ground + one with maximum 9 mtr. height.
2) Lands falling within the belt of 200 mtrs to 1.5 km from the historical monuments and places of archeological importance.	1 hect. (0.4 hect) in case of development by local residents.	F.S.I. of 0.10 in case of tourist resort with minimum 10 rooms accommodation and ancillary users. Provided further that in case of Tourist Resort Development undertaken by local residents, concessional FSI of total 0.15 will be permitted for their already developed plots comprising extension of existing building. For Farm House/Forest House development 100 sq.mt. per 0.4 hect. Of plot + 50 sq.mt. per 0.4 hect. For ancillary structures	Ground + one with maximum height of 9 mtrs.

3) Afforestation Zones (except Govt. reserved forests) catchment areas of the lake & area in the 500 mt. to 1500 mt. belt around lakes (where low density is essential).	1 hect.	100 sq. mt. per 0.4 hect. of plot + 50 sq. mt. per 0.4 hect. for ancillary structures.	Only Ground floor ²⁰⁸⁵ with maximum height of 5 mt. and sloping roof.
--	---------	--	--

- iii) Tree Plantation: Maximum number of appropriate species of trees, preferably 500 trees per hect. (except where the forest department's certificate is obtained about larger area per tree being required for the selected species) should be given only after a certificate from the competent forest authority about the survival of the required number of trees is obtained.
- iv) Further restrictions about building – No building including temporary structures, nor and camping ground will be permitted in areas having slopes steeper than 1 in 5. Similarly, no structures including temporary structures and tents/caravan sites (except boat house and jetties) will be permitted in the belt of 50 mtrs, from the High Flood Level of lakes and 200 mtrs. From boundary of protected monuments and temples of tourist importance. However, temporary removable ground floor structures including tents, camping grounds may be permitted in the belt of 50 mtrs. to 100 mtrs from HFL/FSL of the lake. Provided further that, no toilet Blocks (Bath, W.C.etc) are allowed within 100 mtrs from HFL/FSL of the lake.
- v) Treatment of effluent etc. – Proper arrangement for treatment and disposal of sewage and sillage and solid wastes shall be made to the satisfaction of the Water Pollution Control Board. No treated/untreated effluent should be allowed to pass into the lake waters.
- vi) Open spaces along all sides – Minimum Open Spaces on all sides shall be 10 mtrs.
- vii) No basement shall be allowed in the construction of Tourist Resorts within the belt of 100 to 500 mtrs. from the HFL of the lake.
- viii) In order to prevent clustered development, a notional plot of minimum 1000 sq. mt. shall be designated to each cottage.
- ix) Other features of buildings- Normal Rules shall apply in respect of building features other than the above. However, the construction shall be consistent with the surrounding landscape and local architectural style.

39.0 Innovative Development Proposals: If any development proposal is submitted by the owner or developer, consisting of new concepts, innovative ideas, then such proposal may be approved by the PMRDA in its Authority meeting, if it is, otherwise, in accordance with the spirit of these regulations.

40.1 Research and Development Centers as approved by the authorities identified by the PMRDA in any Zone excluding Hill Top Hill Slope Zone and Eco sensitive zone shall be allowed on following conditions:

- a) The area of land shall be minimum 2 hectare.
- b) The basic permissible FSI shall be as per residential zone and additional incentive FSI of 100% of basic FSI shall be allowed free of premium.
- c) Out of the total allowable FSI, not more than 25 % shall be used for supplementary activities such as office use, staff Quarters, guest houses, convenience shopping, banking, clinics, library, health facilities and other amenities.
- d) At least 80 trees per hectare shall be planted and maintained.
- e) The violation of any of above (a) to (d) clauses shall lead to cancellation of permission.

40.2 Ropeway Projects: The landings of any rope way approved by competent authority shall be allowed in any excluding hill top hill slope / Eco sensitive zone of the plinth area not exceeding 1000 sq.mt. subject to other compliances and other utilities like water, drainage, sanitation as per these regulations.

The pylons/foundations for the rope way may be allowed as per the structural design requirement on the land / water following in any zone provided that the project proponent holds the rights to erect

such structures and also provided that no habitable use is allowed under the pylons.

- a) Following users shall be permitted in the landing areas
 - i) Ticketing,
 - ii) Tourist facilitation center,
 - iii) Service facilities/utilities,
 - iv) Restaurants/cafes,
 - v) Souvenir shops,
 - vi) Museums
 - vii) Amphitheaters.

40.3 Planetarium / Astronomical / Astrophysical Facilities / Projects:

These facilities may be allowed in any zone excluding Hill Top and Eco sensitive zone. It shall be used as an entertainment and learning center featuring shows about *space* in a domed or any specially designed theatre and *star gazing* and any such similar astronomical and astrophysical facilities for laboratory and large-scale research projects as well as for recreation subject to other compliances and other utilities like water, drainage and sanitation as per these regulations

- i. The area shall be minimum 2 hectares.
- ii. Permissible FSI shall not exceed 0.1.
- iii. There shall be no restrictions on sizing of various functional parts for planetarium / Astronomical / Astrophysical facilities only.

40.4 Trekking Routes / Nature Trails / Nature Walks:

These facilities may be allowed in any zone including Hill Top Hill slope and Eco Sensitive zone. One unit of following users shall be permitted along PMRDA recognized nature treks / nature walks at both the ends in case of minimum length of 10 kms and only at the beginning in case of total length not exceeding 5 kms subject to other compliances and other utilities like water, drainage, sanitation as per these regulations.

- a) Utilities including drinking water, toilets,
- b) First aid cabin,
- c) Emergency log room,
- d) Pantry facility not exceeding 10 sqm.

Provided that for every intermediate 10 kms length of trek one unit of utilities mentioned in (a) above may be permitted.

40.5 Proposed Town Planning Scheme (TPS) Area:

40.5.1 These Regulations shall be applicable for the TP Scheme Notified areas in the PMRDA Area.

41.0 SPECIAL REGULATIONS:

41.1 SPECIAL REGULATIONS FOR DEVELOPMENT OF TOURIST RESORTS/ HOLIDAY HOMES/ TOWNSHIP IN HILL STATION TYPE AREAS: The developments under the Hill Station Policy shall be governed by the Special Regulations as sanctioned by Government vide notification no. TPS-1896-1231-CR-123-96-UD 13, dated 26/11/1996 and its amendments by the Government from time to time.

41.2 SPECIAL REGULATIONS FOR DEVELOPMENTS WITHIN 10 KMS OF TAMHINI GHAT: These regulations shall be governed by the Special Regulations as sanctioned by the Government vide notification no. WLP.2012/C.R. 325/F-1 dated 03/05/2013 and its amendments by the Government from time to time.

42.0 Commercial use of lands owned by Zilla Parishad, Panchayat Samiti & Gram Panchayat:

Notwithstanding anything contained in these Regulations or the Development Plan/Regional Plan, the land owned by Zilla Parishad, Panchayat Samiti & Gram Panchayat (excepting the lands reserved for the appropriate authority other than Zilla Parishad, Panchayat Samiti & Gram Panchayat) shall be allowed to be developed for commercial use up to the maximum extent of 33% of the Floor Space Index available & subject to the general restrictions applicable otherwise to such development & also in accordance with Rural Development and Water Conservation Departments Resolution No. Sankul

- 2004/ Pra.Kra.54/ Para – 8, dated 30-04-2004 & as may be modified from time to time subject to the following conditions. –
- i) The lands must be owned by Zilla Parishad / Panchayat Samiti / Gram Panchayat as the case may be.
 - ii) These lands are not reserved for any other appropriate authority in Development Plan/Regional Plan Town Planning Schemes.
 - iii) Independent access of appropriate width shall be separately provided for each commercial user and original user.
 - iv) Parking requirement as prescribed for each type of user shall have to be provided

43.0 CONSERVATION OF HERITAGE BUILDINGS / PRECINCTS / NATURAL FEATURES

43.1 Applicability:

This regulation will apply to those buildings, artefacts, structures, areas and precincts of historic and/or architectural and /or cultural significance (hereinafter as “Listed Buildings/Heritage Buildings and listed precincts/Heritage precincts”) and those natural features of environmental significance including scared graves, hills, hillocks, water bodies(and the areas adjoining the same) etc.

43.2 Preparation of List of Heritage Buildings, Heritage Precincts and Natural Features.

The Metropolitan Commissioner on advice of Heritage Committee shall prepare heritage list and shall issue public notice in the local newspapers declaring his intention to include the buildings, artefacts, areas and precincts of historic and /or cultural significance and the list of natural features of environmental significance, including sacred graves, hills, hillocks, water bodies etc. and invite objections and suggestions from any person in respect of the proposed inclusion within a period of 30 days from the date of such notice.

The Metropolitan Commissioner shall issue notice to the owner of the buildings, artefacts, areas and precincts of historic and/or cultural significance etc. and invite objections and suggestions from such person in respect of proposed inclusion within 30 days from the date of such notice.

The Metropolitan Commissioner, in respect of any objections or suggestions, shall decide the same after giving hearing to the objections and send to the Government for approval. Government will sanction the said heritage list with modification, if required. This list will be called **Final Heritage List**.

Thereafter, the Metropolitan Commissioner may amend the Final Heritage List from time to time as and when required, on the advice of the Heritage Committee. In such case it shall not be necessary to take approval from Government, but the procedure as laid down above in this regulation regarding publication and objection / suggestion shall be followed before finalising it.

43.3 Restriction on development, Redevelopment/repairs etc.

No development or redevelopment or engineering operations or addition, repairs renovation including the painting of buildings, replacement of special features or plastering or demolition of any part thereof of the said listed buildings, or listed precincts or listed natural features shall be allowed except with the prior written permission of the Metropolitan Commissioner. Before granting any such permissions, the Metropolitan Commissioner shall consult the Heritage Conservation Committee to be appointed by the State Government (hereinafter referred to as ‘the said Heritage Conservation Committee’) and shall act on the advice of the Heritage Conservation Committee.

Provided that before granting any permission for demolition or major alterations/addition to listed buildings (or buildings within listed precincts) objections and suggestions from the public shall be invited and duly considered by the Heritage Conservation Committee.

Provided that, in exceptional cases for reasons to be recorded in writing the Metropolitan

Commissioner himself may overrule the advice of the Heritage Conservation Committee.²⁰⁸⁸

If the application for development, alteration, modification of the Heritage precincts or listed building is rejected under this regulation or while granting such permission any conditions are imposed on the owner which deprives him to use the FSI, the said owner shall be compensated by grant of Development Right Certificate.

43.4 Incentive uses for Heritage Buildings.

After the commencement of this Regulation, the Heritage Precincts or the Listed Buildings shall not be permitted to be used for any commercial or office purpose except with the permission of the Heritage Conservation Committee. However, in cases of buildings included in the Heritage Conservation List, if the owner /owners agree to maintain the listed Heritage Building as it is in the existing stage and to preserve its heritage with due repairs, the owner/owners may be allowed with the approval of the Heritage Conservation Committee to convert part of the whole of the non-commercial area to commercial /office use. Provided that, if the heritage building is not maintained suitably or if the heritage value of the building is allowed to be spoiled in any manner, the Metropolitan Commissioner shall withdraw the permission forthwith.

43.5 Grant of Transferable Development Rights to owners/lessees of heritage buildings/heritage precincts.

If the owner is deprived of using FSI on the said plot or development permission is granted to him with conditions which deprive him of use of FSI, then he shall be entitled for TDR as decided by the Commissioner in consultation of Heritage Conservation Committee. The utilization of this TDR shall be as per TDR Regulation.

43.6 Maintaining Skyline

Building included in heritage precincts shall maintain the skyline in the precincts (without any high-rise development) as may be existing in the surrounding area, so as not to demolish or destroy the value and beauty of the said heritage buildings/heritage precincts. The development within the precincts shall be in accordance with the guidelines framed by the Metropolitan Commissioner on the advice of the Heritage Conservation Committee.

43.7 Restrictive Covenants

Regulations existing as on date of this Regulation imposed under covenants terms and conditions, on the leasehold plots either by State Government or by the PMRDA shall continue to be imposed, in addition to the Development Control and Promotion Regulations. However, in case of any conflict with the heritage preservation interest/environmental conservation and the said Development Control and Promotion Regulations, this regulation shall prevail.

43.8 Grading of the listed buildings/Listed Precincts.

The Metropolitan Commissioner shall classify the Heritage Precincts, Heritage Buildings in —Grades such as (I),(II), (III). The meaning of these grades and basic guidelines for development permissions are as follows:

Grade-I	Grade-II	Grade-III
(A) Definitions		
<p>Heritage Grade-I comprises Buildings and precincts of National or Historic importance, excellence in architectural style, design technology and material usage and/or aesthetics; associated with a great historic event, personality, movement or institution. They have been and are the prime landmarks of the city and of National importance.</p>	<p>Heritage Grade –II (A and B) comprises buildings and precincts of Regional importance, possessing special architectural or aesthetic merit, or cultural or historical significance though of a lower scale than Heritage Grade-I. They are local landmarks, which contribute to the image and identity of the region. They may be the work of master craftsmen or may be models of proportion and ornamentation or designed to suit a particular climate.</p>	<p>Heritage Grade –III comprises buildings and precincts of local importance for townscape, they evoke architectural, aesthetic, or sociological interest though not as in Heritage Grade –II. These contribute to determine the character of the locality and can be representative of life-style of a particular community or region and, may also be distinguished by setting on a street line or special character of the façade and uniformity of height width and scale.</p>
(B) Objective		
<p>Heritage Grade-I richly deserves careful preservation.</p>	<p>Heritage Grade-II deserves intelligent conservation.</p>	<p>Heritage Grade-III deserves intelligent conservation (though on a lesser scale than Grade-II and special protection to unique features and attributes.)</p>
(C) Scope for Change		
<p>No interventions be permitted either on exterior or interior unless it is necessary in the interest of strengthening and prolonging the life of the buildings or precincts or any part of features thereof. For this purpose absolutely essential and minimum changes would be allowed and they must be in accordance with the original.</p>	<p>Grade-II (A) Internal changes and adaptive reuse and external changes may by and large be allowed but subject to strict scrutiny. Care would be taken to ensure the conservation of all special aspects for which it is included in Heritage Grade-II</p> <p>Grade-II (B) In addition to the above, extension of Additional building in the same plot or compound, in certain circumstances be allowed, provided that, the extension/additional building is in harmony with (and does not detract from) the existing heritage buildings or precincts especially in terms of height, and facade.</p>	<p>External, internal changes and adaptive reuse would by and large be allowed. Changes can include extensions, and additional buildings in the same plot or compound. However any changes should be such that they do not detract from the existing heritage building/ precinct.</p>

(D) Procedure		
Development permission for the changes would be given by the Metropolitan Commissioner on the advice of the Heritage Conservation Committee.	Development permission for the changes / additional construction would be given by the Metropolitan Commissioner on the advice of Heritage Conservation	Development permission for the changes / additional construction would be given by the Metropolitan Commissioner on the advice of the Heritage Conservation Committee.
(E) Vistas/ Surrounding Development		
All developments in areas surrounding Heritage Grade-I shall be regulated and controlled by ensuring that it does not mark the grandeur of or view from Heritage Grade-I		

43.9 Signs and outdoor display structures

No display or advertising signs and outdoor display structures on listed building and / or the Heritage Precincts shall be permitted except accordance with part X (sign and outdoor display structure) National Building Code of India.

Prohibition of advertising signs and outdoor display structure in certain cases :

Notwithstanding the provisions mentioned above no advertising sign or outdoor display structures shall be permitted on buildings of architectural aesthetic historic or heritage importance as may be decided by the Metropolitan Commissioner, Committee or on Government buildings, save that in the case of Government buildings only advertising signs or outdoor display structures may be permitted if they relate to the activities for the said buildings' own purposes or related programs.

Provided that, if the Heritage Conservation Committee so advises, the Metropolitan Commissioner shall refuse permission for any sign or outdoor display structure.

43.10 Composition of Heritage Conservation Committee

There shall be Heritage Conservation Committee for the PMR. This Committee shall be constituted by the Metropolitan Commissioner. The committee shall comprise of the following members:

i)	Chairman Appointed by the Government	Chairman
ii)	Divisional/ District officer of Archaeological Survey of India	Member
iii)	Divisional/ District officer of Archaeological Survey of Maharashtra	Member
iv)	Joint Director, Town Planning, Pune Division	Member
v)	Conveyor INTAC Pune Chapter	Member
vi)	Heritage Conservation Architect having 10 years of experience and membership of the Council of Architecture	Member
vii)	Historian having experience of 10 years in the field of History.	Member

viii)	Structural Engineer having experience of 10 years and member of Institution of Engineers.	Member	
ix)	Chief Engineer, PMRDA	Member	
x)	Metropolitan Planner, PMRDA	Member secretary	

The tenure of the Members of categories (vi) to (viii) above shall change after every three years provided however that, the same person shall be eligible for reappointment as Member.

The Heritage Conservation Committee shall come into existence with effect from the date of its publication in the official Gazette.

No act of the Committee done in good faith, shall be deemed to be invalid by reason only of some defect subsequently discovered in the organization of the Committee or in the Constitution of the Committee or in the appointment of the Member or on the ground that such member was disqualified for being appointed.

The Chairman and in his absence the chosen Member of the Committee shall preside over the meeting of the Committee.

43.11 The Terms of reference of the Committee :-

- (i) To consider whether development permission should be granted under this Regulation and the conditions of such permission.
- (ii) To prepare a list or supplementary list of building artefacts, structures, areas precincts of historic aesthetic architectural cultural significance and a supplementary list of natural features of environmental significance including scared groves, hills, hillocks etc. water bodies (and the areas adjoining the same) to which this regulation would apply.
- (iii) To consider whether any relaxation, modification, alteration, or variance of any of the Development Control and Promotion Regulations is called for.
- (iv) To suggest amendments, changes or special regulations or modification to regulations for listed buildings and the heritage precincts regulated under these regulations
- (v) To consider on the extent of Development Rights to be granted to the owners of listed Building of the Heritage Precincts.
- (vi) To consider whether Development Rights Certificates may be allowed to be consumed in a heritage precinct.
- (vii) To consider whether to allow commercial /office user of any listed building of Heritage Precincts and when to terminate the same.
- (viii) To regulate erection of outside advertisement/bill boards.
- (ix) To recommend guidelines to be adopted by those private parties who sponsor beautification schemes at public intersection and elsewhere.
- (x) To evaluate the cost of repairs to be given to the owners to bring the existing building back to the original condition. For this purpose, the Committee may suggest ways to raise funds through private sources.
- (xi) To prepare special designs and elements and guidelines for listed buildings and control of height and essential façade characteristics such as maintenance of the buildings and to suggest suitable design adopting new materials for replacements keeping the old form intact to the extent possible.
- (xii) To prepare guideline relating to design elements and conservation principles to be adhered to and to prepare other guideline for the purpose of this regulation.
- (xiii) To consider any other issue as may be required from time to time during course of scrutiny of development permissions and in overall interest of heritage/environmental conservation.

In the absence of Heritage Conservation Committee, the Metropolitan Commissioner shall accord development permissions based on these Regulations.

43.12 Heritage Conservation Fund

1. Heritage buildings included in the said list shall be maintained by the owners of the said buildings themselves, with a view to give monetary help for such maintenance/repairs a separate fund may be created which would be kept at the disposal of the Metropolitan Commissioner, PMRDA, who will utilise these funds on the advice of the Heritage conservation Committee. The commissioner may, in such cases disburse appropriate amount to the owner or may get maintenance/ repair work done through PMRDA.
2. 2% of total development charges collected shall be transferred to the Heritage conservation fund.
3. The Metropolitan Commissioner shall have right to remove any unauthorized construction in the property enlisted as heritage property as an encroachment for the PMR land and recover the expenses of such removal/ demolition work form the owner as arrears of land revenue.
4. The Metropolitan Commissioner shall have right to enter into any such heritage property to repair such property to avoid any damage or injury, and the amount shall be spent from Heritage Conservation Fund and shall be recovered from the owner as arrears of Land Revenue.
5. If Heritage structure listed in Grade I needs conservation, preservation and immediate repairs and if the structure is affected due to vandalism by occupier/ owner, then the Metropolitan commissioner shall have right to acquire such heritage property and conserve its heritage value.

44.0 Mining or Quarrying Operations: With the prior approval of the Metropolitan Commissioner, PMRDA, Mining or Quarrying operations may be permitted in Agriculture/No Development Zone on following conditions:

- i) In areas within the region such pits and holes created in the process of mining and quarrying should be appropriately filled up and not left open.
- ii) The site shall be restored so as to make it safe either by raising a garden or in addition by planting fruit growing trees around it or by making it a water reservoir.
- iii) Mining & quarrying operation should be in a controlled manner, such as starting operation initially on a site away from crowded areas and later gradually extending it to the other
- iv) Hill tops and hill slopes from which rain water flow should not be allowed to be used for mining and quarrying.
- v) The natural landscape and environment are not to be adversely affected.
- vi) Quarrying shall be regulated in accordance with the method to be prescribed by the Metropolitan Commissioner, PMRDA
- vii) Regulations prescribed by the Revenue authorities regarding the resettlement and restoration of environment shall be strictly followed.
- viii) Quarrying shall not be permitted within 500m from the goathan / village settlements and from the rivers, forts, historical places and places of tourist interest.
- ix) The conditions prescribed under Maharashtra Minor Mineral Extraction Rules and Regulations shall be observed.

45.0 ERECTION OF MOBILE TOWERS:

Regulation for setting up of Telecommunication Cell Site(s)/Base Station(s) and installation of the equipments for Telecommunication Network in PMR area shall be as per **Appendix-O**.

PART – X
ACQUISITION / DEVELOPMENT OF RESERVED SITES IN REGIONAL
/ DEVELOPMENT PLAN

46.0 TRANSFERABLE DEVELOPMENT RIGHTS (TDR)

46.1 Transferable Development Rights (TDR) is compensation in the form of Floor Space Index (FSI) or Development Rights which shall entitle the owner for construction of built-up area subject to provisions in this regulation. This FSI credit shall be issued in a certificate which shall be called as Development Right Certificate (DRC).

Development Rights Certificate (DRC) shall be issued by Metropolitan Commissioner under his signature and endorse thereon in writing in figures and in words, the FSI credit in square meters of the built-up area to which the owner or lessee is entitled, the place from where it is generated and the rate of that plot as prescribed in the Annual Statement of Rates issued by the Registration Department for the concerned year.

46.2 CASES ELIGIBLE FOR TRANSFERABLE DEVELOPMENT RIGHTS (TDR):-

Compensation in terms of Transferable Development Rights (TDR) shall be permissible for:

- i) lands under various reservations for public purposes, new roads, road widening etc. which are subjected to acquisition, proposed in Draft or Final Regional/Development Plan, prepared under the provisions of the Maharashtra Regional and Town Planning Act, 1966;
- ii) lands under any deemed reservations according to any regulations prepared as per the provisions of Maharashtra Regional & Town Planning Act, 1966;
- iii) lands under any new road or road widening proposed under the provisions of PMRDA;
- iv) development or construction of the amenity on the reserved land;
- v) unutilized FSI of any structure or precinct which is declared as Heritage structure or Precinct under the provisions of Development Control and Promotion Regulations, due to restrictions imposed in that regulation;
- vi) in lieu of constructing housing for slum-dwellers according to regulations prepared under the Maharashtra Regional & Town Planning Act, 1966;
- vii) The purposes as may be notified by the Government from time to time, by way of, modification to, new addition of, any of the provisions of sanctioned Development Control and Promotion Regulations.

46.3 CASES NOT ELIGIBLE FOR TRANSFERABLE DEVELOPMENT RIGHTS (TDR):-

It shall not be permissible to grant Transferable Development Rights (TDR) in the following circumstances: -

- i) For earlier land acquisition or development for which compensation has been already paid partly or fully by any means;
- ii) where award of land has already been declared and which is valid under the Land Acquisition Act, 1894 or the Right to Fair Compensation & Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 unless lands are withdrawn from the award by the Appropriate Authority according to the provisions of the relevant Acts;
- iii) in cases where layout has already been sanctioned and layout roads are incorporated as Regional/Development Plan roads prior to these regulations;
- iv) in cases where layout is submitted along with proposed Regional/Development Plan Road, in such cases TDR shall not be permissible for the width of road that would be necessary according to the length as per Development Control and Promotion Regulations;
- v) if the compensation in the form of FSI / or by any means has already been granted to the owner;
- vi) where lawful possession including by mutual agreement /or contract has been taken;
- vii) for an existing user or retention user or any required compulsory open space or recreational open space or recreational ground, in any layout;
- viii) For any designation, allocation of the use or zone which is not subjected to acquisition.

46.4 GENERATION OF THE TRANSFERABLE DEVELOPMENT RIGHTS (TDR)

46.4.1 Transferable Development Rights (TDR) against surrender of land: -

- a) For Surrender of the gross area of the land which is subjected to acquisition, free of cost and free from all encumbrances, the owner shall be entitled for TDR or DR irrespective of the FSI permissible or development potential of the very said land to be surrendered and also that of land surrounding to such land at the rate as given below:-

Area Designated on DP	Entitlement for TDR/DR
Non-congested Area	2 times the area of surrendered land.
Congested Area	3 times the area of surrendered land.

(Explanation: Above entitlement may also be applicable to the compensation paid in the form of FSI to the owner to be utilised on unaffected part of same land parcel and in such cases the procedure of DRC shall not be insisted.)

Provided that, if levelling of land and construction/erection of the compound wall / fencing as per Clause No.46.4.1.b to the land under surrender is not permissible as per the prevailing Development Control and Promotion Regulations, the quantum of TDR shall be reduced to 1:1.85 and 1:2.85 in non-congested area and congested area respectively.

Provided also that Additional / incentive Transferable Development Rights (TDR) to the extent of 20 %, 15 % , 10 % and 5% of the surrendered land area shall also be allowed to the land owners who submit the proposal for grant of Transferable Development Rights (TDR) within 1, 2 ,3 years and 5 years from the TDR notification respectively.

Provided that the quantum of generation of TDR as prescribed above, shall not be applicable for TDR generated from construction of amenity or construction of reservation/roads, Slum TDR, and Heritage TDR. Also the quantum of Transferable Development Rights (TDR) generated for reservation in CRZ/BDP/HTHS areas or in areas which have some natural or legal constraint on development shall be as decided by the Government separately.

- b) DRC shall be issued only after the land is surrendered to the PMRDA, free of cost and free from encumbrances and after levelling the land to the surrounding ground level and after constructing / erecting a 1.5 m. high compound wall / fencing i.e. brick/stone wall up to 0.60 m. above ground level and fencing above that up to remaining height with a gate, at the cost of the owner and to the satisfaction of the Metropolitan Commissioner. Provided that, if on certain lands such construction / erection of compound wall / fencing is prohibited or restricted by any regulation, then quantum of Transferable Development Rights (TDR) shall be reduced as prescribed in proviso to Clause 46.4.1.a.

Provided further that, such construction / erection of compound wall/ fencing shall not be necessary for area under Regional/Development Plan roads. In such cases TDR equivalent to entitlement as mentioned in Regulation No. 46.4.1.a shall be granted without any reduction.

- c) If any contiguous land of the same owner/developer, in addition to the land under surrender for which Transferable Development Rights (TDR) is to be granted, remains unbuildable, the Metropolitan Commissioner may grant Transferable Development Rights (TDR) for such remaining unbuildable land also if the owner / developer hands it over free of cost and free from all encumbrance and encroachment. If such land is from the proposed roads then such land shall be utilised for road side parking, garden, open space or road side amenities including bus bays, public toilets or any compatible user as the Commissioner may decide and if the such land is from the proposed reservation then same shall be included in such proposed reservation and

shall be developed for the same purpose. The Metropolitan Commissioner shall quarterly report such cases to Government.

- d) In case of lessee, the award of Transferable Development Rights (TDR) shall be subject to lessee paying the lessor or depositing with the Planning Authority for payment to the lessor, an amount equivalent to the value of the lessors' interest to be determined by the Planning Authority on the basis of Land Acquisition Act, 1894 or the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 against the area of land surrendered free of cost and free from all encumbrances.

46.4.2 Transferable Development Rights (TDR) against Construction of Amenity-

When an owner or lessee with prior approval of Metropolitan Commissioner, may develop or construct the amenity on the surrendered plot or on the land which is already vested in the Planning Authority, at his own cost subject to such stipulations as may be prescribed and to the satisfaction of the Metropolitan Commissioner and hands over the said developed/constructed amenity free of cost to the Metropolitan Commissioner then he may be granted a Transferable Development Rights (TDR) in the form of FSI as per the following formula:-

Construction Amenity TDR in sq.m. = A/B * 1.25

Where,

A= cost of construction of amenity in rupees as per the rates of construction mentioned in Annual Statement of Rates (ASR) prepared by the Inspector General of Registration for the year in which construction of amenity is commenced.

B = land rate per sq.m. as per the Annual Statement of Rates (ASR) prepared by the Inspector General of Registration for the year in which construction of amenity is commenced.

46.5 UTILISATION TRANSFERABLE DEVELOPMENT RIGHTS (TDR):--

- 46.5.1** A holder of DRC who desires to use FSI credit therein on a particular plot of land shall attach valid DRCs to the extent required with his application for development permission. Proposal for Transferable Development Rights (TDR) utilisation shall be submitted alongwith the documents as may be prescribed by the Commissioner or by the Government from time to time.
- 46.5.2** With an application for development permission, where an owner seeks utilisation of DRC, he shall submit the DRC to the Metropolitan Commissioner who shall endorse thereon in writing in figures and words, the quantum of the TDR proposed to be utilised, before granting development permission. Before issuance of Occupation Certificate, the Commissioner shall endorse on the DRC, in writing in figures and words, the quantum of TDR/DRs actually used and the balance remaining if any.
- 46.5.3** The Transferable Development Rights (TDR) generated from any land use zone shall be utilised on any receiving plot irrespective of the land use zone and anywhere in congested or non-congested area earmarked on Regional/Development Plan. The equivalent quantum of Transferable Development Rights (TDR) to be permitted on receiving plot shall be governed by the formula given below:-

Formula: X = (Rg / Rr) x Y

Where, X = Permissible Utilisation of TDR/DR in sq.m. on receiving plot

Rg = Rate for land in Rs. per sq.m. as per ASR of generating plots in generating year

Rr = Rate for land in Rs. per sq.m. as per ASR of receiving plot in generating year

Y = TDR debited from DRC in sq.m.

46.5.4 Utilisation of Transferable Development Rights (TDR) and Road Width Relation:-

- 1) Notwithstanding anything contained in any regulation, the total maximum permissible built-up area and utilisation of Transferable Development Rights (TDR) on receiving plot shall be, subject to the road width, as prescribed below:-

Sr. No.	Plots Fronting on Road width	Maximum permissible TDR Loading
1	2	3
1	Below 9mt	0.20
2	9 mt and up to but less than 12mt	0.40
3	12mt and above but less than 15mt	0.60
4	15 mt and above but less than 24 mt	0.75
5	24 mt and above but less than 30 mt.	0.90
6	30 mt and above	1.00

Note:-

- i) Column No.3 shows the maximum permissible TDR that can be utilised on any plot;
 - ii) Maximum Building potential mentioned in Table No. 4 and 7 Column No.6 shall includes the basic FSI, allowable TDR, Additional FSI if any, Road widening FSI of the very said plot if any. However, the Metropolitan Commissioner shall not grant any relaxation due to such allowable loading potential unless he himself satisfied that there is constraint on development;
 - iii) If a plot is situated on internal road having dead end within 60 mt. from the main road, then such plot shall be treated as fronting on main road for the purpose of utilisation of TDR.
- 2) Provided that, the restrictions of total maximum permissible built up area in terms of FSI with respect to road width mentioned above shall not be applicable in cases where, the permissible FSI is more than the basic FSI in various schemes, like Metro Influence Zone BRTs, TODs etc. where specific provisions which are sanctioned by the Government shall apply.
 - 3) Provided that, the additional FSI permissible in certain categories of buildings such as, Educational building, Registered Charitable Institutional/ Medical / Hospital Building, Star Category Hotel, Religious Building etc. as per prevailing Development Control and Promotion Regulations, if any, can be availed either by full or part utilization of TDR or full or part utilization of additional FSI at the option of owner. However, the restriction of road width mentioned as above shall not be applicable when the owner exercises his option of availing utilization of additional FSI and in such cases limitation of maximum building potential as mentioned above shall not be applicable.
 - 4) The utilisation of Transferable Development Rights (TDR) shall be permissible by considering Gross Plot Area excluding area affected by reservations or deemed reservation, if any.

5) Areas Restricted from Utilisation of Transferable Development Rights (TDR) :-

Utilisation of Transferable Development Rights (TDR) shall not be permitted in following areas:-

- a) Agricultural / no development / Green belt/ Afforestation/ HTHS Zone in the Regional Plan provided that lands developable as per Gaothan Expansion and Zone Change Policy shall be eligible for utilization of TDR.
- b) Area within the flood control line i.e. blue line (prohibitive zone) as specified by Irrigation Department.
- d) Where the permissible basic Zonal FSI is less than 0.75.
- e) Area having developmental prohibition or restrictions imposed by any notification issued under the provisions of any Central/State Act (Defence restriction areas etc.) or under these regulations.

46.6 GENERAL STIPULATION:-

46.6.1 Development Rights (DRs) will be granted to an owner or lessee, only for reserved lands which are retainable and not vested or handed over to the Government /Urban Local Bodies and not exempted under section 20 or 21 of the then Urban Land (Ceiling and Regulations) Act, 1976 and undertaking to that effect shall be obtained, before a Development Right is granted. In the case of schemes sanctioned under section 20 or 21 of the said Act, the grant of Development Rights (DRs) shall be to such extent and subject to the conditions mentioned in section-20 scheme and such conditions as the Government may prescribe. In case of non-retainable land, the grant of Development Rights shall be to such extent and subject to such conditions as the Government may specify. The provisions of this Regulation shall be subject to the orders issued by the Government from time to time in this regard.

Provided that, in case of lands having tenure other than Class-I, like Inam lands, tribal lands etc., N.O.C. from Competent Authority, mentioning

- i) share of Government and land holder
- ii) transfer of such land in the name of Planning / Appropriate Authority, shall be produced by the land holder at the time of submission of application for grant of TDR.

46.6.2 DRC shall be issued by the Metropolitan Commissioner as a certificate printed on bond paper in an appropriate form prescribed by him. Such a certificate shall be a —transferable and negotiable instrument after the authentication by the Metropolitan Commissioner. The Metropolitan Commissioner shall maintain a register in a form considered appropriate by him of all transactions, etc. relating to grant of, or utilisation of, DRC.

46.6.3 The Metropolitan Commissioner shall issue DRC within 180 days from the date of application or reply from the applicant in respect of any requisition made by him, whichever is later.

46.6.4 Transfer of DRC-

- 1) The Metropolitan Commissioner shall allow transfer of DRC in the following manner
 - i) In case of death of holder of DRC, the DRC shall be transferred only on production of the documents as may be prescribed by him from time to time, after due verification and satisfaction regarding title and legal successor;
 - ii) If a holder of DRC intends to transfer it to any other person, he shall submit the original DRC to the Metropolitan Commissioner with an application alongwith relevant documents as may be prescribed by the Metropolitan Commissioner and a registered agreement which is duly signed by Transferor and Transferee, for seeking endorsement of the new holders name, i.e., the transferee, on the said certificate. The transfer shall not be valid without endorsement by the Metropolitan Commissioner and in such circumstances the Certificate shall be available for use only to the holder /transferor.
- 2) The utilisation of TDR from certificate under transfer procedure shall not be permissible, during transfer procedure.

46.6.5 The Metropolitan Commissioner may refrain the DRC holder from utilizing the DRC in the following circumstances:-

- i. Under direction from a competent Court.

- ii. Where the Metropolitan Commissioner has reason to believe that the DRC is obtained
 - a) by producing fraudulent documents;
 - b) by misrepresentation.

46.6.6 Any DRC may be utilised on one or more plots or lands whether vacant, or already developed fully or partly by erection of additional storeys, or in any other manner consistent with the prevailing Development Control and Promotion Regulations.

46.6.7 DRC may be used on plots/land having Regional/Development Plan reservations of buildable nature, whether vacant or already developed for the same purpose, or on the lands under deemed reservations, if any, as per prevailing Regulations.

46.6.8 Infrastructure Improvement Charges-

The utilizer shall pay to the PMRDA, an infrastructure improvement charges, for a proposed quantum of TDR to be utilised, at the rate of 5% of construction cost as per the prevailing Annual Statement of Rates.

47.0 VESTING OF LAND :-

47.1 The Metropolitan Commissioner, before issuing DRC, shall verify and satisfy himself that the ownership and title of the land proposed for surrender is with the applicant, and get the Record of Right to be corrected in the name of PMRDA.

PART XI
SUPPLEMENTARY AND MISCELLANEOUS PROVISIONS

48.0 CLARIFICATION

If any question or dispute arises with regards to interpretation of any of these regulations, the matter shall be referred to the Government, who after considering the matter and after giving hearing to the parties, if necessary, shall give a decision on the interpretation of the provisions of these Regulations. The decision of the Government, on the interpretation of these Regulations, shall be final and binding on the concerned party or parties.

49.0 Power to delegate: The Metropolitan Commissioner, PMRDA may, by an order, delegate any of the powers under these Regulations, exercisable by him, subject to such conditions, as he may consider appropriate, to any officer of the PMRDA not below the rank of Town planner, PMRDA.

50.0 Appeals: Deleted.

APPENDICES, PROFORMAS AND ANNEXURES

APPENDIX A-1**FORM FOR CONSTRUCTION OF BUILDING OR LAYOUT OF BUILDING / GROUP HOUSING**

Application for permission for development under Section 44 / 58 of The Maharashtra Regional and Town Planning Act, 1966.

From _____
(Name of the owner)

To,
The Metropolitan
Commissioner, PMRDA

Sir,

I intend to carry out the under mentioned development in the site/plot of land, on Plot No..... Town and Revenue S.No.....City Survey No.....Maujesituated at Road / Street Societyin accordance with Section 44 / 58 of the Maharashtra Regional and Town Planning Act, 1966.

I forward herewith the following plans and statements (Item i to ix) wherever applicable, in quadruplicate, signed by me (Name in block letters)and the Architect / Licensed Engineer / Structural Engineer / Supervisor, (License No.....), who has prepared the plans, designs and a copy of other statements /documents as applicable

- i)** Key Plan (Location Plan), (to be shown on first copy of the set of plans)
- ii)** Site Plan showing the surrounding land and existing access to the land proposed to be developed; (to be shown on first copy of the set of plans)
- iii)** A detailed building plan showing the plan, section and elevations of the proposed development work along with existing structure to be retained/ to be demolished, if any;
- iv)** Particulars of development in Form enclosed (to be submitted for development other than individual buildings);
- v)** Copy of sanctioned layout plan if any;
- vi)** An extract of record of rights, property register card (any other document showing ownership of land to be specified) alongwith consent of co-owners where third party interest is created;
- vii)** Attested copy of receipt of payment of scrutiny fees;
- viii)** Latest property tax receipt;
- ix)** No Objection Certificate(s), wherever required.

I request that the proposed development/ construction may be approved and permission be accorded to me to execute the work.

**FORM GIVING PARTICULARS OF DEVELOPMENT
(Item iv of Appendix A-1)**

1.	(a) (i) Full Name of Applicant	-----
	(ii) Address of applicant	-----
	(iii) e-mail ID	-----
	(iv) Contact / Mobile No.	-----
	(b)(i) Name and address of Architect/ licensed Engineer/ Structural Engineer/ Supervisor employed.	-----
	(ii) No. and date of issue of License	-----
2.	(a) Is the plot of, a City Triangulation Survey Number, Revenue Survey Number or Hissa Number of a Survey Number or a Final Plot Number of a Town Planning Scheme or a plot of an approved layout?	
	(b) Please state Sanction Number and Date of Sub-division / Layout	
	(c) Whether the land is situated in Core Area or Outside Core Area?	
3.	(a) What is the total area of the plot according to the ownership document and measurement plan?	-----
	(b) Does it tally with The Revenue/CTS Record	-----
	(c) What is the actual area available on site measured by Architect/licensed Engineer/Structural Engineer / Supervisor? (The permission shall be based on the area whichever is minimum.)	-----
	(d) Is there any deduction in the original area of the plot on account of D.P. Roads, or reservation(s). If so, are they correctly marked on the site plan? Please state the total area of such deductions?	-----
	(e) Is there any water stream in the land? State the area of such land.	
	(e) What is the area remained for development after above deduction(s)?	-----
	(f) What is the area proposed for recreational open space? (in case of land having original holding more than 0.4 hecter) Please mention the area.	
	(g) Whether amenity space as required under Regulation no.13.4 is left? Please mention the area.	
	(f) What is the net plot area as per Regulation no.13.8? (excluding (g) above)	
4.	Are all plans as required under Regulation no.6.2 enclosed?	
5.	(a) In what zone does the plot fall?	-----
	(b) For what purpose the building is proposed? Is it permissible according to the land use	

	classification?	
6.	(a) Is road available as an approach to the land? What is the average existing width of the road? (If the plot abuts on two or more roads, the above information in respect of all roads should be given)	
	(b) Is the land fronting on D.P. road? If so, width of the D.P. road	
	(c) Is the land fronting on National or State highway? If so, is the Building line / control line maintained? Please state the distance.	
	(c) What is the height of the building above the average ground level of the plot?	
	(d) Is it within permissible limit of height specified in Regulation no. 15.9 i.e. 1.5 times of the road width plus front margin?	
	(e) Does height exceed the limit specified in (d) above? If so, is height approved by Director of Fire Services, M.S.?	
7.	Is the land subject to restrictions of blue / red flood line, airport, railway, electric line, land fill sites, archaeology, etc.? Please state the details along with _No objection certificate 'if any.	
8.	(a) If there are existing structures on the plot	
	(i) Are they correctly marked and numbered on the site plan?	
	(ii) Are those proposed to be demolished immediately and hatched in yellow colour?	
	(iii) What is the plinth area and total floor area of all existing structures to be retained? (Please give details confirming to the plan submitted)	
9.	Is balcony area within the permissible limit of 15 %? State said balcony area and area counted in FSI.	
10.	Are double height terrace within the limit of 20%? Are they of supported type? State said double height terrace area and area counted in FSI.	
11.	(a) Please state the total built up area, (existing + proposed + extra balconies + extra double height terraces.)	
	(b) What is the basic permissible F.S.I. of the zone according to front road width?	
	(c) What is the premium FSI proposed to be consumed?	
	(d) What is the area of TDR proposed to be consumed?	
	(e) What is the additional FSI proposed to be consumed?	
	(f) Please state the overall F.S.I. utilised in the proposal?	

	(g) Is built-up area of each flat / unit mentioned on the plan?				
12.	Whether area for inclusive housing is required as per Regulation no.13.7? Please state the details.				
13.	(a) What is the width of the front marginal distance (s)? If the building abuts two or more roads, does the front marginal distance comply with Regulation?				
14.	(a) What is :	Permissible	Proposed		
	(i) the side marginal distance (s)?				
	(ii) the rear marginal distance (s)?				
	(iii) the distance between buildings?				
15.	(a) What are the dimensions of the inner or outer chowk?				
	(b) Is / are room (s) dependent for its light and ventilation on the chowk? If so, are the dimensions of the chowk as required?				
16.	(a) Whether sizes of the rooms comply with the dimensions mentioned in the regulations?				
	(b) Whether use of every room / part mentioned on the plan?				
	(c) Whether every room derives light and ventilation required under the regulations?				
17.	If the height of the building is more than 15 meter above the average ground level, is provision for lifts made?				
	(a) If so, give details of lift.	Passenger Capacity	No. of Lifts		
	(b) Details of Fire Lift.	Passenger Capacity	No. of Lifts		
18.	(a) Does the building fall under purview of Regulation no.6.2.6.1?				
	(b) If so, is fire escape staircase provided in addition to regular staircase?				
	(c) Whether the ramps to the basement are provided leaving 6 m marginal distance for movement of fire fighting vehicle?				
	(d) If podiums are proposed, does it allow the movement of fire fighting vehicle properly?				
19.	(a) What are the requirements of parking spaces under the Regulation no.20? How many are proposed?		Required	Proposed	
		Car			
		Scooter			
	(b) (i) Are loading-unloading spaces necessary?				
		(ii) If so, what is the requirement?			
		(iii) How many are proposed?			

20.	Is the sanitary arrangement provided as per the regulation?	
21.	Details of the source of water to be used in the construction	
22.	Distance from the sewer.	
23.	Please explain in detail in what respect the proposal does not comply with the Development Control and Promotion Regulations and the reasons there for, attaching a separate sheet if necessary.	

I hereby declare that I am the Architect/ licensed Engineer/ Structural Engineer/ Supervisor employed for the proposed work and that the statements made in this form are true and correct to the best of my knowledge.

APPENDIX A-2**FORM FOR SUB-DIVISION OF LAND AS PLOTTED LAYOUT**

Application for permission for development under Section 44 / 58 of The Maharashtra Regional and Town Planning Act, 1966.

From
(Name of the owner)

To,
The Metropolitan
Commissioner, PMRDA.

Sir,

I intend to carry out the under mentioned development in the site/plot of land, bearing S.No./Gut No. City Survey No....., Mouje, situated at Road/ Street in accordance with Section 44/58 of The Maharashtra Regional and Town Planning Act, 1966.

I forward herewith the following plans and statements (Item 1 to 6) wherever applicable, in quadruplicate, signed by me (Name in block letters) and the Architect / Licensed Engineer / Structural Engineer / Supervisor (License No.....), who has prepared the plans, designs and a copy of other statements /documents as applicable (Items 7 to 10).

- (1) Key Plan (Location Plan);(to be shown on first copy of the set of plans)
- (2) Site Plan showing the surrounding land and existing access to the land included in the layout;(to be shown on first copy of the set of plans)
- (3) A layout plan showing,
 - (i) sub-divisions of the land or plot with dimensions and area of each of the proposed sub-divisions and its use according to prescribed regulations;
 - (ii) width of the proposed streets; and
 - (iii) dimensions and area of recreational open spaces provided in the layout.
 - (iv) dimensions and area of amenityspace provided in the layout.
- (4) An extract of record of rights property register card (any other document showing ownership of land to be specified) alongwith consent of co- owners where third party interest is created.
- (5) Particulars of development in Form enclosed.
- (6) Attested copy of Receipt for payment of scrutiny fees.
- (7) No Objection Certificate, wherever required.

I request that the proposed layout may please be approved and permission accorded to me to execute the work.

viii)	Toilet for Disabled	1 per 4000	1 per 4000	1 per 4000	1 per 4000	1 per 4000 (Minimum 1)	1 per 4000 (Minimum 1)

NOTES:

1) Some WC's may be European style if desired. 2) Male population may be assumed as three-fifth and female population as two-fifth. 3) Separate provision shall be made for staff and workers.

APPENDIX 'N ' PROVISIONS FOR BARRIER FREE ACCESS

Provisions for Barrier Free access in buildings for differently abled persons shall be as given below

1 Definitions

- 1.1 Non-ambulatory Disabilities:** – Impairments that, regardless of cause or manifestation, for all practical purposes, confine individuals to wheelchairs.
- 1.2 Semi - ambulatory Disabilities:** - Impairments that cause individuals to walk with difficulty or insecurity, individuals using braces or crutches, amputees, arthritics, spastics, and those with pulmonary and cardiac ills may be semi-ambulatory.
- 1.3 Hearing Disabilities:-** Deafness or hearing handicaps that might make an individual insecure in public areas because he is unable to communicate or hear warning signals.
- 1.4 Sight Disabilities:** - Total blindness or impairments, which affect sight to the extent that the individual, functioning in public areas, is insecure or exposed to danger.
- 1.5 Wheel Chair:** - Chair used by disabled people for mobility. The standard size of wheel chair shall be taken as 1050 mm x 750 mm.

2 Scope:-These regulations are applicable to all buildings and facilities used by the public such as educational, institutional, assembly, commercial, business, mercantile buildings constructed on plot having an area of more than 2000 sq.m. It does not apply to private and public residences.

3 Site development:-Level of the roads, access paths and parking areas shall be described in the plan along with specification of the materials.

3.1 Access Path / Walk Way: - Access path from plot entry and surface parking to building entrance shall be minimum 1800 mm wide having even surface without any steps. Slope, if any, shall not have gradient greater than 5%. Selection of floor material shall be made suitably to attract or to guide visually impaired persons (limited to coloured floor material whose colour and brightness is conspicuously different from that of the surrounding floor material or the material that emits different sound to guide visually impaired persons; hereinafter referred to as —guiding floor material). Finishes shall have a non-slip surface with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.

3.2 Parking: For parking of vehicles of differently abled people, the following provisions shall be made-

- i) Surface parking for two car spaces shall be provided near entrance, with maximum travel distance of 30.0 m. from building entrance.
- ii) The width of parking bay shall be minimum 3.6 meter.
- iii) The information stating that the space is reserved for wheel chair users shall be conspicuously displayed.
- iv) Guiding floor materials shall be provided or a device, which guides visually impaired persons with audible signals, or other devices, which serves the same purpose, shall be provided.

4 Building requirements

The specified facilities for the buildings for differently abled persons shall be as follows:

- i) Approach to plinth level
- ii) Corridor connecting the entrance/exit for the differently abled.
- iii) Stair-ways
- iv) Lift
- v) Toilet
- vi) Drinking Water

4.1 Approach to plinth level - Every building should have at least one entrance accessible to the differently abled and shall be indicated by proper signage. This entrance shall be approached through a ramp together with the stepped entry.

4.1.1 Ramped Approach – Ramp shall be finished with non-slip material to enter the building. Minimum width of ramp shall be 1800mm with maximum gradient 1:12. Length of ramp shall not exceed 9.0 meter having 800mm high hand rail on both sides extending 300mm beyond top and bottom of the ramp. Minimum gap from the adjacent wall to the hand rail shall be 50mm.

4.1.2 Stepped Approach:- For stepped approach size of tread shall not be less than 300mm and maximum riser shall be 150mm. Provision of 800mm high hand rail on both sides of the stepped approach similar to the ramped approach.

4.1.3 Exit/Entrance Door:- Minimum & clear opening of the entrance door shall be 900mm and it shall not be provided with a step that obstructs the passage of a wheel chair user. Threshold shall not be raised more than 12mm.

4.1.4 Entrance Landing:- Entrance landing shall be provided adjacent to ramp with the minimum dimension 1800mm x 2000mm. The entrance landing that adjoins the top end of a slope shall be provided with floor materials to attract the attention of visually impaired persons (limited to coloured floor material whose colour and brightness is conspicuously different from that of the surrounding floor material or the material that emits different sound to guide visually impaired persons hereinafter referred to as —guiding floor material). Finishes shall have a non-slip surface with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.

4.2 Corridor connecting the entrance / exit for the differently abled: The corridor connecting the entrance / exit for differently abled, leading directly outdoors to a place where information concerning the overall use of the specified building can be provided to visually impaired persons either by a person or by signs, shall be provided as follows:

- a) ‘Guiding floor materials’ shall be provided or device that emits sound to guide visually impaired persons.
- b) The minimum width shall be 1500mm.
- c) In case there is a difference of level, slope ways shall be provided with a slope of 1:12.
- d) Hand rails shall be provided for ramps/slope ways.

4.3 Stair-ways - One of the stair-ways near the entrance / exit for the differently abled shall have the

following provisions:

- a) The minimum width shall be 1350 mm.
- b) Height of the riser shall not be more than 150 mm and width of the tread 300mm. The steps shall not have abrupt (square) nosing.
- c) Maximum number of risers on a flight shall be limited to 12.
- d) Hand rails shall be provided on both sides and shall extend 300 mm on the top and bottom of each flight of steps.

4.4 Lifts -Wherever lift is required as per regulations, provision of at least one lift shall be made for the wheel chair user with the following cage dimensions of lift recommended for passenger lift of 13 person capacity of Bureau of Indian Standards.

Clear internal width	1100 mm
Clear internal width	2000 mm
Entrance door width	900 mm

- a) A hand rail not less than 600mm long at 1000mm above floor level shall be fixed adjacent to the control panel.
- b) The lift lobby shall be of an inside measurement of 1800 mm x 1800 mm or more.
- c) The time of an automatically closing door should be minimum 5 seconds and the closing speed should not exceed 0.25 m/ sec.
- d) The interior of the cage shall be provided with a device that audibly indicates the floor, the cage has reached indicates that the door of the cage of entrance/exit is either open or closed.

4.5 Toilets - One special W.C. in a set of toilets shall be provided for the use of differently abled with essential provision of washbasin near the entrance for them.

- a) The minimum size shall be 1500 mm x 1750 mm.
- b) Minimum clear opening of the door shall be 900mm and the door shall swing out.
- c) Suitable arrangement of vertical/horizontal handrails with 50mm clearance from wall shall be made in the toilet.
- d) The W.C. seat shall be 500mm from the floor.

