- e. Area having developmental prohibition or restrictions imposed by any notification issued under the provisions of any Central/State Act (like CRZ regulations, Defence restriction areas, etc.) or under these regulations.

12.2.9. General stipulation:-

- i) Development Rights (DRs) will be granted to an owner or lessee, only for reserved lands which are retainable and not vested or handed over to the Government /Urban Local Bodies and not exempted under section 20 or 21 of the then Urban Land (Ceiling and Regulations) Act, 1976 and undertaking to that effect shall be obtained, before a Development Right is granted. In the case of schemes sanctioned under section 20 or 21 of the said Act, the grant of Development Rights (DRs) shall be to such extent and subject to the conditions mentioned in section-20 scheme and such conditions as the Government may prescribed. In case of non-retainable land, the grant of Development Rights shall be to such extent and subject to such conditions as the Government may specify. The provisions of this Regulation shall be subject to the orders issued by the Government from time to time in this regard.
- ii) Provided that, in case of lands having tenure other than Class-I, like Inam lands, tribal lands etc., N.O.C. from Competent Authority, mentioning i)share of Government and land holder ii)transfer of

22

such land in the name of Planning / Appropriate Authority, shall be produced by the land holder at the time of submission of application for grant of TDR.

- iii) DRC shall be issued by the Municipal Commissioner as a certificate printed on bond paper in an appropriate form prescribed by him. Such a certificate shall be a "transferable and negotiable instrument" after the authentication by the Municipal Commissioner. The Municipal Commissioner shall maintain a register in a form considered appropriate by him of all transactions, etc. relating to grant of, or utilisation of DRC.
- iv) The Commissioner shall issue DRC within 180 days from the date of application or reply from the applicant in respect of any requisition made by him, whichever is later.

12.2.10. Transfer of DRC-

The Commissioner shall allow transfer of DRC in the following manner-

- i) In case of death of holder of DRC, the DRC shall be transferred only on production of the documents as may be prescribed by him from time to time, after due verification and satisfaction regarding title and legal successor.
- ii) If a holder of DRC intends to transfer it to any other person, he shall submit the original DRC to the Commissioner with an application along with relevant documents as may be prescribed by the Commissioner and a registered agreement which is duly signed by Transferor and Transferee, for seeking endorsement of the new holders name, i.e., the transferee, on the said certificate. The transfer shall not be valid without endorsement by the Commissioner and in such circumstances the Certificate shall be available for use only to the holder /transferor.

The utilisation of TDR from certificate under transfer procedure shall not be permissible, during transfer procedure.

The Commissioner may refrain the DRC holder from utilizing the DRC in the following circumstances:-

- i) Under direction from a competent Court.
- ii) Where the Commissioner has reason to believe that the DRC is obtained
 - a) by producing fraudulent documents
 - b) by misrepresentation,
- a. Any DRC may be utilised on one or more plots or lands whether vacant, or already developed fully or partly by erection of additional storey, or in any other manner consistent with the prevailing Development Control Regulations,
- b. DRC may be used on plots/land having Development Plan reservations of buildable nature, whether vacant or already developed for the same purpose, or on the lands under deemed reservations, if any, as per prevailing Regulations.
- c. DRC may be used on plots/land available with the owner after surrendering the required land and construction to the Planning Authority under the provisions of Accommodation Reservation. In such circumstances, for the purpose of deciding *Transferable Development Rights (TDR)* receiving potential, the total area of the reservation before surrender, shall be considered.

12.2.11. Infrastructure Improvement Charges-

The utilizer shall pay to the Planning Authority, an infrastructure improvement charges, for a proposed quantum of TDR to be utilised, at the rate of 5% of construction cost as per the prevailing Annual Statement of Rates.

12.2.12. Vesting of Land:-

The Commissioner, before issuing DRC, shall verify and satisfy himself that the ownership and title of the land proposed for surrender is with the applicant, and get the Record of Right to be corrected in the name of Planning Authority.

In case the Appropriate Authority for reservation is other than Planning Authority, it shall be permissible for the Commissioner on the request of such authority to grant TDR under this regulation and hold such possession as a facilitator. Provided that, the Municipal Commissioner shall handover the possession of such land to concerned Appropriate Authority, after receipt of value of land, from such Appropriate

Authority as per Annual Statement of Rates prevailing at the time of handing over possession of land under reservation.

Provided also that, if such Appropriate Authority is the State Government Department, the Municipal Commissioner shall handover the possession of such land to the concerned Department free of cost.

12.2.13. Effect of this Regulation:-

Provision of Generation of TDR from these regulations shall not be applicable where DRC has been issued prior to date of publication of TDR Regulations under section 37 (1AA) (a) of the MR & TP Act, 1966 i.e. dated 30/04/2015. However DRCs issued under the old Regulations shall be allowed to be utilised as per TDR zones of old Regulations without indexation but subject to all other conditions of these regulations. Such utilisations shall be allowed for one year only from the date 29/01/2016 (i.e. the date of sanctioned of TDR Regulations under section 37 (1AA) (c) of the MR & TP Act, 1966 vide notification dated 29/01/2016).

Provided also that old TDR purchased for utilisation on a specific plot with registered documents of sale and / or specific proposal for utilisation of such TDR pending in the ULBs prior to these regulations shall be allowed completely as per the old regulations.

FORM FOR CONSTRUCTION OF BUILDING OR LAYOUT OF BUILDING / GROUP HOUSING

Application for permission for development under Section 44 / 58 of The Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BPMC Act, 1949.

From _____
(Name of the owner)

To,

The Municipal Commissioner,
Municipal Corporation,

Sir,

I intend to carry out the under mentioned development in the site/plot of land, on Plot No..... Town and Revenue S.No.....City Survey No.....Maujesituated at Road / Street Societyin accordance with Section 44 / 58 of the Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BPMC Act, 1949.

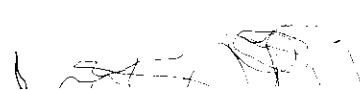

I forward herewith the following plans and statements (Item i to ix) wherever applicable, in quadruplicate, signed by me (Name in block letters)and the Architect / Licensed Engineer / Structural Engineer / Supervisor, (License No.....), who has prepared the plans, designs and a copy of other statements /documents as applicable

- i) Key Plan (Location Plan), (to be shown on first copy of the set of plans)
- ii) Site Plan showing the surrounding land and existing access to the land proposed to be developed; (to be shown on first copy of the set of plans)
- iii) A detailed building plan showing the plan, section and elevations of the proposed development work along with existing structure to be retained/ to be demolished, if any;
- iv) Particulars of development in Form enclosed (to be submitted for development other than individual buildings);
- v) Copy of sanctioned layout plan if any;
- vi) An extract of record of rights, property register card (any other document showing ownership of land to be specified) along with consent of co-owners where third party interest is created;
- vii) Attested copy of receipt of payment of scrutiny fees;
- viii) Latest property tax receipt;
- ix) No Objection Certificate(s), wherever required.

I request that the proposed development/ construction may be approved and permission be accorded to me to execute the work.

FORM GIVING PARTICULARS OF DEVELOPMENT

(Item iv of Appendix A-1)

1.	(a) (i) Full Name of Applicant	
	(ii) Address of applicant	
	(iii) e-mail ID	
	(iv) Contact / Mobile No.	
	(b)(i) Name and address of Architect/ licensed Engineer/ Structural Engineer/ Supervisor employed.	
	(ii) No. and date of issue of License	
2.	(a) Is the plot of, a City Triangulation Survey Number, Revenue Survey Number or Hissa Number of a Survey Number or a Final Plot Number of a Town Planning Scheme or a plot of an approved layout?	
	(b) Please state Sanction Number and Date of Sub- division / Layout	
	(c) Whether the land is situated in Core Area or Outside Core Area?	
3.	(a) What is the total area of the plot according to the ownership document and measurement plan?	
	(b) Does it tally with the Revenue/CTS Record	
	(c) What is the actual area available on site measured by Architect/ licensed Engineer/ Structural Engineer / Supervisor? (The permission shall be based on the area whichever is minimum.)	
	(d) Is there any deduction in the original area of the plot on account of D.P. roads, or reservation(s). If so, are they correctly marked on the site plan? Please state the total area of such deductions?	
	(e) Is there any water stream in the land? State the area of such land.	
	(e) What is the Gross plot area remained for development after above deduction(s)?	
	(f) What is the area proposed for recreational open space? (in case of land having original holding more than 0.4 hector) Please mention the area.	
	(g) Whether amenity space as required under Regulation no.4.5is lcf? Please mention the area.	
4.	Are all plans as required under Regulation no.2.2.3.2enclosed?	
5.	(a) In what zone does the plot fall?	

Jh

	(b) For what purpose the building is proposed? Is it permissible according to the land use classification?	
6.	(a) Is road available as an approach to the land? What is the average existing width of the road? (If the plot abuts on two or more roads, the above information in respect of all roads should be given)	
	(b) Is the land fronting on D.P. road? If so, width of the D.P. road	
	(c) Is the land fronting on National or State highway? If so, is the Building line / control line maintained? Please state the distance.	
	(c) What is the height of the building above the average ground level of the plot?	
	(d) Is it within permissible limit of height specified in Regulation no.5.4i.e. 1.5 times of the road width plus front margin?	
	(e) Does height exceed the limit specified in (d) above? If so, is height approved by Director of Fire Services, M.S.?	
7.	Is the land subject to restrictions of blue / red flood line, airport, railway, electric line, land fill sites, archaeology, etc.? Please state the details along with 'No objection certificate' if any.	
8.	(a) If there are existing structures on the plot	
	(i) Are they correctly marked and numbered on the site plan?	
	(ii) Are those proposed to be demolished immediately and hatched in yellow colour?	
	(iii) What is the plinth area and total floor area of all existing structures to be retained? (Please give details confirming to the plan submitted)	
10.	Are double height terrace within the limit of 20%? Are they of supported type? State said double height terrace area and area counted in FSI.	
11.	(a) Please state the total built up area, (existing + proposed + extra balconies + extra double height terraces.)	
	(b) What is the basic permissible F.S.I. of the zone according to front road width?	
	(c) What is the premium FSI proposed to be consumed?	
	(d) What is the area of TDR proposed to be consumed?	
	(f) Please state the overall F.S.I. utilised in the proposal?	
	(g) Is built-up area of each flat / unit mentioned on the plan?	

12.	Whether area for inclusive housing is required as per Regulation no.6.5? Please state the details.						
13.	(a) What is the width of the front marginal distance (s)? If the building abuts two or more roads, does the front marginal distance comply with Regulation?						
14.	(a) What is :	Permissible	Proposed				
	(i) the side marginal distance (s)?						
	(ii) the rear marginal distance (s)?						
	(iii) the distance between buildings?						
15.	(a) What are the dimensions of the inner or outer chowk?						
	(b) Is / are room (s) dependent for its light and ventilation on the chowk? If so, are the dimensions of the chowk as required?						
16.	(a) Whether sizes of the rooms comply with the dimensions mentioned in the regulations?						
	(b) Whether use of every room / part mentioned on the plan?						
	(c) Whether every room derives light and ventilation required under the regulations?						
17.	If the height of the building is more than 15 meter above the average ground level, is provision for lifts made?						
	(a) If so, give details of lift.	<table border="1"> <thead> <tr> <th>Passenger Capacity</th> <th>No. of Lifts</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> </tr> </tbody> </table>	Passenger Capacity	No. of Lifts			
	Passenger Capacity	No. of Lifts					
(b) Details of Fire Lift.	<table border="1"> <thead> <tr> <th>Passenger Capacity</th> <th>No. of Lifts</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> </tr> </tbody> </table>	Passenger Capacity	No. of Lifts				
Passenger Capacity	No. of Lifts						
18.	(a) Does the building fall under purview of Regulation no.2.2.3.2(g)?						
	(b) If so, is fire escape staircase provided in addition to regular staircase?						
	(c) Whether the ramps to the basement are provided leaving 6 m marginal distance for movement of fire fighting vehicle?						
	(d) If podiums are proposed, does it allow the movement of fire fighting vehicle properly?						
19.		Required	Proposed				

	(a) What are the requirements of parking spaces under the Regulation no.5.7? How many are proposed?	Car		
		Scooter		
		Cycle		
	(b) (i) Are loading-unloading spaces necessary?			
	(ii) If so, what is the requirement?			
	(iii) How many are proposed?			
20.	Is the sanitary arrangement provided as per the regulation?			
21.	Details of the source of water to be used in the construction			
22.	Distance from the sewer.			
23.	Please explain in detail in what respect the proposal does not comply with the Development Control and Promotion Regulations and the reasons there for, attaching a separate sheet if necessary.			

I hereby declare that I am the Architect/ licensed Engineer/ Structural Engineer/ Supervisor employed for the proposed work and that the statements made in this form are true and correct to the best of my knowledge.

12.3. Appendix A-2**FORM FOR SUB-DIVISION OF LAND AS PLOTTED LAYOUT**

Application for permission for development under Section 44 / 58 of The Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BMC Act, 1949.

From

(Name of the owner)

To,

The Municipal Commissioner,
Municipal Corporation,

Sir,

I intend to carry out the under mentioned development in the site/plot of land, bearing S.No./ Gut No. City Survey No..... Mouje situated at Road/ Street in accordance with Section 44/58 of The Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BMC Act, 1949.

I forward herewith the following plans and statements (Item 1 to 6) wherever applicable, in quadruplicate, signed by me (Name in block letters) and the Architect / Licensed Engineer / Structural Engineer / Supervisor (License No.....). who has prepared the plans, designs and a copy of other statements /documents as applicable (Items 7 to 10).

- (1) Key Plan (Location Plan); (to be shown on first copy of the set of plans)
- (2) Site Plan showing the surrounding land and existing access to the land included in the layout; (to be shown on first copy of the set of plans)
- (3) A layout plan showing,
 - (i) sub-divisions of the land or plot with dimensions and area of each of the proposed sub-divisions and its use according to prescribed regulations;
 - (ii) width of the proposed streets; and
 - (iii) Dimensions and area of recreational open spaces provided in the layout.
 - (iv) Dimensions and area of amenity space provided in the layout.
- (4) An extract of record of rights property register card (any other document showing ownership of land to be specified) along with consent of co-owners where third party interest is created.
- (5) Particulars of development in Form enclosed.
- (6) Attested copy of Receipt for payment of scrutiny fees.
- (7) No Objection Certificate, wherever required.

I request that the proposed layout may please be approved and permission accorded to me to execute the work.

MCGM DC Rules

**Development Control Rules For
Greater Mumbai
Municipal Corporation of Greater Mumbai**

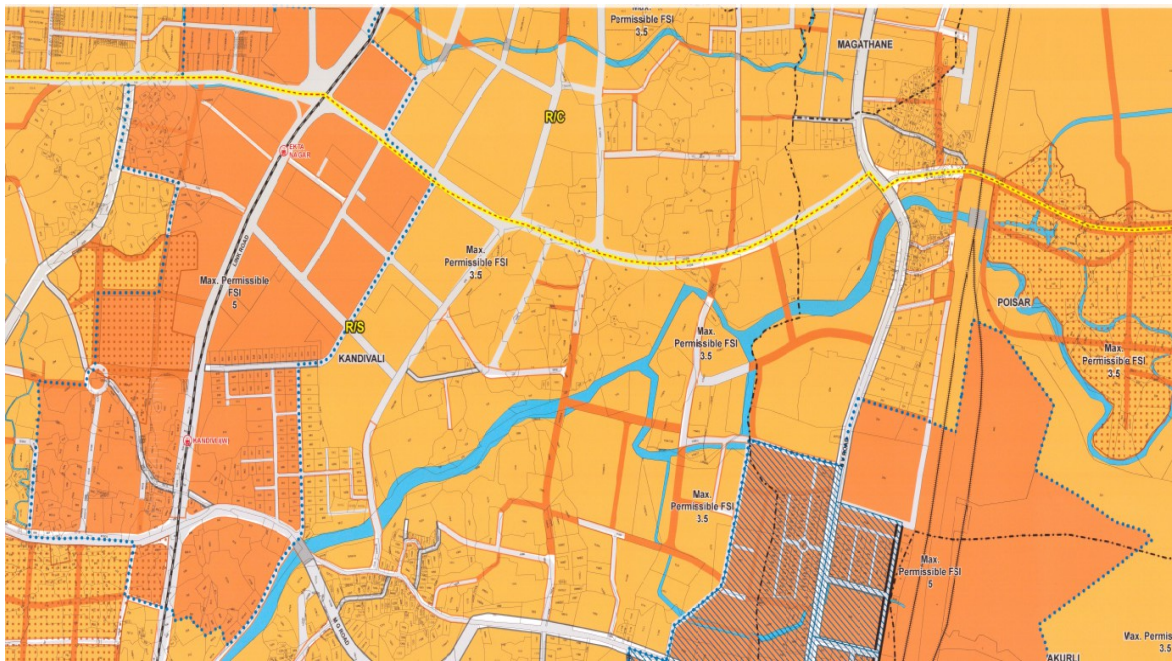

REDEVELOPMENT AND DEVELOPMENT CONTROL REGULATIONS

PRESENTATION BY ARCHITECT SANDEEP KANGUTKAR

Maharashtra Regional and Town Planning Act (MRTP-ACT) and Development Plan

- ▶ Development Plan of any region of Maharashtra is governed by MRTP ACT.
- ▶ Hence Development Plan for the jurisdiction of Greater Mumbai is governed by MRTP ACT-1966.
- ▶ 1ST Development Plan for the jurisdiction of Greater Mumbai came into force on 9th Feb.1967.
- ▶ 2nd Development Plan for the jurisdiction of Greater Mumbai came into force on 25th March 1991.
- ▶ 3rd Draft Development plan published on 25-02-2015.
which has been revised on 27th May 2016.

3RD Development Plan-2034 25th Feb 2015 has been rejected by the Government of Maharashtra due to its enormous mistakes.

Many Proposed D.P.Roads were passing through existing buildings. Many Private Recreation Grounds shown as Public Gardens. Redevelopment schemes such as SRA, MHADA, CESSUED BUILDINGS not considered .

Policy of fungible FSI which is beneficial to existing society members has been scraped.

Government of Maharashtra has decided to revise this Draft D.P.2034

Revised Development Plan-2034 published on 27th May 2016.

- ▶ Municipal Corporation of Greater Mumbai undertook revision of Development Plan under Section 38 of the MRTP Act and has prepared the Draft Development Plan of Greater Mumbai 2034. As part of the Revision of Development Plan, these Development Control Regulations - 2034 have been formulated under Clause (m) of Section 22 of the MR & TP Act 1966.
- ▶ The purpose of these Regulations is to guide the Municipal Officials, landowners and the concerned professionals to formulate development proposal in accordance with the objectives and provisions of Development Plan.

Revised Development Plan-2034 published on 27th May 2016.

- ▶ This Revised D.P.2034, published on 27th May 2016 is at par with present D.P.1991.
- ▶ This Revised D.P.2034 dated 27-05-2016 is an up gradation of present D.P.1991.
- ▶ There is uniformity in the F.S.I. distribution.
- ▶ Fungible F.S.I. is continued in this Revised D.P.2034
- ▶ Format for additional F.S.I. is almost unchanged except very minor modifications.
- ▶ Hence, to understand Revised D.P.2034, it is required

APPLICABILITY OF D.C.REGULATIONS 1991 and Revised D.P.2034 ARE SAME

- (1) *Development and construction* -Except as hereinafter otherwise provided, these Regulations shall apply to all development, redevelopment, erection and/or re-erection of a building, change of user etc. as well as to the design, construction or reconstruction of, and additions and alterations to a building.
- (2) *Part construction* -Where the whole or part of building is demolished or altered or reconstructed/removed, except where otherwise specifically stipulated, these Regulations apply only to the extent of the work involved.
- (3) *Change of occupancy*- Where the occupancy of a building is changed, except where otherwise specifically stipulated these Regulations apply to all parts of the building affected by the change.
- (4) *Reconstruction* - The reconstruction in whole or part of a building which has ceased to exist due to an accidental fire, natural collapse or demolition, having been declared unsafe or which is likely to be demolished by or under an order of the Corporation or the Bombay Housing and Area Development Board and for which the necessary certificate has been given by either the said Corporation or the Board shall be allowed subject to the Regulations in Appendix II.
- (5) *Exclusions* - Nothing in these Regulations shall require the removal, alteration or abandonment or prevent the continuance of the lawfully established use or occupancy of an existing building or its use unless, in the opinion of the Commissioner, such a building is unsafe or constitutes a hazard to the safety of adjacent property.

JURISDICTION AND DATE OF COMING INTO FORCE of D.C.REGULATIONS 1991

Jurisdiction. -These Regulations apply to building activity and development work in areas under the entire jurisdiction of the Municipal Corporation of Greater Mumbai (hereinafter called "the Corporation "). If there is a conflict between the requirements of these Regulations and those of any other rules or byelaws, these Regulations shall prevail:

Provided however that in respect of areas included in a finally sanctioned Town Planning Scheme, the Scheme Regulations shall prevail, if there is a conflict between the requirements of these Regulations and the Scheme Regulations.

Date of coming into force.- These Regulations shall come into force on 25th March 1991 and shall replace the existing Development Control Rules for Greater Mumbai framed under the Maharashtra Regional and Town Planning Act, 1966 (Mah. Act No. XXXVII of 1966).

Present D.C.REGULATION 1991 IS DIVIDED INTO 5 PARTS and APPENDICES 1 TO 23

▶ **PART -1 :- ADMINISTRATION**

Consist of D.C.Regulations 1 to 8.

▶ **PART-2 :- GENERAL PLANNING REQUIREMENTS,
LAND USES & MANNER OF DEVELOPMENT**

Consist of D.C.Regulations 9 to 36 .

▶ **PART-3 :- GENERAL BUILDING REQUIREMENTS**

Consist of D.C.Regulations 37 to 48.

▶ **PART-4 :- LAND USE CLASSIFICATION AND USES PERMITTED**

Consist of D.C.Regulations 49 to 61.

▶ **PART-5 :- SUPPLIMENT AND MISCELLANEOUS PROVISIONS**

Consist of D.C.Regulations 62 to 68.

At the end APPENDICES-1 TO 23

D.C.REGULATION No.32 for F.S.I. as per present D.C.R.1991

- ▶ **It deals with the F.S.I. i.e. FLOOR SPACE INDEX**

F.S.I. is relation between Built up Area and Plot area

$$\text{F.S.I.} = \text{BUILT UP AREA} / \text{PLOT AREA}$$

To control the maximum Built up area on any plot D.C.Regulations imposes cap to this F.S.I.

- ▶ **For suburbs and extended suburbs Max. F.S.I. cap is 1 (one).**

For example if plot area is 1000 sq.mt. then maximum permissible built up area is 1000 sq.mt. So that F.S.I. do not cross limit of one.

- ▶ **For Island city area Max. F.S.I. is 1.33**

For example if plot area is 1000 Sq.Mt. then maximum permissible built up area is 1330 sq.mt. So that F.S.I. do not cross the limit of 1.33

ADDITIONAL F.S.I. up to 0.5 TO SUBURBS AND EXTENDED SUBURBS

- ▶ Each plot owner in the suburbs and extended suburbs can avail additional F.S.I. up to 0.5, but In all circumstances the total maximum permissible F.S.I. with this FSI of 0.5, Road and T.D.R. Should be restrained to TWO.
- ▶ For example if plot area is 1000 sq.mt. then maximum permissible built up area with 0.5 Additional F.S.I. would be 1500 Sq.mt.
- ▶ For this additional F.S.I., premium has to be paid to the tune of 60% of Ready Reckoner Rate of that particular plot.
- ▶ Of this premium 50% amount goes to Govt. Of Maharashtra and 50% goes to M.C.G.M.
- ▶ This additional F.S.I. up to 0.5 is not permissible for Bandra Kurla Complex, SRA schemes, CRZ area and Industrial user.

D.C.REGULATION-34 of present D.C.R.1991 for utilization of T.D.R.

- ▶ **Due to this regulation T.D.R. could be utilized on the receivable plot.**
Maximum cap on FSI is 2 i.e. cap of 1 for FSI relating to plot potential and in addition to this external FSI not related with the plot could be utilized so that maximum FSI could be utilized up to 2
- ▶ For example if plot area is 1000 sq.mt. then as per FSI up to one due to plot potential could allow to construct built up area up to 1000 sq.mt and Due to TDR additional built up area could be constructed up to 1000 sq.mt. So that total construction area could be 2000 Sq.Mt.
- ▶ **AS PER PRESENT DC.R.1991 T.D.R. COULD NOT BE UTILISED IN CITY AREA.**

D.C.REGULATION-35 of present D.C.R.1991

- ▶ 1) It deals with computation of FSI.
- ▶ 2) It deals with exemption from FSI computation.

For example

- a) Area of staircase, lift and lift lobby could be free from FSI computation by paying premium of the same.
- b) Area of one society office up to 12.00 sq.mt for society up to 20 members and area of one society office up to 20.00 sq.mt is counted free of premium.

D.C.REGULATION-35 (4) FUNGIBLE FSI of D.C.R.1991 and Fungible FSI is continued in new DCR 2034 as per Reg.No.31(3)

- ▶ **FUNGIBLE F.S.I. UP TO 35% OF PERMISSIBLE BUILT UP AREA COULD BE AVAILED WHILE DEVELOPMENT OR REDEVELOPMENT OF RESIDENTIAL PROJECT**
- ▶ **FOR COMMERCIAL USER THIS FUNGIBLE FSI IS RESTRICTED UP TO 20%**
- ▶ **FOR REHAB COMPONENT FUNGIBLE FSI IS FREE OF PREMIUM AND FOR SALE COMPONENT PREMIUM TO BE PAID 60% OF READY RECKONER RATE FOR RESIDENTIAL USER AND FOR COMMERCIAL USER IT IS 100% OF READY RECKONER RATE.**
- ▶ **FUNGIBLE FSI OF REHAB COMPONENT IS NON TRANSFERABLE i.e. IT IS NOT ALLOWED TO USE IT IN THE SALE COMPONENT.**

D.C.REGULATION 33 :- RELATING TO ADDITIONAL F.S.I. MAY BE ALLOWED TO

CERTAIN CATEGORIES

- ▶ 33 (1) :- Road widening and construction of new roads:- 100% but could be utilized up to 40% in city and upto 80% in suburbs and extended suburbs with respect to balance net plot area.

- ▶ 33 (2) :-Educational and Medical Institutions:-

Additional F.S.I. may be availed up to 4 or as per Govt. gazettes declared time to time.

D.C.REGULATIONS 33 :-

▶ 33(5):- Development or Redevelopment for housing schemes of MHADA

F.S.I. could be availed up to 3.00

a) Minimum entitlement of carpet area to existing tenant is existing carpet area plus 35% but in any case minimum carpet area is 300.00 sq.ft. i.e. when plot area is upto 4000 sq.mt.

D.C.REGULATIONS 33 :-

- ▶ 33(6):- Reconstruction of buildings destroyed by fire or collapsed or demolished.
- ▶ 33(7):- Reconstruction or Redevelopment of cessed buildings in the island city
F.S.I. could be availed up to 3.00 OR
Area required to rehabilitation of existing tenants + 50 % insentive area for sale component.
- ▶ 33(8) :- Construction for housing for dishoused.
- ▶ 33(9):- Cluster development in island city with F.S.I. up to 4.
- ▶ 33(10) :- For S.R.A. Schemes F.S.I. upto 3.
- ▶ 33(11):- Housing schemes under ULC Act 1976.
- ▶ 33(12):-Development by MHADA with world bank assistance.
- ▶ 33(13):- Rehabilitation for project affected persons.

D.C.REGULATION 33 :-

▶ 33(14):-Providing transit camps.

▶ 33(14)(d):- Handing over area to SRA free of cost for transit accommodation

Additional FSI upto 1.5 over and above existing one FSI .

Hence total permissible maximum FSI 2.5

Out of which 0.75 FSI has to be handed over SRA.

▶ 33(15):- Redevelopment of contravening structures in the T.P.Scheme.

F.S.I. Upto 2.5 could be availed.

▶ 33(16):- Buildings of I.T.establishments

Additional F.S.I. up to 1.00 over and above existing FSI one could be availed by paying premium.

D.C.REGULATION 33 :-

- ▶ 33(17):- Shifting of cattle sheds.
- ▶ 33(18):- Additional F.S.I.for Mill workers.
- ▶ 33(19):- Gaothan Plots
 - a) FSI up to 1.5 for plots fronting road widths up to 9.00M
 - b) FSI up to 1.5 and additional 0.5 over and above 1.5 for commercial user for plots fronting road with more than 9.00M.
- ▶ 33((20):- Buildings of bio-technological establishments.
- ▶ 33(24):- Development of multi storied Parking:-

TOTAL PERMISSIBLE BUILT UP AREA UNDER D.C.REGULATIONS 32,34 AND 35 (4) as per D.C.R.1991

- ▶ PLOT AREA = 1000 SQ.M.
- ▶ Road set-back area = 200 SQ.M.
- ▶ BASIC FSI AS PER D.C.REG.32 IS ONE BUT IT IS ON NET PLOT AREA
- ▶ 1000-200 = 800 SQ.M.
- HENCE PERMISSIBLE BUILT UP AREA (Reg.No.32) = 800 SQ.MT.
- ▶ AS PER D.C.REG.34, MAX. T.D.R. PERMISSIBLE = 800 SQ.MT.
- NET PERMISSIBLE BUILT UP AREA = 1600 SQ.MT.
- ▶ PERMISSIBLE FUNGILE FSI 35% OF 1800 = 560 SQ.MT.
- TOTAL PERMISSIBLE BUILT UP AREA = 2160 SQ.MT.

But plot having no set-back, permissible Built-up area

$$= 1000 + 1000 (T.D.R.) + 35\% \text{ fungible of } (2000) = 2700 \text{ Sq.MT.}$$

IT IS LOSS TO PLOT OWNER WHO IS SACRIFICING HIS PLOT AREA FOR PUBLIC BENEFIT.

Regulation No.-30 for F.S.I. as per

(A) Floor Space Indices & Floor space /BUA computation

1. TABLE-12 of D.C.Reg.30 of Revised D.C.R.2034

SR. NO.	AREA	ZONE	ZONAL BASIC	ADDITIONAL FSI ON PAYMENT OF PREMIUM	ADMISSIBLE TDR	TOTAL PERMISSIBLE FSI
1	2	3	4	5	6	7
I	ISLAND CITY	RES./COM	1.33	0.34	0.33	2.00
II	Suburbs and extended suburbs					
	i Restricted area in M and N Ward	Res./Com	0.75			0.75
	ii Area of village Akse, Marve etc	Res./Com	0.50			0.50
	ii The remaining Area of Suburbs and extended suburbs	Res./Com	1.00	0.50	0.50	2.00
III	Island City	Industrial	1.00			1.00
IV	Suburbs and extended suburbs	Industrial	1.00			1.00

F.S.I. as per D.C.R.2034 is based on Gross Plot Area as per D.C.reg.No.30(A)(2)

(A) Floor Space Indices & Floor space /BUAcomputation

(2) The permissible FSI shall be on gross plot area including area under DP roads/roads for which sanctioned Regular line as per MMC Act is prescribed and DP Reservation, and where

- (4) The permissible FSI shall be on gross plot area including areas to be surrendered to MCGM/Appropriate Authority under Regulation no 14 (amenity plots), 15 (inclusive housing) and 35 (development of cotton textile mills).

Provided further that BUA in lieu of cost of construction of built up amenity required to be handed over to MCGM under Regulation Nos 15, if any, shall be permissible over and above permissible BUA(as per column no 7 of Table No 12 above) or owner may avail the TDR thereof, if not consumed on the balance plot..

- (5) BUA so arrived shall be allowed to be consumed on the balance plot after handing over of Reservation/Amenity/Plot/DP road/roads for which sanctioned Regular line is prescribed as per MMC Act to MCGM.
- (6) Premium shall be charged for 'additional FSI on payment of premium' (as per column no 5 of table no 12) for BUA at the rate of 60% of the land rates as per ASR (for FSI 1) of the year in which such FSI is granted. Premium so recovered shall be shared between the State Govt. and MCGM on 50:50 basis. The MCGM shall utilize the premium for implementation of D P.

If owner/developer is unable to consume even Zonal (basic) FSI due to planning constraints, he shall be entitled for TDR for the unconsumed BUA thereof including a & c above.

D.C.Reg.31 of D.C.R. 2034

Exempted from FSI to be counted in FSI/Compensatory (Fungible) Floor Space Index (FSI):

(1) Exemption from FSI

The following shall not be counted in FSI

- (i) Areas of structures permitted in ROS under clause (g) of sub-Regulation (1) of Reg.No.27
- (ii) Areas covered by features permitted in open spaces as listed in Regulation No.42 except for Regulation 42(i) (b), 42(ii)(d),42(ii) (e) (ii)&(iii) and 42(ii) (f) (ii)&(iii).
- (iii) Areas covered by staircase rooms, lift rooms above topmost storey, staircase/lift wells and passages in stilt, basement and floors exclusively used for parking and other ancillary uses as permitted in this

(v) Area of the basement used exclusively for parking and other ancillary uses as permitted in Regulation No. 37(9) (iv) (b, c, d, e & j).

(vi) Area of covered parking spaces as provided in sub-Regulation (6) (a) of Regulation No.44

Provided, however, that additional parking to the extent of 25% of the required parking may be permitted without payment of premium.

Provided further that in non-residential building, where entire parking is proposed by mechanical/ automatic means, additional parking to the extent of 10% of the required parking shall be permitted free of FSI as vehicle holding area.

(vii) Area of one office room as provided in sub-Regulation (11) of Regulation 37

(viii) Lofts [vide sub-Regulation 4 of Regulation 37]

(ix) Porches [vide sub-Regulation (20) of Regulation 37].

(x) Canopy [vide sub-Regulation (21) of Regulation 37].

(xi) Area of structures for an effluent treatment plant as required to be provided, as per the requirements of the MPCB or other relevant authorities:

Provided, however, in the case of an existing industry, if no vacant land is available the Commissioner may permit structures with dimensions to be approved by him for such effluent treatment plant on 15 per cent amenity open space.

(xii) A chajja, cornice, weather shade, sun-breaker; at lintel level only; projecting not more than 1.2 m. from the face of the building as provided in sub regulation no. 42 (ii) (e)(i).

Further Chajja, Cornice, Weather Shade, sun breaker or other ornamental projections etc. shall be permissible upto 0.3 m. in Gaothan area for the plots admeasuring upto 250 Sq.m .

(xiii) A chajja, cornice, weather shade, sun-breaker over a balcony or gallery, as provided in sub regulation no. 42(ii)(f)(i)

(xiv) Area covered by elevated/underground water reservoirs/tanks, electric sub-stations, pump houses, facility for treatment of wet waste in situ.

(xv) Area covered by new lift and passage thereto in an existing building with a height up to 16m. in the Island City [vide clause (ii) (f) of sub-Regulation (19) of Regulations 37]

(xvi) Area of a covered passage of clear width not more than 1.52m (5ft.) leading from a lift exit at terrace level to the existing staircase so as to enable descent to lower floor in a building to reach tenements not having direct access to a new lift in a building without an existing lift.

(xvii) Area of one fitness centre /Yogalaya for a Co-Op. Housing Society or Apartment Owners Association as provided in sub-regulation 37(30).

D.C.Reg.31 (2) of D.C.R. 2034

The following shall be counted in FSI

- (i) Covered parking spaces/Garage as provided under Regulation No. 44 (6)(d)
- (ii) Area of fire escape balcony as provided in Regulation No 48(6)
- (iii) Area of Sanitary block for the use of domestic servants engaged in the premises, other than at staircase mid-landing level, stilt level, parking level.
- (iv) Part/Pocket/Covered terraces, for whatever purpose, except open terrace above the top most storey and the part terrace at top most storey due to planning constraints but accessible from common staircase, terraces created due to restriction imposed by the Railway Authority and above shopping/Nonresidential area at one level only, in case of residential development on upper floors.
- (v) Area below open to sky swimming pool, clearance exceeding 1.5 m. from floor level.
- (vi) Air conditioning plant room/Air handling unit room, D.G.set room except provided in basement.
- (vii) Service floor of height exceeding 1.8 m.
- (viii) Area of balconies as provided in sub regulation 22 of Regulation No 37.

D.C.Reg.31 (3)

Compensatory (Fungible) Floor Space Index (FSI):-

Notwithstanding anything contained in the D.C.Regulations 30, 32 & 33, the Commissioner may, by special permission, permit fungible compensatory FSI,

not exceeding 35% for residential development and 20% for Industrial/Commercial development, over and above admissible FSI/BUA, by charging a premium at the rate of 60% for Residential and 80% for Industrial and Commercial development of ASR (for FSI 1).

Provided that in case of redevelopment under regulation 33(6),33(7),33(8),33(9), 33(20) and 33(10) excluding clause No.3.11 of the Regulation the fungible compensatory FSI admissible on rehabilitation component shall be granted without charging premium.

Provided further that redevelopment under Regulation No. 33(5) and redevelopment proposal of existing buildings in suburbs and extended suburbs by availing TDR, the fungible compensatory FSI admissible on FSI consumed in existing structure shall be granted without charging premium.

Provided further that such fungible compensatory FSI for rehabilitation component shall not be used for free sale component and shall be used to give additional area over and above eligible area to the existing tenants/occupants.

D.C.Reg.32 of D.C.R.2034 Transfer of Development Rights (TDR)

1. TDR in lieu of handing over of areas affecting reservations including DP road:

Due to this TDR is generated and it could be utilised on receivable plot.

2. Utilization of TDR

Development Right Certificates (DRCs) can be used in entirety or in parts at any location, except mentioned in Sr No 3.(A)(8) below, in any land use zone within the limits of FSI prescribed in Table No. 12 above. The TDR at the receiving plots shall be governed by the following

$$\mathbf{TDR_r = TDR_o \times (RRL_o/RRL_r)}$$

Where:

TDR_r = Transferable Development Rights on the receiving plot.

TDR_o = Transferable Development Rights on the originating plot

RRL_o = Land rates of Annual Statement of Rates (ASR) of the originating plot

RRL_r = Land rates of Annual Statement of Rates (ASR) of the receiving plot

Note: Land rates of ASR of both RRL_o & RRL_r shall be of the relevant year in which

D.C.Reg.32 of D.C.R.2034 Transfer of Development Rights (TDR)

1) T.D.R. receiving plot is at Vile Parle (East)

Ready Reckoner rate is say Rs.95,000/-per sq.mt.

2) T.D.R. generated at Kandivli where Ready Reckoner rate is say Rs.50,000/-per sq.mt. and T.D.R. quantity purchased is 5000 Sq.Ft.

T.D.R. could be loaded = $5000 \times (50,000 / 95,000)$
= $5000 \times 0.53 = 2650.00$ Sq.ft.

3) Hence greater quantity of T.D.R. is required to be purchased.

D.C.Reg.33(22) of D.C.R 2034

Additional FSI for Redevelopment of existing residential housing societies, residential tenanted buildings excluding cessed buildings:

In case of redevelopment of existing residential housing societies, residential tenanted

buildings excluding cessed buildings proposed by Housing societies/land lords or through

their proponents where existing members, tenants are proposed to be re-accommodated

on the same plot, additional FSI for redevelopment of such existing residential buildings

shall be as follows:

1. Additional BUA in lieu of cost of construction of authorized existing BUA =
 $1.50 \times \left(\frac{\text{Rate of construction per sq. m as per ASR rate}}{\text{Rate of developed land per sq. m as per ASR (for FSI1)}} \right) \times (\text{authorized existing built up area} + \text{area of the balcony if claimed free of FSI as per then prevailing regulation})$

► **Provided that this incentive shall not exceed 40% of existing authorized BUA**

Provided further that if the existing authorized BUA and incentive thereon as per

Additional built up area up to 40% of existing built-up area should be at par with D.C.Reg.No.30(A)(4)

4 The permissible FSI shall be on gross plot area including areas to be surrendered to MCGM/Appropriate Authority under Regulation no 14 (amenity plots), 15 (inclusive housing) and 35 (development of cotton textile mills).

Provided further that BUA in lieu of cost of construction of built up amenity required to be handed over to MCGM under Regulation Nos 15, if any, shall be permissible over and above permissible BUA(as per column no 7 of Table No 12 above) or owner may avail the TDR thereof, if not consumed on the balance plot.

D.C.Reg.14 of D.C.R.2034

Amenities and Facilities

(A) In Plots/lay-outs of the land admeasuring 4000 sq. m or more

In case of development of land admeasuring 4000 sq.m and more(excluding the area under Road set back / DP Road) in Residential and Commercial Zones, amenity areas as specified below shall be fronting a public road or shall be provided with a perpetual independent right of way. Such amenity area shall be exclusive of area under perpetual independent right of way.

- (i) Development of plots with area 4,000 sq.m and more and up to 10,000 sq. m shall require handing over 5% of plot area to MCGM as POS.
- (ii) Developments of plot with area exceeding 10,000 sq. m shall require handing over 10% of plot area to MCGM as public amenity space. 50% of such public amenity space shall be used exclusively for POS and the balance 50% shall be used for provision of such amenities as education, health, social and other amenities as approved with the special permission of the Commissioner. In determining the amenity, the Commissioner shall give due regard to amenity deficits in the ward.
- (iii) Such public amenities or facilities (i) and (ii) above shall be deemed to be designations or reservations in the DP thereafter.

D.C.Reg.14 of D.C.R.2034

Amenities and Facilities

(A) In Plots/lay-outs of the land admeasuring 4000 sq. m or more

- a) If the area under DP reservation to be handed over to MCGM (excluding the DP Road/Road set back) is less than the required area of public amenity space as per this Regulation, then only the additional area required shall be provided for public amenity space.
- b) If the area under DP reservation to be handed over to MCGM (excluding the DP Road/Road set back) is more than the required area of public amenity space as per this Regulation, then the provision for public amenity space shall not be necessary.
- c) Such amenity areas shall not be deducted from the plot for the calculation of FSI permissible on the balance plot.
- d) These areas will be in addition to the Recreational Open Space (ROS) as required under Regulation No. 27.
- e) The minimum dimension of any side of such amenity space shall not be less than 7.5 m and if the average width of such amenity space is less than 16.6 m, the length thereof shall not exceed 2 1/2 times the average width.

Note: No amenity plot will be carved out of any land entirely reserved for public

D.C.Reg.No.-15 Inclusive Housing (IH)

- ▶ In case of any residential development partially or fully consisting of subdivision/amalgamation/layout or single plot of land having gross plot area admeasuring 4000 sq. m or more (excluding the area under Road set back/DP Road/designation/reservation) shall have the provision of IH as described below:
- ▶ 1 a) For construction of EWS/LIG tenements, minimum 20% of the plot area (excluding the area under Road set back/D P Road/designation/reservation) shall be handed over to MCGM free of cost .The FSI of the plot handed over to MCGM shall be allowed to be utilized on the remaining plot.
- ▶ b) The aforesaid plot shall be handed over to MCGM within twelve months from the date of approval /approval of the layout. The FSI of such plot can be utilized on remainder plot only after handing over of such plot to MCGM or before availing Zonal (basic) FSI beyond 50% of gross plot area or granting Occupation Certificate to any of the building, whichever is earlier. The ownership of such plot shall be transferred in the name of MCGM in Revenue records before seeking occupation to any of

D.C.Reg.No.-15 Inclusive Housing (IH)

- ▶ c) MCGM after receipt of such plot shall immediately formulate a scheme of development for IH wherein the size of tenement shall have carpet area between 27.88 sq. m. and 42sq. m. Further, such plots shall not be used for any other purpose.
- ▶ Provided that in case the Landowner/Developer desires not to utilize such FSI in the same land, fully or partly, then he shall be eligible for TDR in lieu of such unutilized FSI. The utilization of this TDR shall be subject to the prevailing provisions of DCR and as per the following formula.
- ▶ Formula:
- ▶ $X = (R_g/R_r) * Y$
- ▶ Where, X = Utilization of Development Right (DR) on the receiving plot.
- ▶ R_g = Land Rate in Rs. per sq. m as per the Annual Schedule of Rates (herein after referred to as "ASR") of generating plot in the year when project is sanctioned.

DEVELOPMENT CONTROL REGULATIONS - 2000 FOR NAGPUR CITY

DEVELOPMENT CONTROL REGULATIONS - 2000 FOR NAGPUR CITY

PART 1 ADMINISTRATION

1. SHORT TITLE, EXTENT AND COMMENCEMENT

- 1.1 These Regulation shall be called as "Development Control Regulations, 2000 for Nagpur city".
- 1.2 These Regulation shall apply to building activity and development work in the areas under the jurisdiction of Nagpur Improvement Trust, Nagpur and Nagpur Municipal Corporation, Nagpur.
- 1.3 All Development work shall conform to the respective provisions made under these regulations.

2. DEFINITIONS

2.0 General

2.0.1 In these regulations, unless the context otherwise requires, the definitions given under 2.1 to 2.97 shall have meaning Indicated against each of them.

2.0.2 Words and expressions not defined in these regulation shall have the same meaning or sense as in the

(1) The Nagpur Improvement Trust Act, 1936.

(2) City of Nagpur Corporation Act, 1948.

(3) Maharashtra Regional & Town Planning Act, 1966.

2.0.3. Commissioner / Chairman: - "Commissioner" means Commissioner, Nagpur, Municipal Corporation and "Chairman" means Chairman, Nagpur Improvement Trust.

2.1. Act -Shall mean :-

(1) The Nagpur Improvement Trust Act, 1936 and

(2) The City of Nagpur Corporation Act, 1948

(3) Maharashtra Regional & Town Planning Act, 1966.

2.2 Advertising Sign :- Any surface of structure with characters, letters or illustrations applied thereto and displayed in any manner whatsoever out of door for purposes of advertising or to give information regarding or to attract the public to any place, person, public performance, article or merchandise what soever , and which surface or structure is attached to, forms of or is connected with any building, or is fixed to a tree or to the ground or to any Pole, screen-, fence or hoarding or displayed in space.

2.3 Air - conditioning :- The process of treating air so as to control simultaneously its temperature, humidity, cleanliness and distribution to meet the requirement of conditioned space.

2.4 Alteration :- A change from one occupancy to another, or a structural change, such as an addition to the area or height, or the removal of part of a building, or any change to the structure, such as the construction of, cutting into or removal of any wall, partition, column, beam, joist, floor, roof or other support or a change to or closing of any required means of ingress or egress or a change to the fixtures of equipment as provided under these regulations. However modification in regards to gardening, white washing, painting, plastering, pointing, paving and retiling shall not be deemed to be alteration.

2.5. Approved:- Approved by the Authority having jurisdiction.

2.6. Authority having jurisdiction :- The authority which has been created by a Statute and which for the purpose of administering the regulations may authorise Technical Committee or an official having a professional skill to act on its behalf hereinafter called the 'Authority'.

2.7 Automatic Sprinkler System :- An arrangement of piping and sprinklers, designed to operate

automatically by the heat of fire and to discharge water upon that fire and which may also simultaneously give automatic audible alarm.

- 2.8 Balcony :- A Horizontal projection including parapet and handrail ballustrade to serve as a passage or sitting out place at least one side fully open, except provided with railing or parapet wall for safety.
- 2.9 Basement:- The lower storey of a building below or partly below the ground level.
- 2.10 Building:- Any structure for whatsoever purpose and of whatsoever materials constructed and every part thereof whether used as human habitation or not and includes foundation, plinth, walls, floors, roofs, chimneys, wells, door steps, fencing, plumbing and building services, fixed -platforms, varandahs, balcony; cornice or projection, part of a building or anything affixed thereto or any wall fence enclosing or intended to enclose any land or space and signs and outdoor display structures. However, tents, SHAMIANAHs and the tarpaulin shelters erected for temporary and ceremonial occasions with the permission of the Authority shall not be considered as building.
- 2.11 Built up Area :- The area covered by a building on all floors including cantilevered portion , if any, but excepting the areas excluded specifically under these Regulations.
- 2.12 Building Height:- The vertical distance measured in the case of flat roofs, from the average level of the surrounding ground and contiguous to the building or as decided by the Authority to the highest point of the building and in the case of pitched roofs, upto the midpoint between the eaves level and the ridge. However, architectural features serving no other function except that of decoration shall be excluded for the purpose of ascertaining height.
- 2.13 Building Line :- The line upto which the plinth of a building adjoining a street or an extension of a street or on a future street may lawfully extend. It includes the lines prescribed, if any, in any scheme and/or development plan.
- 2.14 Cabin :- A non - residential enclosure constructed of non - load bearing, non masonry partitions.
- 2.15 Carpet Area:- The net usable floor area within a building excluding that covered by the walls or any other areas specifically exempted from floor space index computation in these regulations.
- 2.16 Chajja :- A sloping or horizontal structural overhang usually provided over openings on external walls to provide protection from sun and rain and for purpose of Architectural appearance.
- 2.17 Chimney:- The construction by means of which a flue is formed for the purpose of carrying products of combustion to the open air. Chimney includes chimney stack and the flue pipe.
- 2.18 Combustible Material :- A material, if it burns or adds heat to a fire when tested for combustibility in accordance with IS - 3808 - 1966 Method of Test for combustibility of Building Materials, National Building Code.
- 2.19.1 Courtyard or chowk :- A space permanently open to sky enclosed fully or partially by buildings and may be at ground level or any other level within or adjacent to a building.
- 2.20 Detached Building :- A building whose walls and roofs are independent of any other building with open space on all sides as specified.
- 2.21 Development :- Development with its grammatical variations means the carrying out of buildings, engineering, mining or other operations in, or over, or under, land or the making of any material change, in any building or land or in the use of any building or land or any material or structural change in any Heritage building or its precinct and includes demolition of any existing building, structure or erection of part of such building, structure of erection and reclamation, redevelopment and layout or sub-division of any land and to develop shall be construed accordingly.
- 2.22 Development Plan.- The Development Plan for the City of Nagpur framed under the Maharashtra regional and Town Planning Act, 1966 and amendments made from time to time including revised Development Plan.