4.6 Drinking Water:-Suitable provision of drinking water shall be made for the differently abled near the special toilet provided for them.

4.7 Designing for Children - In the buildings meant for the pre-dominant use of the children, it will be necessary to suitably alter the height of the handrail and other fittings & fixtures, etc.

Explanatory notes:

Guiding / Warning Floor Material:

The floor material to guide or to warn the visually impaired persons with a change of colour or material with conspicuously different texture and easily distinguishable from the rest of the surrounding floor materials is called guiding or warning floor material. The material with different texture gives audible signals with sensory warning when a person moves on this surface with walking stick. The guiding/warning floor material is meant to give the directional effect or warn a person at critical places. This floor material shall be provided in the following areas:

- a) The access path to the building and to the parking area.
- b) The landing lobby towards the information board, reception, lifts, staircases and toilets.
- c) Immediately at the beginning/end of walkway where there is a vehicular traffic.
- d) At the location abruptly changing in level or beginning/end of a ramp.
- e) Immediately in front of an entrance/exit and the landing.

Proper signage:

Appropriate identification of specific facilities within a building for the differently abled persons should be done with proper signals. Visually impaired persons make use of other senses such as hearing and touch to compensate for the lack of vision, whereas visual signals benefit those with hearing disabilities.

Signs should be designed and located so that they are easily legible by using suitable letter size (not less than 20 mm high). For visually impaired persons, information board in brail should be installed on the wall at a suitable height and it should be possible to approach them closely. To ensure safe walking, there should not be any protruding sign which creates obstruction in walking. Public Address System may also be provided in busy public areas.

The symbols/information should be in contrasting colour and properly illuminated because people with limited vision may be able to differentiate amongst primary colours. International Symbol Mark for wheel chair be installed in a lift, toilet, staircase, parking areas, etc., that have been provided for the differently abled.

Appendix 'O'

REGULATIONS FOR ERECTION OF MOBILE TOWERS

1.1 ERECTION OF MOBILE TOWERS:

Regulation for setting up of Telecommunication Cell Site(s)/Base Station(s) and installation of the equipments for Telecommunication Network in PMR area.

1.2 Applicability:

This Regulation, shall apply to all existing and/or proposed Telecommunication Cell Sites/Base Stations installed or to be installed in PMR area.

1.3 Control Over Development

No Telecommunication Cell Site/Base Station shall be setup or installed without the previous permission in writing of the Metropolitan Commissioner. The permission shall be granted in the same manner as prescribed under Sections 44 to 47 of the Maharashtra Regional and Town Planning Act, 1966.

If the Metropolitan Commissioner does not dispose of the application within a period of 60 days from the date of submission, the said application by the Telecom Service Provider/Infrastructure Provider (TSP/IP) shall be deemed to have been approved as per the provisions under Section 45 of the Maharashtra Regional and Town Planning Act, 1966.

1.4 Procedure for Obtaining Development Permission

- A** All the applications for setting up or installation of any Telecommunication Cell Site/ Base Station (TCS/BS) or erection of a part thereof, shall be made to the Metropolitan Commissioner by the concerned Telecom Service Provider (TSP) or the concerned Infrastructure Provider (IP), in such form and containing such particulars as may be prescribed by the Metropolitan Commissioner.
- B** The application to the Metropolitan Commissioner for obtaining the aforesaid development permission shall be accompanied by the following documents-
- (a) All the documents as otherwise required to be attached for any development permission under the sanctioned Development Control Regulations for the area in which the site under application is located.
 - (b) Plans showing Location Map, Key Plan, Site Plan, Block Plan and Plans of the proposed work. In case of roof-top tower, the copy of Occupation Certificate or copy of sanctioned building plans or copy of Commencement Certificate issued by the Metropolitan Commissioner or any other valid proof, in respect of the building on which the erection of roof-top tower is proposed, showing that such building is authorised.
 - (c) Notarised consent of the Owner of premises, which shall mean and include consent of the owner of property or no-objection certificate of the concerned registered Co-op Housing Society or notarised consent of 70% of the total number legal occupants in case of Apartments or Condominium or no-objection certificate of the lessor in case of a lease -hold property.
 - (d) Copy of agreement between the TSP/IP and the Owner of premises.
 - (e) Copy of Access Service License/ Infrastructure Provider (IP) Registration Certificate, granted

to the TSP/IP by the Department of Telecommunications (DoT), Government of India (GoI).

- (f) Copy of clearance from the Standing Advisory Committee for Frequency Allocations (SACFA) or copy of application made to SACFA for the said Location submitted to Wireless Planning Commission (WPC) wing of the Department of Telecommunications (DoT), with registration number as WPC Acknowledgement, along with an undertaking that in case of any objection/rejection, TSPs/IPs will take corrective actions or remove the TCS/BS.
- (g) Acknowledgement receipt issued by Telecom Enforcement Resource and Monitoring (TERM) Cells in respect of the self-certificate submitted by TSP/IP regarding mobile towers/Base Transceiver Station (BTS) (Ground-based or Roof-Top or Pole/wall-mounted) in the format as prescribed by Telecom Engineering Centre (TEC), DoT, establishing/certifying that all General Public areas around the TCS/BS will be within safe Electro-Magnetic Radiation (EMR) exposure limit as per peak traffic measurement after the antennae starts radiating.
- (h) Copy of Structural Stability Certificate for any ground-based Base Transceiver Station (BTS).

OR

In case of any roof-top BTS tower, Structural Stability Certificate for the building, based on written approval of any authorized Structural Engineer of the State/local Body/Central Building Research Institute (CBRT), Roorkee/ IIT/ NIT or any other Agency, authorized by the Metropolitan Commissioner.

Provided that such NOC shall not be required for the single pole antennae or cellular signal boosters.

- (i) Copy of the type test certificate issued by Automotive Research Association of India (ARAI) to the manufacturers of the Diesel Generator (DG) Sets.
- (j) Notarised undertaking from the Applicant/Owner of premises :-
 - (i) That the cabin will not be utilized for any purpose other than the Telecommunication Cell Site/Base Station.
 - (ii) That if the said activity is discontinued by the Applicant, the said cabin will be demolished forthwith by the Applicant /Owner of premises.
- (k) No objection certificate from the Authority concerned under the Civil Aviation Ministry (hereinafter referred to as the said Authority) in case of any building falling in any area where such no objection certificate of the said Authority is required under the relevant rules or law.
- (l) No objection certificate of the Maharashtra Pollution Control Board regarding compliance with the norms prescribed for noise levels and smoke levels for the power generating sets having capacity above 100 kw, to be provided for Base Transceiver Stations.
- (m) No objection certificate of the Chief Fire Officer of the PMRDA only in case of High Rise buildings having height of 15 mtr. or more measured from ground level.
- (n) Copy of clearance from the State Environment Department as well as the Forest Department, in case of forest, protected areas, if applicable.
- (o) Data Sheet containing the information regarding –
 - (a) Name of Telecom Service Provider/ Infrastructure Provider,
 - (b) Location,
 - (c) Tower Reference-

- (i) Height and Weight of Tower,
 - (ii) Ground Based Tower/Roof Top Tower,
 - (iii) Number of Antennae planned on Tower,
 - (iv) Permissible maximum EMF Radiation Level,
 - (v) Proposed maximum EMF Radiation Level.
- (p) Requisite fees, charges, as applicable.
- C** In case of a listed Heritage building/ Heritage precinct and/or in case of cessed buildings and/or in case of area under Environmentally Sensitive Zone (ESZ), notified by the Ministry of Environment and Forest (MoEF), Government of India (GoI), all the applications for installation of any TCS/BS or erection of a part thereof, shall be made to the concerned Metropolitan Commissioner, which will forward it to the Heritage Conservation Committee concerned and/or High Level Monitoring Committee (HLMC) appointed/constituted by MoEF respectively.
- D** The erection of the Base Station including tower, shall be commenced within 90 days from the date of receipt of permission from the Metropolitan Commissioner and report of erection shall be made to the Metropolitan Commissioner.

1.5 Leviaible charges

The Metropolitan Commissioner, while granting permission under sub regulation (3) hereinabove, shall levy and collect the following charges:-

- (a) Development Charge.-Development charge shall be levied and collected by the Metropolitan Commissioner as per the provisions under section L24-B of The Maharashtra Regional and Town Planning Act, 1966. For the purpose of assessing the development charge, the setting up of Base Station on land and on roof-tops shall be classified under commercial category, calculated over the foot print area occupied by the Telecommunication Cell Site/Base Station.
- (b) Administrative Fee.-Over and above the development charge as stipulated in clause 4 (a) above, TSP/IP shall pay to the PMRDA, a onetime non-refundable Administrative fee of Rs.30000, or as per the rates revised from time to time by the Government.

1.6 Planning Norms For Erection of TCS/BS

- (a) Notwithstanding the land use provisions under these regulations, subject to the compliance of other provisions of these Regulations, it shall be permissible to install TCB/BS, on
 - (i) all land uses as earmarked in Regional/Development Plan,
 - (ii) all lands which are designated for non-buildable reservations in Regional/Development Plan, subject to the condition that the maximum permissible area for installation of such TCS/BS shall not be more than 5% of the area of the reserved site or 100 sq.m., whichever is less, and shall be located in one corner of the reserved site.
 - (iii) all lands which are designated as open spaces/recreational open spaces/recreational grounds in a sanctioned layout, where such installation shall be permissible only with the no-objection certificate of the concerned registered co-operative housing society or consent of 70% of the total number of legal occupants/plot holders of such layout, subject to the condition that the maximum permissible area for installation of such TCS/BS shall not be more than 5% of such area or 100 sq.m, whichever is less, and the same shall be located in one corner of such area.

- (iv) all buildable reservations in Regional/Development Plan, except for buildings of uses mentioned in Regulation no.36.5(f), where such installation shall be permissible on the roof top, but only after development of the said reservation.
 - (v) all open lands in slum areas belonging to the Government/public Authority planning Authority, where only ground-based TCS/BS shall be permissible and no Roof-Top Tower shall be permissible, save as provided in Regulation no.36.5(a)(vi) herein below.
 - (vi) public buildings in slum areas, like public toilets, community centres etc., constructed by any Public Authority or to be constructed by the TSP/IP, where construction of Roof Top Towers shall be permissible, subject to maintenance and compliance of other terms and conditions specified by the Metropolitan Commissioner.
- (b) No permission for installation of TCS/BS shall be granted in ecologically important areas, without ecological impact assessment and review of installation site. The Forest Department should be consulted before installation of TCS/BS in and-around protected areas and Zoos.
- (c) The TCS/BS must have clear access by means of an existing road having minimum width of 6 mtr. for locations falling in Congested area as earmarked on DP and 9 mtr., for locations falling outside such Congested area. However, in exceptional circumstances, the Metropolitan Commissioner may relax such road width suitably, but in no case, shall it be less than 5 mtr.
- (d) In case of both ground-based towers and roof-top towers, there shall be no nearby buildings right in front of the antenna(e) of equivalent height, taking into account the tilt of the lowest antenna on tower, as per the details in the **Table No. 28** below:-

Table No. 28

Sr. No.	Number of Antenna(e) Pointed in the Same Direction	Building/ Structure Safe Distance from the Antenna(e) at the Same Height (in mtr.)
(1)	(2)	(3)
1	1	20
2	2	35
3	4	45
4	6	55

Provided that the antennae at the same height only are to be counted, as the beam width of mobile antennae, in the vertical direction, is very narrow.

(Explanation.-The distance figures in the above Table are based on empirical estimation considering that all the antennae are emitting at their maximum RF power of 20 Watts and exactly in the same direction with the same height.)

Provided further that above norms shall automatically stand revised as per the latest guidelines, issued by the DoT from time to time.

- (e) In case of Wall Mounted/Pole Mounted Antenna(e) :-
- (i) Wherever the antennae are mounted on the wall of a building or pole or along the road, their height should be at least 5 mtr., above ground level/road level. Provided that such installations shall have to comply with the prescribed radiation limits.

- (ii) As far as safe distance of buildings from antenna(e) is concerned, guidelines as in Regulation no.36.5 (d) above shall apply.
- (f) Installation of Base Station antenna(e) shall not be permissible within the premises of schools, colleges, and hospitals as well as on the adjoining land /building within 3 mtr., from the boundary of premises of schools, colleges and hospitals. Also antenna(e) shall not be directed/ positioned towards any school/college/ hospital building.
- (g) The existing Base Station antenna(e) approved earlier on any school/college/ hospital, building shall not be renewed further after the expiry of period of approval and the same shall be removed immediately thereafter, subject to the provisions of Regulation no.36.7 (d).
- (h) Access to Base Station Antenna site shall be prohibited for the general public, by putting in place suitable measures such as wire-fencing, locking of the door to the roof, etc.
- (i) The roof-top TCS, IBS towers shall be put only on buildings which are declared structurally strong enough to bear the load of such installation. The base connection to the building should be got designed from a qualified structural engineer. Structural safety certificate of the composite structure [Building + Tower(s)] shall have to be obtained from any of the recognized Government Institutes.
- (j) While according permission for installation of TCS/BS, permissible for erection of a cabin at ground level may be granted. However, the same shall not be allowed in the prescribed marginal distances. The area of such cabin shall not be more than 20 sq. mt. for each TSP/IP, subject to the certificate of structural safety. Built-up area of such cabin(s) shall not be counted towards built-up area or FSI.
- (k) No permission for installation of TCS/BS shall be granted on buildings which are unauthorized and structurally unsafe. If permission for installation of such structures is granted on a building, which is declared as unauthorized at a later point of time, the Metropolitan Commissioner shall first take recourse to the provisions of sections 52, 53, 54 and 55 of the Maharashtra Regional and Town Planning Act, 1966 or other relevant laws, as the case may be, against such unauthorized building and in case the Metropolitan Commissioner, after completing the due process of law, decides to undertake any action of demolition against such unauthorised building then such decision shall also be conveyed to the concerned TSP/IP with a direction to relocate the TCS/BS within a period of 90 days, after which the Metropolitan Commissioner shall not be under any obligation to send any further intimation to the TSP/IP concerned before demolishing such unauthorised building, and it shall not be liable to pay compensation for the loss of the Base Station as a consequence of the demolition of the unauthorised building. The TSP/IP shall indemnify the Metropolitan Commissioner to this effect, while seeking permission for installation of TCS/BS.
- (l) Permission for installation of TCS/BS, once granted shall remain valid for next 5 years. The TSP/IP shall apply for renewal of permission to the Metropolitan Commissioner. The Metropolitan Commissioner, while considering renewal, shall insist upon submission of fresh structural stability certificate for buildings more than 30 years of age. Administrative fee shall be levied and collected as prescribed in Regulation no.36.4 (b) hereinabove, for every such renewal. If TSP/IP fails to apply for renewal alongwith all necessary documents before the expiry of earlier permission, then such TSP/IP shall be liable for action under the provisions of the Maharashtra Regional and Town Planning Act, 1966.
- (m) In case of any existing TCS/BS on a slum structure, every effort shall be made to relocate such

TCS/BS on a nearby suitable public building or any other authorised structure or open land in the slum. If such relocation is not possible, then such TCS/BS may be allowed to be continued on such slum structure subject to its structural suitability, till the TCS/BS is shifted to any other authorised structure or till the redevelopment of the slum, whichever is earlier.

- (n) While granting permission for TCS/BS, the Metropolitan Commissioner shall stipulate that TSP/IP shall conduct regular audit in accordance with the directions/guidelines issued by TERM Cell or DoT from time to time.

1.7 Electro-Magnetic Field (EMF) Radiation Norms

- (a) Prior to installation of TCS/BS, the TSP/IP shall have to obtain Site clearance from the Standing Advisory Committee on Frequency Allocation (SACFA) of the Department of Telecommunication (DoT) for every site from the point of view of interference with other wireless users, aviation hazards and obstruction to any other existing microwave links.
- (b) The Electro-Magnetic Field (EMF) radiation from BTS towers shall be subject to the regulations framed by the DoT from time to time. The TSP/IP shall periodically conduct audit and monitor EMF radiation in Urban localities, hospitals and educational/industrial /residential / recreational premises, especially around the Protected Areas (PAs) and ecologically sensitive areas, in accordance with the guidelines issued by DoT in this regard. It shall be binding on TSP/ IP to follow the mechanism prescribed by the DoT/TERM Cell at local level for ensuring control on the EMF radiation and for notifying on continual basis the radiation level at critical location. For all the existing as well as new BTSS/Towers, TSPs are required to submit self-certificates periodically in the format prescribed by TEC, DoT, in order to ensure that normally all general public areas around the TCS/BS site are within the safe EMR exposure limits. Audit of the self-certification furnished by the TSPs shall be done by the TERM Cell periodically. TERM Cell shall carry out test audit of the BTS sites on random basis as per the guidelines received from DoT and also in respect of all cases where there is a public complaint. The TERM Cell shall have due regard to the instructions issued by DoT regarding technical audit of TCS/BS, including radiation of towers within safe limits. These shall include Roof Top/Ground Based./Pole Mounted/Wall Mounted Towers. The TERM Cell shall also verify antenna orientation, safe distance from the Tower (exclusion zone) etc. For non-compliance of EMF standards, Telecom Service Provider shall be liable for penal action by the TERM Cell and/or Department of Telecommunication (DoT). Any violation noticed may attract heavy penalties on TSPs and may also lead to shut down of TCS/ BS, in case the violation persists.

1.8 Miscellaneous Provisions

- (a) Any complaint concerning illegal installation of TCS/BS on any building or any query of any nature regarding the installation of telecommunication equipment, shall be addressed to the Metropolitan Commissioner which shall intimate the concerned TSP/IP about the same with a direction to resolve the issue under intimation to the Metropolitan Commissioner, within such period as may be prescribed by the Metropolitan Commissioner.
- (b) The TSP/IP, who has erected TCS/BS without due permission, shall apply to the concerned Metropolitan Commissioner for regularization within 180 days from the date of coming into force of this Regulation. In case such application is made within the prescribed period, then the offence, if any, registered against the TSP/IP may be compounded by the Metropolitan Commissioner under section 143 of the Maharashtra Regional and Town Planning Act, 1966, subject to the provisions of these regulations.

- (c) The TSPs/IPs who have earlier erected TCS/BS with due permission, shall apply afresh, for validation of the previous permission, to the Metropolitan Commissioner within a period of 90 days from the date of commencement of this Regulation, in order to ensure due compliance of this Regulation. However Administrative fee in such cases shall not be leviable if appropriate fee/ Development charge, not less than the amount prescribed under Regulation no.36.4 (b)above, has already been paid. In case the amount paid is less than what is prescribed hereinabove, the difference in amount shall be recovered from the TSP/IP.
- (d) Any existing TCS/BS not conforming to any of the above provisions shall have to be removed within one year from the date of commencement of this Regulation, unless the same is specifically regularized by the Metropolitan Commissioner following due compliance by TSP/IP. However, operation of such non-conforming Telecommunication Cell Site/Base station shall be discontinued within a period of 30 days from the date of receipt of notice from the Metropolitan Commissioner to that effect, which shall however be issued only after obtaining the consent of the TERM Cell of DoT.
- (e) The Licensees shall try to share the tower for fixing their respective antennae provided the prescribed conditions are duly fulfilled, so as to ensure curtailing of multiple towers and optimizing the use of the existing ones.
- (f) Sign boards and Warning signs ("Danger", "RF Radiation", "Restricted Area", "Don't Enter" etc.) shall be provided at TCS/BS antenna sites which are clearly visible and identifiable.
- (g) The TSP/IP shall display the details of the following on a board (minimum size 24" x 48") separately or prominently on the cabin, for the perusal of general public in such a way that the same shall be clearly visible and identifiable.
- i. Name of TSP/IP :-
 - ii. Location :-
 - iii. Tower Reference :-
 - (a) Height, (b) Weight (c) Number of antennae planned on tower, (d) Permissible EMF radiation level (e) Proposed EMF radiation level.
 - iv. Due date for next renewal.
 - v. Contact Person's name, address and Telephone Number
 - vi. Address of Complaint Redressing Authority with Telephone Numbers
 - vii. Police Control Room- 100
 - viii. Fire Control Room – 101
 - ix. Ambulance – 102
 - x. Other important information, if any.
- Provided that in case of Telecommunication Cell Site/Base station on roof-top, the aforesaid information shall be displayed on the ground floor of the building.
- (h) The Metropolitan Commissioner shall display the list of authorized TCS/BS on their official web site, along with the date of permission and due date for renewal of permission.
- (i) TCS/BS Tower shall be inspected for distortion of members, torques of nuts and bolts at least once in five years. However, in case of areas affected by any natural calamity, such as cyclone,

earthquake, flood, etc., such inspection shall be carried out immediately after such incident suo motu or on being directed by the Metropolitan Commissioner. Such inspection shall be carried out only by a qualified structural engineer and a certificate to that effect shall be submitted to the Metropolitan Commissioner.

(j) TCS/BS Towers located in highly corrosive environment shall be painted every year. Other towers shall be painted at least once in five years to give additional protection.

(k) The Metropolitan Commissioner shall make efforts to provide Single Window clearance to TSP/ IP for disposal of their applications in a time bound manner.

1.9 Notwithstanding anything contained hereinabove, all the Regulations/Bye- Laws/ Memorandum /Directions /Guidelines in this regard, issued or to be issued from time to time, by the Department of Telecommunications, Government of India, shall prevail and be binding on TSP/IP and also on the PMRDA, in which case, this Regulation shall stand modified to that extent.

1.10 Powers of Interpretation and Removal of Doubt.-

If any interpretation is required regarding the clauses of this Regulation, then the matter shall be referred to the Urban Development Department, Government of Maharashtra, whose decision shall be final.

APPENDIX 'P'
SITE VISIT REPORT

Date of Site visit			
Site Visit By			
Proposed Project:			
Proposed Land use (Residential -R1 / R2, Commercial / Industrial / Agriculture / No Development / Afforestation Zone).			
Site Details		By Owner / PAH	By TP
a.	Survey no / Gut No.		
b.	Village		
c.	Taluka		
d.	Plot area as per 7/12 extract		
e.	Location (Lat/Lon)		
f.	Land use zone.		
g.	NA Status		
h.	Environmental clearance		
Details of Site Visit		By Architect	By TP
a.	Existing approach road width		
	Type of existing road (Tar/Wbm/Concrete)		
b.	Proposed approach road width as per RP/DP		
c.	Classification of approach road as per RP/DP		
d.	Existing nature of ground		
	contours gentle than 1 in 5 slope		
	contours steeper than 1 in 5 slope		
e.	Any existing structure on the site, if any, are they correctly marked on the plan.		
	Plinth area of the existing structure.		
	Existing structure (To be demolished / Retained)		
f.	Existing water course (Y/N)		
	Minimum distance from the Blue HFL line.		
	Minimum distance from the Red HFL line.		

g.	Drainage system available (Y/N)		
h.	Distance of site from electric line (If adjacent or within the site)		
	Type of electrical line (Low / Medium /High / Extra High Voltage line)		
i.	Distance of site from railway property (if adjacent)		
j.	Insanitary conditions (free from caucuses / exacter / Filth)		
k.	Whether site is affected by Airport proximity zone as per RP /DP.		
l.	Drinking Water Availability		
m.	Distance from adjacent industrial plot		
n.	Checked demarcation map with site conditions and validated (Yes/No)		
k.	Whether site is affected by airport proximity zone as per RP / DP		
l.	Drinking water availability		
m.	Abutting industrial Plot (Y / N)		

APPENDIX 'Q' SITE VISIT CERTIFICATE

Ref: 1. Application no. _____, dated _____.
2, Site Visit conducted on dated _____.

This is to certify that, status of the site is as follows and is suitable for the proposed land use.

Date of Site visit

APPENDIX - R
REGULATIONS FOR LONAVALA-KARLA-MALAVALI
PLANNING AREA OF SECTOR R OF RP OF PUNE
REGION

No plots in these zones shall be less than 500 sqm; provided that smaller plots in these zones admeasuring not less than 300 sqm existing before the date of publication of regional plan shall be recognized for the purpose of granting development permissions; provided further that plots directly abutting on Mumbai-Pune road shall not admeasure less than 1000 sqm. Development in such 1000 sqm plot, shall be governed by development control rules in Lonavala Regional/Development Plan, applicable to 10 are zone.

Built up areas, number of storeys, tenements, marginal open spaces and room sizes, the maximum built up areas, the maximum number of storeys, the maximum number of tenements, the minimum marginal open spaces and the minimum room sizes permissible in these zones shall be as indicated in the statement “AAA” annexed hereto. As regards rules for layout plots and group housing schemes and buildings of various users other than residential; other items of building construction, such as balcony, sanitation, height, ventilation and parking etc shall be governed by development control regulations for these items incorporated in Regional/Development Plan of Lonavala as amended from time to time and *subject to these regulations*.

Statement 'AAA'

	Plot Size group	Maximum built up area	Max.n o. of storeys	Max. no of tenements	Min.marginal open space			Min habitable room sizes	Min. sizes for kitchen	Min sizes for shops & other rooms for commercial use
					Road side	Side	Rear			
1.	Between 300 sqm and less than 500 sqm	25%	Ground plus one floor only	2	3m	2.5m	3m	9.0 sqm with no side less than 3m	7.5 sqm with no side less than 2.5m	15 sqm with no side less than 3m
2.	500 sqm and above	25%	Ground plus one upper	4	4.5m	3m	4.5m			

- 1) A ground floor on stilts or columns without enclosing walls (except retaining walls, where such floor is constructed by cutting the sloping ground) intended to be used as parking space shall not be counted as ground floor.
- 2) In case of classified roads, the minimum marginal open spaces to be observed from roads, shall be as prescribed above or as prescribed by Government from time to time under the ribbon development rules, whichever is more. However, on Mumbai- Pune National highway, no construction of any sort shall be allowed within a distance of 75m from the centre line of this road.
- 3) Sr.no. 1 is applicable to the plots existing on or before the date of publication of the notification in the official gazette.

APPENDIX –S
REGULATIONS FOR KUNE-PANGALOLI-KURWANDE
PLANNING AREA OF SECTOR R OF RP OF PUNE
REGION

Development in this area shall be governed by the regulations applicable to 10 Are zone in the Lonavala Regional/Development Plan. The maximum built up areas, the maximum number of storeys, the maximum number of tenements, the minimum marginal open spaces and the minimum room sizes permissible in these zones shall be as indicated in the statement “BBB” annexed hereto. As regards rules for layout plots and group housing schemes and buildings of various users other than residential; other items of building construction, such as balcony, sanitation, height, ventilation and parking etc shall be governed by development control regulations for these items incorporated in Regional/Development Plan of Lonavala as amended from time to time and *subject to these regulations*.

Statement “BBB”

Sr. no.	Plot Size group	Maximum built up area	Max.no . of storeys	Max. no of tenements	Min.marginal open space			Min habitable room sizes	Min. sizes for kitchen
					Road side	Side	Rear		
1.	Between 500 sqm and less than 1000 sqm	25%	Ground plus one floor only	2	4.5m	3m	4.5m	9.0 sqm with no side less than 3m	7.5 sqm with no side less than 2.5m
2.	1000 sqm and above	25%	Ground plus one upper	4	4.5m	3m	4.5m	11 sqm with no side less than 3m	

- 1) A ground floor on stilts or columns without enclosing walls (except retaining walls, where such a floor is constructed by cutting the sloping ground) intended to be used as parking space shall not be counted as ground floor.
- 2) In case of classified roads, the minimum marginal open spaces to be observed from roads, shall be as prescribed above or as prescribed by Government from time to time under the ribbon development rules, whichever is more. However, on Mumbai-Pune National highway, no construction of any sort shall be allowed within a distance of 75m from the centre line of this road.
- 3) Sr.no. 1 is applicable to the plots existing on or before the date of publication of the notification in the official gazette.

APPENDIX –T

REGULATIONS FOR DEVELOPMENT OF TOURISM AND HOSPITALITY SERVICES UNDER COMMUNITY NATURE CONSERVANCY AROUND WILD LIFE SANCTUARIES AND NATIONAL PARKS OF RP OF PUNE REGION.

Applicability: These regulations shall apply to the privately owned (not applicable to forest land) lands falling in Agriculture I No Development Zone situated within 5 km distance from the boundaries of wildlife sanctuaries and national parks in the PMRDA area . The provisions of existing Regional Plans I Development Plans with prevail over these regulation.s, wherever lands are earmarked for urbanisable zones in such plans.

Regulation:- For the lands situated within 5 km distance (or up to limit of notified eco - sensitive zone whichever is more) from the boundaries of wildlife sanctuaries and national parks, if the land owner applies for development permission, for development of eco-tourism, nature tourism. adventure tourism, same may be allowed; provided the land under consideration has minimum area of one hectare in contiguous manner.

Permissible users and built up area:-

The users permissible in Agricultural Zone/No Development Zone shall be as follows:-

- a) Agriculture, Farming, development of wild animal shelters, plantation and allied uses.
- b) Tourist homes, resorts, hotels etc. with rooms/suites, support areas for reception, kitchen, utility services etc. alongwith ancillary structures like covered parking, watchman's quarter, guard cabin, landscape element, and only one observation tower per tourist resort upto the height 15 mt. with platform area upto 10 sq.mt. in permanent/semi -permanent structural components.

The norms for building will be as follows:-

- i) The construction activities shall be as per Zonal Master Plan of concerned protected area.
- ii) The maximum permissible total built up area shall not exceed 10% of gross area with only G+1 structure having height not more than 9m. and it should blend with the surrounding.
- iii) The fencing/fortification may be permissible for only 10 % of total land area around built up structure in the form of chain link without masonry walls thereby keeping the remaining area free for movement of wild life.
- iv) Tourism infrastructure must confirm to environment friendly, low height, aesthetic architecture, natural cross-ventilation: no use of asbestos, no air pollution, minimum outdoor lighting and merging with the surrounding landscape. They should generate at least 50% of their total energy and fuel requirement from nonconventional energy sources like solar and biogas etc.
- v) The owner shall establish effective sewage disposal and recycling system during the construction and operational phase of the development. Not 1 ltr. of sewage shall go into the natural stream;

If in cases, where lack of compliance is observed, the PMRDA shall issue a notice to the resort owner/operator for corrective action within 15 days, failing to do so or having not been satisfy with the action taken or reply/justification received, any decision to shut down the unit may be taken by the PMRDA.

- vi) The owner shall establish effective systems for collection, segregation, composting

- and/or reuse of different types of solid waste collected during the construction and operational phase of the development.
- vii) The plastic components used within the area shall be recycled; failing which the resort shall be closed down within 48 hours.
 - viii) Natural streams/slopes/terrain shall be kept as it is, except for the built up area.
 - ix) On the area other than 10% area, only local trees shall be planted and only natural vegetation shall be allowed.
 - x) For the development such type already taken place, condition no (iii) above shall be applicable retrospectively to the extent of restricting the fencing and keeping the remaining area free for movement of wild life.
 - xi) While allowing such development, principles given in the National Tiger Conservation Authority New Delhi Notification No. 15-31/2012-NTCA, dated 15/10/2012 published in the gazette of India Ext. pt. III S-4 dated 08/11/2012 and Government of Maharashtra as amended from time to time shall be used as guidelines.
 - xii) All regulation prescribed in Eco- Sensitive Zone Notification of concerned National Park/ Wild Life Sanctuary should be strictly followed and all clearances required should be taken.

APPENDIX –U

Approvals of Building Permission on Fast Track based on Risk Based categorization

Notwithstanding Anything Contains in DCPR of the PMRDA, the Regulations Regarding Approval Of Building Permission by the **Architect /L.S./Engineer** at the Stage of Commencement , Plinth Checking and Completion cum Occupancy shall be as per **Risk Based Classification** of Building given in Table below:-

Sr. No.	Parameters to be consider for Risk Base.	Risk Category	
		Low Risk Category	Moderate Risk Category
1	Plot Area considered for Risk Based Assessment.	Buildings on a Plot Area upto 150 sq.mt.	Buildings on a Plot Area between 151 Sq mtr and upto 200 sq.mt.
2	Permissibility In Development Plan Zone	Residential Zone, Commercial zone and Public-Semi-public Zone	Residential Zone, Commercial zone and Public-Semi-public Zone
3	Plot status	The plot should be vacant . The Plot Status ,Plot criteria and permissibility in above land use zone shall be as per respective DCPR.	The plot should be vacant . The Plot Status ,Plot criteria and permissibility in above land use zone shall be as per respective DCPR.
4	Type of building	Residential and other buildings as per DCPR	Residential and other buildings as per DCPR
5	Proposed Structure of Building/Storey	G.F. / P+1 RCC./Load Bearing	G.F.+1 / P+2 RCC./Load Bearing
6	Front and side open spaces, Provision of Basement, Parking requirement and other requirements.	As per the provisions of DCPR.	As per the provisions of DCPR.
7	Tree cutting/ Tree replantation.	Not permitted.	Not permitted
8	Experience Criteria for Architect /L.S./Engineer for self-certification and all approval mentioned in this regulation.	As per Appendix-C of the respective DCPR regarding licensing and qualifications of the technical person.	As per Appendix-C of the respective DCPR regarding licensing and qualifications of the technical person.
9	NOCs and Documents	Wherever required as per the respective DCPR	Wherever required as per the respective DCPR
10	Site inspection and Computer based allocation of inspector for site inspection.	No site inspection is necessary by the PMRDA at any stage. Approval Procedure is to be followed as mentioned in Point No.11 excluding point no 11 (c).	Site inspection at Plinth level is necessary by the PMRDA. Approval Procedure is to be followed as mentioned in Point No.11 including point no 11 (c).

11. Procedure for Building Permission

Architect/ Licence Surveyor (L.S.)/Engineer (Architect registered with Council of Architecture & License Surveyor & Engineer registered with the PMRDA) are empowered to grant provisional approval **with self-certification** to the building proposal plans categorised as **Low Risk & Moderate Risk** in Table given above, subject to the following:-

Building Permission/Commencement Certificate:-

a) Submission of Proposal:-The proposal shall comprise of application u/s 44/69 of MR&TP Act, 1966, in format prescribed by the Metropolitan Commissioner, along with documents and undertakings required for the proposal as per regulation & required by the Metropolitan Commissioner from time to time. All the required documents shall be **certified and signed** by the Architect /L.S./Engineer confirming with the original documents. The documents required shall be as per the DCPR of the PMRDA.

b) Commencement Certificate (CC) :- After receipt of the application, the Demand Note regarding payment of Scrutiny Fee, Development Charges and other Charges based on the proposed Plans / Drawing submitted shall be given by the concern Engineer of the authority within 10 days. The owner / Architect /L.S./Engineer shall deposit the Charges as demanded. Upon deposit of such Charges with the PMRDA, the concerned Architect/ Licence Surveyor (L.S.)/Engineer are empowered to grant provisional approval in the form of **self-certification** certifying that the plan / entire building proposal is strictly in conformity with the DCPR. This **self-certification** shall be treated as **Commencement for the** construction work.

The owner/concern Architect/ Licence Surveyor (L.S.)/Engineer shall submit the said **self-certified plan** to the PMRDA **within 10 days**. Upon such submission, the concerned Officer, authorized by the Metropolitan Commissioner shall **countersign the plans without any scrutiny** and issue Commencement Certificate Under Section-45 of Maharashtra Regional and Town Planning Act, 1966 **within 10 days** from the receipt of such plan. The Scrutiny at the PMRDA level need not be necessary. Concern Architect /L.S./Engineer is **empowered/Authorised** to issue the copies of such *approved* plans & Certificates with his signature.

c) Plinth Checking For Moderate Risk building proposal:- The concern Architect /L.S./Engineer shall apply for certificate of plinth checking in prescribed application for Moderate Risk building proposal only. The inspection shall be done by the concerned Officer of the PMRDA. The inspection report shall be prepared and uploaded within 48 hours. The Plinth checking certificate shall be grant within the period of 7 days from the receipt of the application, if found as per the sanctioned plan.

d) Building completion certificate:- On completion of work, the concern Architect/L.S./Engineer shall issue the Building completion certificate and Occupation certificate, as required as per the provision of DCPR to the completed building/structure and submit two set of completion plan along with the required certificate and all site inspection report to the authority. The concerned Officer authorised by the Metropolitan Commissioner shall countersign the said Completion Plan along with Occupancy Certificate within 10 days **without any scrutiny and site inspection**.

12. Responsibility of the Architect/L.S./Engineer

- a) The work shall be supervised by the concerned Architect/L.S./Engineer who will ensure that the same is carried out strictly as per the approval. Confirmation of ownership of land / plot area and land boundaries in the name of applicant shall be jointly responsibility of concerned Architect/L.S./Engineer and the owner.
- b) It will be the responsibility of the concern Architect /L.S./Engineer, Site Supervisor & Structural Engineer appointed for the proposed development, jointly or severally to ensure that all plans shall be in consonance with provisions of the DCPR. All the requirements of the DCPR shall have to be complied with due care and the work is carried out as per the approval only. Any deviation required during the construction shall be approved by Architect/L.S./Engineer before execution. The concerned Architect /L.S./Engineer shall be empowered for any amendments in the plan in process of construction within the purview of DCPR.

- c) Frequency of Inspection By the Architect/L.S./Engineer:-_The Architect/L.S./Engineer shall inspect and submit the site inspection report along with photographs/video clips, at stages while submitting the building proposal, after completion of plinth work, and finally at the time of Building completion certificate to the authority. Such inspection reports shall be submitted and uploaded within 48 hours from the date of inspection.
- d) After submitting the application or during the construction of building if the Architect/L.S./Engineer are changed, he shall intimate the PMRDA immediately that he is no longer responsible for the project from the date of intimation. The construction work shall have to be suspended until the new Architect/L.S./Engineer as the case may be appointed by the owner. Owner's intimation regarding change of licensee shall be considered to be final. After intimation of the new appointed licensee shall then undertakes and start the project.

13. Authorisation to PMRDA :-

- a) In case of any deviations/irregularities noticed in the process or after completion, the PMRDA may immediately issue notice to the owner and or to the concerned licensee to suspend the further work and rectify the deviations/irregularities. Only after satisfaction of rectification made by the owner or concerned licensee, the PMRDA may issue intimation to start the work. In major violations, the PMRDA shall authorise to take appropriate action against Architect/L.S./Engineer as the case may be, as per the DCPR or as per respective Acts and Laws.
- b) The Metropolitan Commissioner, as the case may be, of the PMRDA is authorised to prepare common application forms, proformas, affidavit etc. wherever required for the smooth implementation of this regulation.
- c) The above procedure shall be integrated with the Online Building Permission Management System (BPMS) by the PMRDA.

14. Exceptions from this Procedure:-The above Procedure for Building Permission shall not bar the owner/ Architect/L.S./Engineer to obtain development permission as per Regular provisions of the DCPR.

PART-I: ADMINISTRATION

PREAMBLE

Maharashtra Industrial Development Corporation (hereinafter referred to as “MIDC”), incorporated under Section 3 of the Maharashtra Industrial Development (MIDC) Act, 1961, appointed as a Special Planning Authority (SPA) for the “notified areas“ as defined under Sub Section 1A of Section 40 of the Maharashtra Regional & Town Planning (MRTP) Act, 1966 (hereinafter referred to as “Act”), in exercise of the powers conferred under Clause (d) of Sub Section 3 of Section 40 of the said Act, makes the following development control regulations (DCR) for the notified areas under MIDC.

1. Short Title, Jurisdiction and Commencement

1.1. Title

These regulations shall be called the Development Control Regulations for the notified areas of MIDC, 2007 (hereinafter referred to as “these regulations”).

1.2. Jurisdiction

These regulations shall apply to all developmental activities in the notified areas under jurisdiction of MIDC.

1.3. Commencement

These regulations shall come into force from the day they are published in the official gazette with the prior sanction of the State Government. Till such time more stringent provisions of these regulations and the regulations in force shall be applicable.

1.4. Repeal and Saving

The Development Control Regulations for the notified areas of MIDC, 1999 sanctioned by the State Government No. TPB/4375/353/CR-135/95/UD-11 dated 7-1-1999 shall stand repealed upon coming in to force of these Regulations.

Nothing in these regulations shall apply or effect any plan already approved or building constructed or under construction as per the approved plan and any action taken in accordance with the Development Control Regulations for the Notified Areas of MIDC, 1999, unless in the opinion of MIDC such building is unsafe or constitutes a hazard to the safety of the occupants either in the property or adjacent property.

2. Definitions

In these Regulations, unless the context otherwise requires, the terms and expressions shall have the meaning indicated against each of them.

Terms and expressions not defined in these Regulations shall have the same meanings as in the Maharashtra Regional and Town Planning Act, 1966 (Mah. Act No. XXXVII of 1966) or the Maharashtra Industrial Development Act, 1961 and the rules framed there under, and the National Building Code (NBC) of India 2005, as amended from time to time, as the case may be, unless the context otherwise requires.

- 2.1 “Accessory building”** means a building separated from the main building on a plot, and put to one or more accessory uses.
- 2.2 “Accessory use” means** use of the building subordinate and customarily incidental to the principal use.
- 2.3 “Accredited Architect”** means an architect, who has been empanelled by MIDC in accordance with Regulation 15.2 of these Regulations.
- 2.4 “Accredited Town Planner”** means a Town Planner, who has been empanelled by MIDC in accordance with Regulation 15.3 of these Regulations.
- 2.5 “Act”** means the Maharashtra Regional and Town Planning Act, 1966 (Mah. Act No. XXXVII of 1966); as amended from time to time.
- 2.6 “Addition and/or alteration”** means change from one occupancy to another, or a structural change, such as addition to the area or height or the removal of part of a building or a change to the structure, such as the construction or cutting into or removal of any wall or part of a wall, partition, column, beam, joist, floor including a mezzanine floor or other support, or a change to or closing of any required means of ingress or egress, or a change to fixtures or equipment, as provided in these Regulations.
- 2.7 “Advertising sign”** means any surface or structure with characters, letters or illustrations applied thereto and displayed in any manner whatsoever out of doors for the purpose of advertising or giving information regarding or to attract the public to any place, person, public performance, article or merchandise, and which surface or structure is attached to, forms part of or is connected, with any building, or is fixed to a tree or to the ground or to any poll, screen, fence, hoarding or displayed in space; or in or over any water body included in the limits of ‘notified area’.
- 2.8 “Air-conditioning”** means the process of treating air to control simultaneously its temperature, humidity, cleanliness and distribution to meet the requirement of an enclosed space.
- 2.9 “Amenity”** means roads, streets, open spaces, parks recreational grounds, play grounds, gardens, sports complex, parade ground, markets primary schools, secondary schools, Colleges, Polytechnics, Clinics, dispensaries, hospitals, police station, fire station, parking lots, water supply, electric supply, street lighting, sewerage, drainage, public works and includes other utilities, services and conveniences.

- 2.10** “**Approved**” means approved by MIDC.
- 2.11** “**Atrium**” means a sky lighted naturally/ artificially ventilated area in buildings, with no intermediate floors, often containing plants and used as circulation space or an entrance foyer.
- 2.12** “**Balcony**” means a horizontal projection, including a parapet, hand-rail balustrade, to serve as a passage or sitting out place.
- 2.13** “**Basement or cellar**” means the lower storey of a building below, or partly below the ground level.
- 2.14** “**Biotechnology Unit**” shall mean and include Biotechnology (BT) units which are certified by the Development Commissioner (Industries) or any other officer authorized by him in this behalf.
- 2.15** “**Building**” means a structure, constructed with any materials whatsoever for any purpose, whether used for human habitation or not, and includes -foundation, plinth, walls, floors, roofs, chimneys, plumbing and building services, fixed platforms; verandahs, balconies, cornices, projections; part of a building or anything affixed thereto; any wall enclosing or intended to enclose land or space, signs and outdoor display structures; tanks constructed for storage of chemicals or chemicals in liquid form, except tents / Shaminas and tarpaulin shelters erected for temporary purposes for ceremonial occasions, with the permission of MIDC.
- 2.16** “**Building line**” means the line up to which the plinth of a building adjoining a street or an extension of a street or on a future street may lawfully extend and includes the lines prescribed, if any.
- 2.17** “**Built-up area**” means the area covered by a building on all floors including cantilevered portion, if any, except the areas excluded specifically under these Regulations.
- 2.18** “**Cabin**” means a non-residential enclosure constructed of non- load bearing partitions.
- 2.19** “**Canopy**” means a projection over any entrance.
- 2.20** “**Carpet area**” means the net usable floor area within a building excluding the area that is covered by the walls or any other areas specifically exempted from floor space index computation in these Regulations.
- 2.21** “**Chajja**” means a structural overhang provided over opening on external walls for protection from the weather.
- 2.22** “**Chief Executive Officer**” means the Chief Executive Officer appointed by the State Government under sub-section (1) of Section 12 of the Maharashtra Industrial Development Act, 1961.

- 2.23 “Chimney”** means a construction by means of which a flue is formed for the purpose of carrying products of combustion to the open air and includes a chimney stack and the flue pipe.
- 2.24 “Chowk”** means a fully or partially enclosed space permanently open to the sky within a building at any level; an “inner chowk” being enclosed on all sides and an “outer chowk” having one unenclosed side.
- 2.25 “Convenient shopping”** means shops, each with a carpet area not exceeding 20 Sq.m except where otherwise indicated and comprising those dealing with day to day requirements, as distinguished from wholesale trade or shopping. It includes –
- i Food-grains or ration shops, each with carpet area not exceeding 50 Sq.m,
 - ii Paan shops and Tobacconists,
 - iii Shop for collecting and distribution of clothes and other materials for cleaning and dyeing establishments,
 - iv Tailor or danner shops,
 - v Groceries, confectioneries, wine and general provision shops, each with a carpet area not exceeding 50 Sq.m,
 - vi Hair dressing saloons and beauty parlors,
 - vii Bicycle hire and repair shops,
 - viii Vegetable and fruits shops,
 - ix Milk and milk products shops,
 - x Medical and dental practitioner’s dispensaries or clinics, pathological or diagnostic clinics and pharmacies, each with a carpet area not exceeding 50 Sq.m,
 - xi Florists,
 - xii Shops dealing in ladies ornaments such as bangles etc.,
 - xiii Shops selling bakery products,
 - xiv Newspaper, magazine stalls and circulating libraries,
 - xv Wood, coal and fuel shops, each with a carpet area not exceeding 30Sq.m
 - xvi Books and stationery shops or stores,
 - xvii Cloth and garment shops,
 - xviii Plumbers, electricians, radio, television and video equipment repair shops and audio/video libraries,
 - xix Restaurants and eating houses each with a carpet area not exceeding 50sq.m,
 - xx Shoes and sports shops each with a carpet area not exceeding 75Sq.m. with the approval of MIDC.
- MIDC may from time to time add to, alter or amend the above list.
- 2.26 “Contiguous holding”** means a continuous piece of land in one ownership/leaser irrespective of separate property register cards/possession receipts of plots.
- 2.27 “Corridor”** means a common passage or circulation space including a common entrance foyer.

- 2.28** “**Courtyard**” means a space permanently open to the sky within the site around a structure.
- 2.29** “**Development**” with grammatical variation means to carry out the building, of engineering, mining or other variations in, or over, or over/under land or water, or to making of any material change, in any building, or land, or in the use of any building or land or any material or structural change in any heritage building or its precinct and includes demolition of any existing building, structure or erection or part of such building, structure or erection and redevelopment, and layout and subdivision of any land and “to develop” shall be construed accordingly.
- 2.30** “**Drain**” means a system or a line of pipes, with their fittings and accessories such as manholes, inspection chambers, traps, gullies, floor traps used for drainage of buildings or yards appurtenant to the buildings within the same curtilage. A drain includes an open channel or conveying surface water or a system for the removal of any liquid.
- 2.31** “**Existing building**” means a building or structure existing authorisedly before the commencement of these Regulations.
- 2.32** “**Existing use**” means use of a building or a structure existing authorized before the commencement of these Regulations.
- 2.33** “**External wall**” means an outer wall of a building not being a partition wall, even though adjoining a wall of another building and also means a wall abutting on an interior open space of any building.
- 2.34** “**Fitness Centre**” in a building means and includes the built up premises provided in the building including gymnasium for the benefit of its inmates and for the purpose of fitness, physical exercises, yoga and such other activities as may be permitted by MIDC from time to time.
- 2.35** “**Floor**” means the lower surface in a storey on which one normally walks in a building and does not include a mezzanine floor. The floor at ground level with a direct access to a street or open space shall be called the ground floor; the floor above it shall be termed as floor 1, with the next higher floor being termed as floor 2, and so on upwards.
- 2.36** “**Floor Space Index (FSI) / Floor Area Ratio (FAR)**” means the quotient of the ratio of the combined gross covered area (plinth area) on all floors, excepting areas specifically exempted under these Regulations, to the total area of the plot viz.

$$\text{FSI/FAR} = \frac{\text{Total covered area on all floors}}{\text{Plot area}}$$

- 2.37** “**Footing**” means a foundation unit constructed in brick work, stone masonry or concrete under the base of a wall or column for the purpose of distributing the load over a large area.
- 2.38** “**Foundation**” means that part of the structure which is in direct contact with and is transmitting loads to the ground.
- 2.39** “**Front**” means the space between the boundary line of a plot abutting the means of access/road/street and the building line. Plots facing two or more means of accesses/roads/streets shall be deemed to front on all such means of access/roads/streets with accesses/roads/streets having more width shall be considered as main frontage for deciding side and rear margins.
- 2.40** “**Gallery**” means an intermediate floor or platform projecting from a wall of an auditorium or a hall, providing extra floor area, and/or additional seating accommodation. It also includes the structures provided for seating in stadium
- 2.41** “**Garage-Private**” means a building or a portion thereof designed and used for the parking of vehicles.
- 2.42** “**Garage-Public**” means a building or portion thereof, designed other than as a private garage, operated for gain, designed and/or used
- 2.43** “**Grantor**” In respect of “Notified Area” means MIDC, where MIDC has executed the Agreement to Lease or License in favour of its allottee.
- 2.44** “**Ground Coverage Ratio (GCR)**” means the ratio of covered area to the total plot area.
- 2.45** “**Habitable room**” means a room occupied or designed for occupancy for human habitation and uses incidental thereto, including a kitchen if used as a living room, but excluding a bath-room, water closet compartment, laundry, serving and storing pantry, corridor, cellar, attic, store-room, pooja-room and spaces not frequently used.
- 2.46** “**Height of a building**” means the vertical distance measured, in the case of flat roofs, from the average level of the ground around and continuous to the building to the highest point of the building and in the case of pitched roofs, up to the point where the external surface of the outer wall intersects the finished surface of the sloping roof, and, in the case of gables facing the road, the mid-point between the eaves level and the ridge.
- 2.47** “**Height of a room**” means the vertical distance measured from the finished floor surface to the finished ceiling. The height of a room with a pitched roof means the average height between the finished floor surface and the bottom of the eaves and the bottom of the ridge.

- 2.48 “Heritage Building”** means a building possessing architectural, aesthetic, historic or cultural values which is declared as heritage building by the Planning Authority in whose jurisdiction such building is situated.
- 2.49 “Heritage precinct”** means an area comprising heritage building or buildings and precincts thereof or related places.
- 2.50 “Hoarding”** means any surface or structure erected on ground or any portion of roof of a building or on or above the parapet, with characters, letters or illustrations applied thereto and displayed in any manner whatsoever out of doors for purpose of advertising or to give information regarding or to attract the public to any place, person, public performance, article of merchandise whatsoever.
- 2.51 “Home occupation”** means customary home occupation other than the conduct of an eating or a drinking place offering services to the general public, customarily carried out by a member of the family residing on the premises without employing hired labour and for which there is no display to indicate from the exterior of the building that it is being utilized in whole or in part for any purpose other than a residential or dwelling use, and in connection with which no article or service is sold or exhibited for sale except that which is produced therein, which shall be non-hazardous and not affecting the safety of the inhabitants of the building and the neighborhood, and provided that no mechanical equipment is used except that as is customarily used for purely domestic or household purposes and/or employing licensable goods. If motive power is used, the total electricity load should not exceed 0.75 KW. “Home Occupation” may also include such similar occupations as may be specified by MIDC and subject to such terms and conditions as may be prescribed.
- 2.52 “Ledge” or “Taand”** means a shelf-like projection supported in any manner, except by vertical supports, within a room itself but without a projection of more than half a meter.
- 2.53 “Lessor”** in respect of “Notified Area” means MIDC where MIDC has executed the Lease in favour of its allottee.
- 2.54 “Lessee”** in respect of Area means the allottee in favour of whom Lease has been granted by MIDC.
- 2.55 “Licensed Engineer”** means a qualified engineer and licensed by any Municipal Corporation or Class A / Class B Municipal Council to sign building plans and documents connected with Development Permission.
- 2.56 “Licensee”** In respect of “Notified Area” means the allottee in favour of whom MIDC has executed Agreement to Lease.
- 2.57 “Lift”** means a mechanically guided car, platform or transport for persons and materials between two or more levels in a vertical or substantially vertical direction.

- 2.58 “Loft”** means a shelf like projection supported in any manner whatsoever, except by means of vertical supports within a room itself. The width of a loft shall not be more than 1M provided that if clear height between the top of the loft and the ceiling directly above it is not more than 1.5m, lofts wider than 1 M may be permitted.
- 2.59 “Mezzanine floor”** means an intermediate floor not being a loft between the floor and ceiling of any storey.
- 2.60 “MIDC”** means the Chief Executive Officer of Maharashtra Industrial Development Corporation or any other officer/officers duly authorized by him/her to perform any of the duties and functions under these Regulations.
- 2.61 “MID Act”** means The Maharashtra Industrial Development Act, 1961 (Mah Act No III of 1962)
- 2.62 “Multi-Storied Building” or “High-rise Building”** means a building above 15 Mtr. of height and above the average surrounding ground level and contiguous to the building as prescribed by NBC 2005, as amended from time to time.
- 2.63 “National Building Code of India 2005”** means the book containing Development control Rules, General building Requirements and Fire Prevention and Life Safety Measures to be implemented in the buildings, places, premises, workshops, warehouses and industries, published by the Bureau of Indian Standards, from time to time, with or without amendments
- 2.64 “Occupancy” or “Use”** means the principal occupancy or use for which a building or a part of it is used or intended to be used, including contingent subsidiary occupancies; mixed occupancy buildings being those in which more than one occupancy are present in different portions of the buildings.
- 2.65 “Open Space”** means an area forming an integral part of a land left permanently open to the sky.
- 2.66 “Owner”** means a person who receives rent for the use of the land or building or would be entitled to do so if it were let, and includes -
- i An authorized agent or trustee who receives such rent on behalf of the owner;
 - ii A receiver, executor or administrator, or a manager appointed by any court of competent jurisdiction to have the charge of or to exercise the rights of the owner;
 - iii An agent or trustee who receives the rent of or is entrusted with or is concerned with any building devoted to religious or charitable purposes;
 - iv A mortgagee in possession; and
 - v Lessee/ Licensee of MIDC,

- 2.67** “**Parapet**” means a low wall or railing built along with the edge of roof or a floor.
- 2.68** “**Parking space**” means an enclosed or unenclosed covered or open area sufficient in size to park vehicles. Parking spaces shall be served by a driveway connecting them with a street or alley and permitting ingress or egress of vehicles.
- 2.69** “**Plinth**” means the portion of a structure between the surface of the surrounding ground and surface of the floor immediately above the ground.
- 2.70** “**Plinth area**” means the built-up covered area measured at the floor level of the basement or of any storey whichever is larger.
- 2.71** “**Plot**” means a portion of land held in one ownership and numbered and shown as one plot enclosed by definite boundaries.
- 2.72** “**Plumbing Engineer**” means a person having Diploma in civil engineering or an equivalent qualification as approved by AICTE, a certificate of plumbing or in sanitary engineering recognized by the IEI or AICTE and a certification to the effect that he has a minimum of 3 years experience.
- 2.73** “**Porch**” means a covered surface supported on pillars or otherwise with wall only on one side, for the purpose of a pedestrian or a Vehicular approach to building.
- 2.74** “**Registered Architect**” means a qualified architect who is duly registered with the Council of Architecture under the Practising Architects Act, 1972.
- 2.75** “**Registered Structural Engineer**” means a qualified Engineer who is duly registered member of The Institutions of Engineers (India) with minimum five years of experience in structural design (in case of persons holding post graduate qualification experience required will be three years).
- 2.76** “**Road/Street**” means any highway, street, lane, pathway, alley, stairway, passage-way, carriageway, footway, square, place or bridge, over which the public have a right of passage, whether existing or proposed and includes all bunds channels, ditches, storm-water drains, service corridors for Sewage lines, Nallas, Electric Lines, culverts, sidewalks, traffic islands, road-side trees and hedges, retaining walls, fences, barriers and railings.
- 2.77** “**Road/Street-level or grade**” means the officially established elevation or grade of the centre line of the street upon which a plot fronts, and if there is no officially established grade, the existing grade of the street at its mid-point.
- 2.78** “**Road/Street line**” means the line defining the side limits of a road/street.

- 2.79 “Road width” or “Width of road/street”** means the whole extent of space within the boundaries of a road measured at right angles to the course or intended course of direction of such road.
- 2.80 “Row houses”** means a row of houses on adjacent plot with a common wall with only front, rear and/or interior open spaces. The house at the end of the row shall however have side open space as prescribed.
- 2.81 “Semi-detached building”** means a building detached on three sides with open spaces as specified in these Regulations.
- 2.82 “Service road”** means a road/lane provided at the front, rear or side of a plot for service purpose.
- 2.83 “Service Floor”** means a floor provided for facilitating maintenance and/or termination/diversion of services like water supply, drainage, electricity supply, telecommunication lines and accommodating mechanical/electrical devices, apparatus like air handling units, air conditioning ducts etc.
- 2.84 “Special building”** means-
- i A building solely used for the purpose of a drama or cinema theatre, a drive-in-theatre, an assembly hall or auditorium, an exhibition hall, theatre museum, a stadium, malls, multiplexes, fuel stations, a “Mangal Karyalaya“ or where the built-up area of such a user exceeds 500 Sq.m in the case of mixed occupants:
 - ii an industrial building;
 - iii a hazardous building;
 - iv a building of a wholesale establishment;
 - v a residential hotel building or centrally air-conditioned building which exceeds-
 - a. 15 m in height, or
 - b. a total built-up area of 500 Sq.m
- 2.85 “SEZ Act”** means the Special Economic Zone Act, 2005, enacted by the Central Government.
- 2.86 “Special Economic Zone”** means geographical area notified as Special Economic Zone by Govt. of India under the SEZ Act, 2005.
- 2.87 “Stair-cover”** means a structure with a covering roof over a staircase and its landing built to enclose only the stairs for the purpose of providing protection from the weather, and not used for human habitation.
- 2.88 “Storey”** means the portion of a building included between the surface of any floor and the surface of the floor next above it, or if there be no floor above it, then the space between any floor and the ceiling next above it.

- 2.89 “Tenement”** means an independent dwelling unit with a kitchen or a cooking alcove.
- 2.90 “Theatre”** means a place of public entertainment for the purpose of exhibition of motion pictures and/or dramas and other social or cultural programs.
- 2.91 “Town Planner”** means a person who is a member of the Institute of Town Planners, India (ITPI).
- 2.92 “Tower-like-structure”** means a structure in which the height of the tower-like- portion is at least twice that of the broader base.
- 2.93 “Unauthorized developments”** means the development done or undertaken or in progress without prior approval of MIDC.
- 2.94 “Unsafe Building”** means buildings which are structurally and constructionally unsafe or in sanitary or not provided with adequate means of egress or which constitute a fire hazard or are otherwise dangerous to human life or which in relation to existing use constitute a hazard to safety or health or public welfare , by reason of inadequate maintenance, or dilapidation or abandonment.
- 2.95 “Volume to plot area ratio (VPR)”** means the ratio of volume of building measured in cubic metres to the area of plot measured in square metres and therefore expressed in metres. However, the volume of plinth shall not be considered in the calculation of volume of building. Provided further that in case of a building permitted for the land-use of storage, the height of the plinth shall not be less than lorry-loading height.
- 2.96 “Water closet (W.C.)”** means a privy with an arrangement for flushing the pan with water, but does not include a bathroom
- 2.97 “Water course”** means a natural channel or an artificial channel formed by training or diversion of a natural channel meant for carrying storm and waste water.
- 2.98 “Water Course, Major”** means a water course which carries storm water discharging from a contributing area of not less than 100 hectares. The decision of MIDC on the extent of the contributing area being final. A minor water course is one which is not a major one.
- 2.99 “Wholesale establishment”** means an establishment wholly or partly engaged in wholesale trade and manufacturer wholesale outlets, including related storage facilities, warehouses and establishments engaged in truck transport, including truck transport booking agencies.
- 2.100 “Window”** means an opening, other than a door, to the outside of a building, which provides all or part of the required natural light. Ventilation or both to an interior space.

Note: Wherever there is conflict between definitions given in the Development Control (DC) Rules above and the definition given by National Building Code, the definition given in the National Building Code shall prevail.

3. Procedure for Securing Development Permission

3.1. Necessity of Obtaining Development Permission

Subject to the provisions of Section 43 of the Act, no person shall erect or re-erect a building or alter any building or carry out any development or redevelopment including temporary construction, on any plot or land or cause the same to be done without obtaining prior development permission from MIDC.

3.2. Application for Development Permission

Subject to the provision of Section 44 of the Act, any person intending to carry out any development on any land shall make an application in writing to MIDC in prescribed Form No.1 enclosed in the appendix IX.

3.3. Particulars and Documents to be Submitted along with Application

The following particulars and documents shall be submitted along with the application viz.

- a. Copy of letter of allotment from MIDC
- b. Copy of lease agreement/ownership document
- c. Copy of demarcation plan
- d. Latest Copy of registration of Architect with Council of Architecture and in case of Town Planner registration with Institute of Town Planners, India.
- e. A site plan (in quadruplicate) of the area proposed to be developed to a scale of 1:500 showing the following details wherever applicable.
 - i) The boundaries of the plot.
 - ii) The position of plot in relation to neighboring street.
 - iii) The name of the streets in which the plot is situated.
 - iv) All the existing buildings and other development standing on over or under the site.
 - v) The position of building and of all other buildings which the applicant intends to erect.
 - vi) The means of access from the street to the building or the site and all other buildings which the applicant intends to erect.
 - vii) Open space to be left around the buildings to secure free circulation of air, admission of light and access for scavenging purposes.
 - viii) The width of the street (if any) in front and of the street at the side or rear of the building.
 - ix) The direction of north point relative to the plan of the buildings.
 - x) Any physical features such as trees, wells, drains, etc.

f. **Detailed Plan** (in quadruplicate) showing the plans, sections and elevations of the proposed development work to a scale 1:100 showing the following details wherever applicable:

- i) Floor plans of all the floors (including with the service floors) together with the covered area, clearly indicating the size and spacing of all framing members and sizes of rooms and the position of staircases, ramps and lift-wells including escalator spaces.
- ii) The use of all parts of the building.
- iii) Sizes of footings, thickness of basement walls, wall construction, floor slabs and roof slabs with their materials. The sections shall indicate the height of building and height of rooms and also the height of the parapet and the drainage and slope of the roof. At least one section should be taken through the staircase.
- iv) The building elevations from all the streets.
- v) Details of service privy, if any.
- vi) Terrace plan indicating the drainage and slope of the roof.
- vii) The north point relative to the plans.
- viii) All structural calculations with necessary drawings.
- ix) All plumbing services with necessary details.
- x) Rain Water Harvesting plan
- xi) All provisions related to Active and Passive Fire Protection requirements adhering to Part IV of National Building Code 2005 i.e. Fire & Life Safety.

Note: Only one set of plans under “e” and “f” above may be submitted initially for scrutiny.

g. **In the case of a Layout of land or plot**

- i) Site plan (in quadruplicate) drawn to a scale of 1:1500 showing the surrounding land and existing access to the land included in the layout.
- ii) Plan (in quadruplicate) drawn to a scale of 1:500 showing:
 - a. Sub-divisions of the land or plot with dimensions and area of each of the proposed sub-divisions and its, use according to prescribed regulations,
 - b. Width of the proposed streets and
 - c. Dimensions and areas of open spaces provided in the layout for the purpose of garden or recreation or like purposes.
- iii) A plan showing location of road signage with typical details of signage in terms of their sizes and contents.

h. **Landscape Plan** (in quadruplicate) to a scale of 1:250 showing various landscape features such as trees, hedges, paved areas, etc. The plan shall Show, in particular, the type and number of existing trees, the trees to be felled, the trees to be transplanted and the proposal for planting of new trees.

- i. **Rain Water Harvesting Plans** (in quadruplicate) showing the arrangement of Rain Water Harvesting,
- j. **Specifications:** Specifications, both general and detail, giving type and grade of materials to be used for development.
- k. **Certificate of Supervision:** Certificate in the prescribed form (Form 2 in the Appendix IX) by the Registered Architect *or Engineer* undertaking the supervision and any other consultant.

3.4. Notations to be followed for Preparation of Plans:

- a. The following notations shall be used for plans referred to in regulation 3.3 above.

Table 1: Notations for Preparation of Plans

Sr. No.	Item	Site Plan	Bldg. Plan
1.	Plot Line	Thick Black	Thick Black
2.	Existing Street	Green	-
3.	Future Street, if any	Green dotted	-
4.	Permissible building Lines	Thick dotted	-
5.	Open spaces	No colour	No colour
6.	Existing work	Blue	Blue
7.	Work proposed to be demolished	Yellow hatched	Yellow hatched
8.	Proposed work	Red	Red
9.	Drainage& Sewerage Work	Red dotted	Red dotted
10.	Water Supply Work	Black dotted	Black dotted thin
11.	Recreation ground	Green Wash	--
12.	Gas Supply Line	Violet Dotted	Violet dotted Thin
13	Water Based Fire Protection Systems	Blue dotted	Blue dotted

- b) Wherever applicable, schedules of rooms, apertures and floor areas shall be submitted along with the drawing in accordance with the forms enclosed in Appendix IX.

4. Development works to be Planned, Designed, Submitted and Supervised by Registered Professionals

4.1. Architect / licensed Engineer

The plans, specifications and notifications referred to in 3.3 and 3.4 above shall be prepared and duly certified by the Registered Architect or Licensed Engineer having valid license from the nearby urban local body where the proposed development is intended.

4.2. Town Planner

The layout plans or sub-division schemes for areas above 5 Ha., requiring infrastructure planning shall be prepared and duly signed by a qualified Town Planner who shall be a Member of the Institute of Town Planner, India (ITPI). However this clause may not be applied to manufacturing industrial units.

4.3. Structural Engineer

The plans showing structural details shall be prepared and duly signed by the Registered Structural Engineer.

The plans showing structural details shall be prepared & duly certified under the hand of Structural Engineer possessing requisite qualification as per Regulation No.2.75.

In respect of structural stability of each development work, each owner shall notify the name & address of the registered Structural Engineer in the form enclosed Form and the Structural Engineer shall convey his acceptance as per Form 12 enclosed. The Structural Engineer shall submit form of supervision as per form No. 13 enclosed, & on completion of the development, the Structural Engineer shall issue a certificate of stability of the structure, as per Form No.14 enclosed (Appendix IX).

4.4. “Plumbing Engineer”

The Plans showing plumbing arrangements shall be prepared and duly signed by the Plumbing Engineer.

5. Development Permission Fees

5.1. Scrutiny Fees

A person applying for permission to carryout any development on any land shall with his application pay to MIDC the Scrutiny Fees at the rates notified by MIDC from time to time.

5.2. Development Charge

Any person who intends to carry out any development or change any use of any land or building for which the development permission is required under these Regulations, whether he has applied for such permission or otherwise has commenced carrying out any such development or has carried out any change in such use or who has applied to the Competent Authority for grant of Occupancy Certificate shall pay to the Competent Authority the development charge in accordance with the provisions laid down in Section 124 A to L of MR & TP Act, 1966 and in accordance with the directives of the State Government for levy of such charges.

5.3. Charges for Stacking of Building Materials on Public Roads

The stacking of building materials and debris on public roads shall be prohibited except with special permission of MIDC. Where such permission has been granted, the license fee for depositing building materials and debris on public road etc. shall be as follows.

Table 2 : Charges for Stacking of Building Materials on Public Roads

(a)	For construction residential building.	Rs.5/- per Sq.m per week
(b)	For construction non-residential building.	Rs. 10/- Sq.m per week

Note:

The stacking of materials would be permitted till the completion of the building. If after completion of the building, in the opinion of MIDC, certain material have not been cleared or left in a stage causing annoyance or inconvenience, MIDC shall take necessary actions against the Licensee/Lessee and any cost incurred in the removal of such material, which has been carried out by MIDC, shall be recovered from the Licensee/Lessee.

6. Decision of the MIDC

- 6.1. On receipt of the application for development permission, MIDC shall communicate its decision whether to grant or refuse permission to the applicant as per the provisions of Section 45 of the Act.
- 6.2. The Commencement Certificate, granting the permission with or without conditions shall be in Form 3 enclosed in the Appendix IX.

7. Deviations during Construction

If during the construction of a building, any departure of a Substantial nature from the sanctioned plans is intended by way of internal or external additions, which violate any provisions regarding general building requirements, structural stability and fire safety requirements of the bye-laws, sanction of the Chief Executive Officer shall be obtained. A

revised plan showing the deviations shall be submitted and the procedure laid down for the original plans hereto before shall apply to all such amended plans.

8. Development undertaken on behalf of Government

As per the provision of Section 58 of the Act the Officer-in-Charge of any Government Department or Office or Authority shall inform in writing to MIDC of the intention to carry out development of any land for its purpose along with the following documents and plans.

- a. A site plan (in quadruplicate) of the area proposed to be developed to a scale of 1:500
- b. Detailed Plan (in quadruplicate) showing the plans, sections and elevations of the proposed development work to a scale of 1:100.
- c. In the case of a layout of land or plot:
 - i. A site plan (in quadruplicate) drawn to a scale of 1:1500 showing the surrounding land and existing access to the land included in the layout.
 - ii. A plan (in quadruplicate) drawn to a scale of 1:500 showing:
 - iii. Sub-divisions of the land or plot with dimensions and area of each of the proposed sub-divisions and its use according to prescribed regulations;
 - iv. Width of the proposed streets and
 - v. Dimensions and areas of open space provided in the layout for the purpose of garden or recreation or like purposes.

9. Permission for Temporary Construction

The MIDC may grant permission for temporary construction for a period not exceeding 6 months in aggregate, unless otherwise specified, for the following types of activities:-

- i. Structures for protection from the rain or covering of the terraces during the monsoon only, i.e. between 15th May and 15th November.
- ii. Pandals for ceremonies, religious functions, sale of crackers, seasonal goods etc. Subject to approval of CFO(Chief Fire Officer) & FA(Fire Advisor)
- iii. Structures for Exhibitions/ Circuses etc. Subject to approval of CFO(Chief Fire Officer) & FA(Fire Advisor)
- iv. Temporary site office, labour camps and watchman chowkie/boths within the site, only during the phase of construction of main building.
- v. Asphalt Mixing / RMC (Ready Mix Concrete) plant for a period not exceeding 15 days at a stretch subject to a maximum limit of 60 days in a calendar year.

The above activities may be permitted subject to

- a. The condition that for such temporary construction fees should be recovered at the rate of Rs.50/- per Sq.m of such covered area of temporary construction. Equal amounts as fees shall be payable as deposit, which will be refundable provided by the end of the stipulated period such temporary structures are removed without fail by the Allottee/ Licensee/ Lessee/ Owner. Failure to remove such temporary sheds will be liable for forfeiture of the deposit and any such failure continuing beyond stipulated period shall be liable for imposition of penalty which will be 3 times the rate of Rs.50/- per Sq.m
- b. That all the permitted structures are not constructed in the clear width of mandatory open space around building.

10. Responsibilities of the Applicant

10.1. Neither the grant of Commencement Certificate nor the approval of the drawing and specifications nor inspections made by MIDC during the carrying out of development shall in any way relieve the applicant of his responsibility for carrying out the development in accordance with the requirements of these regulations.

10.2. The Applicant shall:

- a. Permit authorized officers of MIDC to enter the plot for which the Commencement Certificate has been granted for carrying out development, at any reasonable time for the purpose of enforcing these regulations.
- b. Obtain, where applicable, from MIDC permission relating to building, zoning, grades, sewers, water mains, plumbing, gas pipeline, advertisements signs, signage blasting, street occupancy, electricity, highways and all other permits required in connection with the carrying out the development.
- c. Give at least seven working (7) days' notice to MIDC of the intention to commence the carrying out of development. (Form No.5).
- d. In case of building operations, give notice to MIDC on completion up to plinth level and seven working (7) days before the commencement of further work.(Form No.6).
- e. In case of Industrial plots which have been closed down and changing the use, the applicant has to submit a clearance certificate from the labour commissioner that the industry has paid all the dues to the employees.
- f. Give written notice to MIDC regarding completion of the development in Form No. 8 enclosed in the Appendix IX, duly signed by the Registered Architect.
- g. Obtain occupancy certificate from MIDC prior to any occupancy or use of the development so completed (Form No. 9).

- h. Keep available for inspection, during the carrying out of development and for such a period thereafter as required by MIDC, the records of the tests which are made on any material to ensure conformity with the requirements of these regulations.
- i. Keep pasted in a conspicuous place on the property in respect of which the permission to develop is granted, a copy of the Commencement Certificate.
- j. Keep during carrying out of development a copy of the approved plans on the premises where the development is permitted to be carried out.
- k. The owner shall submit a soft copy of all the sanctioned plans and as built plans in AutoCad Format before issue of the commencement certificate and the occupancy certificate respectively.

11. Inspection

- 11.1. Inspection at various stages – MIDC may at any time during erection of building or execution of any work or development make an inspection thereof.

12. Occupancy Certificate

12.1. Grant of Occupancy Certificate

The MIDC shall within 30 days from the receipt of completion certificate required under regulation No.10.2 (f) communicate its decision after the necessary inspection about the grant of occupancy certificate indicated in regulation 10.2 (g) and fulfillment of condition specified in Regulation 10.2(k)

12.2. Occupancy for a part of Building

Upon the request of the Owner, MIDC may issue an occupancy certificate for a part of the building before completion of the entire work as per development permission, provided, sufficient precautionary measures are taken by the Owner to ensure public safety and health safety. Provided further that the part of the building for which occupancy certificate is applied for, shall be functionally complete and conform to all requirements of these Regulations. This certificate may be granted by MIDC subject to the condition that the Owner indemnifies the Authority, on stamp paper of such value as decided by MIDC as per the proforma given in Appendix IX (Form No.10).

12.3. Occupancy for high-rise buildings

For all high rise buildings (Above 15 m) and all special buildings MIDC shall issue occupancy certificate only after ensuring that the buildings comply with the provisions of MIDC Fire Protection and Life Safety Regulations 2007.

13. Unsafe Buildings

All unsafe buildings shall be considered to constitute a danger to public safety, hygiene and sanitation and shall be restored by repairs or demolished or dealt with by the owners of such buildings as otherwise directed by MIDC.

14. Clearances from other Authorities

Specific approvals/clearances shall be obtained from authorities like Maharashtra Pollution Control Board, Director of Industries, Chief Controller of Explosives, Inspectorate of Boilers and Smoke Nuisance, Civil Aviation Department etc. as may be applicable and the same shall be submitted to MIDC at the time of obtaining development permission.

15. Procedure for fast track Approval

15.1. The MIDC may permit to undertake development on fast track, without obtaining prior permission if the same is undertaken/supervised by an empanelled Accredited Architect/Accredited Town Planner, subject to the following:

- 15.1.1.** Any person intending to undertake any construction on his land/plot shall inform in writing to MIDC of the intension to carry out such development along with the following documents:
- a) Document showing ownership of the land.
 - b) Undertaking to be given by the Accredited Architect as per the format given in Appendix IX.
 - c) One set of drawings showing site plan, building plans and one cross section.
- 15.1.2.** The applicant/owner may, thereafter, commence the work at site and carry out the work up to plinth level. However, under no circumstances, further work shall be undertaken by the applicant/owner without first obtaining formal development permission as required under these Regulations.
- 15.1.3.** The works undertaken under this provision shall be in conformity with these Regulations and the Accredited Architect shall be held personally responsible in case of any violation and shall be liable for such action as may be decided by MIDC including termination from empanelment.

15.2. Eligibility criteria for empanelment of Accredited Architects:

- a. The Architect shall have the minimum qualification as prescribed under the Architects Act, 1972.
- b. The applicant shall be a registered member of the Council of Architecture.
- c. He shall have at least ten years experience as a Practicing Architect.

- d. He shall have an excellent track record in designing and supervising buildings and shall have executed projects worth Rs.5 crore per annum for the past three years.
- e. The applicant shall deposit and keep deposited an interest free amount of Rs. one lakh with MIDC throughout the period of empanelment. The deposit amount is liable to be revised from time to time

15.3. Eligibility criteria for empanelment of Accredited Town planners:

- a. The applicant shall be a registered member of the Institute of Town Planners, India.
- b. He shall have at least ten years experience as a Professional Planner.
- c. He shall have an excellent track record in planning and supervising development projects and shall have executed projects worth Rs.5 crore per annum for the past three years.
- d. The applicant shall deposit and keep deposited an interest free amount of Rs. One lakh with MIDC throughout the period of empanelment.

15.4. Procedure for empanelment of Accredited Architects / Town Planners.

MIDC shall empanel accredited Architect / Town Planners, in the months of January and July of each calendar year. Application for Empanelment as Accredited Architect / Town Planner Shall be in Form No 15 Given in Appendix IX.

16. Discretionary Powers

- a. *“In specific cases, where clearly demonstrable hardship is caused, Chief Executive Officer may for reasons to be recorded in writing by special permission, permit any of the dimensions prescribed in these rules to be modified except those relating to Floor Space Indices front margin parking requirements unless otherwise permitted under these rules, provided that the relaxation will not affect the health, safety fire safety, structural safety & public safety of the inhabitants of the buildings and the neighborhood”*
- b. The Chief Executive Officer may, from time to time, add or alter or amend Appendix I except where same are prescribed in the MR & TP Act, 1966 or in the MID Act, 1961.

PART II - DEVELOPMENT CONTROL REGULATIONS

A - MACRO CONTRO

17. Classifications of Land uses and permissible land uses

17.1. Classification of land-uses

For the purpose of these Regulations the land-uses have been classified into following groups:

- 1) Assembly
- 2) Bio-technology
- 3) Business
- 4) Educational
- 5) Floriculture
- 6) Industrial
- 7) Information Technology
- 8) Institutional
- 9) Mercantile
- 10) Nanotechnology
- 11) Residential
- 12) Storage
- 13) *100mtr wide green belt shall be provided on either side of the river. Following user shall be allowed within green belt area.*
 - 1) *Fuel wood plantation*
 - 2) *Furniture & structural wood plantation*
 - 3) *Bamboo plantation*
 - 4) *Grass & fodder plantation*
 - 5) *Sericulture without processing*
 - 6) *Horticulture development*
 - 7) *Fruits & berries plants*
 - 8) *Nurseries development*
 - 9) *Plantation of Medical & aromatic plant*
 - 10) *Water obstruction works*

17.2. Unless the context otherwise specifies:

- 17.2.1. “Assembly Land-use”** includes any land where groups of people congregate or gather for amusement, recreation, social, religious, patriotic, civil, travel and similar purposes, and include buildings of drama and cinema theatres, Multiplexes, Drive-in-theatres, assembly halls, city halls, town halls, auditorium, exhibition

halls, museums, “Mangal Karyalayas“, skating rings, gymnasium, stadium, restaurants, eating or boarding houses, places of worship, dance halls, clubs, gymkhanas, road, air, sea or other public transportation, and recreation piers.

- 17.2.2. “Biotechnology Land-use”** Includes any land which is used for development of Bio-technology Unit, as certified by the Development Commissioner (Industries) or any other officer authorized by him in this behalf.
- 17.2.3. “Business Land-use”** includes any land which is used for transaction of business and/or keeping of accounts and record thereof; offices, banks, professional establishments, court houses being classified as business buildings if their principal function is transaction of business and/or keeping of books and records.
- 17.2.4. “Educational Land-use”** includes any land-used for a school or college or educational institution recognized by the appropriate Board or University, or any other competent authority, involving assembly for instruction, education or recreation incidental to educational use, and including a building for such other users incidental there to such as a library or a research institution, it shall also include quarters for essential staff required to reside in the premises, and a building used as a hostel captive to an educational institution whether situated in its campus or not.
- 17.2.5. “Floriculture Land-use”** includes any land-used for farming of flowers, treatment, storage, packaging, and preservation of flowers.
- 17.2.6. “Industrial Land-use”** includes any land wherein products or material are manufactured and/or fabricated, assembled or processed, such as assembly plants, laboratories, power plants, refineries, gas plants, mills, dairies, factories, food processing units, grape processing units, and apparel manufacturing units.
- a. **Service Industry Class-A** means any industry which is engaged in producing, servicing or repairing goods or articles for consumption by persons residing in the neighborhood and which fulfills the following three conditions:
- i. the number of persons employed in any establishment does not exceed 9,
 - ii. The maximum power requirement of such establishment does not exceed 10H.P and
 - iii. The floor area occupied by such establishment does not exceed 50 Sq.m and shall include particularly any industry mentioned in Appendix I.

b. **Service Industry Class-B** means any industry which is engaged in producing, servicing or repairing goods or articles for consumption in the neighborhood and which fulfills the following three conditions:

- i. The number of persons employed in any establishment does not exceed 20,
- ii. The maximum power requirement of such establishment does not exceed 20 H.P., and
- iii. The floor area occupied by such establishment does not exceed 250 Sq.m and shall include particularly and industry mentioned in Appendix I.

17.2.7. “Information Technology Land-use” Information Technology land-use includes any land-used primarily for the development of computer software and hardware, IT enabled services and equipment relating to earth station, V-SAT, routes, transponders, covered and dish antenna, transmission towers and other similar I.T. related uses.

17.2.8. “Institutional Land-use“ includes any land used for Government, Semi-Government organizations or registered Trusts and used for medical or other treatment or for a hostel for working women or for an auditorium or complex for cultural and allied activities or for an hospice, care of persons suffering from physical or mental illness, handicap, disease or for infirmary and care of orphans, abandoned women, children and infants, convalescents, destitutes or aged persons and for penal or correctional detention with restricted liberty of the inmates ordinarily providing sleeping accommodation, and includes “dharmashalas”, hospitals, sanatorium, custodial and penal institutions such as jails, prison, mental hospitals, houses of correction, detention and reformatories.

17.2.9. “Mercantile Land-use” includes any land-used as shops, stores, malls or markets for display and sale of wholesale or retail goods or merchandise, including office, storage and service facilities incidental thereto located in the same building.

17.2.10. “Nanotechnology Land-use” includes any land which is used for development of nanotechnology unit, as certified by the Development Commissioner (Industries) or any other officer authorized by him in this behalf.

17.2.11. “Residential Land-use” includes any Land on which sleeping accommodation is provided for normal residential purposes, with or without cooking or dining or both except any activity classified under group “institutional”.

17.2.12. “Storage Land-use“ includes any land-uses primarily for the storage or sheltering (including servicing, processing or repairs incidental to storage) of goods, wares,

or merchandise, vehicles, for example-warehouses, cold storages, freight/container depots, transit sheds, store houses, truck and marine terminals, garages, hangers (other than aircraft repair hangers), and grain elevators

Note: The decision of MIDC about the land-use groups of any function shall be final and conclusive.

17.3. Permissible Land Uses

17.3.1. The following Land-uses /activities shall be permissible in the Notified Areas of MIDC including SEZ Areas, for which MIDC has been appointed as Special Planning Authority.

- a) Light Industries, Extensive Industries, Heavy and Large Scale Industries with residences for essential staff* (As per the lists attached in Appendix I)
- b) Obnoxious and hazardous industries only in the areas exclusively earmarked for this purpose.(As per list attached – Appendix I)
- c) Service Industries including Flatted Factories
- d) Storage buildings with residences for essential staff.*
- e) Biotechnology
- f) Information Technology
- g) Nanotechnology
- h) Floriculture, Agricultural activities, Nursery, Amusement Park, Exhibition Grounds, Open spaces, Playground, Zoological gardens, Nature Reserves, Sanctuaries, and such other open recreational uses.
- i) *Any other user as has been permitted by Govt. of India while approving SEZ project.*

17.3.2. In addition to the above, the following land-uses maybe permitted as supporting activities in the Notified Areas of MIDC.

- j) Residential
- k) Educational
- l) Institutional
- m) Assembly
- n) Business
- o) Mercantile

Note: The Plot area under all such support activity /uses taken together shall not exceed 20% of the total plotted area of any notified area of MIDC. *Apart from above 10% may be allowed for essential staff quarters in each plot area more than 0.4 Hect.(1 acre) in non chemical industrial plot only.*

18. Floor Space Index (FSI) / Floor Area Ratio (FAR), Ground Coverage Ratio (GCR) and Volume to Plot Area Ratio (VPR)

18.1. The maximum permissible Floor Space Index, Ground Coverage Ratio and Volume to Plot Area ratio shall be in relation to land area and land-use/activity; as stipulated below in Table no 3.

Table 3 Permissible FSI / VPR

Sr.	Land-use	Max. Permissible FSI / VPR
1.	Industrial a) All Industrial uses including Chemical, Flatted Factories b) Service Industry	1.0 1.0
2.	Storage a) General b) Within Service Industries Area	4M (VPR) 4M (VPR)
3.	Information Technology a) In the existing and already developed areas wherein the infrastructure in terms of roads, water and other services are already laid and the plot have been already allotted. b) In the areas which are proposed to be developed or redeveloped or the areas which are partially developed in terms of infrastructure such as roads water and power supply, covering less than 50% of the Notified area.	1.0 1.5
4.	Bio Technology a) In the existing and already developed areas wherein the infrastructure in terms of roads, water and other services are already laid and the plot have been already allotted.	1.0

Sr.	Land-use	Max. Permissible FSI / VPR	
	b) In the areas which are proposed to be developed or redeveloped or the areas which are partially developed in terms of infrastructure such as roads water and power supply, covering less than 50% of the Notified area.	1.5	
5	Nanotechnology		
	a) In the existing and already developed areas wherein the infrastructure in terms of roads, water and other services are already laid and the plot have been already allotted.	1.0	
	b) In the areas which are proposed to be developed or redeveloped or the areas which are partially developed in terms of infrastructure such as roads water and power supply, covering less than 50% of the Notified area.	1.5	
6.	Residential Including Residential Hotel	1.0	
7.	Business and Mercantile use		
	a) In notified areas situated within the Municipal corporation limits	1.0	For plots less than 1000 Sq.m
		1.5	For plots of 1000 Sq.m and above
	b) All other areas	1.0	
8.	Assembly	1.0	
9.	Medical Institution	1.0	
10.	Educational, Religious and Social	1.0	

Note:

- i For the purpose of computation of FSI the gross plot area shall be considered for all land-uses.

- ii Additional FSI for expansion of existing industries, additional FSI for IT/BT/Star category hotels/medical and educational institutions shall be governed by Regulation No. 18.2, 18.3 & 18.4 respectively.
- iii For chemical and such other industries, requiring storage of chemicals and gases, including hazardous materials, the area of land required for (a) the storage proper of such chemicals and (b) the compulsory safety area to be maintained all around such storages, shall be computed separately. In respect of such industries, having any storage of such hazardous materials/chemicals, total computed area of (a) & (b) above, shall deemed to have been utilized in so far as the ground coverage and the FSI in respect of that portion of land. Hence, that component of land shall be deducted from the total plot area and only balance area of the plot, shall be taken for the purpose of calculating the ground coverage and FSI permissible for the plot (indicated in Table 3). This rule shall also apply to the category of industries mentioned at (a) & (b) above, provided storage of such gases and hazardous materials, which require safety area, around such storage of material, is undertaken by such industries.
- iv In respect of plot-holders who had prepared master plan prior to 14.10.1993 (the date with effect from which MIDC was declared as a Special Planning Authority), covering maximum permissible ground coverage up to 0.5, as per the then prevailing rules, permission shall be granted for maximum ground coverage of 0.5, whereas as per these rules unit is already in production and reduction in ground coverage is causing hardships for the industrial expansion of the plot-holders, such permission shall be subject to the following conditions:
 - a. The plot-holder shall specifically provide parking space within the plot area itself and in no case, they vehicles coming to his/her unit shall be parked on the public Road / Roads.
 - b. The FSI for such type of cases shall be reduced further by 0.2, thus the maximum permissible FSI for such type of cases, should be 0.8 instead of 1.0.
- v Chemical plants have open type structures, without roof, shall deemed to have utilized, the ground coverage and FSI permissible, on erection of such plants, subject to the condition, that any additions or alterations to such open type plants, within the occupied area of the plant, by erection of additional tanks, vessels, pipelines and other structures which are incidental/essential to the said chemical plants shall be permissible. However, no separate FSI or ground coverage for the land occupied for such open type plants of chemical industries shall be permissible. Such open type chemical plants shall have all around the plant 10m road and the area covered within the external boundary of such road shall be treated as the area of chemical plant, and that a portion of plot shall deemed to be utilized in so far as the permissible ground coverage and FSI of the plot is concerned.

18.2. Additional FSI for Expansion of Existing Industries

In the case of existing factory building on the plots up to 1000 Sq.m in area, MIDC may permit additional FSI of 0.2 to allow expansion of its production capacity, duly approved by the Technical Advisor of MIDC. Provided that such grant of additional FSI shall be subject to payment of additional lease premium as prescribed by MIDC. Provided further that all the other provisions of these regulations including parking are complied with

18.3. Additional FSI for Pharma Industry

The MIDC may grant additional FSI to the pharma industries to the extent of 50% over and above the permissible FSI Provided that such grant of additional FSI shall be subject to payment of additional lease premium as prescribed by MIDC. Provided further that all the other provisions of these regulations including parking are complied with.

18.4. Additional FSI for IT / Bio-technology / Nanotechnology / Star Category Hotels/ Educational Institutions /Government and Semi Government/Medical Institution

18.4.1. The MIDC may grant additional FSI to Information Technology (IT), Bio-technology (BT), Nanotechnology (NT), Star Category Residential Hotels, and Medical and Educational Institutions over and above the permissible limits specified above, as under:

- a) IT/ITES plots - 100% over & above the permissible FSI to the plots in Public or Private IT parks, duly approved by the Director of Industries.
- b) Biotechnology / Nanotechnology – 100% over & above permissible FSI in respect of plots of Biotechnology / Nanotechnology establishments setup by MIDC or its Joint Venture companies having more than 51% stake of MIDC or the lessees of MIDC having plots exclusively used for Biotechnology / Nanotechnology.
- c) *Star Category Residential Hotels – 100% additional FSI will be permissible out of which 50% shall be granted by M.I.D.C. & 50% shall be granted with the prior approval of Govt.*
- d) *Medical and Educational Institutions – 100% additional FSI will be permissible out of which 50% shall be granted by M.I.D.C. & 50 % shall be granted with prior permission of the Govt.*
- e) Government, Semi-Government and Public Sector undertaking – 50% of the permissible FSI.

Provided that, the above additional FSI shall be granted subject to payment of additional premium as may be determined by MIDC from time to time. Provided

further that all the other provisions of these Regulations including parking are complied with.

18.4.2. 100% additional FSI shall be granted for buildings of gems and jewelry on independent plots in SEEPZ,(now a SEZ) Marol, MIDC, Mumbai, subject to payment of additional premium as may be determined by MIDC from time to time.

18.4.3. The land-uses where 100% additional FSI is permissible as per these Regulations, the plot should front a minimum of 18 Mtr. wide roads.

Note: The benefit of additional FSI as provided above shall not be available to the plots located within the SEZ / FTWZ areas wherein FSI on entire gross area (Global FSI) is applicable *provided that provisions in this note will not be applicable for user of IT/ITES, medical and educational institutions located within SEZ/FTWZ areas.*

18.5. FSI for Special Economic Zone:

The FSI for Special Economic Zones being developed by MIDC individually or as Joint Venture with other Public Body/ Private Agency shall be as under:

- i. The maximum permissible FSI on the entire gross area of the Special Economic Zone shall be 1.0. excluding areas under natural sites such as water bodies and existing highways if any.
- ii. Subject to above, there shall be no upper limit on FSI / Built-up Area for the development of individual plot.
- iii. The development potential for each plot shall be expressed in terms of permissible Built-up Area and shall be mentioned accordingly in the Agreement to Lease or Lease Agreement as the case may be.

Note: The above provision shall not be applicable to SEZ at MAROL, MIDC (SEEPZ) which is an already developed SEZ.

18.6. Exemption from computations of FSI/FAR

- I. The following shall not be counted towards computation of FSI:
 - a) All covered areas used as parking *in the same or separate Multistoried building constructed exclusively for parking* without servicing and repairing activity.
 - b) Facilities required for fire and life safety, as under
 - i. Fire escape staircase
 - ii. Fire lifts excluding lobbies

- iii. lift lobbies in case of fire tower (fire tower as per NBC 2005)
 - iv. Refuge areas
 - v. Fire escape passages/ Fire balconies
 - vi. Fire control rooms
 - vii. *Stair cases & Lift lobbies.*
- c) A basement or cellar used as a parking space or recreation space or AC Plant room
 - d) An area under a building constructed on a stilt which is used as parking space or recreational space provided where there are no side walls on three or more sides of such a space.
 - e) Any floor area of a building which is used as parking space at one or more levels.
 - f) *Staircases, staircase lobby.*
 - g) Balconies proposed in accordance with Regulation No. 30.
 - h) Lifts and lobbies in front of lifts to the extent of 1.5 times the depth of lift well and width equal to the width of lift well
 - i) Association/Society office-cum-letter box room in Residential, Shopping-cum Residential, Business, Mercantile & Flatted factories shall be as per the following norms :

Sr. No.	Details	Area
i	Up to 16 units	20 Sq.m
ii	17 to 150 units	25 Sq.m
iii	More than 150 units	30 Sq.m

Note: The built-up areas mentioned above are inclusive of Toilet facility.

- II. In additions to above the following shall be exempted from the computation of FSI, provided that the total area taken together under all such activities shall not exceed 15% of the permissible FSI / Built up Area in the case of Residential land-use and 10% in the case of all other land-uses.
 - i. An area of Atrium/ Entrance Lobby provided it is used only as a sit-out place or circulation space for the movement of people and for no other purpose.
 - ii. Electric cabin or sub-stations, Watchmen's Booth, Pump House.
 - iii. Staircase room and/or lift rooms above the top-most storey or in the basement, architectural feature.

- iv. Chimneys and elevated tanks of dimensions as permissible under these Regulations.
- v. Service Passages/corridors along the external face of the industrial and service industrial building to the extent of 10% of built up area of the respective floor.
- vi. Cut off floor
- vii. Watchman cabin / Booth and watch towers
- viii. Any covered antenna/dish antenna/communication tower used for telecom or IT purposes.
- ix. Any semi-permanent structure up to 20 Sq.m of built up area for installation of telephone connectors/concentrators in case of applicants who would provide suitable proof of being authorized by the Department of Telecommunications, Govt. of India, for setting up of cellular mobile telecommunication system.
- x. Refuge Area as stipulated under Fire Protection Regulations in Part III, Regulation .No. 40.24
- xi. Refuse Chute.
- xii. One service floor (except in residential buildings), with height below the soffit of a beam not exceeding 1.5m Special permission of MIDC is required for more than one service floor.
- xiii. Area used for installations of Air Handling Unit (AHU).
- xiv. Fitness Centre : as per following norms:
 In every residential building constructed or proposed to be constructed for quarters for industrial workers or for the use of a Co-operative Housing Society or an Apartment Owners Association; a fitness centre will be permitted subject to following conditions:
 - I. The area of such centre shall be equivalent to 2 (two) percent of the total area of the building, However it shall not be less than 20 Sq.m and more than 200 Sq.m
 - II. The centre shall not be used for any purpose other than for fitness centre facilities.
 - III. The fitness centre activities shall be confined only to the members of the concerned housing society specified above.
 - IV. The benefits of this provision shall be applicable prospectively and it shall not be extended for the purpose of regularization of already built up structures constructed without permission.

V.The ownership of the structure for fitness centre shall vest with the concerned society or association.

- xv. Other ancillary structures/activities permitted in marginal open spaces, as specified in Clause No. 24.6 of these Regulations.
- xvi. *Lofts.*

18.7. The GCR to the following land uses shall not exceed 0.5.

- a) Light Industries, Extensive Industries, Heavy and Large Scale Industries with residences for essential staff* (As per the lists attached in Appendix I)
- b) Obnoxious and hazardous industries only in the areas exclusively earmarked for this purpose.(As per list attached – Appendix I)
- c) Service Industries including Flatted Factories
- d) Storage buildings with residences for essential staff.

Note: Subject to written permission of CEO, larger GCR may be permitted in respect of Industrial buildings, with due consideration to the requirement of sector specific industry.

18.8. VPR for Free Trade Warehousing Zone

The VPR for Free Trade and Warehousing Zone being developed by MIDC individually or as joint venture with other Public body/Private Agency shall be as under:

- i) The maximum permissible VPR on the entire gross area of the Free Trade and Warehousing Zone shall be 4 M
- ii) Subject to above, there shall be no upper limit on VPR for development of individual plot.

The development potential for each plot shall be expressed in terms of permissible volume of the building and shall be mentioned accordingly in the Agreement to Lease or Lease Agreement as the case may be.

19. Tenement Densities:

If the area of plot under development for Residential land-use is 000 Sq.m or above the tenement densities shall be as follows:

- 19.1.** For dwelling units with built up area of more than 30 Sq.m, the minimum and maximum densities on the net plot area shall be 100 tenements per hectare and 300 tenements per hectare respectively.
- 19.2.** For dwelling units with built up area up to 30 Sq.m, the maximum density shall be 550 tenements per hectare of the net plot area.

20. Building Heights

The maximum permissible height of buildings in any MIDC area shall be as stipulated by the Chief Fire Officer and Fire Adviser (F.A.), which in turn shall be governed by the availability and capacity of the local fire fighting facility.

21. Layout or Sub-division of Land

Development of land in the form of sub-division or layout of more than one building (excluding ancillary building) shall be governed by the following regulations:

- 21.1.** Whenever land is proposed to be sub-divided or proposed to be developed for two or more buildings, a layout of the entire area showing proposed sub-division /layout of buildings, with access roads, open spaces etc. shall be submitted for approval.
- 21.2. Plots for different uses shall be laid out, based on the following criteria:**

21.2.1. Industrial Plots:

Table 4: Layout and Sub-division of Land – Industrial Plots

Sr. No.	Types of Development	Minimum Plot area in Sq.m
(i)	For manufacturing industrial units	500 & more
(ii)	Canteens, transport offices, individual shops for industrial goods and services	200 & above
(iii)	Plots for project affected persons [includes (iv) & (v) below]	100 to 150
(iv)	Plots for convenience shopping units	50 to 60
(v)	Informal shopping, stall sites	up to 24

21.2.2. Residential Users

Table 5: Layout and Sub-division of Land – Residential Plots

Sr.No.	Types of Development	Minimum Plot area in Sq.m
(i)	Low income group and EWS Housing.	20 Sq.m plot area with a minimum width of 3.5 m
(ii)	Row Housing	50 to 100
(iii)	Semi-detached housing	150 to 200
(iv)	Detached type housing	Above 200

21.2.3. Cinemas, Theatres and Assembly Halls

Plot area to be included on the basis of sitting capacity of the building, at the rate of 3 Sq.m per seat.

21.2.4. Public entertainment halls, community halls, Mangal Karyalayas Minimum plot area is 1000 Sq.m

21.3. The provision of roads in any layout shall be as under:

Table 6: Provision of Road in Industrial and Commercial Zones

Length of road	Minimum width in Metropolitan Region as notified by State Government under MRTTP Act 1966'	Minimum width 'in other areas'
Up to 150 m	15m	12 m
Above 150 m	20 m or more as may be required by the projected traffic.	15 m

Table 7: Provision of Road in Residential Zone

Length of road	Minimum width in Metropolitan Region as modified by State Government under MRTTP Act 1966'	Minimum width 'in other areas'
Up to 75 m	6 m	6 m
75 m to 150 m	10 m	10 m
151m to 300 m	12 m	10 m
Above 300 m	15 m or more as may be required by the projected traffic.	12 m

21.4. Intersection of Roads

At junctions of roads meeting at right angles, the rounding off at the intersection shall be done, unless otherwise directed by MIDC with the tangent length from the point of intersection to the curve being half the land width of road, across the direction of tangent as given in diagram below.

Illustration -2 Road Junction (roads meeting at 90° angle) Plan

- a. For junction of road meeting at less than 50° , the rounding off or cut, or similar treatment shall have tangent length of U and V from the inter sections point, as shown in diagram below. The tangent length at obtuse angle junction shall be equal to half the width of the road, from which the vehicle enters, as shown in diagram below. Provided, however, that the radius for the junction rounding shall not be less than 6 m

Illustration-3 Road Junction (Roads meeting at less than 50° angle) Plan

21.5. Recreational Open Spaces within Layout

In any layout or sub-division of land admeasuring more than 1hectare for industrial purpose and more than 0.5 hectare for residential purpose,10% of total area of land so sub-divided shall be reserved for open space, which shall as far as practicable, be located in one central place. Out of such open spaces, an area to the extent of 5%, may be allowed to be constructed, only with ground floor structure, for the purpose of incidental/allied public use, such as pavilion, club house gymnasium, water tank, care taker's room, toilet, store room crèche, library, children play school and such other purpose which is incidental to the main purpose for which the open space is used. Location of such structures shall be in one corner of the open space provided further that in the industrial layouts, minimum width of open space shall be 15 m and area of open space shall not be less than 750 Sq.m and in residential zone, it shall not be less than 125 Sq.m

In the case of layouts of sub-division where there is a combination of smaller (up to one 1.0 Ha.) and bigger plots (more than 1 Ha.), the recreational open space of 10% of the total area, excluding the area under bigger plots, shall be provided. The recreational open spaces within bigger plots shall be provided in accordance with Regulation No. 21.5 above.

21.6. Amenity Areas:

In any layout or sub-division of land admeasuring more than 1 hectare for industrial purpose and 0.5 hectare for residential purpose, 5% of the total area of land so sub-divided, shall be reserved for "Amenity Area". Following uses shall be permissible in the lands reserved for Amenity Area-MIDC offices, Local Area offices, Post Offices, Telephone Exchange, Fire Stations, Police Stations/ Chowkies, Electric Sub-station, Water Supply Works, Drainage Works, Common Facility Centre/Recreation Centre, Industries' Association offices, Schools/ Colleges, Educational institutions, Training Centre, Pollution Control Laboratories, Sulabh Shauchalaya, informal shopping, stall sites, plots for PAPs, communication centers, milk booths, and such other users as may be permitted by MIDC.

21.7. *For the purpose of computation of FSI net plot area after deduction of RG shall be taken into consideration. For plots more than 1 hector. For plots less than 1 hector common RG shall be provided in the layout admeasuring 10% of the layout area.*

22. Requirement of site

22.1. Distance from Water Course

No development, whether by filling or otherwise, shall be carried out within 9M on either side of the bank of a minor water course and 15M on either side of the bank of a

major water course or within a distance as may be stipulated by MIDC . Provided that where a water course passes through a low lying land without any well defined banks the applicant may be permitted by MIDC to restrict or direct the water courses to an alignment and cross section determined by MIDC.

22.2. Distance from Electric Lines

The distance of site / building from the electric line shall be as stipulated in clause No.6.4, Part III of the National Building Code of India, 2005.

No verandah, balcony or the like shall be allowed to be erected or re-erected or any additions or alterations made to a building on site within the distance quoted below in accordance with the current Indian Electricity Rules and its amendments from time to time between the building and any overhead electric supply line.

Table 8: Distance from electric lines

Sr. No.	Particulars of Electric Lines	Vertical distance	Horizontal distance in m
(a)	Low and medium voltage line and service lines.	2.5	1.2
(b)	High voltage lines up to and including 11,000 V.	3.7	1.2
(c)	High voltage lines above 11000 V and up to and including 33000 V	3.7	2.0
(d)	Extra high voltage lines beyond 33,000 V.	3.7 (Plus 0.3 m for every additional 33,000 V or part thereof)	2.0 (Plus 0.3m for every additional 33,000 V or part thereof)

The minimum clearance specified in Table 8 above shall be measured from maximum sag for vertical clearance and from maximum deflection due to wind pressure for horizontal clearance.

23. Urban Design Controls

For major public buildings and/or for any other building or group of buildings in specified areas, MIDC may prescribe guidelines for external architectural/urban design features in the Lease Agreement or in the Agreement to lease made with MIDC.

For this purpose, MIDC may prescribe the following aspects:

- i. Building set-back line/ road buffer
- ii. Floor to Floor height
- iii. Covered walkway or Arcades in the buildings with specified height
- iv. Projections, fascia, weather frames and such other features
- v. Exterior material /finishes with texture /colour etc.
- vi. Gates & boundary walls.
- vii. Specie of trees to be planted along roads with interval.
- viii. Separate design cross-sections
- ix. Signs/signage's

B - MICRO CONTROLS

24.Open Spaces around Buildings

24.1. The permissible ground coverage as indicated in Regulation No 18.7 shall be subject to maintenance of minimum marginal open spaces, to be kept all around the periphery of the plot boundary, with the further provision, that such marginal open spaces shall be further subject to the regulations regarding height of the building and the distance between the boundary of the plot and the building line as indicated in the Table 9 & 10 below:.