- 2.23 Drain :- A system or a line of pipes including all fittings and equipments such as manholes, inspection chambers, traps, gullies and floor traps used for drainage of building, or a number of buildings or yards appurtenant to the buildings, within the same cartilage. 'Drain shall also include open channel used for conveying surface water.
- 2.24 Drainage :- The removal of any liquid by a system constructed for the purpose.
- 2.25 Enclosed Stair- case :- A stair case separated by fire resistant walls and door (s) from the rest of the building.
- 2.26 Existing Building or use:- A building, structure or its use existing authorisedly before the commencement of these regulations.
- 2.27 Exit :- A passage, channel or means of egress from any building, storeys or floor area to a street or other open space of safety.
- 2.27.1 Vertical Exit :- A vertical exit is a means of exit used for ascension or descension between two of more levels including stairways, smoke proof towers, ramps, escalators and fire escapes.
- 2.27.2 Horizontal Exit:- A horizontal exit is protected opening through or around a firewall or a bridge connecting two buildings.
- 2.27.3 Outside Exit :- An outside exit is an exit from the building to public way, to an open area leading to public way, to an enclosed fire resistive passage to a public way.
- 2.28 External Wall :- An outer wall of a building not being a party wall even though adjoining to a wall of another building and also means a wall abutting on an interior open space of any building.
- 2.29 Fire and / or Emergency Alarm System :- An arrangement of call points or detectors, sounders and other equipments for the transmission and indication of alarm signals, for - testing of circuits and whenever required for the operation of auxiliary services. This device may be workable automatically or manually to alert the occupants in the event of fire or other emergency.
- 2.30 Fire lift :- One of the lifts specially designed for use by fire service personnel in the event of fire.
- 2.31 Fire Proof Door :- A door or shutter fitted to a wall opening, and constructed and erected with the requirement to check the transmission of heat and fire for a specified period.
- 2.32 Fire Resisting Material:- Material which has certain degree of fire resistance.
- 2.32.1 Fire Resistance :- The time during which it fulfils its function of contributing to the fire safety of a building when subjected to prescribed conditions of heat and load or restraint. The fire resistance test of structures shall be done in accordance with "IS -3809 - 1966 Fire Resistance Test of Structures".
- 2.33 Fire Separation :- The distance in metres measured from any other building on the site, or from other site, or from the opposite side of a street or other public space to the building.
- 2.34 Fire Service Inlets :- A connection provided at the base of a building for pumping up water through in Built fire fighting arrangements by fire service pumps in accordance with the recommendations of the Fire Services Authority.
- 2.35 Fire Tower :- An enclosed staircase which can only be approached from the various floors through landings or lobbies separated from both the floor areas and the staircase by fire resisting doors, and open to the outer air.
- 2.36 Floor :- The lower surface in a story on which one normally walks in a building. The general term floor unless otherwise specifically mentioned shall not refer to a mezzanine floor.

NOTE:- The sequential numbering of floor shall be determined by its relation to the determining entrance level. For floor at or wholly above ground level the lowest floor in the building with direct entrance from to road/ street shall be termed as ground floor. The other floors above ground floor shall be numbered in sequence as Floor 1, Floor 2, etc., with number increasing upwards.

- 2.37 Floor space index (F. S. I) :- The quotient obtained by dividing the total covered area (plinth area) on all floors, excluding exempted areas as given in regulation No. 15.4.2 by the area of the plot.
- $$\text{F. S. I.} = \frac{\text{Total covered areas on all floors}}{\text{Plot area}}$$
- 2.38 Footing:- A foundation unit constructed in brick work, masonry of concrete under the base of a wall or column for the purpose of distributing the load over a large area.
- 2.39 Foundation :- That part of the structure which is in direct contact with an transmitting loads to the ground
- 2.40 Front :- The space between the boundary line of plot abutting the means of access / road / street and the building line. In case of plots facing two or more means of accesses / road / streets, the plot shall be deemed to front on all such means of access / road / streets.
- 2.41 Gallery :- An intermediate floor or platform projecting from a wall of an auditorium of a hall providing extra floor area, additional seating accommodation etc. These shall also include the structures provided for seating in stadia.
- * 2.42 Garage, Private:- A building or portion thereof designed and used for parking of private owned motor driven or other vehicles.
- 2.43 Garage, Public :- A building or portion thereof designed as other than a private garage, operated for gain, designed or used for repairing, servicing, hiring, selling or storing or parking motor driven of other vehicles.
- 2.44 Habitable Room :- Habitable room or living room means, a room constructed or intended for human habitation.
- 2.45 Holding, Contiguous :- A contiguous piece of land in one ownership irrespective of separate property register cards.
- 2.46 Home Occupation :- Customary home occupation other than the conduct of an eating or a drinking place offering services to the general public, customarily carried out by a member of the family residing on the premise without employing hired labour, and for which there is no display to indicate from the exterior of the building that it is being utilised in whole or in part for any purpose other than a residential or dwelling use, and in connection with which no article or service is sold or exhibited for sale except that which is produced therein, which shall be non - hazardous and not affecting the safety of the inhabitants of the building and the neighbourhood and provided that no mechanical equipment is used except that as is customarily used for purely domestic or household purposes and / or employing licensable goods. If motive power is used, the total electricity load should not exceed 0.75 kw. Home Occupation may also include such similar Occupations as may be specified by the Commissioner / Chairman with the approval of Corporation and subject to such terms and conditions as may be prescribed.
- 2.47 Ledge or Tand :- A shelf like projection, supported in any manner whatsoever, except by vertical supports within a room itself but not having projection wider than half meter.
- * 2.48 Architect :- An Architect who is an associate or corporate member of the Indian Institute of Architects or who holds a degree or diploma which makes him eligible for such membership for such qualification listed in schedule XIV of the Architects Act, 1972, and being duly registered with the Council of Architecture under that Act.
- * 2.48.1 Licenced Engineer / Structural Engineer / Supervisor :- A qualified Engineer / Structural Engineer / Supervisor licenced by the Commissioner, Nagpur Municipal Corporation / Chairman, Nagpur Improvement Trust.
- 2.49 Lift :- An appliance designed to transport persons or materials between two or more levels in a
- * Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- vertical or substantially vertical directions, by means of a guided car platform.
- 2.50 Loft :- An intermediate floor between two floors or a residual space in a pitched roof, above normal floor level which is constructed and adopted for storage purposes.
- 2.51 Masonry :- An assemblage of masonry units properly bound together with mortar.
- 2.52 Masonry Unit :- A unit whose net cross - sectional area in every plans parallel to the bearing surface is 75 percent or more of its gross cross - sectional area measured in the same plans. It may be either clay brick, stone concrete block or sand-lime brick.
- 2.53 Mazzanine floor :- An intermediate floor, not being a loft, between the floor and ceiling of any storey.
- 2.54 Non -Combustible :- A material which does not burn nor add heat to a fire when tested for combustibility in accordance with IS: 3808 - 1966 'Method of Test for Combustibility of Building Materials'.
- 2.55 Occupancy or Use Group :- The principal occupancy or use for which a building or a part of a building is used, or intended to be used, for the purposes of classification of a building according to the occupancy, on occupancy shall be deemed to include subsidiary occupancies which are contingent upon it. Buildings with mixed occupancies are those buildings in which more than one occupancy are present in different portions of the buildings.
- The occupancy classification shall have the meaning given from 2.55.1 to 2.55.9 unless otherwise spelt out in Development plan.
- 2.55.1 Residential Buildings:- These shall include any building in which sleeping accommodation is provided for normal residential purposes with or without cooking or dining or both facilities. It includes one or two or multi family dwellings, lodging or rooming houses hostels, dormitories, apartment houses and flats, and private garages.
- 2.55.2 Educational Buildings :- A building exclusively used for a school or college, recognised by the appropriate Board or University, or any other competent authority involving assembly for instruction, education or recreation incidental to educational use, and including a building for such other users incidental thereto such as library or a research Institution. It shall also include quarters for essential staff required to reside in the premises and a building used as a hostel captive to an educational institution whether situated in its campus or not.
- 2.55.3 Institutional Buildings :- A building constructed by Government, Semi - Government organisation or registered Trusts and used for medical or other treatment, a hostel for working women or for an auditorium or complex for cultural and allied activities or for an Hospice care of persons suffering from physical or mental illness, handicap, disease or infirmity, care of orphans, abandoned women, children and infants, convalescents, distitutes or aged persons and for penal or correctional detention with restricted liberty of the inmates ordinarily providing sleeping accommodation, and includes dharmshalas, hospitals, sanatoria, custodial and penal institutions such as jails, prisons, mental Hospitals, houses of corrections detention and reformatories.
- 2.55.4 Assembly Buildings :- These shall include any building or part of building where groups of people congregate or gather for amusement, recreation, social, religious, patriotic, civil, travel and similar purposes, for example theatres, motion picture house, drive-in - theatres, assembly halls, city halls, town halls, auditoria, exhibition halls, museums, mangal karyalaya, skating rinks, gymnasium, restaurants, eating houses, boarding houses, places of worship, dance halls; ,club rooms, gymkhana, passenger stations and terminals of air, surface and other public transportation services, recreation piers and stadia, residential hotels including star category hotels.
- 2.55.5 Business Buildings :- These shall include any building or part of building, which is used for transaction of business for the keeping of accounts and records for similar purposes; offices, banks, professional establishments, court houses, libraries shall be classified in this group in so far as principal function of these is transaction of public business and the keeping of books and records.

- 2.55.5.1 Office Building (premises) :- The premises whose sole or principal use is to be used as an office or for office purpose; "office purposes" includes the purpose of administration, clerical work, handling money, telephone and telegraph operating and operating computers and "clerical work" includes writing, book-keeping, sorting papers, typing filing, duplicating, drawing of matter for publication and the editorial preparation of matter for publication.
- 2.55.6 Mercantile Buildings :- These shall include any building or part of a building, which is used as shops, stores, market, for display and sale of merchandise either wholesale or retail, Office, storage and service facilities incidental to the sale of merchandise and located in the same building shall be included under this group.
- 2.55.6.1 Wholesale Establishments :- These shall include establishments wholly or partly engaged in whole -sale trade, manufactures, wholesale outlets including related storage facilities, warehouses and establishments engaged in truck transport including truck transport booking agencies.
- 2.55.7 Industrial Buildings :- These shall include any building or part of a building or structure, in which products or materials of all kinds and properties are fabricated assembled or processed like assembly laboratories, power plants, smoke houses, refineries, gas plants, mills, dairies, factories etc.
- 2.55.8 Storage Buildings :- These shall include any building or part of a building used primarily for the storage or sheltering of goods, wares or merchandise, like ware houses, cold storage, freight depots, transit sheds, store houses, public garages, hangars, truck terminals, grain elevators, barns and stables.
- 2.55.9 Hazardous Buildings :- These shall include any building or: part of a building which is used for the storage, handling, manufacture or processing of highly combustible or explosive materials or products which are liable to bum with extreme rapidity and / or which may produce poisonous gases or explosions during storage, handling, manufacturing or processing, which involve highly corrosive, toxic or noxious alkalies, acids or other liquids or chemicals producing flame, fumes and explosive, mixtures of dust or which result in the division of matter into fine particles subject to spontaneous ignition.
- 2.56 Open Space :- An area, forming an integral part of the site, left open to the sky.
- 2.57 Owner :- The owner shall have the meaning as assigned thereto in the Act.
- 2.58 Parapet :- A low wall or railing built along the edge of a roof or a floor.
- 2.59 Parking Space :- An enclosed or unenclosed, covered or open area sufficient in size to park vechicles. Parking space shall be served by a drive way connecting them with a street or galley and permitting ingress or egress of vehicles.
- 2.60 Partition:- An interior non-load bearing divider, one storey or part storey in height.
- 2.61 Party wall :- It includes:-
- (a) a wall forming part of a building, and being used or constructed to be used in any part of the height or length of such wall for separation of adjoining buildings belonging to different owners or occupied or constructed or adopted to be occupied by different persons; or
 - (b) a wall forming part of building and standing in any part of the length of such wall to a greater extent than the projection of the footing on one side on grounds of different owners.
- 2.62 Permanent open Air Space:- Air space is deemed to be permanently open to the sky if.
- (a) it is a street.
 - (b) Its freedom from encroachment in future by a structure on any kind is assured either by law or by contract or by the fact that the ground below it is a street or is permanently

and irrevocably appropriated as an open space.

Provided that, in determining the open air space required in connection with construction work on a building, any space occupied by an existing structure may if it is ultimately to become a permanently open air space, be treated as if it were already a permanently open space.

- 2.63 Permit :- A permission or authorization in writing by the Authority i.e. Nagpur Improvement Trust or Nagpur Municipal Corporation to carry out the work regulated by the regulations.
- 2.64 Plinth :- The portion of a structure between the surface of the surrounding ground and surface of the floor and immediately above the ground.
- 2.65 Plinth area:- Built - up covered area measured at the floor level or basement or of any storey, whichever is higher.
- 2.65.1 A plot:- A parcel or piece of land enclosed by definite boundaries.
- 2.66 Porch :- A covered surface supported on pillars or otherwise for the purpose of pedestrian or vehicular approach to a building.
- 2.67 Road / Street :- Any highway, street, lane, pathway, alley, stairway, passageway, carriageway, footway, square place or bridge, whether a thoroughfare or not, over which the public have a right of passage or access or have passed and had access uninterruptedly for a specified period, whether existing or proposed in any scheme, and includes all bunds, channels, ditches, storm-water drains, culverts, sidewalks, traffic islands, roadside trees and hedges, retaining walls, fences, barriers and railings within the street lines.
- 2.68 Road / Street Level or Grade :- The officially established elevation or grade of the central line of the street upon which a plot fronts and if there is no officially established grade, the existing grade of the street at its mid point.
- 2.69 Road / Street Line :- The line defining the side limit of a road / street.
- 2.70 Room Height :- The vertical distance measured from the finished floor surface to the finished ceiling/ slab surface. In case to pitched roofs, the room height shall be the average height between bottom of the eaves and bottom or ridge.
- 2.71 Row Housing :- A row of houses with only front, rear and interior open spaces.
- 2.72 Semi Detached Building :- A building detached on three sides with open spaces as specified.
- 2.73 Service Road :- A road/ lane provided at the front / rear or side of a plot for service purposes.
- 2.74 Site :- A parcel / piece of land enclosed by definite boundaries.
- 2.75 Site corner :- The side at the junctions of and fronting on two or more intersecting streets.
- 2.76 Site, Depth of :- The mean horizontal distance between the front and rear wide boundaries.
- 2.77 Site, Double Frontage :- A site, having a frontage on two streets other than a corner plot.
- 2.78 Site, Interior or Tandem :- A site, access to which is by a passage from a street whether such passage form part of the site or not.
- 2.79 Smoke, Stop Door :- A door for preventing or checking the spread of smoke from one area to another.
- 2.80 Stair Cover :- A structure with a covering roof over a stair case and its landing built to enclose only the stair for the purpose of providing protection from weather and not used for human habitation.
- 2.81 Storage :- A place where goods are stored.
- 2.82 Store Room :- *A room used as storage space.*

- 2.83 Storey :- The portion of a building included between the surface of any floor and the surface of the floor next above it, or if there be no floor above it, then the space between any floor and the ceiling next above it.
- 2.84 Tenement :- An independent dwelling unit with a kitchen or cooking alcove.
- 2.85 To Abut :- To abut on a road such that any portion of the building is fronting on the, road.
- 2.86 To Erect :- To erect a building means
- (a) To erect a new building on any site whether previously built upon or not;
 - (b) To re-erect any building of which portions above the plinth level have been pulled down, burnt or destroyed; and
 - (c) Conversion from one occupancy to another and sub - division of occupancy into more than one.
- 2.87 Travel Distance :- The distance from the remotest point on a floor of a building to a place of safety, be it a vertical exit, horizontal exit or an outside exit measured along the line of travel.
- 2.88 Tower like structure :- A structure in which the height of the tower like portion is at least twice the width of the broader base.
- 2.89 Unsafe Building :- Unsafe buildings are those which are structurally unsafe, insanitary or not provided with adequate means of egress or which constitute a fire hazard or are otherwise dangerous to human life or which in relation to existing use constitute a hazard to safety or health or public welfare, by reason of inadequate maintenance, dilapidation or abandonment.
- 2.90 Volume to plot Ratio (VPR) :- The ratio of volume of building measured in cubic meters to the area of plot measured in square meters and expressed in meters.
- 2.91 Water Closet (WC) :- A privy with arrangement for flushing the pan with water. It does not include a bathroom.
- 2.92 Water Course :- A natural channel or an artificial one formed by draining or diversion of a natural channel meant for carrying storm and waste water.
- 2.92.1 Major Water Course :- A water course which carries storm water discharging from a contributing area of not less than 160 Ha.
- Note :- The decision of the Authority as regards the calculation of the contributing area shall be final.
- 2.92.2 Minor Water Course :- A water course which is not a major one.
- 2.93 Width of Road :- The whole extent of space within the boundaries of road when applied to a new road, as laid down in the city surveys map or development plan or prescribed road lines by any Act or Law and measure at right angles to the course or intended course of direction of such road.
- 2.94 Window :- An opening to the outside other than the door which provides all or part of the required natural light, ventilation or both, to the interior space.
- 2.95 Stilts or stilt floor :- Stilts or stilts floor means ground level portion of a building consisting of structural column supporting the super structure done without any enclosures and not more than 2.5 mts. in the height from ground level for the purpose of parking vehicles, scooters, cycles, etc.
- 2.96 Group Housing :- group housing means a building constructed or to be constructed with one or more floors, each floor consisting of one or more dwelling units and having common service facilities. Common service facilities mean facilities like stair case, balcony and varandah, lift, etc.
- 2.97 Information Technology Establishment (ITE) :- means an establishment which is in the business

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

of developing either software or hardware relating to computers or computer technology.

- * 2.98 Heritage buildings / precincts :- This will include all such buildings / precincts as notified by the Govt. from time to time.
- * 2.99 Congested Area :- Relates to the congested area as shown on development plan.

3. APPLICABILITY OF REGULATIONS.

- 3.1 In addition to the provisions contained in the Maharashtra Regional & Town Planning Act, 1966, Nagpur Improvement Trust Act, 1936, the City of Nagpur Corporation Act, 1948 and Maharashtra Apartment Act. 1963 as amended from time to time these regulations shall apply to the building regulation activities given under 3.2.
- 3.2.0 These regulations shall apply to all "development". Further these regulations shall apply to development work defined in Regulation No. 3.2.1 to 3.2.5.
- 3.2.1 Where a building is erected, these Regulations apply to the design and construction of the building.
- 3.2.2 Part Construction :- Where the whole or part of a building is demolished or altered or reconstructed, removed, except where otherwise specifically stipulated, these Regulations apply only to the extent of the work involved.
- 3.2.3 Change of Occupancy :- Where the occupancy of a building is changed, except where otherwise specifically stipulated, these Regulations shall apply to all parts of the building affected by the change.
- 3.2.4 Reconstruction :- The reconstruction in whole or part of a building which has ceased to exist due to an accidental fire, natural collapse or demolition, having been declared unsafe, or which is likely to be demolished by or under an order of the Corporation or the Nagpur Improvement Trust or the Nagpur Housing and Area Development Board and for which the necessary certificate has been given by either the said Corporation or Trust or the Board shall be allowed subject to the Regulations mentioned in N - 2.9 (4).
- 3.2.5 Exclusions.- Nothing in this Regulations shall require the removal, alteration or abandonment or prevent the continuance of the lawfully established use or occupancy of an existing building or its use unless, in the opinion of the Chairman / Commissioner, such a building is unsafe or constitutes a hazard to the safety of adjacent property.

4. INTERPRETATION

- 4.1 In the regulations, the use of present tense includes the future tense, the masculine gender include the feminine and the neutral, the singular number includes the plural and the plural includes the singular. The word person includes a corporation, writing includes printing and typing and "signature" includes thumb impression made by a person who cannot write if his name is written near to such thumb impression.
- 4.2 Whenever sizes and dimensions of rooms and spaces within buildings are specified, they shall mean clear dimensions unless otherwise specified in these regulations.

5. BUILDING PERMIT AND COMMENCEMENT CERTIFICATE REQUIRED.

- 5.1 No person shall carry out any development, erect, re-erect or make alterations or demolish any building or cause the same to be done without first obtaining a separate building permit and commencement certificate for each such development work / building from the authority.
- 5.1.1 The following operational construction of the Government, whether temporary or permanent which is necessary for the operation, maintenance, development or execution of any of following services may be exempted from the provisions of these regulations
 - (i) Railways;

- (ii) National Highways;
- (iii) National waterways;
- (iv) Airways and Aerodromes ;
- (v) Posts and Telegraphs, telephones, wireless, broadcasting and other like forms of communication;
- (vi) Regional grid for electricity, and
- (vii) Any other service which the State Government may, if it is of opinion that the operation maintenance development of execution of such service is essential to the life of the community, by notification, declare to be a service for the purpose of this clause.

5.1.1.1 However the following constructions of the Government Departments do not come under the preview of operational construction for the purpose of exemption under regulation No. 5.1.1 -

- (i) New residential building, roads and drains in railway colonies, hospitals, clubs, institute and school, in the case of railways ; and
- (ii) A new building, new construction or new installation or any extension thereof, in the case of any other services.

5.1.1.2 In the context of regulations No. 5.1.1. (i) and 5.1.1.1 (i) for the purpose of deciding what constitute Operational Construction the following may be used as the basis

- (i) Repaire, renovation etc, to the following works in the existing installations, buildings etc. of the Railways.
 - (a) All Railways tracks in and outside the yards including the formation, culverts, bridges, tunnels and side drains.,
 - (b) Building; Platforms, foot over bridges, subways, sheds over platforms, yard, master's and train dispatcher's offices, weight bridges; turn -tables, lifting-towers, gantries.
 - (c) Running (Loco) sheds, carriage and wagon deposits, carriage washing arrangement, running rooms, train Examiner's office and depots in the yards, permanent way inspectors and Signal Inspectors ,stores in the yards, water tanks overhead and ground level, pipe lines and pumping stations.
 - (d) Goods sheds, parcel offices, goods platforms.
 - (e) Store sheds, sub - stations.
 - (f) Signals, signal cabins, control cabins in humping yards.
- (ii) Fencing or walling for protection of railway lines and yards.
- (iii) All over head electric equipment for electric traction.

Note- 1.- In the case of new railway lines, the Railway Administration should make a reference to the state Government for their views which will be given due consideration by the Railway Administration, before finalising the project. '

Note- 2.- For the construction of new station building, goods sheds, parcel offices, goods platforms and workshops or their major remodeling, as distinct from repairs, renovations etc., referred to under item (i) (a) to (f) above, reference to the Appropriate Authority will be necessary.

* 5.2 This rule is deleted.

6.0 PROCEDURE FOR OBTAINING BUILDING PERMIT AND COMMENCEMENT CERTIFICATE.

6.1 Notice :- Every person who intends to carry out development and erect, re-erect or make

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001 .

alterations in any place in a building or demolish any building, shall give notice in writing to the Authority of his said intension in the prescribed form (See Appendix 'A') and such notice shall be accompanied by the required building permit fee and the plans and statements in sufficient (See Regulation No. 6.1.1) copies, as required under 6.2 and 6.3. The plans may be ordinary prints on ferro paper or any other type (prints only), one set of plans shall be retained in the office of the Authority for record after the issue or permit of a refusal.

* 6.1.1 Copies of Plans and Statements :- Four copies or plans and statement shall be made available along with the notice. In case of building schemes, where the clearance is required from other agencies like Nagpur Fire Service (See Regulation No. 6.2.6.1) and other, number of copies of plans required shall be as decided by the Authority.

6.2 Information Accompanying Notice :- The Notice shall be accompanied by the key (location plan), site plan, sub-division layout plan, building plan, services plans, specification and Certificate of supervision and ownership title as prescribed in 6.2.1 to 6.2.13.

6.2.1 Size of Drawing Sheets and colouring of plans.

6.2.1.1 The size of drawing sheets shall be any of those specified in Table 1.

TABLE 1

DRAWING SHEET SIZES

Sr. No.	Designation	Trimmed Size, mm
(1)	(2)	(3)
1	AO	841 x 1189
2	A1	594 x 841
3	A2	420 x 594
4	A3	297 x 420
5	A4	210 x 297
6	A5	148 x 210

6.2.1.2 Colouring Notations for Plans :- The Plans shall be coloured as specified in Table 2, further prints of plans shall be on one side of paper only.

6.2.1.3 Dimensions :- All dimensions shall be indicated in metric units.

TABLE-2

COLOURING OF PLANS

Sr. No.	Item	Site Plan			Building Plan		
		White Plan	Blue Print	Ammonia Print	White Plan	Blue Print	Ammonia Print
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	Plot lines	Thick Black	Thick Black	Thick Black	Thick Black	Thick Black	Thick Black
2.	Existing Street	Green	Green	Green
3.	Future street if any	Green dotted	Green dotted	Green dotted
4.	Permissible Building	Thick dotted Black	Thick dotted Black	Thick dotted Black

Continued Table 2.

12.	Recreation Ground	Green wash	Green wash	Green wash	Green wash	Green wash	Green wash

Note:-For land development / sub- division / layout, suitable colouring notations shall be used which shall be indexed.

6.2.2 Ownership title and area :- Every, application for development permission and commencement certificate shall be accompanied by the following document for verifying the ownership and area etc. of the land.

- attested copy of original sale / lease - deed / power of attorney / enabling ownership document where applicable.
- 7-12 extracts of property register card of a date not earlier than twelve months of the date of submission of the development proposal;
- Statement of area, of the holding by triangulation method from the qualified licensed technical personnel or architect with an affidavit from the owner in regard to the area in the form prescribed by the Commissioner/ Chairman.
- Any other document prescribed by the Commissioner/ Chairman.

In the case of land leased by the Government or local authorities, clearance of Government or such authorities regarding observance of the lease conditions shall be obtained and attached to the application for development permission in respect, of such land.

6.2.3 Key plan or location plan :- A key plan drawn to a scale of not less than 1:10,000 shall be submitted along with the application for a building permit and Commencement certificate showing the boundary locations of the site with respect to neighbourhood land marks.

6.2.4 Site Plan :- The site plan sent with an application for permission drawn to a scale of 1:500 shall be duly authenticated by the appropriate Officer of the Department of Land Records showing in addition the following details :-

- The boundaries of the site and of any contiguous land belonging to the owner of the site ;

- (b) the position of the site in relation to neighbouring streets ;
- (c) The name of, the streets on which the building is proposed to be-situated, if any;
- (d) All existing buildings contained in the site with their names (where the buildings are given names) and their numbers;
- (e) The position of the building and of other buildings, if any, which the applicant intends to erect, upon his contiguous land referred to in (a) above in relation to;
 - (i) The boundaries of the site and, in a case where the site has been partitioned, the boundaries of the portions owned by others;
 - (ii) All adjacent streets, buildings (with number of storeys and height) and premises within a distance of 12 m. of the work site and of the contiguous land (if any) referred to in (a), and
 - (iii) If there is no street within a distance of 12m. of the site, the nearest existing street with its name;
- (f) The means of access from the street to the building and to all others buildings (if any) which the applicant intends to erect upon his contiguous land referred to in (a) ; above.
- * (g) The space to be left around the building to secure free circulations of air, admission of light and access for scavenging purposes ;
- (h) The width of the street (if any) in front and of the street (if any) at the side of near the building;
- (i) The direction of the north line relative to the plan of the building ;
- (j) Any existing physical features, such as wells, tanks, drains or trees;
- (k) The ground area of the whole property and the break-up of the covered area on each floor with the calculations for percentage covered in each floor in terms of the total area of the plot as required by the Regulations governing the coverage of the area;
- (l) Overhead electric supply' lines including space for electrical transforming substation according to the requirements of the electric distribution licences, water supply and drainage line;
- (m) Such other particulars as may be prescribed by the Commissioner/ Chairman.

6.2.5 Sub - Division/ Layout plan :- In the case of development work, the notice shall be accompanied by the sub -division/ layout plan which shall be drawn on a scale of not less than 1 :500, however, for layout having areas 4.0 ha. and above the plan shall be drawn at a scale of not less than 1:1000, containing the following:

- (a) Scale used and North point;
- (b) The location of all proposed and existing roads with their existing / proposed / prescribed widths within the land;
- (c) Dimension of plot along with building lines showing the set backs with dimensions within each plot;
- (d) The location of drains of sewers, public facilities and services and electrical lines etc.
- (e) Table indicating size, area, and use of all the plot in the sub-division layout plan;
- (f) The statement indicating the total area of the site, area utilized under roads, open spaces for parks, play ground, recreation spaces and development plan reservation, schools,

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

shopping and other public places along with their percentage with reference to the total area of the site proposed to be sub-divided

- (g) In case of plots which are sub-divided in built-up areas in addition to the above, the means of access to the sub-division from existing streets.

6.2.6. Building Plan :- The plans of the buildings with elevations and sections accompanying the notice shall be drawn to a scale of 1:100. and shall

- (a) include floor plans of all floors together with the covered area clearly indicating the sizes of rooms and the position and width of staircases, ramps and other exit ways, lift-wells, lift machine room and lift pit details. It shall also include ground floor plan as well as basement plans and shall indicate the details of parking space, loading and unloading spaces provided around and within building as also the access ways and the appurtenant open spaces with projections in dotted lines, distance from any building existing on the plot in figured dimensions along with accessory building.
- (b) show the use or occupancy of all parts of the buildings;
- (c) show exact location of essential services, for example, WC, sink, bath and the like;
- (d) Include sectional drawings of the building showing all sectional details.
- (e) show all street elevations;
- (f) give dimensions of the projected portions beyond the permissible building line,
- (g) Include terrace plan indicating the drainage and the slopes of the roof;
- (h) give indications of the north point relative to the plans; and
- (i) give dimensions and details of doors, windows and ventilators; .

* (j) This provision is deleted.

6.2.6.1 Building Plans for Multistoreyed Special Buildings.- For multistoreyed buildings which are more than 15m. height and for special buildings like educational, assembly, mercantile, institutional, industrial, storage and hazardous and mixed occupancies with any of the aforesaid occupancies having area more than 150 sq. m., the following additional information shall be furnished/indicated in the Building Plans in addition to the items (a) to (i) of regulation No. 6.2.6.

- (a) access to fire appliances/vehicles with details of vehicular turning circle and clear motorable access way around the building;
- (b) size (width) of main and alternate staircases along with balcony approach, corridor ventilated lobby approach;
- (c) location and details of lift enclosures;.
- (d) location and size of fire lift;
- (e) smoke stop lobby/door, where provided;
- (f) refuse chutes, refuse chamber, service duct, etc.;
- (g) vehicular parking spaces;
- (h) refuse area, if any;
- (j) Details of Building Services :- Air-conditioning system with position of fire dampers, mechanical ventilation system electrical services, boilers, gas pipes etc.,
- (k) details of exits including provision of ramps, etc. for hospitals and buildings requiring special

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- fire protection measures,
- (m) location of generator, transformer, and switch gear room;
 - (n) smoke exhauster system, if any;
 - (p) details of fire alarm system net work;
 - (q) location of centralized control, connecting all fire alarm system, built in fire protection arrangements and public address system etc.
 - (r) location and dimensions of static water storage tank and pump room along with fire service inlets for mobile pump and water storage tank;
 - (s) location and details of fixed fire protection installations such as sprinklers, wet risers; house reels, drenchers, CO2 installation etc.; and
 - (t) location and details of first aid, fire fighting equipments / installations.
- 6.2.7. Service Plan:- Plans, elevations and sections of private water supply, sewage disposal system and details of building services, where required by the Authority, shall be made available on a scale not less than 1 :100 and for layouts 1 :1000:
- 6.2.8. Specifications - General specification of the proposed constructions, giving type and grade of materials to be used in the form given in Appendix A, duly signed by licensed Architect as the case may be shall accompany the notice.
- 6.2.9. Supervision - The notice shall be further accompanied by a certificate of supervision in the prescribed form given in Appendix B, by the licensed Architect/ Engineer/ Structural Engineer as the case may be. In the event of the said licensed technical personnel ceasing to be employed for the development work, the further development work shall stand suspended till a new licensed technical person is appointed and his certificate of supervision along with a certificate for the previous work (either from the previous technical personnel or news).
- 6.2.10. Building Permit Fee :- The notice shall be accompanied by an attested copy of Receipt of payment of Building Permit Application Fee. The building permit fee and layout /subdivision of Land fees shall be as decided by the Corporation / NIT from time to time uniformly.
- 6.2.11. Security Deposit Fee:- For ensuring the faithful compliance of Regulations and the directions given in the sanctioned plan and other terms and conditions, a security fee shall be charged at rates as specified by the Authority. The same shall be returned to the owner after the issue of the full occupancy certificate for the building by the Authority.
- 6.2.12 No Objection Certificate.- In the case of certain occupancies requiring clearance from the authorities like Civil Aviation Authorities, Railways, Directorate of Industries, Maharashtra Prevention of Pollution Board, District Magistrate, Inspectorate of Boilers and Smoke Nuisance etc., the relevant no objection certificates from these authorities, applicable to the occupancy, shall also accompany the application.
- * 6.2.13. Tax receipt for tax clearance - The notice shall also be accompanied by the attested copy of a tax receipt from the Assessment Department of the corporation / NIT for payment of Tax upto date:
- * 6.3. Signing the Plan - All the plans shall be duly signed by the owner and the Architect or licensed Engineer / Structural Engineer / Supervisor and shall indicate his name, address and licence number allotted by the Authority.
- * 6.4. Qualification and Competence of the Architect / Licensed Engineer / Structural Engineer/ Supervisor:- Architect/ Engineer/Structural Engineer Supervisor referred an under 6.3 shall be registered / licensed by the authority as competent to give various works as given in Appendix "C" . The qualification and procedure for

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

registration and licensing of the Engineer I structural engineer I supervisor shall be as given in Appendix- "C".

6.5 Delegation of and discretionary Powers.—

6.5.1 Delegations of Powers- Any of the powers, duties or functions conferred or imposed upon or vested in the Chairman/Commissioner by any of these regulation may be exercised, performed or discharged under the Authority Control and subject to his revision and to such conditions and limitations, if any as he shall think fit to prescribe, by any officer whom the' Authority generally or specially empowers in writing in this behalf and in each of the said regulations the word Chairman/Commissioner shall to the extent to which any officer is so empowered, be deemed to include such officer.

6.5.2 Discretionary Powers.

6.5.2.1 In conformity with the intent and spirit of these regulations the Commissioner / Chairman may :-

- (i) decide on matters where it is alleged that there is an error in any order, requirement decision, determination or interpretations made by him in the application of these Regulations
- (ii) determine and establish the location of zonal boundaries in exceptional cases, or in cases of doubt or controversy;
- (iii) interpret the provisions of these regulations where the streets layout actually on the ground varies from the street layout as shown on the Development Plan;
- (iv) With prior approval of Government modify the limit of a zone where the boundary line of the zone divides a plot; and
- (v) authorise the erection of building or use of premisses for a public service undertaking for public utility purposes only, where he finds such an authorisation to be reasonable, necessary for the public convenience and welfare even if it is not permitted in any Land Use Classification.

* 6.5.2:2 Temporary Constructions - The commissioner/Chairman may grant permission for temporary construction for period not exceeding six months at a time & in the aggregate not exceeding for a period of three years, such a permission may be given by him for the construction of the following, namely:-

- (i) Structures for protection from the rain or covering of the terraces during the monsoon only.
- (ii) Pandals for fairs, ceremonies, religious function, etc.;
- (iii) Structures for godowns/storage of construction materials within the site;
- (iv) Temporary site offices and watchman chowkies within the site only during the phase of construction of the main building.
- (v) Structures of exhibitions/ circuses etc.;
- (vi) Structures for storage of machinery, before installation, for factories in industrial lands within the site.
- (vii) Structures for ancillary works for quarrying operations in conforming zones;
- (viii) MAFCO stalls, milk booths and telephone booths;
- (ix) Transit accommodation for persons to be rehabilitated in a new construction;
- (x) Structures for educational and medical facilities within the site of the proposed building during the phase of planning and constructing the said permanent buildings;

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

Provided that, temporary constructions for structures etc. mentioned at (iii), (iv), (vi), (ix) and (x) may be permitted to be continued temporarily by the Commissioner / Chairman but in any case not beyond completion of construction of the main structure or building and that structure in (vii) may be continued on annual renewals basis by Commissioner / Chairman beyond a period of three years.

* Provided further that for the structure accommodating more than 50 persons, no objection certificate from the Chief Fire Officer, Nagpur Fire Brigade shall be obtained prior to issuing permission.

6.5.2.3 In specific cases, where a clearly demonstrable hardship is caused, the Commissioner / Chairman may by special written permission

(i) Permit any of the dimensions / provision prescribed by these regulations to be modified provided the relaxation sought does not violate the health, safety; fire safety, structural safety and public safety of the inhabitants the buildings and the neighbourhood. However, no relaxation from the setback required from the road boundary or F.S.I. or parking requirement shall be granted under any circumstances. While granting permission under, (i) conditions may be imposed on size, cost or duration of the structure, abrogation of claim of compensation, payment of deposit and its forfeiture for noncompliance and payment of premium.

6.6 GRANT OF PERMIT OR REFUSAL.

6.6.1 The Authority may either sanction or refuse the plans and specifications or may sanction them with such modifications or directions as it may deem necessary after having recovered the development charges as per sections 124 (A) and 124 (B) of M.R. & T.P. Act, 1966 and there upon shall communicate its decision to the person giving the notice in the prescribed form given in Appendix D and E.'

6.6.2 The building plans for buildings identified in regulation No. 6.2.6.1 shall also be subject to the scrutiny of the Chief Fire Officer, Nagpur Fire Brigade and the sanction through building permit shall be given by the Authority after the clearance from the Chief Fire Officer.

6.6.3 If within sixty (60), days of the receipt of the notice, along with necessary fees/deposit under 6.2.10 of the regulations, the Authority fails to intimate in writing to the persons, who has given the notice. Of its refusal or sanction or sanction with such modification or directions, the notice with its plans and statements shall be deemed to have been sanctioned, provided nothing shall be construed to authorise any person to do anything on the site of the work in contravention or against the terms of lease or titles of the land.

Provided further that, the development proposal, for which the permission was applied for, is strictly in conformity with the requirements of all the relevant Development Control Regulations framed under the Act or bylaws or have regulations framed in this behalf under any law for the time being in force and the same in no way violates either provisions of any draft or final plan or proposals published by means of notice, submitted for sanction under the Acts.

Provided further that any development carried out in pursuance of such deemed permission which in contravention of the provisions of the above provision, shall be deemed to be an unauthorised development for purposes of sections. 52 to 57 of M. R. & T. P. Act, 1966 and other relevant Act.

6.6.4 Once the plan has been scrutinised and objections have been pointed out, the owner giving notice shall modify the plan, comply with the objections raised and resubmit it, The prints of plans submitted for final approval, shall not contain super imposed corrections. The authority shall grant or refuse the commencement certificate / building permit within 60 days from the date of resubmission. No new objections may generally be raised when they are resubmitted after compliance of earlier objections.

6.7. Commencement of work- A commencement certificate/development permission shall remain valid for 4 years in the aggregate but shall have to be-renewed every one year from the date of its issue. The application for renewal shall be made before expiry of one year if the work is not already commenced. Such renewal can be done for three consecutive terms of one year after which

proposals shall have to be submitted to obtain development permission afresh. If application for renewal is made after expiry of the stipulated period during which commencement certificate is valid, then the Commissioner/ Chairman may condone the delay for submission of application for renewal by charging necessary fees. ' But in any case, commencement certificate shall not be renewed for a period of more than 4 years from the date of commencement certificate/ development permission.

For the purpose of this regulation, " Commencement" shall mean as under:-

- | | |
|--|---|
| (a) For a building work including additions and alterations. | Upto plinth level. |
| (b) For bridges and overhead tanks | Foundation and construction work upto the base floor. |
| (c) For underground works. | Foundation and construction work upto floor of under ground floor |
| (d) For layout, sub-division and amalgamation proposals. | Final demarcation and provision of infrastructure services upto the following stages-
(i) Roads-Water bound macadam complete.
(ii) Sewerage, drainage and water supply excavation and base concreting complete. |

* 7. PROCEDURE DURING CONSTRUCTION.

- * 7.1. Owner liability :- Neither the grant of permission nor approval of the drawing and specifications nor inspections by the Commissioner/Chairman during erection of the building, shall in any way relieve the owner of such building from full responsibility for carrying out the work in accordance with these Regulations.
- * 7.2. Notice For start of work :- The owner shall give notice to the Commissioner / Chairman of his intention to start work on the building site in the form given in Appendix ' F ' The owner may start the work after 7 days lapsed from the date of the service such notice to the Commissioner / Chairman or earlier, if so permitted.
- *7.3. Documents at site - (i) Results of tests-where tests of any material are made to ensure conformity with the requirements of these Regulations, records of the test data shall be kept available for inspection during the construction of the building and for such period thereafter as required by Commissioner / Chairman.
- (ii) Development Permission :-The person to whom a development permission is issued shall during construction, keep -
- (a) Posted in a conspicuous place on the site for which permission has been issued, copy of a development permission; and
- (b) A copy of the approved drawings and specifications referred to in Regulation 6 on the site for which the permit was issued.
- * 7.4. Checking of plinth, columns upto plinth level -The owner through his licensed surveyor, engineer, structural engineer or supervisor or his architect shall give notice in the form of Appendix ' G ' to the Commissioner/ Chairman on completion of work upto plinth level to enable the Commissioner/Chairman insure that the work conforms to the sanctioned plans. The Commissioner / Chairman may inspect the work jointly with the licensed technical personal or architect within fifteen days from the receipt of such notice and either give or refuse permission for further construction as per the sanctioned plans in the form in Appendix ' H '. If within this period, the permission is not refused it shall be deemed to have been given provided the work is carried out according to the sanctioned plans.
- *7.5. Deviation during constructions :- If during construction of a building any departure of a substantial nature from the sanctioned plans is intended by way of internal or external additions, sanction of the Commissioner / Chairman shall be necessary. A revised plan showing the deviation shall be submitted and the procedure laid down for the original plans shall apply to all such amended plans. Any work done in contravention of the sanctioned plans, without prior approval of the Commissioner / Chairman shall be deemed

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

as unauthorised.

- *7.6. Completion certificate:- The owner through his licensed surveyor / engineer / structural engineer / supervisor or his architect who has supervised the construction, shall furnish a building completion certificate to the Commissioner / Chairman in the form in Appendix 'J'. This certificate shall be accompanied by three sets of plans of the completed development, one of which shall be cloth mounted for office record.
- *7.7 Occupancy certificate :- The Commissioner / Chairman after inspection of the work and after satisfying himself that there is no deviation from the sanctioned plans, issue in occupancy certificate in the form in Appendix ` K ` or refuse to sanction the occupancy certificate within 21 days from the date of receipt of the said completion certificate, failing which the work shall be deemed to have been approved for occupation provided the construction conforms to the sanctioned plans. One set of plans, certified by the Commissioner / Chairman, shall be returned to the owner along with the occupancy certificate. Where the occupancy certificate is refused or rejected, the reasons for refusal or rejection shall be given in intimation of the rejection or the refusal:
- *7.8 Part occupancy certificate - When requested by the holder of the development permission, the Commissioner/Chairman may issue a part occupancy certificate for a building or part thereof, before completion of the entire work, as per development permission, provided sufficient precautionary measures are taken by the holder to ensure public safety and health. The occupancy certificate shall be subject to the owners indemnifying the Commissioner/ Chairman in the form of Appendix `L',:

8. INSPECTION.

- 8.1 The Authority shall have the power to carry out inspection of the work under the provisions of the Act, at various stages to ascertain whether the work is proceeding as per the provision of regulations and sanctioned plan.

9. UNSAFE BUILDINGS.

*All unsafe building shall be considered to constitute danger to public safety and hygiene and sanitation and shall be restored by repairs, demolition or deal with as otherwise directed by the Authority. The relevant provisions of the Rule No. N.2.9 (4) of D.C.R. shall apply for procedure of actions to be taken by the Authority for unsafe buildings.

10. OFFENCES AND PENALTIES

- 10.1. Offences and penalties :-Any person who contravene any of the provisions of these regulations any requirements or obligations imposed on him by virtue of these regulations including the maintenance of fire protection services and appliances and lifts in working order or who interferes with or obstructs any person in the discharge of his duties shall be guilty of an offence and upon conviction shall ;
 - (a) be punished by a fine as fixed by the Authority and as stipulated in the Section 52 of Maharashtra Regional and Town Planning Act, 1966 and relevant section of Corporation Act / NIT Act ;
 - (b) further the Authority may take suitable actions including demolition of unauthorised works as decided by the Authority as stipulated under Section 53 of Maharashtra Regional and Town Planning Act, 1966 and relevant sections of Nagpur Corporation Act/NIT Act-,
 - * (c) In case of Licensed Engineer / Structural Engineer / Supervisor, the planning Authority may take suitable action against licensed Engineer/ Structural Engineer / Supervisor which may include cancellation of licence and debarring him from further practice for a period extending upto 5 years.
 - * (d) To case of registered architects, the planning authority may take suitable action against the Registered Architect as per the provisions of Architect Act, 1972 as and when reported by the authority.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

PART II GENERAL BUILDING REQUIREMENTS

11. REQUIREMENTS OF SITES.

11.1. No piece of land shall be used as a site for the construction of building ;

- (a) If the Authority considers that the site is insanitary or that it is dangerous to construct a building on it;
- (b) If the site is within a distance of 9 m. from the edge of water mark of a minor course and 15 m. from the edge of water mark of a major water course. Provided that where a water course passes through a low lying land without any well defined banks, the owner of the property may be permitted by the Authority to restrict or divert the water course to an alignment and cross section as determined by the Authority ;
- (c) If the site is not drained properly or is incapable of being well drained ;
- (d) If the owner of the building has not shown to the satisfaction of the Authority all the measures required to safeguard the construction from constantly getting damp;
- (e) If the building is for assembly uses, for cinemas and theatres as well as for public worship which has not been previously approved by the Authority ;
- (f) If the building is proposed on any area filled up with carcasses, excreta; filthily and offensive matter till the production of certificate from the Authority to the effect that it is safe from the health and sanitary point of view, to be built upon;
- (g) If the use of the said site is for the purpose, which in the opinion of the Authority will be a source of annoyance to the health and comfort of the inhabitants of the neighbourhood;
- (h) If the plot has not been approved as a building site by the Authority.
- (i) If the proposed occupancy of the building on the site dose not conform to the land use proposals in the development plans or Zoning Regulations, and
- (j) If the level of the site is less than prescribed datum level depending on topography and drainage aspects.

11.2 Distance of site from Electric Lines:- No varandah, balcony or the like shall be allowed to be erected or re-erected or any additions or alterations made to a building on a site within the distance quoted in Table No. 3 below in accordance with the prevailing Indian Electricity Rules and its amendments from time to time between the building and any overhead electric supply line.

TABLE No. 3

	Vertically	Horizontally
(1)	m. (2)	m (3)
(a) Low and medium voltage Lines and Service Lines.	2.5	1.2
(b) High voltage lines up to and including 33,000 V.	3.7	2.0
(c) Extra High voltage beyond 33,000 V.	3.7 (Plus 0.3 m. for every additional 33,000 V. or part thereof)	2.0 (Plus 0.3m. for every additional 33,000 V. or part thereof)

12. MEANS OF ACCESS

- 12.1 Every building, existing or proposed, shall have means of access as required in these regulation.
- 12.2 Every person who erects a building shall not at any time erect or cause or permit to erect or re-erect any building which in any way encroaches upon or diminishes the area set apart as means of access.
- 12.3 Width of Means of Access:-The plots shall abut on a public means of access like street / road. Plots which do not abut on a street shall abut /front on a means of access, the width and other requirement of which shall be as given in Table 4

TABLE 4**MEANS OF ACCESS**

Sr. No.	Width of Means of Access in	Length of Means of Access in
	m	m.
(i)	6.0	75
(ii)	7.5	150
(iii)	9.0	300
(iv)	12.0	Above 300

NOTE -1. The means of access shall be clear of marginal open spaces of at least 3 m. from the existing building line

In no case, development on plots shall be permitted unless it is accessible by the public street of width not less than 6 m. Provided further that for all industrial buildings, theatres, cinema houses, assembly halls, stadia, educational building, markets, other buildings which attract large crowd, the means of access shall not be less than 12 m. serving upto a length of 200 m, and for length higher than 200 m., the width shall not be less than 15 m. Further in no case shall the means of access be lesser in width than the internal access ways in layout and sub-division.

- 12.3.1 **Pathways :-** The approach to the buildings from road / street / internal means of access shall be through paved pathway of width not less than 1.5 m. provided its length is not more than 20 m. from the main / internal means of access.
- 12.3.2 The length of means of access shall be determined by the distance from the further plot (building) to the public street. The length of the subsidiary access way shall be measured from the point of its origin to the next wider road on which it meets.
- 12.3.3 In the interest of general development of an area, the Authority may require the mean of access to be of larger width than that required under Regulation No. 12.3.
- 12.3.4 In case where a private passage is unrestrictedly used by public for more than 10 years as a means of access of width not less than 9 m. to a numbers of plots, the Authority may take steps including improvement under, the provision of relevant Act to declare it as a public street.
- 12.3.5 Not with standing the above, in partially built up plots, if the area still to be built upon does not exceed. 5000 sq. m. an access of 3.6 m. width and even if it is built over a width of not less than 4.5 m. may be considered as adequate means of access. If such access is at least 3 m. in width it shall be considered as adequate means of access for areas to be built upon not exceeding 5000 sq. m. provided such area is used for low Income Group Housing and the Built- up/F.S.I. permissible would be 75 per cent of the Built-up Area / F.S.I. permissible in that zone.

- 12.3.6 In congested areas in the case of plots facing street / means of access less than 4.5 m. in width the plot boundary shall be shifted to be away by 2.25 m. from the central line of the street/ means of access way to give, rise to a new street / means of access way width of 4.5 m.
- 12.4. Means of access shall be levelled, metalled, flagged, paved, sewerred, drained, channelled, lighted, laid with water supply line and provided with trees for shade to the satisfaction of the Authority, free of encroachment by any structure or fixture so as not to reduce its width below the minimum. required under regulation No. 12.3 and shall be maintained in a condition to the satisfaction of the Authority.
- 12.4.1. If any private street or any other means of access to a building be not levelled, metalled, flagged or paved, severed, drained, channeled, lighted or laid with water supply line or provided with trees for shade to the satisfaction of the Authority, he may, with the sanction of the NMC/ NIT by written notice require the owner or owners of the several premises fronting or adjoining the said street or other means of access or abutting thereon or to which access is obtained through such street or other means of access or which shall benefit by works executed to carry out any or more of the aforesaid requirements in such manner as directed.
- 12.4.2. If any structure of fixture is set upon a means of access so as to reduce its width below the minimum required, the Authority may remove the same further and recover the expenses so incurred from the owner.
- * 12.5. Access from the Highways/ important roads :- No premises other than highway amenities like petrol pump, hotel etc. shall have an access direct from highways and such other roads having a width of 30 mts. or more. The above will be subject to the provisions of State Highways Act, 1965 and National Highway Act 1956.
- Provided that in suitable cases, the planning authority may suspend the operation of this rule till serve roads are provided.
- 12.6. For building identified in regulation No. 6.2.6.1, the following additional provisions of means of access shall be ensured;
- (a) The width of the main street on which the building abuts shall not be less than 12 m. and one end of this street shall join another street of width not less than 12 m. in width.
- (b) The approach to the building and open spaces on its all sides (see regulation No. 15.1) upto 6 m. width and the layout for the same shall be done in consultation with Chief Fire Officer, Nagpur Fire Brigade and the same shall be of hard surface capable of taking the weight of fire engine, weighing upto 18 tonnes. The said open space shall be kept free of obstructions and shall be motorable.
- (c) Main entrances to the plot shall be of adequate width to allow easy access to the fire engine and in no case it shall measure less than 4.5 m. The entrance gate shall fold back against the compound wall of the premises, thus leaving the exterior access way within the plot free for movement of fire service vehicles. If main entrance at boundary wall is build over, the minimum clearance shall be 4.5 m.