Table 9: Marginal Open Spaces for Plots up to 500 Sq.m

Sr. No.	Plot Area in Sq.m	Minimum Open Space from front side	Minimum Marginal Open Space from other sides	Maximum permissible height in Mt.
(1)	(2)	(3)	(4)	(5)
1.	Stall sites up to 25 Sq.m (desirable width of plot 4 m and above)	0.75 m	0.75 m	3.5 m
2.	For plots above 25 Sq.m to 60Sq.m	1.00 m	0.75 m	7.0 m
3.	For plots above 60 Sq.m to 100Sq.m	1.50 m	1.00 m	7.0 m
4.	For plots – above 100 Sq.m to 300 Sq.m (desirable width of plot 8 m and above)	2.5 m	1.5 m	7.0 m
5.	Above 300 Sq.m to 500 Sq.m	3 m	3 m	10.0 m

Note: For plots at Sr. No.5, height above 10 m. may be permitted provided extra setback of 0.33 m. is provided for every 1 m height beyond 10.0 m.

Table 10: Marginal Open Spaces for plots above 500 Sq.m

Sr. No.	Plot Area in Sq. m	Minimum Open Space from front side	Minimum Marginal Open Space from other sides
(1)	(2)	(3)	(4)
1.	Above 500 Sq. m area up to 800 Sq. m	4 m. or 1/3rd height of building whichever is more is ms	3 m. or 1/3rd height of building whichever is More.
2.	Above 800 Sq.m to 1200 Sq. m	4 m. or 1/3rd height of building whichever is more	4 m. or 1/3rd height of building whichever is more
3.	Above 1200 Sq.m to 2500 Sq. m	5m. or 1/3rd height of building whichever is more	5 m. or 1/3rd height of building whichever is more
4.	Above 2500 Sq.m to 5000 Sq. m	9 m. or 1/3rd height of building whichever is more	6 m. or 1/3rd height of building whichever is more
5.	Above 5000 Sq.m	9 m. or 1/3rd height of building whichever is more	9 m. or 1/3rd height of building whichever is more

Note:

- i) For heights above 48 m, the width of open spaces around buildings need not exceed 16m
- ii) If the length or depth of the building exceeds 40m add to above column 3 and 4, 10 percent of length or depth of building minus 4.0m
- iii) Where rooms do not derive light and ventilation from the exterior open space, the width of such exterior open space as prescribed in Table no 10 may be reduced by 1m subject to a minimum of 3m and a maximum of 8m . no further projections shall be permitted

**Illustration-4 showing Marginal Open spaces vis-a-vis Plot Size and Height of buildings**

- 24.2.** If any interior or exterior open space is intended to be used for the purpose of light and ventilation by more than one building belonging to the same owner, then the width of such open space shall be the one required for the tallest building as specified in Table 9 & 10 above. However, this distance shall be the clear distance without any projections like balcony etc.

Illustration-5 Diagram showing Distance between two buildings

- 24.3.** For residential buildings and shops, following special provisions shall apply:
- For semi-detached buildings having height not more than 10 m, the width of the front, rear and one side open space shall not be less than 3 m
 - For row houses having height not more than 10 m the width of the front and rear open spaces shall not be less than 3 m

24.4. Special Buildings

- Educational and Institutional buildings: The minimum open space, all around the boundary of the plot, to be left and maintained shall be 6 m
- Assembly buildings such as Cinemas, Theatres and Assembly Hall: Minimum marginal distance from the road side shall be 9 m and 6 m from all other sides and shall be exclusive of parking spaces to be provided, as per in these Regulations.

24.5. Projections in marginal open spaces

- In the case of plots up to 500 sqm in area, balconies, chajjas, weather sheds, canopies, cornices, sun breaker, revas projection, any ornamental features and such other features shall be permitted to project in the minimum marginal open space from building line as stipulated in Table 9 to the extent of 0.6m provided the clear height below such projections from ground level is minimum 2.1 m

- ii. For plots above 500 sqm in area Balconies, Chajjas, Weather Sheds, Canopies *cornices, sun breaker, revas projections, any ornamental features* and such other features shall be permitted to project in the open space from building line to the extent of 1.5 m but the clear width of the open space shall in no case be less than 3 m for buildings up to 15 m in height, and 4.5 m for buildings above 15 m height.

24.6. Structures Permissible in Marginal Open Spaces.

For plots up to 5000sqm area the following structures may be permitted in marginal open space provided that the clear width of open spaces shall in no case be less than as indicated below

- I. For industrial sheds / buildings up to 6m height: 4.5m
- II. For all other occupancies: 4.5 m up to 15m height & 6.0m for heights more than 15m
 - i. Porch : 1 Number
 - ii. Open steps for plinth
 - iii. Suction tank & pump room of maximum 2 sqm area : 1 Number
 - iv. Generator Set : 1 Number
 - v. Garbage chamber: 1 Number
 - vi. Vehicular ramp: 2 Numbers
 - vii. Open gantry for loading/ unloading in case of Engineering industry : 1 Number
 - viii. Effluent Treatment Plant (ETP)
 - ix. Open Ramps up to Plinth
 - x. Overhanging cupboards, shelves and niches below window sill up to 0.6m (only in residential buildings)
 - xi. Meter Room / Electric Sub-station as per requirement of power supply company
 - xii. Open Transformers
 - xiii. Landscaping features
 - xiv. Water bodies as landscape features
 - xv. Swimming Pool and Filtration Plant in only residential use
 - xvi. Telephone distribution equipments
 - xvii. Fire Hydrants
 - xviii. Platform around tree up to max 2.0 m dia.
 - xix. Fire Escape Staircase as per NBC 2005 as amended from time to time
 - xx. Cooling Tower
 - xxi. Loading/unloading Platform
 - xxii. Fork lift

Notes:

- i) In case of industrial sheds up to 6m height where the depth of plot is not more than 30 m. the structures/activities permissible in marginal open spaces would be allowed only on one side which does not derive entry to the plot or building and in rear margins provided that a clear width of 1 m *for rear margin and 3m for side margin* is maintained between such structures and the plot boundary.
- ii) A cantilevered, unsupported canopy not exceeding 5.5 m in length may be permitted in minimum marginal open space provided that the clear height below such canopy from ground level is minimum 5.5 m
- iii) All the structures which are permissible in marginal open spaces shall be subject to clearance from the concerned Fire Officer of MIDC.
- iv) The structures/activities permissible in marginal open spaces are exempted from computation of FSI provided the total area taken together under all structures and users mentioned in Regulation no 18.6 does not exceed 15% of permissible FSI/Built-up area in case of residential land use and 10% in the cases of all other land uses.
- v) Storage of hazardous materials shall not be permissible in the marginal open spaces. Storage of hazardous material in the open area of plot (excluding marginal open spaces) shall be subject to approval from Fire Officer of MIDC and/or other competent authorities.

25.Means of Access

25.1. The following provisions shall apply for approaches/ access to the structure within a plot.

Table 11: Approaches and access to the structure within a plot

Sr. No.	Length of means of access in mtr	Width of means of access in mtr.	
		For Residential use	For Industrial and Commercial use
(1)	(2)	(3)	(4)
1.	Up to 75 mtrs.	6 m	10m
2.	76 to 150 mtrs.	9 m	10m
3.	151 to 300 mtrs.	9 m	12m
4.	Above 300 mtrs.	12m	15m

25.2. No building shall be erected so as to deprive any other building of the means of access.

25.3. Every person who erects a building/structure shall not at any time erect or cause or permit to erect or re-erect any building/structure which in any way encroaches upon or diminishes the area set apart as means of access.

25.4. In the case of buildings for industrial/institutional, residential and commercial users with area of plot not less than 5,000 Sq.m, following additional provisions for the means of access, around such buildings, shall be ensured:

- a) If there are any bends or curves on the approach road around building, not less than 9 m width shall be provided at the curve, to enable the fire fighting vehicle & related equipments to turn. The turning radius shall be at least of 9 mtrs.
- b) The approach to the building and open space on its all sides, up to 6 m width and the layout for the same shall be as approved by the Chief Fire Officer and Fire Adviser, MI DC and the same shall be of hard surface, capable of taking the weight of fire engine, weighing up to 18 tonnes. The said open space shall be kept free from obstructions and shall be motor able.
- c) Main entrances to the plot shall be of adequate width to allow easy access to the fire engine and in no case it shall measure less than 4.5 m the entrance gate shall fold back against the compound wall of the premises, thus leaving the exterior access way within the plot free for movement of fire fighting vehicles. If main entrance at boundary wall is built-over, the minimum clearance shall be 4.5 m
- d) For multi-storied group of residential buildings, consisting of more than one building in a plot, approach road shall be minimum 9 m in width and for every individual building; there shall be a minimum space of 6 m width.
- e) At every entrance, cross drain of size not less than 900 mm dia. for coastal area and 450 mm dia. for non-coastal area or as directed by MIDC, shall be provided.

26. Inner and Outer Chowks

The following regulations shall apply to buildings of all the land-uses:

1. Inner chowks shall be allowed only in buildings, constructed on stilts. The chowk shall be kept accessible at the ground level. However, inner Chowks shall be permitted in row houses and bungalows, built on the ground but which are used only for residential land-use.
2. No dimension of an inner chowk on which doors and windows abut shall be less than 3 m
3. Inner chowk on which doors and windows abut shall have area at all levels of the chowk, of not less than the square of 1/5th height of the highest wall abutting the chowk. No room

excluding a staircase, bathroom and WC shall be exclusively dependent for its light and ventilation on an inner chowk. If any room abutting an inner or outer chowk is exclusively dependent upon such chowk for its light and ventilation the dimensions of the chowk shall be in accordance with Regulation 24, provided that when only bath rooms and water closets abut the chowk, chowks shall have a minimum dimension of 2.5 m, and may have any area for any height.

4. No length (as distinguished from its depth) of an outer chowk shall be less than 2 m

27. Room Sizes

- 27.1. The sizes of habitable rooms and other areas shall be as specified in the Table 12 below.

Table 12: Size of Habitable Rooms

Sr. No.	Type	Minimum carpet area in Sq.m	Minimum dimension in m
1.	Multi-purpose room in one-room dwelling unit	9.6	2.4
2.	Rooms in two room dwelling unit		
	a) Living Room	9.6	2.4
	b) Other Room	7.5	2.4
	c) Kitchen	4.5	1.7
3.	Room in any building other than Residential	7.5	2.4

- 27.2. The minimum sizes of bathrooms and the WCs shall be as follows, for buildings of all land-uses:

Table 13: Size of Bathrooms and WC's

Sr. No.	Particulars	Internal dimensions
1.	Bathroom	1.2 M X 1.2 M
2.	Water Closet (WC)	0.9 M X 1.2 M
3.	Combined Toilet	1.2 M X 2.1 M

28. Height of Rooms

The minimum and maximum height of the habitable rooms shall be as given in table here under:

Table 14: Height of Rooms

Sr. No	Occupancy		Minimum height (in Mtrs.)	Maximum height (in Mtrs.)
(1)	(2)		(3)	(4)
1.	Flat roof	(a) Any habitable room Including rooms in IT/BT unit	2.75	4.20
		(b) Air-conditioned habitable room Including rooms in IT/BT unit	2.40	4.20
		(c) Assembly halls, residential hotels of 3 Star category and above, rooms in institutional, educational, industrial, hazardous or storage occupancies, departmental stores, entrance halls and lobbies to departmental stores and assembly halls.	3.60	5.00
2.	Pitched roof	(a) Any habitable room	2.75 (average with 2.1 m at the lowest point)	4.2 (average with 3.2 m at the lowest point)

The above provisions are subject to the following:

- i. The minimum clear head-way under any beam shall be 2.4 m in all occupancies, except those included in Sr.No. 1(c) in the Table above, any height in excess of 4.2 m shall be deemed to have consumed an additional FSI of 50 per cent of the relevant floor area.
- ii. In case of plots earmarked for residential bungalow or Row Houses, floor area not exceeding 20 Sq.mt. per plot or 10% of plot area whichever is less, shall be allowed to have clear internal height of more than 4.20 m, without counting 50% area of the same for computation of FSI
- iii. In the case of Assembly Halls, Residential Hotels of star category and above, Institutional, Educational, Industrial, Hazardous or storage occupancies, departmental

stores including entrance halls and lobbies of all the aforesaid categories minimum and maximum height shall be 3.6 m and 5.0 m respectively. Subject to the written permission of the MIDC, greater height may be permitted.

- iv. The height of bathrooms, WCs and Store Rooms in buildings of all land-uses shall not be less than 2.2 m
- v. Any telemetric equipment storage erection facility can have a height as required for effective functioning of that structure.
- vi. AC plant room can have height as required for the installation and effective functioning of the plant.

29. Apertures for light and Ventilation

The following regulations shall apply to all rooms including bathroom, WC, store room in buildings of all land-uses:

- i. All rooms shall be provided with one or more apertures such as windows, fanlights, skylights, louvered doors and the like opening directly on to the external air or on to a covered unenclosed balcony not more than 2m in width.
- ii. The total area of such apertures inclusive of frames shall not be less than 1/6th of the carpet area of the room the glazed portions of the apertures may be partly fixed. The area of such partly fixed portions shall not exceed 33% of the total area of apertures. No portion of a room shall be considered to be lighted, if it is more than 7.5 m away from the aperture directly lighting it.
- iii. In case of building in which any portion of a room is more than 7.5 m away from the aperture or where artificial ventilation is resorted to through air conditioning system, the illumination levels due to artificial lighting shall be as prescribed in the National Building Code Part VIII, Clause 4.1.2 and 4.1.2.2 or any modifications thereof. In all such cases a detailed plan showing proposed illumination arrangement shall be submitted for approval.
- iv. For air conditioned premises the provisions as prescribed in Part VIII Section 3 of National Building Code or any modifications thereof shall apply.

30. Balconies

- i. The minimum clear width of balconies in buildings (of all the land-uses) shall be one metre (1 m), provided that the aforesaid width need not be insisted upon through the length, in case of semi-circular or any non-rectangular shaped balconies.

- ii. The floor area of balconies to the extent of 10% built-up area of the respective floor will be permitted free of FSI (in all the land-uses except in the industrial and service industrial uses). Any additional area beyond 10% shall be included in the floor area for computation of FSI.
- iii. Except industrial building, a balcony in a building may be permitted to be enclosed by an open grill above the parapet, (being 0.9 metres in height), without payment of additional premium
- iv. A balcony in a building may be enclosed otherwise and the wall in between balcony and adjoining room may be allowed to be removed so as to include balcony area into room, upon the payment of additional premium as would be decided by MIDC from time to time.

31. Loft and Mezzanine

31.1. Lofts -

Table 15: Extent of Lofts

Sr. No.	Rooms over which Lofts permitted	Coverage (% to area of room below)
1.	Kitchen/Habitable room	25
2.	Bathroom, water closet, corridor.	100
3.	Shops with width up to 3 m	33.33
4.	Shops with width exceeding 3 m	50
5.	Industrial / Business	33.33

- i. Provided that (a) lofts in commercial or industrial buildings shall be located at least 2 m away from the entrance; and (b) loft area shall not be counted towards FSI subject to provision in (ii) below.
- ii. Heights: The clear head-room under a loft shall not be less than 2.2 m and that above it shall not be more than 1.5 m and if exceeded; it shall be counted towards FSI.

31.2. Mezzanine

The following regulations shall apply to buildings of all the land-uses: A mezzanine floor shall be permitted within a room provided that the carpet area of such room is not less than 27 Sq.m and the area of the mezzanine floor does not exceed 30% of the carpet area of the room in which it is located. The height above and below the mezzanine floor shall not be less than 2.4 m and 2.6m respectively.

32. Staircases

Minimum width of Common Stairways/ Corridors for various occupancies shall be as indicated in the table below:

Table 16: Minimum Width of Stairways and Corridors

Sr. No,	Type of occupancy	Minimum width of staircase/ stairway/ corridor (in metres)	
(1)	(2)	(3)	
1.	Residential Buildings-	(a) General	
		i. Upto 24m ht.	1.2 m
		ii. Above 24m ht.	1.5 m
		(b) Row Housing, Bungalows (2 storied)	0.9
		(c) Hotels	1.5
2.	Educational buildings	(a) Up to 24 m high	1.5
		(b) Over 24 m high	2.0
3.	Institutional buildings (i.e. hospitals)	(a) Up to 10 beds	1.5
		(b) Over 10 beds.	2.0
4.	Assembly buildings	2.0	
5.	Mercantile, business, industrial, storage, hazardous buildings	1.5	

- i. The height of riser shall not exceed 19.5 cm and they shall be limited to 12 per flight.
- ii. The width of tread without nosing shall be minimum 25 cm. for residential and 30 cm for other occupancies.

33.Lifts

The following regulations shall apply to lifts in buildings of all land-uses without prejudice to the provision of Regulation No 40.8

- i. If the height of building exceeds 15 m at least one lift shall be provided in the building.
- ii. Where the height of a building exceeds 24 m at least two lifts shall be provided in the said building.

34. Basements

Area and Extent: The total area of basement may be in one or more levels and may extend beyond the building line below ground level provided the clear distance between the edge of the basement and plot boundary is kept as specified below. Provided further the top slab of the basement is designed as heavy duty slab capable of withstanding heavy fire fighting equipments to the satisfaction of CFO.

Table 17: Minimum clear widths from plot boundary to edge of basements

Area of Plot	Clear Widths (x)
For plots up to 2000Sqm	3.0m
2001 Sqm – 5000Sqm	4.5m
5001Sqm – 10000 Sqm	6.0m
Above 10000 Sqm	9.0m

Illustration-6 showing Extent of Basements

- i. Height: The height of the basement from the floor to the underside of the roof-slab or ceiling or under side of a beam when the basement has a beam, shall not be less than 2.4 m
- ii. The ceiling of basement immediately below ground level shall be at least 0.9 m and not more than 1.2 m above the average surrounding ground level.
- iii. For parking spaces in basements and upper floors, preferably two ramps shall be provided for plot up to 2000 sq.mt. For plots above 2000 sq.mt. It shall be mandatory to provide two separate ramps preferably at opposite ends. The ramps shall have minimum width 3.5 m. for one way ramp and 6.0 m for two ways ramp. Such ramps may be permitted in the side and rear marginal open spaces after leaving sufficient space for movement of fire fighting Vehicles.

iv. Uses Permitted:

A basement may be put to the following uses only:-

- a. Storage of household or other non-hazardous goods;
- b. Store rooms, bank lockers or safe-deposit vaults;
- c. Air-conditioning equipment and other machines used for services and utilities of the building;
- d. Parking spaces;
- e. Electric sub-station (which will conform to required safety requirements);

Provided that, use strictly ancillary to the principal use only be permitted in a basement. Provided further that in case the basement is used for storage purpose, prior written permission from MIDC shall be obtained.

35. Overhead Tanks

Every overhead water storage tank shall be maintained in a perfectly mosquito-proof condition by providing a properly fitting hinged cover and every tank more than 1.5 m in height shall be provided with a permanently fixed iron ladder to enable inspection by anti-malaria staff

36. Septic Tanks

36.1. Location and sub-soil dispersion system shall not be closer than 12 m to any source of drinking water, such as a well, to mitigate the possibility of bacterial pollution of water supply. It shall also be as far removed from the nearest habitable building as economically feasible but not closer than 2 m to avoid damage to the structure.

36.2. Dimensions and Other features

- a. Septic tanks shall have a minimum inner width of 75 cm, a minimum depth of 1 m. below the water level and a per capita minimum liquid capacity of 85 liters. The length of the tanks shall be at least twice the width.
- b. Septic tanks may be constructed of brick work, stone masonry, concrete or other suitable material as approved by MIDC.
- c. Under no circumstances, should effluent from a septic tank be allowed into an open channel drain or body of water without adequate treatment.
- d. The minimum diameter of the pipe shall be 100 mm further, at junctions of pipes in manholes; the direction of flow from a branch connection should not make an angle exceeding 45° with the direction of flow in the main pipe.
- e. The gradients of land-drains, under-drainage as well as the bottom of dispersion trenches and soak ways should be between 1:300 and 1:400.

- f. Every septic tank shall be provided with a ventilating pipe of at least 50 mm diameter. The top of the pipe shall be provided with a suitable cage of mosquito-proof wire mesh. The ventilating pipe shall extend to a height which would cause no smell or nuisance to any building in the area. Generally, the ventilating pipe should extend to a height of about 2 m when the septic tank is at least 15 m away from the nearest building and to a height of 2 m above the top of the building when it is located closer than 15 m
- g. When the disposal of a septic tank effluent is to a seepage pit, the seepage pit may be of sectional dimension of 90 cm and not less than 100 cm in depth below the inner level of the inlet pipe. The pit may be lined with stone; brick and concrete blocks with dry open joint which should be backed with at least 7.5 cm of clean coarse aggregate. The lining above the inlet level should be finished with mortar. In the case of pits of large dimensions, the top portion may be narrowed to reduce the size of the R.C.C. cover slabs. When no lining is used, especially near trees, the entire pit should be filled with loose stones. A masonry ring should be constructed at the top of the pit to prevent damage by flooding of the pit by surface run off. The inlet pipe should be taken down to a depth of 90 cm from the top as an anti-mosquito measure.
- h. When the disposal of septic tank effluent is to a dispersion trench, the dispersion trench shall be 50 to 100 cm wide excavated to a slight gradient and shall be provided with a layer of washed gravel or crushed stones 15 to 25 cm deep. Open joined pipes placed inside the trench shall be made of unglazed earthenware clay or concrete and shall have a minimum internal diameter of 75 to 100 mm each dispersion trench should not be longer than 30 m and trenches should not be placed closer than 1.8 m to each other.

37. Car Parking and Loading & Unloading

- 37.1. Parking area for different vehicular modes and number of car spaces to be provided for various land-uses shall be governed by the following tables.

Table 18: Size of Parking for different Vehicular Modes

Sr. No	Type of Mode	Size of parking bay
1	Car	2.50 m x 5.00m
2	Scooter	2.50 m x 1.20m
3	Bicycle	2.00 m x 0.70m
4	Truck	3.75 m x 10.00m
5	Trailer Truck	5.00 m x 20.00m

Table 19: Parking requirement for various Land-uses/Buildings

SR.	LAND-USE	CAR SPACES
1.	Residential	<p>a. 2 car spaces for every one tenement above 100 sq.mt. of built up area</p> <p>b. One space for every one tenement of built-up area more than 60 Sq.m and up to 100 sq.mt</p> <p>c. One space for every two tenements of built-up area more than 45 Sq.m up to 60 Sq.m</p> <p>d. One space for every four tenements of built-up area up to 45 Sq.m.</p>
2.	I. Star Hotels	I. One space for every 60 Sq.m of total floor area or part thereof.
	II. Hotels	II. One space for every 75 Sq.m. of floor area or part thereof
	III. Lodging	III. One space for every 100 Sq.m. of floor area or part thereof.
	IV. Restaurants.	IV. One space for every 50 Sq.m. of floor area or part thereof.
3.	Educational	One space for 100 Sq.m. of floor area or part thereof.
4.	Institutional	One space for every 250 Sq.m. of floor area or part thereof.
5.	Office (Govt.& Pvt.)	One space for every 70 Sq.m. of floor area up to 1500 Sq.m. and one space for every 150 Sq.m. or part thereof for areas exceeding 1500 Sq.m
6.	Information Technology, Biotechnology & Nanotechnology	One space for every 50 Sq.m. of floor area or part thereof.
7.	Assembly	One space for every 60 Sq.m. of floor area or part thereof.
8.	Business	One space for every 100 Sq.m. of floor area or part thereof.
9.	Mercantile	One space for every 80 Sq.m of floor area up to 800 sq.mt. and one space for every 160 Sq.m. thereafter.
10.	Industrial	One space for every 200 Sq.m. of floor area or part thereof subject to minimum of two spaces. In case of plots of 1.0 Ha. and above, minimum parking space shall be 10% of the plot area.

SR.	LAND-USE	CAR SPACES
11.	Storage	One space for every 200 Sq.m.of floor area or part thereof subject to minimum of two spaces.
12.	Hospitals	One space for every 150 Sq.m.of total floor area.
13.	Cinemas, Theatres and Multiplexes	One space for every 20 seats.
14.	Shopping / Malls	One space for 80 Sq.m.of total floor area or part thereof.
15.	Stadia	One space for every 150 seats plus additional as per the rules for restaurants etc.

37.2. In addition to the above 10% of total parking spaces shall be provided for visitor parking and 10% for two wheelers parking.

37.3. The above parking may be provided in the open area of a plot or in the basement or in the stilted area of a building or on the podium of a building. In case of multi –level parking, ramps shall be provided and mechanized methods (car lifts) may also be permitted for maneuvering purpose.

37.4. Car parking spaces shall be clearly shown on the site plan along with the maneuvering space to the satisfaction of MIDC.

37.5. In case of residential land-use 25% of the open space around the building may be used for parking. In case of other land-uses 50% of the open space around the building may be used for parking and loading, unloading provided that a minimum distance of 3.0 m around the building shall be kept free from any parking and loading, unloading spaces.

Notwithstanding the above, entire marginal open space around the building incase of residential plot up to 500 Sq.m may be utilized for parking with adequate maneuvering spaces.

37.6. In addition to the above table, loading and unloading spaces with suitable ramp access shall be provided for mercantile, industrial and storage land-uses as one space for every 100 Sq.m. of floor area or part thereof up to 500 Sq.m and one for every 500 sq.m or part thereof thereafter. The loading space shall be 3.75 m x 10.0 m

37.7. Whenever the existing FSI is enhanced, building permission shall be given only after the provision of additional parking spaces corresponding to the revised total built-up area.

37.8. Guidelines for parking arrangement shall be followed as given in Appendix II.

NOTES

- i. The above norms of parking spaces shall be considered as basic norms and shall be applicable in general to all notified areas in the State.
- ii. The norms of parking spaces shall be increased by 25% in case of Mumbai, Nagpur, Pune and Nashik Metropolitan Regions.
- iii. In case of backward regions other than Nagpur Region, the above parking standards may be reduced by 25%.
- iv. The above standards for parking may be modified with due consideration of the common parking facility provided in the layout by the planning authority.
- v. The above parking may be provided in the form of surface parking, integrated parking within a building (basement or multi-storied), or in an independent building or mechanized car parking.

38. Main Entrance and Boundary Walls

38.1. Main Entrance

The main entrance to a plot accommodating a multi-storied high rise or a special building shall be at least 4.5 m wide and shall be so designed as not to obstruct easy movement of a fire-engine or truck. The entrance gate to it shall open inside and fold back against the compound wall.

38.2. Boundary wall:

- i. Except with the permission of MIDC, the maximum height of a boundary wall shall be 2.0 m above the level of the centre line of the front street. A boundary wall up to 2.4 m height may be permitted if the top 0.9 m is of open type construction, to facilitate through vision.
- ii. At a corner plot, the height of the boundary wall shall be restricted to 0.75m for a length of 10 m on the front and side of the inter-section and the balance height of 0.75 m if required in accordance with (i) above may be made up of open type construction, to facilitate through vision.
- iii. In electric sub-stations, transformer stations, institutional buildings like sanatoria, hospitals, educational buildings like schools, colleges, including hostels, industrial buildings and other uses of public utility undertakings, a height up to 2.4 m may be permitted by MIDC.

39. Tree plantation

- i) The development in any plot of land shall be such as to preserve, as far as practicable existing trees, where trees are required to be felled, 2 trees shall be planted for every tree to be felled.
- ii) Every plot of land shall have at least one tree for every 100 Sq.m or part thereof, of the plot area. Where the number of existing trees in the plot is less than the above prescribed standard, additional number of new trees shall be planted.
- iii) Where the Tree Authority having jurisdiction in the area under development has prescribed standards or regulations in respect of preservation of trees under the Maharashtra (Urban Area) Preservation of Trees Act, 1975, the same shall supersede the sub-regulation (ii) above.

PART III - MIDC FIRE PROTECTION & LIFE SAFETY REGULATIONS

40. Fire Protection and Life Safety Regulations,

40.1. Short title extent and commencement:

40.1.1. These regulations may be called MIDC Fire and Life Safety Regulations, 2007

40.1.2. Fire protection and life safety regulations

They shall apply to development on any land in the notified areas of MIDC under Maharashtra Industrial Development Act, 1961. In particular, they shall apply to buildings which are more than 15m in height and to special buildings like educational, assembly, institutional, industrial, storage and hazardous and mixed occupancies with any of the aforesaid occupancies having area more than 150 sq.m and shall require clearance as under.

- i) For plots up to 1000 sq.mt. having non hazardous activities & buildings below 15 m. height from any *fire* officer, duly Authorized by the CEO, who shall examine the building proposed as per the guidelines and checklist given by fire department of MIDC.
- ii) For all other buildings from Chief Fire Officer of MIDC.

40.1.3. They shall come into force with immediate effect.

40.2. Definitions

Words and expressions not defined in these Regulations shall have the same meaning or sense as is assigned in the MR&TP Act 1966 and the DC Regulations for the Notified Areas MIDC, 2006

40.2.1. “Automatic Fire Detection & Alarm System”: Fire alarm system comprising components for automatically detecting a fire, initiating an alarm of fire and initiating other actions as appropriate. The system may include manual fire alarm call points.

40.2.2. “Automatic sprinkler system” means a system of water pipes fitted with sprinkler heads at suitable intervals and heights and designed to actuate automatically control and extinguish a fire by the discharge of water.

40.2.3. “Booster fire pump” means a mechanical/electrical device which boosts up the water pressure at the top level of a multi-storied/high rise

building and which is capable of a pressure of 3.2 kg/cm² at the nearest point.

- 40.2.4. “Combustible Materials”** means a material, which either burns itself or adds heat to a fire when tested for non-combustibility in accordance with IS: 3808 - 1979 method of test for Combustibility of Building Materials.
- 40.2.5. “Down Comer”** : An arrangement of fire fighting within a building by means of down comer pipe connected to terrace tank through terrace pump, gate valve and non return valve and having mains not less than 100 mm internal diameter with landing valve on each floor / landing. It is also fitted with inlet connections at ground level.
- 40.2.6. “Dry Riser”** An arrangement of the fire fighting within the building by means of vertical rising mains not less than 100 mm internal diameter with landing valves on each floor / landing which is normally dry but is capable of being charged with water usually by pumping from fire service appliances.
- 40.2.7. “Emergency Lighting”** Lighting provided for use when the supply to the normal lighting fails.
- 40.2.8. “Emergency Lighting System”** A complete but discrete emergency lighting installation from the stand by power source to the emergency lighting lamp(s) for e.g. self contained emergency luminaire..
- 40.2.9. “Enclosed Staircase”** means staircase separated by fire resistance walls and doors from the rest of the building.
- 40.2.10. “Escape Lighting”** That part of emergency lighting which is provided to ensure that the escape route is illuminated at all material times, for example, at all times when persons are on the premises, or at times the main lighting is not available, either for the whole building or for the escape routes.
- 40.2.11. “Escape Route”** shall mean any corridor, staircase or other circulation space, or any combination of the same, by means of which a safe place in the open air at ground level can eventually be reached.
- 40.2.12. “Exit”** means a passage, channel or means of egress from any building, storey or floor area to a street or other open space of safety; with horizontal, outside, and vertical exits having meanings at (i), (ii) and (iii) respectively as under:
- i. **“Horizontal Exit”** An arrangement which allows alternative egress from a floor area to another floor at or near the same level in an adjoining building or an adjoining part of the same building with adequate fire separation.

- ii. **“Outside Exit”** means an exit from a building to a public way, to an open area leading to a public way or to an enclosed fire resistant passage leading to a public way.
- iii. **“Vertical Exit”** means an exit used for ascending or descending between two or more levels, including stairways, smoke-proof towers, ramps, escalators and fire escapes.

- 40.2.13. “Fire and/ or Emergency Alarm System”** means an arrangement of call points or detectors, sounders and other equipment for the transmission and indication of alarm signals, and working automatically or manually in the case of fire or other emergency.
- 40.2.14. “Fire Exit”** A way out leading to an escape route having panic bar hardware provided on the door.
- 40.2.15. “Fire Lift”** means the lift installed to enable fire service personnel to reach different floors with minimum delay, having such features as required in accordance with this rules.
- 40.2.16. “Fire Proof Door”** means a door or shutter fitted to a wall / opening and constructed and erected with the requirement to check the transmission of heat and fire for a specified period.
- 40.2.17. “Fire Pump”** means a machine, driven by external power for transmitting energy to fluids by coupling the pump to a suitable engine or motor, which may have varying outputs/capacity but shall be capable of having a pressure of 3.2 kg/cm² at the topmost level of a multi-storey or high rise building.
- 40.2.18. “Fire Resistance”** means the time during which it fulfils its function of contributing to the fire safety of a building when subjected to prescribed conditions of heat and load or restraint. The fire resistance test of structures shall be done in accordance with IS: 3809 - 1979 Fire Resistance Test of Structures.
- 40.2.19. “Fire Resisting Wall”** A fire resistance rated wall, having protected openings, which restricts the spread of fire and extends continuously from the foundation to at least 1m above the roof.
- 40.2.20. “Fire Separation”** means the distance in metres measured from any other building on the site or from another site, or from the opposite side of a street or other public space to the building.

- 40.2.21. “Fire Service Inlet”** means a connection provided at the base of a building for pumping up water through in-built fire-fighting arrangements by fire service pumps in accordance with the recommendations of the Chief Fire Officer & Fire Advisor to MIDC.
- 40.2.22. “Fire Tower”** means an enclosed staircase which can only be approached from the various floors through landings or lobbies separated from both the floor area and the staircase by fire-resistant doors and open to the outer air.
- 40.2.23. “Hazardous Material” means -**
- i. Radio active substances;
 - ii. Material which is highly combustible or explosive and/or which may produce poisonous fumes or explosive emanations or storage, handling,
 - iii. processing or manufacturing of which may involve highly corrosive, toxic or noxious alkalis or acids or other liquids;
 - iv. Other liquids or chemicals producing flame, fumes, explosive, poisonous, irritant or corrosive gases, or which may produce explosive mixtures of dust or fine particles capable of spontaneous ignition.
- 40.2.24. “Lift Well”** means unobstructed space within an enclosure provided for the vertical movement of the lift car(s) and any counter weight(s), including the lift pit and the space for top clearance, and maintenance
- 40.2.25. “Means of Egress”** A continuous and unobstructed way of travel from any point in a building or structure to a place of comparative safety.
- 40.2.26. “Non-Combustible”** means material which does not burn nor add heat to a fire when tested for combustibility in accordance with IS-3808-1966.
- 40.2.27. “Pressurization”** The establishment of a pressure difference across a barrier to project a stairway, lobby, escape route or room of a building from smoke penetration.
- 40.2.28. “Smoke-Stop Door”** means a door for preventing or checking the spread of smoke from one area to another.
- 40.2.29. “Travel Distance”** means the distance to be traveled from the remotest point on a floor of a building to a place of safety be it a protected escape route, external escape route or final exit i.e. vertical exit, horizontal exit or an outside exit measured along the line of travel.

40.2.30. “Ventilation” supply of outside air into or the removal of inside air from an enclosed space.

40.2.31. “Venting Fire” The process of including heat and smoke to level a building as quickly as possible by such paths that lateral spread of fire and heat is checked, fire fighting operations are facilitated and minimum fire damage is caused.

40.2.32. “Wet Riser” An arrangement for fire fighting within the building by means of vertical rising mains not less than 100 mm nominal diameter with landing valve on each floor /landing for fire fighting purposes, and permanently charged with water from a pressurized supply.

40.3. General requirements for all occupancies:

40.3.1. Open spaces on road sides

40.3.2. For high rise building above 15 meters the open space required shall be as per Table 10, under regulation No 24.1

40.4. Construction

40.4.1. Building Materials

- i. Load bearing elements of construction and elements of construction for which the required fire resistance is one hour or more shall be of non-combustible material. Interior finish materials (wall panelings, floors, coverings etc) may be permitted of materials having their rating for flame spread and smoke developed not exceeding a very low flame spread limit in accordance with IS 1642 - 1989 (Class-1). Ceiling linings shall be of non-combustible or of plaster - board.
- ii. Stairs and corridors shall not contain combustible materials. All main and fire escape staircases shall be of RCC only for easy evacuation of occupants and carrying out fire fighting and rescue operations.
- iii. Structural members such as supports and bearing walls shall have fire resistance rating of 3 hours, transoms and ceilings 2 hours to 4 hours.
- iv. Internal walls and partitions (Fire Sections) walls separating corridor areas of floor that are used for any purpose other than circulation shall have a fire resistance of not less than two hours. There shall be no openings in such walls other than for doors or delivery batches with fire resistance not less than one hour.
- v. Facades shall consist of non-combustible building materials. A fire must bridge a distance of at least 0.9 meters between storeys.

40.5. Staircase enclosure

40.5.1. One lift and one staircase shall be considered as 2 exits, required as fire exits as per these rules, for buildings having height up to 15 meters. For the other buildings the number of exits shall be in accordance with the Clause 4.6 of Part 4 of NBC 2005.

40.5.2. The internal enclosing walls of staircase shall be of brick or RCC construction having fire resistance of not less than two hours. All enclosed staircases shall have access through self closing doors of at least one hour fire resistance. These shall be single swing doors opening in the direction of the escape. The door shall be fitted with check action doors closure.

40.5.3. The staircase enclosure on external walls of the building shall be ventilated to atmosphere at each landing.

40.5.4. Permanent vent at the top equal to 5% of the cross sectional area of the enclosure and open able sashes at each landing level with area not less than 0.5 sq.m on the external walls shall be provided. The roof of the shaft shall be at least 1m above the surrounding roof. There shall be no glazing or glass bricks in any internal enclosing wall of a staircase. If the staircase is in the core of the building and cannot be ventilated at each landing, a positive pressure of 5 mm w.g. by an electrically operated blower / blowers shall be maintained.

40.5.5. The mechanism for pressurizing the staircase shaft shall be so installed that the same shall operate automatically and also with manual operation facilities, when the automatic fire alarm operates.

40.5.6. a) - The maximum travel distance that shall be permitted from the farthest exit on a floor to the staircase shall be as follows:

Table 20: Travel distance

Sr no	Group of Occupancy	Maximum travel distance	
		Construction	
		Type1&2 (in meters)	Type 3&4 (in meters)
1	Residential	30.0	22.5
2	Educational	30.0	22.5
3	Institutional	30.0	22.5
4	Assembly	30.0	30.0
5	Business	30.0	30.0
6	Mercantile	30.0	30.0

Sr no	Group of Occupancy	Maximum travel distance	
		Construction	
		Type 1&2 (in meters)	Type 3&4 (in meters)
7	Industrial	45.0	*
8	Storage	30.0	*
9	Hazardous	22.5	*

Notes

- i. For fully sprinkled building, the travel distance may be increased by 50% of the value specified,
 - ii. Ramps shall be protected with automatic sprinkler system and shall be counted as one of the means of access,
- * - Construction of type 3 or 4 is not permitted.

b) Main staircases in buildings of all occupancies shall have a minimum width as specified in table number 16 under regulation number 32

40.6. Lift enclosures

40.6.1. The walls enclosing lift shafts shall have a fire resistance of not less than two hours. Shafts shall have permanent vents at the top not less than 1800 sq.cm in clear area. Lift motor rooms shall preferably be sited at the top of the shaft and shall be separated from lift shafts by the enclosing wall of the shaft or by the floor of the motor rooms.

40.6.2. Landing doors in lift enclosures shall open in the ventilated or pressurized corridor / lobby and shall have fire resistance of not less than one hour.

40.6.3. The number of lifts in one lift bank shall not exceed four. Shafts for fire lift in a lift bank shall be separated from each other by a brick masonry or RCC wall of fire resistance of not less than two hours. Lift car doors shall have fire resistance of not less than one hour.

40.6.4. If the lift shaft and lift lobby are in the core of the building, a positive pressure of not less than 2.5 mm and not more than 3 mm w.g. by an electrically operated blower / blowers shall be maintained in the lift lobby and positive pressure of not less than 5mm w.g. shall be maintained in the lift shaft. The mechanism for pressurizing the lift shaft and lift lobby shall be so installed that they shall operate automatically when the automatic fire alarm operate. The mechanism shall have facilities to operate manually (for building more than 24 m in height)

40.6.5. Exit from the lift lobby if located in the core of the building shall be through a self-closing smoke stop door of one hour fire resistance.

40.6.6. Lifts shall not normally communicate with basement. However, one of the lifts may be permitted to reach the basement levels provided the lift lobby at each basement level is separated from the rest of the basement areas, by fusible link operated fire resistance door of two hours fire resistance. The lobby should be pressurized, to minimize the spread of heat and smoke on upper floors of the building.

40.6.7. Exit from lift lobby shall be through a self-closing smoke stop door.

40.6.8. Grounding switch / switches at ground floor level to enable the fire service to ground the lift / cars in an emergency shall be provided (for building more than 15 m in height).

40.7. External windows

In case of centrally air-conditioned buildings area of the open able external windows on a floor shall be not less than 2.5% of the floor area. The locks for these windows shall be fitted with budget lock of the carriage key type (which can be opened with the point of a fireman's axe).

40.8. Lifts and fire lifts

Provisions for a fire lift shall be made as per the following details in all buildings more than 15 m only.

- a. To enable Fire Services personnel to reach to the upper floors with the minimum delay, one of the lifts shall be so designed so as to be available for the exclusive use of the Fireman in emergency and be directly accessible to every dwelling/lettable floor space on each floor.
- b. The lift shall have loading capacity of not less than 545 kgs (8 persons lift). The lift shall have a floor area of not less than 1.4 sq.m.
- c. The electric supply shall be on a separate service from electric supply mains in a building and the cables run in a route safe from fire, that is, within the lift shafts. In case of failure of normal electric supply, it shall be capable of changing over to alternate supply manually through a change over switch.
- d. The operation of a fire lift is by simple toggle or two button switch situated in a glass fronted box adjacent to the lift at the entrance level. When the switch is on, landing call points will control only. When the switch is off, the lift will return to normal working.
- e. This lift can be used by the occupants in normal times.
- f. The words "FIRE LIFT" shall be conspicuously displayed in fluorescent paint on the lift landing doors at each floor level.

- g. For buildings above 24 m in height, collapsible gates shall not be permitted for lifts and shall be solid doors with fire resistance of one hour.
- h. Lifts shall not be provided in the staircase well.
- i. The speed of the fire lift shall be such that it can reach the top floor from ground level within one minute or 91.5 meters per minute whichever is less.
- j. The lift machine room shall be separate and no other machinery shall be installed therein.
- k. Fire fighting lift should be provided with a ceiling hatch for use in case of emergency
- l. Telephone or other communication facilities shall be provided in the lift cars which shall be connected to fire control room of the building.

40.9. Basements

40.9.1. Each basement shall be separately ventilated. Vents with cross sectional area (aggregate) not less than 2.5% of the floor area spread evenly round the perimeter of the basement shall be provided in the form of grills or breakable stall boards lights or pavement lights or by way of shafts. Alternatively, a system of air inlets shall be provided at basement floor level and smoke outlets at basement ceiling levels. Inlets and extracts may be terminated at ground level with stall boards or pavement lights as before but ducts to convey fresh air to the basement floor level have to be laid. Stall boards and pavement lights should be in positions easily accessible to the Fire Bridge and clearly marked "SMOKE OUTLETS" or "AIR INLET" with an indication of area served at or near the opening.

40.9.2. The staircase of basement shall be of enclosed type having fire resistance of not less than two hours and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such positions that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storeys of the building and shall communicate with basement through a lobby provided with fire resisting self closing doors of one hour fire resistance. If the travel distance exceeds 18.50 m, additional staircases at proper places shall be provided. For fully sprinkled basements the above travel distance may be increased by 50%.

40.9.3. In multi - storey basements, intake ducts may serve all basement levels but each basement and basement compartment shall have separate smoke outlet duct or ducts.

40.9.4. Mechanical extractors for smoke venting system from lower basement levels shall also be provided. The system shall be of such design as to operate on actuation of heat sensitive detectors and sprinklers and shall have a considerably higher performance than the standard units. It should also have an arrangement to start it manually & shall be designed to function at a temperature not less than 550 degree Celsius.

40.9.5. Kitchens working on gas fuel, departmental stores and shops shall not be permitted in basement / sub-basement.

40.10. Service ducts

40.10.1. Service ducts and shafts for electrical conduits, cables etc. shall be enclosed by walls having a fire resistance of not less than two hours. Doors for inspection or access shall also have fire resistance of not less than two hours. All such ducts / shafts shall be properly sealed and fire stopped at all floors levels.

40.10.2. Refuse if the cross sectional area exceeds 1 sq.m it shall be sealed where it passes a floor by carrying the duct through the floor. The floor within the duct shall be pierced for any service pipe or ventilation trunk and shall fit as closely as possible around any such pipe or trunk.

40.10.3. A permanent vent shall be provided at the top of the service shaft of cross sectional area not less than 460 sq.cm or 6.25 sq.m for each 900 sq.cm of the area of the shaft, whichever is more.

40.11. Refuse Chutes and Refuse chambers

40.11.1. Hoppers to refuse chutes shall be situated in well ventilated positions and the chutes shall be continued upwards with an outlet above roof level and with an enclosure wall of non-combustible material with fire resistance not less than two hours. The hoppers shall not be located within the staircase enclosure.

40.11.2. Inspection panel and hopper (charging station) opening shall be fitted with tight fitting metal doors, covers having a fire resistance of not less than one hour.

40.11.3. Refuse chutes shall not be provided in staircase walls, air-conditioning shafts etc.

40.11.4. Refuse-chambers shall have walls and floors or roofs constructed of non-combustible and impervious material and shall have a fire resistance of not less than two hours. They shall be located at a safe distance from exit routes.

40.12. Building services

40.12.1. Electrical Services:

- a.) The electric distribution cables / wiring shall be laid in separate duct. The duct shall be sealed at every alternative floor with non-combustible materials having the same fire resistance as that of the duct.
- b.) Water mains, telephone lines, intercom lines, gas pipes or any other service line shall not be laid in the duct for electric cables.
- c.) Separate circuits for water pumps, lifts, staircases and corridor lighting shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes so that fire in one circuit will not affect the others.
- d.) The inspection panel doors and any other opening in the shaft shall be provided with air tight fire doors having the fire resistance of not less than two hours.
- e.) Medium and Low-Voltage wiring running in shafts and within false ceiling shall run in metal conduit.
- f.) An independent and well ventilated service room shall be provided on the ground floor with direct access from outside or from the corridor for the purpose of termination of electric supply cable. The doors provided for the service room shall have fire resistance of not less than two hours.
- g.) If the licensees agree to provide meters on upper floors, the licensees cables shall be segregated from consumer's cable by providing a partition in the duct.
- h.) PVC cables should have an additional sheeting or protection provided by compounds sprayed on after installation because of the notorious secondary damage in case of fire.

40.12.2. Town Gas / L P Gas supply pipes: Where gas pipes are run in the building, the same shall be run in separate shafts exclusively for this purpose and these shall be on external walls, away from the staircases. There shall be no inter connection of this shaft with the rest of floors.

40.13. Staircase and Corridor Lighting:

- a.) The staircase and corridor lighting shall be on separate service and shall be independently connected so as it could be operated by one switch installation on the ground floor easily accessible to fire fighting staff at any time irrespective of the position of the individual control of the light points, if any. The switch shall be of miniature circuit breaker type.

- b.) The staircase and corridor lighting shall also be connected to alternate supply as defined in Byelaw No. 12.4 for building exceeding 24 m in height. For assembly, institutional buildings of height less than 24 m the alternate source of supply may be provided by battery continuously trickle, charged from the electric mains.
- c.) Suitable arrangements shall be made by installation double throw switches to ensure that the lighting installed in the staircase and the corridor does not get connected to two sources of supply simultaneously. Double throw switch shall be installed in the service room for terminating the stand-by supply.
- d.) Emergency lights shall be provided in the staircases / corridor for all buildings above 15 m in height.

40.14. a) Alternate source of Electric Supply: A stand-by electric/ diesel generator for high hazard building shall be installed to supply power to staircase and corridor lighting circuits, fire lifts, the stand-by fire pump, smoke extraction and damper systems in case of failure of normal electric supply. The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously. If the stand-by pump is driven by diesel engine, the generator supply need not be connected to the stand-by pump. Where parallel HV/LV supply from a separate sub-station is provided with appropriate transformer for emergency, the provision of generator may be waived in consultation with competent Fire Officer authorized by the Chief Fire Officer and Fire Advisor, MIDC.

b) The provision of generator set as above shall not be applicable to residential buildings up to 24 m in height.

40.15. Transformers:

- a.) If transformers are housed in the building between the ground level, it shall be necessarily in the first basement in separate fire resisting room of 4 hours rating. The room shall necessarily be at the periphery of the basement. The entrance to the room shall be provided with a steel door of 2 hours fire rating. A curb (sill) of a suitable height shall be provided at the entrance in order to prevent the flow of oil from ruptured transformer into other part of the basement. The direct access to the transformer room shall be provided preferably from outside.
- b.) The switch gears shall be housed in a separate room separated from the transformer bays by a fire resisting wall with fire resistance not less than four hours.
- c.) The transformer if housed in basement shall be protected by an automatic high pressure water spray system (Emulsifier System).

- d.) In case the transformers housed in the basements are totally segregated from other areas of the basements by 4 hours fire resisting wall /walls with an access directly from outside it may be protected by carbon dioxide or B.C.F. fixed installation system.
- e.) When housed at ground floor level it / they shall be cut off from the other portion of premises by fire resisting walls of 4 hours fire resistance.
- f.) They shall not be housed on upper floors.
- g.) A tank of RCC construction of capacity capable of accommodating entire oil of the transformers shall be provided at lower level, to collect the oil from the catch-pit in case of emergency. The pipe connecting the catch-pit to the tank shall be of non-combustible construction and shall be provided with a flame arrester.
- h.) The transformers shall be protected by providing proper fire protection.
- i.) No grass or shrubs shall be allowed to grow in transformer switchyard.
- j.) A barbed wired fencing of minimum 1.5 m height shall be provided around transformer switchyard & the gate shall be provided for entrance. The gate should be always locked & the keys should be kept with authorized/responsible person of the company.
- k.) "Danger"/"No Smoking" board shall be displayed at the entrance gate of transformer switchyard.

40.16. Air Conditioning:

- a.) Escape routes like staircases, common corridors, lift lobbies etc. shall not be used as return air passage.
- b.) The ducting shall be constructed of substantial gauge metal in accordance with IS 655 - 1963 (Revised) and any revision thereof.
- c.) Wherever the ducts pass through firewalls or floors the opening around the ducts shall be sealed with fire resisting materials such as asbestos rope, vermiculite concrete, glass wool etc.
- d.) As far as possible, metallic ducts shall be used even for the return air instead of space above the false ceiling.
- e.) The materials used for insulating the duct system (inside or outside) shall be of non-combustible material such as glass wool etc.

- f.) Area more than 750 sq. m on individual floor shall be segregated by a fire wall and automatic Fire Dampers for isolation shall be provided where the ducts pass through fire walls. The fire dampers shall be capable of operating manually.
- g.) Air ducts serving main floor areas, corridors etc. shall not pass through the stair wall.
- h.) The air handling units (AHU) shall as far as possible be separate for each floor and air ducts for every floor shall be separate and in no way inter-connected with the ducting of any other floor.
- i.) The inspection panels shall be provided in the main turning to facilitate the cleaning of the ducts of accumulated dust and to obtain access for maintenance of fire dampers.
- j.) No combustible material shall be fixed near than 150 mm to any duct unless such duct is properly enclosed & protected with non-combustible material (glass, wool or sunglass with neoprene facing enclosed & wrapped with aluminum sheeting) at least 3.2 mm thick and which would not readily conduct heat.
- k.) If the air handling unit serves more than one floor, the recommendations given above shall be complied with in addition to the conditions given from 'l' to 'q' below.
- l.) Proper arrangements by way of automatic fire dampers working on smoke detectors for isolating all ducting at every floor from the main riser shall be made.
- m.) When the automatic fire alarm operates the respective air handling units of the air conditioning system shall automatically be switched off.
- n.) Automatic fire dampers shall be provided at the inlet of the fresh air duct and the return air duct of each compartment / shop on every floor.
- o.) Automatic fire dampers shall be so arranged so as to close by gravity in the direction of the air movement and to remain tightly closed upon operating of a smoke detectors.
- p.) The air filters of the air-handling units shall be of non-combustible materials.
- q.) The air handling unit room shall not be used for storage of any combustible materials.

40.17. Boiler Room

Provisions of Boiler and Boiler Rooms shall conform to Indian Boiler Act. Further, the following additional aspects may be taken into account in the location of Boiler/Boiler Room

- a.) The boilers shall not be allowed in sub-basement but may be allowed in the basements away from the escape routes.

- b.) The boilers shall be installed in a fire resisting room of 4 hours fire resistance rating and this room shall be situated on the periphery of the basement. Catch-pits shall be provided at the low level.
- c.) Entry to this room shall be provided with a composite door of 2 hours fire resistance.
- d.) The boiler room shall be provided with fresh air inlets and smoke exhausts directly to the atmosphere.
- e.) The furnace oil tank for the Boiler if located in the adjoining room shall be separated by fire resisting wall of 4 hours rating. The entrance to this room shall be provided with double composite doors. A curb of suitable height shall be provided at the entrance in order to prevent the flow of oil into the Boiler room in case of tank rupture.
- f.) Foam inlets shall be provided on the external walls of the building near the ground level to enable the fire service to use foam in case of fire.