13. RULES OF DEVELOPMENT OF LAND INTO I-AND SUS -DIVISION AND LAYOUT.

- 13.1 Layouts or Sub-division proposal shall be submitted for the following :
- (i) When more than one building excepting for accessory buildings in the case of residential building is proposed on any land the owner of the land shall submit proposal for proper layout of building or sub-division of his entire contiguous holding.
- (ii) When development and redevelopment of any tract of land which includes division and sub-division or amalgamation of plots for various land uses within a colony.
- 13.2 Roads / streets in Land Sub-division or Layout.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- 13.2.1 The width of roads/ streets/ public and internal access way including pathway shall conform to provisions of regulation No. 12.3 to 12.6.
- 13.2.2 In addition to the provisions of regulation No. 12.3 Cul-de-sacs giving access to plots and extending upto 150 m. normally and 275 m. maximum with an additional turning space at 150 m. will be allowed only in residential area, provided that cul-de-sacs would be permissible only on straight roads and further provided that cul-de-sacs ends shall be higher in level than the level of starting point. The turning space, in any case shall be not less than 81 sq. m. in area with no dimension being less than 9 m.
- 13.2.3. Intersection of Roads .- At junctions of roads meeting at right angles, the rounding off at the intersection shall be done, unless otherwise directed by the Authority, with the tangent length from the point of intersection to the curve being $1/2$ the road width across the direction of tangent as given below:

Fig. 1- Rounding off intersections at junctions

Fig. 2. - Rounding off intersection at junctions.

- 13.2.3.1. For junctions of road meetings at less than 60 degree the rounding off or cut or similar treatment shall have tangent length of U and V from the intersections point as shown in diagram 2. The tangent length at obtuse angle junction shall be equal to half the width of the road from which the vehicle enters as shown in diagram 2.

Provided however, that the radius for the junction rounding shall not be less than (20) 6 m.

13.3. OPEN SPACES :

- 13.3.1.(a) For every land irrespective of in town planning scheme or otherwise admeasuring 0.2 Ha. or more layouts or sub-division or amalgamation proposals shall be submitted for approval.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- * (b) In any layout or subdivision of land admeasuring 0.40 Ha. or more, 15% of the entire holding area shall be reserved as play ground which shall be as far possible be provided in one place. Notwithstanding any thing contained in this rule, the shape and location of such open space shall be such that it can be properly utilised as play ground.

***NOTE:** (a) No permission will be granted to delete / reduce the existing sanctioned open space of layout / subdivision or amalgamation, where layout / subdivision permission is granted prior to issue of these regulations.

However, for plots below 0.40 Ha, where 15% open spaces are physically shown on the approved layout, the FSI of said open space can be utilised on the upper floor provided completion / occupation certificate are not issued as yet (the project is incomplete)

- (b) The open spaces shall be exclusive of areas of accesses / internal roads / designations or reservations development plan roads and areas for road widening and shall as far as possible be provided in one place. Where, however, the area of the layout or subdivision is more than 5,000 Sq. Mt. open spaces may be provided in more than one place, but atleast one of such places shall be not less than 50% at one place and further not less than 300 Sq. mt. at one place. Such recreational spaces will not be necessary in the case of land used for educational institutions with attached independent play grounds.
- 13.3.1.1. No such recreational spaces shall admeasures less than 200 Sq. Mt.
- 13.3.1.2. Minimum dimensions -The minimum dimensions of such recreational space shall be not less than -7.5 m. and if the average width of such recreational space is less than 16.6 m. the length thereof shall not exceed 2 ½ times the average width.
- 13.3.1.3. The structure and uses to be permitted in the recreational open spaces shall be as under,
- (1) There shall be two storeyed structure with maximum 15% built up area, out of which 10% built up area shall be allowed on ground floor and remaining 5% can be consumed on 1 st floor.
 - (2) The structures used for the purpose of pavilion or gymnasia or club house or vipasana and yoga center and other structures for the purpose of sports and recreation activity may be permitted.
 - (3) No detached toilet block shall be permitted.
 - (4) A swimming pool may also be permitted in such a recreational open space and shall be free of F. S. I. ':
 - (a) The ownership of such structures and other appurtenant users shall vest, by provision in a deed of conveyance, in all the owners on account of whose cumulative holdings, the recreational open space is required to be kept as recreational open space or ground viz " R. G. " in the layout of subdivision of the land.
 - (b) The proposal for the construction of such structure should come as a proposal from the owner / owners / society / societies or federation of societies and shall be meant for the beneficial use of the owner / owners / members of such society / societies /federation of societies: .
 - (c) Such structure shall not be used for any other purpose, except for recreational activity, for which a security deposit as decided by the Commissioner / Chairman will have to be paid to the Corporation / NIT
 - (d) The remaining area of the recreational open space for play ground shall be kept open to sky and properly accessible to all members as a place of recreation, garden or a play ground.

- (e) The owner / owners / society / societies the federation of the societies shall submit to the Commissioners/ Chairman a registered undertaking agreeing to the conditions in (a) to (d) above.
- 13.3.1.4. **Access:-** Every plot meant for a recreational open space shall have an independent means of access, unless it is approachable directly from every building in the layout.
- 13.3.1.5. Whenever called upon by the planning authority to do so under provisions of NMC Act / NIT Act, areas under roads and open spaces shall be handed over to the planning authority after development of the same for which nominal amount of Rs. 1 shall be paid by the planning authority. In case of owners who undertake to develop the open spaces for bonafide reasons as recreational community open spaces, the authority may permit the owner to develop the open specs unless the authority is convinced that there is misuse of open spaces in which case the authority shall take over the land.
- 13.3.2. In case of sub-division of land admeasuring 8000 sq. m. or more in area in an industrial zone, 5 percent of the total area in addition to 10 present stipulated in regulation no 13.3.1, shall be reserved as amenity open space which, shall also serve as general parking space. When the additional amenity open space exceeds 1500 sq. m., the excess area may be used for construction of buildings for banks, canteens, welfare centre, offices, crèches and other common purposes considered necessary for industrial users as approved by the Commissioner/Chairman.
- 13.4. Minimum plot areas for various users shall be given below in the Table No. 5.

TABLE NO 5**MINIMUM PLOT AREAS FOR VARIOUS USES**

Sr. No. (1)	Land Use (2)	Plot area (3)	Type of Development (4)
1.	Residential and Commercial (except those in 2,3 & 4 below.)	(i) 50 and above but upto 125 sq. m. width between 4.5 to 8 m.	Row
		(ii) 125 & above but less than 250 width 8 to 12 m.	Row/Semidetached
		(iii) 250 & above with width above 12 m., with no dimension less than 12 m.	Semidetached/ Detached
2.	Plots in public housing / High density Housing / Sites and Services I Slum up gradation / reconstruction scheme	20 with minimum width of 3.6 m. or the size as prescribed by Govt. from time to time	Row
3.	(a) Without service bay	545 (with one dimension not less than 16.75 m.)	Detached.
	(b) With service bay	1100 (with one dimension not less than 30.5 m.)	Detached.
4.	Cinema theatre assembly hall	3 sq. m., per seat including parking requirements	
5.	Mangal Karyalaya	1000	Detached.
6.	4 and 5 star Hotel in independent plot	2500	Detached.
7.	3 Star Hotel when in independent plot	1000	Detached.
8.	Industrial	300 (with width not less than 15 m.)	Detached.

Note- (1):- Plot abutting 6 m. wide road and below in E. W. S. components of U. L. C. scheme and other government schemes, marginal spaces will be as per their respective schemes and rules.

(2) The front set back for already existing layouts / roads shall be as per existing schemes by these rules provided it is more than what is prescribed by these rules.

13.4.1. FSI / Building area / Tenement Density / calculation on net plot area:- For the purpose of FSI / Built - up area / Tenement Density calculation on the net area of the plot shall only be considered. In case of a layout such net area shall be calculated after deducting from the gross area of plot, the area covered by access and recreational and amenity open space:

13.5 If the land proposed to be laid out is affected by any reservations or public purposes the authority may agree to adjust the location of such reservation to suit development without altering the area of such reservation. Provided however that no such shifting of the reservations shall be permitted.

(a) beyond 200 Mts. of the location in the Development Plan.

(b) beyond the holding of the owner in which such reservation is located, and

(c) unless the alternative location is at least similar to the location of the Development plan as regards access, levels, etc.

All such alterations in the reservations / alignment of roads shall be reported by the planning authority to govt. at the time of sanctioning the layout.

*13.6 Convenience Shopping :- In the case of layout or sub-division of areas in residential and commercial zones, provision shall be made for convenience shopping. Such shopping area shall not be less than 2% but shall not however, exceed 5% of the area of the total land (In industrial zones provisions of rule No. 13.3.2 shall apply).

Further following provision shall apply.

(1) Such convenience shopping may be distributed within the layout area so that it is available within 300 M from any parts of the layout.

(2) Such convenience shop shall not have an area of more than 20 sq. Mt. each and shall comprise of the following shopping activities only.

(3) Within a layout, the shopping centre shall be provided on ground floor and upper floors may be utilised for residential purpose and convenience like banks, places for Doctors and Medical practitioners, Architects / Engineers, Income Tax consultants/Advocates practitioners or any other such professioners etc.

(a) Food grain shops (Ration Shops) and groceries and general provisions.

(b) Pan shops.

(c) Tobacconist.

(d) Shop for collection and distribution of clothes for cleaning and dyeing.

(e) Damer

(f) Tailors.

(g) Hair dressing saloon and Beauty parlour.

(h) Bicycle hire and repair.

(i) Vegetable and fruit stalls.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- (j) Milk shops.
- (k) Floweriest
- (l) Bangles and other articles needed by women.
- (m) Small bakeries.
- (n) Newspaper stalls.
- (o) Book and stationery etc.
- (p) Medicine and Chemist shops.
- (q) Confectionary & wine shops with minimum 50 sq. m. area
- (r) Plumbers, electricians, radio, television & video equipments repair shops and video libraries.
- (s) Sports shops each not exceeding 75 sq. m.
- (t) Flour mills (power upto 10 H. P.)
- (u) Goldsmiths, photo studio, opticians, watches shop.
- (v) P.C.O. s / S.T.D. s, other equipments based communication facilities.
- (w) Tea shop of upto 20 sq. mt.
- (x) Restaurants and eating houses each with carpet area not exceeding 50 sq. m.

The Municipal Commissioner / Chairman NIT may from time to time add to, alter or amend the above list with approval of Director of Town Planning.

13.6.2. Commercial user shall not be allowed on 24 roads listed below :

24	Cement Road	Shankarnagar chowk	Ramnagar chowk

Note.-Commercial user shall be allowed as per Regulation of R-1 and R-2 zone on the lanes branching of from above listed roads, however on corner plot in such lanes and on above roads no commercial user shall be allowed.

- 13.7 In any layout or sub-division of plot 2 H. or more a suitable site for an electric sub-station as directed by the Authority shall be provided
- 13.8 Amenities facilities for layouts of larger areas :- For larger layouts admeasuring more than 3.0 Ha. provision shall be made in the layout for Nursary Schools, Sub-Post Offices, Police Stations etc. as directed by the Authority; on not less than 5% of the total area.
- 13.9 *Other/Stipulations* :- (1) General-in every case of development / re-development of any land, building or premises, the intended use shall conform to the use zones, purpose of designation, allocation or reservation, as the case may be, unless specified otherwise.
- (2) Development of land partly designated/ allocated/ designated/ reserved :- Where a building exists on a site shown as an allocation, designation or reservation in the Development Plan only its appropriate part as used for; such allocation, designation or reservation, shall be used for the said purpose and the remaining part of the building or of the developable land may be put to use in conformity with the purpose of development as otherwise permissible in the case of adjacent land.
- (3) Combination of Public Purposes uses in reserved sites:- Where the Corporation or the Appropriate Authority proposes to use land / building / premises reserved for one specific public purpose / purposes, for different public purpose / purposes it may do so, with the previous approval of the

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

Government, provided that the combination of such second user conforms to these Regulating and the permissible use in the zone in which the site falls. Provided that this shall not apply (a) to any site being developed for an educational or medical purpose or club/gymkhana wherein a branch of bank may be allowed; (b) to any site being developed for medical purposes wherein shops of pharmacists' or chemists may be permitted and; (c) to any site encumbered by another non-educational user and being redeveloped for educational purposes, in which case the existing non-educational uses may be allowed to continue without any increase in the net floor area covered by them and; (d) to any site being developed for recreational use such as garden, playground, recreation ground, park, etc. each measuring not less than 400 sq. m. at one piece, wherein electric sub-stations which utilise not more than 10 percent of the site in which they are located is proposed, ...

14. LAND USE CLASSIFICATION AND USES PERMITTED.

14.1 The various building uses and occupancies and premises to be permitted in the various zones are given in Appendix 'M'. The Authority may modify the specified uses given in Appendix 'M' with the approval of the Director of Town Planning.

14.2. No building or premises shall be changed or converted to a use not in conformity with the provisions of these Regulations.

14.3. Use as specifically designated on Development Plan.

14.3.1 Where the use of a site is specifically designated on the Development Plan it shall be used only for the : purpose so designated.

(a) Where a site is designated for one specific public purpose on the Development Plan, the authority with the 'approval of Government may use the structure existing or to be built thereon or permit the use of the structure in combination with other purposes provided the same is in conformity with these rules and the zone in which the site' falls,

(b) In the case of specific designation in Development Plan for schools and their play ground or markets or service' industries the authority may inter-change their uses provided the designations are on adjoining or nearby building or premises;

* (c) * This provision is deleted.

(d) Construction of multi-storeyed garages for parking may be permitted on parking lots.

14.4. uses to be in Conformity with the zone.-Where the use of buildings or premises is not specifically designated on the Development Plan, it shall be in conformity with the zone in which they fall;

Any lawful non-conforming use of premises existing prior to the date of enforcement of these regulation, shall continue upto a period as may be specified in the Development Plan. Provided further that a non-conforming use shall not be extended or enlarged except as provided in regulation No. 14.5.1 and 14.5.2 and that when a building , containing non-conforming use is pulled down or has fallen down, the use of the new building shall be in conformity with these regulations.

14.5. Non-Conforming Uses:-

14.5.1. *Industries* - Where a non-conforming industry has been granted a written permission without condition for its shifting to a conforming zone at the end of a specified period, additions thereto for the manufacture of new articles or for starting new process. may be permitted by the Authority when -

(a) Such schemes form an integral part of and are directly connected with the process carried on in the existing unit;

(b) Such schemes of additions do not envisage more than 5% increase in the employment and do not results in increasing existing authorised floor space for the industrial user;

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- (c) Such addition is for preventing undue loss or improving the working efficiency or the conditions of existing unit or for balancing the existing production units for the industry ;
- (d) A certificate from Maharashtra Prevention of Water, Air etc. Pollution Board is obtained;
- (e) Satisfactory means of access as required under these regulation for industrial zones is provided and maintained; and
- (f) Parking, loading and unloading spaces are provided according to these regulations.

Before permitting any such additions, the Authority shall first satisfy that the degree of nuisance from the existing unit will in no way be increased by such additions.

14.5.2. *Others (Non-Conforming Users Other than Industries):-* Where non-conforming users existing prior to the date of enforcement of these regulations are allowed to be continued in the Development Plan, and additions to such non-conforming use (other than those provided in 14.5.1) not exceeding the permissible F. S. I. / Total permissible Built up Area for the zone or the normal floor area ratio for the non-conforming user, whichever is less, may be permitted subject to the following terms and conditions, namely:

- (a) The whole building is owned and occupied by the one establishment only;
- (b) The proposed additions are for preventing undue loss or for improving working efficiency or conditions of existing user;
- (c) The additions and alternations are meant for the existing user and not proposed to be let out; and
- (d) Open spaces and parking spaces required under the Development Control Regulations shall be provided.

* 14.6. This Regulation is deleted

15. OPEN SPACE, AREA AND HEIGHT LIMITATIONS

- 15.1.1. Exterior Open Space:- Provisions for open space at the front side and rear of the building shall be as given in Appendix N.
- 15.1.2. Building shall be a set-back of at least 3.00 m. from internal means of access in a layout of buildings.
- 15.1.3. Buildings Abutting Two or More Streets:- When a Building abuts two or more streets, The set- backs from the streets shall be such as if the building was fronting each such street.
- 15.1.4. Open Spaces to be Provided for the Full Consumption of F. S. I :- The open spaces to be left at the sides and rear shall conform to the height necessary to consume full F. S. I. permissible for the occupancy in the Zone, provided that smaller open spaces than area required under regulation No. 15.1 would be permissible if the height of the building is restricted permanently to any smaller height, The Authority may permit smaller set-back and permit additional floor area to the limit of 10 sq. m. on upper floor to consume permissible F. S. I. to avoid structural difficulties or great hardship, but so as not to affect adversely the light and ventilation of adjoining building or part thereof.
- 15.1.4.1. Open Spaces Requirements:- Side or rear open space in relation to the height of the building for light and ventilations.-

(1) Residential and Commercial Zones.

* (a) building having length / depth upto 40 m.:- The open spaces on all sides except the front side of a building shall be of a width not less than one half of the height above the ground level minus four with minimum 3.0 mt. rounded to the nearest decameter subject to a maximum of 20 mt. the minimum being 3.00 mt. for

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

a residential building and 4.5 mt. for a Commercial building.

15.1.4.2. Building with Length / Depth Exceeding 40 m :-

*(a) If the length or depth of building exceeds 40 mt an additional marginal distance of 10% of the required distance shall be necessary on the side and rear open space as the case may be :

Provided that no such increase in additional open space shall be necessary if

- (a) it is front open margin space or
- (b) when only store rooms and stairways derive light and ventilation from the open space :

Provided further that :-

- (i) The open space for separation between any building and a single storeyed accessory building shall not be less than 1.5m.
- (ii) The minimum distance between any two ground floor structures in Public Housing/ High Density Housing shall be 4.5 m., if habitable rooms derive light and ventilation from the intervening space, if not, the distance may be reduced to 1.5 m.
- (iii) Except where the plot size is less then 2500 sq.m. the marginal open space in a plot abutting the amenity / recreational open space in the same layout shall not be less than 3 m.
- (iv) Where the amenity open space being accessible from all the layout plots does not have an exclusive means of access, the rear marginal open space shall not be less than 3 m.

* 15.1.5. Open spaces for Tower like Structures:- Notwithstanding the provisions of regulation No: 15.1.4 tower like structure may be permitted only with 6 (six) meter minimum open space at the ground level and one setback at the upper levels provided that the total height does not exceed 24 meter. If it exceeds 24 m. but does not exceed 37.5 meter the minimum open space at ground level shall be 9 m. beyond 37.5 mt. the minimum open space at ground level shall be 12 mt. with two setbacks at upper level. The terrace created by the setback shall be accessible through a common passage and or common staircase only. For height more than 24 meter shall need no objection certificate from Director of Microwave Project, Nagpur Telephone, Fire Brigade and Civil Aviation Authority.

15.1.6. Open spaces separate for each Building or Wing:- The open spaces required under these regulation shall be separate or distinct for each building and where a building has two or more wings, each wing shall have separate or distinct open spaces according to these regulations for the purpose of light and ventilation of the wings,

15.2. Interior open spaces (chowk).

15.2.1. Inner chowk :- The whole of one side of every room excepting bath, W. C. and store room and not abutting on either the front, rear or side (s) open spaces (see regulation No. 17.12.2) shall abut on an internal open space (courtyard, inner chowk), whose minimum width shall be 3 m. Further inner chowk shall have an area at all levels of chowk of not less than the square of the 1/5 th the height, of the highest wall abutting the chowk. Provided that when any room (excluding staircase bay and bathrooms and water closet (see regulation No. 15.2.1.1) is dependent for its light and ventilation on an inner chowk, the dimension shall be such as is required for each wing of the building.

15.2.1.1. Where only water closet and bathroom are abutting on the interior open space, the size of the interior open space shall be in line with the provision for ventilation. shaft as given in

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

regulation No. 17.12.4.

- 15.2.2. Outer chowk-The minimum width of outer chowk (as distinguished from its depth) shall be not less than 2.4m. If the width of outer chowk is less than 2.4 m. then it shall be treated as a notch and the provisions of outer chowk shall not apply. However, if the depth of outer chowk is more than the width, the provisions of regulation No.15.1.6 shall apply for the open spaces to be left between the wings.
- 15.3. Area and Height limitations - The area and height limitations through covered area, height of buildings, and number of storeys, floor space index, facing different road widths shall be as given in Appendix 'N' and Regulation No. 15.5.
- 15.4. Exemption to open spaces/covered area.
- 15.4.1. The following exemption to open spaces shall be permitted
- (a) Projections into open spaces :- Every open space provided either interior or exterior shall be kept free from any erection thereon and shall be open to the sky and no cornice, chajja, roof or weather shade more than 0.75 m. wide shall overhang or project over the said open space so as to reduce the width to less than the minimum required. However, slopping chajja provided over balcony/ gallery etc. may be permitted to project 0.3 m. Beyond balcony projections at an angle of 30 degree from horizontal level.
 - * (b) A canopy not exceeding 5m. in length and 2.5 m. in width in the form of cantilever and unenclosed over the main entrance providing a minimum clear height of 2.40 mt. below the canopy. The canopy shall not have access from upper floors (above floors), for using as sitting out place. There shall be a minimum clearance of 1.5 m. between the plot boundaries and canopy.
 - (c) Projections /Balconies :- Balcony or balconies of a minimum width of 1.00 m. may be permitted free of F.S.I. at any floor, not more than 15% of the floor area and such balcony projection shall be subject to the following condition
 - * (1) In non-congested area, no balcony shall reduce the marginal open space to less than 2 m. In congested area balcony may be permitted on upper floors projecting in front setbacks except over lanes having width 4.50 m. or less. No balcony shall be allowed on ground floor which shall reduce minimum required front setback or marginal open space. The width of the balcony will be measured perpendicular to the building / admeasured from that line to the balconys outer most edge.
 - (2) Balconies may be allowed to be enclosed, when enclosed 1/3 of the area of their faces shall have glass shutters on the top and the rest of the area except the parapet shall have glazed shutters.
 - * (3) The dividing wall between the balcony and the room may be permitted to be removed on payment of premium as prescribed by the Municipal Commissioner / Chairman N.I.T. from time to time.
 - * (d) A projection of 30 cm. on terrace level shall be allowed through out periphery of the building.
 - * (e) Accessory buildings :- The following accessory buildings may be permitted in the marginal open spaces :-
 - (i) In an existing building a single storeyed sanitary block subject to a maximum area of 4 sq. m. in the rear and side open space and at a distance of 7.5 m. from the road line or the front boundary and 1.50 m. from other boundaries may be permitted where

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

facilities are not adequate. The authority may reduce 1.5 m. margin in rare cases to avoid hardship.

- (ii) Parking lock up garage not exceeding 2.4 mtr. in height shall normally be permitted in the rear corner of the plot. Provided that in exceptional cases, where the side or rear open spaces at a distance of 7.5 mtr. from any road or the front boundary of the plot.

Parking lock up garage when attached main building shall be 7.5 mtr. Away from the road line and shall be of such constructions giving fire resistance of 2 hours.

The area of sanitary blocks and parking lock up garage shall be taken into account for the calculation of F.A.R. and covered area calculations, subject to the provisions of Rule No. 15.4.2 (h), except that the area of one garage per plot shall not be counted within the maximum ground coverage permissible.

- (iii) Suction tanks, pump room, electric meter room or garage shaft space required for fire hydrants, electrical and water-fittings, water tanks, dustbins etc.
- (iv) One watchman's booth not over 3 sq. m. in area or less than 1.20 m. in width or diameter.

Note :- When a building abuts on 3 and above roads then above mentioned user shall be permitted in front setback facing the smaller road or less important from traffic point of view

* 15.4.1(f) "Ramp" in basement shall be allowed.

* 15.4.1(g) Fire Escape stair of single flight not less than 75 cm. wide with 15 cm. Trades and riser not more than 20 cm. Subject condition at the same shall be open to sky with the NOC from Chief Fire Officer.

15.4.2. The following shall not be included in covered area for F. S. I. and Built-up area calculations. -In addition to rule 15.4.1. (a), (b) and (c) and 17.6.3 the following shall not be included in covered area of F. S. I. and built up area calculations.

- (a) Multi-storeyed stilt floor space constructed under a building shall be allowed to be used as parking subject to the height restrictions in that area.
- (b) Electric cabinet or sub-station, watchman booth of minimum size of 3.00 Sq. mt. with a minimum width or diameter of 1.2 m. pump house, garage shaft, space required for location of fire hydrants, electric fitting and water tanks.
- (c) Projections as specifically exempted under these rules.
- * (d) A basement in two tiers construction under a building and used for air-conditioning plant meter room, electric sub-station and parking spaces for the plots of the size more than 500 sq. mt. in non-congested area only, (use accessory to the principal use). (In non-congested area for starred hotels with rating three and above, hospitals of charitable trusts, cinema theatres for an area as per technical requirements with special written permission of the Commissioner/Chairman of NIT.)
- (e) Areas covered by staircase rooms for stair flights of width 0.75 m. and above in case of row housing, pent houses and duplexes, 1.2 m. and above in case of residential / commercial buildings and 2 m. and above in case of assembly halls, area of staircase flights, midlandings and floor-landings, staircase passages irrespective of width of staircase

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

subject to payment of premium to be decided by the Municipal Commissioner / Chairman and without any premium for Government, Semi-Government buildings, Educational and Hospital buildings of Charitable Trusts and buildings constructed for slum dwellers under Slum Redevelopment Schemes.

Note :- Minimum width of staircase room and flight shall be 1.2 m. except in case of Duplex and EWS Housing where it shall be 0.75 m.

- * (f) Architectural features, chimneys and elevated tanks of permissible area of fire escape stairways and lifts with cantilevered fire escape passages according to the Chief Fire Officer's requirements. Lift room, lift walls, lift lobbies subject to premium as decided by Municipal Commissioner / Chairman N.I.T.
- (g) Area of one office room of a co-operative housing society or apartment owners association of size 4m. x 3m. only on the ground floor.
- (h) Area of the sanitary block(s) consisting of a bathroom and water closet for each wing of each floor of a building of a prescribed dimensions deriving access from a common passage as required for the use for domestic servant or staff engaged in the premises.
- (i) Areas covered by (i) Lofts (ii) Meter rooms, (iii) Porches, (iv) Canopies, (v) Air conditioning plant rooms (vi) Electric sub-stations, (vii) Service floor to height not exceeding 1.5 m. for hotels rating with three stars and above with the special permission of the Commissioner/ Chairman. N.I.T
- (j) Area of structure for an effluent treatment plant as required as per the requirements of the Maharashtra Pollution Control Board or other relevant authorities.
- (k) Areas covered by service ducts, pumps, rooms, electric, sub-station, stilts and additional amenity of lift.
- (l) Area of one milk booth under the public distribution system in a building layout of area exceeding 0.4 Ha. with the permission of the Commissioner/Chairman N.I.T
- (m) Rockery, well and well structures, plant, nursery, water pool, swimming pool, (if covered) platform round a tree, fountain bench, chabutara with open top and unclosed sides by walls, ramps, compound wall, gate side, swing, overhead water tank on top of buildings. Provided that the distance between terrace and soak pit of tank is less than 1.50 m.
- (n) Area of one public telephone booth and one telephone exchange (PBX) per building with the permission of the Commissioner/Chairman. N.I.T
- (o) Area of one room for installation of telephone concentrates as per requirement of Telephone Authority but not exceeding 20 Sq. mt. per building with the permission of the Commissioner/ Chairman. NIT
- (p) Area of separate letter box on the ground floor of residential and commercial buildings with five or more storeys to the satisfaction of the Commissioner / Chairman. N.I.T.
- (q) Area covered by new lift and passage thereto in an existing building with height up to 16 m. in gaothan/ congested area.
- (r) Area of covered passage of clear width not more than 1.52 m. (5 Ft.) leading from a lift exists at terrace level to the existing staircase so as to enable descend to lower floor in building to reach tenements not having direct access to a new lift in a building without an existing lift. .
- (s) Atrium or entrances of any size and passage more than 1.5 m. width in shopping malls, public buildings.

***Note -** This rule shall not be applicable for the building proposals where occupancy certificates have been granted prior to issue of these regulations. Provided further that

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

where a permissible FSI has not been exhausted in the case of existing building and cases decided by the corporation, prior to coming into force of these modified regulations, provisions about the exclusion from FSI computation as in these regulations will be available for construction of remaining balance FSI on site. Also provided further that this rule shall not be applicable for the change in occupancy in existing building after issue of this regulation. Also provided that the extent of exemption under this rule shall not in any case exceed 30% of the permissible F.S.I.

15.5 The height and number of storeys shall be related to provisions of F. S. I. as given in these regulations and the provisions of open spaces as given in regulation No. 15.1. 1 and 15.3 and the following

- (a) The maximum height of building shall not exceed 1.5 times total of the width of road abutting and ,a front open space subject to the NOC of Director of Microwave Project, Nagpur Telephone, Civil Aviation & Chief Fire Officer, Nagpur in case of building exceeding 15 m. in height;
- (b) If a building abuts on two or more streets of different widths, the building shall be deemed to face upon the street that has the greater width and the height of building shall be regulated by the width of the street and may be continued to this height to a depth of 24 m. along the narrower street subject to conformity of regulation No. 15.1 .2.
- (c) In case of congested area the maximum height of building shall be as under.-

Road Width	Maximum Permissible Height
1	2
1. Upto 6 m .	.. 1.5 times width of the road+front marginal open space within the premises.
2. 6 m. to 10 m.	.. 10 m.+ front marginal distance within the premises.
3. Other roads above 10 m.	Sum of the width of the road + front marginal distance.

- * (d) For building in the vicinity of aerodromes the maximum height of such buildings shall be subject to values framed by the Civil Aviation Authorities excepting that within 0.90 km of the Airport reference point, no building shall be permitted, the development permission shall be considered only after applicant produces NOC from Air Port authority.
- * (e) In addition to (d) for Industrial Chimneys coming in the Air-port zone, it shall be of such height and character as prescribed by Civil Aviation Authorities and all Industrial Chimneys shall be of such character as prescribed by the Chief Inspector of Steam Boilers and Smoke Nuisance, and
- (f) Buildings intended for hazardous godowns storage of inflammable materials of storage of explosives shall be single storied structures only.

15.5.1.(i) For the purpose of regulation No. 15.5 (a) the width of the street may be prescribed width of the street, shown on Development Plan or width resulting from the prescription of a regular line of street. under the relevant act whichever is more, provided the height of the building does not exceed twice the sum of the width of existing street plus the open space between the existing street and the building (2w + open space).

(ii) Further to provisions of (i) the width of the open space between the street and the building shall be calculated by dividing area of land between the street and the building by the length of the front face of the building.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

15.5.2.(i) Height Exemptions :- The following appurtenant structures shall not be included in the height of the building: .

Roof tanks and their supports, ventilating, air-conditioning, lift rooms and similar service equipment, stair cover, chimneys and parapet walls and architectural features not exceeding 1 m. in height.

*** 16. PARKING, LOADING AND UNLOADING SPACES: -**

16.1. Each off street parking space provided for Motor Vehicles shall not be less than 2.5 m. x 5 m. area, and for scooters and cycles the parking spaces provided shall not be less than 3 sq. m. and 1.4 sq. m. respectively.

16.2. For building of different occupancies off street space for vehicles shall be provided as given 16.2.1

16.2.1. Parking spaces -The provision for parking of vehicles shall be as given in Tables-8. Wherever a property is developed or redeveloped parking spaces at the scale laid down in these Regulations shall be provided. When additions are made to an existing building, the new parking requirements will be reckoned with reference to the additional space only and not to the whole of building but this concession shall not apply where the use is changed.

(1) General space requirements :-

(i) Types: The parking spaces mentioned below include parking spaces in basements or on a floor supported by stilts, or on upper floors, covered or uncovered spaces in the plot and Lock up garages.

(ii) Size of parking space:- The minimum sizes of parking spaces to be provided shall be as shown below:-

Type of Vehicle / parking space	Minimum Size/ area of
(1)	(2)
(a) Motor vehicle	2.5 m X 5 m
(b) Scooter, Motor Cycle.	3.sq. m.
(c) Bicycle	1.4 sq. m.
(d) Transport vehicle	3.75 m. X 7.5 m.

Note : In the case of parking spaces for motor vehicle, upto 50 percent of the prescribed space may be of the size of 2.3 m. X 4.5 m.

(iii) Marking of parking spaces :- Parking space shall be paved and clearly marked for different types of vehicles

(iv) Manoeuvring and other ancillary spaces, off street parking space must have adequate vehicular access to a street and the area shall be exclusive of drives, aisles and such other provisions required for adequate manoeuvring of vehicles.

(v) Ramps for Basement parking :- Ramps for parking in basement should conform to the requirement of 19.4.6

10.	Plots less than 100 sq.m.		..	2	4	..	2	4

- * Note 1 - In the case of auditoria for Educational buildings parking space shall be as per sr. no. 4
- * Note 2. - For plots upto 100 sq. m. as in the case of shops, parking space need not be insisted.
- * Note 3.- Fraction of parking unit need not be provided. However, in case where proportional number of vehicles in less than 1 (i.e. Fraction) it will be rounded to the next full number.
- * Note 4 : Parking for Mangal Karyalaya should be calculat as per Sr. No. 3 of above table. However for calculating number of users/seats for free seating and lawns shall be calculated at the rate of 1 person per 1.20 sq. m. of sitting area or and 1.0 sq. m. of lawn area where provided respectively, provided for fixed seating, parking shall be provided as per sr. No. 3 directly.
- * Note 5 :- For Plots upto 300 sq. m. parking space need not be insisted separately and shall be allowed in marginal space only in case of independent single family residential bungalows only.
- * Note 6 :- Further a garage shall be allowed in rear marginal distance at one corner having dimension 3 X 6 m. area.
- * 16.3 Off street parking space shall be provided with adequate vehicular access to a street, and the area of drives, aisles and such other provisions required for adequate manoeuvring of vehicle shall be exclusive of the parking space stipulated in these regulations.
- * Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- * 16.4 If the total parking space required by these regulations is provided by a group of property owners for their mutual benefits, such use of this space may be construed as meeting the off street parking requirements under these regulations subject to the approval of the Authority. In such cases, the details of requirements for total development should be submitted, if common parking space is proposed for the group of buildings, and the owners, of such buildings shall submit the layout showing such reservation of parking space and also a registered undertaking that the area earmarked for the parking space will be kept unbuilt and will be developed as a parking lot.
- * 16.5 In addition to the parking spaces provided for building of Mercantile (Commercial) like office, markets, departmental store, industrial and storage, loading and unloading spaces shall be provided at the rate of one space for each 1000 sq. m. of floor area or fraction thereof exceeding the first 200 sq. m. of floor area, shall be provided. The space shall not be less than 3.75 m. X 7.5 m.
- * 16.6. Parking lock up garages shall be included in the calculation for floor space for F.A.R. Calculations unless they are provided in the building constructed on stilts with no external wall.
- * 16.7 The space to be left out for parking as given in Regulation 16.1 to 16.6 shall be in addition to the open spaces left out for lighting and ventilation purposes as given in Regulation No. 15. Those spaces may be used for parking provided minimum distance of 3 m. around the buildings is kept free of any parking or loading and unloading spaces excepting the buildings as mentioned in Note No. 5 of the Table No. 8.
- * 16.8 Parking space shall be paved and clearly marked for different types of vehicles.
- * 16.9 In case of parking spaces provided in basements, at least two ramps of adequate width and slope (see Regulation No. 17.11) shall be provided located preferably at opposite ends.
- * 16.10. In additional to the regular parking area as per rule, a space of 3.0 m. wide strip along the road on front / side shall be provided as visitors parking on the roads prescribed by the N.M.C. I N.I.T. for the mixed user buildings as prescribed and directed by the Commissioner N.M.C./ Chairman N.I.T., Provided further that no compound wall or any other enclosure shall be allowed between plot boundary and front of the building line.

17. REQUIREMENTS OF PARTS OF BUILDINGS

- * 17.1. Plinth:-
 - * 17.1.1. Main Building - The plinth or any part of a building or out house shall be so located with respect to surrounding ground level that adequate drainage of the site is assured but height shall not be less than 45 cm. above the surrounding ground level. In areas subject to flooding, the height of the plinth shall be at least 60 cm. above the high flood level.
 - 17.1.2. Interior Courtyards:- Every interior Courtyard shall be raised at least 15 cm. above the surrounding ground level and shall be satisfactorily drained.
- 17.2 Habitable Rooms.
 - 17.2.1. Size.-No habitable room shall have a carpet area of less than 9.50 sq. m. except those in the hostels attached to recognized educational institutions, the minimum size of a habitable room for the residence of a single person shall be 7.5 sq. m; the minimum width of a habitable room shall be 2.4 m. One full side of a habitable room shall abut on the open space. Where there are more than one room, one shall be not less than 9.5 m² and other 7.5 m².

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- 17.2.1.1 The size of the room in a single room tenement shall not be less than 12.5 sq. m. with a minimum width of 2.4 m.
- 17.2.2. height:-The height of all rooms for human habitation shall not be less than 2.75 m. measured from the surface of the floor to the lowest point of the ceiling (bottom of slab). The minimum clear head room under beam shall be 2.4 m. In case of centrally air conditioned building, height of the habitable room shall not be less than 2.4 m, measured from the surface of the floor to the underside of the slab or to the underside of the false ceiling.
- 17.2.2.1 In the case of pitched roof the average height shall not be less than 2.75 m. and the minimum height at eaves level shall not be less than 2.1 m.
- * 17.2.2.2 However, the maximum room height shall be 4.40 m. in case of all buildings excepting Residential Hotels of the category of 3 star and above, Assembly, Institutional, Educational, Industrial, Hazardous and Storage occupancies, and in case of portions common to two floors of duplex flats. Duplex flats shall mean a residential flat divided on two floors with an internal staircase connecting the two floors.
- 17.2.2.3 Height of room for I. T E. for any telematic equipment storage erection facility can have a height as required for effective functioning of that system.
- 17.3. Kitchen size - The area of the kitchen shall not be less than 5.5 sq. m. with a minimum width of 1.8 m.
- 17.3.1.1 In the case of special housing scheme as given in Regulation No. 17.2.1 .1 no provision for kitchen is necessary. In the case of double room tenements, the size of kitchen shall be not less than 4.0 sq. m. with a minimum width of 1.5 m., where alcoves (a cooking space having direct access from the main room without any inter communicating door) are provided, the size shall not be less than 3.0 sq. m. with a minimum width of 1 .5 m.
- 17.3.2 Height:- the room height of a kitchen measured from the surface of the floor to the lowest point in the ceiling (bottom of slab) shall not be less than 2.75 m., subject to provisions of 17.2.2.1.
- 17.3.3. Other Requirements :- Every room to be used as kitchen shall have-
- (a) Means for the washing of kitchen utensils which shall lead directly or through a sink to grated and trapped connection to the waste pipe;
 - (b) Impermeable floor.
 - (c) Window of not less than 1.0 sq. m. area, opening directly on to an interior or exterior open space, but not into a shaft.
 - (d) In case multi-storeyed residential buildings more than 15 m. in height, refuse chutes.
- 17.4. Bath Rooms and Water Closets
- * 17.4.1 Size. The minimum size of bath rooms and water closets shall be as under-
- (a) Independent Bath Room 1.2 m. x 1.3 m.
 - (b) Independent Water closet 0.9 m. x 1 .2 m.
 - (c) Combined bath room and water closet. 2 sq. m. with minimum width of 1.2 m.
- 17.4.2 Height:- The Height of a bath room or water closet measured from the surface of the floor to the lowest point in the ceiling (bottom of slab) shall be not less than 2.1 m.
- 17.4.3 Other Requirements - Every bath room or water closet shall -
- (a) be so situated that at least one of its wall shall open to external air with the size of opening (windows ventilators, louveres) not less than 0.3 sq. m. in area and side not less than 0.3 m. (See Regulation No. 17.12.3)

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- (b) have the platform or seat made of water tight not absorbent material,
 - (c) be enclosed by walls or partitions and the surface of every such wall or partitions shall be finished with a smooth impervious material to a height of not less than 1 m. above the floor of such a room; and
 - (d) be provided with an impervious floor covering, slopping towards the drain with a suitable grade and not towards verandah or any other room.
- 17.4.4. No room containing water closets shall be used for any purpose except as a lavatory and no such room shall open directly into any kitchen or cooking space by a door, window or other opening. Every room containing water closet shall have a door completely closing the entrance to it.
- * 17.5. Loft - The maximum depth of a loft shall be 1.5 m. and the loft may be provided, over residential kitchens, bath room, corridors and over shop floor, built up to an area 25 per cent over kitchens and full space of bath rooms, water closets corridors. In the shops with width up to 3.0 mt. loft of 3313% and width above 3.0 mt. lofts of 50% of the carpet area may be provided. However, loft will not be allowed where mezzanine floor is provided.
- 17.5.1. The clear head room under loft shall not be less than 2.1 m.
- 17.5.2. Loft in commercial areas and industrial buildings shall be located 2 m. away from the entrance.
- 17.6. Ledge or Tand.
- 17.6.1 Size :- A ledge or Tand in a habitable room shall not cover more than 25 per cent of the area of the floor on which it is constructed and shall not interfere with the ventilation of the room under any circumstances.
- 17.6.2. Height-The ledge shall be provided at minimum height of 2.1 m.
- 17.6.3 The projections (cantilever) of cupboards and shaleves may be permitted and would be exempted from covered area calculations. Such projections may project upto 23 cm., in the set backs for residential buildings provided the width of such cupboard/shelves does not exceed 2.4 m. and there is not more than one such cupboard/ shelf in each room provided such projection shall be 2 m. from plot boundary.
- 17.7. Mezzanine floor.
- 17.7.1. Size:- The aggregate area of the mezzanine floor shall not exceed 50 % of the built up area of that floor. The minimum size of a mezzanine floor if it is used as a habitable room shall not be less than 9.5 m².
- Note :-** Mezzanine floor area shall be counted towards F. S. I.
- * 17.7.2. Height -The minimum height of a mezzanine floor shall be 2.2 m. The head room under mezzanine room shall not be less than 2.10 m.
- 17.7.3. Other Requirements :- A mezzanine floor may be permitted over a room or a compartment provided that-
- (a) It conforms to the standards of habitable rooms as regards lighting and ventilation, in case the size of mazzanine floor is 9.5 sq. m. or above;
 - (b) it is so constructed as not to interfere under any circumstances with the ventilation of the space over and under it;
 - (c) Such mezzanine floor or any part of it shall not be used as a kitchen;

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- (d) In no case a mezzanine floor shall be closed so as to make it liable to be converted into unventilated compartments
- 17.8. Store Room.
- 17.8.1. *Size* :- The floor area of a store room in a residential buildings, where light ventilation and height are provided at special standards lower than as required for living rooms shall not be more than 3 sq. m.
- * 17.8.2. *Height*- The height of a store room shall not be less than 2.10 mt.
- 17.9. *Garage*:- The area of parking lock up garage shall be included in FSI calculations. However, the built-up area of one garage per residential plot or one garage per plot area of 500 sq. m. (5000 sq. ft.) in other zones shall not be taken into consideration for the purpose of calculating maximum allowable ground coverage.
- 17.9.1. *Garage Private*:- The size of a private garage in residential building shall be not less than 2.5 m.X 5 m. and not more than 3 m. X 6 m. The garage, if located in the side open space shall not be constructed within 1.5 m. from the main building.
- 17.9.2. *Garage, Public*:- Parking places in public buildings open from all sides and having only roofs at top shall be exempted both from built-up area and FSI calculations.
- 17.9.3. *Height*:-The maximum head room in a garage and parking area shall be 2.4 m.
- 17.9.4. The plinth of garage located at ground level shall not be less than 15 cm. above the surrounding ground level.
- 17.9.5. The garage shall be set back behind the building line for the street / road on to which the plot abut, and shall not be located affecting the accessways to the building.
- 17.9.6. *Corner Site* :- When the site fronts on two streets the frontage would be as on the street having the larger width. In case where the two streets are of the same width, then the larger depth of the site will decide the frontage and open space. In such cases the location of a garage (in a corner plot) if provided within the open spaces shall be located diagonally opposite the point of intersections.
- 17.10. Roofs.
- 17.10.1 The roof of a building shall be so constructed or framed as to permit effectual drainage of the rain water there from by means of sufficient rain water pipes of adequate size, wherever required, so arranged, jointed and fixed as to ensure that the rain water is carried away from the building without causing dampness in any part of the wall foundations of the building or those of an adjacent building.
- 17.10.2 The authority may require rain water pipes to be connected to a storm water drain or sewer through a covered channel formed beneath the public footpath or in any other approved manner.
- 17.10.3. Rainwater pipes shall be affixed to the outside of the walls of the building or in recessed or chases cut or formed in such walls or in such other manner as may be approved by the Authority.
- *17.10.4. Terrace of a building shall not be sub-divided and it shall have only common access. However for pent houses sub divisions of terrace shall be permissible
- 17.11. Basement.
- *17.11.1. Basement may be put to only the following uses to be constructed within the prescribed setbacks and prescribed building line and subject to maximum coverage on ground floor.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- * (a) Following user shall be permitted free of FSI.
 - * (i) Air conditioning equipment and other machine used for services and utilities of the building ; and
 - * (ii) Parking spaces and
 - * (iii) Strong room, bank cellars etc.
 - * (b) Following user shall be computed in FSI.
 - * (i) Storage of household or other goods of ordinarily noncombustible material and storage incidental to principal user;
 - * (c) Deleted
 - * (d) Deleted
 - * (e) Area and extent :- The total area of any basement shall be permissible on area excluding essential side margins It may be in one level or two.
- *17.11.1.2 The basement shall not be used for residential or any habitable purposes and Industrial or hazardous use.
- 17.11.2. The basement shall have the following requirements:-
- (a) Every basement shall be in every part at least 2.4 m. in height from the floor to the under side of the roof slab or ceiling.
 - (b) Adequate ventilation shall be provided for the basement. The standard of ventilation shall be the same as required by the particular occupancy according to regulation. Any deficiency may be met by providing in addition adequate mechanical ventilation in the form of blowers, exhaust fans, air conditioning systems etc.
 - * (c) The minimum height of the ceiling of any basement shall be 0.9 mtr. and maximum of 1.2 mtr. above the average surrounding ground level. However it does not apply to the lower tier of the basement when two tiers are proposed.
 - (d) Adequate arrangement shall be made such that surface drainage does not enter the basement.
 - (e) The walls and floor of the basement shall be water-tight and be so designed that the effect of the surrounding soil and moisture, if any, are taken into account in design and adequate damp proofing treatment is given;
 - (f) The access to the basement shall be separate from the main and alternate staircase providing access and exit from higher floors. Where the staircase is continuous in case of building served by more than one staircase the same shall be of enclosed type serving as a fire separation from the basement floor and higher floors (see Regulation No. 19.4.3 (n) Open ramps shall be permitted if they are constructed within the building line subject to the provision of (d).
- 17.12. Lighting and Ventilation of Rooms.
- 17.12.1 The minimum aggregate area of opening of habitable rooms and kitchens excluding doors, shall be not less than 1/10 of floor area.
- *17.12.2 No portion of a room shall be assumed to be lighted if it is more than 7.5 m. from the opening assumed for lighting/ventilation of the portion, provided additional depth of living room beyond 7.5 mt. may be permitted subject to provision of proportionate increase in the opening.
- 17.12.3 Where the lighting and ventilation requirements are not met through day lighting and natural

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

ventilation, the same shall be ensured through artificial lighting and mechanical ventilation as per latest version of part VIII building Services Section, Lighting and Ventilation of National Building Code of India published by the Indian Standards Institution. In the case of special types of buildings requiring artificial lighting and air-conditioning for special types of manufacturing or other process the requirements about natural day lighting and ventilation may be relaxed.

- 17.12.4. Ventilation Shaft:- For ventilating the space for water closets and bath room, if not opening on the front side, open on the ventilation shaft, the size of which shall not be less than the values given below :

Height of building in m.	Size of Ventilation shaft in sq. m.	Minimum size of shaft in m.
(1)	(2)	(3)
Up to 12	3.0	1.50
Up to 18	4.5	1.80
Up to 20	6.0	1.80

- 17.12.5. In residential lodging hotels where attached toilets are provided with mechanical ventilation system installed as per regulation No. 17.12.3. the size of ventilation shaft may be relaxed by the Authority.

- 17.13. Parapet:- Parapet walls and handrails provided on the edges of roof terraces, balcony etc. shall not be less than 1 .05 m. and not more than 1 .20 m. in height.

- 17.14. Wells :- Wells, intended to supply of water or human consumption or domestic purposes where provided, shall comply with the requirements of Regulation No. 17.14.1 and 17.14.2.

- 17.14.1 Location :- The well shall be located :

- Not less than 15 m. from soak pit, refuse pit, earth closet or privy and shall be located on a side upwards from the earth closet or privy.
- Not less than 18 m. from any cess pit, soak way or borehole latrine and shall be located on a site upwards from the earth closet or privy;
- That contamination by the movement of sub soil or other water is unlikely; and
- Not under a tree or otherwise it should have a canopy over it so that leaves and twigs do not fall into the well and rot.

***17.14.2. Requirements :- The well shall :**

- Have minimum internal diameter of not less than 1 m
- Be constructed to a height not less than 1 m. above the surrounding ground level to from a parapet or kerb and to prevent surface water from following into a well, and shall be surrounded with a paving constructed of impervious material which shall extend for a distance of not less than 1.8 m. in every direction from the parapet or the kerb forming the well head and the upper surface for such paving shall be sloped away from a well.
- Be a sound and permanent construction (PUCCA) throughout,
- The interior surface of the lining or walls of the well shall be rendered impervious for depth of not less than 1.8 m. measured from the level of the ground immediately adjoining the well-head.