40.18. Hazardous or inflammable materials

- a.) No hazardous materials shall be allowed to be stored or kept in any part of high rise building either as storage or for handling, processing or manufacturing etc.
- b.) Use of inflammable solvents for cleaning carpets etc. shall not be allowed inside the building.
- c.) No refuse dumps or storage places shall be permitted in the staircase walls.
- d.) Liquefied petroleum gas (LPG) shall not be stored or used in basement.
- e.) Auto repairs and spray painting shall not be allowed in basement.
- f.) Where gas pipes are run in the building, the same shall be run in separate shafts exclusively for this purpose and these shall be on external walls, away from the staircase. There shall be no interconnection of this shaft with the rest of the floors.
- g.) Wooden or any other combustible materials shall not be used in staircases, lift lobby and such other places, which connect one floor to other.

40.19. Provision of first aid fire fighting appliances

- 40.19.1.** The first aid fire fighting equipments shall be provided on all floors including basements, occupied terraces, lift rooms, meter rooms, transformer rooms in accordance with IS 2190 - 1992 or revision thereof and in accordance with table No. 23, PART 4 of NBC 2005. Recommendations for providing First-aid-Fire Fighting Arrangements in Public Buildings in consultation with the competent fire authority as designated or authorized by the MIDC.

40.19.2. The fire fighting appliances shall be distributed over the building in accordance with prevailing IS: Code of practice for selection, installation and maintenance of portable first-aid fire appliances.

40.20. Fixed fire fighting installations:

40.20.1. All buildings depending upon the occupancy use shall be protected by wet riser, wet riser cum down comer automatic sprinkler installation, high pressure water spray or foam generating system etc. as per the details given below in Regulation No 40.20.3 to 40.20.8.

40.20.2. Fire Fighting Installations / Requirements: The fire fighting installations / requirements shall be as per the tables in Appendix X.

40.20.3. The Wet Riser installations shall conform to IS 3844-1989 Code of Practice for installation of internal fire hydrants in multi-storied buildings. In addition, Wet Riser shall be designed for zonal distribution ensuring that unduly high pressure are not developed in risers and hose pipes.

In addition to Wet Risers / Wet Riser-cum-down comer, first aid hose reels shall be installed on all the floors of the buildings above 15 m and shall conform to IS 884 - 1985. Specification for first aid hose reel for fire fighting (fixed installation). The first aid hose reel shall be connected to one of the female couplings of twin couplings of landing valves of the Wet Riser installations by means of adopter.

40.20.4. a) Static Water Storage Tank: A satisfactory supply of water for the purpose of fire fighting shall always be available in the form of underground static storage tank with capacity specific for each building with arrangements of replenishment by main or alternative source of supply @ 1000 litres per minute. The static storage water supply required for the above mentioned purpose should entirely be accessible to the fire engines of the local Fire Services. Provision of suitable number of manholes shall be made available for inspection, repairs and inspection of suction holes etc. The covering slab shall be able to withstand the vehicular load of 25 tons. The domestic suction tank connected to the static water storage tank shall have an overflow capable for discharging 2250 litres per minute to a visible drain point from which by a separate conduits, the overflow shall be conveyed to a storm water drain.

b) To prevent stagnation of water in the static water storage tank, the suction tank of the domestic water supply shall be fed only through an overflow arrangement to maintain the level therein at the minimum specified capacity.

c) The static water storage tank shall be provided with a fire brigade collecting breaching with 4 nos. 63 mm dia (2 nos. 63mm dia for pump with capacity 1400 litres / minute) instantaneous male inlets arranged in a valve box at a suitable point at street level and connected to the static tank by a suitable fixed pipe not less than 15 cm dia to discharge water into the tank when required at a rate of 2250 litres per minute.

40.20.5. Automatic Sprinklers:

Auto - sprinklers shall be installed:

- a) In basement used as car parks, if the area exceeds 200 sq.m.
- b) In multi-storey basements used as car parks and for housing essential services ancillary to a particular occupancy.
- c) Any room or other compartment of a building exceeding 500 sq.m.
- d) Departmental stores or shops that totally exceed 750 sq.m.
- e) All non-domestic floors of mixed occupancy considered to constitute a hazard and not provided with staircases independent of the remainder of a building.
- f) Godown and warehouses as considered necessary.
- g) On all floors of the buildings other than residential buildings, if the height of the building exceed 60m
- h) Dressing rooms, scenery docks, stages and stage basements of theatres.
- i) All business, mercantile, residential hotels having building height 24m and above shall have sprinkler system

40.20.6. Automatic high pressure water spray (mulsifyre) system:

- a) This system shall be provided for protection of indoor transformers.
- b) High pressure water spray system shall be provided for all "Class A petroleum products & storage of hazardous gases".

40.20.7. Foam Generation System: This system shall be provided for protection of boiler rooms with its ancillary storage of furnace oils.

40.20.8. Carbon-Di-oxide Fire Extinguishing System: Fixed CO₂ fire extinguishing installation shall be provided as per IS 6382 - 1984 (or latest edition) Code of Practice for design and installation of fixed CO₂ fire extinguishing system on premises where water or foam cannot be used for fire extinguishment because of the special nature of the contents of the buildings areas to be protected. Where possible FC -227, FM 200, HFP (heptafluoropropane), Inergen, etc. types of gases may be used for total flooding for fire protection instead of CO₂ installation.

40.21. Fire alarm system:

All buildings with heights mentioned against each shall be equipped with fire alarm system as given in Regulation No. 40.20.1 and 40.21.1 to 40.21.2

40.21.1. Residential Buildings above 35 m, Residential Hotels above 15 m, Business, Educational & Institutional Building above 24 m, Storage Buildings above 15 m, and industrial buildings having built up area above 500:

- a. Such buildings shall be equipped with manually operated electrical alarm system with one or more call boxes located at each floor. The location of the call boxes shall be decided after taking into consideration the floor plan with a view to ensure that one or the other call box shall be readily accessible to all occupants of the floor without having to travel more than 22.5 m
- b. The call boxes shall be of the “break-glass” type without any moving parts, where the call is transmitted automatically to the control room without any other action on the part of the person operating the call box.
- c. All call boxes shall be wired in a closed circuit to a control panel in the control room, so that the floor number where the call box is actuated is clearly indicated on the control panel. The circuit shall also include one or more batteries with a capacity of 48 hours normal working at full load. The battery shall be arranged to be continuously trickle - charged from the electric mains. The circuit may be connected to alternate source of electric supply as defined in Regulation No. 40.12.1.
- d. The call boxes shall be arranged to sound one or more sounders so as to ensure that all the occupants of the building shall be warned whenever any call box is actuated.
- e. The call boxes shall be so installed that they do not obstruct the exit-ways and yet their location can easily be noticed from either direction. The base of the call box shall be at a height of 1 m from the floor level.

40.21.2. All other buildings exceeding 24 m height excluding those mentioned above:

The building shall, in addition to the manually operated electrical fire alarm system, be equipped with an automatic fire alarm system. The latter shall be in addition to the alarm which may be sounded by the actuation of any automatic fire extinguishing system which may be installed in any particular occupancy in accordance with these bylaw. The detectors for the automatic fire alarm shall conform to relevant IS specification Head / Smoke sensitive type Fire Detector and the system shall be installed in accordance with IS 2189 – 1999 or (latest edition) Code of practice of Automatic Fire Detection and Alarm System or any other relevant Indian Standard prescribed from time to time.

Notes:

1. Several types of fire detectors are available in the market but the application of each type is limited and has to be carefully considered in relation to the type of risk and the structural feature of the building where they are to be installed.
2. No automatic detectors shall be required in any room or portion of building which is equipped with an approved installation of automatic sprinklers.

40.22. Lightning protection of buildings:

The lightning protection for the buildings shall be provided as given in Part – 8 “Building Services, Section 2, Electrical Installations” of National Building Code of India 2005.

40.23. Fire control Room

For residential buildings with a height of 30 meter and above and for all other buildings with a height of 15 meter and above there shall be a control room on the entrance floor of the building with communication system (suitable public address system) to all floors and facilities for receiving the message from different floors. Details of all floor plans along with the details of the fire fighting equipment and installations shall be maintained in the Control Room. The Control Room shall also have facilities to detect the fire on any floor through Indicator Boards connecting fire detecting and alarm system on all floors. The staff in charge of control room shall be responsible for the maintenance of the various services and fire fighting equipment and installations.

40.24. Refuge area

- a. In multi-storied and high-rise buildings, at least one Refuge Area shall be provided on the floor immediately above 24 M
- b. It shall be on the external walls as a cantilevered projection or in any manner.
- c. It shall have a minimum area of 15 sq.mt. and a minimum width of 3.0 m
- d. It shall not be counted in FSI.

40.25. Caretaker for residential, hotels, business, mercantile, industrial, storage and hazardous buildings with height more than 30 m

40.25.1. A qualified Fire Officer with experience of not less than 3 years shall be appointed as a care taker who will be available on the premises at all times.

The qualification of Fire Officer shall be as under:

1. Should have Diploma or Adv. Diploma of National Fire Service College, Nagpur.
- OR
2. Should have Degree of B.E. (Fire) from NFSC, Nagpur. OR
3. Should have passed Grade (I) Fire, U.K. or India.

40.25.2. The Fire Officer shall -

- i. Maintain the fire fighting equipment in good working condition at all times.
- ii. Layout fire orders and fire operational plan.
- iii. Impart training to the occupants of the buildings in the use of fire fighting equipments provided on the premises and keep them informed about the fire emergency evacuation plan.
- iv. Keep proper coordination with Local Fire Service.

40.26. House keeping:

To eliminate fire hazards a good house keeping inside the building and outside the buildings shall be strictly maintained by the occupants and / or the owner of the building.

40.27. Fire drills and fire orders:

Fire notices / orders shall be prepared to fulfill the requirements of the fire fighting and evacuation from the buildings in the event of fire and other emergency. The occupants shall be made thoroughly conversant with their action in the event of the emergency, by displaying fire notices at vantage points and also through regular training as per the provisions specified in Annex "E" of Part 4 of NBC 2005. Such notices should be displayed prominently in bold lettering.

40.28. Security deposits:

For buildings which are more than 24 M in height the applicant / owner shall deposit and keep deposited an amount of Rs 20,000/- as security deposit, at the time of application to the Chief Fire Officer of MIDC for approval under these regulations, for the due performance of the requirements of these regulations. The security deposit shall be refunded without interest, after the grant of Occupancy Certificate.

40.29. Fire Protection Fund Fees and Additional Fire Protection Fund Fees for developments in MIDC

The Fire Protection Fund Fees *as applicable and amended from time to time* are applicable to all new developments in MIDC as per the provisions of clause 11 and 25 of Maharashtra Fire Prevention and Life Safety Measures Act 2006.

The additional Fire Protection Fund Fees are applicable to all high rise buildings in addition to Fire Protection Fund Fees.

40.30. Additional requirements for industrial buildings (Group G), Storage Building - (Group H) and Buildings of Hazardous Use (Group J)

In addition to the general requirements specified above, the requirements given in Clause Nos. 6.7, 6.8 and 6.9 of Part IV of the National Building Code of India, 2005

shall be complied with for the above group of buildings. In addition the following Annexure shall be followed for the respective occupancy.

Annex A - Calorific values of common materials and typical values of fire load density

Annex B - Broad classification of industrial and Non Industrial occupancies into different degree of hazard.

Annex C - Fire protection Requirements for high rise buildings – 15m in height or above.

Annex D – Fire protection Considerations for venting in industrial buildings

Annex E – Guidelines for fire drill and evacuation procedures for high rise buildings

40.31. Compartmentation

The building shall be suitably compartmented so that fire/ smoke remain confined to the area where fire incident has occurred and does not spread to the remaining part of the building.

40.32. Helipad

For the high rise buildings above 60 m in height, provision for helipad should be made.

40.33. Passive fire protection required

The passive Fire Protection Requirements shall be as per PART IV of National Building Code of India 2005.

PART – IV OTHER ASPECTS OF DEVELOPMENT

41. Structural design and building services

The following aspects of development shall be governed by the provisions of the National Building Code of India 2005 - Indian Standard Institution or any modifications thereof.

1. Building Materials.
2. Structural Designs.
3. Constructional Practice and Safety.
4. Building services.
 - a. Electrical Services
 - b. Air Conditioning and Heating
 - c. Installation of lifts and escalators
5. Plumbing Services
 - a. Water Supplies
 - b. Drainage and Sanitation
6. Lightning Protection.

42. Fuel Stations and Weigh Bridges

The development of fuel stations and weigh bridges shall be governed by special Regulations as contained in Appendix III.

43. Erections of Hoardings

The erection of hoardings shall be governed by special Regulations as contained in Appendix IV.

44. Housing for Industrial Workers

Housing schemes for Industrial workers shall be governed by the special Regulations as contained in Appendix V.

45. Regulations for Physically Handicapped

The provisions for physically handicapped shall be governed by the special Regulations as contained in Appendix VI.

46. Rainwater Harvesting

The provisions for Rainwater Harvesting shall be governed by Special Regulations as contained in Appendix VII.

47.Solar Energy Assisted System

The provision for use of non-conventional energy shall be governed by Special Regulations as contained in Appendix VIII.

48.Height restrictions in the Vicinity of Aerodromes

For structures, and installations of buildings in the vicinity of aerodromes, the height shall be as shown in Table below or such greater height as may be permitted by the Civil Aviation Authorities.

Table 21: Building Height Restrictions in the Vicinity of Aerodromes

Sr. No.	Distance of buildings, structures or installations, measured horizontally, (as crow flies) from aerodrome reference point.		Permissible height of structures or installation/ buildings above mean sea level/ Aerodrome Reference Point
	International civil airports and their alternate.	Other Civil airports and Civil Aerodromes	
(1)	(2)	(3)	(4)
1)	Between 8535 m and 22000 m	Between 7925 m and 22000 m	152 m
2)	Between 7315 m and 8535 m	Between 6706 m and 7925 m	122m
3)	Between 6096 m and 7315m	Between 5486 m and 6706 m	91 m
4)	Between 4877 m and 6096 m	Between 4267 m and 5486 m	61 m
5)	Between 4267 m and 4877 m	Between 3658 m and 4267 m	45m*
6)	Between 5658 m and 4267 m	Between 3048 m and 3658 m	36 m*
7)	Between 3048 m and 3658 m	Between 2438 m and 3948 m	24 m/
8)	Between 2438 m and 3048 m	Between 1829 m and 2438 m	12 m*
9)	Less than 2438 m	Less than 1829 m	Nil except with the concurrence of the Civil Aviation Authorities.

Note: Height limits shall also be applicable for tree heights

Explanations:

- i. Irrespective of their distance from the aerodrome, even beyond the 22 km limit from the aerodrome reference point, no radio masts or similar installation exceeding 152 m in height shall be erected without the permission of the Civil Aviation Authorities.
- ii. The location of a slaughter house/ abattoir/ butcher house or other areas for activities like depositing of garbage which may encourage the collection of high flying birds, like eagle and hawks, shall not be permitted within 10 km from the aerodrome reference point.
- iii. Within a 5 km radius of the aerodrome reference point, every structure/ installation/ building shall be so designed as to meet the pigeon/bird-proofing requirements of the Civil Aviation Authorities. Such requirements may stipulate the prohibition of any cavity, niche, or other opening on the exterior of such building/ installation/ structure so as to prevent the nesting and habitation of pigeons or other birds.
- iv. **Other restrictions in height:** For the purpose of operational requirements of buildings structures or installations or for the purpose of telecommunications or other forms of communications of the departments of the Government of India or the State Government or Public Sector Undertakings, MIDC may for reasons to be recorded in writing restrict the height of any building in the vicinity of such buildings, structures or installation, and may also permit the prescribed heights to be exceeded for such buildings, structures or installations themselves or for any other statutory communication requirement,
- v. **Structures not relevant to height:** The following appurtenant structures shall not be included in reckoning the height of a building except while considering the requirement of Civil Aviation Authorities and other statutory communications requirements :- Roof tanks and their supports, ventilation/air- conditioning shafts, lift-rooms and similar service equipment, stair covers, chimneys and parapet walls, architectural features not exceeding 1.5 m in height, television antenna, booster antenna and wireless transmitting and receiving towers.

49. Interpretation: *If any question or dispute arises with regard to interpretation of any of these Regulations the matter shall be referred to the State Government which, after considering the matter and, if necessary, after giving hearing to the parties, shall give a decision on the interpretation of the provisions of these Regulations. The decision of the Government on the interpretation of these Regulations shall be final and binding on the concerned party or parties.*

APPENDIX I - CLASSIFICATION OF INDUSTRIES

(Regulation No – 17.4 of these Regulations)

1 Light Industries

Definition - Light industries are defined as those which do not employ more than 100 workers and do not use power more than 100 H.P. except in the case of foundries and smithies, they do not generally consume any solid fuel. The plot area requirement per unit does not normally exceed 4.9 acres (2 Ha).

Sr. No.	Permissible
1.	Washing soap.
2.	Aluminium utensils.
3.	Copper, brass/ bell metal utensils.
4.	Torches (flashlights).
5.	Cycle parts and accessories.
6.	Steel slates.
7.	Tin products (including containers, tin buttons and tin printing).
8.	Oil stoves and pressure lamps.
9.	Tricycles and prams.
10.	Buttons (all kinds).
11.	Hair oils and cosmetics.
12.	Electric Motors (fractional horse power).
13.	Zip fasteners.
14.	Show grindery.
15.	Animal shoe nails.
16.	Wax polishes.
17.	Precipitated chalk.
18.	Upholstery springs and other springs.
19.	Hoofs and box.
20.	Die and tool room shop.
21.	Small foundries (ferrous and non-ferrous).
22.	Sprayers (hand and foot).
23.	Watch and clock parts.
24.	Chalk, crayon and artists' colours.
25.	Builder's hardware.
26.	Drugs and medicines.

Sr. No.	Permissible
27.	Sewing machines (assembly)
28.	Sanitary fittings.
29.	Wire nails, panel pins and wood screws.
30.	Machine screws, bolts, nuts, rivets.
31.	Hand tools.
32.	Measuring tapes (metallic and non-metallic).
33.	Writing ink.
34.	Wooden industrial goods.
35.	Padlocks and pressed locks.
36.	Glass cutting, etching and polishing.
37.	Scientific glass instruments.
38.	Costume, jewellery and novelties.
39.	Decorated glass wares.
40.	Blower fans.
41.	Television parts.
42.	Electrical condensers (paper).
43.	Optical instruments.
44.	Buckets and metal containers.
45.	Animal feed.
46.	Manufacture of misc food products such as baking powder, flavouring essences edible silver paper/fail etc.
47.	Carpet and durree, weaving.
48.	Paper coating and glazing.
49.	Cleaning and polishing preparations.
50.	Phenyle and insecticides (not obnoxious in character).
51.	Sheet metal works.
52.	Metal stamping, coating and engraving.
53.	Laboratory reagents.
54.	Flood lights, reflectors and studio.
55.	Auto-transformers.
56.	Essential oils and aromatic oils.
57.	Torch bulbs and aromatic oils.
58.	Gramophone parts.
59.	Storage batteries and accessories.
60.	Wire netting.

Sr. No.	Permissible
61.	Vaccum flasks.
62.	Saw milling.
63.	Umbrella ribs.
64.	Aluminum wares.
65.	Collapsible gates.
66.	Railing and grills.
67.	Expanded metals.
68.	Toys and other similar products.
69.	Power looms.
70.	Oil seeds crushing (non-edible).
71.	Lawn mowers.
72.	Hand pumps.
73.	Electrical equipments for auto cycles and motor cycles.
74.	Writing and marking inks.
75.	Bakelite electrical accessories.
76.	Automobile leaf springs.
77.	Bakeries and confectionaries.
78.	Ice factories and cold storage plants.

2 Extensive Industries

Definition: Extensive industries are those which employ more than 100 workers and may use any kind of motive power or fuel subject to ofcourse, to their noxious features. These industries usually require more than 4.9 acres (2 Ha) of site area per unit.

Sr. No.	Permissible
1.	Chains of gears.
2.	Automobile parts.
3.	Conduit pipes.
4.	Electric fans.
5.	Refrigerators and air conditioners.
6.	Water proof textiles.
7.	Weighing and measuring machines.
8.	Steel joinery.
9.	Machine tools.
10.	Plaster and plaster board.
11.	Wire drawing.

Sr. No.	Permissible
12.	Mica and Micanite.
13.	Paints, varnishes and lacquers.
14.	Typewriters and parts.
15.	Hurricane lanterns.
16.	Veneer and plywood.
17.	Razor blades.
18.	Sewing machines.
19.	Edible oils and fats (medium-scale).
20.	Agricultural implements (large-scale).
21.	Flour mills.
22.	Re-rolling mills.
23.	Rubber goods (moulded and dipped).
24.	Plastic products (large scale).
25.	Iron and steel forging (Mechanical).
26.	Pressure die castings.
27.	Electric motors (more than 1 H.P.)
28.	Bicycle manufacturing.
29.	Hume pipes.
30.	Centrifugal pumps and small turbines.
31.	Matches.
32.	Vitreous enamelling.
33.	Hot tinning.
34.	Asbestos and cement products.
35.	Glucose manufacturing.
36.	Printing machinery and parts.
37.	Lead Pencils.
38.	Industrial leather goods.
39.	Industrial precision instruments.
40.	Small tools.
41.	Electrical precision instruments.
42.	Printing ink.
43.	Toilet soaps.
44.	Cigarettes.
45.	Starch.

Sr. No.	Permissible
46.	Manufacture of wooden structural frames.
47.	Silk reeling, spinning, weaving.
48.	Paving and roofing materials.
49.	Drugs and medicines.
50.	Glass products.
51.	Electric wires and cables. •
52.	Steel doors and windows.
53.	Motor cycles and scooters.

3 Heavy and Large-Scale Industries

Definition: Such industries are highly capital-intensive and also land-intensive in character and they generally function as self-contained and independent units.

Sr. No.	Permissible
1.	Heavy structural steel fabrication.
2.	G.I. malleable pipe fittings.
3.	Heavy diesel engines.
4.	Sugar.
5.	Vegetable oils (hydrogenated).
6.	Textile mills.
7.	Blast furnaces, steel works and rolling mills.
8.	Primary and secondary smelting and refining of non-ferrous metal and alloys.
9.	Automobile and coach building.
10.	Manufacture of aircraft frames and aero-engines.
11.	Special industrial machinery.
12.	Sluice gates and gearings.
13.	Cranes and hoists.
14.	Steel pipes and tubes.
15.	Wire ropes.
16.	Steel chains (conveyors, shipping).
17.	Electrical steel sheets and stampings.
18.	Heavy steam engines.
19.	Power Driven pumps and pumping equipments.
20.	Tractors and heavy agricultural machinery.
21.	Metal working machinery.
22.	Electrical generating transmission, distribution and industrial apparatus.

Sr. No.	Permissible
23.	Rail-road equipment.
24.	Industrial trucks, trailers, stackers, etc.
25.	Earthmoving machinery.
26.	Conveyors and conveying equipment.
27.	Heavy iron and steel forgings.
28.	Foundries (heavy).
29.	Other primary metal industries (e.g., cold rolled sheets, alloy steel, etc.).
30.	Turbines.
31.	Ship-yards.
32.	Rayon productions.
33.	Nylon production.
34.	Jute spinning and weaving.
35.	Cement.
36.	Asbestos cement sheets and pipes.
37.	Manufacture of locomotives-electric, diesel and steam.

4 Obnoxious or Hazardous Industry

Definition - These are industries which are associated with such features as excessive smoke, noise, vibration, stench, unpleasant or injurious fumes, effluents, explosives, inflammable material etc. and other hazards to the health or safety of the community.

Sr. No.	Industrial Groups	Noxious characteristics
1.	CHEMICAL INDUSTRY	
1.	Inorganic Manufacturing Industries	i. Acids : Sulphuric acid, Nitric acid, acetic acid, Battery acid, Benzoic acid, arboic acid, Chlorosulphonic acid, etc.
		ii. Alkalies:Caustic soda, caustic potash, soda ash, etc.
		iii. Production of mineral salt which involves use of acids.
		iv. Carbon disulphide, Ultramarine blue, chlorine, hydrogen.
2.	Organic Manufacturing Industries	i. Dyes and Dyestuff intermediate manufacture.

Sr. No.	Industrial Groups	Noxious characteristics
	ii. Synthetic plastics like Polythylene, PVC, Resins, Nylon.	Distillates from reaction vessels, fire risk also.
	iii. Synthetic rubber	Liquid effluents with unpleasant smell.
	iv. Synthetic detergents.	Unpleasant smell and risk of fire.
	v. Insecticides, Fungicides and pesticides.	Unpleasant smell and dust fire hazards.
	vi. Phenols & related industries based on coaltar distillation.	Risk of fire.
	vii. Organic solvents, chlorinated minerals, methanol, aldehyde and methylated spirits.	Fire hazard, unpleasant smell.
	viii. Manufacture of compressed 'permanent' liquified and dissolved gases.	Risk of fire.
	ix. Acetylides, pyridines, Iodorform, chloroform, B- naphthol etc.	Risk of fire, smell.
3.	Miscellaneous	Electro-thermal industries such as manufacture of Calcium carbide, phosphorous, Aluminum dust, paste and powder, and copper zinc etc.
4.	Poisons	Ammonium Sulpho-cyanide, arsenic and its compounds, Barium acetate, Barium carbonate, Barium cyanide, Barium ethyl-sulphate, Barium acetate Cinnabar, Copper Sulpho-cyanide Hydrocyanic acid, Potassium cyanide, prussiate of potash, pyrogalllic acid, silver cyanide etc.
5.	Manufacture of Rayon fibre, waste products Cellulosic Rayophane paper, etc. Cellulose Products. nitrate, celluloid articles, scrap and solution.	Risk of fire.
6.	Paints, Enamels, Colours, Varnish (other than Litho Varnish) and warnish removers of all kinds. Turpentine and Turpentine Substitutes.	Risk of fire and smell.
7.	Matches.	Fire Hazards.
8.	Printing Ink.	Fire Hazards.
9.	Industrial Alcohol.	Unpleasant smell
10.	Manufacture of Newsprint.	Unpleasant smell, enormous

Sr. No.	Industrial Groups	Noxious characteristics
		quantities of contaminated waste water, and fire hazard.
II. PETROLEUM PRODUCTS.		
1.	Crude Oil refining, processing and cracking, Petroleum jelly, petroleum ether, Naphtha cracking including Gaz cracking for any purpose	Inflammable Fumes and noise.
2.	Carbon black manufacture and blacks of all kinds.	Fire hazard.
3.	Petroleum coke usage for Graphite production.	Fire hazard.
4.	Lubricating and fuel oils and illuminating oils and other oils such as schist oil, shale oil etc.	Fire hazard.
III. RUBBER INDUSTRY		
1.	Reclamation of rubber and production of tyres, rubber solutions containing mineral Naphtha rubber waste.	Unpleasant smell, dust and fire.
IV. METALLURGICAL INDUSTRIES WITH THE FOLLOWING OPERATIONS.		
1.	Sintering, Smelting	Noise, dust, smoke and risk of fire.
2.	Blast furnaces.	
3.	Recasting of ore sulphide oxides or mixtures.	
V. MANUFACTURE OF RADIO ACTIVE ELEMENTS		
1.	Such as -Thorium, Radium and similar isotopes and recovery of rare earth.	Radiation hazard.
VI. PAPER AND PAPER PRODUCTS		
1.	Large scale paper, pulp and board manufacture.	Unpleasant smell large quantities of contaminated waste water.
VII. LEATHER AND OTHER ANIMAL PRODUCTS		
1.	Leather tanning	Obnoxious smell.
2.	Glue and gelatine manufacture from bones and flesh.	Obnoxious smell.
3.	Bone crist, bone meal, bone powder or storage of bones in the open.	Obnoxious smell.
4.	Glanduler extractions.	Obnoxious smell.
5.	Animal and fish oils.	Risk of fire.
VIII. MANUFACTURE OF EXPLOSIVE AMMUNITIONS		
1.	All types of explosives or their ingredients such as fireworks of all kinds, bon-bons, gun cotton, gun power, flares, flash powers, rockets.	Fire explosion hazard.
2.	Industrial gelatine, nitroglycerine and fulminate.	Risk of fire.

Sr. No.	Industrial Groups	Noxious characteristics
IX. MANUFACTURE OF CEMENT AND REFRACTORIES		
1.	Portland cement.	Dust.
2.	Refractories.	Smoke and solid waste.
3.	Enamelling vitreous.	Smoke from furnace.
4.	Glass furnaces of 3 tonne capacity and above.	Fire.
5.	Mechanical stone-crushing.	Dust, shurry noise.
X. FERTILIZERS.		
1.	Nitrogenous and phosphatic fertiliser manufacturing on large-scale except mixing of fertilisers for compounding.	Fire, noise, atmosphere pollution due to noxious gases, fire and dust.
XI. HEAVY ENGINEERING AND FORGING SHOPS		
1.	Using steam and power hammers and heavy metal forgings.	Noise, vibration and smoke.
XII. WOOD AND WOOD PRODUCTS		
1.	Distillation of wood.	Readily ignitable obnoxious gases; risk of fire.
XIII. TEXTILES		
1.	i Oil sheets and water proof clothing (a) Wool spinning.	Fire hazard. Wool Washing liquor containing certain impurities.
2.	Clean rags (not including clean textile cutting), oily and greasy rags.	Fire hazard.
3.	Flax Yarn and other fibre.	Fire hazard.
4.	Textile finishing, bleaching and dyeing.	Waste water containing acids etc.
XIV. FOODS		
1.	Vegetable oils.	Noise, unpleasant smell.
2.	Abattoirs	Waste water with obnoxious smell.
3.	Alcohol distilleries and Breweries.	Oxygen causing unpleasant smell, noise, fire hazard.
4.	Sugar refining.	Unpleasant smell, and fire hazard.
XV. TRANSPORT		
1.	Manufacture of aircraft, locomotives, etc.	Smoke and noise.

5 Service Industries -- Class 'A' / Class 'B'

Sr. No.	Category of Industry.	Service Industry, Class A				Service Industry, Class B			
		Criteria for classification and special conditions.				Criteria for classification and special conditions.			
		Maximum permissible power requirement (HP)	Maximum permissible employment (Persons)	Maximum permissible floor area. (Sq.M).	Special conditions, if any.	Maximum permissible power requirement (HP)	Maximum permissible employment (Persons)	Maximum permissible floor area. (Sq.M).	Other Special conditions if any.
1	2	3	4	5	6	7	8	9	10
	I. FOOD PRODUCTS								
1.	Preservation of meat canning preserving and processing of fish, crustacea and similar foods.	-	Not included	-	-	20	20	250	-
2.	Manufacture of dairy products such as butter, ghee etc.	5	9	50	-	20	20	250	-
3.	Canning and preservation of fruits and vegetables including production of jam, jelly, sauce etc.	-	Not included	-	-	20	20	250	-
4.	a) Grain mill for	10	9	50	i) Shall not be permitted under	20	20	100	-

Sr. No.	Category of Industry.	Service Industry, Class A				Service Industry, Class B				
		Criteria for classification and special conditions.				Criteria for classification and special conditions.				
		Maximum permissible power requirement (HP)	Maximum permissible employment (Persons)	Maximum permissible floor area. (Sq.M).	Special conditions, if any. APPENDIX III

Special provisions for Fuel Stations and Weigh Bridges

(Regulation No-42 of these Regulations)

A Size of the plots for development of petrol filling station shall be as under:

- (i) Petrol filling station without service bay: Width 30 m X depth 20m
- (ii) Petrol filling station with service bay: Width 40 m x depth 30 m

B Size of the plots for development of weigh bridges shall be as under:

Width 40 m x depth 30 m

Notes

- i. In case the weigh bridge is provided in an industrial / storage plot of 1 ha and above and is used for its own purpose and not on commercial basis, the corporation may relax the condition of minimum plot size.
- ii. On the plots allotted by MIDC by invitation of tender, exclusively for weigh bridge and petrol filling stations, as per above sizes the following activities may be permitted:
 - (a) Departmental Store
 - (b) Canteen Facility / Stationery / Grocery Shops etc.
 - (c) Telephone Booth / Communication Centre / ATM
 - (d) Commercial and other activities incidental to principal use for carrying out business etc.

Provided that maximum area under these activities shall not exceed 50% of the plot area.

- iii. The plots, already allotted by MIDC in the past at fixed price and which do not meet these space requirements, are not entitled to avail the benefits of the provisions under (i) above. Such plots may be permitted to utilize 5% of the plot area for carrying out the activities incidental to the principal use. The allottees may nevertheless approach MIDC for additional area required to meet the above standards within a reasonable time. MIDC at its sole discretion may permit/ extend the benefit of the provisions under (i) above subject to payment of additional premium as may be determined by MIDC from time to time. In case the weigh bridge is provided in an industrial plot of 1 Ha. & above and used for its own purpose and not on commercial basis, MIDC may relax the above condition.

APPENDIX IV - Regulations for erection of hoardings

(Regulation No – 43 of these Regulations)

- I.** Every hoarding shall be designed so as to withstand the wind, dead, seismic and other loads as per the provisions of Regulation 39.
- II.** Sizes of hoardings: sizes of hoardings along with various roads shall be governed by the provision in the following table:

Road width range in Metres	Height of Hoarding (width)	Max. Length of Hoarding
National highways And Roads in Width		
50 m	3m	10.00m
20m to 50m	3m	7.50m
10m to 20m	2m	5.00m
Less than 10m	1m	2.50m

- III.** Maximum height of hoardings on ground: No hoarding shall be erected to a height exceeding 9 m above the ground. The light reflectors may however extend beyond the top of the hoarding. The lower base or the bottom of the hoarding shall be at a height of not less than 2.25 m from surface of ground below.
- IV.** Distance from Road: A minimum distance of 3 m shall be maintained between the edge of the existing or proposed street, as stipulated by MIDC.
- V.** Distance from the junction of a road: The Hoarding along roads shall not be permitted within a distance of 100 m from the junction of the intersection of a road. This distance being measured between hoarding and the centre line of a junction.
- VI.** Any hoarding which in the opinion of MIDC is likely to be confused with an authorized traffic sign or signal shall not be permitted.
- VII.** Any hoarding containing the word 'stop', 'look' 'danger' or other similar word that might mislead or confuse the traveler shall not be permitted.
- VIII.** Hoarding on roof:
- (i) The size of hoarding on roof shall be 1 m x 2.5 m or in exact multiples thereof subject to maximum of 3 m x 10 m
 - (ii) No hoarding on roof shall project beyond the existing building line of the building on which it is erected shall extend not beyond the roof in any direction.
- IX.** Deposit and Fees:
- (i) The fees for erection and maintenance of the hoarding shall be charged as given below:

Sr. No. and area details	Scale of fees per annum per. Sq. m of hoarding area
For a space up to 5.00 sq.m	Rs.100.00
For every additional 1.00 sq. m	Rs.25.00

(ii) The fees for hoarding shall be paid by the applicant in advance, for a calendar year, or part thereof.

I. Prohibition of advertising signs and outdoor display structures in certain cases:

Notwithstanding the above provisions, no advertising sign or outdoor display structures shall be permitted on buildings of architectural, aesthetical, historical or heritage importance as may be decided by MIDC, or on Government buildings, save that in the case of Government buildings only advertising signs or outdoor display structures may be permitted if they relate to the activities for the said buildings' own purposes or related programmes.

Note:- Deposits/Fees for erecting hoarding shall be reviewed every five years and if required, be revised by M.IDC.

APPENDIX V

Regulations for housing scheme for Industrial Workers

(Regulation No – 44 of these Regulations)

- 1** In respect of the land developed or intended to be developed for the Group Housing Scheme or Plotted Development Scheme for the benefit of Industrial Workers by MIDC or the Bombay Housing and Area Development Board as defined in the Maharashtra Housing and Area Development Authority, Act, 1976 or any other authority constituted by or under any law and approved by MIDC, the Corporation may permit the development or redevelopment of such land or any part thereof, after varying or modifying the standard, specification, or dimension contained in the foregoing Regulations but subject to the extent of variation or modification shown herein below:

Explanation - I: "Group Housing Scheme" means a scheme of constructing a building or buildings with one or more floors, each floor consisting of one or more dwelling units and having common service facilities. Provided that the land underlying such building or buildings is held in lease-hold by one.

Explanation - II : "Plotted Development Scheme" means a scheme of constructing dwelling units with one or more floors and having party walls or otherwise but having common service facilities. Provided that the lands underlying such dwelling units are held in lease-hold by more than one person.

2 Design of Building:

- 2.1 (a)** In respect of the Plotted Development Scheme, the FSI shall be calculated with reference to the area of the plot held in one ownership.

(b) In respect of the Group Housing Scheme, the FSI shall be calculated with reference to the plot area as deducted by the area of layout roads required under Clause No. 3(3) of Appendix V Regulations and by the recreational open space required under Clause No. 3(5) and social Facilities and Public Utilities required under Clause No. 3(6) of Appendix V Regulations.

- 2.2 Sizes of bathroom and water closet (WC):** The internal dimension of bathroom, WC, and combined toilet shall be as follows:

Bathroom - 1.0 m x 1.2 m

(a) Water Closet (W.C.) 1.0 m x 0.9 m

(b) Combined Toilet 1.0 m x 1.8 m

2.3 Heights of room: The height of a room in any building shall not be less than 2.2 m at eaves in case of a sloping roof provided that the arithmetic average of the maximum height and the minimum height of the room under the same roof shall not be less than 2.6 m

The height of bath rooms and WCs shall not be less than 2.2 m

2.4 Staircases: The following regulations shall apply to the internal individual staircase only.

- Minimum width for 2 Storey buildings:
- Straight flight - 0.60 m
- For 2 Storey building with winders - 0.75 m
- For 3 Storey buildings:
- Straight flight - 0.75 m
- Riser - 20 cms. (max.) with maximum number of winders being 2 in a quarter landing.

Tread -

- For 2 storied building (G+1) - Minimum 22.5 cms
- This could be reduced to 20 cms as the clear tread between perpend, with possibility of open riser as well as nosing and inclined riser to have an effective going of 22.5 cms.

2.5 Permissible height of building and open spaces around buildings: the maximum permissible height of any buildings shall be 10 m The front side and rear open spaces shall be governed by the following provisions in Table No.1 of Appendix V Regulations.

Type of Development	Front		Side Attached	Rear		Max. Height permissible
	Vehicular Road 6 M and above	Pathway		Attached	Detached	
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1. Ground floor Development						
a) Plotted (25 sqm to 40 sqm)	1.50 m	1.0 m	Nil	Nil	1.5M	4 m

Type of Development	Front		Side Attached	Rear		Max. Height permissible
	Vehicular Road 6 M and above	Pathway		Attached	Detached	
(1)	(2)	(3)	(4)	(5)	(6)	(7)
b) Group Housing	1.5 m	Distance between two buildings shall be minimum 3.0 M and distance between the bldg and plot boundary shall be 1.5 M.	Nil	Nil	Nil	4 m
2. Ground + 1 floor Development -						
a) Plotted(25 sqm to 40 sqm)	1.5 m	1.0 m	Nil	Nil	1.5m	7m
b) Group Housing	1.5 m	Distance between two buildings shall be min.3.0M and distance between the building and the plot boundary shall be 1.5 M.	Nil	Nil	Nil	7m
3. Ground + 2Floors Development -						
a) Plotted		Not permitted				
b) Group Housing	3.0m	Distance between two buildings shall be min. 4.5 m and distance				10 m
		between the building and the plot boundary shall be min. 3.0M				

Note: The above provision shall also be applicable to plots up to 60 Sqm in area if the depth of plot is less than 12.0 m

3 Requirement of Layout: The development of land in the form of a layout shall be governed by the following regulations:

3.1 Plot- size Minimum plot size shall be 25 Sqm.

3.2 Peripheral Roads - Peripheral network of the roads for the scheme area shall be retained as per development plan / nodal plan / zonal plan or as may be directed by MIDC.

3.3 Layout roads: For lengths more than 70 m and up to 85 m with dead end, vehicular road of atleast 6 m (right of way) with 4.5 m paved width as carriage way shall be provided.

- a. A loop road with maximum 170 m total length shall be permitted with 6 m right of way and 4.5 m paved width.
- b. For roads more than 85 m dead end / 170 m loop road, the right of way shall be minimum 9 m and carriage width shall be 6 m up to maximum 250 m length.
- c. For roads more than 250 m in length the minimum right of way shall be 11m with carriage width of 7 m

3.4 Pathways

Length	Paved Width	Right of way
20	1.5	3 m
30	2.0	3 m
40	2.5	3 m
50	3.0	3 m
70	3.5	5 m

Note: Dead end roads and pathways exceeding 30 m in length will not be accepted. Along open courts only paved pathways may be provided.

3.5 Recreational Open Space: The proportion of recreational open spaces to the net residential area in the layout shall be 10 percent. PROVIDED that the proportion of such open spaces together with areas under school and playgrounds, where provided, shall be 8.5 per cent of the total gross area of the project. However, the percentage shall not be less than 9.5 per cent exclusive of the areas of roads (11 mtr and above) and other facilities such as schools, hospitals, markets, etc.

3.6 Social Facilities and Public Utilities: Social facilities and public utilities shall be provided as per planning brief totally approved by MIDC. These shall include schools, community centres, plots for social and religious purpose, plot for shopping and markets, plots for ESR/GSR, plot for electric sub-station, plot for sewage pump and any other purpose as approved by MIDC.

APPENDIX VI

Special Regulations for Physically Handicapped

(Regulation No. No.45 of these regulations)

- 1 These regulations or bylaws are applicable to all buildings and facilities used by the public.
- 2 In case any Public Authority or Local Authority constructs the tenements for the disposal to the general public, some flats on the ground floor shall be reserved for the paraplegic/physically handicapped persons.
 - 2.1 Non-ambulatory Disabilities : Impairments that, regardless of cause or manifestation, for all practical purposes, confine individuals to wheel chairs.
 - 2.2 Semi-ambulatory Disabilities : Impairments that cause individuals to walk with difficulty or insecurity. Individuals using braces or crutches, amputees, aritritics, spastics, and those with pulmonary and cardiac ills may be semi-ambulatory.
 - 2.3 Hearing Disabilities: Deafness or hearing handicaps that might make an individual insecure in public areas because he/she is unable to communicate or hear warning signals.
 - 2.4 Sight Disabilities : Total blindness or impairments affecting sight to the extent that the individual, functioning in public areas, is the insecure or exposed to danger.
 - 2.5 Wheel Chair : Chair used by disabled people for mobility. The standard size at wheel chair shall be taken as 1050 mm. X 750 mm as per ISI.
- 3 Certain flats on the ground floor of the residential buildings constructed for the staff by any Private / Public company or corporation shall be reserved for the disabled persons.
- 4 Also, the scope of the set of bylaws shall extend to such reserved flats to promote Non-handicapping or barrier free built environment.
 - 4.1 a) **Access path/Walk way:** Access path from plot entry and surface parking to building entrance shall be of minimum of 1800 mm while having even surface without any slope. Slope if any shall not have gradient greater than 5%. Selection of floor material shall be made suitably to attract or to guide visually impaired persons (Annexures attached). Finishes shall have a non slip surface with a texture traversible by a wheel chair. Curbs/kerb wherever provided shall blend to a common level.
 - b) **Parking:** For parking of vehicles of handicapped people the following provisions shall be made:

- i. Surface parking for two Car spaces shall be provided near entrance for the physically handicapped persons with maximum travel distance of 30 m from building entrance.
- ii. The width of parking bay shall be minimum 3.60 m
- iii. The information stating that the space is reserved for wheel chair users shall be conspicuously displayed.
- iv. Guiding floor materials or on audible signal devise or other devices which serves the same purpose shall be provided to guide visually impaired persons.

5 Building Requirements: The specified facilities for the buildings for physically handicapped persons shall be as follows:

5.1 a) Approach to Plinth Level: Every building should have at least one entrance accessible to the handicapped and shall be indicated by proper signage. This entrance shall be approached through a ramp together with the stepped entry.

b) **Ramped Approach:** Ramp shall be finished with non slip material to enter the building. Minimum width of ramp shall be 1800 mm. With maximum gradient 1:12. Length of ramp shall not exceed 9.0 m having double rail at a height of 800 mm and 900 mm on both sides extending 300 mm, beyond top and bottom of the ramp. Minimum gap from the adjacent wall to the hand rail shall be 50 mm.

5.2 Stepped Approach: For stepped approach size of tread shall not be less than 300 mm and maximum riser shall be 150 mm. Provision of 800-mm high hand rail on both sides of the stepped approach similar to the ramped approach.

5.3 Exit/Entrance Door: Minimum clear opening of the entrance door shall be 900 mm and it shall not be provided with a step that obstructed the passage of a wheel chair user. Threshold shall not be raised more than 12 mm.

5.4 Entrance Landing: Entrance landing shall be provided adjacent to ramp with the minimum dimension 1800 x 2000 mm. The entrance landing that adjoin the top end of a slope shall be provided with floor materials to attract the attention of visually impaired persons(hereinafter referred to as “the said guiding floor material”).

Finishes shall have a non-slip surface with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.

6 Corridor Connecting The Entrance/Exit For The Handicapped: The corridor connecting the entrance\exit for handicapped leading directly outdoors to a place where information concerning the overall use of the specified building can be provided to visually impaired persons either by a person or by signs, shall be provided as follows:

- a) "Guiding floor materials" shall be provided or devices that emit sound to guide visually impaired persons.
- b) The minimum width shall be 1500 mm.
- c) In case there is a difference of level, slope ways shall be provided with a slope of 1:12.
- d) Hand rails shall be provided for ramps / slope ways.

7 Stair Ways: One of the stair-ways near the entrance/exit for the handicapped shall have the following provisions:

- a) The minimum width shall be 1350 mm.
- b) Height of the riser shall not be more than 150 mm and width of the tread 300 mm. The steps shall not have abrupt (square) nosing.
- c) Maximum number of risers on a flight shall be limited to 12.
- d) Hand rails shall be provided on both sides and shall extend 300 mm. on both sides and shall extend 300 mm on the top and bottom of each flight of steps.

8 Lifts: Wherever lift is required as per bye-laws, provision of at least one lift shall be made for the wheel chair user with the following cage dimensions (as per B/S). Clear internal depth, 1100 mm; Clear internal width : 2000 mm.

Entrance door width : 900 mm

- a) A hand rail not less than 600 mm long at 900 mm. above floor level shall be fixed adjacent to the control panel. Also, switch control shall be at an operating height equal to that of hand rails.
- b) The lift lobby shall be of an inside measurement of 1800 x 1800 mm or more.
- c) The time of an automatically closing door should be minimum 5 seconds and the closing speed should not exceed 0.25 m/sec.
- d) The interior of the case shall be provided with a device that audibly indicates the floor the cage has reached and indicates that the door of the cage for entrance/exist is either open or closed.
- e) The lift meant for paraplegics/handicapped shall be available on each floor with proper signage.
- f) Also, this lift in case of power failure or any such emergent situations shall reach to the nearest floor.

9 Toilets: One special W.C. in a set of toilet shall be provided for the use of handicapped with essential provision of wash basin near the entrance for the handicapped.

- a) The minimum size shall be 1500 x 1750 mm.
- b) Minimum clear opening of the door shall be 900 mm and the door shall swing out.

- c) Suitable arrangement of vertical/horizontal handrails with 50 mm. clearance from wall shall be made in the toilet.
 - d) The W.C. seat top shall be 500 mm from the floor.
- 10** One of the wash basins in the toilet block on each floor shall be fixed at height of 75 cm above the finished floor level, with a tap. A similar arrangement has to be made for the drinking water facility.

APPENDIX VII

Special Regulations for Rain Water Harvesting

(Regulation No- .46 of these Regulations)

The following Provisions shall be applicable for Installation of Rain Water Harvesting Structures (RWHS).

All the layout open spaces / amenity spaces of housing societies and new constructions /.reconstructions / additions on plots having area not less than 300 Sq.m in non Gaothan areas of all towns shall have 5% of the total plot area to be kept uncovered & unpaved to enable the percolation of rain water for plots up to less than 4 ha & 10% for plot area of 4 ha and above and shall have one or more rain water Harvesting structures having a minimum total capacity as given here below.

Provided that the MIDC may approve the Rain Water Harvesting Structures of specifications different from those specified here below, subject to the minimum capacity of rain water harvesting being ensured in each case.

The owner / society of every building mentioned in the (a) above shall ensure that the Rain Water Harvesting structure is maintained in good condition for storage of water for non potable purposes or recharge of groundwater, at all times.

The Authority may impose a levy of not exceeding Rs. 1000/- per annum for every 100 Sq.m of built up area for the failure of the owner of any building mentioned in the (a) above to provide or to maintain Rain Water Harvesting structures as required under these byelaws.

Rain water harvesting in a building site includes storage or recharging into ground of rain water falling on the terrace or on any paved or unpaved surface within the building site.

The following systems may be adopted for harvesting the rain water drawn from terrace and the paved surface.

Open well of a minimum of 1 m dia. and 6 m depth into which rain water may be channeled and allowed after filtration for removing silt and floating material. The well shall be provided with ventilating covers. The water from the open well may be used for non-potable domestic purposes such as washing, flushing and for watering the garden etc.

Rain water harvesting for recharge of ground water may be done through a **bore well** around which a pit of one metre width may be excavated upto a depth of at lease 3 m and refilled with stone aggregate and sand. The filtered rain water may be channeled to the refilled pit for recharging the borewell.

An impervious surface / underground storage tank of required capacity may be constructed in the setback or other open space and the rain water may be channeled to the storage tank. The storage tank shall always be provided with ventilating covers and shall have draw-off taps suitably placed so that the rain water may be drawn off for domestic, washing, gardening and such other purposes. The storage tanks shall be provided with an overflow.

The surplus rain water after storage may be recharged into ground through percolation pits or trenches or combination of pits and trenches. Depending on the geomorphological and topographical condition, the pits may be of the size of 1.20 m width x 1.20 m length x 2.00 m to 2.50 m depth. The trenches can be or 0.60 m width x 2.00 to 6.00 m length x 1.50 to 2.00 m depth. Terrace water shall be channeled to pits or trenches. Such pits or trenches shall be back filled with filter media comprising the following materials:

- 40 mm stone aggregate as bottom layer upto 50% of the depth;
- 20 mm stone aggregate as lower middle layer upto 20% of the depth;
- Coarse sand as upper middle layer upto 20% of the depth ;
- A thin layer of fine sand as top layer.

Top 10% of the pits / trenches will be empty and a splash is to be provided in this portion in such a way that roof top water falls on the splash pad.

Brick masonry wall is to be constructed on the exposed surface of pits / trenches and the cement mortar plastered.

The depth of wall below ground shall be such that the wall prevents loose soil entering into pits / trenches. The projection of the wall above ground shall at least be 15 cms.

Perforated concrete slabs shall be provided on the pits / trenches.

If the open space surrounding the building is not paved, the top layer upto a sufficient depth shall be removed and refilled with coarse sand to allow percolation of rain water into ground.

In case of the plots where the water table is high i.e. 10 feet or less, it is not mandatory to follow the above provisions.

The terrace shall be connected to the open well / bore well / storage tank / recharge pit / by means of HDPE / PVC pipes through filter media. A valve system shall be provided to enable the first washings from roof or terrace catchment, as they would contain undesirable dirt. The mouths of all pipes and opening shall be covered with mosquito (insects) proof wire net. For the efficient discharge of rain water, there shall be at least two rain water pipes of 100mm dia. for a roof area of 100 sq.m

Rain water harvesting structures shall be sited as not to endanger the stability of building or earthwork. The structures shall be designed such that no dampness is caused in any part of the walls or foundation of the building or those of an adjacent building.

The water so collected / recharged shall as far as possible be used for non-drinking and non-cooking purpose.

Provided that when the rain water in exceptional circumstances will be utilised for drinking and / or cooking purpose, it shall be ensured that proper filter arrangement and the separate outlet for by passing the first rain-water has been provided.

Provided further that it will be ensured that for such use, proper disinfectants and the water purification arrangements have been made.

APPENDIX VIII

Regulations for Installation of Solar Energy Assisted Systems

(Regulation No. 47 of these Regulations)

1 Definitions

Unless the context otherwise requires, the following definitions shall be applicable for the purpose of this Regulation.

Sr. No.	Title	Description
i)	“Solar Assisted Water Heating System” (SAWHS)	A devise to heat water using solar energy as heat source
ii)	“Auxiliary Back Up”	Electrically operated or fuel fired boilers / systems to heat water coming out from solar water heating system to meet continuous requirement of hot water
iii)	“New Building”	Such buildings of categories specified in Regulation no. 32.2 for which construction plans have been submitted to competent authority for approval
iv)	“Existing Building”	Such buildings which are licensed to perform their respective business

2 Solar Assisted Water Heating Systems (SAWHS): “Buildings of the following categories shall provide the system or the installation having an auxiliary Solar Assisted Water Heating System (SAWHS).