- 17.15 Septic Tanks :- Where a septic tank is used for sewage disposal, the location, design and construction of the septic tank shall conform to requirements of 17.15.1 and 17.15.2.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- 17.15.1 *Location of Septic Tanks and subsurface Absorption system:-* A subsoil dispersion system shall not be closer than 12.00 mt. of any source of drinking water, such as well to mitigate the possibility of bacterial pollution of water supply. It shall also be as far removed from the nearest habitable building as economically feasible but not closer than 6 m. to avoid damage to the structures.
- 17.15.2. Requirements :-
- (a) Dimensions of Septic Tanks :- Septic tanks shall have minimum width of 75 cm., minimum depth of one meter below the water level and a minimum liquid capacity of one cubic meter. Length of tanks shall be 2 to 4 times the width
 - (b) Septic tanks may be constructed of brick work, stone masonry, concrete or other suitable materials as approved by the Authority;
 - (c) Under no circumstances should effluent from a septic tank be allowed into an open channel drain or body of water without adequate treatment;
 - (d) Minimum nominal diameter of pipe shall be 100 mm. further, at junctions of pipes in manholes, direction of flow from a branch connection should not make an angle exceeding 45 degree with the direction of flow in the: main pipe
 - (e) The gradients of land drains under drainage as well as the bottom of dispersion trenches and soak way should be between 1:300 and 1:400
 - (f) Every septic tank shall be provided with ventilating pipe of at least 50 mm diameter. The top of the pipe shall be provided with a suitable cage of mosquito proof wire mesh;

The ventilating pipe shall extend to a height would cause no smell nuisance to any building in the area. Generally, the ventilating pipe may extend to a height of about 2 m. when the septic tank is at least 15 m. away from the nearest building and to a height of 2 m. above the top of the building when it is located closer than 15 m.
 - (g) When the disposal of septic tank effluent is to seepage pit, the seepage pit may be of any suitable shape with the least cross sectional dimension of 90 cm. and not less than 100 cm. in depth below the invert level of the inlet pipe. The pit may be lined with stone, brick or concrete blocks with dry open joints which should be backed with at least 7.5 cm. of clean coarse aggregate. The lining above the inlet level should be finished with mortar. In the case of pits of large dimensions, the top portion may be narrowed to reduce the size of the RCC cover slabs. Where no lining is used, specially near trees, the entire pit should be filled with losses stones. A masonry ring may be constructed at the top of pit to prevent damage by flooding of the pit by surface run off. The inlet pipe may be taken down a depth of 90 cm. from the top as an anti mosquito measure and;
 - (h) When the disposal of septic tank effluent is to a dispersion trench, the dispersion trench shall be 50 to 100 cm. deep and 30 to 100 cm. wide excavated to a slight gradient and shall be provided with 15 to 25 cm. of washed' gravel of crushed stones Open jointed pipes placed in side the trench shall be made of unglazed earthenware clay or concrete and shall have minimum internal diameter of 75 to 100 mm. Each dispersion trench should not be longer than 30 m. and trenches should not be placed closer than 1.8 m.
- 17.15.2.1 Septic Tank Requirements :- Requirements specified by State and Central Government, public Health Institutes such as NEERI, for modern methods of disposal, may also be permissible.
- 17.16. Boundary Wall :-The requirements of the boundary wall are given below :
- (a) Except with the special permission of the Authority the maximum height of the compound wall shall be 1.5 m. above the centre line of the front street. Compound

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

wall upto 2:4 m. height may be permitted of the top 0.9m. is of open type construction of a design to be approved by the Authority.

- (b) In case of corner plot the height of boundary wall shall be restricted to 0.75 m. for a length of 10 m. on the front and side of the intersections and balance height of 0.75 m. if required in accordance with (a) may be made in up of open construction (through railings) and of design to be approved by the Authority; and.
- (c) However, the provisions of (a) and (b) are not applicable to boundary wall of jails. In industrial buildings, electric sub stations, transformer stations institutional buildings like sanatoria, hospitals, industrial buildings like workshops, factories and educational buildings like schools, colleges, including the hostels, and other uses of public utility undertakings height upto 2.4 m, may be permitted by the Authority.
- (d) The compound gate should open entirely inside the property and shall not open on any access/pathway/ road/street.

17.17 Office cum Letterbox Room - In the case of multistoried multi family dwelling apartments constructed by existing and proposed co-operative, Housing Societies or Apartment Owners Association Limited Companies and proposed societies, an office cum letter box room of dimension 3.6 m. x 3 m. shall be provided on the ground floor, or under stilts.

17.18. Meter Rooms:- Meter room size shall be minimum of 3.00 x 5.00 m. Depending upon the requirements, the size shall be increased in consultation with M.S.E.B.

*17.18.1 The spaces for provision of transformers shall be provided as per rules.

17.19. Chimneys

17.19.1 Chimneys, where provided shall conform the requirements of IS: 145-1960.

17.19.2 Notwithstanding the provisions of Regulation No. 17.19.1, the Chimneys shall be built at least 0.9 m. above flat roofs provided the top of the chimneys shall not be below the roofs, provided the top of the chimneys shall not be below the top of adjacent parapet wall. In the case of sloping roofs, the chimney top shall not be less than, 0:6 m. above the ridge of the roof in which the chimney penetrates.

17.20. Cabin- The size of a cabin shall not be less than 3.0 sq. m. The clear passages within the divided space of any floor shall not be less than 0.75 m. and the distance from the farthest space in a cabin to any exit shall not be more than 18.5 m. In case the subdivided cabin does not derive direct lighting and ventilation from any open space/mechanical means, the maximum height of the cabin shall be 2.2 m.

18. PROVISION OF LIFTS

18.1 Provision of lift shall be made for all buildings more than 16 m. in height (See Regulation No. 19.4.9)

19. EXIT REQUIREMENTS

19.1 General-The following general requirement shall apply to exits.

- (a) Every building meant for human occupancy shall be provided with exits sufficient to permit safe escape of occupants in case of fire or other emergency;
- (b) In every building exits shall comply with the minimum requirements of this part except those not accessible for general public use;
- (c) All exits shall be free of a obstructions;
- (d) No building shall be altered so as to reduce the number, width or protection of exits to less than that required;
- (e) Exits shall be clearly visible and the routes to reach the exist shall be clearly marked and sign posted to guide the population to floor concerned; -

- (f) All exit ways shall be properly illuminated;
- (g) Fire fighting equipment where provided along exits shall be suitably located and clearly marked but must not obstruct the exit way and yet there should be clear indication about its location from either side of the exit way;
- (h) Alarm device's shall be installed for buildings above 13 m. in height, to insure prompt evacuation of the population concerned through the exits;
- (l) All exits shall provide continuous means of egress to the exterior of a building or to an exterior open space leading to a street and ;
- (j) Exits shall be so arranged that they may be reached without passing through another occupied unit, except in the case of residential buildings.
- 19.2 Types of exits -
- (a) Exits shall be either of horizontal or vertical type. An exit may be doorway, corridor, passageways to an internal stair case or external stair case, ramps or to a verandah and/or terraces which have access to the street or to roof of a building. An exit may also include a horizontal exit leading to an adjoining building at the same level and
- (b) Lifts and escalators shall not be considered as exits.
- 19.3 Number and Size of Exits -The requisite number and size of various exist shall be provided, based on the population in each room area and floor based on the occupant load, capacity of exits; travel distance and height of buildings as per provisions of Regulation No. 19.3.1. to 9.3.3. -
- 19.3.1. Arrangement of Exits - Exits shall be so located so that the travel distance on the floor shall not exceed 22.5 m. for residential, educational, institutional and hazardous occupancies and 30 m. for assembly, business, mercantile, industrial and storage occupancies. Wherever more than one exits required for a floor of a building, exits shall tie placed as remote from each other as possible. All the exits shall be accessible from the entire floor area at all floor levels.
- 19.3.2 Occupant Load - The population in rooms, areas of floors shall be calculated based on the occupant load given in Table -10.
- 19.3.3 Capacity of Exits - The capacity of exits (doors and stairways) indicating the number of Persons that could be safely evacuated through a unit exit width of 50 cm. shall be as given in Table -11.
- 19.3.4 For all buildings identified in regulation No. 6.2.6.1 there shall be a minimum of two staircases. They shall be of an enclosed type stairway.
At least one of them shall be on the external walls of buildings and shall open directly to the exterior, interior open space or to any open place of safety.
- 19.3.5. The following minimum width provisions shall be made for stair-ways;
- | | | | |
|-----|---|-------|---------|
| (a) | Residential Buildings (dwelling) | | 1.00 m |
| | Note--for Row housing with two storeys the minimum width shall be | | 0.75 m. |
| (b) | Residential Hotel Buildings | | 1.50 m |
| (c) | Assembly buildings like auditorium Theatres and
Cinemas & Educational. | | 1.50 m |
| (d) | Institutional Building like hospital:- | | |
| | Up to 10 beds | | 1 .5 m |
| | More than 10 beds | | 2.0 m |
| (e) | All other building | | 1.5 m. |

TABLE -10
Occupant Load

Sr. No.	Group of Occupancy	Occupant Load Gross Area *in m2 / persons
(1)	(2)	(3)
1.	Residential	12.5
2.	Educational	04.00
3.	Institutional	15+
4.	Assembly	
	(a) with fixed or loose seats and dance floors	0.6++
	(b) without seating facilities including dining rooms	1.5++
5.	Mercantile	
	(a) Street floor and sales basement	3
	(b) Upper sale floors	6
6.	Business and industrial	10
7.	Storage	30
8.	Hazardous	10

*The gross area shall mean plinth area or covered area

+ Occupant load in dormitory portions of homes for the aged, orphanages, insane asylums, etc. where sleeping accommodation is provided shall be calculated at not less than 7.5m². gross area/person.

+ + The gross area shall include, in addition to the main assembly room or space, any occupied connecting room or space in the same storey or in the storeys above or below where entrance is common to such rooms and spaces and they are available for use by the occupants of the assembly space. No deductions shall be made in the gross area for corridors, closets or other sub-divisions the area shall include all space serving the particular assembly occupancy.

TABLE -11
Occupants Per Unit Exit Width

Sr. No.	Group or Occupancy	Number of Occupants	
(1)	(2)	Stairways	Doors
1	Residential	25	75
2	Educational	25	75
3	Institutional	25	75
4	Assembly	60	90

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

.....Table 11 cont.

Sr. No.	Group or Occupancy	Number of Occupants	
		Stairways	Doors
(1)	(2)	(3)	(4)

6	Mercantile	50	75
7	Industrial	50	75
8	Storage	50	75
9	Hazardous	25	40

19.4. Other Requirements of Individual Exits-The detailed requirements of individual exits are given in regulation No. 19.4.1 . to 19.4.6.

19.4.1. Doorways :

- (a) Every exit doorway shall open into an enclosed stairway, a horizontal exit, on a corridor or passage way providing continuous and protected means of egress
- (b) No exit doorway shall be less than 100 cm. in width. Doorways shall be not less than 200 cm. in height. Doorways for bathrooms, water closet, stores etc. shall be not less than 75 cm. Wide
- (c) Exit doorways shall open outwards, that is away from the room but shall not obstruct the travel along any exit. No door, when open, shall reduce the required width of stairway or landing to less than 90 cm. Overhead or sliding doors shall not be installed.
- (d) Exit door shall not open immediately upon a flight or stairs, a landing equal to at least the width of the door shall be provided in the stairway at each doorways, level of landing shall be the same as that of the floor which it serves
- (e) Exit doorways shall be openable from the side which they serve without the use of a key.

19.4.2. Revolving Doors :

- (a) Revolving doors shall not be used as required exits except in residential, business and mercantile occupancies, but shall not constitute more than half the total required door width;
- (b) When revolving doors are considered as required exit way the following assumptions shall be made;
 - (i) Each revolving door shall be credited one half a unit exit width; and
 - (ii) Revolving doors shall not be located at the foot of a stairway. Any stairway served by a revolving door shall discharge through a lobby or foyer.

19.4.3. Stairways:

- (a) Interior stair shall be constructed of non-combustible materials throughout;
- (b) Interior staircase shall be constructed as a self contained unit with at least one side adjacent to an external wall and shall be completely enclosed ;
- (c) A staircase shall not be arranged round a lift shaft unless the latter is entirely enclosed by a material of fire- resistance rating as that for type of construction itself. For buildings more than 15 m. in height, the staircase location shall be to the satisfaction of Chief Fire Officer, Nagpur Fire Brigade.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- (d) Hollow combustible construction shall not be permitted.
- (e) The minimum width of an internal staircase shall be 100 cm. subject to provisions of regulation No. 19.3.5
- (f) The minimum width of treads without nosing shall be 25 cm. for an internal staircase for residential buildings. In the case of other buildings the minimum treads shall be 30 cm. The treads shall be constructed and maintained in a manner to prevent slipping.
- (g) The maximum height of riser shall be 20 cm. in the case of residential buildings and 15 cm. in the case of other buildings. They shall be limited to 12 per flight. For low income housing scheme in narrow plots, the riser may be provided in one flight.
- (h) Handrails shall be provided with a minimum height of 90 cm. from the centre of the tread,
- (j) The minimum unobstructed headroom in a passage under the landing of a staircase and under the staircase shall be 2.2 m.
- * (k) No store or other fire risk shall open directly into the staircase or staircases.
- (l) External exit door of staircase enclosure of ground level shall open directly to the open spaces or can be reached without passing through any door other than a door provided to form a draught lobby.
- (m) In the case of assembly, institutional, residential, hotels, industrial and hazardous occupancies, the exit sign with arrow indicating the way to the escape route shall be provided at a height of 0.5 m. from the floor level on the wall and shall be illuminated by electric light connected to corridor circuits. All exit way marking signs should be flush with the wall and so designed that no mechanical damage shall occur to them due to moving of furniture or other heavy equipments. Further all landings of floor shall have floor indication boards indicating the number floor. The floor indication board shall be placed on the wall immediately facing the flight of stairs and nearest to the landing. It shall be of size not less than 0.5 x 0.5 m.
- (n) In case of single staircase it shall terminate at the ground floor level and the access to the basement shall be by a separate staircase. Wherever the building is served by more than one staircase, one of the staircase may lead to basement levels provided the same is separated at ground level by either a ventilated lobby or cut-off screen wall without opening, having a fire resistance of not less than 2 hours with discharge point at two different ends or through enclosures. It shall also be cut off from the basement areas at various basement levels by a protected and ventilated lobby / lobbies. The staircase shall be lighted and ventilated and the minimum size of openings on walls abutting to open spaces shall be 0.3 sq. m. per landing.

19.4.4. Fire escape or external stairs - For buildings above 15 m. in height fire escape stairs shall be provided subject to the following conditions :

- (a) Fire escape shall not be taken into account in calculating the evacuation time of building;
- (b) All fire escapes shall be directly connected to the ground;
- (c) Entrance to fire escape shall be separate and remote from the internal staircase;
- (d) The route to fire escape shall be free of obstructions at all times, except a doorway leading to the fire escape; which shall have the required, fire resistance;
- (e) Fire escape shall be constructed of non-combustible materials;
- (f) Fire escape stairs shall have straight flights not less than 75 cm. wide with 15 cm. treads and risers not more than 20 cm. The number of risers shall be limited to 16 per flight.
- (g) Handrail shall be of height not less than 90 cm.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- 19.4.5. Spiral stairs (fire, escape) - The use of spiral staircase shall be limited to low occupant load and to a building of height 9 m. unless they are connected to platforms, such as balconies and terraces to allow escapee to pause.

A spiral fire escape shall be not less than 150 cm. in diameter and shall be designed to give adequate headroom.

- 19.4.6. Ramps:

(1) Ramps for pedestrians.-

(a) Ramps with a slope of not more than 1 in 10 may be substituted for and shall comply with all the applicable requirements of required stairways as to enclosure capacity and limiting dimensions. Ramps shall be surfaced with approved non-slipping material;

(b) The minimum width of the ramps in hospitals shall be 2.25 m ;

(c) Handrails shall be provided on both sides of the ramp.

- *(2) Ramps for basement or storeyed parking - For parking spaces in a basement and upper floors, at least two ramps of adequate width and slopes shall be provided preferably to the opposite ends. Such ramps may be permitted in the side and rear marginal open spaces after leaving sufficient space for movement of firefighting vehicles. Provided that when a building abutting 3 or more roads, then ramps shall be allowed to front marginal open spaces facing the smaller road or less important road from traffic point of view.

- 19.4.7 Corridors :

(a) The minimum width of a corridor shall not be less than 90 cm. in the case of 2 storey row housing residential building and 150 cm. in the case of other building and actual width shall be calculated based on the provisions of a regulation No. 19.3.1 to 19.3.3 ;

(b) In case of more than one main staircase of the building interconnected by a corridor or other enclosed space, there shall be at least one smoke stop door across the corridor or enclosed space between the doors in the enclosing walls of any two staircases.

- 19.4.7 (i) The passages (covered or uncovered) including an arcade a courtyard, a porch or portico, a mezzanine floor loft, spaces to left open to sky in accordance with Building or Zoning Regulations, in any premises shall not be used for any other purpose than the one permissible and in particular the space to be left open to sky, including the space on which arcade is permitted, shall not be used for putting up. The shops (moveable or immovable temporary shops) or permanent or temporary encroachments such as projecting steps or stacking of goods and parking of vehicles etc. So that pedestrians can freely use it as foot-paths.

- 19.4.8. Refuge Area.-For all buildings exceeding 15 m. in height except multifamily dwellings, refuge area shall be provided.

- 19.4.8.1 Refuge area shall be provided on the external walls as cantilever projection or in any other manner (which will not be covered in FSI) with a minimum area of 15 sq. m.

- 19.4.9. Lifts :-

(a) All the floors shall be accessible for 24 hours by the lifts. The lifts provided in the buildings shall not be considered as a means of escape in case of emergency

(b) Grounding switch at ground floor level to enable the fire service to ground the lift cars in any emergency shall also be provided;

(c) The lift machine room shall be separate and no other machinery shall be installed therein.

20. FIRE PROTECTION REQUIREMENTS

- 20.1. Buildings shall be planned, designed and constructed to ensure fire safety and this shall be done in accordance with part IV Fire Protection of National Building Code of India, unless otherwise specified in these regulations. In the case of buildings identified in Regulation No. 6.2.6.1. the building schemes shall also be cleared by the Chief Fire Officer, Nagpur Fire Brigade.
- 20.2. The additional provisions related to fire protection of building more than 15 m. in height and buildings identified in regulation No. 6.2.6.1. shall be as given in Appendix 'P'

21. SPECIAL REQUIREMENTS OF OCCUPANCIES'

- 21.1. Special requirements of Educational buildings.
- 21.1.1. No class room shall admeasure less than 38 sq. m. with a minimum dimension of 5.50 m.
- 21.1.2. The height of any class room shall not be less than 3.60 m.
- 21.1.3. Exit Requirements -This shall conform to regulation No. 19 and 19.3.5.
- 21.1.4. Requirements of Water Supply, Drainage and Sanitation:- This shall conform to requirements of regulation Nos. 26.2 and 26.3 and Table 12 and 17.
- 21.1.5. Parking spaces - This shall conform to regulation Nos. 16 and Table 8.
- 21.2. Special Requirements of Institutional Buildings (Hospital, Maternity Homes and Health Centres, Sanitaria).
- 21.2.1. Any Special ward in the hospital building shall not admeasure less than 9.0. sq. m. in area with no side less than 3 m.
- 21.2.2. Area of the general wards shall not admeasure less than 40 sq. m. with no side less than 5.5. m.
- 21.2.2.1. Every building shall have a refuge area of minimum 7.50 sq. m. size with cover on top and unclosed on at least three sides. The same shall not be allowed in marginal open spaces. Modern method of incineration of the refuge may be adopted.
- 21.2.3. Exit Requirements-This shall conform to regulation No. 19 and 19.3.5.
- 21.2.4. Requirements of Water Supply, Drainage and Sanitation - This shall conform to requirements of Regulation No. 26.2 and 26.3 and Tables 12, 18 and 19.
- 21.2.5. Parking Spaces - This shall conform to regulation No. 16 and Table-8.
- 21.3. Special Requirements of Cinema Theatre (Assembly Halls)
- 21.3.1. They shall conform to the provisions of Maharashtra Cinema (Regulations) Rules, 1966, as amended from time to time.
- 21.3.2. Exit Requirements -This shall conform to regulations No. 19 and 19.3.5.
- 21.3.3. Requirements of Water Supply Drainage and Sanitation -This shall conform to the requirements of regulation No. 26.2 and Tables 12, 13 and 22.
- * 21.3.4. Parking Spaces - This shall conform to regulation No. 16,
- 21.4. Special Requirements of Mercantile Buildings.
- 21.4.1. Minimum area of shop shall be 6 Sq. m. in R-1 zones with a minimum width of 2.0 m. and 10 Sq. m. in R-2 and other zones with a minimum width of 3 m.
- 21.5. Special requirements of Industrial Building.-

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- 21.5.1 In addition of provisions of these regulations, regulations prescribed under Factory Act shall be applicable.
- 21.5.2 In the case of Industrial Buildings with different operations/processes, the different (gaseous, solid, liquid) effluents shall be so treated, subject to the approval of Maharashtra Prevention of Water Pollution Board and Chief Inspector of Steam Boilers and Smoke Nuisance, before letting it out on to the air, ground or water course.
- 21.5.3. Exit Requirements -This shall conform to Regulation No. 19, 19.3.5.
- 21.5.4. Requirements of Water Supply, Drainage and Sanitation:- This shall conform to regulation No. 26.2 and 26.3 and Tables 12, 13 and 25.
- 21.5.5. Parking spaces/Loading and unloading spaces-This shall conform to regulation No. 16,16.5 and Table 8.

PART III - STRUCTURAL SAFETY AND SERVICES

22. STRUCTURAL DESIGN

- 22.1. The structural design of foundations, elements made of masonry, timber, plain concrete; reinforced concrete, prestressed concrete and structural steel shall be carried out in accordance with Part VI. Structural design Section 1-Loads, Section 2-Foundation Concrete, Section 3-Wood, Section 4-Masonry, Section 5-Concrete, Section 6-Steel of National Building Code of India.

23. A QUALITY OF MATERIALS AND WORKMANSHIP

- 23.1. All materials and workmanship shall be of good quality conforming generally to accepted standards of Public Works Department of Maharashtra and Indian Standard Specifications and Codes as included in Part V Building Materials and Part VII construction Practices and Safety of National Building Code of India.
- 23.2. All borrow pits dug in the course of construction and repair of buildings, roads, embankments etc. shall be deep and connected with each other in the formation of a drain directed towards the lowest level and properly stopped for discharge into a river stream, channel or drain and no person shall create any isolated borrow pit which is likely to cause accumulation of water which may breed mosquitoes.

24. ALTERNATIVE MATERIALS, METHODS OF DESIGN AND CONSTRUCTION AND TESTS

- 24.1. The provision of the regulations are not intended to prevent the use of any material or method of design or construction not specifically prescribed by the regulations provided any such alternative has been approved.
- 24.1.1. The provision of these regulations are also not intended to prevent the adoption for architectural planning and layout conceived as an integrated development scheme.
- 24.2. The authority may approve any such alternative provided it is found that the proposed alternative is satisfactory and conform to the provisions of relevant parts regarding material, design, and construction and that material, method or work offered is, for the purpose intended, at least equivalent to that prescribed in the rules in quality, strength, compatibility, effectiveness, fire and rate resistance, durability and safety.
- 24.3. **Tests:-** Whenever there is insufficient evidence of compliance with the provisions of the regulations of evidence that any material or method of design or construction does not conform to the requirements of the rules or in order to substantiate claims for alternative materials, design or methods of construction, the Authority may require tests sufficient in advance as proof of compliance. These tests shall be made by an approved agency at the expense of the owner.
- 24.3.1. Test method shall be as specified by the regulations for the materials or design or construction in question. If there are no appropriate test methods specified in the regulations, the Authority shall determine the test procedure. For methods of tests for building materials; reference may be made to relevant Indian standards as given the National Building Code of India, published by the Indian Standards Institution. The latest version of the National building Code of India shall be taken into account at the time of enforcement of these rules.
- 24.3.2. Copies of the results of all such tests shall be retained by the authority for a period of not less than two year after the acceptance of the alternative material.

25. BUILDING SERVICES

- 25.1. The planning, design and installation of electrical installations, air-conditioning and heating work shall be carried out in accordance with Part VIII Building Services Section 2-Electrical Installations, Section 3-Air-conditioning and Heating of National building Code of India.

- 25.2. The planning, design including the number of lifts, type of lifts, capacity of lifts depending on occupancy of building; population on each floor based on occupant load, height of building shall be in accordance with Section - 5 installation of Lifts and Escalators and National Building Code of India. In existing buildings, in case of proposal for one additional floor, existing lift may not be raised to the additional floor.
- 25.2.1. Maintenance of Lift in working order the lifts shall be maintained in working order in line with provisions of regulation No. P-4.

26. PLUMBING SERVICES

- 26.1. The planning, design, construction and installation of water supply, drainage and sanitation and gas supply systems shall be in accordance with the provisions of Water Supply and Drainage rules of Nagpur Municipal corporation of Nagpur and Part IX Plumbing Services- Section 1 Water Supply, Section 2 Drainage and sanitation and Section-3 Gas supply of National Building Code of India.
- 26.2. Requirements of water supply in building. The total requirements of water supply shall be calculated based on the population as given below:

Occupancy	Basis
Residential Building	5 persons tenement
Other Buildings	No. of persons on occupant load and area of floors given in table 8.

- 26.2.1. The requirements of water supply for various occupancies shall be as given in Table 12, 13, and 14 or as specified by the Authority from time to time.
- 26.3. Requirements of Sanitary Fittings - The sanitary fittings and installations for different occupancies shall be as given in table 15, 16,17,18,19,20,21,22,23,24,25 & 26.
- 26.3.1. The total requirements shall be calculated based on the population as per Rule No. 26.2.

27. SIGNS AND OUTDOOR DISPLAY STRUCTURES

- 27.1. The display of advertising signs on buildings and land shall be in accordance with part X "Signs and outdoor display structures" of National Building Code of India as amended from time to time.
- 27.2. In addition to provisions of Regulation No. 27.1 the following provisions shall be complied with for permitting advertising signs.
- 27.2.1. Roof Signs - They shall not be permissible.
- 27.2.2. Wall Signs - They shall be below by ground floor roof slab level.
- (a) Any sign attached to the wall shall not project more than 7.5c.m. from the wall.
- (b) Lighting reflections may project maximum 50 cm beyond the wall surface.
- *27.2.3. Project sign shall not project beyond 0.90m. from the wall,**
- 27.2.4. The overhead clearance form the ground level shall not be less than 2.50m.
- 27.2.5. No project sign shall be above the ground floor roof slab level.
- 27.2.6. Projecting signs shall include polls signs.
- 27.2.7. Morque signs :- They shall not project beyond the chajja in the building and shall not be above the ground floor roof slab height. They shall be above 2.50m height from ground level.
- 27.2.8. Sky signs - Regulations laid down by the Authority shall apply.
- * Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- 27.2.9. Prohibition of advertising signs and outdoor display structure in certain cases - Notwithstanding the provisions of sub-regulations no advertising sign or outdoor display structures shall be permitted on buildings of architectural, aesthetical, historical or heritage importance as may be decided by the Commissioner, or on Government Buildings save that in the case of Government buildings only advertising signs or outdoor display structure may be permitted if they relate to the activities for the said buildings own purposes or related programmes.

TABLE No. 12

PER CAPITA WATER REQUIREMENTS FOR VARIOUS OCCUPANCIES/USES

Sr. No.	Type Of Occupancy	Consumption per head per day (in litres)
(1)	(2)	(3)
1	Residential	
	(a) in living units	135
	(b) Hotels with lodging accommodation (per bed) ..	180
2	Educational:	
	(a) Day Schools	45
	(b) Boarding Schools	135
3	Institutional (Medical Hospitals) :	
	(a) No. of beds not exceeding 100	340
	(b) No. of beds exceeding 100	450
	(c) Medical quarters and hostels	135
4	Assembly-Cinema theatres, auditorium etc. (per seat of accommodation).	15
5	Government of Semi-public business.	45
6	Mercantile (Commercial:)	
	(a) Restaurants (per seat):	70
	(b) Other business buildings.	45
7	Industrial :	
	(a) Factories where bath-rooms are to be provided ..	45
	(b) Factories where no bath-rooms are required to be provided. ..	30
8	Storage (including warehousing)	30
9	Hazardous.	30
10	Intermediate / Stations (excluding mail and express stops).	45 (25)*
11	Junction Stations	70 (45)*
12	Terminal / Stations.	45
13	International and domestic Airports.	70

*The value in parenthesis are for stations where bathing facilities are not provided.

Note: The number of persons for Sr. No. (10) to (13) shall be determined by the average No. of passengers handled by the station daily; due consideration may be given to the staff and workers likely to use the facilities.

TABLE No. 13
FLUSHING STORAGE CAPACITIES

Serial No.	Classification of building	Storage capacity.
(1)	(2)	(3)
1	For tenements having common convenience	900 litres net per w. c. seat.
2	For residential premises other than tenements having common convenience.	270 litres net for one w. c. seat and 180 litres for each additional seat in the same flat.
3	For Factories and Workshops	900 litres per w.c. seat and 180 litres per urinal seat.
4	For cinemas public assembly halls, etc.	900 litres per w. c. seat and 350 litres per urinal seat.

TABLE No. 14

DOMESTIC STORAGE CAPACITIES

Serial No.	No. of Floors	Storage Capacity	Remarks
(1)	(2)	(3)	(4)
For premises occupied as tenements with common conveniences			
1.	Floor (Ground)	NIL	Provided no dwntake fittings are installed.
2.	Floors 1,2, 3, 4, 5 and upper floors	500* literes per tenements	
For premises occupied as Flats or blocks			
1.	Floor (Ground)	NIL	Provided no dwntake fittings are installed.
2.	Floors 1,2,3,4,5 and upper floors	500* literes.	

Note 1: If the premises are situated at a place higher than the road level in the front of the premises, storage at ground level shall be provided on the same line as on floor 1.

Note 2 : The above storage may be permitted to be installed provided that the total domestic storage calculated on the above basis is not less than the storage calculation on the number of dawntake fittings according to the scales given.

Dwntake taps	70 litres each
Showers	135 litres each
Bathtubs	200 litres each

*Subject to provisions of water supply and drainage rules.

TABLE No. 15

SANITION REQUIRMENTS FOR SHOPS AND COMMERCIAL OFFICES				
Serial No.	Fitments			For personnel
(1)	(2)			(3)
1.	Water closet	One of every 25 persons or part thereof exceeding 15 (including employees and customers). For female personnel, one per every 15 persons or part thereof exceeding 10.
2.	Drinking water fountain	..		One for every 100 persons with a minimum of one on each floor.
3.	Wash basin	One for every 25 persons or part thereof. One of such wash basins on each floor shall be fixed at height of 80 cms. With tap at 100 cms. above finished floor level for the use of handicapped, disable, old and infirm persons.
4.	Urinals	Same as Sr. No. 3 of Table.
5.	Cleaner's sink	One per floor minimum preferably in or adjacent to sanitary rooms.

* **Note** : No of customers for the purpose of the above calculation shall be the average No. of persons in the premises for a time Interval of one hour during the peak period for male-female calculations, ration of 1 : 1 may be assumed. One sanitary block, containing one water closet, one wash basin in and two urinals shall be provided minimum up to 5 shops.

TABLE No. 16
SANITATION REQUIREMENTS FOR HOTELS

(1) Sr. No.	(2) Fitments	(3) For Residential Public & Staff	(4) For public rooms		(6) For Non-residential staff	
			(5) For Males	(5) For Femals	(7) For Males	(7) For Females
1.	Water-closets	One per 8 persons committing occupants of the room with attached water-closet minimum of 2 in both sexes lodged.	One per 100 persons upto 400 persons; for over 400 add at the rate of one per 250 persons or part thereof.	2 for 100 persons upto 200 persons; over 200 add at the rate of 1 per 100 persons or part thereof.	1 for 1-15 persons 2 for 16-35 persons 3 for 36-65 persons 4 for 66-100 persons.	1 for 1-12 persons 2 for 13-25 persons 3 for 26-40 persons 4 for 41-57 persons.
2.	Ablution taps	One in each water-closet	One in each water-closet.	One in each water-closet.	One in each water-closet.	One in each water-closet.
One water tap with draining arrangements shall be provided for every 50 persons or part thereof in the vicinity of water-closet and urinals.

Thereafter, the owner will be entitled to the full permissible F.S.I. of the plot without taking into account the area utilized for constructing the facility.

29.0. Transfer of Development rights :

In certain circumstances, the development potential of a plot of land may be separated from the land itself and may be made available to the owner of the land in the form of transferable development rights (TDR). These Rights may be made available and be subject to the Regulation, mentioned below.

- * 29.1 (A) The owner or lessee of a plot of land which is reserved for a public purpose or road construction or road widenings, in the Development plan and for additional amenities deemed to be reservations provided in accordance with these regulations, excepting in the case of an existing or retention user or any require compulsory or recreational open space, shall be eligible for the award of Transferable Development Right (TDRs) in the form of Floor Space Index (F. S. I.) to the extent and on the conditions set out below. Such award will entitle the owner of the land to FSI in the form of Development Rights Certificate. (DRC) which he may use himself or transfer to any other person.
- 29.1 (B) However in case of lessee who shall pay the lessor of deposit with the planning Authority/ Development Authority of appropriate as the case may be, for the, payment to the lessor, an amount equivalent to the value of the lessors interest to be determined by any of the said authorities considered on the basis of Land Acquisition Act. 1894, FSI of TDR against the area of land surrendered free of cost and free from all encumbrances will be available to lessee.
- 29.2 Subject to the Regulation 29.1 above, where a plot of land is reserved for any purpose specified in section 22 of Maharashtra Regional and Town Planning Act, 1966, the owner will be eligible for Development Rights (DRS) to the extent stipulated in these Regulations after the said land is surrendered free of cost and after completion of Development or construction as per these Regulation if he undertakes the same.
- 29.3. Development Rights (DRs) will be granted to an owner or leasee only for reserved lands which are retainable under the Urban Land (Ceiling and Regulations) Act, 1976 and in respect of all other reserved lands to which provisions of aforesaid Act do not apply, and on production of a certificate to this effect from the Competent Authority under that Act before a Development Right is granted. In the case of non-returnable land, the grant of Development Rights shall be to such extent and subject to such conditions as Government may specify, Development Right (DRs) are available only in cases where development of a reservation has not been implemented i.e., DRs will be available only for prospective development of reservations.
- 29.4 Development Right's Certificates (DRCs) will be issued by the Commissioner/ Chairman himself. They will state, in figures and in words, the FSI credit in square meters of the built-up area to which the owner of leases of the said reserved plot is entitled, the place and user zone in which the DRs are earned and the areas in which such credit may be utilised.
- 29.5. The built-up area for the purpose of FSI credit in the form of a DRC shall be equal to the gross area of the reserve plot to be surrendered and will proportionately, increase or decrease according to the permissible FSI of the zone where from the TDR has originated,.
- 29.6. When an owner or lessee also develops or constructs the amenity on the surrendered plot at his cost subject to such stipulations as may be prescribed by the Commissioner/Chairman or the appropriate authority, as the case may be, and to the satisfaction and hands over the said developed/ constructed amenity to the Commissioner/Chairman /appropriate authority, free of cost, he may be granted by the Commissioner Chairman a further DRs in the form of FSI equivalent to the area as decided by the Government, utilisation of which etc. will be subject to these regulations.
- 29.7. A DRC will be issued only on the satisfactory compliance of the conditions prescribed in these Regulations.
- 29.8. If a holder of DRC intends to transfer it to any other person, he will submit the DRC to the Commissioner/ Chairman with an appropriate application for an endorsement of the new holder's name, i.e., transferee on the said Certificate, without such an endorsement by the Commissioner/ Chairman himself, the transfer shall not be valid the Certificate will be available for use only by the earlier original holder.

29.9. A holder of DRC who desires to use FSI Credit Certificate therein on a particular plot of land shall attach to his application for development permission valid DRCs to the extent required.

29.10. DRC shall not be valid for use on receivable plots in the areas listed below, (identified in the limits of N. M. C.

- (a) In area included in central zone as shown on Development Plan.
- (b) All Gaothan /congested area shown on Development Plan and notified slums included in the limits of N. M. C.
- (c) Area of Rajbhavan.
- (d) Area covered by village Sitaburdi, Gadga, Dharampeth.
- (e) All properties abutting National Highways, State Highways and ring road upto 50m. depth or two properties depth whichever is more.
- (f) Areas in Agricultural zones and in blue zone (prohibitive zone) and red zone (restrictive zone) as specified by Irrigation Department.
- (g) On plots for housing schemes of slum dwellers for which additional F. S. I. is permissible.
- (h) Areas where the permissible F. S. I. less than 1.0 and also where the F. S. I. of 2 or 2.5 (as the case may be) as permissible under previous D. C. Rules is already consumed.

* 29.11. The DRC's in Nagpur Corporation area shall be issued as below-

Sr. No.	Reserved lands in Zone (Originating plots)	Zone where the DRC's can be received (Receiving plots) excluding area listed in 10 above
1	Zone 'A'	Zone ' B' and Zone 'C'
2	Zone 'B'	Zone 'B' and Zone 'C'
3	Zone 'C'	Zone 'C' only.
4	Heritage Building/ precious Natural features ..	In addition to above, TDR from Zone 'A' may be allow to be utilised in the same zone.

NOTE: (1) Zone 'A' shall include congested area including planning sector-central as per Revised Development Plan and the area of village Dharmpeth, Gadga and Sitabardi. In case of any dispute regarding the boundaries of these zones the decision of the Commissioner/ Chairman will be final and binding upon all the parties.

(2) Zone 'B' shall include the area situated between the ring Road and 'A' zone.

(3) Zone 'C' shall include all the remaining area (excluding zone 'A' and 'B') within Nagpur Municipal Corporation Limit.

29.12. The user that will be permitted for utilisation of the DRC's on account of Transfer of Development Rights will be as under :

Sr. No.	Predominant Zone proposed in Development Plan in which reserved site is situated	Land user to be permitted in receiving area
1	Residential	Only residential areas in residential zone only.
2	Commercial	Only commercial user in commercial zone and only residential users in, residential zone.
3	Industrial	Only residential users in residential zone.
4	Public / Semi public	Only residential users in residential zone.

29.13. DRC's may be used on one or more plots of land whether vacant or already developed or by the erection of additional storeys, or in any other manner consistent with these Regulations, but so as not to exceed in any plot a total built-up FSI higher than that prescribed hereinafter.

* 29:14.1 The FSI receiving plot shall be allowed to be exceeded by not more than 0.8 earned either by way of DR in respect of reserved plot or by way of DR in respect of land surrender for road widening or construction of new roads.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- * 29.14.2. To be deleted.
- 29.14.3. In the matter of cases wherein the areas under Acquisition for road widening out of the plots, wherein the entire potential of the plot is already consumed, the TDR's as per sanctioned DCR would not be permissible.
- 29.15. DR's will be granted and DRC's will be issued only after the reserved land is surrendered to the Corporation/NIT, where it is appropriate Authority, otherwise to the State Government as, the case may be free of cost and free of encumbrances and after the owner or lessee has levelled the land to the surrounding ground level and after he has constructed a 1.5 m. high compound wall (or at a height stipulated by the Commissioner/ Chairman) with a gate at the cost of the owner, and to the satisfaction of the Commissioner/ Chairman, or the State Government (as the case may be). The cost of any transaction involved shall be borne by the owner or leasee.
- 29.16. With an application for development permission, where an owner seeks utilisation of DR's, he shall submit the DRC to the Commissioner/Chairman who shall endorse thereon in writing in figures and words, the quantum of the DRC proposed to be utilised, before granting development permission, and when the development is complete, the Commissioner shall endorse on the DRC in writing in figures and words the quantum of DR's actually used and the balance remaining thereafter, if any, before issue of occupation certificate.
- 29.17. A DRC shall be issued by the Commissioner/Chairman himself as a certificate printed on bond paper in appropriate form prescribed by Commissioner/ Chairman. Such a certificate will be a transferable " negotiable instrument" after the authentication by the Commissioner/ Chairman. The Commissioner/ Chairman shall maintain a register in a form considered appropriate by him of all transactions, etc. relating to grant of utilisation of DR's.
- 29.18. The surrendered reserved land for which a DRC is to be issued shall vest in the Corporation/ Nagpur : Improvement Trust (NIT) or the State Government, if the appropriate authority is other than the Corporation/ NIT and 'such land shall be transferred in the City Survey Records in the name of the Corporation/NIT or the State Government as the case may be, and shall vest absolutely in the Corporation/NIT or the State Government. The surrendered land-so transferred to the State Government in respect of which the Corporation/NIT is not the appropriate authority, may on application, thereafter be allotted by the State Government in favour of the concerned authority which may be State or Central Government Department Authority or organisation, or any other public authority or organisation on appropriate terms and land value as may be decided by the State Government.
- 29.19. The Commissioner/Chairman Appropriate shall draw up in advance and made public from time to time a phased annual programme (allowing a 10 percent variation to deal with emergency development) for utilisation of TDR's in the form of DR's prioritising revised development plan reservations to be allowed to be surrendered and indication the areas for their utilisation on receiving plots. Notwithstanding this, in urgent cases the Commissioner/NIT appropriate authority, may for reasons to be recorded in writing, grant DRS, as and when considered appropriate and necessary.
- 29.20. If any contiguous land in addition to the land under reservation for which TDR is given remains unbuildable the NIT/Corporation may grant TDR for such land also. The Chairman/Commissioner will take care that such land are utilised for open space, public toilet etc.
- 29.21. If any dispute arises regarding the utilisation of TDR within the areas of NIT and Corporation between NIT and Corporation, then decision of the Government shall be binding on both. However, in such cases both authorities (NIT and Corporation) should co-operate each other. It is clarified that TDR shall be utilised according to TDR receiving zone, irrespective of whether it is granted by NMC or NIT

30.0. SUPPLEAENTARY AND MISCELLANEOUS PERMISSIONS

30.1. Clarification.

If any question or dispute arises with regard to interpretation of any of these Regulations the matter shall be referred to the State Government which after considering the matter and if necessary, after giving hearing to the parties, shall give a decision on the interpretation of the provisions of these Regulations. The decision of the Government on the interpretation of these Regulations shall be final and binding on the concerned party or parties.

30.2. *Power to delegate.*-The State Government may, by notification in, the Official Gazette delegate by a general or special order of its powers under these Regulations, subject to such conditions as it may consider appropriate, to any officer of the State Government not below the rank of Deputy Secretary except those relating to any matter which is required to be dealt with under the special permission of the Commissioner/Chairman.

31.0 *Regulation for Information Technology Establishments :-* Information Technology Establishments may be permitted subject to the regulations mentioned in Appendix 'Q'

* 32.0. Users permitted below flyover- Commercial user may be permitted below new flyover or in New subways subject to the conditions mentioned in Appendix 'R'. Kept in abeyance

33.0 Open space relaxation in narrow plots may be granted by Commissioner/Chairman according to Tables 31 and 32

34.0. Regulations for conservation of buildings artifacts, structures, areas and precincts of historic and/or assthetic and/or architectural and/or cultural significance and/or natural features of environmental significance (Heritage buildings and precincts) along with list are separately published by State Government vide Notification No. TPS-2491/1835/CR-86/91/UD-9, dated 16-2-2000.

APPENDIX -A
(Regulation No. 6)

From for first application for development under section 44/45/58/89 of Maharashtra regional and town planning act, 1966 and to erect a building under section 274 of the city of Nagpur corporation act, 1948 or under section of the Nagpur improvement Trust Act, 1936.

To,

The Municipal Commissioner/Chairman,
Nagpur Municipal Corporation/ Nagpur Improvement Trust.

Sir,

I hereby give notice that I intend to carry out development in the site/ to erect, to re-erect/ to demolish / to make material alterations in the building on /in plot No Town and Revenue No C.T.S. No situated at Road / Street City No and in accordance with Section 44/45/58/89 of Maharashtra Regional and Town Planning Act, 1966 and Section 274 of THE CITY OF NAGPUR CORPORATION ACT, 1948 /SECTION OF THE NAGPUR IMPROVEMENT TRUST ACT, 1936.

I forward herewith the following plans and statements (Item 1 to 6) wherever applicable, in quadruplicate signed by me and (Name in block letters), the Architect / Licensed Engineer / Structural Engineer / Supervisor, the License No who has prepared the plans, designs and a copy of other statements /documents as applicable (Items 7 to 10).

- (1) Key Plan (Location Plan)
- (2) Site Plan
- (3) Sub-Division/Layout Plan
- (4) Building Plan
- (5) Service Plan
- (6) Particulars of Development in Form
- (7) Ownership Title
- (8) Attested copy of Receipt for payment of Building Permission
- (9) Clearance Certificate of Tax Arrears
- (10) No Objection Certificate, where required.

I request that the proposed development/ construction may be approved and permission accorded to me to execute the work.

**FORM GIVING PARTICULARS OF DEVELOPMENT
(PART OF APPENDIX 1.....ITEM 6)**

1. (a) (i) Full Name of Applicant _____
(ii) Address of applicant _____
- (b) Name and address of Architect/
licensed Engineer/ Structural
Engineer/ Supervisor employed. _____
- (c) No. and date of issue of Licence _____
2. Is the plot affected by any reservations or road lines ? if yes,
are these correctly and clearly marked on the block plan ? _____
3. *(a) What is the total area of the plot according to the
document? _____
- *(b) Does it tally with the Revenue/CTS Record _____
- *(c) What is the actual area available on site measured
by Architect/licensed Engineer/ Structural Engineer /
Supervisor. _____
- (d) Is there any deduction in the original area of the
plot on account of road lines or reservation. Please
state the total area of such deductions? _____
- (e) If so, what is the net area? _____
- * The permission shall be based on the area whichever is
minimum. _____
- (Note : TO INDICATE DETAILS ON THE SITE/BUILDING PLAN AS IN PROFORMA)
4. Are all plans as required under Rule No. 6.2 Enclosed? _____
5. (a) Is the plot of a city Triangulation Survey Number,
Revenue Survey Number of Hissa Number of a Survey
Number or a Final Plot Number of a Town Planing
Scheme or a part of an approved layout? _____
- (b) Please state Sanction Number and Date of Sub-
division/Layout _____
6. (a) In what zone does the plot fall ? _____
- (b) What is the permissible F.A.R. of the zone ? _____
- (c) What is the number of tenements per hectare
permissible in the zone ? _____
7. (a) Is the use of every room in the proposed
work marked on the plans? _____
- (b) Is it in accordance with the rules ? _____
- (c) Does the use of the building, fall in the category of
special types of buildings like cinema halls, theatres,
Assembly halls, stadia, buildings for religious purpose,

- Hospital buildings, educational buildings, markets and exhibition halls etc.?
-
8. If the work is in connection with an industry :
- (a) Please briefly describe the main and accessory process.

 - (b) Please state the maximum number of workmen and the total horse power likely to be employed per shift in the factory

 - (c) Under what industrial classification does it fall (Reference to relevant regulation should be given)

 - (d) Is the proposal for relocation of an existing industry, if so give the name and address of existing industry?

 - (e) Will the building be at 10 m. away from the boundary of a residential and commercial zone?

 - (f) Is the proposal for a scenic industrial estate on a plot reserved for service industry ?

 - (g) Nature and quantum, of industrial waste/effluents and method of disposal

9. (a) What is the average
- (i) prescribed width?

 - (ii) Existing width of the street?

- (If the plot abuts on two or more streets, the above information in respect of all streets should be given)
- (b) What is the height of the building?
- (i) Above the center of the street

 - (ii) Above the average ground level of the plot

- (c) Does it comply with the Rule No. 15.5?

10. (a) If there are existing structures on the plot

- (i) Are they correctly marked and numbered on the site plan?

 - (ii) Are those proposed to be demolished immediately and coloured yellow?

 - (iii) What is the plinth area and total floor area of all existing structure to be retained? (Please append statement I giving details)

 - (iv) What is the number of existing tenement in the structure to be retained ?

- (b) What is the plinth area and total floor area of the proposed work?
(Please append statement II giving details)

- (c) What is the number of tenements proposed?

NOTE : TO INDICATE DETAILS ON THE BUILDING PLAN AS IN PROFORMA 1

- 11. (a) Please state the plinth area and total floor area, existing and proposed (total of Item No. 10 (a) (iii) and 10 (c)) _____
- (b) Please state the overall F.A R (Item 11 (a) divided by Item 3 (e)) _____
- (c) Does the work consumed the full F.A.R. of the plot, as given in Item 6 (b) ? If not, why not ? _____
- (d) Is the Building proposed with setbacks on upper floors ? _____
- (e) What is the total number of tenements ? (Item 10 (a) plus Item 10 (c)) _____

NOTE : TO INDICATE DETAILS ON THE BUILDING PLAN AS IN PROFORM 1

- 12. (a) What is the width of the front open space ? If the building abuts two or more streets, does the front open space comply with Rule No. 15. 1.3? _____
- (b) Please state which of the following rules is applicable for the front open spaces :
N-2.1 to N-2.8
and does the front open space comply with that rule ? _____
- 13. (a) What is :
(i) the width of the side open space (s) ? _____
(ii) the width of the rear open space (s) ? _____
(iii) the distance between buildings? _____
- (b) Are there two or more wings to the buildings ?
If so, are the open spaces separate or distinct for each wing as required under Rule No. 15.1 .6? _____
- 14. If the plot is narrow, which clause under Table No. 31 or 32 do you proposed to taken advantage of (Whatever applicable) ? _____
- 15. (a) What are the dimensions of the inner or outer chowk? _____
- (b) (i) Is are room dependent for its light and ventilation on the chowk ?
If so, are the dimensions as required for each wing of the building ? _____
- (ii) If not, is the area equal as per Rule No. 15.2? _____
- 16. If the area of the building is greater than 14 meter above the average ground level, is provision for lifts made ? _____

Type	Passenger Capacity	No. of Lifts	Type of Doors
(1)	(2)	(3)	(4)

- (b) Details of Fire Lift.
17. (a) Does the building fall under purview of Rule No. 6.2.6.1 ? _____
- (b) If so, does the proposed fire protection requirements confirm to Appendix P ? _____
- (c) If not, give reasons for non Conformity _____
- (a) _____
- (b) _____
- (c) _____
- (d) _____
18. (a) (i) What are the requirements for parking spaces under the Rules ? _____
- (ii) How many are proposed? _____
- (iii) How many lock up garages are proposed ? - _____
- (b) (i) Are loading-unloading spaces necessary under Rule No. 16.5 ? _____
- (ii) if so, what is the requirement ? _____
- (iii) Now many are proposed ? _____

NOTE: INDICATE DETAILS ON BUILDING PLANS AS IN PROFORMA-I

19. (a) (i) What are the maximum widths of balcones ? _____
- (ii) Will they reduce the required open spaces to less than the provisions of Rules ? _____
- (iii) Do they serve as a passage to any part of the building? _____
- (iv) What is their total area ? _____
- (b) What is the maximum width of weather frames, Sunshades (Chajja), Sun breakers, cornice, eaves or other projection ? _____
- (c) (i) Are any porches I Canopies proposed ? _____
- (ii) Are they in compliance with Rule No. 15.4.1 ? _____
20. (a) What is the width of the means of access ? _____
- (b) What is its clear height ? _____
- (c) Will it be paved, drained and kept free of encroachment? _____
21. Is recreational or amenity open space provided as required under Rule No. 13.3 ? _____
- (a) Are any accessory buildings proposed ? If so, for What purpose ? _____
- (b) What are their heights ? _____
- (c) Are they 7.5 m away from the street or front boundary and if _____

- located within the open spaces 1 .5 m. from other boundary ? _____
- (d) Is their area calculated in F.A.R. ? _____
23. (a) What is the proposed height of the compound I boundary wall ?
Is it at a junction ? _____
- (b) Is it in compliance with Rule 17.16 ? _____
24. (a) Is the proposal in the Air Port Zone ? _____
- (b) Is a "No. Objection certificate" for height and character of smoke from chimneys obtained in compliance with Rule No. 15.5 ? _____
25. Does the proposal fall in any of the restricted zones ? _____
26. (a) Does any natural water source pass through the land under development ? _____
- (b) Is the necessary setback provided as per Rule No. 11 .1 ? _____
27. Is the plinth level proposed to be above the level of the surrounding ground level ? _____
28. The details of the materials to be used in construction with specification are as below:
Roofs _____
Floors _____
Walls _____
Columns _____
Any other material. _____
29. The number of water closet, urinals, kitchens, baths to be provided are as follows
- | | Water closets | Baths | Urinals | Kitchens |
|--------------------|---------------|-------|---------|----------|
| Existing | _____ | _____ | _____ | _____ |
| Proposed | _____ | _____ | _____ | _____ |
30. Details of the source of water to be used in the construction _____
31. Distance from the sewer. _____
32. How much municipal land will be used for stacking building material ? _____
33. Please explain in detail in what respect the proposal does not comply with the Development Control Rules and the reasons therefor, attaching a separate sheet if necessar. _____

I hereby declare that I am the owner I lessee I mortgagee in possession / of the plot on which the work is proposed and that the statements made in this form are true and correct to the best of my knowledge.

Date :

Signature of the Applicant.

Address :

Form of certificate to be signed by the Architect / Licensed Engineer / Structural Engineer / Supervisor employed by the Applicant

I (Name _____) have been employed by the applicant as his Architect I Licensed Engineer I Structural Engineer I Supervisor. I have examined the boundaries and the area* of the plot and I do hereby certify that I have personally verified and checked all the statements made by the applicant who is the owner/leesee/ mortgagee in possession of the plot as in the above form and the attached statement 1 and 2 and found them to be correct.

APPENDIX 'C'

(Regulation No. 6.4)

*QUALIFICATION, COMPETENCE, DUTIES AND RESPONSIBILITIES ETC. OF LICENSED TECHNICAL PERSONNEL OR ARCHITECT FOR PREPARATION OF SCHEMES FOR DEVELOPMENT PERMISSION AND SUPERVISION

C-1 General

C-1.1 The qualifications of the technical personnel and their competence to carry out different jobs for building permit and supervision for the purpose of licensing by the Authority shall be as given in regulation No. C-2 to C-6. The procedures for licensing the technical personnel is given in regulation No. C-6.

C-2 ARCHITECT.

C-2.1 *Qualifications*- The Qualifications for licensing of Architect will be the Associate Membership of the Indian Institute of Architects or such Degree or Diploma which makes him eligible for such membership or such qualifications listed in Schedule XIV of Architects Act, 1972 and shall be registered under the Council of Architecture as per Architects Act, 1972.

*C-2.2 Competence of Architect:- To carry out work related to development permission as given below and to submit.

- (a) All plans and information connected with development permission.
- (b) Structural details and calculations for building on plot upto 500 sq. m. and upto 3 storeys or 11 mt height and
- (c) Certificate of supervision and completion for all building.

C-3 ENGINEER

C-3.1 *Qualifications*-The qualifications for Licensing Engineer will be the corporate membership (civil) of the Institution of Engineers or such Degree or Diploma in Civil or Structural Engineering.

*C-3.2 Competence- To carry out work related to development permission as given below and to submit.

- (a) All plans and related information connected with development permission.
- (b) Structural details and calculations for building on plot upto 500 sq. m. and upto 5 storeys or 16 mt. height, and
- (c) Certificate of supervision and completion for all building.

C-4 STRUCTURAL ENGINEER

C-4.1 *Qualifications*- Qualifications for Licensing of structural engineers shall be in the following with minimum 3 years experience in structural engineering practice with designing and field work;

- (a) Graduate in Civil Engineering of recognised Indian or Foreign University and 'Chartered Engineer or Associated Member in Civil Engineering Division of Institution of Engineers (India) or equivalent Overseas Institution; and
- (b) Associate member in Civil Engineering Division of institution of Engineers (India) or equivalent Overseas : Institution possessing exceptional merits.

The 3 years experience shall be relaxed to 2 years in the case of Post-graduate degree of recognised Indian and Foreign University in the Branch of Structural Engineering. In the case of doctorate in Structural Engineering, the experience required would be one year.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- * C-4.2 Competence - To submit the structural details and calculations for all building and supervision.
- * C-4.2.1. Complicated buildings and sophisticated structures, as decided by commissioner, N. M.C. / Chairman, N.I.T., which are within the horizontal areas and vertical limits under C-2.2 (b), C-3.2 (b) & C-5.2 (a) (I) shall be designed only by structural Engineer.

***C-5 SUPERVISOR:**

C-5.1 Qualification

- (a) For Supervisor 1 :-
- (i) Three years architectural assistantship or intermediate in architecture with two years experience, or
 - (ii) Diploma in Civil engineering with two year's experience.
- (b) for Supervision - II:-
- (i) Draftsman in Civil Engineering from ITI with five year's experience under Architect / Engineer.

*** C-5.2 COMPETENCE**

- (a) For Supervisor-I : To submit,
- (i) All plans and related information connected with development permission on plot upto 200 sq. m. and upto 2 storeys; and
 - (ii) Certificate as supervision of buildings on plot upto 200 sq. m. and upto 2 storeys and completion thereof.
- (b) For Supervisor-II To submit,
- (i) All Plans and related information upto 50 sq. m. built up area and upto 2 storeys, and
 - (ii) Certificate of supervision for limits at (i) above and completion thereof.

C-6. LICENSING-

* C-6.1 Technical Personnel to be licensed :-

The Qualified technical personnel or group as given in regulations; No C-3, C-4, C-5 shall be licensed with the authority and the license shall be valid for one calendar year ending 31 st December after which it shall be renewed annually.

* C-6.2 Fees for Licensing- The annual licensing fees shall be as follows:-

For Engineer and structural Engineer Rs. 250 p. a.

For supervisor (I) Rs. 100 p. a

P. massala grinding mill with motive power exceeding 15 H.P. or a combination of any of the above mills with aggregate motive power exceeding 60 H.P. and each one mill using motive power in excess of the above limits ;
- (xxxvi) Forges, Hydraulic and mechanically operated;
- (xxxvii) Garbage offal or dead animals reduction, dumping or incineration ;
- (xxxviii) Gas manufacture and storage in cylinders except manufacture of gas as an accessory to a permissible industry;
- (xxxix) Glass manufacture except manufacturing of glass products from manufactured glass ;
- (xl) Glue, sizing material or gelatine manufacture;
- (xli) Graphite and graphite products manufacture;
- (xlii) Gypsum or plaster of paris manufacture;
- (xliii) Hair, felt, fur and feather, bulk processing, washing; curing and dyeing ;
- (xliv) Hydrogen and oxygen manufacture
- (xlv) Industrial alcohol manufacture;
- (xlvi) Printing Ink manufacture;
- (xlvii) Junk (iron, aluminum, magnesium or zinc) cotton waste or gas storage and baling;
- (xlviii) Jute, hamp, sisal, coir and cokum products manufacture
- (xlix) Lamp black, carbon black or bone - black manufacture;
- (l) Lime manufacture,
- (li) Match manufacture;

- (lii) Metal foundaries with an aggregate capacity exceeding 10 tons a day;
- (liii) Metal processing (including fabrication and machinery, manufacturing), factories employing such machine tools or processes as power hammer , forging machine pneumatic drilling or rivatting sheet working with heavy sledge hammers etc., or processes expressly prohibited herein ;
- (liv) Metal finishing, anamelling, anodizing, japanning plating, galvanising, lacquering, grinding, polishing, rust proofing and heat treatment;
- (lv) Paint, oil, shellac, turpentine or varnish manufacture except manufacture of edible oils and paint making (not including turpentine or varnish making);
- (lvi) Oil cloth or linoleum. manufacture, excepting waterproofing of paper or cloth;
- (lvii) Paper cardboard or pulp manufacture;
- (lviii) Petroleum or its products refining or wholesale storage;
- (lix) Plastic materials and synthetic resine manufacture
- (lx) Pottary or ceramics manufacture other than the manufacture of handicraft products only ;
- (lxi) Potash works ;
- (lxii) Tyrexilin manufacture or products;
- (lxiii) Rolling mills ;
- (lxiv) Rubber (natural or synthetic) or gutta porcha manufacture except manufacture of latex goods and small rubber product and synthetic treated fabrics, such as washers, gloves, footwear, bathing caps, atomizers, houses, tubings, wire insulation toys and balls; but including manufacture of types and tubes ;
- (lxv) Salt works except manufacture of common salt from sea water
- (lxvi) Sand, clay or gravel quarrying except under government municipal agencies or control ;
- (lxvii) Smelting, reduction, refining and alloying of metal and metal ores except of rare and precious metals
- (lxviii) Soap manufacture other than cold mix;.
- (lxiv) Soda and compound manufacture;
- (lix) Starch, glucose or dextrine manufacture;
- (lxxi) Stock yard or slaughter of animals or fowl except the slaughter of fowls, incidental to a retail business
- (lxxii) Stone crushing and quarrying;
- (lxxiii) Shoe polish manufacture;
- (lxxiv) Sugar manufacture or refining;
- (lxxv) Tallow, grease or lard manufacture;
- (lxxvi) Tanning, curing or storage of raw hides or skins
- (lxxvii) Tar distillation or manufacture;
- (lxxxviii) Tar products manufacture;
- (lxxix) Textile manufacture exceeding 50 H.P. total

- (lxxx) Vegetable oil manufacturing and processing plants;
- (lxxxix) Wood and timber, bulk processing and wood working including sawmills and mills excelsior Plywood and veneer and wood preserving treatment except the manufacture of wooden articles with saw or machine;
- (lxxxii) Wax products manufacture from paraffin;
- (lxxxiii) Wool pulling or scouring;
- (lxxxiv) Yeast plant ;
- (lxxxv) In general these uses which may be obnoxious or offensive by reason of omission of odour, liquid effluvia, dust, smoke gas, noise, vibration or fire hazards ;
- (lxxxvi) The Commissioner/ chairman may, from time to time, add to, alter or amend the above list; with the approval of Director of Town Planning, Pune.

M-5.3 Use provision in Special Industries Zones:

- (i) Fertilizer manufacture from organic materials provided however, that these provisions shall not apply to the manufacture of fertilizers from previously processed materials which have no noxious adours or fumes and which do not produce noxious odour or fumes in the compounding or manufacture thereof ; .
- (ii) Sulphurous, sulphuric, citric, nitric, hydrochloric or other corrosive acid manufacture or their use or storage except as accessory to a permitted industry;
- (iii) Blast furnace;
- (iv) Ammonia manufacture;
- (v) Incineration, reduaction or dumping of offal, dead animals garbage or refuse on commercial basis or the establishment of loading and transfer platforms except where restricted, regulated or controlled by duly constituted Government or Municipal authorities having the power to restrict, regulate or control the same,
- (vi) Tar distillation or manufacture ;
- (vii) lime manufacture;
- (viii) Manufacture of explosive or inflammable products of Cellulose,
- (ix) Celluloid manufacture or treatment;
- (x) Manufacture of photographic films;
- (xi) Cement manufacture;.
- (xii) Coloring manufacture;
- (xiii) Bleaching powder manufacture ;
- (xiv) Gelatine or glue manufacture or processes involving recovery from fish or animal offal;
- (xv) Aluminium, magnesium tin, copper, zinc or iron smelting;
- (xvi) Manufacture or storage of explosives of fire works;
- (xvii) Match manufacture;
- (xviii) Fat rendering;
- (xix) Candle or paraffin wax products manufacturing;
- (xx) Fat, tallow grease or lard refining or manufacturing ;
- (xxi) Manufacture of explosive or inflammable product or pyroxyilis ;

- (xxii) Fyroxylis manufacture;
- (xxiii) Dyestuff manufacture;
- (xxiv) Turpentine, varnish or size manufacture or refining ;
- (xxv) Gypsum plaster or plaster of paris manufacture;
- (xxvi) Drive-in -Theaters, cinema or theaters, subject to provision of separate entries and exits for the cars, required sanitary and water supply arrangement, car parking as per rules in force.

M-5.4 Non -viable plots in Industries Zone.

If some plots or parts thereof become unbuildable for factory purpose because of restrictions due to zonal setback regulations the following users may be permitted on such plots.

- (i) Petrol Pumps and Service Station.
- (ii) Parking lots.
- (iii) Electric Sub - station.
- (iv) Building of public utility concerns except residence.
- (v) The branches of Scheduled Banks.
- (vi) Service Industries.
- (vii) Storage Buildings.

M-5.5 In case of the Special Industrial Zone, the users which are permitted in General Industrial Zone may be permitted in the set-back distance of 52.5 m. provided such industries are located 22.5 m. away from the boundaries of the zone.

M-6 Use Permitted in AGRICULTURAL ZONE / NO DEVELOPMENT ZONE-

The following uses shall be permitted in Agricultural Zone :-

- (i) All agricultural uses including stabling of buffaloes subject a limit of 10 cattles per hectare, providing the accessory building, tents, pigsties and stables.
- (ii) Garden and Poultry Farms.
- (iii) Forestry I Nursery.
- (iv) Golf Clubs and Links.
- (v) Public Parks, Private parks; play fields, Summer camps for recreation of all types.
- (vi) Race tracks, and shooting ranges
- (vii) L.P.G. gas Godown subject to the following conditions
 - (1) Minimum area of the plot shall be 2000 sq. mt.
 - (2) Maximum permissible F.S.I. shall be 0.2.
 - (3) Only ground floor structure shall be permitted.
 - (4) No Objection Certificate from the Controller of Explosives and the chief fire officer shall be submitted along with the proposal.
 - (5) Any additional condition as may be imposed by the Commissioner/ Chairman.,
- (viii) Brick, tile or pottery manufacture.
- (ix) Fish Farming.
- (x) Sand clay or gravel quarries.

- (xi) Storage and drawing of fertiliser.
- (xii) Public utility establishments such as electric substations, receiving stations sewage disposal, water works alongwith residential quarters for essential staff for such works proposed to be located in the zone.
- (xiii) farm houses subject to following conditions:-
 - (a) The land in which it is constructed is actually put under agricultural use.
 - (b) Farm house shall be permitted by Commissioner/ Chairman only after the requisite permission for farm house is obtained by the owner from the Collector under the provisions of Maharashtra Land Revenue Code and attested certified copy is attached with the application under Section 44 of the M. R. and T P. Act, 1966.
- (xiv) Swimming 'pools / sports and games, health .clubs, cafe taria,. canteen, tennis courts, etc.
- (xv) Amusement park.

Note :- Maximum floor space area shall not exceed 4% of the total plot area with only ground floor without still its.

The minimum area for such user shall be 0.4 Ha. and 400 trees per Ha. shall be planted on such plot.

M.7 Uses permissible in Public /semi public Zone.

- (1) Primary School, High School, all sorts of educational College Technical School /College, Educational Complex, Hostel for students essential staff quarters.
- (2) Hospital, Dispensary, Maternity Homes, Health Centre, Complex of such uses, Dharmashala for the visitres to patients, essential staff quarters, veterinary hospital, auditorium exhibition hall, and gallery.
- (3) Training institutions, Home for aged, essential quarters.
- (4) Government/ Semi -Government/ Local self Government offices, Court buildings, essential staff quarters.
- (5) Post Office, Telegraph office, Telephone Exchange, Roads station, Complex of such uses, Staff quarters and similar public /Semi , public uses.
- (6) Library, Mangal Karyalaya, Gymnasium, Gymkhana, Water tanks, Stadium, Community hall, Religious Temple, masques, Church, etc.

Note :- (i) In the education complex, Primary school, High School, all types of colleges, technical schools, colleges/ all types of Medical education and students' hostels and essential staff quarters shall be permitted.

(ii) With prior approval of Director of Town Planning, Pune the Chairman, N. I. T. Commissioner N. M. C. shall include other items of public interest in the list which are not covered in the above list.

(iii) Besides above uses, commercial use shall be permitted as give in the table below.

Area of Plot			Permissible commercial use in percentage
Up to 1000 sq. mt.	7.5%
1001 to 2500 sq. mt.	10%
2501 to 4000 sq. mt.	12%
4000 sq, mt. and above	15%

Commercial use shall be allowed on following conditions :

- (A) Convenient shopping, branch of bank small hotels etc. shall be permitted but shops / hotels for wine, pan, cigarette, tobacco, lottery tickets and such others which do not serve public purpose similarly domestic gas shops/ godowns which are dangerous to public health shall not be permitted.
- (B) The income from such a commercial uses shall be utilised for main users for which the Development has taken place or would taken place or would take place.
- (C) Such a commercial development shall take place in such a way that it shall not affect the view of the main development on the land, similarly such a commercial user shall be permitted upto 50 % length of the plot.
- (D) The Planning Authority shall ascertain that for parking places and for traffic, sufficient area is kept in the plot.
- (E) Additional F. S. I. shall be allowed only on the plot area remained after deducting the plot area utilised for commercial user.
- (F) The Planning Authority shall not allow sub - division of S. N. / Gat No. / Plot No. on which such a Development which may cause/ has take place/ would take place.
- (G) The commercial user is permitted upto a depth of 12 m.
- (H) The land owner / developer / institution shall give guarantee in witting to the Planning Authority for following all the stipulated conditions scrupulously.
- (I) The plots in which there is an existing development; such commercial use shall be restricted to max. 20% of the balance potential.

APPENDIX 'N'

(By Regulation No. 15.1)

*** N-1 OPEN SPACES AND AREA HEIGHT LIMITATIONS IN CONGESTED AREAS AND ABADI AREA AS SHOWN ON DEVELOPMENT PLAN AS MAY BE SPECIFIED IN THESE REGULATIONS.****N-1.1.1 GENERAL :**

Area included in the congested area shall be intended mainly for residential purpose excepting areas reserved for public purpose or municipal purposes in the Development plan and areas in which it would be expedient to acquire for the said purposes, but not so designated.

All other users as listed out under residential use in land Use Classification Order, shall be permitted in the congested areas.

N-1.1.2 RESIDENTIAL:

Floors Space Index.

- * (a) The permissible FAR for plots upto 1000 sq. mt. area shall be 1.00 and more than 1000 sq. mt. area 1.25 for purely residential and also mix residential and commercial or other use.

Provided further that in the redevelopment scheme of a property in congested area.

- (I) The, size .of the tenements in redevelopment scheme should not be smaller than 15 sq. mt. and larger than 55 sq. mt. in area.
- * (II) Where the No. of existing tenements exceeds the permissible density of 250 tenements per Ha., the development scheme should accommodate all the existing tenements, as far as possible subject to condition the proposed FSI does not exceeds 25% above the permissible FSI of 1.00
- * (III) Where the existing tenement density is less than 250 tenements per Ha., the redevelopment scheme may accommodate the No. of tenements so that the FSI exceed 1.00 and the tenement density does not exceed 250 per Ha.
- * (b) Front Open Spaces - The minimum set back from the existing or proposed road shall be as under:-
- (i) For streets 7.5 to 12 m. in width - 2.00 m.
- (ii) For streets. 12 m & above in width - 3.00 m.
- (iii) Side & rear open spaces shall be as below.:

* Resi. Plot Area	Sides	Rear
Below 180 sq. mt.	1.00 m.	1.00 m.
Above 180 & below 270 sq. mt.	2.00 m.	2.00 m.
Above 270 sq. mt.	3.00 m.	3.00 m.

For common wall construction depth or/ and width shall not be more than 8 mts.

- * (iv) for streets less than 7.5 mts. In width, no setback shall be prescribed subject to condition that no lane shall be less than 4.5 mts. in width clear of structural projection. For lanes less than 4.5 mt width a setback of 2.25 mt. shall be prescribed from the centre line of such lane. Streets less than 4.5 mt shall be treated as lanes only. When they served as access to the properties fronting on them. Where the

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

streets, despite their narrowness, form part of traffic circulation system, widening shall be proposed and normal set back mentioned above shall be applied.

* (v) Structural projections such as balconies, cornices, weather sheds, roof Projections etc. shall be allowed in the setback distance prescribed above as per regulation No. 15.4

(c) Height- The height of the building shall not be more than 18m. and shall also be governed by the width the road in front as per regulation No. 15.5.

(d) Ground Coverage-The maximum ground coverage shall be 2/3rd of the plot area

* N-1 1.3 Educational, Public Health and Charitable Buildings;

(a) Floor Space Index.-Normally, the FSI permissible for above buildings would be 1.00 However, in case of special circumstances additional FSI upto 50% may be permitted on 1.00 i. e. upto the maximum of 2.50 in consultation with government.

(b) Open Space - For other buildings FSI shall be 1.5 and open spaces of 3 mts on all sides.

* N-1.1.4 Pathway for access to the internal building or interior part of the building ;

The pathway shall not be less than 3.6m. (12 ft) in width and no portion of any building shall overhang or project below a height of 3.6m. from the surface of such passage if length of such passage or the No. of buildings served by such passage requires such extra width or such clear height to be provided in the opinion of the Commissioner/ Chairman.

* N-1.1.5 The provisions of N-1.1.2, N-1.1.3 and N -1.1.4 may be relaxed by the Commissioner /Chairman in special circumstances. However, if the width of property is less than 3.6m. (12 ft) the entire ground floor shall be on Stilts.

* N-2 **Open Spaces and Area and Height limitations for buildings situated outside congested area.**

N-2.1 Residential Buildings.:-

(a) The provisions as, given in Table 28 shall apply for the residential buildings, residential cum office or shop buildings permissible in non congested areas and residential buildings permissible in industrial areas.

(b) minimum distance between main and accessory building - A clear distance of at least 1.5m. shall be left between the main building and any accessory building such as an outhouse, garage, etc. constructed in one building plot.

(c) Number of main and single storied accessory buildings in a plot. - Only one main building either altenement house or a block of flats or a dwelling hours together with such outhouses, garages. etc. as are reasonably required the bonafied use and enjoyment of the occupants or such main building and their domestic servants and which shall not be separately let out, shall be permitted to be erected in any plot. These provisions are not applicable to group housing schemes. Provided that these restrictions shall not prevent erection of two or main buildings together with incidental constructions mentioned above on the same plot equal to the number of multiples of the minimum size of building plot as laid down under Table 28, if the area of the plot is twice, thrice or more as the case may be.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

TABLE NO. 28

REAR / SIDE MARGINS / TENEMENT DENSITIES / HEIGHTS OF DIFFERENT CATEGORIES IN NON - CONGESTED RESIDENTIAL ZONES

Sr. No.	Description of Road	Min Plot Size in sq. mt.	Min Frontage in mts.	Min. setback from Road front in meters	Min. side and rear Open space in metres	Max per misible ground coverage	FSI	Tenement Density	Remarks

REAR / SIDE MARGINS / TENEMENT DENSITIES / HEIGHTS OF DIFFERENT CATEGORIES IN NON - CONGESTED RESIDENTIAL ZONES

Sr. No.	Description of Road	Min Plot Size in sq. mt.	Min Frontage in mts.	Min. setback from Road front in meters	Min. side and rear Open space in metres	Max permissible ground coverage	FSI	Tenement Density	Remarks
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
7.	Row housing on roads of width 12m. and below	50 125	4 to 8	3	side margin 2.25 rear margin 1.5	deleted	deleted	G+1	
8.	Row housing for L.I.G.	20 50	4	1 m. from pathway 2.25 m. from road boundary	do	deleted	deleted	400 tenements per Ha. Size of the tenements should be between 20 and 30 sq. mt.	E.W. S./

- NOTE:(1) Subject to the condition that a row housing plot at the junction of two roads shall be larger to maintain the set back from both roads and subject to the condition that not more than 8 and less than 4 plots shall be allowed in each block of the road, each block shall be separated from the other by 6 m. and building shall conform to a type to be approved by the Nagpur Municipal Corporation / NIT.
- (2) Subsidiary structures such as car park, garage, outhouse, independent sanitary block, etc. shall not be permitted in plot having area below 250 sq. mt. No garage shall be permitted in a building having stilt or basement provided for parking.
- (3) Tenement size means the total built up area including thickness of walls and internal passage, etc. but excluding common corridors, passages and staircases, lift rooms, etc.
- (4) Construction of ottas, steps, railings, barricades or supporting columns for canopy or poarch shall not be allowed in front marginal open space. However, steps may be permitted within 1.2 m. from the building line.
- (5) In case of weaker section Housing Scheme providing all tenements or 30 sq. mt. each or less, a tenement density upto 300 tenements per Ha. will be allowed.
- (6) In case of group housing scheme, net plot area shall be 3 / 4th of the gross area and number of permissible tenements shall be, calculated accordingly. In case of Group Housing Scheme, the net plot area for the purpose of calculating the buildable area or permissible number of tenements shall be the actual net area of the plot i.e. the gross area less the area under roads, passages, pathways, access etc. and the area of open space and other amenity space required as per layout and sub - division regulations.
- (7) All the plot mentioned in the table for categories 1. to 5 are minimum. In cases where actual size of the plot is more, then the provisions for the respective plot sizes would be made applicable irrespective of road widths on with the plot fronts.
- *(8) Shops and other commercial uses not having an opening on road side will be permitted upto 0.50 FSI in case the plots front on roads of width 12m and above; provided that the off-street parking provision is made as per the rule with a provision of additional visitors parking in front margin of the building. The parking space must be levelled mettalled placed as directed by the Municipal Corporation / NIT.
- (9) R-1 shops will be permitted only on the plots fronting on roads having width from 6 m. to 9 m. with a front 7.5 m.
- (10) Only residential users shall be permitted on plots fronting on roads with width less than 6 m.
- (11) With the special permission of the Commissioner / Chairman, shopping luses and departmental stores may be permitted on the entire ground floor of the building, subject to the following conditions
- (i) The side and rear marginal open spaces shall not be less than 9 m. in width.
- (ii) No back - to- back shops would be permitted unless they are separated by a corridor of at least 1,8 m . in width which shall be properly lighted and ventilated.
- (iii) All goods offered for sale or displayed should be within the premises comprising the shop and should not be kept in the passages or open spaces.

Provided that such shopping users and department stores may be permitted in the entire building where the whole building is in occupation of one establishment or of a co-operative society only and subject to the above conditions.

- *N - 2.1.1. Where substandard plots partially constructed have either granted or leased out by NIT or from approved layouts by Govt. NIT / NMC prior to publication of these regulations in Maharashtra Govt. Gazette (i. e. before 9th March 2000) shall be honoured & for these plots front, side and rear margins shall be considered as mentioned in Table No. 28 (a) and 28 (b) In no case FSI shall exceed more than one.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

*** (a) For Residential Zones**

Table 28 (a) for residential Zones

Sr. No.	Category and road width and description of housing	Minimum front space from the road front in m.	minimum rear open Space in m.	minimum side open Space in m.	F.S.I.
1	2	3	4	5	6
1	National Highways State Highways.	**24.5 m. From centre line of highway or as prescribed by Highway Authority from time to time or 4.5m. from plot boundary Whichever is more	3m.	3 m.	1.0
2	Roads more than 9 m. width	4.5 m.	3m.	3m.	1.0
3	Roads of 9 m. and below.	3.00 m.	3m.	3 m.	1.0

**24.5 m. for national highway.

NOTE 1 : Plots abutting 6 m. wide road and below in E. W. S. Components of U. L. C. Scheme and NIT and NMC marginal spaces will be as per their respective schemes and rules.

* NOTE 2 : The front set back for already existing layout roads shall be as per existing Schemes by these rules, provided it is more than what is prescribed by these rule.

* (b) Open space for tower like structure:

(i) Open spaces for tower like structures, tower like structures may be permitted only with 6 mtrs minimum open space at ground level and tone set back at the upper level provided that the total height does not exceed 24 mts. In case of tower of Government and public importance, height more than 24 mts. or whatsoever reason shall need no objection from Director, micro wave project, Nagpur Telephone. This is not an exemption of provision in Table No. 28 (b)

*** TABLE 28(B)-Open spaces for different heights of Building for light and ventilation.**

Sr. No.	Height of Buildings in Meter	Open spaces around building Exception front of Plot in meter
1	13	3
2	16	4
3	19	5
4	22	6
5	24	7

Note: If the length or depth of the building exceed 40 mts. add to column (3) 10% of land of depth of building minus 4.0 m.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- (ii) Open spaces separate for each building or wing the open spaces required under these byelaws shall be separate or distinct for each building and where a building has two or more wings, each wing shall have separate or distinct open spaces according to these byelaws for the purpose of light and ventilation of the wing.

N-2.1.2 Floor area ratio--- Residential and residential cum office / shop building permissible in non congested areas shall have maximum floor area ratio 1.00 and for plot above 1000 sq. mts. the F.A.R. shall be 1.25.

N-2.2 Institutional buildings (Hospital, Maternity Homes Health Club)

- (a) Built - up - area: The built - up area shall not be more than 1 /3rd of the area of the plot.
- (b) F. S. I. the maximum FSI shall be 1 .
- (c) There shall be minimum open space of 6 m. on all sides.

N-2.3 Educational Buildings -

- (a) Built - up - area - Maximum permissible built - up area shall not be more than 1 / 3rd of the plot area.
- (b) FSI -Maximum FSI shall be 1.
- (c) Minimum open space .- 6 m. on all the sides from boundaries.

N-2.4 Cinema Theatres I Assembly Halls.

- (a) Open spaces.
 - (i) Front set back - A set back of 12 m. from road shall be left.
NOTE - Further in cases of plots facing National Highway, state Highway and Major District Roads the building line shall be according to ribbon development rules or 12 m. from plot boundary whichever is more.
 - (ii) Side and Rear Open Spaces.- Side and rear marginal distances to be left shall be 6 m. The above shall be exclusive of parking spaces, subject to regulations No. 16.
- (b) F. S. I. shall be one:- The minimum distance between boundary of the site for cinema theatre / assembly halls and boundary of educational, institutional and other Government business buildings shall not be less than 60 m.
- (c) Minimum width of access road shall be 15 m.

N-2.5 PUBLIC ENTERTAINMENT HALL / MANGAL KARYALAYA AND LIKE BUILDINGS:

- (a) F.S.I. :- Maximum F.S.I. shall be 1
- (b) Access Roads :- The minimum width of access roads shall be 15m. and the plot shall a but on this road.'
- (c) Open spaces.
 - (i) Front open space - 12 m.
 - * (ii) From all the three boundaries - 6 m.

N-2.6 PETROL FILLING STATION WITH OR WITHOUT SERVICE BAYS:-

- (a) The plot on which a petrol filling station with or without service bays is proposed shall be an independent plot on which no other structure shall be constructed.
- (b) Petrol filling stations shall not be permitted within a distance of 90 m. from any junction of roads.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- (c) Petrol filling station shall not be sited on the convex side of a road curve. In case the curve is not very sharp and cars moving out of the station are completely visible to the traffic from a distance of at least 90 m. and vice versa, a petrol station may be permitted on such a convex curve.
- (d) Petrol station shall not be sited within a distance of 90 m. from the nearest gate of a school, hospital, theatre, place of assembly or stadium.

N-2.7 BUILDING IN COMMERCIAL ZONE

- (a) Means of Access :- When two or more buildings are constructed in the same plot, every building shall be provided with independent means of access of not less than 6 m. width. The means of access shall not be considered as part of marginal open spaces required to be left around the buildings.
- * (b) Plinth Area :- Maximum plot coverage shall be 1/2 of the plot size.
- * (c) FSI for buildings out side congested area in commercial zone the maximum FSI permissible shall be 2.00 for commercial cum residential user and 2.50 for purely commercial the purpose of FAR net area of land excluding open spaces and area covered by internal roads shall only be considered.
- (d) Open Spaces :- Marginal open spaces along periphery of land or plot shall be 4.5 m. minimum, provided that in case of land / plots fronting on classified roads, set - back prescribed under Ribbon Development Rules or 4.5 m. whichever is more shall be observed excluding congested area where marginal distances shall be as per regulation No. N -1 and Ribbon Development Rules.

NOTE :- The provisions of note under regulation No. N -2.4 (I) shall apply for front open space in the case of storage buildings.

N - 2.8 INDUSTRIAL BUILDINGS

- (a) Minimum plot area height limitation for industrial building shall be as per the Table given below.

**TABLE NO. 29
AREA HEIGHT LIMITATIONS FOR INDUSTRIAL BUILDING**

Sl. No.	Plot Size In Sq. Mtrs.	Max. Built up Area (%)	Min. Marginal Front open Spaces in Mtrs.	Min. Side rear Marginal Spaces	Min. Width of Plot in Mtrs.
1	300 to 500	50	5	3	15
2	501 to 1000	50	6	4	20
3	1000 to 2500	50	6	4.5	25
4	2501 to 5000	50	6	6	35
5	5001 and above	50	6	9	50

Note : In case of plot fronting on highway's building shall be set-back or distance of 25 m. from the centre line of the highway and or 6 m. from the boundary of road boundary (R/W) whichever is more.

- (b) In Industrial Zone, actual factory or workshop Building and storage or godown shall not be constructed within distance of 10 m., 25 m. from the boundary of industrial zone and special industrial zone respectively, such distance shall be measured from the opposite edge of the road where the zone abuts on an existing or proposed road. Provided further that ancillary building such as essential staff quarters, canteen, garages electricity stations, water tanks etc. may be permitted in such open spaces provided a minimum distance of 10 m. is left free from the boundaries.
- * (c) "FAR Permissible shall be 2.00 for mixed user & 2.5 for purely industrial user"

N- 2.9

ADDITIONAL FSI IN CERTAIN CATAGORIES :-

- (a) Additional Floor space index which may be allowed in certain catagories.

(1) ROAD WIDENING AND CONSTRUCTION OF NEW ROADS:

The Commissioner/ Chairman may permit additional FSI on 100 per cent of the area required for road widening or for construction of a new road proposed under the Development Plan. If the owner (including the lessee) of such land surrenders such land for road widening or new road construction without claiming any compensation in lieu thereof and hands over the same free of encumbrances to the satisfaction of the Commissioner/ Chairman. Such 100 per cent of the FSI on land so surrendered to the corporation /NIT will be utilisable upto a limit of 40 per cent of the area of the plot remaining after such surrender and the balance F.S.I. remaining there after shall be allowed to be utilised as a Development Right in accordance with the rules regulating Transfer of Development Rights (TDRs). Thereafter, the road shall be transferred in the city survey records in the name of the Corporation / NIT and shall vest in it becoming part of a public street. Provided that this concession shall not be granted in respect of roads in the areas of Town Planning Scheme unless further widening thereof is proposed.

(2) BUILDING OF EDUCATIONAL AND MEDICAL INSTITUTIONS AND INSTITUTIONAL AND STARRED CATEGORY HOTELS :

The Commissioner / Chairman may with the previous approval of the Government and subject to payment of premium as may be fixed by Government and such other terms and conditions as it may specify, permissible FSI may be permitted to be exceeded in non - congested areas in respect of educational, medical and institutional buildings of Government or public Authorities or of registered public charitable trusts, three star, category hotels built on independent plot and under one establishment and approved by the department of tourism. Provided the maximum additional FSI over the prescribed normal FSI admissible under these regulations shall not exceed-

- (i) 50 per cent in the case of educational, medical and institutional buildings; and
- (ii) 50 per cent in the case of three, four and five star catagory hotels as stipulated under regulation.
- (iii) Provided further that no condonance in the required open spaces, parking and other requirements as in these regulations shall be allowed in the case grant of such additional FSI.
- * (iv) Such additional F.S.I Shall not make the total available F.S.I. more than 2.50 on any plot or land.

(3) BUILDING OF GOVERNMENT AND SEMI-GOVERNMENT OFFICE AND PUBLIC SECTOR UNDERTAKING :- _

The Commissioner / Chairman in consultatian with government may permit the prescribed loor space indices to be exceeded by 50 per cent in the case of buildings of government

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

and Semi-government offices and public sector undertakings only in outer area i.e. non - congested area.

(4) ADDITIONAL FSI FOR DANGEROUS BUILDINGS :

*Reconstruction in whole or in part of any user which existed on or after the date of declaration of intention to revise the Development Plan of Nagpur which has ceased to exist in consequence of accidental fire / natural collapse or demolition for the reasons of the same having been declared unsafe by or under a lawful order of Nagpur Municipal Corporation or is likely to be demolished for the reasons of the same having been declared unsafe by or under lawful order of Nagpur Municipal Corporation shall be allowed with on FSI of authorised original building, subject to a maximum of 2.00 whichever is more and shall be subject to following conditions

- (a) Reconstruction of new building on the plot should conform to the provisions of the development plan and these Regulations.
- (b) The new building may be permitted to be reconstructed in pursuance of an agreement to be executed on stamp paper by atleast 70 per cent of the landlord / occupants (if any) in the original building, within the meaning of Bombay rents , Hotel and lodging houses rent control Act, 1947 such agreement shall make a provision for accommodation for the said landlords all occupants in the new building on agreed terms and a copy of such agreement shall be deposited with the Corporation /NIT before commencement or undertaking reconstruction of the new building.
- (c) The landlord / occupants of the original buildings shall furnish a duly stamped undertaking that he / they shall allot to all the occupants in the original building accommodation in the new building. -
- (d) No construction or reconstruction shall be permitted on set - back areas or areas required for road widening and such areas shall be handed over to the corporation.

(5) PUBLIC LIBRARIES HAVING COMPLETED 100 YEARS AND ABOVE :

The Commissioner / Chairman in consultation with government may permit the prescribed floor space indices to be exceeded up to 2.5 for the public libraries which falls under 'A' category as per the rule No. 10 of the Maharashtra Public library Rules, 1970 framed under the Maharashtra Public Libraries Act, 1967. Out of the above, 2.5 FSI; FSI to the extent of one may be permitted to be used for commercial purpose on the following terms and conditions :-

- (i) Convenience shopping, branches of banks, small restaurants, etc. may be permitted however, wine shops, hotels tobacco shops., Pan thela, Lottery shop and likewise uses which may cause nuisance to the public life shall not be permitted. Also, hazards uses like gas godown etc. shall not be permitted.
- (ii) Income received from commercial use shall be used for development of library.
- (iii) The authority shall ensure that adequate parking facilities are provided for such user.
- (iv) If FSI less than 2.5 is consumed then the FSI for the commercial purpose shall be proportionally reduced.
- (v) Additional FSI so sanctioned shall be subject to the other Development control Regulations.

N - 10

* Deleted

APPENDIX ' P'

(Regulation No. 20 . 2)

ADDITIONAL FIRE PROTECTION REQUIREMENTS FOR BUILDINGS MORE THAN 15 M. IN HEIGHT AND BUILDINGS AS COVERED BY REGULATION No.6.2.6.1

P-1 GENERAL

- P-1.1 In addition to the provisions of part IV fire protection of National building Code of India the Chief Fire officer, Nagpur Fire Brigades may insist on suitable provisions in buildings from fire safety and fire fighting point of view depending on the occupancy and height of buildings.

P-2 CONSTRUCTION

- P-2.1.1 Load bearing elements of construction and elements of construction for which the required fire resistance is one hour or more shall be of non - combustible material. Interior finish materials (wall panellings, floor covering etc.) may be permitted of materials having their rating for flame spread and smoke developed not exceeding a very low flame spread limit in accordance with IS: 1642 -1960 "Class I". Ceiling linings shall be on non - combustible or of plasterboard.
- P-2.1.2 Stairways and corridors shall not contain combustible materials.
- P-2.2 Structural members such as supports and bearing walls shall have fire resistance rating of 3 hours, transomes and ceilings 2 hours to 4 hours.
- P-2.3 Internal walls and partitions separating corridors from areas of floor that are used for any purpose other than circulation shall have a fire resistance of not less than one hour. There shall be no openings in such walls other than for doors or delivery hatches with fire resistance not less than half an hour to one hour. Fire sections (Fire Walls) subdividing the building to prevent fire spread, shall have a fire resistance rating not less than two hours.
- P.2.4 Facades shall consist of non - combustible building materials. A fire must bridge a distance of at least 0.9 meters between storeys.

P-3 STAIRCASE ENCLOSURES FOR BUILDINGS MORE THAN 15 M. IN HEIGHT

- P.3.1 The internal enclosing walls of staircase shall be of brick or R.C.C. Construction having fire resistance of not less than two hours. All enclosed staircase shall be reached via ventilated lobby and shall have access through self closing doors of at least half hour fire resistance. These shall be single swing doors opening in the direction of the escape. The door shall be fitted with check action door closers.
- P.3.2 The staircase enclosures on external walls of the building shall be ventilated to atmosphere at each' landing.
- P.3.3. Permanent vent at the top equal to 5% of the cross sectional area of the enclosure and openable sashes at each landing level with area not less than 0.5 sq.m. on the external wall shall be provided. The roof of the shaft shall be at least 1 m. above the surrounding roof. There shall be no glazing or glass bricks in any internal enclosing wall of a staircase. If the staircase is in the core of the building and can not be ventilated at each landing, a positive pressure of 5 mm. w.g. by an electrically operated blower / blowers shall be maintained.
- P.3.4 The mechanism for pressurising the staircase shaft shall be so installed that the same shall operate automatically and also with manual operation facilities, when the automatic fire alarm operates.

P.4 LIFT ENCLOSURES

- P.4.1. The walls enclosing lift shafts shall have a fire resistance of not less than two hours shafts shall have permanent vents at the top not less than 1800 sq. mm. (0.2 sq. m.) in clear area. Lift motor rooms preferably be sited at the top of the shaft and shall be separated from lift shafts by the enclosing wall of the shaft or by the floor of the motor rooms.

- P.4.2. Exit from the lift, lobby if located in the core of the, building, shall by through a self closing smoke stop door of half hour fire resistance.
- P.4.3 Lift shall not normally communicate with the basement. However, one of the lifts may be permitted to reach the basement levels provided the lift lobby at each basement level is pressurised and separated from the rest of the basement areas, by smoke actuated fire resisting door of two hours fire resistance. These doors can also be kept in hold open position by an electro magnet device to be linked with smoke detector.

P.5. EXTERNAL WINDOWS

- P.5.1. Areas of the openable external windows on a floor shall be not less than 2½ % of the floor area. The locks for these windows shall be fitted with budget lock of the carriage key type (which can be opened with the point of a fireman's axe.)

P.6 BASEMENTS

- P.6.1. Each basement shall be separately ventilated. Vents with cross sectional area (aggregate) not less than 2.5 per cent of the floor area spread evenly round the perimeter of the basement shall be provided in the form of grills or breakable stallboards lights or pavement lights or by way of shafts. Alternatively, a system of air inlets shall be provided at basement floor level and smoke outlets at basement ceiling level, Inlets and exhausts may be terminated at ground level with stallboards or pavement lights as above but ducts to convey fresh air to the basement floor level have to be laid. Stallboards and pavement lights should be in positions easily accessible to the Fire Brigade and clearly marked ' SMOKE OUTLET' or 'AIRINLET' with an indication of area served at or near the opening.
- P.6.2. The Staircase of basements shall be of enclosed type having fire resistance of not less than two hours and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such positions that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storage of the building and shall communicate with basement through a lobby provided with fire resisting self closing doors for one hours fire resistance. If the travel distance exceeds 18.50 m. additional staricases at proper places shall be provided.
- P 6.3. Mechanical extractars for smoke eventing system from lower basement level shall also be provided. The system shall be of such design as to operate on actuation of heat sensitive detectors or sprinklers if installed and shall have a considerably higher performance than the standard units. It should also have an arrangement to start it manually and shall be designed to function at a temperature not less than 550 degree C.
- P.6.4. Kitchens working on gas fuel, departmental stores, and shops shall not be permitted in basement.

P.7. COMPARTMENTATION (FIRE SECTIONS).

- P.7.1. If the uncompartmented floor space on a floor exceeds 750 sq.m. it shall be separated in compartments each not exceeding 750 sq.m: by means of fire walls of not less than two hours fire resistance. In extended buildings, fire walls should be erected at distances not exceeding 40 m. For floors with sprinklers, the area mentioned above may be increased by 50 percent.

P.8. SERVICE DUCTS

- P.8.1. Service ducts shall be enclosed by walls having a fire resistance of not less than two hours. Doors for inspection of access shall also have a fire resistance not less than two hours.
- P.8.2. If the cross sectional area exceeds 1 sq. m., it shall be sealed where it passes a floor by carrying the floor through the duct. The floor within the duct shall be pierced for any service pipe or ventilation trunk and shall fit as closely as possible around any such pipe or trunk.
- P.8.3. A permanent vent shall be provided at the top of the service shaft of cross sectional area

not less than 460 sq. cm. or 6.25 sq. cm. for each 900 sq. cm. of the area of the shaft whichever is more.

P.9. REFUSE CHUTES AND REFUSE CHAMBERS.

- P.9.1. Hoppers to refuse chutes shall be situated in well ventilated position and the chutes shall be continued upwards with an outlet above roof level and with an enclosure wall of non - combustible material with fire resistance not less than two hours. The hoppers shall not be located within the staircase enclosure.
- P.9.2. Inspection panel and hopper (charging station) opening shall be fitted with tight fitting metal doors, covers, having a fire resistance of not less than one hour.
- P.9.3. Refuse chutes shall not be provided in staircase walls, air conditioning shafts etc.
- P.9.4 Refuse chambers shall have walls and floors or roofs constructed of non-combustible and impervious material and shall have a fire resistance of not less than two hours. They shall be located at a safe distance from exist routes.

P. 10. BUILDING SERVICES

- P.10.1. Electrical Services:-
 - (a) The electric distribution cables /wiring shall be laid in separate duct. The duct shall be sealed at every alternative floor with non -combustible materials having the same fire resistance as that of the duct.
 - (b) Water mains, telephone lines- . inter-com lines, gas pipes or any other service line shall not be laid in the duct for electric cables.
 - (c) Separate circuits for water pumps, lifts, staircases and corridor lighting and blowers for pressurising system shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes so that fire in one circuit will not affect the others. Master switches controlling essential services circuits shall be clearly labelled.
 - (d) The inspection panel doors and any other opening in the shaft shall be provided with air tight fire doors having the fire resistance of not less than two hours.
 - (e) Medium and low voltage wiring running in shafts, and within false ceiling shall run in metal conduit.
 - (f) An independent and well ventilated service room shall be provided on the ground floor with direct access from outside or from the corridor for the purpose of termination of electric supply from the licensee service and alternate supply cables. The doors provided for the service room shall have fire resistance of not less than two hours.
 - (g) If the licensees agree to provide meters on upper floors, the licensees cables shall be aggregated from consumer cable by providing a partition in the duct. Meter rooms on upper floors shall not open into staircase enclosures and shall be ventilated directly to open air outside.
 - (h) PVC cables should have an additional sheathing or protection provided by compounds sprayed on after installation because of the notorious secondary damage in case of fire.
- P.10.2. Town Gas / L.P. Gas supply pipes.

Where gas pipes are run in the building, the same shall be run in separate shafts exclusively for this purpose and these shall be on external walls, away from the staircases. There shall be no interconnection of this shaft with the rest of the floors. Gas meters shall be housed in a suitably constructed metal cup - board located at well ventilated space at ground level.
- P.10.3. Staircase and Corridor Lightings.
 - (a) The staircase and corridor lighting shall be on separate circuits and shall be

independently connected so as it could be operated by one switch installation on the ground floor easily accessible of fire fighting staff at any time irrespective of the position of the individual control of the light points, if any.

- (b) For assembly, institutional buildings of height less than 24 m., the alternate source of supply may be provided by battery continuously trickle charged from the electric mains.
- (c) Suitable arrangements shall be made by installing double throw switches to ensure that the lighting installed in the stair case and the corridor do not get connected to two sources of supply simultaneously. Double throw switch shall be installed in the service room for terminating the stand by supply.
- (d) Emergency lights shall be provided in the staircase corridor for assembly, and institutional buildings.

P-10.4. **Alternate Source of Electric Supply** - A stand by electric generator shall be installed to supply power to staircase and corridor lighting circuits, firelifts, the stand - by fire pump, pressurisation fans and blowers, smoke extraction and damper systems in case of failure of normal electric supply. The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously: If the stand by pump is driven by diesel engine, the generator supply need not be connected to the stand - by pump. Where parallel HV / LV supply from a separate substation is provided with appropriate transformer for emergency, the provision of generator may be waived in consultation with the Chief Fire Officer, Nagpur Fire Brigade.

P-10.5. **Transformers.**

- (a) If transformers are housed in the building below the ground level, it shall be necessarily in the first basement in separate fire resisting room of four hours rating. The room shall necessarily be at the periphery of the basement. The entrance to the room shall be provided with steel door of two hours fire rating. A curve (sill) of a suitable height shall be provided with at the entrance in order to prevent the flow of oil from ruptured transformer into other parts of the basement. The direct access to the transformer room shall be provided preferably from outside. The switch gears shall be housed in a separate room separated from the transformer bays by a fire resisting wall with fire resistance not less than four hours.
- (b) The transformer if housed in basement shall be protected by an automatic high pressure water spray system. (Mulsifyre System).
- (c) In case of transformers housed in the basements totally segregated from other areas of tile basements by four hours fire resisting walls with an access directly from outside it may be protected by carbondioxide or B.C.F. fixed installation system.
- (d) When housed at ground floor level it / they shall be cut off from the other portion of the premises by fire resisting walls of four hours fire resistance.
- (e) They shall not be housed on upper floors.
- (f) A tank of RCC construction of capacity capable of accommodating entire oil of the transformers shall be provided at lower level, collect the oil from the catchpit in case of emergency. The pipe connecting the catchpit to the tank shall be of non - combustible construction and shall be provided with a flame - arrester.