- Hospitals and Nursing Homes.
- Hotels, Lodges and Guesthouses.
- Hostels of Schools, Colleges, Training Centres.
- Barracks of armed forces, paramilitary forces and police.
- Individual residential buildings having more than 150 sq.m plinth area.
- Functional Building of Railway Stations and Airports like waiting rooms, retiring rooms, rest rooms, inspection bungalows and catering units.
- Community Centres, Banquet Halls, Barat Ghars, Kalyan Mandaps (Marriage Halls) and Buildings for similar use “

3 Installation of Solar Assisted Water Heating Systems (SAWHS): The following provisions shall be applicable for all the new buildings of categories mentioned in Clause No.32.2 for installation of Solar Energy Assisted Systems.

Adequate provisions shall be made for installation of SAWHS in the building design itself for an insulated pipeline from the rooftop to various distribution points, within the aforesaid occupancies. The building must have a provision for continuous water supply to the solar water heating system.

In case of hot water requirement, the building should also have open space on the rooftop, which receives direct sunlight. Wherever hot water requirement is continuous, auxiliary heating arrangement either with electric elements or oil of adequate capacity can be provided.

The load bearing capacity of the roof should at least be 50 kg. Per Sqm All new buildings of above said categories must complete installation of solar water heating systems before obtaining necessary permissions to commence their activities.

The capacity of solar water heating system to be installed on the building different categories shall be decided in consultation with the Planning / Local Authority concerned. The recommended minimum capacity shall not be less than 25 litres per day for each bathroom and kitchen subject to the condition that maximum of 50% of the total roof area is provided with the system.

Installation of SAWHS shall conform to BIS (Bureau of Indian Standards) specifications IS 12933. The solar connectors used in the system shall have the BIS certification mark.

Building permissions for all the new constructions / buildings of the aforesaid categories shall be granted only if they have been complied with these provisions.

In case of existing building, the above provisions shall be mandatory at the time of change of use / expansion of use to any of the categories specified in 32.2 above, provided there is already a system or installation for supplying hot water.

- 4 Solar Assisted Electric Equipment (Photo Voltaic Equipment):** In addition to the above provisions, buildings of all categories, especially public buildings, large holdings of commercial and residential complexes may provide an auxiliary system of solar electricity for staircase lighting, garden area lighting or any other places wherever feasible within the premises. The installations shall conform to the specifications, to be certified by the registered practitioner in this field or the norms stipulated by the Govt. of Maharashtra or any other authority designated for this purpose such as BIS, etc., from time to time.

APPENDIX IX - Forms**Form No. 1****Form for First Application for Development and to Erect a Building**

(On Rs. Stamp) As stipulated from time to time by Suptdt. of Stamps

To,

The Executive Engineer,
M.I.D.C., Division _____

Sir,

I hereby give notice that I intend to carryout development in the site to erect/ to reerect/ to demolish/ to make material alteration in the building on/ in Plot No._____, at ___Industrial Area, Town situated at Road/ Street _____

I forward herewith the following plans and statements (Item 1to 6) in quadruplicate, wherever applicable, signed by me and

Name in block letters _____

the Licensed Surveyor/ Engineer/Structural Engineer/ Supervisor or Architect Licence No _____ who have prepared the plans/design and a copy of other statements/ documents as applicable.

Items

- 1) Key Plan (location plan)
- 2) Measurement plan attached to possession receipt
- 3) Sub-division(Land or building) Layout plan
- 4) Building Plan
- 5) Service Plan
- 6) Particulars of Development in prescribed form
- 7) Ownership Title
- 8) Attested copy of Receipt for payment of application
- 9) Clearance Certificate of Tax Arrears

I request that the proposed development/Construction may be approved and permission accorded to me to execute the work.

Date:

Signature of Licensee/ Lessee

Form no - 2**Form for Supervision**

To,

The Executive Engineer,
M.I.D.C., Division _____

Sir,

I hereby certify that the development work/ erection/re-erection /demolition or material alteration in/ of building for _____ use in Plot No. _____ situated at Street/ Road _____ in section _____ zone of _____ Industrial Area at _____ City/ Town shall be carried out under my supervision and I certify that all the material (type & grade) and the workmanship of the work shall be generally in accordance with the general specifications submitted along with, and that the work shall be carried out according to the sanctioned plans. I shall be responsible for execution of work in all respect.

Signature of Registered Architect / Licensed Engineer _____

Name of Registered Architect / Licensed Engineer _____

Address of Registered Architect / Licensed Engineer _____

Date:

Form No. 3**Form for Sanction of Building Permit and Commencement Certificate**

To,

Sir,

With reference to your application No. _____ dated _____ for grant to sanction of commencement certificate to carry out development work and Building Permit under Section 45 of MR & T.P. Act, 1966 to erect building on Plot No of Zone situated at Road/ Street in Industrial Area, the commencement/Building Permit is granted subject to the following conditions:-

- 1) The land vacated in consequence of the enforcement of the set-back rule part of the public street.
- 2) No new building or part thereof shall be occupied or allowed to be occupied or used or permitted to be used by any person until occupancy permission has been granted.
- 3) The Commencement Certificate/ Building Permit shall remain valid for a period of one year commencing from the date of its issue.
- 4) This permission does not entitle you to develop the land which does not vest in you.
- 5) Minimum two trees in plots 200sq.m and such number of trees at the rate of one tree per 100 sq .m for plots more than 200 sq. m in area shall be planted and protected.
- 6) In case of Group housing, minimum two trees per tenement shall be planted and protected.

Yours faithfully

Form –No. 8**Form for Completion Certificate**

To

The Executive Engineer,
M.I.D.C., Division_____ .

Sir,

I hereby certify that the erection/ re-erection or development work in/ on building/
part building_____ on Plot No_____ of _____
Zone situated at _____ Road/ Street _____
In _____ Industrial Area has been supervised by me and
has been completed on _____ according to the plans sanctioned
vide office communication No _____ dated _____.

The work has been completed to my best satisfaction, the workmanship and all materials
(type and grade) have been used strictly in accordance with general and detailed
specifications. No provisions of the Act or the Building Bye-laws, no requisitions made,
conditions prescribed or orders issued there under have been transgressed in the course of the
work. I am enclosing three copies of the completion plans, one of which is cloth mounted. The
building is fit for occupancy for which it has been erected/ re-erected or altered, constructed
and enlarged.

I have to request you to arrange for the inspection and give permission for occupation of
the building.

Form no 15**Application form for empanelment of Architects / Town Planners**

To

The CEO

Maharashtra Industrial Development Corporation

Sir,

I wish to register myself as Empanelled Architect, / Town Planner
your organization.

Particulars of my educational qualification and experience are given in the enclosed form.

Yours faithfully,

(Signature of the applicant)

Note: Tick mark the appropriate square.

1. Name of the applicant (in block letters)

2. Address (permanent)

3. Wishes to register as :

1. Empanelled Architect
2. Empanelled Town Planner

For registration as Empanelled Architects, attach a copy of the certificate of registration issued Under the Practicing Architects Act 1972 Council of Architecture.

For registration as Empanelled Architects, attach a copy of the certificate of Associate membership / fellowship issued by Institute of Town Planners, India.

3. Educational Qualification :

Examination

Year of passing

- 1.
- 2.
- 3.
- 4.

4. Membership of the professional institution

1. _____ 2. _____ 3. _____

(Attach copies of certificate in support of 4&5 above)

5. Experience :

(a) Are you registered with a Municipal Corporation ?

Yes No. If yes, give registration No.

(b) Are you registered with 'A' Class municipality?

Yes No. s, give registration No.(c) Have you been working with a professional
Registered with a Municipal Corporation of 'A'

Class Municipality?

Yes No.

If yes, give following particulars:

Name of the professional with whom worked:

Registration No. of the professional:

Period for which worked with the professional in

Years :

(Attach copies of certificates from registered Architects/ Town Planners in support of
5(c) above)

The above information is true.

GENERAL DEVELOPMENT CONTROL REGULATIONS

FOR NAVI MUMBAI, 1975

1 PREAMBLE

In exercise of powers conferred by Section 159 of Maharashtra Regional and Town Planning Act 1966 (Maharashtra XXXVII of 1966) and all other powers enabling it in this behalf, the City and Industrial Development Corporation of Maharashtra Limited, being the New Town Development Authority under Sub-section (3A) of section 113 of the said Act, for the area designated as site for Navi Mumbai under sub-section (1) of Section 113 of the said Act, hereby makes the following regulations the same having been previously approved by the State Government.

2 SHORT TITLE, EXTENT AND COMMENCEMENT

- 2.1 The regulations may be called the General Development Control Regulations for Navi Mumbai, 1975.
- 2.2 These regulations shall come into force immediately after the publication in the Maharashtra Government Gazette.
- 2.3 Subject to the provisions of the Maharashtra Regional and Town Planning Act 1966, these Regulations shall apply to all the developments in the area designated as site for Navi Mumbai under Sub-section (1) of section 113 of the Act vide Government Notification No.RPB-1171-1-W dated 20th March 1971 and No.RPB-I-RPC-1173 dated 16th August 1973 or any modifications or amendment thereof except area covered by any Gaothan in Navi Mumbai and the Action Areas.
- 2.4 Repeal and Saving: The Navi Mumbai Building Control Regulations 1972 (Development Permission), the Navi Mumbai Building Control Regulations 1973 (Vashi Residential Area) are hereby repealed. The effect of this repeal shall be the same as provided by Section 6 of Bombay General Clauses Act.

3 DEFINITIONS

- 3.1 In these regulations, unless the context otherwise requires, "ACT" means the Maharashtra Regional and Town Planning Act 1966 (Maharashtra Act No. XXXVII of 1966).
- 3.2 "ACTION AREA" means area for which the Corporation intends to prepare a detailed layout with Special Development Control Regulations.
- 3.3 "ACTION AREA PLAN" means the approved plan and report indicating the detailed layout of proposed development in the Action Area, which may stipulate the land use permitted on each plot, and the extent to which the building operations may be undertaken on each plot.

- 3.4 “APPROVED” means approved by the Corporation.
- 3.5 “BALCONY” means a horizontal projection, including a handrail, or balustrade to serve as passage or sitting out place.
- 3.6 “BASEMENT OR CELLAR” means the lower storey of a building below or partly below ground level.
- 3.7 “CARPET AREA” means the net floor area of a room excluding the area occupied by walls
- 3.8 “CHOWK, INNER AND OUTER” Inner chowk means an open space enclosed on all sides by a building. Outer chowk means an open unoccupied space similar to an inner chowk but where one of its sides is not enclosed by a building.
- 3.9 “CORPORATION” means Managing Director or any Officer of the City and Industrial Development Corporation of Maharashtra Limited duly authorized by him.
- 3.10 “COVERED AREA” means the area immediately above the plinth level covered by the building, or used for installing machinery, plant and equipment, but does not include :
- a. Garden, rockery, well and well structures, nursery, waterpool, fountain, benches, platforms round a tree and the like;
 - b. Drainage culvert, conduit, catch-pit, gully pit, inspection chamber, gutter and the like; and
 - c. Compound wall, gate, unstoreyed porch and portico, watchmen’s booth and the like.
- 3.11 “FLOOR SPACE INDEX” of a plot is the ratio of the gross floor area of all the storeys including the area of walls, mezzanine floors, staircase and lift, of a building on a plot to the total area of the plot. The gross floor space area of a building shall be calculated as above, excepting that the following shall not be counted towards computation of floor space index.
- a. A basement or cellar and area under a building, constructed on stilts used as a parking space or recreation space provided where there are no side walls on three or more sides of such a space.
 - b. Electric cabin or sub-stations, Watchmen’s Booth, Pump House.
 - c. Staircase room and/or lift rooms above the top most storey, architectural features, chimneys and elevated tanks of dimensions as permissible under these regulations.¹
 - d. Staircases excepting those in an industrial and Service industrial building.¹
 - e. Balconies proposed in accordance with Regulation No. 16.3 (5) ¹
 - f. Lifts.¹

¹The Regulations were amended and sanctioned on 24/09/1991.

- g. Association / Society office cum letter box room in Residential & Shopping cum Residential as per the following norms : ¹

Size of Society / Association Office:

No. of Tenements	Permissible built up area for office
i) Tenements upto 16	20 sq.m
ii) Tenements more than 16 & upto 150	25 sq.m
iii) Tenements beyond 150	30 sq.m

Note: The built-up areas mentioned above are inclusive of Toilet facility.

- h. Any covered antenna / dish antenna / communication tower used for telecom or ITE purposes.²
- i. Any semi-permanent structure upto 20 sqm of built up area for installation of telephone connectors in case of applicants who would provide suitable proof of being authorised by the Department of Telecommunications, Govt. of India, for setting up of cellular mobile telecommunication system. ³
- j. Area of fitness centre, including toilet facilities in an existing or proposed Co-Operative Housing Society or the Apartment owners Association in accordance with the provisions under 16.3(11).⁴

3.12 "GAOTHAN OR VILLAGE SITE" means Gaothan or Village site within the meaning of Maharashtra Land Revenue Code 1966.

3.13 "GROUND COVERAGE RATIO (GCR)" means the ratio of covered area to the total plot area.

3.14 "HEIGHT OF BUILDING" means the vertical distances measured from the average level of the ground around and contiguous to the building up to the top of the finished level of the topmost floor slab, in case of flat roofs and up to the midpoint of the height of the sloping roof. The height of the sloping roof shall be measured from the point at which the external surface of the outer wall intersects with the finished surface of the sloping roof.

Architectural features serving no other purpose except that of decoration shall be excluded for the purpose of calculation of the height of building.

¹ The Regulations were amended and sanctioned on 21/09/1994.

² The Regulations were amended and sanctioned on 19/04/2000.

³ The Regulations were amended and sanctioned on 20/10/2005.

⁴ The Regulations were amended and sanctioned on 13/09/2005.

- 3.15 "HEIGHT OF ROOM" means the vertical distance measured from the finished floor surface to the finished ceiling surface. Where a finished ceiling is not provided the soffit of the beams, joists or the tie beams shall determine the upper point for measurement.
- 3.16 "HOARDING" means any surface or structure erected on ground or any portion of roof of a building or on or above the parapet, with characters, letters or illustrations applied there to and displayed in any manner whatsoever out of doors for purpose of advertising or to give information regarding or to attract the public to any place, person, public performance, article of merchandise whatsoever.
- 3.17 "LAND USE" means the principal use of land for which a plot of land or building thereon is used or intended to be used; for the purpose of classification of a plot of land according to the land uses, a land use shall be deemed to include subsidiary land uses which are contingent upon it.
- 3.18 "LICENSED ARCHITECT" includes a Licensed Surveyor and means an Architect to whom a license has been granted by the Corporation under these regulations.
- 3.19 "LOFT" means a shelf like projection supported in any manner whatsoever, except by means of vertical supports within a room itself. The width of a loft shall not be more than 1 M. provided that if clear height between the top of the loft and the ceiling directly above it is not more than 1.5 m lofts wider than 1 M may be permitted.
- 3.20 "MEZZANINE FLOOR" means an intermediate floor between two floors.
- 3.21 "OPEN SPACE" means an area forming an integral part of the plot, left permanently open to sky. Front open space means an open space adjacent to the street from which an access to the plot has been permitted by the Corporation. Side and Rear open spaces shall have corresponding meaning with reference to the front open space.
- 3.22 "PLOT" means a portion of land held in one ownership.
- 3.23 "ROW HOUSE" means group of houses on adjacent plot with common walls and having only the front and the rear open spaces.
- 3.24 "SEMI-DETACHED BUILDING" means buildings on two adjacent plots with a common wall and having front, rear and one side open space for each building.
- 3.25 "VOLUME OF BUILDING" means total volume of building. The volume of building with flat roofs shall be computed by multiplying the covered area of the building by the height of the building. Where the height of the building varies, the building shall be divided into blocks of uniform heights and the volume of the building will be the sum of volume of such blocks. In case of buildings with basement the depth of the basement below the average surrounding ground level shall be added to the height of buildings for the computation of volume. The volume of the building with sloping roofs shall be computed similarly, but for the building with sloping roofs the height of building for

the purpose of computation of volume only, shall be measured from the average level of ground around and contiguous to the building up to the point at which the external surface of the outer wall intersects with the finished surface of the sloping roof. The volume of building under the sloping roof contained above the height of the building as defined above shall not be included in the total volume of the building. Provided that, such volume shall not exceed the product of length of the roof, the span of the roof and 1/8 of the span of the roof. If such volume exceeds the product of the length of the roof, the span of thereof and 1/8 of the span of the roof, such additional volume under the sloping roof shall be included in the total volume of the building.

- 3.26 “VOLUME TO PLOT AREA RATIO (VPR)” means the ratio of volume of building measured in cubic meters to the area of plot measured in square meters and therefore shall be expressed in meters.¹
- 3.27 INFORMATION TECHNOLOGY ESTABLISHMENT (ITE) means establishment, which is in the business of developing either software or hardware.²
- 3.28 THE BIOTECHNOLOGY Unit shall mean and include Biotechnology units which are certified by the Development Commissioner (Industries) or any other officer authorized by him in this behalf.³
- 3.29 FITNESS CENTRE in a building means and includes the built up premise provided in the building including gymnasium for the benefit of its inmates and for the purpose of fitness, physical exercise, yoga and such other activities as may be permitted by the Corporation from time to time.⁴

All other terms shall carry the same meaning as assigned to them in the Act.

4 **PROCEDURE FOR SECURING DEVELOPMENT PERMISSION**

- 4.1 Subject to the provision of Section 43 of the Act, no person shall institute or change the use of land or carry out any development of land without the permission in writing of the Corporation.
- 4.2 Subject to the provision of Section 44 of the Act, any person intending to carry out any development on any land shall make an application in writing to the Corporation in prescribed Form No.1 enclosed in the appendix.
- 4.3 The following particulars and documents shall be submitted along with the application viz.:
- a. A site plan (in quadruplicate) of the area proposed to be developed to a scale of 1:500 showing the following details wherever applicable:

¹The Regulations were amended and sanctioned on 30/09/2002.

²The Regulations were amended and sanctioned on 19/04/2000.

³The Regulations were amended and sanctioned on 27/01/2005.

⁴The Regulations were amended and sanctioned on 13/09/2005.

- i. The boundaries of the plot.
 - ii. The position of plot in relation to neighboring street.
 - iii. The name of the streets in which the plot is situated.
 - iv. All the existing buildings and other development standing on over or under the site.
 - v. The position of building and of all other buildings which the applicant intends to erect.
 - vi. The mean of access from the street to the building or the site and all other buildings which the applicant intends to erect.
 - vii. Open space to be left around the buildings to secure free circulation of air, admission of light and access for scavenging purposes.
 - viii. The width of the street (if any) in front and of the street at the side or rear of the building.
 - ix. The direction of north point relative to the plan of the buildings.
 - x. Any physical features such as trees, wells, drains, etc.
- b. A detailed Plan (in quadruplicate) showing the plans, sections and elevations of the proposed development work to a scale 1:100 showing the following details wherever applicable:
- i. Floor plans of all the floors together with the covered area, clearly indicating the size and spacing of all framing members and sizes of rooms and the position of staircases ramps and lift wells.
 - ii. The use of all parts of the building.
 - iii. Sizes of footings, thickness of basement walls, wall construction, floor slabs and roof slabs with their materials. The sections shall indicate the height of building and height of rooms and also the height of the parapet and the drainage and slope of thereof. At least one section should be taken through the staircase.
 - iv. The building elevations from all the streets.
 - v. Details of service privy if any.
 - vi. Terrace plan indicating the drainage and slope of the roof.
 - vii. The north point relative to the plans.
 - viii. All structural calculations with necessary drawings.
 - ix. All plumbing services with necessary details.

- c. In the case of layout of land or plot
- i. A site plan (in quadruplicate) drawn to a scale of 1:1500 showing the surrounding land and existing access to the land included in the layout.
 - ii. A plan (in quadruplicate) drawn to a scale of 1:500 showing:
 - x. Sub-divisions of the land or plot with dimensions and area of each of the proposed subdivisions and its use according to prescribed regulations.
 - y. Width of the proposed streets and
 - z. Dimensions and areas of open spaces provided in the layout for the purpose of garden or recreation or like purposes.
- d. A landscape plan (in quadruplicate) to a scale of 1:250 showing various landscape features such as trees, hedges, paved areas etc. The plan shall show, in particular, the type and number of existing trees, the trees to be felled, the trees to be transplanted and the proposal for planting of new trees.¹
- e. An extract of the record of rights or property register card or any other document showing the ownership of the land proposed for development.
- f. Specifications: Specifications, both general and detail, giving type and grade of materials to be used.
- g. Certificate of Supervision: Certificate in the prescribed form (Form 2 in the appendix) by the Licensed Architect undertaking the supervision.
- 4.4 a. The plans referred to in 4.3 above shall be on drawing sheets of any of the sizes mentioned in table below.

Sr. No.	Designation	Trimmed Sized (mm)
1	A0	840 X 1190
2	A1	895 X 840
3	A2	420 X 590
4	A3	300 X 420
5	A4	210 X 300
6	A5	140 X 210

¹The Regulations were amended and sanctioned on 31/03/1978.

- b. The following notations shall be used for plans referred to in 4.3 above

Sr. No.	Description	Site Plan	Building Plan
1	Plot Line	Thick Black	Thick Black
2	Existing Street	Green	-
3	Future Street, if any	Green dotted	-
4	Permissible building Lines	Thick dotted	-
5	Open spaces	No color	No color
6	Existing Work	Blue	Blue
7	Work proposed to be demolished	Yellow hatched	Yellow hatched
8	Proposed work	Red	Red
9	Drainage & Sewerage work	Red dotted	Red dotted
10	Water Supply work	Black dotted thin	Black dotted thin

- c. Wherever applicable schedules of rooms, apertures and floor areas shall be submitted along with the drawing in accordance with the forms enclosed in Appendix-1.

5 PLANS AND SPECIFICATIONS TO BE PREPARED BY LICENSED ARCHITECT

- 5.1 The plans and specifications referred to in 4.3 above shall be prepared and duly signed by the Licensed Architect. However, if the development is proposed in the scheme for allotment of plots of land to the project affected land holders in the defined area contiguous to the villages and if the development proposed is only ground floor structure without the structural use of RCC, the prescribed application form, the declaration and the plan may not be signed by the registered architect. In such cases, the applicant shall submit under his signature the prescribed application form, the declaration, plans of the proposed development, building completion certificate and any other documents required for receiving necessary development permission from CIDCO as Planning and Development Authority.¹
- 5.2 The plans showing structural details shall be prepared and duly signed by the Registered Structural Engineer.
- 5.2.1 The plans showing structural details shall be prepared & duly certified under the hand of Structural Engineer possessing requisite qualification as per Regulation No.12.2 (b).²
- 5.2.2 In respect of structural stability of each development work, each owner shall notify the name & address of the registered Structural Engineer in the form enclosed form-6, the Structural Engineer shall convey his acceptance as per form No.7 enclosed. The structural engineer shall submit form of supervision as per form No.8 enclosed, and on completion of the development, the structural engineer shall issue a certificate of stability of the structure, as per form No.9 enclosed.²

¹The Regulations were amended and sanctioned on 10/10/1986.

²The Regulations were amended and sanctioned on 21/09/1994.

- 5.3 The plans showing plumbing arrangements shall be prepared and duly signed by the Registered Plumber.
- 5.4 The procedure for Registration of Architects, Structural Engineers and Plumbers shall be as laid down in Regulation 12.

6 DECISION OF THE CORPORATION

- 6.1 On receipt of the application for development permission, the Corporation shall communicate its decision whether to grant or refuse permission to the applicant as per the provisions of section 45 of the Act.
- 6.2 The Commencement Certificate, granting the permission with or without conditions shall be in Form 3 enclosed in the Appendix.

7 DEVIATIONS DURING CONSTRUCTION

If during the carrying out of development, any departure of a substantial nature from the approved plan is intended to be made, the revised plan showing the deviations shall be submitted and the procedure laid down for the original proposal shall apply mutatis mutandis.

8 DEVELOPMENT UNDERTAKEN ON BEHALF OF GOVERNMENT

As per the provision of Section 58 of the Act the Officer-In-Charge of any Government Department or Office or Authority shall inform in writing to the Corporation of the intention to carry out development of any land for its purpose along with the following documents and plans:

- a. A site plan (in quadruplicate) of the area proposed to be developed to a scale of 1:500.
- b. Detailed Plan (in quadruplicate) showing the plans, sections and elevations of the proposed development work to a scale of 1:100.
- c. In the case of layout of land or plot
 - i. A site plan (in quadruplicate) drawn to a scale of 1:1500 showing the surrounding land and existing access to the land included in the layout.
 - ii. A plan (in quadruplicate) drawn to a scale of 1:500 showing
 - x. Sub-divisions of the land or plot with dimensions and area of each of the proposed subdivisions and its use according to prescribed regulations.
 - y. Width of the proposed streets and
 - z. Dimensions and areas of open spaces provided in the layout for the purpose of garden or recreation or like purposes.

9 RESPONSIBILITIES OF THE APPLICANT

9.1 Neither the grant of Commencement Certificate nor the approval of the drawing and specifications nor inspections made by the Corporation during the carrying out of development shall in any way relieve the applicant of his responsibility for carrying out the development in accordance with the requirements of these regulations.

9.2 The applicant shall:

- a. Permit authorized officers of the Corporation to enter the plot for which the Commencement Certificate has been granted for carrying out development, at any reasonable time for the purpose of enforcing these regulations.
- b. Obtain, where applicable, from the Corporation permission relating to building, zoning, grades, sewers, water mains, plumbing, signs, blasting, street occupancy, electricity, highways and all other permits required in connection with the carrying out the development.
- c. Give at least 7 days' notice to the Corporation of the intention to commence the carrying out of development.
- d. In case of building operations, give notice to the Corporation on completion up to plinth level and 7 days before the commencement of further work.
- e. Give written notice to the Corporation regarding completion of the development in Form No.4 enclosed in the Appendix, duly signed by the Licensed Architect.
- f. Obtain occupancy certificate from the Corporation prior to any occupancy or use of the development so completed. (Form No.5).
- g. Keep available for inspection, during the carrying out of development and for such a period thereafter as required by the Corporation the records of the tests which are made of any materials to ensure conformity with the requirements of these regulations.
- h. Keep pasted in a conspicuous place on the property in respect of which the permission to develop is granted, a copy of the Commencement Certificate.
- i. Keep during carrying out of development a copy of the approved plans on the premises where the development is permitted to be carried out.

10 INSPECTION

10.1 Generally all development work for which a permission is required shall be subject to inspection by the Corporation, and certain types of development involving unusual hazards or requiring constant inspection shall have continuous inspection by special inspectors appointed by the Corporation.

10.2 Inspection where required shall be made within 7 days following the receipt of notice, after which period the applicant shall be free to continue the development according to the approved plans. In case of building operations, the Corporation shall, at the first inspection, determine to the best of its ability that the building has been located in accordance with the approved plans. The final inspection of the completion of the work shall be made within 21 days from the date of receipt of the Completion Certificate.

11 OCCUPANCY CERTIFICATE

The Corporation shall within 30 days from the receipt of the Completion Certificate required under regulation 9.2(e) communicate its decision after the necessary inspection about grant of Occupancy Certificate indicated in regulation 9.2.f.

12 REGISTRATION OF LICENSED ARCHITECTS, STRUCTURAL ENGINEERS AND PLUMBERS

12.1 The Corporation shall license Architects, Structural Engineers and Plumbers. Application for registration as Licensed Architect, Licensed Structural Engineer and Licensed Plumbers shall be in form enclosed in the appendix.

12.2 Qualification for Registration:

Following qualification shall be necessary for obtaining the license from the Corporation for practicing in Navi Mumbai

- a. The minimum qualifications for registration as Licensed Architect shall be those prescribed under the Practicing Architects Act, 1972.
- b. The minimum qualification for registration of licensed structural engineer, shall be graduate in Civil Engineering or equivalent with 5 years' experience in structural design (in case of persons holding post graduate qualification experience will be relaxed by 2 years).¹
- c. The minimum qualification for registration as Licensed Plumber shall be a Graduate in Civil Engineering or equivalent or Diploma in Civil Engineering or a certificate from the Bombay Municipal Corporation enabling the person to practice as a licentiate plumber in the Bombay Municipal Corporation Area, or any other certificate in Sanitary Engineering and Plumbing from any recognized institute.

12.3 The annual license fee for registration as Licensed Architects / Structural Engineers / Plumbers shall be Rs.250/- per calendar year or part thereof. The fee shall be payable in advance and shall be non-refundable.

¹The Regulations were amended and sanctioned on 21/09/1994.

13 UNSAFE BUILDING

- 13.1 All unsafe buildings shall be considered to constitute danger to public safety and shall be restored by repairs or demolished or dealt with as otherwise directed by the Corporation.
- 13.2 Examination of Unsafe Buildings: The Corporation shall examine or cause to be examined every building reported to be unsafe or damaged, and shall make a written record of such examination.
- 13.3 Notice to Owners / Occupier: Whenever the Corporation finds any building Corporation there of to be unsafe, it shall, in accordance with established procedure for Legal notice, give to the owner and occupier of such building written notices stating the defects thereof. This notice shall require the owner or the occupier within a stated time either to complete specified repairs or improvements or to demolish and remove the building or portion thereof.
- 13.4 The Corporation may direct in writing that the building which in its opinion is dangerous, or has no provision for exit if the building catches fire, shall be vacated immediately or within the period specified for the purpose, provided that the Corporation shall keep a record of the reasons for such action.
- 13.5 Disregard of Notice: In case the owner or occupier fails, neglect or refuses to comply with the notice to repair or to demolish the said building or portion thereof, the Corporation shall cause the danger to be removed either by demolition or repair of the building or portion thereof or otherwise.
- 13.6 Cause of Emergency: In case of emergency, which in the opinion of the Corporation involves imminent danger to human life or health, the Corporation shall forthwith or with such notice as may be possible promptly cause such building or portion thereof to be rendered safe or removed. For this purpose, the Corporation may at once enter such structure or land on which it stands, or abutting land or structure with such assistance and at such cost as may be deemed necessary. The Corporation may also get the adjacent structure vacated and protect the public by an appropriate fence or such other means as may be necessary. The decision of the Corporation shall be final.
- 13.7 Costs: Costs incurred under 13.5 and 13.6 shall be charged to the owner of the premises involved. Such costs shall be charged on the premises in respect of which or for the benefit of which the same have been incurred and shall be recoverable as arrears of Land Revenue.

14 ZONING AND USE PROVISIONS

- 14.1 The Development Plan of Navi Mumbai, has divided Navi Mumbai into following zones:
1. Predominantly Residential
 2. Predominantly Commercial

3. Industrial
4. Wholesale Market & Warehousing ¹
5. Regional Park
6. ²
7. No Development Zone ³
8. Institutional ⁴
9. Woodland Corridor ⁴
10. Fishing & Allied Activities ⁴
11. Marshalling Yard ⁴
12. *
13. Special Economic Zone ⁵
14. Airport & Allied Activities / Services ⁶

14.2 For the purpose of these regulations the land uses have been classified into following groups:

1. Mining and quarrying.
2. Residential
3. Educational
4. Institutional
5. Assembly
6. Business
7. Mercantile
8. Industrial
9. Storage
10. Information Technology land use
11. *

14.3 In these regulations, unless the context otherwise requires:

1. "Mining and Quarrying" means extraction of stone earth, murum or any other mineral including operating brick kilns.

¹The Regulations were amended and sanctioned on 27/05/2004.

²Industrial Park zone - deleted

³The Regulations were amended and sanctioned on 30/05/2005.

⁴The Regulations were amended and sanctioned on 27/05/2004.

⁵The Regulations were amended and sanctioned on 13/07/2004.

*Recreation Land use - Awaiting government sanction.

⁶The Regulations were amended and sanctioned on 21/03/2012.

2. "Residential Land Use" includes any land on which sleeping accommodation is provided for normal residential purposes, with or without cooking or dining or both facilities, except any activity classified under Group 4.
3. "Educational Land Use" includes any land use for School, College or day-care purposes for more than 8 hours per week, involving assembly for instruction, education or recreation and which is not covered by Group 5. It shall also include quarters for essential staff which is required to reside in the premises of the Educational Institution and buildings used as Student's Hostel, captive to an Educational Institution, whether situated in its campus or not. But the said secondary use of Student's Hostel and residential staff quarters shall range between 15% to 25% of the basic permissible FSI".

Explanation:- Student's Hostel Plot, captive to an Educational Institution and situated outside the campus, means a plot leased to a particular Educational Institution for educational purpose, by the Corporation at a separate location in the vicinity, for the purpose of providing hostel facilities to its students and the use and the ownership of which cannot be changed or transferred.

4. "Institutional Land Use" includes any land, which is used for purposes such as medical or other treatment or care or persons suffering from physical or mental illness, disease or infirmity; care of infants, convalescents or aged persons and for penal or correctional detention in which the liberty of the inmates is restricted. Institutional buildings ordinarily provide sleeping accommodation for the occupants.
5. "Assembly Land Use" includes any land, where groups of people congregate or gather for amusement, recreation, Social, religious, patriotic, civil, travel and similar purpose, for example, theatres, motion picture houses, assembly halls, auditoria, exhibition halls, museums, skating rinks, gymnasia, restaurants, places of worship, dance halls, club rooms, passenger stations and terminal of air, surface and marine public transportation services, recreation piers and stadia.
6. "Business Land Use" includes any land, which is used for the transaction of business (other than that covered in Group 7), for the keeping of accounts and records and similar purpose, doctors' and dentists' consulting rooms (unless these are covered by the provisions of Group 4); service facilities such as news stands, lunch counters serving less than 100 persons, barber shops and beauty parlors. City halls, town halls, Courthouses and Libraries shall be classified in this group in so far as the principal function of these is transaction of public business and the keeping of books and records. Minor offices, incidental to operations in another type of land use shall be considered as part of the main land use and shall be classified under the relevant group for the main land use.

¹ The insertion was amended and sanctioned on 16/09/2013

7. “Mercantile Land Use” includes any land, which is used for shops, stores, markets, for display and sale of merchandise, either wholesale or retail. Office, storage and service facilities incidental to the sale of merchandise and located on the same plot shall be included under this group. Minor merchandising operations on land primarily used for other land use shall be covered by the group under which the predominant land use is classified.
8. “Industrial Land Use” includes any land on which products or materials of all kinds and properties are fabricated, assembled or processed, for example, assembly plants, laboratories, dry-cleaning plants, power plants, pumping stations, smoke houses, laundries, gas plants, refineries, dairies and saw mills.
 - 8a Service Industry Class-A means any industry which is engaged in producing, servicing or repairing goods or articles for consumption by persons residing in the neighborhood and which fulfills the following three conditions:¹
 - i. the number of persons employed in any establishment does not exceed 9;
 - ii. the maximum power requirement of such establishment does not exceed 10 HP; and
 - iii. the floor area occupied by such establishment does not exceed 50 Sqm. and shall include particularly any industry mentioned in Schedule-1.
 - 8b Service Industry Class-B means any industry which is engaged in producing, servicing or repairing goods or articles for consumption in the neighborhood and which fulfills the following three conditions:¹
 - i. the number of persons employed in any establishment does not exceed 20;
 - ii. the maximum power requirement of such establishment does not exceed 20 HP, and
 - iii. the floor area occupied by such establishment does not exceed 250 Sq. and shall include particularly and industry mentioned in Schedule-1.
9. “Storage Land Use” includes any land uses primarily for the storage or sheltering (including servicing, processing or repairs incidental to storage) of goods, wares, or merchandise, vehicles, for example warehouses, cold storages, freight depots, transit sheds, store houses, truck and marine terminals, garages, hangers (other than aircraft repair hangers), grain elevators.

¹The Regulations were amended and sanctioned on 31/03/1978.

²The Regulations were amended and sanctioned on 19/04/2000.

10. Information Technology land use: Information Technology land use includes any land use primarily for the development of computer software and hardware and equipment relating to earth station, V-SAT, routes, transponders, covered and dish antenna, transmission towers and other similar I.T. related uses.²
11. Recreational Land Use*
12. Airport & Allied Activities / Services, Airport & Allied Activities / Services include all Aeronautical & Allied Activities such as Taxiways, Hangers, Airport Terminal Building etc. which are required for the efficient operation of the Airport. The Corporation, for the purpose of Development of the Airport may permit various land uses and provision of services within this zone, which are compatible and requirement for the Airport, with due regard to the provision/regulations stipulated by the Ministry of Civil Aviation, Govt. of India or the Authority authorized by MoCA.¹

The decisions of the Corporation about the land use group of any function shall be final and conclusive.

- 14.4 The land uses that shall generally be permitted with due considerations to amenity in the zones are as follows:

14.4.1²

Zones	Land use (Code No.)
Predominantly Residential	2. Residential
	3. Educational
	4. Institutional
	5. Assembly
	6. Business
	7. Mercantile

In case of Action areas located in predominantly residential zone, essential service industries and warehouses which do not create any nuisance on account of smoke, smell, dust, noise, glare or any other factor may be permitted in addition to the land uses stipulated above. In particular, the following shall be permitted:

- 8a Service Industry, Class 'A' including office and storage space required for service industry as secondary land use on the land designated primarily for 'Mercantile' and 'Business' land uses and earmarked for such secondary use.

¹The Regulations were amended and sanctioned on 21/03/2012.

²The Regulations were amended and sanctioned on 31/03/1978.

*Awaiting government sanction.

Note: For the purposes of Regulations 16, 17 and 18 the secondary use shall be deemed as relevant primary use and all provisions of Regulations 16, 17 and 18 shall apply to secondary use as they apply to primary use.

- 8b Service Industry, Class 'B' with residence for essential staff.
9. Storage, with volume not exceeding 1000 cubic m. per establishment and with residences for essential staff, and such other allied land uses as are incidental to or complementary to Service Industry Class 'B' and storage land use, namely restaurants, bars, lunch counters, news-stands, offices, paan and tobacco shops, fruit shops, and land use commonly known as public utility and services, namely police station or chowky, telephone exchange, fire station, sewage treatment plant or pumping station, electricity sub-station, water-works or pumping stations or service reservoirs.

Note: The above land uses namely 8b and 9 shall be permitted only in the exclusive area earmarked as 'Service Industry'.

10. Information Technology land use, pertaining to only software development, and only on the plots fronting 11.0 m., more wide roads.¹

14.4.2 ²

Zones	Land use (Code No.)
Predominantly Commercial	2. Residential
	3. Educational
	4. Institutional
	5. Assembly
	6. Business
	7. Mercantile

In case of Action areas located in predominantly commercial zone, essential service industries and warehouses, which do not create any nuisance on account of smoke, smell, dust, noise, glare or any other factor may be permitted in addition to the land uses stipulated above. In particular, the following shall be permitted:

- 8a Service Industry, Class 'A' including office and storage space required for service industry as secondary land use on the land designated primarily for 'Mercantile' and 'Business' land uses and earmarked for such secondary use.

Note: For the purposes of Regulations 16, 17 and 18 the secondary use shall be deemed as relevant primary use and all provisions of Regulations 16, 17 and 18 shall apply to secondary use as they apply to primary use.

¹The Regulations were amended and sanctioned on 19/04/2000.

²The Regulations were amended and sanctioned on 31/03/1978.

- 8b Service Industry, Class 'B' with residence for essential staff.
9. Storage, with volume not exceeding 1000 cubic m. per establishment and with residences for essential staff, and such other allied land uses as are incidental to or complementary to Service Industry Class 'B' and storage land use, namely restaurants, bars, lunch counters, news-stands, offices, paan and tobacco shops, fruit shops, and land use commonly known as public utility and services, namely police station or chowky, telephone exchange, fire station, sewage treatment plant or pumping station, electricity sub-station, water-works or pumping stations or service reservoirs.

Note: The above land uses namely 8b and 9 shall be permitted only in the exclusive area earmarked as 'Service Industry'.

10. Information Technology land use, pertaining to only software development, and only on the plots fronting 11.0 m., more wide roads. ¹

Zones	Land use (Code No.)
14.4.3 Industrial	8. Industries with residence for essential staff Biotechnology unit shall be permitted on all plots fronting on roads having width 11 mt or more ²
	9. Storage with residences for essential staff
	10. Information Technology land use, only on the plots fronting 11.00 m., more wide roads. ¹
14.4.4 Wholesale Market & Warehousing ³	7. Mercantile land use 8(a) Service Industry class - A (Only ancillary service industries which are not obnoxious and hazardous shall be allowed) 8(b) Service Industry class - B (Only ancillary service industries which are not obnoxious and hazardous shall be allowed) 9. Storage land use with residence for essential staff up to limit of 30% of the land use 10. IT land use

¹ The Regulations were amended and sanctioned on 19/04/2000.

15 CLASSIFICATION OF DEVELOPMENT

Without prejudice to the meaning assigned to "development" in the Act, "development" shall be classified as:

- a. Building Operations
- b. Layout and sub-division
- c. Erection of Hoarding
- d. Mining and Quarrying Operations
- e. Any other type of development

16 BUILDING OPERATIONS

Development of buildings for the various land uses classified in 14.2 shall be governed by the following regulations:

16.1 Scrutiny Fee:

A person applying for permission for carrying out building operations on any land shall with his application pay to the Corporation Scrutiny Fee at the following rates:

16.1(1)¹

Purpose	Scale of Fees
a. To construct or reconstruct a building	Rs.40 per 10 sqm or part thereof with a minimum of Rs.200.
b. For additional land/or alteration to the existing building where additional area is proposed	Rs.40 per 10 sqm or part there of with a minimum of Rs.200.
c. For alterations where no additional area is involved	Rs. 200 per proposal upto built up area of 50 sqm. Rs. 400 per proposal for built up area more than 50 sqm.
d. In case of amended plans for sanctioned proposal	With every amended proposal a fee of Rs 400 where in no extra floor area is proposed, otherwise as per the additional area proposed Rs 40 per 10 sqm. of part thereof with a minimum of Rs 200

¹The Regulations were amended and sanctioned on 21/09/1994.

Rules

1. Fees will be charged for compound wall, storage tank and uncovered structures at the rate of Rs. 200/- per proposal, if proposal received separately.
2. For the purpose of working out the proposed built up Area, sanctioned built up area for the proposal will be taken as the basis for charging fees.
3. The above scale of fees shall be considered as basic scale and will be applicable for dwelling houses only.
4. In case of the proposal for Medical, Educational, Religious purpose run by charitable institutions which are duly registered, fees shall be charged at 1/2 of the basic scale subject to a minimum of Rs. 200/-.
5. In case of proposal for Industrial, business and Commercial buildings, Cinema Theatres and entertainment halls, hotels, and lodging houses fees shall be charged at double the basic scale subject a minimum of Rs.400/-.
6. For the purpose of this clause, a residential building with even a single shop will be treated as a commercial building, similarly watchman's Quarter's in industrial premises shall be considered as an Industrial Building.

16.1(2)¹ Scale of Scrutiny fees

Purpose	Scale of Fees	
	A' for purely Residential occupancies	B' for occupancies other than residential
a. Where application for re-validation is submitted within one month of expiry of C.C.	400/-	1000/-
b. Where application for revalidation is submitted after expiry of one month but before expiry of 3 months of C.C.	400/- + 400/- (late fee) = 800/-	1000/- + 1000/- (late fee) = 2000/-
c. Where application for revalidation is submitted after expiry of 3 months of valid date of C.C. but in any case not later than 2 years from the date of approval	800/- + late fee at 200/- per month or part thereof to the period beyond 3 months of valid date.	2000/- + late fee at 400/- per month or part thereof to the period beyond 3 months of valid date.

¹The Regulations were amended and sanctioned on 21/09/1994.

16.1(3)¹

Purpose	Scale of Fees
For the layout proposal	Rs 1000 for area upto 2508 sqm (3000 sq.yards) & Rs. 200/- per additional 1000 sqm or part there of
For subdivision or amalgamation proposals	Minimum Rs 2000 for 2508 sqm (3000 sq.yards), area of holding and Rs.200/- per additional 1000 sqm or part there of

Note: In case of proposal from Medical, Educational, Religious purpose, run by charitable Institution which are duly registered, fees shall be charged at 50% of the basic scale, subject to a minimum of Rs 250 for sub-division / amalgamation proposal.

16.1(4) Rs.25/- per proposal and amendment thereof, if the intended development is with in the scheme for allotment of plots of land to the project affected landholders in the defined area contiguous to the villages.

16.2 Security Deposit ²

The applicant shall deposit and keep deposited an amount as a Security for the due performance of the conditions attached to the permission granted under the Commencement Certificate. The amount shall be deposited along with the application, and shall be calculated at the following rates:

16.2(1) Rs.10/- per Sq.M. of the total floor area proposed to be constructed for all the land uses except in case of development for hospital, dispensary, school or college.

16.2(2) Rs.5/- per Sq.M. of the total floor area of the development for hospital, dispensary, school or college or for any other purpose which the Corporation may specify by general or special order. The total amount to be deposited in such cases shall not exceed Rs.1000/-.

16.2(3) Rs.250/- for every 100 Sq.M. of plot area or part thereof if the intended development is within the scheme for allotment of plots of land to the project affected landholders in the defined area contiguous to the villages.

16.2(4) These rates are liable to be revised after every 5 years from the date on which these rules come into force.

16.2(5) The deposit shall carry a simple interest of 6 percent per annum accruing from month to month, the period of less than a month, being disregarded. The Security Deposit shall be refunded with accrued interest after the grant of the Occupancy Certificate.

¹The Regulations were amended and sanctioned on 21/09/1994.

²The Regulations were amended and sanctioned on 10/10/1986.

16.2(6) The Security Deposit shall be forfeited either in whole or in part at the absolute discretion of the Corporation for breach of any of the provisions of these regulations and conditions attached to the permission conveyed by the Commencement Certificate. Such forfeiture shall be without prejudice to any other remedy or right of the Corporation.

16.3 Design of Buildings

16.3(1) GCR (Ground Coverage Ratio), FSI (Floor Space Index), VPR (Volume to Plot Area Ratio).

16.3(1a)¹ The floor Space Index shall be in relation to the land use as defined by Regulation 3.17 and shall not exceed the following that is to say:

	Land Use	Maximum Permissible FSI
A	Residential	1.00
B ²	<p>Business or Mercantile or Residential use in predominantly commercial zone,</p> <p>Or</p> <p>Business or Mercantile use wholly or in combination with the residential use in any other zone mentioned in Regulation 14, other than Regional Park Zone and No Development Zone, provided that in case of combination, Business or mercantile use shall not be less than 10% of the admissible FSI. Provided further that the area of all such plots taken together in the zone from Node shall not exceed 15% of the area of the relevant zone from the Node.</p> <p>i. For plots of area below 1000 sqm.</p> <p>ii. For plots of area 1000 sqm. and above</p> <p>Note: The benefit of this amendment mentioned at (ii) above may be extended to plots of land leased or agreed to be leased earlier with different (lower) FSI, in Zones other than predominantly Commercial Zone, after recovery of such additional lease premium as the Corporation may prescribe and provided further that all other GDCRs provisions including parking are complied with.</p>	<p>1.00</p> <p>1.50</p>

¹The Regulations were amended and sanctioned on 10/10/1986.

²The Regulations were amended and sanctioned on 22/03/2004.

BBB ¹	<p>Starred category Residential Hotels in any zone other than RPZ</p> <p>"With the previous approval of Government and subject to payment of such premium as may be fixed by Government (out of 50% payable to Corporation) and subject to such other conditions as it may specify, the FSI to maximum of 2.00 may be permitted independent plots and under one establishment as approved by the department of tourism".</p>	1.50
C ²	<p>Educational, Medical, religious and social including land-use for the benefit of the community.³</p> <p>Provided that with the previous approval of VC&MD, CIDCO.</p> <p>I. Additional 100% FSI may be permitted to the buildings used for educational purpose, medical purpose and institutional buildings of Government or public authorities or of registered public charitable trusts.</p> <p>II. Additional 50% FSI may be permitted to the buildings of religious purposes of registered charitable public trust situated on independent plots having minimum 500 sqm area.</p> <p>Note: 1. No condonation shall be given in the provisions of GDCRs for availing the additional FSI.</p> <p>2. The additional FSI mentioned at SR. No. I be granted subject to payment of additional premium as may be determined by the Corporation.</p> <p>3. In case of religious buildings 10% of additional FSI may be used for ancillary residential purpose. The benefit of the above amendment shall also be extended to the existing authorized religious buildings.</p> <p>4. The additional FSI for religious purpose shall be permissible subject to payment of a premium of 25% of the Ready Reckoner value of the respective year out of which premium shall be paid 50% to the Government and remaining 50% to CIDCO.</p> <p>5. In case of religious buildings, No Objection Certificate shall be obtained from the Home Department of Government of Maharashtra and the Collector before applying for permission.</p> <p>6. In case of religious buildings, the proposal shall be consistent with the Development Plan proposals.</p>	1.00

¹The Regulations were amended and sanctioned on 30/11/2002.

²The Regulations were amended and sanctioned on 19/05/2001.

³The Regulations were amended and sanctioned on 12/11/2010.

D ¹	Industrial-	a. Service Industry	0.50
		b. Other Industrial Development	1.00
<p>Additional FSI to Biotechnology unit:</p> <p>The Managing Director may permit the additional FSI exceeded by 100% in respect of buildings in independent plots of Biotechnology establishment set up by Public Bodies like MHADA, SEEPZ, MIDC, SICOM, CIDCO or their joint venture companies having more than 11% stake of these bodies or lessees of this public bodies having plots exclusively used for Biotechnology units, subject to terms and conditions as he may specify.</p> <p>Provided that, in case additional FSI allowed in respect of Biotechnology unit as aforesaid, with due considerations to the other provisions laid down under GDCRs, premium as determined by the Corporation shall be paid to the Corporation out of which 50% shall be payable to the Government.</p>			
E ²	Assembly (such as Drama Theatres, Cinema Theatres, Meeting Halls and other places of Congregation) in all zones except RPZ.		1.00
EE ²	Assembly (such as Drama Theatres, Cinema Theatres, Meeting Halls and other places of Congregation) in RPZ.		
	1.	Theatres, Motion picture houses, Assembly halls, Auditoria, Exhibition hall, Museums, Restaurants, etc. with minimum plot area of 2000 sq.mt.	0.15
	2.	Film and Video shooting sites with min. plot of 5.0 hectare subject to permanent built-up facilities with max. ground coverage of 10%.	0.10
	3.	Religious and other places of worships	0.10
	4.	Crematoria and burial grounds with incidental structure	0.05
	5.	Parks, Gardens, Play Grounds, Golf Courses, Race Courses, Swimming Pools, shooting ranges, Camping grounds, facilities for Water Sports, Amusement Parks, Theme parks etc.	0.10
6.	Highway amenities such as parking lots including truck terminals, police check-posts, toll stations, Octroinak as with proper lay-byes and subject to IRC codes and approval of Highway authorities (intersection, tree plantation, setbacks from road, advertising etc. controls to be detailed out)	0.10

H ³	<p>Information Technology Land use is permitted in any land use zone other than Regional Park Zone and the maximum permissible FSI in the respective zone will be applicable. Provided that, the Corporation may permit an addl. FSI, in the entire Navi Mumbai area, to the extent of 100% over and above the FSI values prevailing as on 1.4.2000 to the plots sold exclusively for software development, at designated I.T. Parks only, at an additional lease premium as may be decided by the Corporation, with due consideration to the other provisions laid down under GDCRs, including parking standards.</p>	

¹ The Regulations were amended and sanctioned on 03/09/1996.

² The Regulations were amended and sanctioned on 29/02/2008.

³ The Regulations were amended and sanctioned on 19/04/2000.

HH ¹	Airport & Allied Activities / Services - Maximum permissible FSI = 1.00
I ²	<p>Change of use:</p> <p>Corporation may allow Change of Use on plots allotted exclusively for Residential use, Residential cum commercial use or commercial use on the following conditions:-</p> <ol style="list-style-type: none"> a. From Residential use (FSI 1.00) to Residential-cum-business / Mercantile use or Business or mercantile use wholly (FSI 1.50) subject to the condition that all such business / mercantile plots wholly or in combination with residential shall not exceed the limit specified in Clause 16.3(1a)B of the GDCR. b. From Business or mercantile use (FSI 1.50) to Residential-cum-Business/ Mercantile use (FSI 1.50) and vice versa. c. To allow such change uses only for plots having a minimum area of 1000 sq.m. and deriving access from road of 15.00 m width or more. Further, the Corporation may levy additional lease premium for allowing such change of use and / or grant of additional FSI with due consideration of other provisions laid down under GDCR. d. After grant of change of use, the allottee shall comply with all provisions of GDCR including the parking standards without seeking relaxation of any kind in GDCR provisions. e. Business / Mercantile user other than residential user allotted shall not be more than 30% subject to further condition that the principle land use should be segregated by separate entrance. f. Conversion from Residential to Residential-cum-Business / Mercantile use shall not be permitted on the lands granted for educational, institutional and public amenity purpose.

16.3(1b) The GCR of the following land uses shall not exceed 0.5; unless otherwise specified in Special Development Control Regulations.

8. Industrial
9. Storage

16.3(1c) The VPR for the following land use shall not exceed 4 M unless otherwise specified in Special Development Control Regulations.

9. Storage

¹ The Regulations were amended and sanctioned on 21/03/2012.

² The Regulations were amended and sanctioned on 31/08/2009.

16.3(1d)¹ The VPR for the following land use shall not exceed 2 M:

9. Storage land use within the area exclusively earmarked for Service Industry and allied land uses as stated in sub regulation 14.4, under. ²
 1. Predominantly Residential Zone and
 2. Predominantly Commercial Zone
 3. No Development Zone ²

16.3(1e) If the area of plot under development for Residential Land use is 1000 Sqm. or above, the tenement densities shall be as follows :

- (i) For dwelling units with built-up area of more than 30 sqm the minimum and maximum densities on the net plot area shall be 100 tenements per hectare and 300 tenements per hectare respectively.
- (ii) For dwelling units with built-up area upto 30 sqm, the maximum density shall be 550 tenements per hectare of the net plot area.
- (iii) If the area of plot under development is within the scheme for allotment of land to the project affected land holders in the defined area contiguous to the villages or within the scheme of allotment of 12.5% land to the project affected land holders, the maximum density shall be 550 tenements per hectare of the net plot area, irrespective of the size of dwelling unit.³

16.3(1f) The volume of plinth shall not be considered in the calculation of volume of building provided further that in case of building permitted for land use of storage, the height of the plinth shall not be less than lorry loading height. ⁴

16.3(2) Room Sizes:

16.3(2.1) For the Residential Land Use the sizes of rooms shall not be less than those stipulated below:

- a. One Room Dwelling units
 - i) The carpet area of a one room dwelling unit shall not be less than 9.5sqm. A nahani admeasuring 0.9 m x 0.9 m. may be provided in addition to the minimum carpet area.
 - ii) If the one room dwelling unit includes a WC or bathroom their sizes shall be as per regulation 16.3 (2.3).
 - iii) If WCs and bathrooms are to be provided in common, they shall be governed by the following provisions.

¹ The Regulations were amended and sanctioned on 31/03/1978.

² The Regulations were amended and sanctioned on 30/05/2005.

³ The Regulations were amended and sanctioned on 03/09/1996.

⁴ The Regulations were amended and sanctioned on 30/09/2002.

One WC and Bathroom shall be provided for every four dwelling units or part thereof.

One general washing place of area not less than 2.25 Sqm. shall be provided for every four dwelling units, or part thereof.

All these facilities shall be available on the same floor on which the dwelling units are located.

b. Dwelling units with two or more rooms.

- i) The total carpet area of a two room dwelling unit shall not be less than 20 sqm.
- ii) The total carpet area shall be apportioned as living room and kitchen in such a way that the carpet area of the living room shall not be less than 10.5 sqm and the carpet area of the kitchen shall not be less than 4.5 sqm.
- iii) The dimension of the living room shall not be less than 2.4 M and that of the kitchen shall not be less than 1.7 M.
- iv) The carpet area of any other room, provided in addition to the living room and kitchen shall not be less than 7.5 sqm and the dimensions of such room shall not be less than 2.4 M.

16.3(2.2) The carpet area of room in buildings for all the other land uses shall not be less than 7.5 sqm and the dimensions of such room shall not be less than 2.4.M.

16.3(2.3) The minimum sizes of bathrooms and the WCs shall be as follows, for buildings of all and uses:

- a. Bathroom: The internal dimensions of a bathroom shall not be less than 1.20 M x 1.20 M.
- b. Water Closet (WC): The internal dimensions of WC shall not be less than 0.90 M x 1.20 M.
- c. Combined Toilet: The internal dimensions of a combined bathroom and WC shall not be less than 1.2 M x 2.1 M.

16.3(3) Height of Room:

16.3(3a)¹

- i) The height of a room in any building shall not be less than 2.6m
- ii) Wherever the height of a room in any building shall be 4.27 M or more, the FSI of such a room shall be calculated at twice its area.²

¹ The Regulations were amended and sanctioned on 21/09/1994.

² The Regulations were amended and sanctioned on 30/09/2002.

Provided that, nothing contained herein shall apply to a room intended to be applied to assembly land use, industrial land use and storage land use as defined in clauses 5, 8 and 9 respectively of Sub-Regulation 3 of Regulation 14.

- iii) In case of plots earmarked for residential Bungalow, semi-detached or Row Houses, depending upon the size of the plot and with a prior written permission of the Managing Director or the Chief Architect and Planner, CIDCO, floor area upto 30% of the plot area, may be allowed to have clear internal height of more than 4.27 m., without counting the same twice for computation of FSI.¹
- iv) In case of Assembly Halls, Residential Hotels of 3 star category and above, Institutional, Educational, Industrial, Hazardous or storage occupancies, departmental stores including entrance halls and lobbies of all the aforesaid categories minimum and maximum height shall be 3.6 m and 4.2 m respectively. Subject to the written permission of the Managing Director, CIDCO, greater height may be permitted.
- v) No lofts be allowed in such areas wherein increased height is proposed.

16.3(3b) The height of bathrooms, WCs and Store Rooms in buildings of all land uses shall not be less than 2.2M.

16.3(3c) Height of Room for ITE²

Any telemetric equipment storage erection facility can have a height as required for effective functioning of that structure.

16.3(4) Lofts and Mezzanines:

The following regulations shall apply to buildings of all the Land uses:

- a) A loft shall be permitted only on one of the walls of the room. The minimum height below the loft shall be 2.0 M.
- b) A mezzanine floor shall be permitted within a room provided that the carpet area of such room is not less than 27 sqm and the area of the mezzanine floor does not exceed 30% of the carpet area of the room in which it is located. The height above and below the mezzanine floor shall not be less than 2.4 M and 2.6 M respectively.

16.3(5) Balconies³ :

- a. The minimum clear width of balconies in buildings (of all the land uses) shall be one meter, provided that the aforesaid width need not be insisted upon through the length, in case of semicircular or any non-rectangular shaped balconies. ⁴

¹The Regulations were amended and sanctioned on 31/03/2006.

²The Regulations were amended and sanctioned on 19/04/2000.

³The Regulations were amended and sanctioned on 10/10/1986.

⁴The Regulations were amended and sanctioned on 24/09/1991.

- b. The floor area of balconies to the extent of 15 percent built up area of the respective floor will be permitted free of FSI (in all the land uses excepting industrial and service industrial user). Any additional area beyond 15 percent shall be included in the floor area for computation of FSI.¹
- c. A balcony in a building may be permitted to be enclosed by an open grill and parapet grill, being above 0.9 m without payment of additional premium.¹
- d. A balcony in a building may be enclosed otherwise upon the payment of additional premium as would be decided by the said Development Authority from time to time.¹

16.3(6) Apertures for Light and Ventilation

The following regulations shall apply to all rooms in buildings of all land uses:

- a. All rooms shall be provided with one or more apertures such as windows, fan lights, skylights, louvered doors and the like, opening directly on to the external air or on to a covered unenclosed balcony not more than 2M in width.
- b. The total area of such apertures inclusive of frames shall not be less than 1/6th of the carpet area of the room. The glazed portions of the apertures may be partly fixed. The area of such partly fixed portions shall not exceed 33% of the total area of apertures. No portion of a room shall be considered to be lighted, if it is more than 7.5M away from the aperture directly lighting it.
- c. In case of building in which any portion of a room is more than 7.5M away from the aperture or where artificial ventilation is resorted to through air conditioning system, the illumination levels due to artificial lighting shall be as prescribed in the National Building Code Part VIII Clauses 4.1.2 and 4.1.2.2 or any modifications thereof. In all such cases a detailed plan showing proposed illumination arrangement shall be submitted for approval.
- d. For air conditioned premises the provisions as prescribed in part VIII Section 3 of National Building Code or any modifications thereof shall apply.
- e.² The end-walls abutting plot boundary, especially, row houses, semi-detached houses, bungalows etc., may be allowed to derive light and ventilation from the adjoining public spaces, roads, gardens etc., subject to the following:
 - i. Such openings may be allowed subject to the condition that at least 3.0 m side margin be maintained on that end, in case the openings are on ground floor. No door openings shall be allowed on the end walls abutting the plot boundary.

¹The Regulations were amended and sanctioned on 24/09/1991.

²The Regulations were amended and sanctioned on 31/03/2006.

- II. Such openings shall not generally exceed 15% of the total area of the end wall. These openings nevertheless, shall not be considered as main source of light and ventilation.
- III. Such an opening shall not vest any easement right on the part of the user. The Corporation or the concerned public body as the case may be, has freedom to carry out the activities as if no openings exist on the end-walls. The user shall keep the openings solely at his own risk.
- IV. The construction shall be carried out such a way that the projection does not go beyond the plot boundary on the ground floor.
- V. The local authority or the concerned public body, as the case may be, shall have the right to take suitable remedial measures and remove projections in the public spaces, without prejudice to the provisions laid under the Indian Easement Act.

Notwithstanding anything contained in the foregoing provisions, in case the openings are made on road or garden side, the premium, as the Corporation may prescribe, shall be levied.

16.3(7) Refuse Chutes:

The following provisions shall apply in case of refuse chutes, if provided:

- a. The refuse shall be collected in an enclosed chamber located at the bottom of the chute.
- b. The chamber shall be provided with sufficiently large refuse receptacle. The bottom opening of the refuse chutes shall be provided with lid which can be closed when the receptacle is being removed from the chamber. The bottom chamber shall be provided with necessary draining arrangements so that water does not accumulate inside the chamber.
- c. The internal surface of the refuse chutes and the bottom chamber shall be non-absorbent and cleanable.
- d. No intake opening on a refuse chutes shall be greater in area than 60% of the cross sectional area of the chute and all such opening shall be fixed with approved fire resistant metal closures designed to close automatically on release.
- e. Every interior chute shall extend not less than 1 M above the roof and shall be covered with a sky light or shutter not less than one half of the area of the chute.
- f. Every refuse chute shall be equipped at the top with spray equipment for washing down purpose and with an automatic sprinkler for fire protection.

16.3(8) Inner and Outer Chowk:

The following regulations shall apply to buildings of all the land uses:

- a. Inner chowks shall be allowed only in buildings, constructed on stilts. The chowk shall be kept accessible at the ground level. However, Inner Chowks shall be permitted in row houses, semidetached houses and bungalows, built on the ground but which are used only for residential land use.¹
- b. No dimension of an inner chowk on which doors and windows abut shall be less than 3 M.
- c. Inner chowk on which doors and windows abut shall have area at all levels of the chowk, of not less than the square of 1/5th height of the highest wall abutting the chowk. No room excluding a staircase, bathroom and WC shall be exclusively dependent for its light and ventilation on an inner chowk. If any room abutting an inner or outer chowk is exclusively dependent upon such chowk for its light and ventilation the dimensions of the Chowk shall be in accordance with Regulation 17. Provided that when only bath rooms and Water Closets abut the chowk, chowks shall have a minimum dimension of 2.5 M and any area for any height.
- d. No length (as distinguished from its depth) of an outer chowk shall be less than 2.00 M.

16.3(9) Staircases:

The following regulations shall apply to all the staircases in buildings of all land uses without prejudice to the provisions of Regulation 24.

- a. The width of the staircase shall not be less than 1.0 M.
- b. The width of tread without nosing shall not be less than 25 Cms.
- c. The height of riser shall not exceed 19.5 Cms and they shall be limited to 12 per flight.

16.3(10) Lifts:

The following regulations shall apply to lifts in buildings of all land uses without prejudice to the provision of Regulation 24.

- a. If the height of building exceeds 16 M. at least one lift shall be provided in the building.

¹The Regulations were amended and sanctioned on 31/03/2006.

- b. Where, the height of a building exceeds 24 meters, at least two lifts shall be provided in the said building.¹

16.3(11) Fitness Centre²

In every residential building, constructed or proposed to be constructed, for the use of Co-Operative Housing Society or an Apartment Owner's Association, a fitness centre will be permitted subject to following conditions:

- i. The area of such centre shall be equivalent to 2 (two) percent of the total area of the building, however it shall not be less than 20 sq.mt. and more than 200 sq.mt.
- ii. The centre shall not be used for any purpose other than for fitness centre activities.
- iii. The fitness centre activities shall be confined to the members of the concerned housing society only.
- iv. The benefits of this provision shall be applicable prospectively and it shall not be extended for the purpose of regularization of already built up structures constructed without permission.
- v. The ownership of the structure for Fitness Centre shall vest with the concerned society or association.

17 OPEN SPACES AROUND BUILDINGS

17.1 The following regulations shall apply to buildings of all land uses except Industrial Land Use.

- a. The front, side and rear open spaces shall not be less than 3 M. in width where the height of building does not exceed 10 M.
- b. For height of building above 10 M and upto 25 M in addition to the minimum width of the open spaces required for the height of 10 M there shall be an increase in the width of the minimum open spaces at the rate of 1 M per every 3 M or fraction thereof, for height above 10 M.
- c. For heights of buildings above 25 M and upto 30 M the minimum width of the open space shall be 10 M.
- d. For heights of buildings above 30 M in addition to the minimum width of the open space required for heights upto 30 M. There shall be an increase in the width of the open space at the rate of 1 M per every 5 M or fraction thereof. For heights above 30 M., the width of the open space need not exceed 16 M.

¹The Regulations were amended and sanctioned on 24/09/1991.

²The Regulations were amended and sanctioned on 13/09/2005.

17.2¹

- a. If any interior or exterior open space is intended to be used for the purpose of light and ventilation by more than one building belonging to the same owner, then the width of such open space shall be the one required for the tallest building as specified in clause 17.1 of GDCR's.

However, this distance shall be the clear distance without any projections like balcony etc.

- b. The open space specified under (a) above may not be required to be provided if the end walls of buildings are to be left permanently blank without any openings. However, the minimum distance between any blank wall of a building and the plot boundary shall be 3 M if the building is upto 16 M in height, 4.5 M if the building is more than 16 M but not more than 24 M in height and 6 M if the building is more than 24 M in height.

17.3 For buildings of residential land use following special provisions shall apply.

- a. For semi-detached buildings having not more than two storey, the width of the front, rear and one side open space shall not be less than 3 M.
- b. For row-houses having not more than two storeys the width of the front and rear open spaces shall not be less than 3 M.

17.4 Following regulations shall govern the opens spaces around buildings of industrial land use:

- a. For plots of area less than 800 Sqm minimum width of the front open space shall be 5 M and the minimum width of side and rear open spaces shall be 3m.
- b. For plots of area between 800 Sqm and 1200 Sqm the minimum width of front open space shall be 5 M and the minimum width of side and rear open spaces shall be 4 m.
- c. For plots having an area of more than 1200 Sqm the minimum width of the front open space shall be 6.5m and the minimum width of side and rear open spaces shall be 5 m.

17.5 Projection in the open spaces:

Balconies, Chajjas, Weather Sheds and such other features shall be permitted to project in the open space to the extent of 1.5 M. But the clear width of the open space shall in no case be less than 3 M.

¹ The Regulations were amended and sanctioned on 10/10/1986.

17.6¹ If the intended development is within the scheme for allotment of plots of land to the project affected land holders in the defined area contiguous to the villages, or with the scheme of allotment of 12.5% land to the project affected land holders, the clear marginal open spaces within the plot required to be provided for the purposes of deriving light and ventilation shall be as follows

Category	Area of plot fronting road (in m)		Max permissible height of bldgs	Min. Marginal Open Spaces (in m.)			
				Front	Side	Side-2	Rear
Row houses with or without common walls	a	40 m ² to less than 150 m ²	13 m	1.5	0.0	0.0	2.25
	b	150m ² to 300m ²	13 m	3.0	0.0	0.0	3.0
Semi detached buildings	a	100 m ² to less than 150 m ²	13 m	1.5	2.25	0.0	2.25
	b	150 m ² to less than 300 m ²	13 m	3.0	1.5	0.0	3.0
	c	More than 300 m ² to less than 450 m ²	13 m	3.0	3.0	0.0	3.0
Detached buildings	a	450 m ² to less than 1000 m ²	13 m	3.0	3.0	3.0	3.0
	b	1000 m ² and above	As per regulation No. 17				

Note: If parking space under stilt is provided additional height of the building to the extent of the height of the stilt may be permitted.

17.7² The restrictions on development & height of buildings in the vicinity of Airport & also in the area under landing & take of zones, as defined by the Corporation shall be regulated in consultation with Airport Authority of India (AAI), Govt. of India.

18³ CAR PARKING, LOADING & UNLOADING

18.1 One parking area for different modes and number of car spaces to be provided for various land uses shall be governed by the following table.

¹ The Regulations were amended and sanctioned on 10/10/1986, 10/01/1990 & 03/09/1996.

² The Regulations were amended and sanctioned on 21/03/2012.

³ The Regulations were amended and sanctioned on 30/11/2002.

Sr. No.	Type of mode	Size of parking bay
1	Car	2.5 m x 5.0 m
2	Scooter	2.5 m x 1.2 m
3	Bicycle	2.0 m x 0.7 m
4	Truck	3.75 m x 10.0 m

Land Use	Car spaces
1 Residential	a. One space for every one tenement of built-up area more than 60 sqm
	b. One space for every two tenements of built-up area more than 45sq.m upto 60 sqm
	c. One space for every four tenements of built-up area upto 45 sqm
2 I. Star Hotels II. Hotels III. Lodging IV. Restaurants	I. One space for every 60 sqm of total floor area
	II. One space for every 75 sqm of floor area
	III. One space for every 100 sqm of floor area
	IV. One space for every 50 sqm of floor area
3 Educational	One space for 100 sqm of floor area or part thereof
4 Institutional	One space for every 250 sqm of floor area or part thereof
5 Office (Govt.& Pvt.)	One space for every 70 sqm of floor area upto 1500 sqm and one space for every 150 sqm or part thereof for areas exceeding 1500 sqm
6 Assembly	One space for every 60 sqm of floor area or part there of
7 Business	One space for every 100 sqm of floor area or part thereof
8 Mercantile	One space for every 80 sqm of floor area upto 800 sqm or one for 160 sqm and thereafter
9 Industrial	One space for every 200 sqm of floor or part thereof subject to minimum of two spaces.
10 Storage	One space for every 200 sqm of floor area or part thereof subject to minimum of two spaces
11 Hospitals	One space for every 150 sqm of total floor area
12 Cinemas & Theatres	One space for every 20 seats
13 Shopping	One space for 80 sqm of total floor area or part thereof
14 Stadia	One space for every 150 seats plus additional as per the rules for restaurants etc.,

- 18.2(a). In addition to the above 10% of total parking spaces shall be provided for visitors parking and 10% for two wheelers parking. Further incase of plots exceeding 1000 sq. m. in area for all land uses except industrial and storage land use, suitably-by (as shown in appendix No. IIA, IIB&IIC) shall be carved out of visitors parking in the front area within the plot by means of compound wall.¹
- 18.2(b). On the ground floor minimum 3 m margin shall be kept from the rear edge of the lay- by subjective provision of Regulation 17.1 of the GDCRs. The building by from the 1st floor onwards may start from the rear edge of the lay-by subjective provision of Regulation No. 17.1 of the GDCRs.¹
- 18.3 Car parking spaces shall be clearly shown on the site plan along with the maneuvering space to the satisfaction of the Corporation.
- 18.4 The above standards for parking and loading, unloading may be modified in special development Control Regulation for Action area with due consideration of the common parking facilities provided in the layout of the action area.
- 18.5 In case of residential land use 25% of the open space around the building may be used for parking. In case of other land uses 50% of the open space around the building may be used for parking and loading, unloading provided that a minimum distance of 3.0 m around the building shall be kept free from any parking and loading, unloading spaces.
- Notwithstanding the above, entire marginal open space around the building in case of residential plot upto 500 sqm may be utilised for parking with adequate maneuvering spaces. ¹
- 18.6 In addition to the above table, loading and unloading spaces shall be provided for mercantile, industrial and storage land uses as one space for every 100 sqm of floor area or part there of upto 500 sqm and one for every 500 sqm or part thereof thereafter. The loading space shall be 3.75 m x 10.0 m.
- 18.7 Whenever the existing FSI is enhanced, building permission shall be given only after the provision of additional parking spaces corresponding to the revised total built-up area.
- 18.8 Guide lines for circulation space around parking spaces shall be followed as given in the Appendix-II.

19 MEANS OF ACCESS:

- 19.1 Approaches to buildings.

For residential land use, the width of the approach from the street to building shall not be less than:

- a. 1M provided its length is not more than 3 M and / or the floor area of the building served does not exceed 150 sqm.

¹The Regulations were amended and sanctioned on 29/03/2003.

- b. 2M if its length is more than 3 M but does not exceed 9M and/or the floor area of the building served is more than 150 sqm but does not exceed 800 sqm.
- c. 3.5M if its length is more than 9M and/or the area of the building served exceeds 800 sqm.

19.2 Internal Streets

The streets in a layout of sub-division scheme or the streets that serve more than one building in a plot of land shall be governed by following regulations:

- 19.2.1 For residential land use the width of the internal street shall not be less than 6M the minimum paved width being 3M, provided that the length of the street does not exceed 85M and/or the area of the plot served is not more than 3000 sqm.
- 19.2.2 For land uses other than residential the width of the street shall not be less than 11 m.
- 19.3 The Corporation shall have the right to specify the location of the access either for the approaches to the building or for the internal streets from a public road.
- 19.4 The approaches to buildings and internal streets shall be paved drained and lighted to the satisfaction of the Corporation.
- 19.5 The approaches to buildings shall be free from any obstruction. No portion of any building or structure shall project over the approach below a height of 2.25 m from the approach.

20 GATES & BOUNDARY WALLS

- 20.1 Detailed drawings of gates and boundary walls shall be submitted along with the application for development permission.
- 20.2 The height of boundary wall measured from the surrounding ground level or the adjoining kerb level shall not exceed 1.75M.
- 20.3 In case of plots at the junction of streets, no fence or boundary wall together with the grill facing the streets shall be raised to a height more than 0.8M from the kerb for a length of 9M from the junction of the streets.
- 20.4 In case of development for public utilities and public purposes, a solid boundary wall maybe permitted to a height of 2.5M above the surrounding ground level or the adjoining kerb level, with prior approval of the Corporation.

21 DISTANCE FROM WATER COURSE

No Development whether by filling or otherwise shall be carried out within 15M on either side of the bank of a water course. Provided that where a water course passes through a low lying land without any well defined banks the applicant may be permitted by the Corporation to restrict or direct the water courses to an alignment and cross section determined by the Corporation.

22 CONTROL OF AIR & WATER POLLUTION

- 22.1 No industrial effluent shall be disposed or exposed so as to cause nuisance and endanger public health.
- 22.2 Without prejudice to the generality of the above provision the Corporation may after the scrutiny of the information furnished in Form No.1 and any other information, stipulate certain measures to control the air borne emissions and liquid effluents from the factories. These measures shall be stipulated as conditions of the Commencement Certificate.

23 TREE PLANTATION¹

- 23.1 The development in any plot of land shall be such as to preserve, as far as practicable existing trees, where trees are required to be felled, 2 trees shall be planted for every tree to be felled.
- 23.2 Every plot of land shall have at least 1 tree for every 100 sqm or part thereof, of the plot area. Where the number of existing trees in the plot is less than the above prescribed standard, additional number of new trees shall be planted.
- 23.3 Where the tree authority having jurisdiction in the area under development has prescribed standards or regulations in respect of preservation of trees under Maharashtra (Urban Area) Preservation of Trees Act, 1975, the same shall supersede the sub-regulation 23.2 above.

24 OTHER ASPECTS OF DEVELOPMENT

- 24.1 The following aspects of development shall be governed by the provisions of the National Building Code of India 1970 - Indian Standard Institution or any modifications thereof.
1. Fire protection.
 2. Building Materials.
 3. Structural Designs.
 4. Constructional Practice and Safety.
 5. Building services.
 - a. Electrical Services
 - b. Air Conditioning and Heating
 - c. Installation of lifts and escalators
 6. Plumbing Services
 - a. Water Supply
 - b. Drainage and Sanitation
 7. Lightning Protection.

¹ The Regulations were amended and sanctioned on 31/03/1978.

- 24.2 Notwithstanding anything contained in the preceding clauses the CIDCO Fire Protection (Control in Navi Mumbai) Regulations, 1984 contained in appendix III shall apply to any development of land as specified therein.¹

25 LAYOUTS OR SUB-DIVISION OF LAND ¹

Development of land in the form of sub-division or layout shall be governed by the following regulations:

- 25.1 Whenever land is proposed for sub-division a layout of the entire area showing proposed sub-division with access road, open spaces, etc. shall be prepared and submitted for approval.
- 25.2 The provision of the access roads in any layout plan of land shall be as per the provisions of Regulation 19.
- 25.3 The parking, loading and unloading spaces wherever required under these regulations shall be indicated on the layout plan and other plans submitted along with the application for development.
- 25.4 The open recreational spaces required to be provided in the lands allotted outside the Action Area for predominantly residential purpose shall be as per the relevant clause of the Agreement to Lease or 15% of the total plot area, whichever is more. The open recreational space provided shall be accessible and be at one place as far as possible.
- 25.4.1² The lessee of residential or residential-cum-commercial land will be allowed to construct structures/buildings in the recreational open spaces for the following purposes:

Electric sub-station, crèche, gymnasium, kindergarten or library, milk/telephone booth may be allowed by the Corporation. Structures upto a height of Stilt + 1 / G+1 storeys shall be permissible for these activities provided that, the gross built-up area under these uses, shall not exceed 15% of the area of the open space and area of the plinth of the such structures shall be restricted to 10% of the area of the open spaces provided as per Regulation 25.4 and on payment of necessary lease premium as may be determined by the Corporation. The built up area consumed in constructing the structures mentioned above shall not be counted towards the FSI permissible on the plot.

- 25.4.2 Recreation centre for elderly persons*
- 25.5 For purpose of computation of the FSI the total area of the plot shall be considered.

26 CONTROL OF ERECTION OF HOARDINGS

- 26.1 Every Hoarding shall be designed so as to withstand the wind, dead, seismic and other loads as per the provisions of regulation 24. No variation in the height of hoarding shall be permitted however, variation in length shall be allowed in multiples of 2.5M.

¹ The Regulations were amended and sanctioned on 10/10/1986.

² The Regulations were amended and sanctioned on 27/10/2005.

* Awaiting Government Sanction

- 26.2 Size of Hoardings: sizes of Hoarding along with various roads shall be governed by the following table :

Road width range in Meters.	Height of Hoarding (width)	Maximum length of Hoarding
a. National Highways and Roads more than 50 M in width	3 M.	10.00 M.
b. 20M to 50M	3 M.	7.50 M.
c. 10M to 20M	2 M.	5.00 M.
d. Less than 10M	1 M.	2.50 M.

- 26.3 Maximum height of hoardings on ground: No hoarding shall be erected to a height exceeding 9 M above the ground. The light reflectors may however extend beyond the top of the hoarding. The lower base or the bottom of the hoarding shall be at a height of not less than 2.25 M from surface of ground below.

- 26.4 Distance from Road: A minimum distance of 3 M shall be maintained between the edge of the existing or proposed street, as stipulated by the Corporation.

Distance from the junction of a road: The Hoarding along roads shall not be permitted within a distance of 100 M from the junction of the intersection of a road. This distance being measured between hoarding and the centre line of a junction.

- 26.5 Any hoarding which in the opinion of the Corporation is likely to be confused with an authorized traffic sign or signal shall not be permitted.

- 26.6 Any hoarding containing the word 'stop', 'look' 'danger' or other similar word that might mislead or confuse the traveler shall not be permitted.

- 26.7 Hoarding on roof:

26.7(1). The size of hoarding on roof shall be 1 m. X 2.5 m or in exact multiples there of subject to maximum of 3 m x 10 m.

26.7(2). No hoarding of roof shall project beyond the existing building line of the building on which it is erected shall extend beyond the roof in any direction.

26.8 Deposit and Fees:

- 26.8(1). The fees for erection and maintenance of the hoarding be charged as given below:

Sr. No.		Scale of Fees per annum per Sqm of hoarding area
1	For a space upto 5.00 sqm	Rs. 100.00
2	For every additional 1.00 sqm	Rs. 25.00

26.8(2). The fees for hoarding shall be paid by the applicant in advance, for a calendar year, or part thereof.

27 MINING AND QUARRYING

The following regulations shall govern the mining and quarrying operations:

27.1.a. The applicant shall deposit and keep deposited an amount as a Security Deposit for the due performance of the conditions attached to the permission granted under Commencement Certificate. The amount shall be deposited along with the application, and shall be calculated at the following rates. Rs.50/- per 100 sqm of plot area or part thereof to be used for mining, quarrying or operating brick kiln.

27.1.b. The deposit shall be refunded without interest after the expiry of the period mentioned in 27.4 below.

27.1.c. The Security Deposit shall be forfeited either in whole or in part at the absolute discretion of the Corporation for breach of any of the provisions of these Regulations and conditions attached to the permission covered by the Commencement Certificate. Such forfeiture shall be without prejudice to any other remedy or right of the Corporation.

27.2 No mining and quarrying operations where no blasting is involved shall be permitted within a distance of 50M from any public road, railway, canal or any other building. No mining and quarrying operations which involve blasting shall be permitted within a distance of 200M from any public road, railway, canal or any other building.

27.3 No building operation shall be permitted on the plot on which mining and quarrying has been permitted without the prior approval of the Corporation.

27.4 The mining and quarrying operations shall be permitted for a stipulated period not exceeding three years from the date of Commencement Certificate at a time and shall be so prescribed in the Commencement Certificate.

27.5 The following shall govern the mining and quarrying operations and shall form conditions of the Commencement Certificate.

27.5(1) The mining and quarrying operations shall not cause any nuisance to the people in the vicinity.

27.5(2) The mining and quarrying operations shall not cause depression, below the average ground level, if the operations are for the extraction of stone, earth or murum.

28 DEVELOPMENT OF LAND NOTIFIED FOR ACQUISITION

28.1 In case of land notified for acquisition under the Land Acquisition Act 1894 and where the land has not been acquired, the Corporation may in its absolute discretion grant permission for temporary development.

Provided that the period of such temporary development shall not exceed 1 year and provided further that the applicant shall undertake to remove the development so executed on or before the date specified by the Corporation.

- 28.2 All the foregoing provisions shall apply mutatis mutandis to such development.
- 28.3 The permission may be renewed from time to time at the discretion of the Corporation.
- 28.4 Security Deposit:
- a. The applicant shall deposit and keep deposited an amount as Security Deposit at the rate of Rs.10/- per sqm of the floor area of the proposed development for the due performance of the conditions of the permission granted under the Commencement Certificate.
 - b. The amount shall be refunded, without interest; after the removal of the development with due compliance with the conditions of the Commencement Certificate.
 - c. The Security Deposit shall be forfeited either in whole or in part at the discretion of the Corporation, for breach of any of the provisions of these regulations and conditions attached to the permission covered under the Commencement Certificate.
- 28.5 The development permission may be granted at the discretion of the Corporation with following conditions of the Commencement Certificate.
- a. The applicant shall remove all the development on land when directed by the Corporation.
 - b. The applicant shall neither be entitled for any compensation for the removal of the development nor for any alternative land.
 - c. The applicant if he desires may apply in writing for renewal of the permission.

29 DISCRETIONARY POWERS

In specific cases where a clearly demonstrable hardship is caused, the Corporation may modify any of the provisions of these regulations at its absolute discretion. Provided that, the Managing Director, shall before exercising such power consult a Committee constituted of Chief Architect, Chief Engineer and the Town Planning Officer.

30 GROUP HOUSING SCHEME OR PLOTTED DEVELOPMENT SCHEME ¹

30.1 In respect of the land developed or intended to be developed for the Group Housing Scheme or Plotted Development Scheme for the benefit of the economically weaker sections of the society by the Corporation or the Bombay Housing and Area Development Board as defined in the Maharashtra Housing and Area Development Authority, Act, 1976 or any other authority constituted by or under any law and approved by the Corporation, the Corporation may permit the development

¹The Regulations were amended and sanctioned on 07/08/1992.

or redevelopment of such land or any part thereof, after varying or modifying the standard, specification, or dimension contained in the foregoing Regulations but subject to the extent of variation or modification shown herein below:

Explanation - I: "Group Housing Scheme" means a scheme of constructing a building or buildings with one or more floors, each floor consisting of one or more dwelling units and having common service facilities. Provided that the land underlying such building or buildings is held in lease-hold by one person only.

Explanation - II: "Plotted Development Scheme" means a scheme of constructing dwelling units with one or more floors and having party walls or otherwise but having common service facilities. Provided that the lands underlying such dwelling units are held in leasehold by more than one person.

30.2 Design of Building

30.2(1a) In respect of the plotted Development Scheme the FSI shall be calculated with reference to the area of the plot held in one ownership.

30.2(1b) In respect of the Group Housing Scheme the FSI shall be calculated with reference to the plot area as deducted by the area of layout roads required under Clause 30.3(3) of this Regulation and by the recreational open space required under Regulation 30.3(5) and special Facilities and Public Utilities required under Regulation 30.3(6).

30.2(2) Sizes of bathroom and water closet (WC) - The internal dimensions of bathroom, WC, and combined toilet shall be as follow :-

- (a) Bathroom - 1.0M x 1.2 M
- (b) Water Closet - (WC) 1.0 M x 0.9 M
- (c) Combined Toilet - 1.0 M x 1.8 M

30.2(3) Height of room

- (a) The height of a room in any building shall not be less than 2.2 M at eaves incase of a sloping roof provided that the arithmetic average of the maximum height and the minimum height of the room under the same roof shall not be less than 2.6 M.
- (b) The height of bath rooms and WCs shall not be less than 2.2 M

30.2(4) Staircases - The following Regulations shall apply to the internal individual staircase only.

- (a) Minimum width
 - (i) For 2 Storied buildings: Straight Flight - 0.60M
 - (ii) For 2 Storied building with winders - 0.75 M
 - (iii) For 3 Storied buildings: Straight flight - 0.75 M.

- (b) Riser - 20 Cms. (Max.) Maximum number of winders shall be 2 in a quarter landing.
- (c) Tread -
- (i) For 2 storied building (G+1) - Minimum 22.5 cms

This could be reduced to 20 cms as the clear tread between per pends, with possibility of open riser as well as nosing and inclined riser to have an effective going of 22.5 cms.

30.2(5)(a) Permissible height of building and open spaces around buildings

- (a) The maximum permissible height of any buildings shall be 10 M.
- (b) The front side and rear open spaces shall be governed by the following table

30.2(5)(b) TABLE-1

Type of Development	Front		Side Attached	Rear		Max. Height Permissible	
	Vehicular 6m & above	Path Way		Attached	Detached		
1	2	3	4	5	6	7	
1	Ground floor Development						
a. Plotted (25m ² to 40m ²)	1.5 M	1.0 M	Nil	Nil	1.5 M	4.0 M	
b. Group Housing	1.5 M	Distance between two bldgs shall be min 3.0 m and distance between bldg and plot boundary shall be 1.5m.	Nil	Nil	Nil	4.0 M	
2	Gr.+ 1 Floor Development						
a. Plotted (25m ² to 40m ²)	1.5 M	1.0 M	Nil	Nil	1.5 M	7.0 M	
b. Group Housing	1.5 M	Distance between two bldgs shall be min 3.0 M and distance between bldg and plot boundary shall be 1.5 M.	Nil	Nil	Nil	7.0 M	
3	Gr.+ 2 Floors Development						
a. Plotted		Not permitted					
b. Group Housing	3.0 M	Distance between two bldgs shall be min 4.5 M and distance between bldg and plot boundary shall be 3.0 M.				10 M	

Note: The above provision shall also be applicable to plots up to 60 Sqm in area if the depth of plot is less than 12.0 M.

30.3 Requirement of Layout: The development of land in the form of a layout shall be governed by the following regulations:

30.3 (1) Plot- size minimum plot size shall be 25 Sqm

30.3(2) Peripheral Roads - Peripheral network of the roads for the scheme area shall be retained as per Development Plan / Nodal Plan or as may be directed by the Corporation.

30.3(3) Layout roads

- (a) For lengths more than 70 M and up to 85 M with dead end, vehicular road of at least 6 M (right of way) with 4.5 M paved width shall be provided.
- (b) A loop road with maximum 170 M total length shall be permitted with 6 M right of way and 4.5 M paved width.
- (c) For roads more than 85 M dead end / 170 M loop road, the right of way shall be minimum 9 M and carriage width shall be 6 M up to maximum 250 M length.
- (d) For roads more than 250 M in length the minimum right of way shall be 11m. with carriage width of 7 M.

30.3(4) Pathways

Length	Paved Width	Right of way
20	1.5 M.	3 M.
30	2.0 M.	3 M.
40	2.5 M.	3 M.
50	3.0 M.	3 M.
70	3.5 M	3 M.

Note: Dead end roads and pathways exceeding 30 M in length will not be accepted. Along open courts only paved pathways may be provided.

30.3(5) Recreational Open Space: (a) The proportion of recreational open spaces to the net residential area in the layout shall be 10 percent.

PROVIDED that the proportion of such open spaces together with areas under school and playgrounds, where provided, shall be 8.5 percent of the total gross area of the project. However, the percentage shall not be less than 9.5 percent exclusive of the areas of roads (11m and above) and other facilities such as schools, hospitals, markets, etc.

30.3(6) Social Facilities and Public Utilities:

Social facilities and public utilities shall be provided as per planning brief totally approved by the Corporation. These shall include schools, community centers, plots for social and religious purpose, plot for shopping and markets, plots for ESR/GSR, plot for electric sub-station, plot for sewage pump and any other purpose as approved by the Corporation.

31 SPECIAL AMENITIES AND FACILITIES FOR THE PARAPLEGIC / PHYSICALLY HANDICAPPED PERSONS ¹

- 31.1 These by-laws are applicable to all buildings and facilities used by the public.
- 31.2 In case any Public authority or Local Authority constructs the tenements for the disposal to the general public, some flats on the ground floor shall be reserved for the paraplegic/physically handicapped persons.
- 31.2.1 Non-ambulatory Disabilities: Impairments that, regardless of cause or manifest station, for all practical purposes, confine individuals to wheelchairs.
- 31.2.2 Semi-ambulatory Disabilities: Impairments that cause individuals to walk with difficulty or insecurity. Individuals using braces or crutches, amputees, arbritics, spastics, and those with pulmonary and cardiac ills may be semi-ambulatory.
- 31.2.3 Hearing Disabilities: Deafness or hearing handicaps that might make an individual insecure in public areas because he is unable to communicate or hear warning signals.
- 31.2.4 Sight Disabilities: Total blindness or impairments affecting sight to the extent that the individual, functioning in public areas, is the insecure or exposed to danger.
- 31.2.5 Wheel Chair: Chair used by Disabled people for mobility. The standard size at wheel chair shall be taken as 1050 mm. X 750 mm.
- 31.3 Certain flats on the ground floor of the residential buildings constructed for the staff by any Private / Public company or corporation shall be reserved for the disabled persons.
- 31.4 Also, the scope of the set of bylaws shall extend to such reserved flats to promote Non handicapping built environment.
- 31.5.a Access path/walk way: Access path from plot entry and surface parking to building entrance shall be of minimum of 1800 mm while having even surface without any slope. Slope if any shall not have gradient greater than 5%. Selection of floor material shall be made suitably to attract or to guide visually impaired persons (Annexure attached). Finishes shall have a non slip surface with a texture traversable by a wheel chair. Curbs wherever provided shall blend to a common level.
- 31.5.b Parking: For parking of vehicles of handicapped people the following provisions shall be made:
- i) Surface parking for two Car Spaces shall be provided near entrance for the physically handicapped persons with maximum travel distance of 30 M. from building entrance.
 - ii) The width of parking bay shall be minimum 3.60 M.

¹The Regulations were amended and sanctioned on 06/01/2003.

- iii) The information stating that the space is reserved for wheel chair users shall be conspicuously displayed.
- iv) Guiding floor materials or on audible signal device or other devices which serves the same purpose shall be provided to guide visually impaired persons.

31.6 Building Requirements:

The specified facilities for the buildings for physically handicapped persons shall be as follows:

31.6.1

- a) **APPROACH TO PLINTH LEVEL:** Every building should have at least one entrance accessible to the handicapped and shall be indicated by proper signage. This entrance shall be approached through a ramp together with the stepped entry.
- b) **RAMPED APPROACH:** Ramp shall be finished with non slip material to enter the building. Minimum width of ramp shall be 1800 mm. With maximum gradient 1:12. Length of ramp shall not exceed 9.0 M. having 800 mm high hand rail on both sides extending 300 mm. beyond top and bottom of the ramp. Minimum gap from the adjacent wall to the hand rail shall be 50 mm.

31.6.2 **STEPPED APPROACH:** For stepped approach size of tread shall not be less than 300 mm and maximum riser shall be 150 mm. Provision of 800-mm high hand rail on both sides of the stepped approach similar to the ramped approach.

31.6.3 **EXIT/ENTRANCE DOOR:** Minimum clear opening of the entrance door shall be 900 mm and it shall not be provided with a step that obstructed the passage of a wheel chair user. Threshold shall not be raised more than 12 mm.

31.6.4 **ENTRANCE LANDING:** Entrance landing shall be provided adjacent to ramp with the minimum dimension 1800 x 2000 mm. The entrance landing that adjoin the top end of a slope shall be provided with floor materials to attract the attention of visually impaired persons (here in after referred to as "the said guiding floor material"). Finishes shall have a non-slip surface with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.

31.7 CORRIDOR CONNECTING THE ENTRANCE/EXIT FOR THE HANDICAPPED:

The corridor connecting the outdoors to a place where information concerning the overall use of the specified building can be provided to visually impaired persons either by a person or by signs, shall be provided as follows:

- a) "Guiding floor materials" shall be provided or devices that emit sound to guide visually impaired persons.
- b) The minimum width shall be 1500 mm.
- c) In case there is a difference of level slope ways shall be provided with a slope of 1:12.

31.8 STAIR WAYS: One of the stair-ways near the entrance/exit for the handicapped shall have the following provisions:

- a) The minimum width shall be 1350 mm.
- b) Height of the riser shall not be more than 150 mm and width of the tread 300 mm. The steps shall not have abrupt (square) nosing.
- c) Maximum number of risers on a flight shall be limited to 12.
- d) Hand rails shall be provided on both sides and shall extend 300 mm. on both sides and shall extend 300 mm on the top and bottom of each flight of steps.

31.9 LIFTS: Wherever lift is required as per bye-laws, provision of at least one lift shall be made for the wheel chair user with the following cage dimensions.

Clear internal depth : 1100 mm

Clear internal width : 2000 mm.

Entrance door width : 900 mm

- a) A hand rail not less than 600 mm long at 1000 mm. above floor level shall be fixed adjacent to the control panel. Also, switch control shall be at an operating height equal to that of hand rails.
- b) The lift lobby shall be of an inside measurement of 1800 x 1800 mm or more.
- c) The time of an automatically closing door should be minimum 5 second and the closing speed should not exceed 0.25 M/sec.
- d) The interior of the cage shall be provided with a device that audibly indicates the floor the cage has reached and indicates that the door of the cage for entrance/exist is either open or closed.
- e) The lift meant for paraplegics/handicapped shall be available on each floor with proper signage.
- f) Also, this lift in case of power failure or any such emergent situations shall reach to the nearest floor

31.10 TOILETS: One special WC in a set of toilet shall be provided for the use of handicapped with essential provision of wash basin near the entrance for the handicapped.

- a) The minimum size shall be 1500 x 1750 mm.
- b) Minimum clear opening of the door shall be 900 mm and the door shall swing out.

- c) Suitable arrangement of vertical/horizontal handrails with 50 mm. clearance from wall shall be made in the toilet.
- d) The W.C. seat shall be 500 mm from the floor.

31.11 One of the wash basins in the toilet block on each floor shall be fixed at height of 75 cm above the finished floor level, with a tap. A similar arrangement has to be made for the drinking water facility

32 PROVISION FOR INSTALLATION OF SOLAR ENERGY ASSISTED SYSTEMS *

33 PROVISION FOR INSTALLATION OF RAIN WATER HARVESTING STRUCTURES *

34¹ Regulation for reconstruction / redevelopment schemes undertaken by CIDCO / Owners' / Association / Co-operative Housing Society (CHS) in respect of the authorised buildings previously constructed by CIDCO but subsequently destroyed by natural calamities or accidental fires or which have collapsed by aging or are demolished or being demolished under a lawful order of the Managing Director of CIDCO etc. :-

Reconstruction / Redevelopment, in whole or in part of a building,

- a) previously constructed by CIDCO (not being a building wholly occupied by warehousing/ Industrial user and also not being an individually owned structure) which has ceased to exist for the reasons mentioned above

or

- b) a building constructed by CIDCO which has been declared dilapidated by the Managing Director of CIDCO, shall be permissible in accordance with the provisions contained in Appendix-VII of this Regulation.

(hereinafter collectively referred to as dangerous / dilapidated buildings)

35 URBAN RENEWAL SCHEME FOR DEVELOPMENT AROUND GAOTHAN *

² The Regulations were amended and sanctioned on 13/08/2015

ANNEXURE

(Explanatory Notes for Regulation No. 31)

GUIDING/WARNING FLOOR MATERIAL:

The floor material to guide or to warn the visually impaired persons with a change of colour or material with conspicuously different texture and easily distinguishable from the rest of the surrounding floor materials is called guiding or warning floor material. The material with different texture gives audible signals with sensory warning when a person moves on this surface with walking stick. The guiding/warning floor material is meant to give the directional effect or warn a person at critical places. This floor material shall be provided in the following areas :

- a) The access path to the building and to the parking areas.
- b) The landing lobby towards the information board, reception, lifts, stair-cases and toilets.
- c) Immediately at the beginning/end of walkway where there is a vehicular traffic.
- d) At the location abruptly changing in level or beginning/end of a ramp.
- e) Immediately in front of an entrance/exit and the landing.

PROPER SIGNAGE:

Appropriate identification of specific facilities within a building for the handicapped persons should be done with proper signals. Visually impaired persons make use of other senses such as hearing and touch to compensate for the lack of vision. Whereas visual signals benefit those with hearing disabilities.

Signs should be designed and located so that they are easily legible by using suitable letter size (not less than 20mm. High) for visually impaired persons, information board in braille should be possible to approach them closely. To ensure safe walking there should not be any protruding sign which creates obstruction in walking. Public Address System may also be provided in busy public areas.

The symbols / information's should be in contrasting colour and properly illuminated because people with limited vision may be able to differentiate amongst primary colours. International symbol mark for wheel chair as shown below be installed at the lift, toilet, staircase, parking areas etc., that have been provided for the handicapped.

APPENDIX - I

Following Schedules should be indicated on the drawings or shall be separately submitted alongwith the Application in form No.1

1. Schedules of doors, windows and other apertures

Schedules of doors, windows and other apertures should be in the form shown below :

Type of Aperture	Size of Aperture	Area inclusive of frames	Area of fixed glazing if any

2. Schedule of Rooms

The rooms on each floor should be distinctly numbered and a schedule of room sizes and apertures should be divided in the form shown below :

Room No.	Dimensions of room	Carpet area of room Type No.	Apertures per room Type No.	Area	Total area of apertures

3. Schedule of floor areas

Schedule of floor areas should be in the form shown below :

	Storey	Floor area on each storey
Total Floor area		
Total Floor Area		
F.S.I.		

APPENDIX II

With reference to Regulation No. 18, the parking arrangement shown in the following diagrams shall be considered satisfactory.

APPENDIX - III

(See Rule 24.2)

CIDCO Fire Protection (Control in Navi Mumbai) Regulations 1984.

1. SHORT TITLE EXTENT AND COMMENCEMENT:

- 1.1 These regulations may be called CIDCO Fire Protection (Control in Navi Mumbai) Regulations 1984.
- 1.2 They shall apply to development on any land in the site of Navi Mumbai as designated by the State Government under the Provisions of sub-section (1) of Section 113 of the Maharashtra Regional and Town Planning Act, 1966 (Maharashtra Act No. XXXVII of 1966). In particular, they shall apply to buildings which are more than 24 M in height and to special buildings like educational, assembly, institutional, industrial, storage and hazardous and mixed occupancies with any of the aforesaid occupancies having area more than 150 sq.m.
- 1.3 They shall come into force with immediate effect.

2.0 DEFINITIONS:

- 2.1 Words and expressions not defined in these Regulations shall have the same meaning or sense as is assigned in the MR&TP Act 1966 and GDCR for Navi Mumbai 1975.
- 2.2 Combustible Materials: A material, if it burns or adds heat to a fire when tested for combustibility in accordance with IS: 3808 - 1966 Method of test for Combustibility of Building Materials.
- 2.3 Enclosed Staircase: A staircase separated by fire resistance walls and doors from the rest of the building.
- 2.4 Exit: A passage, channel or means of access from any building storeys or floor area to a street or other open space of safety.
- 2.5 Fire Lift: One of the lifts specially designed for use by fire service personnel in the event of fire.
- 2.6 Fire Proof Door: A door or shutter fitted to a wall / opening and constructed and erected with the requirement to check the transmission of heat and fire for a specified period.
- 2.7 Fire Resistance: The time during which it fulfils its function of contributing to the fire safety of a building when subjected to prescribed conditions of heat and load or restraint. The fire resistance test of structures shall be done in accordance with IS: 3809 - 1966 Fire Resistance Test of Structures.
- 2.8 Lift Well: Unobstructed space within an enclosure provided for the vertical movement of the lift car(s) and any counter weight(s), including the lift pit and the space for top clearance.
- 2.9 Non-combustible: A material which does not burn not add heat to a fire when tested for combustibility in accordance with good practice.
- 2.10 Travel Distance: The distance from the remotest point on a floor of a building to a place of safety be it a vertical exit, horizontal exit or an outside exit measured along the line of travel.

- 2.11 Escape Route: Shall mean any corridor, staircase or other circulation space, or any combination of the same, by means of which a safe place in the open air at ground level can eventually be reached.
- 2.12 Hazardous Material: Being defined as the material which is highly combustible or explosive or products which are liable to burn with extreme rapidity and/or which may produce poisonous fumes or explosions and the storage, handling, processing or manufacturing of which may involve highly corrosive, toxic or alkalies, acids or other liquids or chemicals producing flames, fumes and explosive, poisonous, laminate or corrosive gases or may produce explosive moistures of dust or fine particles subject to spontaneous ignition.

3. GENERAL REQUIREMENTS FOR ALL OCCUPANCIES :

- 3.1 Open Spaces on Road Sides.
- 3.2 For every building, having height between 16 M to 25 M there shall be minimum clear open space of 4.5 M on the sides fronting roads having width not less than 20 M.

4. CONSTRUCTION :

- 4.1 Building Materials :
- 4.1.1 Load bearing elements of construction and elements of construction for which the required fire resistance is one hour or more shall be of non-combustible material. Interior finish materials (wall panelings, floors, coverings etc) may be permitted of materials having their rating for flame spread and smoke developed not exceeding a very low flame spread limit in accordance with IS 1642 - 1960 (Class-1). Ceiling linings shall be of non-combustible or of plaster - board.
- 4.1.2 Stairs and corridors shall not contain combustible materials.
- 4.1.3 Structural members such as supports and bearing walls shall have fire resistance rating of 3 hours, transoms and ceilings 2 hours to 4 hours.
- 4.1.4 Internal walls and partitions (Fire Sections) walls separating corridors areas of floor that are used for any purpose other than circulation shall have a fire resistance of not less than two hours. There shall be no openings in such walls other than for doors or delivery batches with fire resistance not less than half an hour to one hour.
- 4.1.5 Facades shall consist of non-combustible building materials. A fire must bridge a distance of at least 0.9 meters between storeys.

5. STAIRCASE ENCLOSURE:

- 5.1 One lift and one staircase shall be considered as 2 exits required as fire exits as per these rules, for buildings having height of between 16 M and 22 M.
- 5.2 The internal enclosing walls of staircase shall be brick or RCC construction having fire resistance of not less than two hours. All enclosed staircases shall have access through self closing doors of at least half an hour fire resistance. These shall be single swing doors opening in the direction of the escape. The door shall be fitted with check action doors closure.
- 5.3 The staircase enclosure on external walls of the building shall be ventilated to atmosphere at each landing.