P-10.6. **Air - conditioning :-**

- (a) Escape routes like staircases, common corridors, lift lobbies etc. shall not be used as a return air passage.
- (b) The ducting shall be constructed of substantial gauge metal in accordance with IS. 655-1963 metal air ducts (Revised) :
- (c) Wherever the ducts pass through fire walls or floors the opening around the ducts

- shall be sealed with fire resisting materials such as asbestos rope, vermiculite concrete glass wool etc.
- (d) As far as possible metallic ducts shall be used even for the return air instead of space above the false ceiling.
 - (e) The materials used for insulating the duct system (inside or outside) shall be of non - combustible materials such as glass wool, spunglass with neoprance facing.
 - (f) Area more than 750 sq. m. on individual floor shall be segregated by a fire wall and Automatic fire dampers for isolation shall be provided where the ducts pass through walls. The fire dampers shall be capable of operating manually.
 - (g) Air ducts serving main floor areas, corridor etc. shall not pass through the staircase enclosure.
 - (h) The air handling unit shall as far as possible be separate for each floor and air, ducts for every floor shall be separate and in no way interconnected with the ducting on any other floor.
 - (i) If the air handling unit serves more than one floor, the recommendations given above shall be complied with in addition to the conditions given below. -
 - (i) Proper arrangements by way of automatic fire dampers working on smoke detectors for isolating all ducting at every floor from the main riser shall be made.
 - (ii) When the automatic fire alarm operates the respective air handling units of the air conditioning system shall automatically be switched off.
 - (j) Automatic fire dampers shall be provided at the inlet of the fresh air duct and the return air duct of each compartment on every floor.
 - (k) Automatic fire damper shall be so arranged so as to close by gravity in the direction of the air movement and to remain tightly closed upon operation of a smoke detector.
 - (l) The air filters of the air handling units shall be of non - combustible materials.
 - (m) The air handling unit shall not be used for storages of any combustible materials.
 - (n) Inspection panels shall be provided in main trunking to facilitate the cleaning of ducts of accumulated dust and to obtain access for maintenance of fire dampers.
 - (o) No combustible materiel shall be fixed nearer than 15 cm. to any duct unless such duct is properly enclosed and protected with non - combustible material (Glass wool or spunglass with neoprance facing enclosed and wrapped with aluminum sheeting) at least 3.2 mm. thick and which would not readily conduct heat.

P-10.7 Boiler Room:-

Provisions of Boiler and Boiler Rooms shall conform to Indian Boiler Act. Further, the following additional aspects may be taken into account in the location of Boiler/ Boiler Room;

- (a) The boilers shall not be allowed in sub -basement but may be allowed in the basements away from escape routes.
- (b) The boiler shall be installed in a fire resisting room of four hours fire resistance rating, and this room shall be situated on the periphery of the basement. Catch pits shall be provided at the low level.
- (c) Entry to this room shall be provided with a composite door of two hours fire resistance.
- (d) The Boiler room shall be provided with fresh air inlets and smoke exhausts directly to the atmosphere.
- (e) The furnace oil tank for the Boiler if located in the adjoining room shall be separated by fire resisting wall of four hours rating. The entrance to this room shall be provided with double composite doors. A curb of suitable height shall be provided at the entrance in order to prevent the flow of oil into the boiler room in case of tank rupture.

- (f) Foam inlets shall be provided on the external walls of the building near the ground level to enable the fire services to use foam in case of fire.

P-11 PROVISION OF FIRST AID FIRE FIGHTING APPLIANCES.

- P-11.1. The first aid fire fighting equipments shall be provided on all floor including basements, lift rooms etc. in accordance with IS: 2217, 1963 Recommendations for providing Firstaid Fire Fighting Arrangements in Public Buildings in consultation with the Chief Fire Officer, Nagpur fire Brigade
- P-11.2 The fire fighting appliance shall be distributed over the building in accordance with IS : 2190. 1971 Code of practice for selection, installation and maintenance of portable first aid fire appliances.

P-12. FIXED FIRE FIGHTING INSTALLATIONS.

- P-12.1. Buildings above 15 m. in height depending upon the occupancy use shall be protected by wet riser, wet riser - cum - down comer, automatic sprinkler installation, high pressure water spray or foam generating system etc. as per details given in P - 12.2 to P-12.7.
- P-12.2. The wet Riser installations shall conform to IS : 3844.1966 Code of practice for installation of internal fire hydrants in multistoreyed buildings.
In addition, Wet Riser shall be designed for zonal distribution enduring that unduly high pressure are not developed in risers and hose pipes.
- P-12.3.1 Static Water Storage Tank-A satisfactory supply of water for the purpose of fire fighting shall always be available in the form of under ground static storage tank with capacity specified for each building with arrangements of replenishment by main or alternative source of supply a 1000 litres per minute. The static storage water supply required for the above mentioned purpose should entirely be accessible to the fire engines of the Local Fire Service. Provision of suitable number of manholes shall be made available for inspection, repairs and inspection of suction hose etc. The covering slab shall be able to withstand the vehicular load of 18 tons. The domestic suction tank connected to the static water storage tank shall have an overflow capable of discharging 225 litres per minute to a visible drain point from which by a separate conduits, the overflow shall be conveyed to a storm water drain.
- P-12.3.2 To prevent stagnation of water in the static water storage tank the suction tank of the domestic water supply shall be fed only through a overflow arrangement to maintain the level therein at the minimum specified capacity (fig.2).
- P-12.3.3 The static water storage tank shall be provided with a fire brigade collecting branching with 4 Nos. 63 mm. dia. (2 Nos. 63 mm. dia for pump with capacity 1400 litres / minute) instantaneous main inlets arranged in a valve box at a suitable point at street level and connected to the static tank by a suitabtp fixed pipe not less than 15 cm. dia., to discharge water into the tank when required at a rate of 2250 litres per minute.
- P 12.4 Automatic Sprinklers : Automatic sprinklers shall be installed :
- (a) In basement used as car parks, if the area exceeds 500 sq.m.
 - (b) In multi - storeyed basements used as car parks, and for housing essential services ancillary to a particular occupancy
 - (c) Any room or other compartment of building exceeding 500 sq.m.
 - (d) Departmental stores or shops that totally exceeds 750 sq.m.
 - (e) Alf non-domestic floors of mixed occupancy considered to constitute a hazard and not provided with staircases independents of the remainder of a building
 - (f) Godown and warehouses as considered necessary,
 - (g) On all floors of the buildings other than apartment buildings, if the height of the building exceeds 60 m.
 - (h) Dressing rooms, scenery docks, stages and stage basement of theatre.
- P.12.5. Automatic high pressure water spray (mulsifyrs system). This system shall be provided for protection of indoor transformers of a substation in a basement area.

FIG:1- ARRANGEMENT FOR PROVIDING COMBINED FIRE FIGHTING AND DOMESTIC WATER STORAGE TANK AS PER RULE NO:P-12.3.3.

FIG:2- APARTEMENT BUILDINGS EXCEEDING 16M

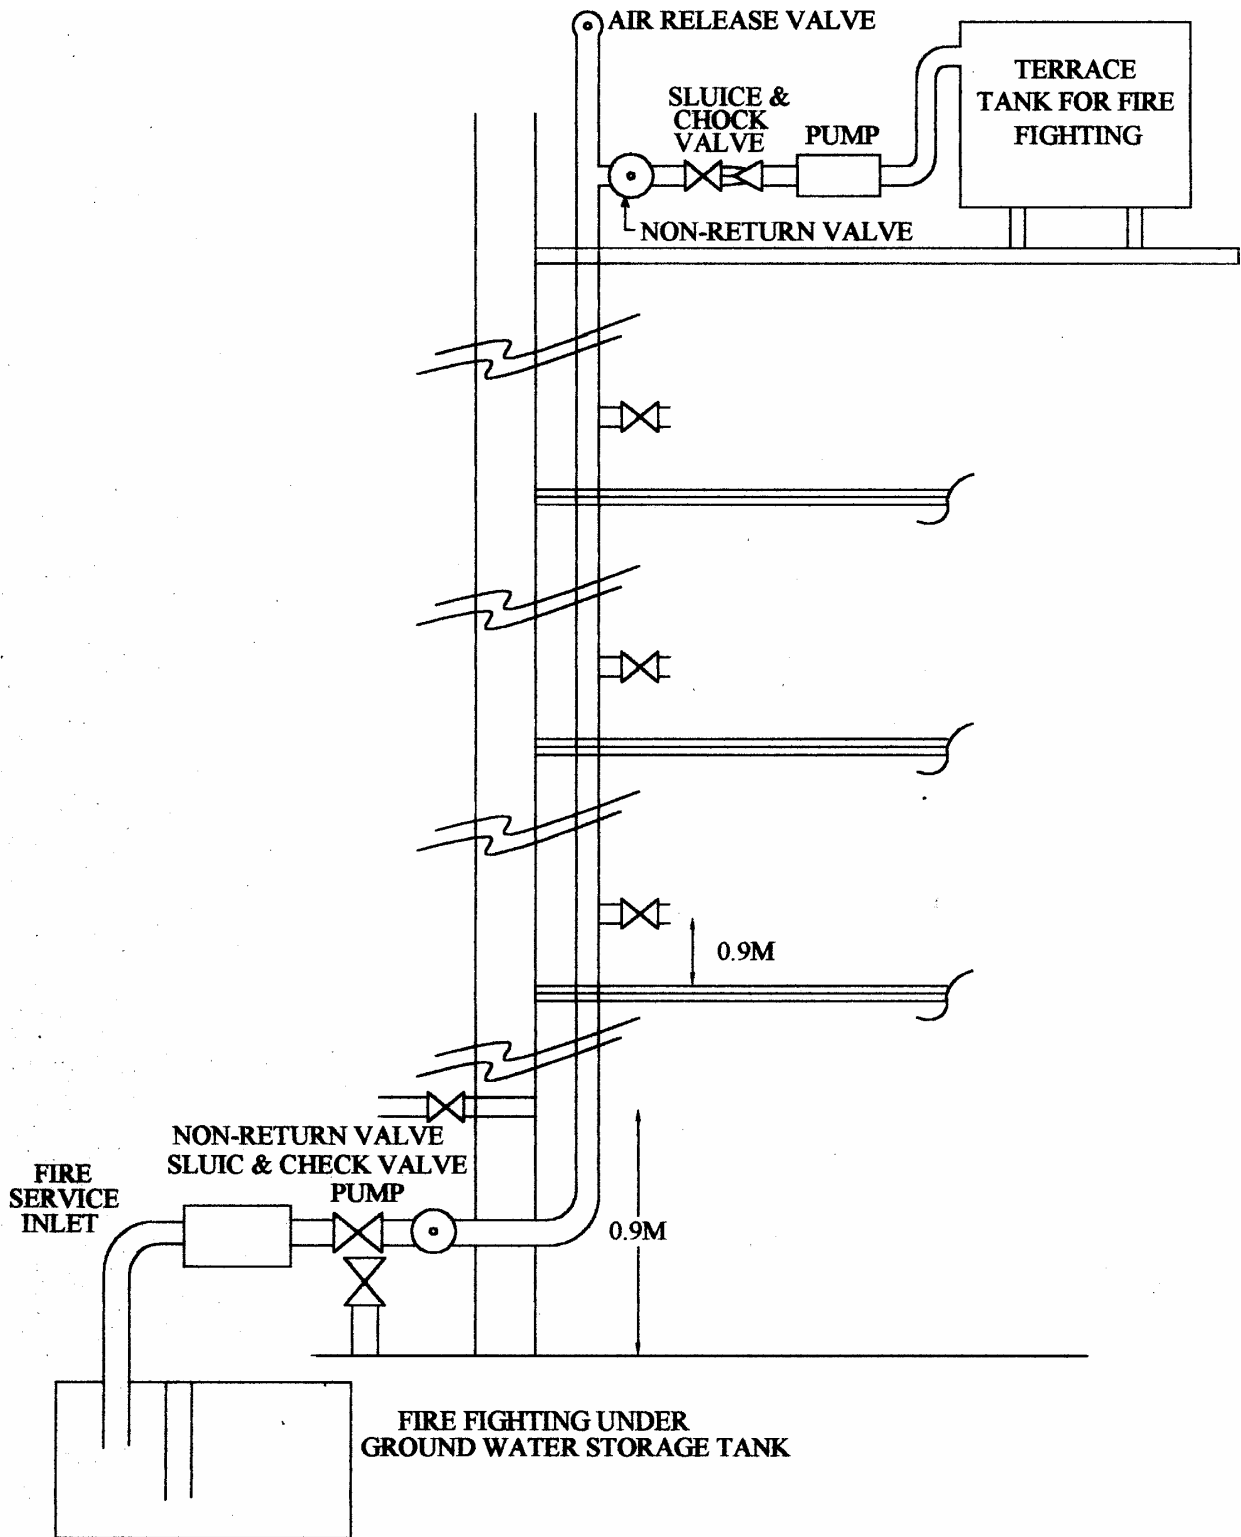

FIG:3- APARTMENT BUILDINGS EXCEEDING 13M

- P-12.6. Foam generating system :This system shall be provided for protection of boiler rooms with its ancillary storage of furnace oils in basement.
- P-12.7 Carbon-di-oxide Fire Extinguishing system :- Fixed Co2 fire extinguishing installation shall be provided as per IS : 6382, 1971 code of practice for design and installation of fixed Co2 fire extinguishing system on premises where water or foam cannot be used for fire extinguishment because of the special nature of the contents of the building / areas to be protected. Where possible BCF (Bromochloride Fluoromethane) installation may be provided instead of Co2 installation.

P-13 LIGHTENING PROTECTION OF BUILDINGS

- P-13.1. The lightning protection for buildings shall be provided based on the provisions of part III of the National Building Code of India -1970.

P-14 HOUSE KEEPINGS

- P-14.1. To eliminate fire hazards a good house keeping inside the building and outside the gilding shall be strictly maintained by the occupants and/or the owner of the building.

P-15 FIRE DRILLS AND FIRE ORDERS

- P-15.1 Fire notices /order shall be prepared to fulfil the requirements of the fire fighting and evacuation from the buildings in the event of fire and other emergency. The occupants shall be made thoroughly conversant with their action in the event of the emergency, by displaying fire notices at vantage points. Such notices should be displayed prominently broad lettering.
- P-15.2 The wet riser/wet riser-cum-down comers installations with capacity of water storage tanks and fire pumps shall conform to the requirements as specified in Table 30.

TABLE 30 FIRE FIGHTING INSTALLATION / REQUIREMENTS

Sr. No.	Type of the Building/ Occupancy	Requirements No.				
		Type of Installations	Water Supply		Pump Capacity	
			Under-ground Static Tank	Terrace Tank	Near the under-ground Static Tank	at the Terrace Level
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1.	Apartment Building below 15 m. in height	Nil	Nil	Nil	Nil	Nil
2.	Apartment Buildings (a) above 15 m. but not exceeding 24 m.	Wet riser Cum-down comer with provision of fire service inlet only near ground level.	Nil	10,000 liter	Nil	100 liters per minute giving a pressure not less than 1.5 kg./cm ² at the topmost hydrant.
3.	Non-apartment building : (a) Industrial, storage and Hazardous upto 15 m. in height. (b) above 15 m. in height but not exceeding 24 m. excepting educational buildings. (c) Educational building above 15m. but not exceeding 24 m. in height.	Nil Wet riser Cum-down comer Wet riser Cum-down comer.	50,000 50,000 litres Nil	Nil 10,000 litres 10,000 litres	Nil 1,350 litres per minute giving a pressure not less than 3.2 kg/Cm ² at the topmost hydrant except for institutional, Business and educational Building. Nil	Nil 450 litres per minute giving pressure not less than 2.1 kg/Cm ² at the topmost hydrant. Nil

NOTE - 1. Any of the above categories may incorporate an automatic sprinkle / drencher system, if the risk is such that it requires installation of such protective methods.

NOTE - 2. Minimum of two hydrants shall be provided within the courtyard.

NOTE - 3. Wet riser - cum - down comer is an arrangement for fire fighting within the building by means of vertical rising mains not less than 10.00 cm. internal dia. with hydrant outlets and hose reel on each floor /landing connected to an over head water Storage tank for fire fighting purpose, through a booster pump check valve and non return valve near the tank and a fire pump gate the non - return valve, over the under ground static tank. A fire service inlet at ground level fitted with non - return valve, shall also be provided to the rising main for charging it by fire service pump in case of failure static fire pump over the underground static tanks.

NOTE - 4. The performance of pumps specified above shall be at R. P. M. not exceeding 2,000.

NOTE - 5. The above quantities of water shall be exclusively for fire fighting and shall not be utilised for domestic or other use. The layout of under ground water static tank shall be as per sketch attached.

NOTE - 6. Size of the riser shall be as under (internal diameter)

- (a) Apartment buildings
 - (i) Upto 24 m. 10 cm. with single hydrant outlet and hose reel on each floor.
- (b) Non - apartment building.
 - (i) Upto 24 m. 10 cm. with hydrant outlet and hose reel on each floor.

NOTE - 7. A facility to boost up water pressure in the riser directly from the mobile pump shall also be provided to the wet riser system with a suitable fire service inlets (collecting breaching with 2 numbers of 63 mm inlets for 10 cm. rising main and numbers of 63 mm. inlets with check valve for 15 cm. dia. rising main) and a non - return valve and gate valve.

NOTE - 8 Hose Reel - Internal diameter of rubber hose for hose reel shall be minimum 19 mm. A shun off branch with nozzle of 4.8 mm. size be provided.

APPENDIX Q

(See Regulation No. 31)

Regulations for Information Technology Establishments :

- Q. 1. Notwithstanding anything contained in these regulations, following regulations shall apply to the building to be used for information technology establishment.
- Q.1.1. Definition -Information Technology Establishment (ITE) means an establishment which is in the business of developing either software or hardware.
- Q.1.2. Height of the room for ITE : Any telematic equipment storage erection facility can have a height as required for effective functioning of that system.
- Q.1.3. Any covered antenna / dish antenna / communication tower will be allowed to be erected free of FSI if, it is used for telecom (basic cellular or satellite telephone) or ITE purpose which shall include equipment relating to earth station, V-sat, routes transponders and similar ITE related structures or equipments.
- *Q.1.4. ITE (pertaining software only) may be permitted in R -1 zone on the plots / premises fronting on roads having width 9.0 mt and above.
- Q.1.5. ITE shall be permitted in service industries zone and industrial zone on all roads having width more than 12 m.
- Q.1.6 ITE (pertaining to software only) with ancillary residential development shall be allowed in no development zone subject to the following conditions :-
 - (1) The total FSI shall not exceed 0.5.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

- (2) Residential development shall not have FSI of more than 0.15.
- (3) Construction of ITE I Ancillary residential use may be permitted (in suitable location so as to keep as much as remaining space open) upto 15% on 50% of the area of plot. On remaining 50% plot, trees shall be planted at the rate of 500 trees per Ha.
- (4) Subdivision of land shall be permitted with the area of plot to be subdivided being not less than 400 sq. mt.

*Q.1.7. Additional FSI for ITE :-The Commissioner / Chairman may permit the floor space indices specified in these regulations to be exceeded upto 100% (excluding no development zone) in respect of building in independent plot of ITE set up by public bodies like MHADA, SEEPZ, MIDC, SICOM, STP or their joint venture companies having more than 51% stake of these bodies having plots exclusively used for ITE in congested area and non congested area subject to the terms and conditions as may be specified by Commissioner / Chairman However the additional F.S.I. shall not make the total available F.S.I. more than 2.5 on any plot or land.

Provided in case of additional floor space index allowed in respect of ITE as aforesaid premium as may be determined by the government shall be paid to the Government out of, which 50% premium shall be payable to the corporation / NIT.

*Q.1.8 Not with standing anything contained above, ITE shall not be permitted on 'No Shopping Frontage Street' identified in Table No. 6

APPENDIX R

(See Regulation No. 32)

R-1. Users Permitted below Flyover. -Following Commercial users shall be permitted below the space of new flyovers or in new sub-ways subject to the following conditions:-

- (1) The shops / offices shall face the internal passage of adequate width.
- (2) Adequate area under flyover shall be earmarked and used for parking.
- (3) Sufficient area under flyover shall be developed as green lots so as to make the surrounding aesthetically beautiful.
- (4) Exposed walls can be used for advertisement purpose. Such advertisement will not cause hindrance to the traffic.
- (5) The entry and exist point shall be conveniently located considering the use and the traffic by providing a subway or an overbridge. In no case, the pedestrian be allowed to cross the main roads.
- (6) The plans of the flyovers shall be got approved from the Director of Town Planning in consultation with Deputy Director of Town Planning, Traffic and Transportation Cell.
- (7) The corporation / NIT may prescribe any other suitable conditions as deemed necessary without violating the spirit mentioned in, Clause No. 1 to 6.

*** (Kept in abeyance. Decision will be taken Separately.)**

TABLE No. 31***(Regulation No, 33)****OPEN SPACE RELAXATIONS IN NARROW PLOTS IN RESIDENTIAL AND COMMERCIAL ZONES**

Sr. No.	Plot Size / Dimension	Relaxation	Restriction on Building
(1)	(2)	(3)	(4)
1.	Depth is less than 15 m.	Rear open space may be reduced to 3 m.	No room except storeroom and staircase derives light and ventilation from reduced Open space.
2.	Width less than 15 m. but more than 11.5 m.	Side open space may be reduced to 3 m.	No room except store room and staircase derives light and ventilation from reduced open space.
3.	Depth less than 11.5m. but more than 9 m.	Front open space may reduced to 3 m. and rear open space reduced to 1.8 m.	(1) Depth of building not to exceed 5.5 m. (2) Height not to exceed 3 stories or 10 m.
4.	Width less than 11.5 m. but more than 9 m.	One side open space may be reduced to 3 m. and other side Open space may be reduced to 1.8 m.	(1) Depth of building not to exceed 5.5 m. (2) Height not to exceed 3 stories or 10 m.
5.	Depth or width less than 11.5 m.	Semidetached structure on adjoining plots with open spaces as serial nos. 3 or 4 above	(1) Depth of building not to exceed 5.5 m. (2) Height not to exceed 3 stories or 10 m. Only ground floor structure
6.	Depth or width less than 9 m.	Open space may be reduced to 1.5 m. all around.	Only ground floor structure.

* Modification vide Govt. of Mah. Gazette notification dated 9th April 2001.

9.0	Unsafe Buildings	26
10.0	Offences and Penalties	26
11.0	Amendment to Appendices	27
12.0	Clarification	27
PART - II GENERAL LAND DEVELOPMENT REQUIREMENTS		
13.1	Sites not Eligible for construction of Building	28
13.2	Distance of site from Electric Lines	29
13.3	Construction within flood line	29
13.4	Development within 30 m. from Railway boundary	30
13.5	Environmental clearance	30
13.6	Restrictions in the vicinity of Airport	30
13.7	Restrictions in the vicinity of Ancient Monuments	30
13.8	Development along Highways / Classified roads	30
13.9	Development within 500 m. from the Prison Premises	30
13.10	Distance from land fill sites	30
13.11	Authorities to supply complete information to corporation	30
14.0	Means of Access	31
15.0	Regulation for Land Sub-division and Layout	31
15.1	Obligation to prepare layout	31
15.2	Roads / streets in Land Sub-division or Layout	31
15.3	Recreational open spaces	34
15.4	Provision for Amenity space	37
15.5	Provision for Electric Sub-station	38
15.6	Provision for Inclusive Housing	39
15.7	Plot area, plot width for various uses	41
15.8	Net Plot Area and computation of FSI	41
15.9	Transfer of DP sites (other than DP road) in lieu of FSI	41
15.10	Relocation of DP Sites/DP Proposals	41
15.11	Amalgamation of Plots	41

PART - III		
LAND USE CLASSIFICATION AND PERMISSIBLE USES		
16.0	General	44
16.1	Residential Zone - R1	45
16.2	Residential Zone - R2	46
16.3	Slum Improvement Zone	50
16.4	Commercial Zone(C-1), Special Commercial Zone, Business Hub	50
16.5	Central Business District Zone	50
16.6	Industrial Zone	50
16.7	Agricultural Zone / No Development Zone	53
16.8	Green Belt	57
16.9	Hill Top Hill Slope Zone (HTHS)	57
16.10	Public / Semi Public Zone	58
16.11	Traffic and Transportation	58
16.12	Defence Zone	58
16.13	Forest Zone	58
16.14	Restrictive Zone	58
16.15	Additional Uses	58
16.16	Uses Permissible in Proposed Reservations	58
PART - IV		
GENERAL BUILDING REQUIREMENTS - SETBACK, MARGINAL DISTANCE, HEIGHT AND FSI		
17.0	General	61
17.1	Regulations for Congested area	61
17.2	Regulations for Outside Congested Area	63
17.2.1	Marginal distances for building height 15 m. and below	63
17.2.2	Marginal distances for other buildings	65
17.2.3	a) Front marginal distances for higher buildings	67
	b) Side and rear marginal distances for higher buildings	67
	c) Provision for step margin	67
17.2.4	Distance between two buildings	68
17.2.5	Distances from internal Road in Group Housing	68
17.2.6	Building abutting two or more streets	68
17.3	Permissible FSI	69
17.4	Industrial Building	69
17.5	FSI of Green Belt	70
17.6	Permissible Structures / Projections in Marginal Distances	70
17.7	Exclusion of structures / projections for FSI calculations	71
17.8	Interior & Exterior Chowk	72
17.9	Height of Building	72
17.10	Height Exemptions	73
17.11	High Rise committee	73
17.12	Special Regulations for Koregaon Park Area	74
PART - V		
REQUIREMENTS OF PARTS OF BUILDINGS		
18.0	Requirements of various Part of Buildings	75
18.1	Plinth	75
18.2	Habitable Room	75
18.3	Kitchen	77
18.4	Bathroom, Water Closet	77
18.5	Ledge or Tand/Loft	78
18.6	Mezzanine Floor	79
18.7	Store Room	79
18.8	Garage	79
18.9	Roofs	80
18.10	Basement	80

18.11	Ramp	81
18.12	Podium	82
18.13	Balcony	83
18.14	Stilt	83
18.15	Lighting and Ventilation of Room (Ventilation shaft)	83
18.16	Overhead Tanks	84
18.17	Parapet	84
18.18	Cabin	84
18.19	Society Office	84
18.20	Wells	84
18.21	Septic tank	85
18.22	Boundary Wall,	86
18.23	Letter Box Room	86
18.24	Meter Room	86
18.25	Chimney	87
18.26	Double Height Terrace	87
18.27	General Exit Requirements	87
18.28	Requirements of Individual Exit	90
18.29	Additional Requirements in case of housing scheme	93
19.0	Fire protection requirements	94
PART - VI		
PARKING LOADING AND UNLOADING SPACES		
20.0	Parking, Loading and Unloading Spaces	95
PART - VII		
ACQUISITION / DEVELOPMENT OF RESERVED SITES IN DEVELOPMENT PLAN		
21.0	Accommodation Reservation Principle	100
22.0	Transferable Development Rights	111
23.0	Reservation Credit Bond (RCB)	117
PART - VIII		
HIGHER FSI IN CERTAIN CATEGORIES IN NON-CONGESTED AREAS		
24.0	General	118
24.1	Higher FSI for Various Buildings	119
24.2	Entitlement of FSI for road widening or construction of new roads / surrender of Reserved land	127
24.3	Development/ re-development for construction of staff quarters of the State Government or its statutory bodies or Municipal Corporation on private lands	127
24.4	Development / re-development of Housing Schemes by MHADA	128
24.5	Redevelopment of Existing Buildings belonging to EWS /LIG group	132
24.6	Redevelopment of Old /Dilapidated and Dangerous Building	132
24.7	Redevelopment of Existing Buildings	134
24.8	Transit Oriented Development (TOD)	134
24.9	Development of Housing for EWS/LIG	138
24.10	Regulation for development of IT establishment	139
24.11	Regulation for Development of Bio-Technology Park	141
24.12	Development of Public Toilet	142
PART - IX		
STRUCTURAL SAFETY, WATER SUPPLY, DRAINAGE & SANITARY REQUIREMENTS, OUTDOOR DISPLAY STRUCTURES		
25.0	Structural Design	143
26.0	Quality of Materials and Workmanship	143
27.0	Alternative Materials, Methods of Design and Construction and Tests	143
28.0	Building Services	144
29.0	Water Supply, Drainage and Sanitary Requirements	144
30.0	Drainage and Sanitary Requirements	146
31.0	Signage and Outdoor Display Structures	147

PART - X		
SPECIAL PROVISIONS IN CERTAIN BUILDINGS		
32.0	Provisions for Barrier free Access	148
33.0	Installation of Solar assisted Water Heating (SWH) System/ Roof Top Photovoltaic (RTPV) System	148
34.0	Rain Water Harvesting	148

**DEVELOPMENT CONTROL AND PROMOTION REGULATIONS
FOR PUNEMUNICIPAL CORPORATION-2017**

**PART - I
ADMINISTRATION**

1.0 SHORT TITLE, EXTENT AND COMMENCEMENT

1.1 These Regulations shall be called as "Development Control and Promotion Regulations for Pune Municipal Corporation-2017 (DCPR-2017)"

1.2 Extent- These Regulations shall apply to the building activities and development works on lands within the old limits of Pune Municipal Corporation as notified under Section 23 of the Maharashtra Regional & Town Planning Act, 1966 on 13th December, 2007. These regulations will be parent regulation within the meaning of Government notification no.TPS-1806/ 2125/CR-435/2006/UD-13, dated 6th December, 2007 sanctioned for additional area of Pune Municipal Corporation. If any conflicts arises between these regulations and regulations of additional areas, in such cases regulations of these parents DCPR-2017 will prevails.

1.3 Commencement- This set of DCPR-2017 shall come into force from the date specified in the Notification date 05/01/2017 sanctioning the Development Plan along with the Development Control and Promotion Regulations under Section 31 of the MRTP Act and these shall replace all the existing Development Control Regulations, and any other office memo or circulars issued in contravention to the intent and sprit of the sanctioned Regulations by the Municipal Corporation, shall cease to be in effect.

1.4 Savings: Not withstanding anything contained in these regulations, any development permission granted or any development proposal for which any action is taken under the erstwhile Regulations shall be valid and continue to be so valid, unless otherwise specified in these Regulations.

Provided that, permission granted earlier shall be eligible for renewal as per provisions of the Act. Provided further that, the words 'action taken' in this regulation shall also include the issuance of Demand note for granting the development permission.

Provided also that, it shall be permissible for the owner to -

- a) either continue to develop the project under the erstwhile regulations in toto and for that limited purpose erstwhile regulation shall remain in force, or
- b) apply for grant of revised permission under the new regulations, if the project is on-going and the occupation certificate, has not been granted fully.

Provided also that, development permissions granted under earlier regulation as per the provisions of Appendix R / or AR provisions and full and/or final occupation certificate is issued, in such cases the portion/location designated for respective reservation is continued to be in said reservation and rest of land on which residential/commercial development permission is granted is deem to be converted in to residential/ commercial zone to the extent of that area;

1.5 Validity of development permission. - If development permission has been issued before the date of commencement of these Regulations, but the development is not started within a year from the date of such permission, the said development permission shall be deemed to have lapsed.

1.6 **Applicability to partially completed works** - For partially completed works, started with due permission before these Regulations have come into force, the Commissioner may not, for reasons to be recorded in writing, necessarily insist on compliance with the provisions of these Regulations for extending the period of the development permission, which shall not exceed that specified in section 48 of the Maharashtra Regional land Town Planning Act, 1966.

2.0 DEFINITIONS

2.1 General

2.1.1 In these Regulations, unless the context otherwise requires, the definitions given hereunder shall have meaning indicated against each of them.

2.1.2 Words and expressions which are not defined in these Regulations shall have the same meaning or sense as in the -

- i) The Maharashtra Regional and Town Planning Act, 1966
- ii) The Maharashtra Municipal Corporation Act and
- iii) National Building Code, 2005 or amended from time to time

2.2 **"Act"**- Act in these Regulations shall mean the Maharashtra Regional and Town Planning Act, 1966;

2.3 **"Annual Statements of Rates"** means *ASR* published by Inspector General of Registration, Maharashtra State, Pune;

2.4 **"Authority"** means Municipal Commissioner of Pune Municipal Corporation unless otherwise specified;

2.5 **"Alteration"** means any change in existing authorized building or change from one occupancy to another, or a structural change, such as an addition to the area or height, or the removal of part of a building, or any change to the structure, such as the construction of, cutting into or removal of any wall, column, beam, joist, floor, roof or other support or a change to or closing of any required means of ingress (entry) or egress (exit) as provided under these regulations. However, modification in respect of gardening, white washing, painting, plastering, pointing, paving and retailing shall not be deemed to be alteration;

2.6 **"Advertising Sign"** means any surface or structure with characters, letters or illustrations applied thereto and displayed in any manner whatsoever outdoor for purposes of advertising or to give information regarding or to attract the public to any place for public performance, article or merchandise whatsoever, or is attached to, or forms a part of building, or is connected with any building or is fixed to a tree or to the ground or to any pole, screen, fence or hoarding or displayed in space, in or over any water body;

2.7 **"Accessory Building"** means a building separate from the main building on a plot and containing one or more rooms for accessory use such as servant quarters, garage, store rooms etc;

2.8 **"Accessory / Ancillary Use"** means any use of the premises subordinate to the principal use and incidental to the principal use;

2.9 **"Amenity Space"** means a statutory space provided in any layout to be used for any of the amenities / utilities specified in these Regulations ;

2.10 **"Access"** means a clear approach to a plot or a building;

- 2.11 “**Architect**” means a person registered with Council of Architecture(COA) as per Architects Act, 1972 as an Architect with a valid (COA) Registration Number;
- 2.12 “**Architectural projection**” means Chajja, Cornice, Ledge etc. which is a protrusion from the building facade or window line of the building used for non-habitable uses.;
- 2.13 “**Atrium**” means a sky lighted naturally/mechanically ventilated area in buildings, with no intermediate floors, used as circulation space or entrance *foyer*;
- 2.14 “**Balcony**” means a horizontal cantilever projection, including parapet and handrail balustrade to serve as a passage or sitting out place with at least one side fully open, except being provided with railing or parapet wall for safety;

- 2.15 “**Basement**” means the lower storey of a building below or partly below the ground level with one or more than one levels;
- 2.16 “**Building**” means any structure for whatsoever purpose and of whatsoever materials constructed and every part thereof whether used as human habitation or not and includes foundation, plinth, walls, floors, roofs, chimneys, wells, door steps, fencing, plumbing and building services, fixed platforms, verandas, balcony; cornice or projection, part of a building or anything affixed thereto or any wall fence enclosing or intended to enclose any land or space and signs and outdoor display structures. However, tents, shamianas and the tarpaulin shelters erected for temporary and ceremonial occasions with the permission of the Municipal Commissioner shall not be considered as building;
- 2.17 “**Built up Area**” means the area covered by a building on all floors including cantilevered portion, mezzanine floors if any but excepting the areas excluded specifically from FSI under these Regulations;
- 2.18 “**Building Line**” means the line upto which the plinth of a building adjoining a street or an extension of a street or on a future street may lawfully extend. It includes the lines prescribed, if any, in any scheme and / or development plan, or under any other law in force;
- 2.19 “**Building Height**” means the vertical distance measured in the case of flat roofs, from the average level of the ground around and contiguous to the building to the terrace of last floor of the building adjacent to the external walls; to the highest point of the building and in the case of pitched roofs, up to the point where the external surface of the outer wall intersects the finished surface of the sloping roof; and in the case of gable facing road, the mid-point between the eaves level and the ridge. Architectural features serving no other function except that of decoration shall be excluded for the purpose of measuring heights;

- 2.20 "Builder / Developer"** means a person who is legally empowered to construct or to execute work on a building unit, building or structure and/or land development or where no person is empowered, the owner of the building unit, building or structure.
- 2.21 "Bio-Technology Unit"** means an Unit or a Park which is certified as such by the Development Commissioner (Industries);
- 2.22 "Carpet area"** means the net usable floor area of an apartment, excluding the area covered by the external walls, areas under services shafts, exclusive balcony or veranda area and exclusive open terrace area, but includes the area covered by the internal partition walls of the apartment.
- Explanation.— For the purpose of this clause, the expression "exclusive balcony or veranda area" means the area of the balcony or veranda, as the case may be, which is appurtenant to the net usable floor area of an apartment, meant for the exclusive use of the allottee; and "exclusive open terrace area" means the area of open terrace which is appurtenant to the net usable floor area of an apartment, meant for the exclusive use of the allottee;
- 2.23 "Chajja"** means a sloping or horizontal structural overhang usually provided over openings on external walls to provide protection from sun and rain and for purpose of architectural appearance;
- 2.24 "Chimney"** means an upright shaft containing one or more flues provided for the conveyance to the outer air of any product of combustion resulting from the operation of heat producing appliance or equipment employing solid, liquid or gaseous fuel;
- 2.25 "Cluster"** means any defined area with proper access;
- 2.26 "Control Line"** means a line on either side of a highway or part of highway beyond the building line fixed in respect of such highway by the Highway Authority from time to time;
- 2.27 "Courtyard or Chowk"** means a space permanently open to sky enclosed on sides fully or partially by buildings and may be at ground level or any other level within or adjacent to a building;
- 2.28 "Canopy"** means a projection over any entrance;
- 2.29 "Congested Area"** means the area shown as congested on the Development Plan;
- 2.30 "Convenience Shopping"** means shops for domestic needs each with carpet area not exceeding 20 sq.m.;
- 2.31 "Corridor"** means a common passage or circulation space including a common entrance hall;
- 2.32 "Detached Building"** means a building whose walls and roofs are independent of any other building with marginal distances on all sides as specified;
- 2.33 "Development"** with its grammatical variations means the carrying out of buildings, engineering, mining or other operations in, or over, or under land or the making of any material change, in any building or land or in the use of any building or land or any material or structural change in any Heritage building or its precinct and includes demolition of any existing building, structure or erection of part of such building, structure of erection and reclamation, redevelopment and layout or sub-division of any land and to develop shall be construed accordingly;
- 2.34 "Development Plan"** means the plan for the development of the area within the jurisdiction

of Pune Municipal Corporation and includes the revised development plan;

- 2.35 **"Dwelling Unit /Tenement"** means an independent housing unit with separate facilities for living, cooking and sanitary requirements;
- 2.36 **"Enclosed Stair- case"** means a staircase separated by fire resistant walls and door (s) from the rest of the building;
- 2.37 **"Existing Building or Use"** means a building, structure or its use existing authorisedly;
- 2.38 **"Exit"** means a passage, channel or means of egress from any building, storey or floor area to a street or other open space of safety;
- 2.38.1 **"Vertical Exit"** means exit used for ascension or descension between two or more levels including stairways, smoke proof towers, ramps, escalators and fire escapes;
- 2.38.2 **"Horizontal Exit"** means a protected opening through or around a firewall or a bridge connecting two buildings;
- 2.38.3 **"Outside Exit"** means an exit from the building to a public way, to an open area leading to a public way, to an enclosed fire resistive passage to a public way;
- 2.39 **"External Wall"** means an outer wall of a building, not being a party wall even though adjoining to a wall of another building and also means a wall abutting on an interior open space of any building;
- 2.40 **"Escalator"** means a power driven, inclined, continuous stairway used for raising or lowering passengers;
- 2.41 **"Fire and/ or Emergency Alarm System"** means an arrangement of call points or detectors, sounders and other equipments for the transmission and indication of alarm signals, for testing of circuits and, whenever required, for the operation of auxiliary services. This device may be workable automatically or manually to alert the occupants in the event of fire or other emergency;
- 2.42 **"Fire lift"** means a lift specially designed for use by fire service personnel in the event of fire;
- 2.43 **"Fire Proof Door"** means a door or shutter fitted to a wall opening, and constructed and erected with the requirement to check the transmission of heat and fire for a specified period;
- 2.44 **"Fire Resisting Material"** means a material which has certain degree of fire resistance;
- 2.45 **"Fire Resistance"** means the time during which a material fulfils its function of contributing to the fire safety of a building when subjected to prescribed conditions of heat and load or restraint. The fire resistance test of structures shall be done in accordance with "IS -3809 - 1966 Fire Resistance Test of Structures";
- 2.46 **"Fire Separation"** means the distance in meters measured from any other building on the site, or from other site, or from the opposite side of a street or other public space to the building;
- 2.47 **"Fire Service Inlets"** means a connection provided at the base of a building for pumping up water through in-built fire-fighting arrangements by fire service pumps in accordance with the recommendations of the Fire Services Authority;
- "Fire Tower"** means an enclosed staircase which can only be approached from the various floors through landings or lobbies separated from both, the floor areas and the staircase by fire resisting doors and open to the outer air;

- 2.49 **“Floor”** means the lower surface in a storey on which one normally walks in a building. The general term floor unless otherwise specifically mentioned shall not refer to a mezzanine floor;

Note - The sequential numbering of floor shall be determined by its relation to the determining entrance level. For floor at or above ground level, with direct entrance from / to road or street shall be termed as ground floor. The other floors above ground floor shall be numbered in sequence as Floor 1, Floor 2, etc., with the number increasing upwards. The stilt shall be termed as stilt floor or Stilt floor 1, Stilt floor 2 etc. and floors above shall be numbered as Floor 1, Floor 2, etc.,

- 2.50 **“Floor space index (F. S. I)”** means the quotient obtained by dividing the total built-up area on all floors, excluding exempted areas as given in Regulation no.17.7 by the area of the plot;

$$\text{F.S.I.} = \frac{\text{Total built-up area on all floors}}{\text{Plot area}}$$

- 2.51 **“Premium FSI”** means the FSI that may be available on payment of premium as may be prescribed under these regulation;
- 2.52 **“Fitness centre”** means and includes the built up premises, including toilet facilities, provided in the building including gymnasium for the benefit of its inmates and for the purpose of fitness, physical exercises, yoga and such other activities as may be permitted by the Commissioner from time to time.
- 2.53 **“Footing”** means a foundation unit constructed in brick work, masonry or concrete under the base of a wall or column for the purpose of distributing the load over a large area;
- 2.54 **“Foundation”** means that part of the structure which is in direct contact with and transmitting loads to the ground;
- 2.55 **“Front Margin”** means the distance between the boundary line of plot abutting the means of access/ road/ street and the building. In case of plots facing two or more means of accesses / roads / streets, the plot shall be deemed to front on all such means of access / road / streets;
- 2.56 **“Gallery”** means an intermediate floor or platform projecting from a wall of an auditorium of a hall providing extra floor area, additional seating accommodation etc. These shall also include the structures provided for seating in stadia.
- 2.57 **“Garage Private”** means a building or portion thereof, designed and used for parking of privately owned motor driven or other vehicles;
- 2.58 **“Garage-Public”** means a building or portion thereof designed as other than a private garage, operated for gain, designed or used for repairing, servicing, hiring, selling or storing or parking motor driven or other vehicles.;
- 2.59 **“Group Housing Scheme”** means a building or a group of buildings constructed or to be constructed with one or more floors, consisting of more than one dwelling units and having common service facilities. Common service facilities means facilities like stair case, balcony, corridor, and veranda, lift, etc;
- 2.60 **“Ground Level”** means the average level of ground in a plot (Site);
- 2.61 **“Guest house”** means a premise for housing the staff of Government, semi –government, public undertaking and private limited company for short duration.

- 2.62 **"Habitable Room"** means, a room constructed or intended for human habitation;
- 2.63 **"Home Occupation"** means occupation, other than an eating or a drinking place, offering services to the general public, customarily carried out by a member of the family residing on the premises without employing hired labour, and for which there is no display to indicate from the exterior of the building that it is being utilized in whole or in part for any purpose other than a residential or dwelling use, and in connection with which no article or service is sold or exhibited for sale except that which is produced therein, which shall be non-hazardous and not affecting the safety of the inhabitants of the building and the neighbourhood and provided that no mechanical equipment is used except for what is customarily used for purely domestic or household purposes and / or employing licensable goods;
- 2.64 **"Information Technology Establishment (ITE)"** means an establishment which is in the business of developing either software or hardware relating to computers or computer technology as approved by Director of Industries;
- 2.65 **"Ledge or Tand"** means a shelf like projection, supported in any manner whatsoever, except by vertical supports within a room itself but not having projection wider than 0.60 m.;
- 2.66 **"Licensed Engineer / Structural Engineer / Supervisor"** means a qualified Engineer/ Structural Engineer / Supervisor licensed by the Municipal Commissioner;
- 2.67 **"Lift"** means an appliance designed to transport persons or materials between two or more levels in a vertical or substantially, vertical direction, by means of a guided car platform;
- 2.67.1 **"Lift Well"** means an unobstructed space within an enclosure provided for the vertical movement of the lift car(s) and any counter weights, including the lift pit and the space for top clearance;
- 2.68 **"Loft"** means, an intermediate floor between two floors, with a maximum height of 1.5 m., which is constructed and used for storage purpose, fully defined in regulation Site17.5;
- 2.69 **"Mall"** means a large enclosed shopping area;
- 2.70 **"Marginal distance / Set back"** means a minimum distance required to be left open to sky between the boundary of the building plot and the building excluding court yard/chowk, which is an integral part of the plot;
- 2.71 **"Mezzanine floor"** means an intermediate floor between two floors of any story, forming an integral part of floor below, overhanging or overlooking a floor beneath, not being a loft between the floor and the ceiling of any storey;
- 2.72 **"Means of Access"** shall include the road/street/vehicular access way, pathway upto the plot and to the building within a plot;
- 2.73 **"Net plot area"** means the area as per Regulation no.15.8;
- 2.74 **"Newly merged area"** means area included in the jurisdiction of Pune Municipal Corporation vide Government Notification No. PMC 3020/1676/ CR-258/ 2000/Navi-22, dated 17.11.2001.
- 2.75 **"Non-Combustible Material"** means a material which does not burn nor add heat to a fire when tested for combustibility in accordance with IS: 3808 – 1966 'Method of Test for Combustibility of Building Materials';
- "Non-conforming User"** means any lawful use / building existed on the Site but which does

not conform to the zoning shown on the Development Plan;

- 2.77 "Occupancy or Use Group"** means the principal occupancy or use for which a building or a part of a building is used, or intended to be used, for the purposes of classification of a building according to the occupancy. Occupancy shall be deemed to include subsidiary occupancies which are contingent upon it. Buildings with mixed occupancies are those buildings in which more than one occupancy are present in different portions of the building. The occupancy classification shall have the meaning given from 2.77.1 to 2.77.13;
- 2.77.1 "Residential Buildings"** means any building in which sleeping accommodation is provided for normal residential purposes with or without cooking or dining or both facilities. It includes one or two or multi-family dwellings, lodging or rooming houses, residential hotels, hostels, dormitories, dharmshalas, apartment houses, flats, service apartment, studio apartment and private garages incidental thereto;
- 2.77.2 "Educational Buildings"** means a building exclusively used for a school or college recognized by the appropriate Board or University, or any other competent authority involving assembly for instruction, education or recreation incidental to educational use, and including a building for such other users incidental thereto such as library, a research institution. It shall also include quarters for essential staff required to reside in the premises and a building used as a hostel attached to an educational institution whether situated in its campus or not and, also includes buildings used for day-care purposes more than 8 hours per week;
- 2.77.3 "Institutional Buildings"** means a building constructed or used by Government, Semi-Government organization or registered trusts or persons and used for medical or other treatment, or an auditorium or complex for cultural and allied activities or for an Hospice care of persons suffering from physical or mental illness, handicap, disease or infirmity, care of orphans, abandoned women, children and infants, convalescents, destitute or aged persons and for penal or correctional detention with restricted liberty of the inmates ordinarily providing sleeping accommodation, and includes hospitals, sanatoria, custodial and penal institutions such as jails, prisons, mental hospitals, houses of correctional detention and reformatories;
- 2.77.4 "Assembly Buildings"** means any building or part of building where groups of people congregate or gather for amusement, recreation or social, religious, patriotic, civil, travel and similar purposes, e.g. theatres, motion picture house, drive-in-theatres, multiplexes, assembly halls, city halls, town halls, auditoria, exhibition halls, museums, mangalkaryalaya, cultural centre, skating rinks, places of worship, dance theatres, club & gymkhana, passenger stations and terminals of air, surface and other public transportation services, recreation piers and stadia having built up area more than 1000 sq.m.;
- 2.77.5 "Business Buildings"** means any building or part of building, which is used for transaction of business for the keeping of accounts and records for similar purposes; offices, banks, professional establishments, I.T. establishments, call centre, offices for private entrepreneurs, court houses, libraries shall be classified in this group in so far as principal function of these is transaction of public business and the keeping of books and records;
- 2.77.6 "Office Building / Premises"** means the premises whose sole or principal use is to be used as an office or for office purpose; "office purposes" shall include the purpose of administration, clerical work, handling money, telephone/ telegraph/ computer operations and "clerical work" shall include writing, book-keeping, sorting papers, typing, filing, duplicating, drawing of matter for publication and the editorial preparation of matter for publication;

- 2.77.7 "Mercantile (Commercial) Buildings"** means any building or part of a building, which is used as shops, stores, market, malls for display and sale of merchandise either wholesale or retail Office, storage and service facilities incidental to the sale of merchandise and located in the same building shall be included under this group;
- 2.77.8 "Public-Semi-public Building"** means a building constructed or used by Government, Semi Government Organization, Government Undertaking, Local Authorities, for conducting public semi-public use like municipal office, post office, telephone office, etc.;
- 2.77.9 "Wholesale Establishments"** means an establishments wholly or partly engaged in wholesale trade, manufactures, wholesale outlets including related storage facilities, A.P.M.C. establishments, warehouses and establishments engaged in truck transport including truck transport booking agencies;
- 2.77.10 "Industrial Buildings"** means any building or part of a building or structure, in which products or materials of all kinds and properties are fabricated, assembled or processed like assembling plants, laboratories, power plants, smoke houses, refineries, gas plants, mills, dairies, factories etc.;

- 2.77.12 "Hazardous Buildings"** means any building or part of a building which is used for the storage, handling, manufacture or processing of highly combustible or explosive materials or products which are liable to burn with extreme rapidity and / or which may produce poisonous gases or explosions during storage, handling, manufacturing or processing, which involve highly corrosive, toxic or noxious alkalis, acids or other liquids or chemicals producing flames, fumes and explosive, mixtures of dust or which result in the division of matter into fine particles subject to spontaneous ignition;
- 2.77.13 "Special Buildings"** means
- (i) multi-storied buildings for any user having height more than 24 meter in height measured from ground; or,
 - (ii) buildings for the purposes of educational, assembly, mercantile, institutional, public and semi-public, industrial, storage and for hazardous material, buildings having built-up area more than 500 sq. m on each any floor, irrespective of the height of the building; or,
 - (iii) multi-storied buildings for any user having mixed occupancies, with any of the aforesaid occupancies mentioned in (ii) above, having built-up area more than 500 sq. m on each floor;
- 2.78 "Owner"** means a person who has legal title for land or building;
- 2.79 "Parapet"** means a low wall or railing built along the edge of a roof, terraces, balcony, veranda etc.;
- 2.80 "Parking Space"** means an enclosed or unenclosed, covered or open area sufficient in size to park vehicles. Parking space shall be served by a driveway connecting them with a street or alley and permitting ingress or egress of vehicles;

- 2.81 **“Permit / Permission”** means a permission or authorisation in writing by the Authority to carry out the work regulated by these Regulations;
- 2.82 **“Plinth”** means a portion of a structure between the surface of the surrounding ground and surface of the floor immediately above the ground;
- 2.83 **“Plot / Site”** means a parcel or piece of land enclosed by definite boundaries;
- 2.84 **“Porch”** means a covered surface supported on pillars or otherwise for the purpose of pedestrian or vehicular approach to a building;
- 2.85 **“Podium”** means a continuous projecting base or pedestal around a building, generally used for parking and movement of vehicles, as specified in these regulations;
- 2.86 **“Recreational Open Space / Layout open space”** means a statutory common open space kept in any layout or group housing scheme or campus planning, exclusive of margins and approaches, on ground only;
- 2.87 **“Record Plan”** means a Plan to be prepared and submitted to the authority on basis of which a final occupancy certificate is issued.;
- 2.88 **“Restaurant”** means a premises used for serving food items on commercial basis including cooking facilities and seating arrangements in residential building. And for commercial premises restaurant may be allowed of any built up area situated on any floor with a separate parking and garbage disposal facility.
- 2.89 **“Road / Street”** means any highway, street, lane, pathway, alley, stairway, passageway, carriageway, footway, square place or bridge, whether a thoroughfare or not, over which the public have a right of passage or access or have passed and had access uninterruptedly for a specified period, whether existing or proposed in any scheme, and includes all bunds, channels, ditches, storm-water drains, culverts, sidewalks, traffic islands, roadside trees and hedges, retaining walls, fences, barriers and railings within the street lines;
- 2.90 **“Road / Street Line”** means the line defining the side limit of a road / street;
- 2.91 **“Road/Street Level or Grade”** means The officially established elevation or grade of the centre line of the street upon which a plot fronts and if there is no officially established grade, the existing grade of the street at its mid – points.
- 2.92 **“Room Height”** means the vertical distance measured from the finished floor surface to the finished ceiling/ slab surface. In case of pitched roofs, the room height shall be the average height between bottom of the eaves and bottom of ridge;
- 2.93 **“Row Housing”** means a row of houses with front and rear marginal distances;
- 2.94 **“Semi Detached Building”** means a building detached on three sides with marginal distances as specified;
- 2.95 **“Service Apartment”** means a premise in which rooms are let out on short/long term basis.;
- 2.96 **“Service Floor”** means a non-habitable floor generally provided in multi-storied buildings and especially in starred hotels where from services like water supply, sewerage disposal system, electricity etc. are co-ordinated/maintained. Height of such floor shall not be more than 1.8m. from floor level to soffit of outer beam and shall not be counted in FSI.