- 5.4 Permanent vent at the top equal to 5% of the cross sectional area of the enclosure and openable sashes at each landing level with area not less than 0.5 sq.m. on the external walls shall be provided. The roof of the shaft shall be at least 1 M above the surrounding roof. There shall be no glazing or glass bricks in any internal enclosing wall of a staircase. If the staircase is in the core of the building and cannot be ventilated at each landing, a positive pressure of 5 mm w.g. by an electrically operated blower / blowers shall be maintained.
- 5.5 The mechanism for pressurising the staircase shaft shall be so installed that the same shall operate automatically and also with manual operation facilities, when the automatic fire alarm operates.
- 5.6 (a) The maximum travel distance that shall be permitted from the farthest exit on a floor to the staircase shall be as follows:
- | | |
|------------------------|---------|
| Residential buildings. | 22.5 m. |
| Commercial buildings | 30.0 m. |
| All other buildings. | 22.5 m. |
- (b) Main staircases in buildings of following occupancies shall have a minimum width as specified below :
- | | |
|--|----------|
| i. Residential building. | 110 cms. |
| ii. Hotels etc. | 150 cms. |
| iii. Business & Mercantile bldgs. | 150 cms. |
| iv. Educational & Public assembly Buildings. | 200 cms. |
| v. Institutional building. | 200 cms. |

6. LIFT ENCLOSURES

- 6.1 The walls enclosing lift shafts shall have a fire resistance of not less than two hours. Shafts shall have permanent vents at the top not less than 1800 sq.m. in clear area. Lift motor rooms shall preferably be sited at the top of the shaft and shall be separated from lift shafts by the enclosing wall of the shaft or by the floor of the motor rooms.
- 6.2 Landing doors in lift enclosures shall open in the ventilated or pressurised corridor / lobby and shall have fire resistance of not less than one hour.
- 6.3 The number of lifts in one lift bank shall not exceed four. Shafts for fire lift in a lift bank shall be separated from each other by a brick masonry or RCC wall of fire resistance of not less than two hours. Lift car doors shall have fire resistance of not less than one hour.
- 6.4 If the lift shaft and lift lobby are in the core of the building, a positive pressure of not less than 2.5 mm and not more than 3 mm w.g. by an electrically operated blower / blowers shall be maintained in the lift lobby and positive pressure of not less than 5 mm w.g. shall be maintained in the lift shaft. The mechanism for pressurising the lift shaft and lift lobby shall be so installed that they shall operate automatically when the automatic fire alarm operate. The mechanism shall have facilities to operate manually (for building more than 24 m in height).
- 6.5 Exit from the lift lobby if located in the core of the building shall be through a self-closing smoke stop door of half an hour fire resistance.
- 6.6 Lifts shall not normally communicate with basement. However, one of the lifts may be permitted to reach the basement levels provided the lift lobby at each basement level is separated from the rest of the basement areas, by fusible link operated fire resistance door of two hours fire resistance.

- 6.7 Exit from lift lobby shall be through a self-closing smoke stop door.
- 6.8 Grounding switch / switches at ground floor level to enable the fire service to ground the lift / car / cars in an emergency shall be provided (for building more than 24 m in height).

7. EXTERNAL WINDOWS :

In case of centrally air-conditioned buildings area of the openable external windows on a floor shall be not less than 2.5% of the floor area. The locks for these windows shall be fitted with budget lock of the carriage key type (which can be opened with the point of a fireman's axe).

8. LIFTS AND FIRE LIFTS :

8.1 Provisions for a fire lift shall be made as per the following details in buildings more than 24 M only.

- a) To enable Fire Services personnel to reach to the upper floors with the minimum delay, one of the lifts shall be so designed so as to be available for the exclusive use of the Fireman in emergency and be directly accessible to every dwelling / lettable floor space on each floor.
- b) The lift shall have loading capacity of not less than 545 kgs (8 persons lift). The lift shall have a floor area of not less than 1.4 sq.mt.
- c) The electric supply shall be on a separate service from electric supply mains in a building and the cables run in a route safe from fire, that is, within the lift shafts. In case of failure of normal electric supply, it shall be capable of changing over to alternate supply manually through a change over switch.
- d) The operation of a fire lift is by simple toggle or two button switch situated in a glass fronted box adjacent to the lift at the entrance level. When the switch is on, landing call points will control only. When the switch is off, the lift will return to normal working. This lift can be used by the occupants in normal times.
- e) The words "FIRE LIFT" shall be conspicuously displayed in fluorescent paint on the lift landing doors at each floor level.
- f) For buildings above 24 M in height, collapsible gates shall not be permitted for lifts and shall be solid doors with fire resistance of one hour.
- g) Lifts shall not be provided in the staircase well.
- h) The speed of the fire lift shall be such that it can reach the top floor from ground level within one minute or 91.5 meters per minute whichever is less.

8.2 For residential buildings the above provisions may not be applicable except the provision at 8.1 (d) and 8.1 (g).

9. BASEMENTS

9.1 Each basement shall be separately ventilated. Vents with cross sectional area (aggregate) not less than 2.5% of the floor area spread evenly round the perimeter of the basement shall be provided in the form of grills or breakable stallboards lights or pavement lights or by way of shafts. Alternatively, a system of air inlets shall be provided at basement floor level and smoke outlets at basements ceiling levels. Inlets and extracts may be terminated at ground level with stallboards

or pavement lights as before but ducts to convey fresh air to the basement floor level have to be laid. Stallboards and pavement lights should be in positions easily accessible to the Fire Bridge and clearly marked 'SMOKE OUTLETS' or 'AIR INLET" with an indication of area served at or near the opening.

- 9.2 The staircase of basement shall be of enclosed type having fire resistance of not less than two hours and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such positions that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storeys of the building and shall communicate with basement through a lobby provided with fire resisting self closing doors of one hour fire resistance. If the travel distance exceeds 18.50 m additional staircases at proper places shall be provided.
- 9.3 In multi - storey basements, intake ducts may serve all basement levels but each basement and basement compartment shall have separate smoke outlet duct or ducts.
- 9.4 Mechanical extractors for smoke venting system from lower basements levels shall also be provided. The system shall be of such design as to operate on actuation of heat sensitive detectors or sprinklers if installed and shall have a considerably higher performance than the standard units. It should also have an arrangement to start it manually and shall be designed to function at a temperature not less than 550 degree C.
- 9.5 Kitchens working on gas fuel, departmental stores and shops shall not be permitted in basement / sub-basement.

10. SERVICE DUCTS

- 10.1 Service ducts for electrical conduits, cables etc. shall be enclosed by walls having a fire resistance of not less than two hours. Doors for inspection or access shall also have fire resistance of not less than two hours.
- 10.2 If the cross sectional area exceeds 1 sq.m. it shall be sealed where it passes a floor by carrying the duct through the floor. The floor within the duct shall be pierced for any service pipe or ventilation trunk and shall fit as closely as possible around any such pipe or trunk.
- 10.3 A permanent vent shall be provided at the top of the service shaft of cross sectional area not less than 460 sq.cm. or 6.25 sq.m. for each 900 sq.cm. of the area of the shaft whichever is more.

11. REFUSE CHUTES AND REFUSE CHAMBERS :

- 11.1 Hoppers to refuse chutes shall be situated in well ventilated positions and the chutes shall be continued upwards with an outlet above roof level and with an enclosure wall of non-combustible material with fire resistance not less than two hours. The hoppers shall not be located within the staircase enclosure.
- 11.2 Inspection panel and hopper (charging station) opening shall be fitted with tight fitting metal doors, covers having a fire resistance of not less than one hour.
- 11.3 Refuse chutes shall not be provided in staircase walls, air-conditioning shafts etc.

11.4 Refuse-chambers shall have walls and floors or roofs constructed of non-combustible and impervious material and shall have a fire resistance of not less than two hours. They shall be located at a safe distance from exit routes.

12. BUILDING SERVICES :

12.1 Electrical Services :

- a) The electric distribution cables / wiring shall be laid in separate duct. The duct shall be sealed at every alternative floor with non-combustible materials having the same fire resistance as that of the duct.
- b) Water mains, telephone lines, intercom lines, gas pipes or any other service line shall not be laid in the duct for electric cables.
- c) Separate circuits for water pumps, lifts, staircases and corridor lighting shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes so that fire in one circuit will not affect the others.
- d) The inspection panel doors and any other opening in the shaft shall be provided with air tight fire doors having the fire resistance of not less than two hours.
- e) Medium and Low-Voltage wiring running in shafts and within false ceiling shall run in metal conduit.
- f) An independent and well ventilated service room shall be provided on the ground floor with direct access from outside or from the corridor for the purpose of termination of electric supply cable. The doors provided for the service room shall have fire resistance of not less than two hours.
- g) If the licensees agree to provide meters on upper floors, the licensees cables shall be segregated from consumers cable by providing a partition in the duct.
- h) PVC cables should have an additional sheathing or protection provided by compounds sprayed on after installation because of the notorious secondary damage in case of fire.

12.2 Town Gas / L P Gas supply pipes:

Where gas pipes are run in the building, the same shall be run in separate shafts exclusively for this purpose and these shall be on external walls, away from the staircases. There shall be no inter connection of this shaft with the rest of floors.

12.3 Staircase and Corridor lighting :

- (a) The staircase and corridor lighting shall be on separate service and shall be independently connected so as it could be operated by one switch installation on the ground floor easily accessible to fire fighting staff at any time irrespective of the position of the individual control of the light points, if any.
- (b) The staircase and corridor lighting shall also be connected to alternate supply as defined in Byelaw No. 12.4 for building exceeding 24 m in height. For assembly, institutional buildings

of height less than 24 m. the alternate source of supply may be provided by battery continuously trickle charged from the electric mains.

- (c) Suitable arrangements shall be made by installation double throw switches to ensure that the lighting installed in the staircase and the corridor do not get connected to two sources of supply simultaneously. Double throw switch shall be installed in the service room for terminating the stand-by supply.
- (d) Emergency lights shall be provided in the staircases / corridor for assembly and institutional buildings above 16 m in height.

- 12.4 (1) Alternate source of Electric Supply:** A stand-by electric generator shall be installed to supply power to staircase and corridor lighting circuits, fire lifts, the stand-by fire pump, smoke extraction and damper systems in case of failure of normal electric supply. The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously. If the stand-by pump is driven by diesel engine, the generator supply need not be connected to the stand-by pump.

Where parallel HV/LV supply from a separate sub-station is provided with appropriate transformer for emergency, the provision of generator may be waived in consultation with competent fire authority as approved by the Fire Adviser to the Govt. of Maharashtra.

- (2) The provision of generator set as above shall not be applicable to residential buildings.

12.5 Transformers :

- a) If transformers are housed in the building between the ground level it shall be necessarily in the first basement in separate fire resisting room of 4 hours rating. The room shall necessarily be at the periphery of the basement. The entrance to the room shall be provided with a steel door of 2 hours fire rating. A curb (sill) of a suitable height shall be provided at the entrance in order to prevent the flow of oil from ruptured transformer into other part of the basement. The direct access to the transformer room shall be provided preferably from outside. The switch gears shall be housed in a separate room separated from the transformer bays by a fire resisting wall with fire resistance not less than four hours.
- b) The transformer if housed in basement shall be protected by an automatic high pressure water spray system. (Mulsifyre System).
- c) In case the transformers housed in the basements totally segregated from other areas of the basements by 4 hours fire resisting wall / walls with an access directly from outside it may be protected by carbondioxide or B.C.F. fixed installation system
- d) When housed at ground floor level it / they shall be cut off from the other portion of premises by fire resisting walls of 4 hours fire resistance.
- e) They shall not be housed on upper floors.
- f) A tank of RCC construction of capacity capable of accommodating entire oil of the transformers shall be provided at lower level, to collect the oil from the catch-pit in case of emergency. The pipe connecting the catch-pit to the tank shall be of non-combustible construction and shall be provided with a flame arrester.

12.6 Air Conditioning :

- a) Escape routes like staircases, common corridors, lift lobbies etc. shall not be used as return air passage.
- b) The ducting shall be constructed of substantial gauge metal in accordance with IS 655 - 1963 (Revised) and any revision thereof.
- c) Wherever the ducts pass through firewalls or floors the opening around the ducts shall be sealed with fire resisting materials such as asbestos rope, vermiculite concrete, glasswool etc.
- d) As far as possible, metallic ducts shall be used even for the return air instead of space above the false ceiling.
- e) The materials used for insulating the duct system (inside or outside) shall be of noncombustible material such as glasswool etc.
- f) Area more than 750 sq.m. on individual floor shall be segregated by a fire wall and automatic Fire Dampers for isolation shall be provided where the ducts pass through fire walls. The fire dampers shall be capable of operating manually
- g) Air ducts serving main floor areas, corridors etc. shall not pass through the stair wall.
- h) The air handling units shall as far as possible be separate for each floor and air ducts for every floor shall be separate and in no way inter-connected with the ducting of any other floor.
- i) If the air handling unit serves more than one floor, the recommendations given above shall be complied with in addition to the conditions given from J to O.
- j) Proper arrangements by way of automatic fire dampers working on smoke detectors for isolating all ducting at every floor from the main riser shall be made.
- k) When the automatic fire alarm operates the respective air handling units of the air conditioning system shall automatically be switched off.
- l) Automatic fire dampers shall be provided at the inlet of the fresh air duct and the return air duct of each compartment / shop on every floor.
- m) Automatic fire dampers shall be so arranged so as to close by gravity in the direction of the air movement and to remain tightly closed upon operating of a smoke detectors.
- n) The air filters of the air-handling units shall be of non-combustible materials.
- o) The air handling unit room shall not be used for storage of any combustible materials.

13. BOILER ROOM :

13.1 Provisions of Boiler and Boiler Rooms shall conform to Indian Boiler Act. Further, the following additional aspects may be taken into account in the location of Boiler / Boiler Room.

- a) The boilers shall not be allowed in sub-basement but may be allowed in the basements away from the escape routes.

- b) The boilers shall be installed in a fire resisting room of 4 hours fire resistance rating and this room shall be situated on the periphery of the basement. Catch-pits shall be provided at the low level.
- c) Entry to this room shall be provided with a composite door of 2 hours fire resistance.
- d) The boiler room shall be provided with fresh air inlets and smoke exhausts directly to the atmosphere.
- e) The furnace oil tank for the Boiler if located in the adjoining room shall be separated by fire resisting wall of 4 hours rating. The entrance to this room shall be provided with double composite doors. A curb of suitable height shall be provided at the entrance in order to prevent the flow of oil into the Boiler room in case of tank rupture.
- f) Foam inlets shall be provided on the external walls of the building near the ground level to enable the fire service to use foam in case of fire.

14. HAZARDOUS OR INFLAMMABLE MATERIALS :

- 14.1 No hazardous materials shall be allowed to be stored or kept in any part of high rise building either as storage or for handling, processing or manufacturing etc.
- 14.2 Use of inflammable solvents for cleaning carpets etc. shall not be allowed inside the building.
- 14.3 No refuse dumps or storage places shall be permitted in the staircase walls.
- 14.4 Liquefied petroleum gas shall not be stored or used in basement.
- 14.5 Auto repairs and spray painting shall not be allowed in basement.
- 14.6 Where gas pipes are run in the building, the same shall be run in separate shafts exclusively for this purpose and these shall be on external walls, away from the staircase. There shall be no interconnection of this shaft with the rest of the floors.
- 14.7 Wooden or any other combustible materials shall not be used in staircases, lift lobby and such other places, which connect one floor to other.

15. PROVISION OF FIRST AIR FIRE FIGHTING APPLIANCES :

- 15.1 The first air fire fighting equipments shall be provided on all floors including basements, occupied terraces, lift rooms in accordance with IS 2217 - 1963 or revision thereof. Recommendations for providing First-aid-Fire Fighting Arrangements in Public Buildings in consultation with the Competent fire authority as designated or authorised by the Corporation.
- 15.2 The fire fighting appliances shall be distributed over the building in accordance with prevailing IS: Code of practice for selection, installation and maintenance of portable first-aid fire appliances.

16. FIXED FIRE FIGHTING INSTALLATIONS:

- 16.1 Building above 16 m in height depending upon the occupancy use shall be protected by wet riser cum down comer automatic sprinkler installation, high pressure water spray or foam generating system etc. as per the details given 16.2 to 16.7

16.2 Fire Fighting Installations / Requirements:

Sr. No.	Type of the bldg/occupancy	Type of installations	Water Supply Underground/ Terrace Static Tank		Pump Capacity Near the underground at terrace level Static tank	
			4	5	6	7
1.	Residential building upto 16 M in height	Nil	Nil	Nil	Nil	Nil
2.	Residential buildings a) above 16 M but not exceeding	Wet-riser cum-down comer with provision of fire service inlet only near ground level.	Nil	10000 ltrs	Nil	100 Litres per minutes giving a pressure not less than 1.5 kg/cm ² at the top most hydrant
	b) (I) exceeding 24M but not exceeding 25.5m.	Wet riser-cum-down cornner	15,000 ltrs.	20,000 ltr.	Nil	450 ltr.Per minutes giving a pressure not less than 2.15kg/cm ² at the top most hydrant.
	ii) exceeding 25.5M but not Exceeding 35m	-do-	35,000 ltr	20,000 ltr	Nil	-
	iii) exceeding 35M but not exceeding 45M	-do-	50,000	20,000	Nil	-
	c) above 24M & nor exceeding 35m with shopping area upto 250 sq.m. and restricting the shopping areas to the ground floor only	-do-	-do-	-do-	1400 ltrs/ minutes giving a pressure not less than 3.2 kg/cm ² at the top most hydrant	900 ltrs/minute minutes giving a Pressure not less than 2. 1kg/cm ² at the top most hydrant
	d) above 24m & not exceeding 35m with shopping area exceeding 250 sq.m.	-do-	100,000 ltrs	-do-	2400 ltrs per minutes giving a pressure not less than 3.2 kg/cm ² at the topmost hydrant.	-do-

Sr. No.	Type of the bldg/occupancy	Type of installations	Water Supply Underground/ Terrace Static Tank		Pump Capacity Near the underground at terrace level Static tank	
			4	5	6	7
1.	e) above 45m & not exceeding 60m	-do-	75,000 ltrs.	-do-	-do-	-do-
2.	f) above 60m in height but not exceeding 92m. (Residential bldg. above 92 m should not be permitted)	-do-	100,000 ltrs.	-do-	-do-	-do-
3.	Non-Residential Buildings: a) above 16M in height but not exceeding 24M excepting educational buildings	Wet riser- cum-down commer	50,000 ltrs.	10,000 ltrs.	1350 Ltrs/ minutes giving a pressure not less than 3.2 kg/cm ² at the the top most hydrant except for institutional, business & educational bldg.	450 ltrs. Per minutes giving a pressure not less than 2.1 kg/cm ² at the top most hydrant.
	b) educational building above 16 M but not exceeding 24M in height	-do-	Nil	-do-	Nil	Nil
	c) above 24M but not exceeding	-do-	75,000 ltrs	20,000 ltrs	2400 ltrs per minutes giving a 450 ltrs. Per minute giving a pressure 35M pressure not less than 3.2 kg/cm ² . The pump provided will be of multistage type with suction and delivery size	450 ltrs. per minute giving a pressure not less than 2.1 kg/cm ² at the top most hydrant

Sr. No.	Type of the bldg/occupancy	Type of installations	Water Supply Underground/ Terrace Static Tank		Pump Capacity Near the underground at terrace level Static tank	
			4	5	6	7
1	2	3	4	5	6	7
					not less than 6" dia with low level riser upto 10 storeys and high level riser delivery for upper floors	
	d) above 35M but not exceeding 60 M	Wet riser (fully charged with adequate pressure at all times and automatic in operation)	100,000	Nil	-do-	Nil
	e) above 60M but not exceeding 92M	-do-	150, 000 ltrs	Nil	i) 2400 ltrs per minute giving a pressure not less than 3.2 kg/cm ² . The pump provided will be of multistage type with suction and delivery sizes not less than 6" dia with low level riser up to 16 storeys and high level riser delivery for upper floors. ii) A stand by pump of equal capacity shall be provided on alternate source of supply	Nil
	f) above 92M	-do-	200,000 ltrs	Nil	-do-	Nil

Note 1: Any of the above categories may incorporate an automatic sprinkle / drencher system. If the risk is such that requires installation of such protective methods.

- Note 2:** Minimum of two hydrants shall be provided within the courtyard, the location of which shall be decided in consultation with the competent fire authority as approved by the Fire Adviser to the Govt. of Maharashtra.
- Note 3:** Wet riser cum down comer is an arrangement for fire fighting within the building by means of vertical pipes not less than 10.00 cm dia with hydrant outlets on each floor / landing connected to an overhead water storage tank for fire fighting purpose through a booster pump, gate and non-return valves over the underground static tank. A fire service inlet at ground level fitted with a non-return valve, shall also be provided to the rising main for charging it through fire service pumps in case of failure of static fire pump over the underground station tank.
- Note 4:** The pump specified above shall not exceed 2000 R M P.
- Note 5:** In case of group housing of apartment building 16 M and above in height but below 24 M a centrally located tank having a capacity of 200000 liters shall be provided.
- Note 6:** The above quantities of water shall be exclusively for fire fighting and shall not be utilized for domestic or other use.

Sizes of the riser shall be as under (internal diameter):

- a) Residential buildings :
 - i. upto 45 m - 10 cm with single hydrant outlet and hose reel on each floor.
 - ii. above 45m - 15 cm with twin hydrant outlets and hose reel on each floor.
- b) Non-Residential buildings.
 - i. upto 24 m - 10 cm with single hydrant outlet and hose reel on each floor.
 - ii. Above 24m - 15 cm with twin hydrant outlets and hose reel on each floor.

- 16.3 The Wet Riser installations shall conform to IS 3844-1966 Code of Practice for installation of internal fire hydrants in multistoreyed buildings.

In addition, Wet Riser shall be designed for zonal distribution ensuring that unduly high pressure are not developed in risers and hose pipes. In addition to Wet Risers / Wet Riser cum Down corner, first aid hose reels shall be installed on all the floors of the buildings above 24 m and shall conform to IS 884 - 1969. Specification for first aid hose reel for fire fighting (fixed installation). The first aid hose reel shall be connected to one of the female couplings of twin couplings of landing valves of the Wet Riser installations by means of adopter.

- 16.3 (1) Static Water Storage Tank : A satisfactory supply of water for the purpose of fire fighting shall always be available in the form of underground static storages tank with capacity specific for each building with arrangements of replenishment by main or alternative source of supply @ 1000 litres per minute. The static storage water supply required for the above mentioned purpose should entirely be accessible to the fire engines of the local Fire Services. Provision of suitable number of manholes shall be made available for inspection, repairs and inspection of suction holes etc. The covering slab shall be able to withstand the vehicular load of 18 tons.

The domestic suction tank connected to the static water storage tank shall have an overflow capable for discharging 2250 litres per minute to a visible drain point from which by a separate conduits, the overflow shall be conveyed to a storm water drain.

- 16.3 (2) To prevent stagnation of water in the static water storage tank, the suction tank of the domestic water supply shall be fed only through an overflow arrangement to maintain the level therein at the minimum specified capacity.
- 16.3 (3) The static water storage tank shall be provided with a fire brigade collecting breaching with 4 nos. 63 mm dia (2 nos. 63mm dia for pump with capacity 1400 litres / minute) instantaneous male inlets arranged in a valve box at a suitable point at street level and connected to the static tank by a suitable fixed pipe not less than 15 cm dia to discharge water into the tank when required at a rate of 2250 litres per minute.
- 16.4 Automatic Sprinklers : Auto - sprinklers shall be installed :
- In basement used as car parks, if the area exceeds 500 sq.m.
 - In multi-storied basements used as car parks and for housing essential services ancillary to a particular occupancy.
 - Any room or other compartment of a building exceeding 500 sq.m.
 - Departmental stores or shops that totally exceeds 750 sq.m.
 - All non-domestic floors of mixed occupancy considered to constitute a hazard and not provided with staircases independent of the remainder of a building.
 - Godown and warehouses as considered necessary.
 - On all floors of the buildings other than residential buildings, if the height of the building exceed 60m.
 - Dressing rooms, scenery docks, stages and stage basements of theatres.
- 16.5 Automatic high pressure water spray (mulsifyre) system.
- This system shall be provided for protection of indoor transformers of a substation in a basement area.
- 16.6 Foam generation System:
- This system shall be provided for protection of boiler rooms with its ancillary storage of furnace oils in basement.
- 16.7 Carbon-di-Oxide Fire Extinguishing System:
- Fixed CO₂ fire extinguishing installation shall be provided as per IS 6382 - 1971 Code of Practice for design and installation of fixed CO₂ fire extinguishing system on premises where water or foam cannot be used for fire extinguishment because of the special nature of the contents of the buildings areas to be protected. Where possible BDF (Bromochlorodifluoremethane) installation may be provided instead of CO₂ installation.

17. FIRE ALARM SYSTEM :

- 17.1 All buildings with heights mentioned against each shall be equipped with fire alarm system as given in Byelaws No. 17.11 to 17.13.
- 17.1 (1) Residential Building (Dwelling Houses and Hostels) above 35 m and Educational Buildings, Institutional buildings above 24 m in height.

- a) Such buildings shall be equipped with manually operated electrical alarm system with one or more call boxes located at each floor. The location of the call boxes shall be decided after taking into consideration the floor plan with a view to ensure that one or the other call box shall be readily accessible to all occupants of the floor without having to travel more than 22.5 m.
- b) The call boxes shall be of the 'break-glass' type without any moving parts, where the call is transmitted automatically to the control room without any other action on the part of the person operating the call box.
- c) All call boxes shall be wired in a closed circuit to a control panel in the control room, located as per Bylaw No. 17.0 so that the floor number where the call box is actuated is clearly indicated on the control panel. The circuit shall also include one or more batteries with a capacity of 48 hours normal working at full load. The battery shall be arranged to be continuously trickle - charged from the electric mains. The circuit may be connected to alternate source of electric supply as defined in By-law No. 12.4.
- d) The call boxes shall be arranged to sound one or more sounders so as to ensure that all the occupants of the building shall be warned whenever any call box is actuated.
- e) The call boxes shall be so installed that they do not obstruct the exit-ways and yet their location can easily be noticed from either direction. The base of the call box shall be at a height of 1 m from the floor level.

17.1 (2) Business and Industrial Building above 24 m but not exceeding 30 m.

- a) Such buildings shall be equipped with manually operated electrical fire alarm system with one or more call boxes located at each floor. The location of the call boxes shall be decided after taking into consideration the floor plan with a view to ensure that one or the other call box shall be readily accessible to all occupants of the floor without having to travel more than 22.5m.
- b) The call boxes shall be of the 'break-glass' type without any moving parts, where the call is transmitted automatically to the control room without any other action on the part of the person operating the call box.
- c) All call boxes shall be wired in a close circuit to a control panel in the control room located as per By-law No. 17.0 so that the floor number from where the call box is actuated is clearly indicated on the control panel. The circuit shall also include one or more batteries with a capacity of 48 hours normal working at full load. The battery shall be arranged to be continuously trickle charged from the electric mains. The circuit may be connected to alternate source of electric supply as defined in By-law No. 12.4.
- d) The call boxes shall be arranged to sound one or more sounders so as to ensure that all occupants of the building shall be warned whenever any call box is actuated.
- e) The call boxes shall be so installed that they do not obstruct the exit ways and yet their location can easily be noticed from either direction. The base of the call box shall be at a height of 1 m from the floor level.

- 17.1 (3) All other buildings exceeding 24 m height excluding those mentioned in By-law No. 17.1 and 17.1.2.

The building shall, in addition to the manually operated electrical fire alarm system, be equipped with an automatic fire alarm system. The later shall be in addition to the alarm which may be sounded by the actuation of any automatic fire extinguishing system which may be installed in any particular occupancy in accordance with these bylaws. The detectors for the automatic fire alarm shall conform to relevant IS specification Head / Smoke sensitive type Fire Detector and the system shall be installed in accordance with IS 2139 - 1976 Code of practice of Automatic Fire Alarm System or any other relevant Indian Standard prescribed from time to time.

Note-1: Several types of fire detectors are available in the market but the application of each type is limited and has to be carefully considered in relation to the type of risk and the structural feature of the building where they are to be installed.

Note-2: No automatic detectors shall be required in any room or portion of building which is equipped with an approved installation of automatic sprinklers.

18 LIGHTNING PROTECTION OF BUILDINGS :

- 18.1 The lightning protection for buildings shall be provided based on the provisions of Part-III of the National Building Code of India 1970.

19. CONTROL ROOM :

- 19.1 For all buildings mentioned in Byelaws No. 17.1.1, 17.1.2 and 17.1.3 except residential buildings not exceeding 60 m there shall be a control room on the entrance floor of the building with communication system (suitable public address system) to all floors and facilities for receiving the message from different floors. Details of all floor plans along with the details of the fire fighting equipment and installations shall be maintained in the Control Room. The Control Room shall also have facilities to detect the fire on any floor through Indicator Boards connecting fire detecting and alarm system on all floors. The staff in charge of control room shall be responsible for the maintenance of the various services and fire fighting equipment and installations.

20. CARETAKER FOR RESIDENTIAL, HOTELS, BUSINESS, MERCANTILE, INDUSTRIAL, STORAGE AND HAZARDOUS BUILDINGS WITH HEIGHT MORE THAN 45 M.

- 20.1 A qualified Fire Officer with experience of not less than 3 years shall be appointed as a care taker who will be available on the premises at all time.

20.2 The Fire Officer shall -

- i) Maintain the fire fighting equipment in good working condition at all times.
- ii) Layout fire orders and fire operational plan.
- iii) Impart training to the occupants of the buildings in the use of fire fighting equipments provided on the premises and keep them informed about the fire emergency evacuation plan.
- iv) Keep proper liaison with City Fire Brigade.

21. HOUSE KEEPING :

21.1 To eliminate fire hazards a good house keeping inside the building and outside the buildings shall be strictly maintained by the occupants and / or the owner of the building.

22. FIRE DRILLS AND FIRE ORDERS :

22.1 Fire notices / orders shall be prepared to fulfill the requirements of the fire fighting and evacuation from the buildings in the event of fire and other emergency. The occupants shall be made thoroughly conversant with their action in the event of the emergency, by displaying fire notices at vantage points. Such as notices should be displayed prominently in bold lettering.

23. SECURITY DEPOSITS :

For buildings which are more than 24 M in height the applicant / owner shall deposit and keep deposited an amount of Rs 20,000/- as security deposit, at the time of application to the Fire Officer of CIDCO for approval under these regulations, for the due performance of the requirements of these regulations. The security deposit shall be refunded without interest, after the grant of Occupancy Certificate.

APPENDIX-IV

CITY AND INDUSTRIAL DEVELOPMENT CORPORATION OF MAHARASHTRA LIMITED

"NIRMAL", Nariman Point, Bombay - 400 021.

No. In exercise of the powers conferred by paragraph (l) of Section 159 of the Maharashtra Regional and Town Planning Act, 1966 (Mah. XXXVII of 1966), the City & Industrial Development Corporation of Maharashtra Limited, Bombay, being the New Town Development Authority for the area comprised in the site of New Bombay under sub-section 3(A) of Section 113 of the said Act, hereby makes the following building regulations with the previous approval of the State Government for controlling the development of land in village gaothans in New Bombay, namely:

1. Short Title and Extent:
 - (a) These regulations may be called the New Bombay Building Control Regulations 1973 (village gaothans) for the control of the development in village gaothans in New Bombay.
 - (b) They shall come into force immediately on the publication in the Maharashtra Govt. Gazette.
 - (c) Subject to the provisions of the Maharashtra Regional & Town Planning Act, 1966, the following Regulations shall apply to the village gaothans in New Bombay.
2. Permission may be granted for the construction of buildings for the following purpose only.
 - (a) Residential houses
 - (b) Dispensaries, medical or allied clinics
 - (c) Shops selling provisions of day-to-day requirements like vegetables, toilet areas etc., and not more than 15 Sq.m. in area.
 - (d) Small Scale Service Industries, which do not create nuisance on account of smoke, smell, dust, noise, glare or any other factor and having power, floor area and employment requirement of not more than 5 HP., 25 Sq.m. and 5 persons respectively, may be permitted in gaothan, subject to a No Objection Certificate from concerned village Panchayat in the form of Resolution. †
 In particular, any industry mentioned in Schedule-II (Appendix-IV), may be permitted.
3. The built-up area shall not exceed 50% of the plot area.
4. The number of storeys shall not exceed two (including ground floor) .
5. The total floor area of both of floors shall not be more than 3/4 of the plot area (FSI 0.75).
6. The minimum dimension of the leaving room shall be 2.75 mtrs.
7. The minimum carpet area of a dwelling unit shall be 11 Sq.m.. Nahani may be permitted within the allowable carpet area of 11 Sq.mtrs. provided the remaining is at least 9.5 Sq.m.. This was added in December '78.
8. Open space around building :
 - (i) A marginal open space of 1.5 m. shall be left permanently open on all sides of the building.

- (ii) The plots with less than 9 mtr. width or depth the marginal open space may be allowed to be reduced to 1m. but in such plots only ground floor structure shall be permitted.
 - (iii) For two storeyed structures a marginal open space of 2.25 m. shall be left permanently open on all sides of the building.
9. In preparing building plans care shall be taken to provide the following.
- (a) Windows space for light and ventilation equal to at least 1/8th of the floor area of the room.
 - (b) Soak pits for drainage, water where there are no.....
 - (c) Soak pits and privies shall be at least 7.5 mtrs. away from private wells and 15 mtrs. area from the public wells.
10. No plot shall be sub-divided without the permission of the Planning Authority.
11. The Vice Chairman & Managing Director, CIDCO may relax the any of these regulations in deserving cases.

APPENDIX-V ¹

Commercial use of lands in the possession of the Maharashtra State Road Transport Corporation

Notwithstanding anything to the contrary contained in these Regulations or the Development Plan / Planning proposals, land in the possession of the Maharashtra State Road Transport Corporation shall be allowed to be developed for commercial use to the extent of 50% of the admissible floor space index, subject, however, to the general restrictions otherwise applicable to such development and also in accordance with the Government of Maharashtra, Home department, Resolution No. STC 3400/CR-148/TRA-1 dated 1st February 2001 as may be modified from time to time.

APPENDIX-VI *

2.5 FSI for EWS, LIG, MIG

APPENDIX - VII ²

[Regulation No. 34]

Regulations for Reconstruction/Redevelopment:

- For redevelopment of building or buildings in the housing schemes of CIDCO, containing houses or tenements for (i) EWS/LIG and/or (ii) MIG and/or (iii) HIG, the total permissible FSI shall be permissible in accordance with the provisions contained in Appendix VII of this Regulation as specified in Table-A below and shall be based on gross plot area:

Table A

Sr. No.	Category	Permissible FSI
i.	Plot area of 1000 sq. m. or more and having access road of minimum 15m width	2.50
ii.	Plot area of 1000 sq.m. or more and having access road of minimum 9 m width.	2.00
iii.	All other plots having access road below 9m width	1.80 or Authorisedly consumed FSI + 50% Incentive whichever is less

Identification of dangerous / dilapidated buildings shall be done by a Committee Under the Chairmanship of the Joint Managing Director, CIDCO, comprising Superintendent Engineer, Public Works Department, Thane, Joint Director, Town Planning, Konkan Division; City Engineer, NMMC; Chief Engineer, CIDCO, Chief Planner, CIDCO and such other members as may be appointed by the Joint Managing Director, CIDCO having regard to their academic qualifications, technical competence and previous experience in the field of Structural Engineering.

- Where redevelopment of any dangerous/dilapidated building(s) in a Housing Scheme of CIDCO constructed buildings is undertaken by the Co-op Housing Society or the occupiers of such building(s) or by the lessees of CIDCO, the Rehabilitation area Entitlement, Incentive FSI and sharing of balance FSI shall be as follows:

¹ The Regulations were amended and sanctioned on 27/01/2005.

² The Regulations were amended and sanctioned on 01/10/2016.

* Awaiting Government Sanction.

A) Rehabilitation Area Entitlement:

- i) Under redevelopment of any dangerous/dilapidated building(s) in a Housing Scheme of CIDCO, the entitlement of rehabilitation area for an existing residential tenement shall be equal to sum total of:
- a basic entitlement equivalent to the carpet area of the existing tenements plus 35% thereof, subject to a minimum carpet area of 300 sq.ft. and
 - an additional entitlement, governed by the size of the plot under redevelopment, in accordance with the Table-B below:

Table B

Area of the Plot under Redevelopment	Additional Entitlement (As % of the Carpet Area of the Existing Tenement)
Upto 4000 sq. m.	Nil
Above 4000 sq.m. to 2 hect	10%
Above 2 hect to 5 hect	15%
Above 5 hect to 10 hect	20%

Explanation: The plot under redevelopment, means the total area of the land on which redevelopment of dangerous/dilapidated building(s) is to be undertaken.

Provided that the maximum entitlement of rehabilitation area shall in no case exceed the maximum limit of carpet area prescribed for MIG category by the Govt. as applicable on the date of approval of the redevelopment project.

Provided further that the entitlement of rehabilitation area, as admissible under this regulation, shall be exclusive of the area of balcony.

- ii) Under redevelopment of any dangerous/dilapidated building(s) in a Housing Scheme of CIDCO, the entitlement of rehabilitation area of any existing authorised commercial unit / amenity unit in the Residential Housing Scheme shall be equal to the carpet area of the existing unit plus 20% thereof.

B) Incentive FSI:

Incentive FSI admissible against the FSI required for rehabilitation, as calculated above, shall be based on the ratio (hereinafter referred to as Basic Ratio) of Land Rate (LR) in Rs./Sq.m. of the plot under redevelopment as per the Annual Schedule of Rates (ASR) and Rate of Construction (RC)* in Rs/Sqm applicable to the area as per the ASR and shall be as given in the Table - C below:

Table C

Basic Ratio (LR/RC)	Incentive (As % of Admissible Rehabilitation Area)
Above 3.00	70%
Above 2.00 and upto 3.00	80%
Above 1.00 and upto 2.00	90%
Upto 1.00	100%

Explanation:- * RC is the rate of construction in respect of R.C.C. Construction, as published by the Chief Controlling Revenue Authority & Inspector General of Registration, Maharashtra State in the Annual Schedule of Rates.

Provided that the above incentive will be subject to the availability of the FSI on the Plot under the redevelopment and its distribution by CIDCO.

Provided further that in case there are more than one land rate applicable to different parts of the plot under redevelopment, a weighted average of all the applicable rates shall be taken for calculating the Average Land Rate and the Basic Ratio.

Provided further that the Land Rate (LR) and the Rate of Construction (RC) for calculation of the Basic Ratio shall be taken for the year in which the redevelopment project is approved by the authority.

C) Sharing of the Balance FSI:

The FSI remaining in balance after providing for the rehabilitation and the incentive components, calculated as per (A) and (B) above respectively, shall be shared between the existing or proposed Co-operative Housing Society/ Apartment Ownership Association and CIDCO, in the form of built-up area, as given in Table D below and the share of CIDCO shall be handed over to CIDCO free of cost.

Table D

Basic Ratio (LR/RC)	Sharing of Balance FSI	
	Society / Association Share	CIDCO Share
Above 3.00	50%	50%
Above 2.00 and upto 3.00	60%	40%
Above 1.00 and upto 2.00	70%	30%
Upto 1.00	80%	20%

2.1 Where redevelopment of dangerous/dilapidated building(s) in a Housing Scheme of CIDCO is undertaken by CIDCO directly or jointly by CIDCO along with the Co-operative Housing Society / Association or the occupiers of such building(s) or by the lessees of CIDCO, the Rehabilitation Area Entitlement, incentive FSI and sharing of balance FSI shall be as follows:

A) Rehabilitation Area Entitlement:

The Rehabilitation Area Entitlement shall be increased by 15% of the existing carpet area, over and above the Rehabilitation Area Entitlement calculated in (A) of clause 2 above, subject to the maximum of the size of MIG, prescribed by the Government in the Housing Department.

B) Incentive FSI:

Incentive FSI shall be the same as in (B) of Clause 2.

C) Sharing of the balance FSI:

There shall be so sharing of the balance FSI, which shall be entirely available to CIDCO for implementing Affordable Housing Project.

* Awaiting government sanction

3. Other requirement/Criteria:

- i. For the purpose of calculating the FSI, the entire area of the layout including widening of existing roads and internal roads but excluding the land earmarked for public amenities shall be considered. Sub-division as well as amalgamation of plots shall be permissible. Amalgamation of more than one Apartment Owners' Association / Co. op. Hsg. Society amalgamation, the amalgamated plot should be in the name of the applicant CHS with legal ownership title, without considering the provision made in the Regulation of this DCR. However, consent of at least 70% leaseholders / occupants who intend to amalgamate such condominium shall be necessary.
- ii. In a condominium/plot area, widening of existing roads as per the regular line of street prescribed by CIDCO or widening of road providing vehicular access to the condominium plot to bring it to the minimum right of way as prescribed in Table "A", shall be permissible for reconstruction / redevelopment, after handing over required stretch of land under road to CIDCO, free of cost, duly developed with storm water drains and footpath, if any, to the satisfaction of the Managing Director, CIDCO.
- iii. In case where there are a number of dangerous / dilapidated building on a plot, in such cases, equivalent Land component of such buildings shall be worked out and incentive F.S.I. shall be based on such land component.
- iv. The normal permissible tenement density per net hectare may be allowed to be exceeded in multiple of F.S.I. permissible.
- v. The existing residential premises (other than R+C premises) shall be permitted to be redeveloped for residential user only. No change of Use from Residential to Residential cum Commercial shall be permitted. However, in such premises, if area of such plot is more than 1000 sqm and the same is fronting on a road having width of 20 mtr and above then it shall be permissible to construct convenience shopping to the extent of 5% of the plot area and if the plot area is more than 1000 sq. mtr. and the plot is fronting on a road having width of 30 mtrs and above then this limit for convenience shopping will be upto 10%.
- vi. In a condominium/plot area, it shall be mandatory to keep minimum 10% or 15% as the case may be compulsory recreational open space on ground clearly open to sky over and above podium garden, in the proposed redevelopment project in respect of land area between 2500 sq.mtrs. to 4000 sq.mtrs. or more than 4000 sq.mtrs. respectively.
- vii. 5% of the Plot area under reconstruction/redevelopment project shall be surrendered to the CIDCO, free of cost, towards essential amenity area, in case the plot area is more than 2500 sq.mt. The FSI of such amenity area shall be permissible on the balance plot area and the entire area of such amenity space will be considered for computation of FSI, without deducting this area from the gross plot area. However, 1.0 FSI out of amenity space FSI will be deducted from the total permissible FSI. Alternatively carpet area equivalent to 5% of the area of the plot under redevelopment can be constructed within the scheme, providing separate access, and handed over to CIDCO free of cost as Social amenity.
- viii. The Layout of entire condominium / residential / Residential cum commercial premises, duly signed by the Apartment owners' Association/CHS shall be submitted at the time of Commencement Certificate to ascertain the feasibility of the entire condominium for redevelopment, so that in future, proper redevelopment of other buildings in the condominium/residential premises is smoothly feasible. However, such redevelopment can be undertaken in a phased manner in respect of one

or two buildings likewise as per the approved layout of the entire condominium/residential premises. In case of such partial redevelopment, the infrastructure charges shall also be deposited in proportion to the area under such partial redevelopment.

- ix. For the purpose of deciding the authenticity in of the age of the structure, if the approved plans of such existing structure are not available, the Managing Director, CIDCO shall consider other evidence such as Assessment Record or city survey record or sanad.
- x. In any Redevelopment project where the existing or proposed Corporative Housing Society/ Apartment Owners Association/Developer appointed by the concerned Society/Associations has obtained No Objection Certificate from the CIDCO, thereby securing additional balance FSI with the consent of 70% of its members and where such NOC holder has made provision for alterative accommodation in the proposed building (including transit accommodation), then it shall be obligatory for all the occupiers/members to participate in the Redevelopment Scheme and vacate the existing tenements for the purpose of redevelopment. However, in case of Apartment owners associations, the consent as per the concerned Act will be required.
- xi. For redevelopment of any dangerous/dilapidated buildings in any Housing Scheme of CIDCO under clause 2.1 herein above, by CIDCO, the consent of the Corporative Housing Society in the form of a valid Resolution as per the Co-operative Societies Act, 1960 will be sufficient. Similarly, in case of Apartment Owners Association, the consent as per the concerned Act will be required.
- xii. For providing the requisite infrastructure for the increased population, an infrastructure charge at the rate of 10% of the Land Rate as per the ASR of the year of approval of the redevelopment project shall be levied and charged by the CIDCO for the extra FSI granted for the redevelopment project, over and above the Basic Zonal FSI.
- xiii. A corpus fund, as may be decided by the Managing Director, CIDCO shall be created by the Developer which shall remain with the concerned Co-operative Housing Society/Apartment Owner Association for the maintenance of the new buildings under the Rehabilitation Component.
- xiv. For the purpose of this Regulation, the carpet areas of EWS, LIG or MIG tenements shall be determined by the Government in the Housing Department from time to time.
- xv. Any redevelopment proposal where CIDCO has already issued Commencement Certificate (CC) prior to the date of coming into force of this Modification (hereinafter referred to as "the appointed date") and which is valid as on the appointed date, shall be allowed to convert to redevelopment project under this Regulation, provided it satisfies all the requirements specified in this Regulation.

APPENDIX - VIII : DEVELOPMENT AROUND GAOTHAN *

* Awarding Government Sanction

APPENDIX - IX : REGULATION 36 ¹

(A) Regulations for Land Compensation Scheme and Rehabilitation Pocket in Navi Mumbai

1. Land Compensation Scheme and Rehabilitation Pocket:

Land Compensation Scheme means the Scheme devised by City and Industrial Development Corporation of Maharashtra Ltd. (CIDCO) with the approval of State Government vide Government Resolution CID-1812/C.R. 274/UD10, dated 1/3/2014 and as amended from time to time for compensating the land holders whose lands are being acquired on or after 1st March 2014, The Rehabilitation Pocket means the land identified by CIDCO for allotment under land compensation scheme. The compensation under Scheme shall have three components.

- a) **Component - I:** involving allotment of 10% developed land in lieu of monetary compensation after deduction of 30% of the eligible area for the development of infrastructure and amenities. Maximum 15% FSI may be used for commercial use provided that such commercial use shall be permissible as per provisions of General Development Control Regulations.
- b) **Component - II:** involving allotment of 12.5% developed land in lieu of monetary compensation after deduction of 30% of the eligible area for the development of infrastructure and amenities. Maximum 15% FSI may be used for commercial use provided that such commercial use shall be permissible as per provisions of General Development Control Regulations.
- c) **Component - III:** involving allotment of developed plot to the eligible owner of the house whose house and land under house are being acquired and resettled at another location Maximum 15% FSI may be used for commercial use provided that such commercial use shall be permissible as per provisions of General Development Control Regulations.

2. Floor Space Index admissible on lands allotted under the scheme shall be as follows:

- a) **Component - I:** Floor Space Index for the development of lands allotted under Component - I shall be 2.5.
- b) **Component - II:** Floor Space Index for the development of land allotted under Component - II shall be 1.5.
- c) Floor Space Index for the development of total land allotted under Component - I and Component - II that is **22.5%** shall be 2.0.
- d) **Component - III:** Floor Space Index for the development of land allotted under Component - III shall be 1.5.
- e) **Kept in abeyance**
- f) The base FSI of the lands within Pushpak Node as described by CIDCO shall be 2.0 irrespective of the land use and the maximum permissible FSI shall be 2.5. Provided that with the previous approval of VC & MD, CIDCO, this additional 0.5 FSI may be granted for utilization on these plots subject to payment of additional premium as may be decided by the Corporation.

Alternatively, with the previous approval of VC & MD, CIDCO, additional FSI 0.5 in the form of DRC shall be allowed on lands within the Pushpak Node only over and above the base FSI of 2.0.

However, while granting such additional 0.5 FSI VC & MDm CIDCO shall give priority to grant of such additional FSI in the form of DRC.

¹ The Regulations were amended and sanctioned on 13/08/2015

Provided that

- i) A maximum FSI 2.0 shall be admissible for plots having an area equal to or in excess of 1000 sq. mtr., however in case, the available FSI can not be used at site due to hardship of height restriction and for any other reasons recorded in writing in Pushpak Node, floating of TDR shall be allowed and such TDR shall be used within Pushpak Node only with the approval of VC&MD.
- ii) FSI 1.5 shall be admissible for plot having area less than 1000 sq. mtr. And the balance 0.5 or 1.0 FSI, as may be applicable, shall be admissible for utilization in the form of Development Right Certificate (DRC) as a Transferable Development Right (TDR), the utilization of which shall be within Pushpak Node only as per regulation 37.

3. Locations for utilization of DRC -

DRC in the form of TDR shall be eligible for utilization in the following locations.

- a) Pushpak Node as shown on the plan.
- b) Kept in abeyance
- c) The proposed provision is refused to accord sanction.

4. Extent of Utilization of DRC :

The utilization of DRC within Pushpak node only shall be permitted is as follows:

Road width	Maximum Permissible Utilization of TDR in addition to the base FSI under GDCR and under this regulations.
Equal to or above 20.0 mtr and along the service road in Pushpak node	Upto 0.5 FSI on receiving plot.

5. Marginal Open Space:

The minimum marginal open spaces for any individual building in the are designate for the allotment of land under the Land Compensation Scheme shall be

- a) As per table no. 17.6 of General Development Control Regulations in respect of plots of size less than 1000 sq.m. Further semidetached building shall be permitted on the plots of size less than 1000 sq. mtr.
- b) The minimum marginal open space on all sides of the building on a plot of 1000 sq. m. or more shall be 6.0 m. without any projections, except required for fire fighting and as permitted by the Fire Officer CIDCO and irrespective of whether the face of the building derives light and ventilation or not.
- c) If any interior or exterior open space is intended to be used for the purpose of light & ventilation by more than one building belonging to the same owner, then the width of such open spaces shall be minimum 9.0 mtr.

6. Applicability of the other Provisions of DCR

All the aspects of development not covered under this regulation shall be governed by the relevant provisions of the sanctioned GDCR.

7. Powers of Interpretation :

If any dispute regarding the interpretation of these Regulations arises, the decision made by the State Government shall be final.

Appendix - X : Regulation 37 ¹

(B) Regulation for Utilization of Transferable Development Right in Navi Mumbai (TDR is as specified in the Appendix – X)

1. Transferable Development Right means the unused potential of the plot allotted under the Land Compensation Scheme which in FSI terms is equivalent to the balance eligible area of development of such allotted plot, and which is made available to the allottee in the form of Development Right Certificate, which allottee may utilize himself or transfer to any other person.
2. Allottee under the Land Compensation Scheme who is entitled to receive developed lands under Component - I and Component - II and is unable to utilize the full potential of development of such land in situ as per the provisions of Regulation 36, shall be eligible for the grant of Development Right Certificate.
3. The Development Right Certificate (DRC) shall be issued by the Managing Director/Jt. Managing Director CIDCO.
4. If the holder of the DRC intends to transfer it to any other person, he shall submit the DRC to the Managing Director, CIDCO with their appropriate application for endorsement of the new holder's name.
5. A holder of DRC who desires to use the FSI credit on a particular plot land shall attach to his application for development permission, valid DRC to the extent required.
6. The DRC shall be valid for use on receiving plots in area of Pushpak Node described in detail in the schedule, the pockets as may be notified by CIDCO as the Intensive Development Pockets and all the plots of residential, business or mercantile in combination with residential use in all Southern Node (Raigad District) under the jurisdiction of CIDCO having one side or the plot fronting on equal to or above 20.0 mtr. Wide road.
7. The minimum size of the receiving plot on which TDR may be permitted to be utilized shall be 2000 sq. mtr. in the area of Pushpak Node, described in detail in the schedule and development of such plot shall be as per Regulations no. 36.
8. Plots in the range of 1000 m² to 2000 m² shall not be permitted to float TDR unless the full potential of the plot with FSI 2.0 is consumed, however in case of exceptional hardship more specifically due to height restrictions, in Pushpak node, floating of TDR shall be allowed and such TDR shall be used within Pushpak node only with the approval of VC&MD.
9. Except Intensive Development Pockets, in other plots the utilization of TDR shall depend on the size of the plot and its development potential as per GDCR.
10. Amount of TDR shall be equal to the unutilised FSI in sq. mtr. The utilisation of TDR on receiving plot shall be as per formula given below:

¹ The Regulations were amended and sanctioned on 13/08/2015

Formula;

$$A = (R_g/R_r) \times B$$

Where,

A = utilisation of DR in sq. mtr. on receiving plot

R_g = Rate in rupees per sq. mtr. as per ASR* of generating plots in generating year

R_r = Rate in rupees per sq.mtr. as per ASR* of receiving plots in generating year

B = TDR debited from DRC in sq.mtr.

*ASR means Annual Schedule of Rates published by the registration department for each year.

Wherever ASR rate is not available the rates decided by CIDCO shall be applicable for computation.

11. DRC in combination shall be allowed for utilization on receiving plots on exclusive residential use plots and business or mercantile plots use in combination residential use in the designated areas.
12. The DRC may be used in one or more plot of land in multiple of 10 sq. mtr.
13. The principal DRC shall be valid for a period of 5 years from the date of issue, thereafter, it shall have to get revalidated from CIDCO every five year.
14. The transferees DRC shall be valid only for two years or up to the date of principal DRC - whichever is earlier. Thereafter the transferee's DRC shall be got revalidated every two years,