- 2.97 **"Site, corner"** means a site at the junction of and fronting on two or more intersecting streets;
- 2.98 **"Site, Depth of"** means the mean horizontal distance between the front and rear side boundaries;
- 2.99 **"Site, Double Frontage"** means a site, having a frontage on two streets other than a corner plot;
- 2.100 **"Site, Interior or Tandem"** means a site, access to which is by a passage from a street whether such passage forms part of the site or not;
- 2.101 **"Smoke Stop Door"** means a door for preventing or checking the spread of smoke from one area to another;
- 2.102 **"Stair Cover"** means a structure with a covering roof over a stair case and its landing built to enclose only the stair for the purpose of providing protection from weather and not used for human habitation;
- 2.103 **"Stilts or Stilt Floors"** means the portion of a building above ground level consisting of structural column supporting the super structure with at least two sides open and without any enclosures for the purpose of parking vehicles, scooters, cycles, etc.;
- 2.104 **"Store Room"** means a room used as storage space;
- 2.105 **"Storey"** means the portion of a building included between the surface of any floor and the surface of the floor next above it, or if there be no floor above it, then the space between any floor and the ceiling next above it;
- 2.106 **"Supported Double Height Terrace"** means open terraces with railing having minimum height equal to two floors within building line.
- 2.107 **"Telecommunication Cell Site/Base Station (TCS/BS)"** means tower of requisite height and dimensions, delta, single pole antennae, microwave antenna, cabin of requisite dimensions for housing equipment, telecom transceiver machinery, related civil work, requisite wires and cables, power supply equipment, Diesel Generator (DG) Set/ Alternate power supply mechanism, cabin /cupboard for housing any or all of the aforesaid items as necessary;
- 2.108 **"Tenement"** means an independent dwelling unit with a kitchen or cooking alcove;
- 2.109 **"Terrace"** means a flat, open to sky roof of a building or a part of a building having parapet;
- 2.110 **"To Erect"** - To erect a building means
- (a) to erect a new building on any site whether previously built upon or not;
 - (b) to re-erect any building of which portions above the plinth level have been pulled down, burnt or destroyed; and
 - (c) conversion from one occupancy to another;
- 2.111 **"Travel Distance"** means the distance from the remotest point on a floor of a building to a place of safety, be it a vertical exit, horizontal exit or an outside exit measured along the line of travel;
- 2.112 **"Tower like structure"** means a structure in which the height of the tower like portion is at least twice the width of the broader base;
- 2.113 **"Unsafe Building"** means those buildings which are structurally unsafe, unsanitary or not provided with adequate means of ingress or egress which constitute a fire hazard or are

otherwise dangerous to human life or which in relation to existing use constitute a hazard to safety or health or public welfare, by reason of inadequate maintenance, dilapidation or abandonment;

- 2.114** "Veranda" means a covered area with at least one side open to the outside with the exception of 1 m. high parapet on the ground floor to be provided on the open side;
- 2.115** "Water Closet (WC)" means a privy with arrangement for flushing the pan with water. It does not include a bathroom;
- 2.116** "Water Course" means a natural channel or an artificial one formed by draining or diversion of a natural channel meant for carrying storm water and waste water;
- "Major Water Course" means a water course which carried strong water discharging from a contributing area of not less than 160 Ha.;
- "Minor Water Course" means a water course which is not major;
- 2.117** "Width of Road" means the whole extent of space within the boundaries of road when applied to a new road, as laid down in the city surveys map or development plan or prescribed road lines by any Act or Law and measured at right angles to the course or intended course of direction of such road whichever is more;
- 2.118** "Window" means an opening to the outside other than the door which provides all or part of the required natural light, ventilation or both, to the interior space;

3.0 APPLICABILITY OF REGULATIONS

- 3.1** These regulations shall apply to all development, redevelopment, erection and/or re-erection of a building, change of user etc. as well as to the design, construction or reconstruction of, and additions and alteration to a building. These regulations shall also apply to any revision of the development permissions/building permissions granted earlier under any Development Control Regulations. Further, these Regulations shall apply to development work defined in Regulation No.3.2 to 3.5. However, features approved by earlier permission shall remain intact unless it contradicts the provisions of FSI under these regulations.
- 3.2 Construction/ Part Construction** - Where the whole or part of a building is demolished or altered or reconstructed, removed, except where otherwise specifically stipulated, or part is proposed to be newly constructed or revised, these Regulations apply only to the extent of the work involved.
- 3.3 Change of Occupancy / User:** -Where the occupancy or the user of a building is changed, except where otherwise specifically stipulated, these Regulations shall apply to all parts of the building affected by the change.
- 3.4 Reconstruction** - The reconstruction, in whole or part of a building which has ceased to exist due to an accidental fire, natural collapse or demolition, having been declared unsafe, or which is likely to be demolished by or under an order of the Municipal Corporation and for which the necessary certificate has been given by the said Municipal Corporation, shall be allowed subject to the provisions in these Regulations.
- 3.5 Revised permission** - Any development permission granted earlier may be revised. While granting the revised permission, the approved plans and commencement certificate of the earlier permission with the owner and office, shall be stamped as 'CANCELLED' by the Authority.

- 3.6 Development of sites or land sub-division or amalgamation of land** –Where land is to be developed, sub-divided or two or more plot are to be amalgamated or a layout is to be prepared , these Regulations shall apply to the entire area under development, sub-division, amalgamation and layout.

Provided that, where a part of an existing layout is being altered, these regulations shall apply only to that part which is being altered, without adversely affecting the requirement of layout roads, recreational open space, etc of earlier sanctioned layout.

4.0 INTERPRETATION

Section of general clauses Act, 1897 shall be applicable in case of standard terms and phrases as defined and interpreted therein.

- 4.1** In these Regulations, the use of present tense includes the future tense, the masculine gender includes the feminine and the neutral, the singular number includes the plural and the plural includes the singular. The word "person" includes a corporation/company, "writing" includes "printing and typing" and "signature" includes thumb impression made by a person who cannot write if his name is written near such thumb impression or digital signature in case of 'e' submissions.
- 4.2** Whenever sizes and dimensions of rooms and spaces within buildings are specified, they shall mean clear dimensions unless otherwise specified in these Regulations. However, sizes and dimensions may not be disputed with reference to finished/unfinished surfaces unless it differs overall dimensions of the building.

5.0 DEVELOPMENT PERMISSION AND COMMENCEMENT CERTIFICATE

- 5.1** No person shall carry out any development, in contravention of the Development Plan proposals.
- 5.2** No person shall carry out any development work including development of land by laying out into suitable plots or amalgamation of plots or development of any land as group housing scheme or to erect, re-erect or make alterations or demolish any building or cause the same to be done without first obtaining a separate building permit / commencement certificate for each such development work / building from the Municipal Commissioner.
- 5.3** No temporary construction shall be carried out without obtaining prior approval of the Municipal Commissioner, which may be granted subject to such conditions as may be deemed necessary by him. However, temporary site office/watchman cabin/labour- material shed/toilet may be constructed without permission after the development permission is granted. These temporary constructions shall be removed after the completion of construction under development permission.

5.4 Development undertaken on behalf of Government -

As per the provisions of Section 58 of The Maharashtra Regional and Town Planning Act, 1966, the office in-charge of the Government Department shall inform in writing to the Municipal Commissioner of the intention to carry out its purpose along with details of such development or construction as specified below :-

An official letter by the authorised officer of Government Department addressed to the Municipal Commissioner, giving full particulars of the development work or any operational construction.

- ii) Ownership documents and measurement plan issued by the Competent Authority of Land Records Department.
- iii) Development / building plans conforming to the provisions of Development Plan and these Regulations for the proposed development work to the scale specified in these Regulations.
- iv) The proposals of the Development Plan or Town Planning Scheme affecting the land.
- v) A Site Plan of the area proposed to be developed to the scale.
- vi) Detailed plan showing the plan, sections and elevations of the proposed development work to the scale, including existing building specified either to be retained or to be demolished.

5.4.1 The operational construction of the Government or Government undertaking, whether temporary or permanent which is necessary for the operation, maintenance, development or execution of any of the following services shall be exempted from the provisions of these Regulations:-

- i) Railways;
- ii) National Highways;
- iii) National Waterways;
- iv) Airways and Aerodromes;
- v) Posts and Telegraphs, telephones, wireless, broadcasting and other like forms of communication, excluding mobile towers;
- vi) Regional grid for electricity;
- vii) Defence Authorities;
- viii) Any other essential public service as may be notified by the State Government.

All such constructions shall however, conform to the prescribed requirements for the provision of essential services, water supply connection, drains, etc.

5.4.2 However the following constructions of the Government Departments do not come under the purview of operational construction for the purpose of exemption under Regulation no.5.4.1.

- i) New residential building (other than gate lodges, quarters for limited essential operational staff and the like), roads and drains in railway colonies, hospitals, clubs, institutes and schools in case of Railways and commercial development;
- ii) New building, new construction or new installation or any extension thereof, in case of any other services.

5.4.3 However, no permission shall be necessary for the following types of works:-

- i) The carrying out of any works by the Central or State Government or any public sector undertaking or any local authority-
 - (a) required for the maintenance or improvement of highway, road or public street, being works carried out on land within the boundaries of such highway, road or public street; or
 - (b) required for the purpose of inspecting, repairing or renewing any drains, sewers mains, pipes including gas pipes, telephone and electric cables, or other apparatus including the breaking open of any street, or other land for the purpose.

Provided that the concerned authority shall inform the local authority, in writing at the earliest and pay the necessary restoration charges to the Corporation within a month. The restoration charges shall not be more than the expenditure incurred by the Corporation to restore the road etc and supervision charges, if any.

- ii) The carrying out of works in compliance with any order or direction made by any Authority under any law for time being in force
- iii) The carrying out of works by any Authority in exercise of its powers under any law for time being in force.
- iv) The excavation (including excavation of wells) made in the ordinary course of agricultural operation.
- v) The construction of a road intended to give access to land solely for agricultural purpose.
- vi) Normal use of land which has been used temporarily for other purposes like marriage pandals or for festive occasions; and
- vii) In case of land normally used for one purpose and occasionally used for any other purpose, such occasional use of land for that other purpose.

6.0 PROCEDURE FOR OBTAINING DEVELOPMENT PERMISSION /BUILDING PERMISSION (COMMENCEMENT CERTIFICATE)

6.1 Notice/ Application - Every person who intends to carry out development and erect, re-erect or make alterations in any place in a building or demolish any building, shall give notice/ application in writing through registered Architect or Licensed Engineer / Structural Engineer / Supervisor, to the Authority of his said intention in the prescribed form (See Appendix A1 or A2)It will be mandatory to submit complete information in the form accompanied with Appendix A-1 and A-2.Such notice shall be accompanied by the payment receipt of required scrutiny fee and any other fee/ charges prescribed by the Municipal Commissioner from time to time and the plans and statements in sufficient copies (See Regulation no. 6.1.1), and as per the requirement under Regulation no.6.2 and 6.3. One set of plans shall be retained in the office of the Municipal Commissioner for record after the issue of permission or refusal. The plans may be submitted in electronic form as may be specified by the Municipal Commissioner from time to time.

6.1.1 Copies of Plans and Statements - Four copies of plans and statements shall be made available along with the notice. Where clearance is required from other agencies, number of copies of plans required shall be as decided by the Municipal Commissioner.

6.2 Information Accompanying Notice/Application - The Notice/Application shall be accompanied with the key (location plan), site plan, sub-division layout plan/ building plan, services plans, specifications and certificate of supervision and ownership title etc., as prescribed in Regulation no.6.2.1 to 6.2.13.

6.2.1 Size of drawing sheets and colouring of plans.

6.2.1.1 The size of drawing sheets shall be of A0 to A4. If necessary, submission of plans on sheets bigger than A0 size shall also be permissible. Prints of plans shall be on one side of paper only. All dimensions shall be indicated in metric units.

6.2.1.2 Colouring Notations for Plans: - The Plans shall be coloured as specified in following Table.

Table No.1
COLOURING OF PLANS

Sr. No.	Item	Site Plan		Building Plan	
		White Plan	Ammonia Print	White Plan	Ammonia Print
(1)	(2)	(3)	(4)	(5)	(6)
1.	Plot lines	Thick Black	Thick Black	Thick Black	Thick Black
2.	Existing Street	Black	Blue
3.	Future street if any	Black dotted	Blue dotted
4.	Permissible Building lines	Thick dotted black	Thick dotted blue
5.	Existing work	Black (outline)	Blue	Black	Blue
6.	Work proposed to be demolished	Yellow hatched	Yellow hatched	Yellow hatched	Yellow hatched
7.	Proposed work	Red filled in	Red	Red	Red
8.	Drainage & sewerage work	Red dotted	Red dotted	Red dotted	Red dotted
9.	Water supply work	Black dotted thin	Black dotted thin	Black dotted thin	Black dotted thin
10.	Deviations from the sanctioned plan	Red hatched	Red hatched	Red hatched	Red hatched
Note:-	For land development/sub-division/layout/building plan, suitable colouring notations shall be used which shall be indexed.				

6.2.2 Ownership title and area - Every application for development permission and commencement certificate shall be accompanied by the following documents for verifying the ownership and area etc. of the land:-

- Latest Property card(s) or 7/12 extract(s) of a date not more than one month prior to the date of submission, power of attorney, wherever applicable.
- Measurement Plan of the property issued by Land Record Department.
- Statement of area of the holding by triangulation method /CAD (computer added designs and drafting based software) from the qualified licensed technical personnel or architect with an affidavit from the owner with regard to the area in the form prescribed by the Municipal Commissioner.
- Any other document prescribed by the Municipal Commissioner.
- Wherever third party interest is created by way of agreement to sale or mortgage etc. the registered consent of such interested persons shall be submitted with the application.

- f) A certified copy of approved sub-division / amalgamation / layout of land from the concerned authority.
- g) In the case of land leased by the Government or local authorities, no objection certificate of Government or such authorities shall be obtained if there is deviation from lease conditions and shall be attached to the application for development permission in respect of such land.

6.2.3 Key Plan or Location Plan - A key plan drawn to a scale of not less than 1:10,000 shall be submitted as a part of building plan / development proposal along with the application for a building permit and commencement certificate; showing the boundary and location of the site with respect to neighbourhood landmarks or with respect to the area within the radius of 200 m. from the site, whichever is more.

6.2.4 Site Plan - The site plan shall be submitted with an application for building permission drawn to a scale of 1:500 or more as may be decided by the Municipal Commissioner. This plan shall be based on the measurement plan duly authenticated by the appropriate officer of the Department of Land Records. This plan shall have the following details:-

- a) The boundaries of the site and of any contiguous land belonging to the neighbouring owners;
- b) The position of the site in relation to neighbouring streets ;
- c) The name of the street, if any, from which the building is proposed to derive access;
- d) All existing buildings contained in the site with their names (where the buildings are given names) and their property numbers;
- e) The position of the building and of other buildings, if any, which the applicant intends to erect, upon his contiguous land referred to in (a) above in relation to;
 - (i) The boundaries of the site and, in a case where the site has been partitioned, the boundaries of the portions owned by others;
 - (ii) All adjacent streets, buildings (with number of storeys and height) and premises within a distance of 12 m. of the work site and of the contiguous land (if any) referred to in (a)
- f) The means of access from the street to the building and to all other buildings (if any) which the applicant intends to erect upon.
- g) The space to be left around the building to secure free circulation of air, admission of light and access;
- h) The width of the street (if any) in front and the street (if any) at the side of or near the building, including the proposed roads;
- i) The direction of the north line relative to the plan of the building;
- j) Any existing physical features, such as wells, tanks, drains, pipe lines, high tension line, railway line, trees, etc.;
- k) The ground area of the whole property and the break-up of the built-up area on each floor;
 - A plan indicating parking spaces as required and provided under these regulations;
- m) Overhead electric supply lines, if any, including space for electrical transformer / sub-station according to these regulations or as per the requirements of the electric

distribution company.

- n) Any water course existing on Site or adjacent to site;
- o) Existing alignments of water supply and drainage line;
- p) Such other particulars as may be prescribed by the Municipal Commissioner.

6.2.5 (i) Sub-Division/ Layout Plan— In the case of development of land, the notice shall be accompanied by the sub-division/ layout plan which shall be drawn to a scale of not less than 1:500, however, for layout having areas of 4.0 ha. and above, the plan shall be drawn to a scale of not less than 1:1000, containing the following:

- (a) Scale used and north point;
- (b) The location of all proposed and existing roads with their existing /proposed widths within the land;
- (c) Dimension of plots;
- (d) The location of drains, sewers, public facilities and services, electrical lines, natural water courses, water bodies and streams etc.
- (e) Table indicating size, area and use of all plots in the sub-division/ layout plan;
- (f) The statement indicating the total area of the site, area utilized under roads, recreational open spaces, amenity spaces, playground, recreation spaces and development plan reservations/ roads, schools, shopping and other public places along with their percentage with reference to the total area of the site proposed to be sub-divided / laid out;
- (g) In case of plots which are sub-divided in built-up areas, in addition to the above, the means of access to the sub-division from existing streets;
- (h) Contour plan of site, wherever necessary.

(ii) Amalgamation Plan:-Where two or more plots / holdings are to be amalgamated, plan showing such amalgamation drawn to a scale not less than 1:500. Instead of submitting a separate plan, such amalgamation may be allowed to be shown on building / layout-plan itself. However, 7/12 extract or property card of amalgamated plot shall be submitted before occupation certificate.

6.2.6 Building Plan - The plans of the buildings with elevations and sections accompanying the notice shall be drawn to a scale of 1:100 or to a scale as may be directed by the Municipal Commissioner and shall

- a) include floor plans of all floors together with the built-up area, clearly indicating the sizes of rooms and the position and width of staircases, ramps and other exit ways, lift-wells, lift machine rooms and lift pit details. It shall also include ground floor plan as well as basement plans and shall indicate the details of parking spaces, loading and unloading spaces provided around and within building as also the access ways and the appurtenant open spaces with projections in dotted lines, distance from any building existing on the plot in figured dimensions along with accessory building;
- b) show the statement of built-up area and Carpet area of every flat or shop or any unit along with proportionate common built-up area attached to it and area of balcony and double height terraces, if any attached to the said unit;
- c) show the use or occupancy of all parts of the building;
- d) show exact location of essential services e.g. wc, sink, bath and the like;

- e) include sectional drawings of the building showing all sectional details including staircase;
- f) show all street elevations;
- g) give dimensions of the projected portions beyond the permissible building line;
- h) include terrace plan indicating the drainage and the slopes of the roof;
- i) give indications of the north point relative to the plans; and
- j) give dimensions and details of doors, windows and ventilators.
- k) give such other particulars as may be required to explain the proposal.

6.2.6.1 Building Plans for Special Buildings :-

The following additional information shall be furnished/indicated in the Building Plans of Special Building as mention in regulation no 2.77.13 in addition to the items (a) to (k) of Regulation no. 6.2.6.:-

- (a) access to fire appliances/vehicles with details of vehicular turning circle and clear motorable access way around the building of minimum 6 m. width;
- (b) size (width) of main and alternate staircases, wherever necessary, along with balcony approach, corridor, ventilated lobby approach;
- (c) location and details of lift enclosures;
- (d) location and size of fire lift;
- (e) smoke stop lobby/door, where provided;
- (f) refuse chutes, refuse chamber, service duct, etc.;
- (g) vehicular parking spaces;
- (h) refuge area, if any;
- (i) details of Building Services :-Air-conditioning system with position of fire dampers, mechanical ventilation system, electrical services, boilers, gas pipes etc.,
- (j) details of exits including provision of ramps, etc. for hospitals and buildings requiring special fire protection measures,
- (k) location of generator, transformer and switch gear room;
- (l) smoke exhauster system, if any;
- (m) details of fire alarm system network;
- (n) location of centralized control, connecting all fire alarm systems, built in fire protection arrangements and public address system etc.
- (o) location and dimensions of static water storage tank and pump room along with fire service inlets for mobile pump and water storage tank;
- (p) location and details of fixed fire protection installations such as sprinklers, wet risers, hose reels, drenchers, CO₂ installation etc.;
- (q) location and details of first aid, fire fighting equipment's / installations.
- (r) certificate of structural engineer about structural and earth-quake safety;

Provided that, the provision of fire escape stair case shall be made as per Regulation No.18.27.4

- 6.2.7 Service Plan** - Plans, elevations and sections of water supply, grey water supply, sewage disposal system and details of building services, where required by the Municipal Commissioner, shall be made available on a scale not less than 1:100 in general and 1:1000 for layouts.
- 6.2.8 Supervision** - The notice shall be further accompanied by a certificate of supervision in the prescribed form given in Appendix B, by a licensed Architect/ Engineer/ Structural Engineer, as the case may be. In the event of the said licensed technical personnel ceasing to be employed for the development work, further development work shall stand suspended till a new licensed technical person is appointed.
- 6.2.9 Building/ Layout Permission Fee**- The notice shall be accompanied by receipt of Building/ Layout Permission Fee. The building permission fee or layout /subdivision of land fees shall be as decided by the Municipal Commissioner from time to time. Provided that, such fees shall not be applicable for the development proposals implemented by Government / Government departments or Public Authorities of State or Central Government.
- 6.2.10 Development Charges**- Development charges as required under Section 124A of the Act shall be deposited with the Planning Authority before issue of development permission/ commencement certificate. In case of revised permission where no development is carried out in pursuance of the earlier permission, amount of difference of development charges, if any, shall be levied and recovered. In case of revised permission, where development is commenced in pursuance of earlier permission, development charges shall be levied on the land and built-up area, over and above the area covered in the earlier permission.
- 6.2.11 Premium charges** - Premium charges as may be required to be recovered under these regulations shall be paid to the Planning Authority before issue of development permission/ commencement certificate. The amount of premium collected shall be kept in a separate development fund called as 'Pune Infrastructure fund' and shall be utilized for the purpose of developing new/ up-gradation of infrastructure as well as implementation of Development Plan proposals and creation of civic amenities.
- 6.2.12 Tax clearance** - The Municipal Corporation shall verify whether payment of Tax is up to date.
- 6.2.13** The notice/application shall be further accompanied by a certificate of supervision in the prescribed form as given in Appendix B, by a licensed Architect or Licensed Engineer / Structural Engineer / as the case may be. In the event of the said licensed technical personnel ceasing to be employed for the development work, further development work shall stand suspended till a new licensed technical person is appointed
- 6.3 Signing the Plan** -
All the plans shall be duly signed by the owner, co-owner, if any, and the Architect or Licensed Engineer / Structural Engineer / Supervisor and shall indicate his name, address and license number allotted by the Authority.
- 6.4 Qualification and Competence of the Architect / Licensed Engineer / Structural Engineer/ Supervisor** -
Architect/ Engineer/Structural Engineer/ Supervisor referred to in regulation no 6.3 shall be registered / licensed by the Municipal Commissioner as competent to plan and carry out various works as given in Appendix "C". The qualification and procedure for registration and licensing of the Engineer / Structural Engineer / Supervisor / Developer shall be as given in

Appendix- "C". Architects registered with council of Architecture shall not be required to register with the Authority.

6.5 Discretionary Powers:-

6.5.1 Interpretation.

In conformity with the intent and spirit of these regulations, the Municipal Commissioner may by order in writing -;

- (i) decide on matters where it is alleged that there is an error in any order, requirement decision, and determination on interpretation made by him or officer authorised by him in the application of these regulations.
- (ii) decide the extent of the proposal of development plan with respect to survey number, where boundaries of the survey number shown on development plan varies with the boundaries as per revenue record/ measurement plan/ city survey sheets.
- (iii) determine and establish the location of zonal boundaries in exceptional cases, or in cases of doubt or controversy;
- (iv) decide the alignment of development plan road, where the street layout actually on the ground varies from the street layout as shown on the Development Plan;
- (v) decide the alignment of blue and red flood line on development plan where it varies with the said lines given by the irrigation department or any other Government institutions dealing with the subject, from time to time;
- (vi) authorise erection of a building or use of premises for a public service undertaking for public utility purposes only, where he finds such authorisation to be reasonably necessary for the public convenience and welfare, even if it is not permitted in any Land Use Classification,
- (vii) modify the limit of a zone where the boundary line of the zone divide the plot. In such cases, the zone over the larger portion of the plot having area more 50% shall be considered.

6.5.2 Relaxation.

In specific cases, where a clearly demonstrable hardship is caused, the Municipal Commissioner by order in writing and subject to payment of premium; if any, may permit any of the dimensions / provision prescribed by these regulations to be modified provided the relaxation sought does not violate the health safety, fire safety, structural safety and public safety of the inhabitants of the buildings and the neighbourhood. However, no relaxation for the setback required from the road boundary (front marginal distance), F.S.I. or minimum required parking shall be granted under any circumstances, unless otherwise specified in these regulations.

While granting such relaxation, conditions may be imposed on size, cost or duration of the structure, abrogation of claim of compensation, payment of deposit and its forfeiture for noncompliance.

6.5.3 Temporary Constructions -The Municipal Commissioner may grant permission for temporary construction for a period not exceeding six months at a time and in the aggregate not exceeding for a period of one year, such a permission may be given by him for the construction of the following, viz.:-

- (i) Structures for protection from the rain or covering of the terraces during the monsoon only.
- (ii) Pandals for fairs, ceremonies, religious function, etc.
- (iii) Structures for godowns/storage of construction materials within the site.
- (iv) Temporary site offices and watchman chowkies within the site only during the phase of construction of the main building.
- (v) Structures of exhibitions/ circuses etc.
- (vi) Structures for storage of machinery, before installation for factories in industrial lands within the site.
- (vii) Structures for ancillary works for quarrying operations in conforming zones.
- (viii) Government milk booths , telephone booths and ATM Centers.
- (ix) Transit accommodation for persons to be rehabilitated in a new construction.
- (x) Structures for educational and medical facilities within the site of the proposed building during the phase of planning and constructing the said permanent buildings.
- (xi) Ready mix concrete plant.

Provided that, temporary constructions for structures etc. mentioned at (iii), (iv), (vi), (ix) (x) and (xi) may be permitted to be continued temporarily by the Municipal Commissioner, but in any case not beyond completion of construction of the main structure or building and that structure in (vii) and (viii) may be continued on annual renewal basis by the Municipal Commissioner beyond a period of one year.

6.5.4 Delegation of Powers- Except the discretionary powers, and where the Municipal Commissioner's special permission is expressly stipulated, the powers or functions vested in him by these Regulations may be delegated to any official under his control, subject to his revision if necessary and to such conditions and limitations, if any, as he may prescribe.

6.5.5 Drafting error –Draftsman errors which are required to be corrected as per actual situation on site or as per the city survey record or sanctioned layout etc. may be corrected by the Municipal Commissioner, after consultation with the Director of Town Planning, Maharashtra State, Pune.

6.6 Grant or Refusal of permission

6.6.1 After receipt of the notice/ application as mentioned in Regulation No. 6.1 above, the Authority may either sanction or refuse the plans or may sanction them with such modifications or directions as it may deem necessary after having recovered the necessary charges and there upon shall communicate its decision to the person giving the notice in the prescribed form given in Appendix D1/D2/D3 and E1/E2 as the case may be. Such approval shall also be deemed to have been granted under relevant provisions of the Maharashtra Municipal Corporation Act.

6.6.2 (i) In case of special buildings, the building scheme shall also be subject to the norms of Maharashtra Fire Prevention and Life safety Act, 2006 and shall also be subject to the scrutiny of the Chief Fire Officer, of the Municipal Corporation and the sanction / development permission shall be issued by the Municipal Commissioner after the clearance from the Chief Fire Officer of the Municipal Corporation.

- (ii) In case of land subdivision or plotted layout, tentative layout shall be recommended for demarcation at first instance. After having demarcated the layout by the Land Records Department, the owner shall submit the demarcated layout for final approval to the Authority and the Authority shall examine the provision laid down in Regulation no.6.8 and grant final approval if it is in accordance with the layout recommended for demarcation and confirming to the regulations. This shall also be mandatory to Group Housing Scheme where roads in the adjoining layouts/ Development Plan roads are to be coordinated and/or amenity space is to be earmarked.

6.6.3 If within sixty (60) days of receipt of the notice, the Authority fails to intimate in writing to the person who has given the notice, of its refusal or sanction or sanction with such modifications or directions, the notice with its plans and statements shall be deemed to have been sanctioned.

Provided, nothing shall be construed to authorise any person to do anything on the site of the work in contravention or against the terms of lease or titles of the land.

Provided further that, the development proposal, for which the permission was applied for, is strictly in conformity with the requirements of provisions of these regulations, or regulations framed in this behalf under any law for the time being in force and the same in no way violates either provisions of any draft or final plan or proposals published by means of notice, submitted for sanction under the Act.

Provided further that, any development carried out in pursuance of such deemed permission which is in contravention of the provisions mentioned above, shall be deemed to be an unauthorised development for purposes of Sections 52 to 57 of the Maharashtra Regional and Town Planning Act, 1966 and other relevant Acts.

Provided further that, upon receipt of intimation of any claim for deemed permission, the Authority shall within fifteen days from the date of receipt of such claim, communicate its remarks, if any, regarding deemed permission to the applicant, failing which, the proposal shall be approved and commencement certificate and one set of duly approved plans for proposed development shall be issued to the applicant within fifteen days thereafter.

Provided further that, necessary explanation shall be called from the concerned officer of the Authority for not processing and disposing of the proposal within 60 days.

6.6.4 After the plan has been scrutinised and objections have been pointed out, the owner giving notice shall modify the plan, comply with the objections raised and resubmit it. The prints of plans submitted for final approval, shall not contain superimposed corrections. The authority shall grant or refuse the commencement certificate / building permit within 60 days from the date of resubmission. No new objections shall be raised when they are resubmitted after compliance of earlier objections, except in circumstances to be quoted for additional compliances.

6.7 Commencement of work

The commencement certificate/development permission shall remain valid for 4 years in the aggregate but shall have to be renewed every year from the date of its issue. The application for renewal shall be made before expiry of one year if the work is not already commenced. Such renewal can be done for three consecutive terms of one year after which proposals shall have to be submitted to obtain development permission afresh. If application for renewal is made after expiry of the stipulated period during which commencement certificate is valid, then the Authority may condone the delay for submission of application for renewal by

charging necessary fees; but in any case, commencement certificate shall not be renewed beyond 4 years from the date of commencement certificate/ development permission.

Provided that, no such renewal shall be necessary if the work is commenced within the period of valid permission and such permission shall remain valid till the work is completed.

For the purpose of this regulation, "Commencement" shall mean as under:-

(a)	For layout, sub-division and amalgamation	Final demarcation and provision of water bound macadam roads complete.
(b)	For a building work including additions and alterations.	Construction of basement upto ground level slab or construction of building at plinth level whichever is minimum.
(c)	For bridges and overhead tanks construction.	Foundation and work up to the base floor.
(d)	For underground works	Foundation and work upto floor of underground floor.

- 6.8 In case of land subdivision / group housing schemes, it shall be the responsibility of the owner / developer to construct all infrastructure including roads with asphaltting, storm water drains, sewer lines, water supply lines, development of recreational open spaces etc. In case of land subdivision, these works shall generally be completed within two years and phase wise building permission shall be granted depending upon the percentage of infrastructure work completed. The layout plots should be released for construction in stages according to infrastructure work completed. The condition to that effect shall be incorporated in the commencement certificate. In case of group housing scheme, these works shall be completed before completion of the project and occupancy certificate shall be granted phase wise as per completion of infrastructure work.

After handing over roads and infrastructure to the corporation on completion of scheme, the responsibility of maintenance of such road and infrastructure shall lie with the corporation.

7.0 PROCEDURE DURING CONSTRUCTION

- 7.1 **Owner / Architect / Developer / Engineer / Structural Engineer / Supervisor or any licensed Technical persons' liability:** - Neither the grant of permission nor approval of the drawing nor inspection by the Authority during erection of the building, shall in any way relieve the Owner / Architect / Developer / Engineer / Structural Engineer / Supervisor or any licensed Technical persons of such building / development, from full responsibility for carrying out the work in accordance with these Regulations and safety norms as prescribed by the Bureau of Indian Standards.

7.2 Documents at site –

- (i) **Development Permission:** The person to whom a development permission is issued shall during construction, keep -
- posted at a conspicuous place on the site for which permission has been issued, a copy of a development permission; and
 - a copy of the approved drawings on the site for which the permission was granted.
- (ii) **Display board:** Display board mentioning name of the owner, name of architect, name of structural engineer, except for small individual plot holders.

- 7.3.1 Plinth Checking-** the owner shall give notice in prescribed form given in Appendix-F to the Authority after the completion of work upto plinth level with a view to enable the Authority to ensure that the work is carried out in accordance with the sanctioned plans. The Authority shall carry out inspection jointly with Architect / liasoning technical person within 7 days from the receipt of such notice and decide the application. If it is sanctioned then, the Authority shall grant such certificate as prescribed in Appendix-G.

Provided that, if the Authority has not taken decision on such application within a period as stipulated above, the permission shall be deemed to have been granted. In such circumstances, the applicant shall get the plinth checked from the registered Technical Personnel along with correctness certificate and submit it to the Authority for record. Thereafter no separate permission shall be required from the Authority for continuing of work. Such certificate shall clearly indicate the correctness of execution of plinth on site in consonance with the sanctioned plan.

- 7.3.2 Deviation during constructions-**If during construction of a building any departure of a substantial nature from the sanctioned plans is intended by way of internal or external additions, sanction of the Authority shall be necessary. A revised plan showing the deviation shall be submitted and the procedure laid down for the original plans shall apply to all such amended plans. Any work done in contravention of the sanctioned plans, except any changes made within the internal layout of a residential or commercial unit which do not violate FSI or other regulations, without prior approval of the Municipal Commissioner shall be deemed as un-authorized. However, any changes made within the internal layout of a residential or commercial unit, which do not violate FSI or other regulations, shall not be treated as unauthorised. Such changes shall be incorporated in plan along with completion certificate.

- 7.4 Completion Certificate -** The owner through his licensed surveyor / engineer / structural engineer / supervisor or his architect, as the case may be, who has supervised the construction, shall furnish a building completion certificate to the Authority in the form in Appendix 'H'. This certificate shall be accompanied by three sets of plans of the completed development, the certificate about the operation of the lift from consultant and certificate of structural stability / compliance issued by R.C.C. consultant, wherever necessary.

In case of special buildings, the completion certificate shall also be accompanied with the NOC along with completion plans from Chief Fire Officer of Pune Municipal Corporation.

- 7.5 Occupancy certificate -** The Municipal Commissioner after inspection of the work and after satisfying himself that there is no deviation from the sanctioned plans, issue an occupancy certificate in the form in Appendix- I or refuse to sanction the occupancy certificate in Appendix -J within 21 days from the date of receipt of the said completion certificate, failing which the work shall be deemed to have been approved for occupation, provided the construction conforms to the sanctioned plans. One set of plans, certified by the Municipal Commissioner, shall be returned to the owner along with the occupancy certificate. Where the occupancy certificate is refused or rejected, the reasons for refusal or rejection shall be given in intimation of the rejection or the refusal.

The applicant may request for deemed occupancy certificate if eligible as above. Municipal Commissioner shall issue the deemed occupancy certificate within 15 days of the application.

Part occupancy certificate:- When requested by the holder of the development permission, the Authority may issue a part occupancy certificate for a building or part thereof, before completion of the entire work, as per development permission, provided sufficient

precautionary measures are taken by the holder to ensure public safety and health. The occupancy certificate shall be subject to the owners indemnifying the Authority in the form in Appendix 'K'.

8.0 INSPECTION

The Authority shall have the power to carry out inspection of the work under the provisions of the Act, at various stages to ascertain whether the work is proceeding as per the provisions of regulations and sanctioned plan.

9.0 UNSAFE BUILDINGS

All unsafe buildings shall be considered to constitute danger to public safety and hygiene and sanitation and shall be restored by repairs or demolished or dealt with as otherwise directed by the Municipal Commissioner. The redevelopment of such buildings shall be as per the provisions stipulated in these regulations.

10.0 OFFENCES AND PENALTIES

10.1 Offences and penalties:- Any person who contravenes any of the provisions of these regulations / any requirements or obligations imposed on him by virtue of these regulations including the maintenance of fire protection services and appliances and lifts in working order or who interferes with or obstructs any person in the discharge of his duties shall:

- (a) be guilty of an offence and upon conviction shall be punished with a fine as fixed by the Municipal Commissioner and as stipulated in Section 52 of The Maharashtra Regional and Town Planning Act, 1966;
- (b) be subject to further suitable actions including demolition of unauthorised works, as stipulated under Section 53 of The Maharashtra Regional and Town Planning Act, 1966;
- (c) in case of Licensed Engineer / Structural Engineer / Supervisor, subject to suitable action against him which may include cancellation of license and debarring him from further practice/ business for a period as decided by the Authority;
- (d) in case of registered architects, subject to action of the Council of Architecture as per the provisions of Architects Act, 1972 on the report of the Municipal Commissioner.

10.2. Revocation of Permission:-

- 1) Without prejudice to the powers of revocation conferred by Section 51 of the Act the Authority may, after giving the opportunity of being heard, revoke any development permission issued under these regulations where it is noticed by it that there had been any false statement or any misrepresentation of material fact in the application on the basis of which the development permission was issued and thereupon the whole work carried out in pursuance of such permission shall be treated as unauthorised.
- 2) In the case of revocation of the permission under sub- regulation (1), no compensation shall be paid.
- 3) Further the concerned person/applicant is subject to proceedings under the Indian Penal Code for making false statement before the public Authority. However, the decision to file a case shall be done under the express permission of the Municipal Commissioner.

11.0 AMENDMENT TO APPENDICES

The Municipal Commissioner authorised to amend the **Appendices A to K** (except Appendix C) in these regulations, as and when necessary.

12.0 A) CLARIFICATION

If any question or dispute arises with regards to interpretation of any of these regulations, the matter shall be referred to the Government, who after considering the matter and after giving hearing to the parties, if necessary, shall give a decision on the interpretation of the provisions of these Regulations. The decision of the Government, on the interpretation of these Regulations, shall be final and binding on the concerned party or parties.

B) Provision with respect to NBC

Any aspect not covered in these regulation or in particular the planning, design and construction of building and its appurtenant services shall be done to the satisfaction of Municipal Commissioner for which, the NBC shall be reference document for conformity regarding the various aspect. The latest version to the NBC shall be referred at the time of enforcement of these regulations.

PART- II
GENERAL LAND DEVELOPMENT REQUIREMENTS

13.0 REQUIREMENTS OF SITE**13.1 SITES NOT ELIGIBLE FOR CONSTRUCTION OF BUILDING**

No piece of land shall be used as a site for the construction of building

- (a) If the Authority considers that the site is insanitary, incapable of being well drained or it is dangerous to construct a building on it;
- (b) If the entire site is within a distance of 6 m. from the edge of water mark of a minor water course and 15 m. from the edge of water mark of a major water course shown on Development Plan or village/city survey map or otherwise,

Provided that where a minor water course passes through a low lying land without any well-defined banks, the owner of the property may be permitted by the Municipal Commissioner to restrict and or to realign the same within the same land according to cross section available with the Corporation, modified from time to time without changing the position of the inlet and outlet of the water course. In such case marginal open spaces shall be as required under these regulations subject to minimum 4.50 m. from the edge of the trained nala.

Notwithstanding anything contained hereinabove, the Municipal Commissioner shall be entitled to take cognizance of the existence of all water courses whether shown on the Development Plan or not, while sanctioning layouts and no person shall take any action without the permission of the Commissioner which results in reducing the water way or closing or filling up of any existing water course. If any watercourse, whether shown in the Development Plan/Revenue Record or not, but existing on the site/land, owned by private person, the area under such water course shall not be deducted for computation of FSI.

- (c) If the owner of the plot has not shown to the satisfaction of the Authority all the measures required to safeguard the construction from constantly getting damped;
- (d) If the use of the site is for the purpose, which will be a source of annoyance to the health and comfort of the inhabitants of the neighbourhood;
- (e) If the proposed use of land or occupancy of the building on the site does not conform to the land use proposals in the development plans or Zoning Regulations,
- (f) If the level of the site is less than prescribed datum level depending on topography and drainage aspects;
- (g) If it doesn't derive access from an authorised street/means of access described in these Regulations;
- (h) If the land is within a prohibited distance (currently of seventy five meters) from the crest of the outer parapet of the Armament Research and Development Establishment (ARDE), Range Pashan, Pune;
- (i) If the land is within a prohibited distance of approximately 457.2 m (500 yards) from the crest of the outer parapet of the High Energy Materials Research Laboratory (HEMRL), Sutarwadi, Pune as shown on Development Plan;
- (j) If the site is hilly and having gradient more than 1:5 whether shown on the Development Plan or not;

(k) If the site is not developable / buildable by virtue of restrictions imposed under any law or guidelines of any Government department.

(l) If the plot has not been approved as a building site by Authority.

13.2 DISTANCE OF SITE FROM ELECTRIC LINES

No structure including veranda or balcony shall be allowed to be erected or re-erected or any additions or alterations made to a building on a site within the distance quoted in **Table No.2** below in accordance with the prevailing Indian Electricity Rules and its amendments from time to time between the building and any overhead electric supply line.

Table No.2		
Electric Lines	Vertically (m.)	Horizontally (m.)
(1)	(2)	(3)
(a) Low and medium voltage Lines and Service Lines.	2.5	1.2
(b) High voltage lines upto 11,000 V.	3.7	1.2
(c) High voltage lines above 11,000 V and upto 33,000 V.	3.7	2.0
(d) Extra High voltage line beyond 33,000 V.	3.7 (Plus 0.3 m. for every additional 33,000 V. or part thereof)	2.0 (Plus 0.3 m. for every additional 33,000 V. or part thereof)
Note :The minimum clearance specified above shall be measured from maximum sag for vertical clearance and from maximum deflection due to wind pressure for horizontal clearance.		

13.3 CONSTRUCTION WITHIN FLOOD LINE

- i) Area between the river bank and blue flood line (Flood line towards the river bank) shall be prohibited zone for any construction except parking, open vegetable market, garden, lawns, open space, cremation and burial ground public toilet, or like uses, provided the land is feasible for such utilization.

Provided that, the redevelopment of the existing authorised properties within river bank and blue flood line, may be permitted subject to condition that, the plinth height of the building shall not be less than 0.45 m. above the R.L. of Red Flood Line and after obtaining the NOC from the Irrigation Department.

- ii) Area between blue flood line and red flood line shall be restrictive zone for the purposes of construction. The construction in the area may be permitted at a height of 0.45 m. above the red flood line.
- iii) If the area between the river bank and blue flood line or red flood line forms the part of the entire plot in developable zone i.e. residential, commercial, public-semi-public, industrial, then, FSI of this part of land may be allowed to be utilised on remaining land.

The blue and red flood line shall be as marked by the Irrigation Department or any other Government institutions dealing with the subject.

13.4 DEVELOPMENT WITHIN 30 M. FROM RAILWAY BOUNDARY

Any construction within 30 m. from railway boundary shall be subject to restrictions as may be specified by the Railway Authority from time to time

13.5 ENVIRONMENTAL CLEARANCE

Environmental clearance certificate shall be obtained for the project which needs clearance from the said Authority, as may be prescribed by the Ministry of Environment from time to time.

13.6 RESTRICTIONS IN THE VICINITY OF AIRPORT

Height restriction in the vicinity as well as the funnel of the Airport, as may be specified by the concerned authority from time to time, shall be observed.

13.7 RESTRICTIONS IN THE VICINITY OF ANCIENT MONUMENTS

- 1) The Restrictions for Development in the vicinity of the declared monuments as prescribed under the Ancient Monuments and Archaeological Sites and Remains Act, 1958 shall be observed.
- 2) The Restrictions for Development in the vicinity of the ancient monuments as prescribed under Ancient Monuments and Archaeological Sites and Remains Act, 1960 shall be observed.

13.8 DEVELOPMENT ALONG HIGHWAYS / CLASSIFIED ROADS

The development along the highways shall be subject to the provisions of National Highways Act, 1956 and State Highways Act, 1955 and orders issued by Ministry of Surface Transport, GoI and Public Works Department of the State Government, in this regards, from time to time.

A service road of 12 m. wide shall be provided along National and State Highways on both sides. These service roads may not be provided in piecemeal where authorized development / construction have already been taken place without the provisions of service road.

13.9 DEVELOPMENT WITHIN 500 M. FROM THE PRISON PREMISES

The development within 500 m. from the prison premises is restricted. However, it may be permitted with prior consent of the committee constituted in this regard vide government order no.UOR-81-2013-UD-11, Dated 4 December, 2013 and TPB-4315/146/CR-113/2015/UD-11, dated 6th august 2015. This provision shall be subject to the orders issued by the Government from time to time.

13.10 DISTANCE FROM LAND FILL SITES

For any residential development, segregating distance from the land fill site shall be observed as specified under Solid Waste Management Rules in force from time to time or as specified by Competent Authority.

13.11 AUTHORITIES TO SUPPLY COMPLETE INFORMATION TO CORPORATION

It is the duty of the concerned authority putting restrictions as per their respective legislations/ regulations/ rules as mentioned above to submit to the Corporation full details of restrictions (including graded restriction, if any) along with the relevant map detailing restrictions. In the interest of increasing ease of doing business, no individual applicant should be required to approach the concerned departments for NOC. However it is the duty of the applicant to ensure that restrictions informed by the authorities are followed scrupulously. The Municipal Commissioner shall ensure compliance of the restriction informed by the concerned authorities while sanctioning the development permission.

14.0 MEANS OF ACCESS

14.1 Every plot, shall abut on a public means of access like street / road.

14.2 In case of plot not abutting on a public means of access like street/roads etc., the plot shall abut on, or have access from spaces directly connected from the street by a, hard surface approach as given:

(a) The width of such access ways in non-congested areas shall be as follows: -

(i)	Min width of access ways	Max. Length of such access ways
	6m.	75m.
	9m.	150m.
(ii) The approach to the building from the road/street/internal means of access shall be through paved pathway of which not less than 1.5 m. provided its length is not more than 20m., from the main/internal means of access.		

(b) In congested areas the width of such access ways shall not be less than 4.5m.

14.3 Every person who erects a building shall not at any time erect or cause or permit to erect or re-erect any building which in any way encroaches upon or diminishes the area set apart as means of access.

15.0 REGULATIONS FOR LAND SUB-DIVISION AND LAYOUT**15.1 OBLIGATION TO PREPARE LAYOUT**

Building layout or Sub-division proposal shall be submitted for the following:

(i) When more than one building, excepting accessory buildings in the case of residential building, is proposed on any land, the owner of the land shall submit proposal for proper layout of building.

(ii) When development and redevelopment of any land which includes division and sub-division or amalgamation of plots for various land uses is proposed.

15.2 ROADS / STREETS IN LAND SUB-DIVISION OR LAYOUT

A) **For Residential Development** -The minimum width of internal road in any layout or subdivision of land shall be as given in Table No.3(a)

Sr.No.	Length of internal road in layout/sub-division(m).	Width of internal road in layout/sub-division (m.).
i	Upto150	9.00
ii	Above 150 and upto300	12.00
iii	More than 300	15.00

B) For Other than Residential Development –The minimum width of internal road in any layout or subdivision of land shall be as given in **Table No.3(b)**

Table No.3(b)		
Sr.no.	Length of internal road in layout / sub-division (m).	Width of internal road in layout / sub-division (m).
i	Upto 75	12
ii	Above 75 and upto150	15
iii	Above 150 and more	18 or more

NOTE – 1 The means of access shall be clear of required marginal distances from the existing building line. The developments on plots shall be permitted if it is accessible by the authorized public street existing or road from the sanctioned layout.

NOTE – 2 For layout or part of layout where plots of 50sq.m.or less are proposed for Economical Weaker Sections (EWS), 4.5 wide road of length upto 60 m. and 6 m. wide road of length upto100 m. maybe permitted so that EWS plots shall abut on both sides of such 6 m. wide road.

C) In case of group housing scheme/layout of buildings, minimum width of internal road shall be as under

Table No.3(c)		
Sr. No.	Length of Internal road in m.	Length of Internal Road in m.
i	Upto 150	7.50
ii	Above 150 to 300	9.00
iii	Above 300 to 600	12.00
iv	Above 600	15.00

NOTE – It shall be necessary to provide through roads, in group housing scheme of area more than 2 Hectare, so as to coordinate the adjoining major road link (15 m. and above) or give way to new road link for adjoining area. The road width required for such road link shall be as per **Table no.3(a)**. This shall not bar coordination of smaller width roads approaching from adjoining area, if owner so desires. Further the authority may insist on coordination of smaller width road from adjoining area, if required from planning point of view.

15.2.1 Pathways -In case of group housing scheme / campus planning, a pedestrian approach to the buildings from road / street / internal means of access, wherever necessary, shall be through paved pathway of width not less than 3.0 & 6.0 m., provided its length measured from farthest building is not more than 60 m. and 100 m. respectively from the main / internal means of access. If the length is more than 100m., then regular street as provided in **Table No.3(c)** shall be necessary. The marginal distances shall not be required from such pathways. However, distance between two buildings shall be maintained. This provision of pathway shall not apply to development under Regulation no.24.4

The length of Internal road shall be measured from the distance from the farthest plot (or building) to the public street. The length of the subsidiary access way shall be measured from the point of its origin to the next wider road on which it meets.

- 15.2.3** While granting the development permission for land sub-division or group housing/campus planning, it shall be necessary to coordinate the roads in the adjoining lands subject to provisions mentioned in Regulation no.15.2.C – NOTE.
- 15.2.4** In congested areas, plots facing street / means of access less than 4.5 m. in width, the plot boundary shall be shifted to be away by 2.25 m. from the central line of the street/ means of access way to give rise to a new street / means of access way of width of 4.5 m. clear from the structural projections. In this case, no separate setback from revised plot boundary is required.
- 15.2.5** Means of access / internal road shall be levelled, metalled, flagged, paved, sewered, drained, channelled, lighted, laid with water supply line and provided with trees for shade (wherever necessary), free of encroachment and shall be maintained in proper condition.
- 15.2.6** If any private street or any other means of access to a building is not constructed & maintained as specified above, the authority may by written notice require the owner or owners of the several premises fronting or adjoining the said street or other means of access or abutting thereon or to which access is obtained through such street or other means of access or which shall benefit by works executed to carry out any or more of the aforesaid requirements in such manner and within such time as the authority shall direct. If the owner or owners fail to comply with this direction, the authority may arrange for its execution and recover the expenses incurred from the owner/ owners.
- 15.2.7 Access from the Highways/classified roads:** Generally the plot / building along Highway and classified roads shall derive access from service road. However, highway amenities like petrol pump; hotel, etc. may have an access direct from Highways. The above shall be subject to the provisions of National Highway Act, 1956 and State Highways Act, 1955.
- 15.2.8 Provisions for Special buildings -** For special buildings as mentioned in 2.77.13, the following additional provisions of means of access shall be ensured;
- The width of the main street on which the plot abuts shall not be less than 12 m. in non-congested area and not be less than 9m. in congested area, and one end of this street shall join another street of width not less than 12 m. and 9 m., respectively.
 - The marginal distances on its all sides shall be minimum 6 m. and the layout for the same shall be approved taking into consideration the requirements of fire services, and the margins shall be of hard surface capable of taking the weight of fire engine, weighing up to 45 tonnes. The said marginal distances shall be kept free of obstructions and shall be motorable.
 - Main entrances to the plot shall be of adequate width to allow easy access to the fire engine and in no case it shall measure less than 4.5 m. The entrance gate shall fold back against the compound wall of the premises, thus leaving the exterior access way within the plot free for movement of fire engine / fire service vehicles. If main entrance at boundary wall is built over, the minimum clearance shall be 4.5 m. and turning radius of 9.0m shall be provided for fire fighting vehicle movement or as required as per the NOC from the Chief Fire Officer.
- 15.2.9** In addition to the provisions of Regulation no.15.2, Cul-de-sacs giving access to plots and extending upto 150 m. normally and 275 m. maximum with an additional turning space at 150m. may be allowed only in residential area, provided that Cul-de-sacs would be permissible only on straight roads and further provided that cul-de-sacs ends shall be higher in level than the level of starting point. The turning space, in any case shall be not less than 81 sq.m. in area with no dimension being less than 9 m.
- 15.2.10** Whenever called upon by the planning authority to do so, areas under internal layout roads shall be handed over to the Planning Authority by way of deed after development of the same, within such

period as may be specified in commencement letter / development permission, for which nominal amount of Re 1/- shall be paid by the Planning Authority.

Provided that, in case the development plan road is incorporated in the layout then, the width of road for which grant of TDR is not permissible, shall be handed over as prescribed above.

- 15.2.11 Intersection of Roads -** At junctions of roads meeting at right angles, the rounding off at the intersection shall be done, with the tangent length from the point of intersection to the curve being $1/2$ the road width across the direction of tangent as given below. The building shall also set back at required marginal distance from this rounding off.

Fig. 1 - Rounding off intersections at junctions

Fig. 2 - Rounding off intersection at junctions.

- 15.2.12** For junctions of roads meeting at less than 60 degree, the rounding off or cut or similar treatment shall have tangent length of U and V from the intersections point as shown in fig.2. The tangent length at obtuse angle junction shall be equal to half the width of the road from which the vehicle enters as shown in fig.2. Provided however, that the radius for the junction rounding shall not be less than 6 m.

15.2.13 Land Locked Plot :-

In case of a plot surrounded on all sides by other plots or reservation if any, i.e. a land locked plot which has no access to any street or road, the Commissioner may require access through an adjoining plot or plots shall, as far as possible be nearest to the street or road, to the land locked plot, at the cost of owner of the land-locked plot and such other conditions as the Commissioner may specify. If the Plot is land locked by any reservation, then access may be made available by shifting of reservation (within owners land). In such cases such land locked plot is considered to be fronting on the main road from which the access is made available irrespective of the width of internal road / access.

15.3 RECREATIONAL OPEN SPACES

- 15.3.1** In any layout or subdivision or any development of land for any use/zone admeasuring 0.20 Ha. or more (after deducting area under D.P. road, D.P. Reservation including deemed reservation under these regulations, if any, from gross plot area) 10% of the area under layout shall be earmarked as recreational open space which shall as far as possible be provided in one place. In case of land admeasuring more than 0.8 Ha., such recreational open space may be allowed to be earmarked at different locations in the same layout, provided that the size and other dimensions conform to the provisions herein below.

- i) The above-mentioned area of 0.2 Ha. shall be measured with reference to original holding as on 11th January 1967 and not with reference to sub-divided holding in revenue / city survey record thereafter without the permission under the Maharashtra Regional & Town Planning Act, 1966. However, this provision shall not be applicable to plots compulsorily got

subdivided below 0.2 hec due to the DP reservations / Roads/ Road widening/deemed reservations or any other proposal of the Planning Authority.

For the land which are sub-divided after 11th January 1967 without taking prior permission from the Planning Authority and having plot area below 0.20 hectare, prior to the coming in to force of these regulations, the applicant may adopt any option of -

- a) providing 10% open space subject to minimum 200 sq.m., or
 - b) availing the reduced FSI on such land to 75% of the basic FSI as otherwise permissible. In such cases premium FSI or loading of TDR shall be permissible on such plot proportionately.
- (ii) For the plots having area upto 0.20 Ha., regularised under the Maharashtra Gunthewari Development (Regularisation, Upgradation and Control) Act, 2001, no such open space shall be required for the development permission on such plot having area upto 0.20 Ha.
 - (iii) Notwithstanding anything contained in the definition of "Open Space" in this regulation, such recreational open space may be permitted on podium in congested / non congested area subject to Regulation no.18.12

Provided that, in case of lands declared surplus or retainable under Urban Land (C & R) Act, 1976, if the entire retainable holding or entire surplus holding independently admeasures 0.2Ha., or more, then 10% recreational open space shall be necessary in respective holding.

Provided further that such recreational open space shall also be necessary for group housing scheme or campus/ cluster planning for any use / zone.

Provided further that, no such open space shall be necessary in case of layout or subdivision of plots from already sanctioned layout by the Authority where the requisite recreational open space has already been left in the sanctioned layout.

Provided further that no such open space shall be necessary for development of the reservations in the development plans designated for the purpose other than residential.

In case of development of land for educational purpose, in lieu of 10% recreational open space, atleast 40% of the gross area, excluding the area under Development Plan road and reservations in Development Plan, (or as decided by the Government from time to time) shall be earmarked for playground. Notwithstanding anything contained in this regulation, the shape and location of such open space shall be such that it can be properly used as playground. Provided that, the area of such playground shall not be deducted for computation of FSI.

15.3.2 The owner shall give an undertaking that the recreational open space shall be for the common use of all the residents or occupants of the layout / building unit.

- a) On sanction of the development permission, the recreational open space shall deemed to have vested in the society / association of the residents / occupants except otherwise specified. In case such society or association is yet to be formed, the owner shall give undertaking to the Municipal Commissioner that he will transfer the recreational opens pace to the society/ association whenever it is formed. The recreational open space shall not be sold / leased out / allotted/ transferred for any purpose, to any other person and it shall not be put to any other user except for the common use of residents/ occupants as mentioned in Regulation no.15.3.7.

If the Municipal Commissioner is convinced that, such open space is being used in violation of the provisions as prescribed in these regulations, then, he shall take over possession of such land of recreational open space for maintaining it for the uses permissible in these regulation, subject to condition that it shall not be further handed over or allotted to any

person/institute/authority to that effect.

Provided that, it shall not bar to return the possession of such open space to the original society/ association of plot owners, after taking due undertaking to that effect.

- 15.3.3** No permission shall be granted to delete / reduce open spaces of the existing sanctioned layout/ subdivision. However, while revising the layout, such recreational open space may be rearranged without decrease in area subject to minimum prescribed area under these Regulations with the consent of plot / tenement holders / co-owners.
- 15.3.4** The open spaces shall be exclusive of means of accesses / internal roads / designations or reservations in development plan roads and areas for road widening.
- 15.3.5** Such recreational open space may be allowed to be earmarked, partly or fully, in green belt area shown on the development plan after leaving distance of 15 m. from river and 9.0m. from nala, provided, such recreational space is sizable as required under this regulation. Provided that, the only user and concerned structures as may be permissible under the regulation no.16.8 in respect of Green belt, may be permitted in such open space.
- 15.3.6** **Minimum dimensions** -The minimum dimensions of such recreational open space shall be not less than 10m. and if the average width of such recreational open space is less than 20m. the length thereof shall not exceed 2 ½ times the average width.
- 15.3.7** **Structures permitted in Open Space**- If required, structure and uses which can be permitted without counting in FSI in the recreational open spaces shall be as under:
- 1) There may be maximum two storeyed structure with maximum 15% built up area of recreational open space, out of which maximum 10% built up area shall be allowed on ground floor and remaining can be permitted on 1st floor.
 - 2) The structures used for the purpose of pavilion, gymnasia, fitness centre, club house, vipashyana and yoga centre, crèche, kindergarten, library, water tank,(underground or elevated), electric substation, generator set, pump houses, garbage treatment, public health out post/ centre or other structures for the purpose of sports and recreational activity(indoor or outdoor stadiums, etc. as per availability of area) may be permitted.
 - 3) No detached toilet block shall be permitted.
 - 4) A swimming pool may also be permitted in such a recreational open space. The ownership of such structures and other appurtenant users shall vest in all the owners on account of whose cumulative holdings, the recreational open space is required to be kept in the land.
 - 5) The proposal for the construction of such structure should come as a proposal from the owner/s, owners' society / societies or federation of owners' societies and shall be meant for the beneficial use of the owners / members of such society / societies / federation of societies.
 - 6) The remaining area of the recreational open space shall be kept open to sky and properly accessible to all members as a place of recreation, garden or a playground.
 - 7) The owners' society / societies, the federation of the owners' societies shall submit to the Authority, a registered undertaking agreeing to the conditions in (5) & (6) above while obtaining permission for the above said construction.

Every plot meant for a recreational open space shall have an independent means of access. In case of group housing scheme, if such recreational open space is surrounded by buildings and is meant for use by the occupants of those buildings, then independent means of access may not be insisted.

15.4 PROVISION FOR AMENITY SPACE

In any layout or sub division of plots or development proposal, having area 0.4 ha. or more, amenity space of 15% on gross area excluding area under development plan road and reservation in development plan shall be provided while granting permission to the layout / development proposal. These Amenity Space shall be deemed to be a reservation in development plan and Floor Space Index (FSI) in lieu thereof may be made available in-situ (on remaining land). The calculation of this in-situ FSI shall be shown on the layout / building plan. If the owner desires to have TDR against it, instead of in-situ FSI, then he may be awarded TDR. The generation of TDR or in-situ FSI shall be equivalent to the quantum mentioned in Regulation no.22.0 in respect of TDR.

Provided that, it shall not be necessary to provide such Amenity space, if the land is proposed to be developed for IT or ITES users only and having area upto 2.00 Hectare.

Provided that, if there is any development plan reservation proposed in the land, then area of such reservations may be adjusted against this amenity space and the owner of the said land may not be required to part with the area for the amenity space to that extent. However, such area under reservation shall be handed over, free from all encumbrances, to the planning authority at the time of approval of the development proposal.

Provided that, the Municipal Commissioner shall ensure that amenity space shall be earmarked in the layout so that after amalgamating the amenity spaces in the adjacent layouts, it becomes larger in area. It shall be approachable by minimum 12 m. wide road except the cases where 12 m. approach road to the site is not available.

Provided further that, if the amenity space is less than 200sq.m. in area and not suitable for creation of amenity, then, Municipal Commissioner may instead of open land insist for amenity space in the form of built up area equal to 50% of amenity space as decided by the Commissioner This built up amenity space preferable on ground floor and TDR shall be allowed for such construction amenity as mentioned in TDR regulations.

Provided that, this regulation shall not be applicable to Regulation no.16.6(v), (i.e Regulation for allowing Residential /Commercial user in Industrial Zone),wherein separate provision for land for public amenities / utilities is made.

Provided further that, this regulation shall not be applicable where entire development permission is for amenities specified in definition of amenity space.

Provided further that, this regulation shall not be applicable for revision of earlier sanctioned development permissions granted under the regulations in force prior to these regulations, where no such amenity space is provided in earlier sanctioned development permission.

However, if some amenity space is provided in the earlier permission, then quantum of such amenity space in the revised permission –

- i) shall be limited to the area provided in earlier permission.
- ii) shall not be reduced even though area of such amenity space is more than what is specified in this regulation.

15.4.1 DEVELOPMENT OF AMENITY SPACE

Development of amenity space may be carried out by the Authority, or the owner may be allowed to develop the same for the amenities as per priorities mentioned here in below, if allowed to do so by the Municipal Commissioner.

The priority for development of particular amenity in particular Residential area shall be decided by the Municipal Commissioner. If the Municipal Commissioner is of the opinion that the amenity space is required to be developed for Playground, Garden, Park, Primary School, High School, Hospital, Dispensary, Fire Brigade Station, Police Station, Electric Sub-Station, Parking and like other services, etc. then, such amenity space shall be handed over to the Municipal Corporation and the Municipal Corporation shall develop for the said purpose. If the Municipal Commissioner is of the opinion that, the amenity space is not required for above mentioned purposes then on satisfaction that the proposal is in public interest he may allow the owner to develop the same for the other amenities mentioned in this regulation.

However, building plan for development of such amenity shall be got approved along with the regular proposal of development on the land and the development of such amenity shall be carried out ahead of development on owner's land. At any point of time, if it is observed that there is breach of condition, the development permission of the entire land shall be revoked by the Municipal Commissioner. The agreement to that effect shall be executed and also condition to that effect shall be incorporated in commencement letter.

After construction of the amenity, it shall be the responsibility of the owner to maintain the amenity and make it available for the use by the public, on reasonable charges, wherever necessary, on terms and condition as may be decided by the Municipal Commissioner. This shall be the part of agreement to be executed between the Municipal Commissioner and the owner.

Wherever, after construction of amenity, it is to be handed over to the Municipal Corporation as per agreement, then, the owner shall be entitled for the further TDR as mentioned in Regulation no.22.0.

Any other use not mentioned in these regulations may be allowed to be developed by the Municipal Commissioner similar to the use of amenity.

Provided that, the amenity spaces which are earmarked in the layout tentatively or finally sanctioned earlier and not developed so far, may also be allowed to be developed as mentioned in this regulation.

15.5 PROVISION FOR ELECTRIC SUB-STATION

In case of development/re-development of any land, building or premises mentioned below, provision for electric sub-stations may be made as under.

Sr. No.	Plot Area	Maximum requirements
1	Plot above 2000 sq.m.	One single transformer sub-station of the size of 5m.x5m. and height of not more than 5m.
2	Layout or sub-division of a plot measuring 2.0 ha. or more.	A suitable site for an electric sub-station.

Provided that the sub-station, if required, may be constructed in such a manner that it is away from main building at a distance of atleast 3 m. and in general does not affect the required side marginal distances or prescribed width of internal access or larger open space.

15.6 PROVISION FOR INCLUSIVE HOUSING

15.6.1 All the provisions regarding inclusive housing issued by the Government shall be applicable. The current provisions are here under. If any conflicts arises, the sanctioned provision shall prevails.

(a) For the sub-division or layout of the land admeasuring 4000 sq. mt. or more for residential purpose, minimum 20% of the net plot area shall have to be provided either-

(i) in the form of developed plots of 30 to 50 sq.m. size for Economically Weaker Sections/Low Income Groups (EWS/LIG), (hereinafter referred to as "affordable plots")

Or

(ii) in the form of plot / plots equivalent to 20% net plot area for constructing EWS/LIG tenements, which area shall be handed over to MHADA at the land rate prescribed in the Annual Statement of Rates prepared by the Inspector General of Registration, Maharashtra State, Pune (hereinafter referred to as ASR) of the year in which final approval is accorded to such sub-division or layout.

Provided that the equivalent affordable Housing Plots or 20% plot area can also be provided at some other location(s) within the same Administrative Ward of the Municipal Corporation.

(b) The Landowner/Developer shall sell the affordable plots to MHADA at one place in lieu of equivalent FSI to be utilised in the remaining plots. If MHADA declines to purchase the same within a reasonable time of six months, he can sell the affordable plots in the open market, in such case additional FSI of affordable plots shall not be admissible.

Provided that in case the Landowner / Developer desires not to utilize such additional FSI in the same land, fully or partly, then he shall be awarded TDR in lieu of such unutilized additional FSI. The utilization of this TDR shall be subject to the prevailing provisions of DCR and as per the following formula.

$$\text{Formula: } X = \left[\frac{R_g}{R_r} \right] \times Y$$

Where, X = Utilisation of Development Right (DR) on the receiving plot.

R_g = Land Rate in Rs. Per Sq. m. as per the Annual Statement of Rates (hereinafter referred to as 'ASR') of generating plot in the year when project is sanctioned.

R_r = Land Rate in Rs. Per Sq. m. as per ASR of the receiving plot of the same year of generating plot.

Y = Unutilized additional FSI.

15.6.2 For a plot of land, admeasuring 4000 sq.mt. or more to be developed for a Housing Scheme consisting of one or more buildings (hereinafter referred to as 'the said Scheme'), EWS/LIG Housing in the form of tenements of size ranging between 30 to 50 Sq.mt. (hereinafter referred to as 'affordable housing tenements') shall be constructed at least to the extent of 20% of the basic FSI subject to the following conditions:-

a) The built up area of the EWS/LIG tenements constructed under the Scheme shall not be counted towards FSI.

The Landowner/Developer shall construct the stock of the affordable housing tenements in the same plot and the Planning Authority shall ensure that the Occupation Certificate for the rest of the development under the said Scheme is not issued till the Occupation Certificate is issued for

the Affordable Housing tenements under the said Scheme.

Provided further that the equivalent Affordable Housing tenements can also be provided at some other location(s) within the same Administrative Ward of the Municipal Corporation and such construction shall be free of FSI up to the limit of 50% of the admissible FSI of such alternative plot

- c) The completion of the affordable Housing tenements under the said scheme along with necessary particulars, including a copy of the Occupation Certificate granted by the Planning Authority in respect thereof, shall be immediately intimated by the Landowner/ Developer to MHADA. Upon such intimation, MHADA, within a period of six months from the date of receipt of such intimation, shall either purchase such affordable housing tenements or allot such tenements to the allottees selected by MHADA through a system of lottery, drawn after such Affordable Housing tenements have been granted Occupation Certificate and thereafter, the Land Owner/ Developer shall dispose of such tenements to MHADA or such allottees, as the case may be, at the rates equal to 125% of the construction rates in the ASR applicable to the land under the Scheme, on the date of grant of Occupation Certificate to such Affordable Housing tenements.

Provided that there shall be no obligation to construct affordable Housing tenements in the redevelopment project of any Co-operative Housing Society in which the carpet area of all existing individual residential tenements does not exceed 80 Sq. mtr.

Provided further that in case of individual bungalow Housing Scheme, these provisions shall not apply in case of redevelopment of individual bungalow. However, if redevelopment for total plot under layout is proposed, these provisions shall be applicable.

- d) The Landowner/ Developer may also be permitted to utilise 1/4th of the total 20% FSI earmarked for Affordable Housing towards construction of Affordable Housing Tenements in the form of service quarters on the same plot but in a separate block which shall have to be sold as service quarters only to the purchasers of free sale flats under the said scheme.
- e) There shall be no obligation to construct affordable housing tenements in accordance with these provisions in any Housing Scheme or residential development project wherein. Owing to the relevant provisions of the Development Control Regulations, 20% or more of the basic zonal FSI is required to be utilized towards constructions of residential tenements for the EWS/ LIG and also for the development / redevelopment of any land owned by the Government, or any Semi-Government Organization. Provided such development / redevelopment is undertaken by the Government or such Semi - Government Organization by itself or through any other agency under BOT or PPP model.

Provided that in case of development of reservation for Public Housing, Housing the Dis-housed, Public Housing / High Density Housing and the EWS/LIG tenements constructed under the provisions of any other Act, these provisions shall not be applicable.

15.6.3 Amalgamation of affordable plots/affordable tenements shall not be allowed.

15.6.4 These Provisions shall be applicable prospectively and shall not be applicable to any Housing Scheme or residential development project wherein Commencement Certificate had been issued prior to the date of coming into force of these provisions and was valid on such date.

15.7 PLOT AREA, PLOT WIDTH FOR VARIOUS USES:

Minimum plot areas and widths for various uses shall be as given below in the **Table No.4**.

Table No.4				
MINIMUM PLOT AREA, MINIMUM WIDTH, FOR VARIOUS USES				
Sr. No.	Uses	Plot area (in sq.m.)	Min. Plot Width	Type of Development
(1)	(2)	(3)	(4)	(5)
1	Residential and Commercial (except those in 2,3 & 4 below)	i) 30 and above but upto 125	As per Table No. 6	Row
		ii) Above 100 but less than 250		Semi-detached/ Detached
		iii) 250 & above		Detached
2	Plots in EWS Housing / High Density Housing / Sites and Services / Slum Up-gradation / Reconstruction Scheme by public authority.	25 and above but upto 125	As per Table No.6	Row
3	Auto Fuel Filling station -			
	(a) Without service bay	510	16.75 m	Detached
	(b) With service bay	1100	30.5 m	Detached.
4.	Industrial	300	10 m	Detached.

Note : In case of sr.no.1, pattern of development permissible within a plot shall be shown in dotted line while approving the layout. However change in pattern may be permitted in future, if it fits in to above pattern of development and does not disturb the overall pattern of development already approved.

15.8 NET PLOT AREA AND COMPUTATION OF FSI

For the purpose of computing FSI/Built-up area, **the net area of the plot** shall be as under.

- i) In case of a plotted layout/sub-division /group housing scheme / any development, net area shall be the balance plot area, after deducting the area covered by amenity space under Regulation no 15.4 which is deemed reservations and Development Plan proposals, if any, from the total area of plot.
 - ii) For the purpose of computation of FSI/built-up area, the net area of the plot shall only be considered.
- In case of plotted layout, the basic FSI of such net area shall be distributed on all plots on pro-rata basis or on certain plots to which land owner desires, subject to maximum receiving potential prescribed in these regulations.

- iv) In case of plots from already approved layouts, the plot area shall be treated as net plot area.
- v) The above regulations in respect of net plot area and computation of FSI shall apply to proposals in all land use zones.

15.9 TRANSFER OF DP SITES (OTHER THAN DP ROAD) IN LIEU OF FSI

If in any development proposal, owner desires to hand over the reserved site to the Planning Authority, then FSI of such reserved site equivalent to the TDR may be allowed to be utilized on the remaining land. Transfer deed to that effect shall be executed and FSI calculation shall be mentioned on the plans of development proposal. In case of plotted layout, distribution of FSI of plots in pursuance of such transfer shall be as desired by the owner and may differ from plot to plot. If some FSI remains unutilized, the owner shall be entitled for TDR against the remaining FSI.

15.10 RELOCATION OF DP SITES/DP PROPOSALS

If the land proposed to be laid out for any development is affected by any reservations for public purposes, the Municipal Commissioner may agree to adjust the boundaries of the reservation or shift the location of such reservation to suit development without altering the area of such reservation. Land offered in alternate should be suitable for the purpose for which the original reservation was proposed. Provided that no such shifting of the reservations shall be permitted.

- (a) If the reservation proposed to be relocated is in parts;
- (b) Beyond 300 mtr. of the original location in the Development Plan;
- (c) Beyond the same holding of the owner in which such reservation is located;
- (d) Unless the alternative location and size is at least similar to the location and size of the Development Plan as regards access, levels, etc.;
- (e) Unless the relocation is within area covered by the layout or development permission under sanction; and
- (f) If the land is reserved in view of its geographical location like ESR, STP, Nalla training, bio diversity proposal, etc.
- (g) If the reservation is already shifted under these regulations.

Provided that relocation of the reservation from a land may also be permitted on any land within 300 meters belonging to other owner's land if the other owner consents to such relocation of reservation on his land and consents to hand over his land to the Planning Authority in lieu of TDR subject to conditions mentioned in above sub Regulation no (a), (d) and (f), and (g).

The Municipal Commissioner shall issue a well-reasoned order of such relocation, along with the authenticated part plan showing both locations, under his seal and signature, with a copy to the Government, Director of Town Planning, Maharashtra State, for information and record purpose. The proposal of Development Plan shall stand modified to that effect.

15.11 AMALGAMATION OF PLOTS

Amalgamation of plots shall be permissible if they are contiguous permissible subject to following

- a) Amalgamation of plot having incompatible zoning in development plan shall not be allowed.

b) Amalgamation of plot which is not desirable from planning point of view (eg. as shown in below) shall not be permitted.

These plots shall not be amalgamated.

This plots shall not be amalgamated.

PART - III
LAND USE CLASSIFICATION AND PERMISSIBLE USES.

16.0 GENERAL

- (1) In case of Development / re-development of any land, building or premises, the intended use shall conform to the land use, purpose of designation, allocation or reservation, assigned to it in the Development Plan as the case may be, unless specified otherwise.
- (2) **Reservations lapsed under Section 127 of the Act.** – If the reservation in the earlier sanctioned development plan is lapsed in pursuance of notice under section 127 of Maharashtra Regional and Town Planning Act, 1966, then the corresponding reservation shall stand lapsed in this revised development plan to the extent of area covered in the said notice. The Municipal Commissioner shall take decision on such matters.
- (3) **Lawful existing non-conforming uses** - Any lawful non-conforming use of premises existing prior to the date of enforcement of these regulations, shall continue and may be allowed to be expanded within the holding in the original sanction, unless in the opinion of the Municipal Commissioner the activity poses danger to public safety and/ or life and that when a building, containing non-conforming use is pulled down or has fallen down, the use of the new building shall be in conformity with these Regulations or with lawful existing use.

Provided further, that non-conforming cattle stables and industries causing nuisance shall be shifted to a conforming area within such period as may be decided by the Municipal Commissioner.

- (4) **Existing features shown on development plan** – The existing features shown on development plan are indicative and stand modified on development plan as per actual position. Mention of particular use on development plan, shall not bar the owner from permission allowed in the zone shown for such land. Also, boundaries of s. no., alignment of existing road / nalla and other physical features of land shall be as per measurement plan of Land Records Department.
- (5) **Development of Parking** – The Municipal Commissioner may develop any land in any developable zone, owned by or in possession of Municipal Corporation, for public parking single or multi-storeyed, underground or above ground.
- (6) **Discontinuance of Zoning in pursuance of existing use**– If any land is shown in Public semi-public zone, Public Utility, because of the activity existed there-on, such lands shall be deemed to have been shown in the adjacent predominant Zone after such activity ceases to exist and thereupon, the development shall be permissible as per the adjoining predominant zone, with the special permission of Municipal Commissioner.
- (7) **Development permission granted as per the I to R provisions** - In industrial zone on which Residential/ Commercial permission is granted is deemed to be converted into Residential/ Commercial zone to the extent of that area, after issuance of full and final occupation certificate to the project.
- (8) **Land use classification** - The different land use classification & different uses permissible in that land use are given below.
 - 1) Residential Zone –(R1 & R2)
 - 2) Slum Improvement Zone.

- 3) Commercial Zone –(C-1)/Special Commercial Zone, /Business Hub Area/Zone
- 4) Central Business District Zone
- 5) Industrial Zone.
- 6) Agricultural Zone / No Development Zone.
- 7) Green Belt zone.
- 8) Hill Top-Hill Slope Zone (HTHS).
- 9) Public Semi-public Zone.
- 10) Traffic and Transportation Zone.

16.1 RESIDENTIAL ZONE - R 1

Residential Zone R1 includes Residential plots abutting on roads below 9 m. in congested area and below 12 m. width in outside congested area.

16.1.1 The following uses and accessory uses to the principal use shall be permitted in buildings or premises in Zone R1, subject to other regulations:

- (i) Any residences.
- (ii) Hostels for students / working men/women, with or without boarding facilities.
- (iii) Old age home in independent building on road having width 9.00 meter and above,
- (iv) Customary Home occupation i.e. occupations customarily carried out by the members of the household without employing hired labour and shall include stitching, embroidery, button making etc. with or without motive power. If motive power is used, the total electricity load should not exceed 1 HP.
- (v) Medical and Dental Practitioner's Dispensaries including pathological laboratory, diagnostic clinics, polyclinics, counselling centre, clinics, to be permitted on any floor. Maternity homes, clinics, nursing home with indoor patients on ground or stilt floor or on first floor with separate means of access of staircase from within the building or outside, may be permitted but not within the prescribed marginal open spaces in any case and with the special permission of Commissioner. Maternity Homes and Hospitals are permitted for maximum 20 beds.
- (vi) Professional Offices in residential tenement for own purpose not exceeding carpet area of 50 sq. m. each.
- (vii) Community halls, welfare centre, gymnasia (each not exceeding 100 sq.m.)
- (viii) Primary and nursery schools including students' hostels in independent buildings, on widths of roads 9.00 m. or above and nursery schools on road having width 6.00 meter or above.
- (ix) Crèche, Day-care centre in an independent building or parts of building upto 50 sq.m.
- (x) Private coaching classes, mess in an independent building or parts of building upto 50 sq.m. with strictly subjected to separate parking facility in the same premises.
- (xi) Religious buildings.
- (xii) Public/ City Libraries and Museums in independent building or on any floor of the building with special permission of Municipal Commissioner if the user will not create nuisance to the occupant of the building.
- (xiii) Club Houses or gymkhanas, not conducted as a business, on independent plots which may

have an extension counter or only branch of a bank, in such club-houses or gymkhana.

- (xiv) Public Parks or Private Parks, gardens and play field in independent plots not being used for business purpose, but not amusement parks.
- (xv) Bus shelters, Taxi-Rickshaw stands trolley bus shelters, Railway Station, Metro station, BRT stand, cycle stand.
- (xvi) Convenience shops not more than 20 sq. m., each only on ground floor, for the purposes of food grain shops (Ration shops). Pan shops Tobacconist, Shops for collection and distribution of cloths and other materials for cleaning and dyeing establishments, Darners, Tailors, Groceries, Confectionery and other general provisions. Hair dressing saloon and Beauty Parlour, bicycle hire and repair, Hat repair, shoe repair and shining shops, vegetable and fruit stalls/ shops, fish or/and meat shops, Milk shops, Floweriest, Bangles and Newspaper stalls, wood, coal and fuel merchants, Book and stationery etc. Medicine and Chemist shops, watch& mobile repairs and motorcycle repair shops. The Commissioner may from time to time add or alter or amend the above list.
- (xvii) Police Station, police chowky, Government and Municipal sub-offices, posts and Telegraph Offices, Branch offices of Banks, with safe Deposit Vaults, Electrical substations, Fire Aid posts along with home-guards and Civil Defence Centres, essential Public utility and Pumping stations and water installations and ancillary structures thereof required to cater to the local area.
- (xviii) Electronic Industry of the Assembly type (not manufacturing type) with the following restrictions –
- (a) Motive Power shall not exceed 1 H.P.
- (b) Area occupied shall not exceed 100 sq.m.
- (xix) Information technology establishment (ITE) (pertaining to software only) on the plots/ premises fronting on roads having width 9.00 m. and above.
- (xx) Flour mill and wet / dry masala grinding / book binding subject to following conditions:
- (a) It is located on ground floor.
- (b) Adequate care has been taken in structural design.
- (c) It does not cause any nuisance to the neighbour and residents of upper floor.
- (d) Power requirement does not exceed 10 hp. Additional H.P. if required, may be granted with special written permission of Commissioner.
- (xxi) Places for disposal, for human bodies, like Burial grounds, cremation grounds on a road having width of 9 m. and above subject to the approval from Municipal Corporation.
- (xxii) Agricultural, horticultural and allied uses (except agro-based industries).

16.2 RESIDENTIAL ZONE R-2

Residential Zone R2 includes Residential plots abutting on road having existing or proposed width 9 m. and above in congested area and 12 m. and above in outside congested area

16.2.1 In this zone the following uses, along with their ancillary uses, mix uses may be permitted:

- i) All uses permissible in R-1 shall be permitted in R-2 zone, without restrictions on built-up area.
- ii) Shopping malls, Stores or shops for the conduct of retail business including departmental

stores. Storage and sale of combustible materials shall not normally be permitted except with the special permission of the concerned authority.

- iii) Any activity of Government or semi- Government and of their authorities, including offices, training centres and like uses.
- iv) Personal service establishments: professional offices.
- v) Radio broadcasting stations and studio, telephone exchanges, mobile towers.
- vi) Frozen food lockers, fast food and vending stalls.
- vii) Tailor shops, embroidery shops and button – hole making shops, not employing more than 9 persons with individual motors not exceeding 1 H. P. and total H. P. not exceeding 3.
- viii) Cleaning and pressing establishments for clothes not employing solvents with flash point lower than 1380F machines with dry load capacity exceeding 30 kg and more than 9 persons and provided that total power requirement does not exceed 4 KW;
- ix) Shops for goldsmiths, locksmiths, watch and clock repairs, optical glass grinding and repairs, musical instrument repairs, picture framing, radio and household appliances repairs, upholstery and diamond cutting and polishing not employing, more than 9 persons with individual motors not exceeding 1 H. P. and total H. P. not exceeding 3 H. P.
- x) Coffee grinding with electric motive power not exceeding 1 H.P.
- xi) Bakeries with no floor above not occupying for production and area in excess of 75 sq.m. and not employing more than 9 persons ,provided that the power requirements does not exceed 4KW.
- xii) Printing press as per table of service industries, posters, flex board printing shops.
- xiii) Electronic industry of assembly type (and not manufacturing type)
- xiv) Diamond cutting and polishing; not employing more than 6persons with motive power and exceeding 1/2 H.P.
- xv) Auto part stores and show rooms for motor vehicles and machinery.
- xvi) Sale of used or second hand goods or merchandise (not junk, cotton waste, rage or other materials of offensive nature).
- xvii) Club houses or other recreational activities, conducted as business.
- xviii) Storage of furniture and household goods.
- xix) Repairs to all household articles (excluding auto vehicle).
- xx) Veterinary dispensaries and hospitals.
- xxi) Animal pounds.
- xxii) Repair, cleaning shops and analytical, experimental or testing laboratories not employing more than 15 persons in the industrial activity but not including cleaning and dyeing establishment using a cleaning or dyeing fluid having a flash point lower than 60 degree C. and machines with dry load capacity of 30 kg. for any establishment carrying on activities that are noxious or offensive because of emission of odour, dust, smoke, gas, noise or vibration or other-wise dangerous to public health and safety, provided that the motive power requirement of such establishment does not exceed 10 H. P.
- xxiii) Accessory uses customarily incidental to any permitted principal use including storage space, upto 50% of the total floor area used for the principal use.

- xxiv) Paper box manufacturing including paper cutting, not employing more than 9 persons, with motive power not exceeding 5 H. P. and area not more than 50 sq. m.
- xxv) Mattress making and cotton cleaning, not employing more than 9 persons with motive power not exceeding 3 H.P. and area not more than 50 sq. m.
- xxvi) Establishment requiring power for sealing tin, packages, etc. not employing more than 9 persons, with motive power not exceeding 3 H.P.
- xxvii) Commercial halls, exhibition halls, community halls, welfare centre, gymnasias, etc.
- xxviii) Air-conditioned Cinema theatres & Multiplex.
- xxix) Art galleries, aquariums;
- xxx) Museums in independent structures or restricted to ground floors or on first floor in a stilted building;
- xxxi) Research, experimental and testing laboratories not involving any danger of fire or explosion nor of any noxious nature and located on a site not less than 4 Ha. in area and when the laboratory is kept at least 30 m. from any of the boundaries of the site and the necessary residential buildings 30 m from the laboratory.
- xxxii) Restaurants, eating houses, cafeteria, ice - cream and milk bars.
- xxxiii) Establishment for preparation and sale of eatables not occupying for production an area in excess of 75 sq. m. per establishment and not employing more than 9 persons. Sugarcane and fruit juice crushers not employing more than 6 persons with 1.5 H.P. with area not more than 25 sq.m. shall also come under that sub regulation
- xxxiv) Repairing garages not employing more than 9 persons and 2 H.P. motive power in the industrial activity with no floor above.
- xxxv) Battery charging and repairing, not employing more than 6 persons with an area not more than 25 sq.m. and not more than 2 chargers with power not exceeding 5 KW.
- xxxvi) Photographic studios and laboratories with not more than 50 sq. m. area, not employing more than 9 persons and not using power more than 3 H. P.
- xxxvii) Showroom for Distribution and sale of LPG;
- xxxviii) Coal and Firewood Shops.
- xxxix) Group medical centres, Polyclinics, on separate floors, preferably ground floor, pathology laboratories.
- xl) Residential Hotels, Boarding and Lodging shall be permitted in independent building or parts of building, but on separate floors.

 - g) **Auditorium/Drama Theatre** - In addition to Auditorium, Drama theatre / natyagriha, art gallery, exhibition hall, library, small restaurant to the extent of 20 sq.m. (for every 4000 sq.m. reservation area) and allied users such as guest rooms for the artists may be permitted.
 - h) **Primary School /High School** – Respective uses with their lower / ancillary uses along with canteen and ancillary uses including staff quarters, hostels.
 - i) **Hospital / Maternity Home, etc.** – Respective uses with their lower / ancillary uses and any sort of medical facilities alongwith ancillary construction such as staff quarters, chemist shop, restaurant, ATM, PCO, cyber café of not more than 20 sq.m., etc. and sleeping accommodation for guests in case of bigger hospitals of built up area not less than 2000sq.m. may be permitted.
 - j) **Slum Improvement Zone** – It shall be developed for slum rehabilitation as per regulations of Slum Rehabilitation Authority.
 - k) **Truck Terminus** – In addition to minimum 60% area for parking of trucks, ancillary office restaurant, hotel, motel, lodging facility for drivers, petrol pump, auto repair centre, auto service centre, shops for auto spare parts, shops for daily needs, ATM, PCO, primary health centre / first aid centre and provision for loading-unloading may be permitted. Moreover, these reservations may also be developed for bus stand, bus-MRT interchange with mall.

Bus Stand/Metro station/PMPML/Transport Hub-In addition to respective purpose, bus-metro reservation may interchange along with other ancillary uses.

Provided further that, the Municipal Corporation may accommodate, on the willingness of, the

owners/ occupants residing in the existing building/s on reserved area, on the same land on any upper floor of the proposed building.

- m) **Fire Brigade Station** – fire brigade station along with allied activities.
- n) **S.T.P., Municipal Solid Waste Facility, Water Works**– respective use with allied activities and interchangeability among one another.
- o) **Parking** – Parking with necessary allied activities.

Provided further that, the Municipal Corporation may accommodate, on the willingness of, the owners/ occupants residing in the existing building/s on reserved area, on the same land on any floor of the proposed parking building.

- p) **Public Amenity**- any amenity, along with ancillary use on the lines mentioned above.
- q) **Municipal Purpose** - any public purpose related with functioning of Municipal Corporation as may be decided by the Municipal Commissioner.
- r) **Cremation Ground / Burial Ground** - respective use with allied activities and interchangeability among one another.
- s) **Other reservations**- other reservations may be developed for the respective purposes along with ancillary use.
- t) **Multipurpose Ground** - Users permissible in sites reserved for Multi-purpose ground
 - i) Playground
 - ii) Exhibition ground
 - iii) Festival fairs, ceremonies, religious functions etc.
 - iv) Circus
 - v) Social gathering , public speeches
 - vi) Cultural activities like Kalagram etc.
 - vii) Music Concerts etc.
 - viii) Institutional programs
 - ix) Touring Talkies
 - x) Govt. or semi-government organisation functions.
 - xi) Parking.

The above uses shall be permissible on site of Multipurpose ground subject to NOC required from police department, fire brigade department and traffic department's requisite approval. In addition to above the Municipal Commissioner may add or alter the above list from time to time. No permanent construction shall be permissible in this reservation.

General Note:-

The permissible FSI and the maximum permissible loading limit for above uses in reservation shall be as permissible for residential zone, if not specified otherwise.

PART - IV
GENERAL BUILDING REQUIREMENTS -
SETBACK, MARGINAL DISTANCE, HEIGHT AND PERMISSIBLE FSI

17.0 GENERAL

Following regulations for congested area shall be applicable for the lands included in congested area as shown on the plan. For the areas outside congested area in the development plan regulation for outside-congested area shall apply.

However, in congested area, if the original land holding is more than 0.40 Hectare, then regulations of non-congested area, except FSI, shall apply. FSI in such cases shall be as per the Regulation No.17.1.1

17.1 REGULATIONS FOR CONGESTED AREA

17.1.1 Residential Buildings/ Residential Buildings with mix-use

(a) **Floor Space Index:** - The maximum permissible basic floor space index , permissible TDR loading and additional FSI on payment of premium shall be as per the following table. There is no priority fix to allow additional FSI or TDR.

Table No.5					
Sr.no.	Road width in meter	Basic FSI	Additional FSI on payment of premium	Maximum permissible TDR loading	Maximum building potential on plot
1	2	3	4	5	6
1	Below 9.0 m.	1.50	--	--	1.50
2	9.00 m. and upto 12.00 m.	2.00	--	--	2.00
3	12.00 m. and upto 18.00 m.	2.00	0.25	--	2.25
4	18.00 m. and upto 24.00 m.	2.00	0.25	0.25	2.50
5	24.00 m. and upto 30.00 m.	2.00	0.25	0.50	2.75
6	30.00 m. and above	2.00	0.25	0.75	3.00

(b) **Front Marginal distances-** The minimum front setback from the existing or proposed road/roads shall be as under.

Sr. No.	Road width	For Residential building	For Residential Buildings with mix-use
(i)	For streets/lane less than 4.5 m. width	2.25m. from the centre of the street/ lane	2.25m. +1.50 mt. from the centre of the street/lane
(ii)	For streets 4.5m. to less than 6.00 m. in width	NIL	1.50 m.
(iii)	For streets 6.00 m. to less than 12 m. in width	1.50 m.	2.00 m.
(iv)	For streets 12 m to less than 18 m. in width	1.50 m	2.25 m.
(v)	For streets 18 m & above in width	1.50 m	2.25 m.

- (c) For the lanes having width less than 4.5m. abutting to any side of plot, a setback of 2.25m. from the centre of lane shall be provided to make such lane 4.5m. wide. No any projections shall be permissible on such widened lane width.
- (d) All other regulations excepting FSI and its maximum loading limit, marginal distances as prescribed above, shall be applicable for development permission in congested area.
- (e) In R-2 zone, for buildings having shops /commercial user on any floor, 50% of front marginal distance shall be made available exclusively for the pedestrians.
- (f) **Height-** Above set back and marginal distances shall be applicable for buildings less than 15 m. in height. Marginal distances shall be increased by 1m. for buildings having height 15 m. and more but less than 24 m. For building having height 24 m. and more, marginal distances shall be as per regulations of non-congested area.

17.1.2. Other buildings like Public semi-public, Educational, Medical, Institutional, commercial, Mercantile, etc.

- (a) Floor Space Index – Maximum FSI permissible shall be as per the table under regulation no.17.1.1 and subject to payment of premium as decided by Government from time to time.
- (b) Marginal Distance - For these buildings marginal distances shall be 3 m. on all sides including front margin.
- (c) For buildings having height more than 24 m., regulations of outside congested area shall apply for front, side and rear marginal distances.

Provided also that, for buildings like cinema theatre, multiplex, assembly buildings, shopping malls, regulation of outside congested area, except FSI, shall apply.

17.2 REGULATIONS FOR OUTSIDE CONGESTED AREA.**17.2.1 Marginal Distances for Residential Buildings Height 15 mt. and Below.**

The provisions for minimum marginal distances as given in **Table No.6** below shall apply for the Residential buildings, Residential with mix uses permissible in non-congested areas and ancillary Residential buildings permissible in industrial zones having height upto 15 m. and below.

Sr. No.	Description of the road	Min Plot Size in Sq. m.	Min width of plot in meter	Min set back from road side in meter	Min. side margins in meter	Min. rear margins in meter	remarks
1	NH/SH	450	15	6.0 mt. for NH and 4.5 m. for SH or as specified by Highway rule whichever is more	3.0	3.0	--
2	MDR/ODR	450	15	6.00 mt. or as specified by Highway rule whichever is more	3.0	3.0	--
3	Roads 24 meters and above	300	12	4.50 mt for residential & 6.00 m. for residential with mix use	3.00	3.0	--
4	Roads of width below 24 m and upto 18 m.	250	10	4.50 mt for residential & 6.00 m. for residential with mix use	3.00	3.0	--
5	Roads of width below 18 m. and upto 15 m.	250	10	3.00 mt for residential & 4.50 m. for residential with mix use	2.25	2.25	--
6	Roads of width below 15 m. and above 9 m.	150	8	3.00 mt for residential & 4.50 m. for residential with mix use	1.50 (in case of semi-detached building, only one side open space shall be permissible)	1.50	Side and rear margins shall be 2.25 m. for building more than G+2 or stilt + 3 structure

7	Road of width upto 9 mt.	100	7	3.00	1.50 (in case of semi-detached building, only one side open space shall be permissible)	1.50	--do-
8	Row Housing on roads of 12 mt. and below	30 to 125	3.50	2.25	0.00(In case of corner plot, 1.50 or building line of adjoining road whichever is more)	1.50	Side and rear margins in this row only for G+1 or stilt + 2 structure
9	Row Housing for EWS/LIG/Slum Up gradation etc. by public authority.	20 to 50	3.00	0.90 mt from pathway or 2.25 mt from road boundary	0.00(In case of corner plot, 1.50 or building line of adjoining road whichever is more)	0.90m	Side and rear margins in this row only for G+1 or stilt + 1 structure

Note-

- (1) Higher height may be permitted subject to marginal distance mentioned in Regulation No.17.2.3.
- (2) The minimum area of plots fronting on service roads along highways shall be with reference to the width of service road.
- (3) For semidetached buildings, side margin shall be on one side only.
- (4) Row-housing plots at the junction of two roads shall be larger to maintain the setback from both roads. Not more than 12 and not less than 3 plots shall be allowed in each block of row housing. Each block shall be separated from the other by 6 m. road or 6 m. side margin distance of the plot or space including side marginal distance of the plot.
- (5) No garage shall be permitted in a building having stilt or basement provided for parking.
- (6) Construction of ottas, railings, barricades or supporting columns for canopy or porch shall not be allowed in front marginal distances. However, steps may be permitted within 1.2 m. from the building line. Also supporting columns for canopy or porch may be allowed within building line.
- (7) In no case ribbon development rules shall be relaxed without consent of the Highway Authority.
- (8) In case of special building, marginal distances shall be as per said regulations.
- (9) The plot width to depth ratio shall be 1:1.5 to 1:2.5, as far as possible in case of plotted layout development permission.

In Public Housing Schemes for E.W.S. undertaken by government or semi-government organizations,

marginal distances shall be as per their respective schemes and rules.

- (11) The front setback set-out in already approved and partially developed layouts / schemes, may be retained as per said approval, so as to maintain the building line.
- (12) The pattern of development like semi-detached, row housing, etc. in already approved layout shall be as per said approved layout.
- (13) Where commencement certificate is granted prior to publication of draft development plan and the said plot is affected by new road proposed in the development plan, then front margin stand relaxed to that extent.

17.2.2 Other Buildings: The Provision as given in Table No.7. below shall apply for different categories of other buildings.

Table No.7				
Sr. no.	Type of building	minimum road width required	Minimum marginal distances	Other stipulations
1	2	3	4	5
1	Medical buildings			
	a) Hospital, Maternity Homes, Health Club, Public Semi-public buildings being special building	12 m.	6 m. on all sides	Other requirements shall be as mentioned in the table no.20 of regulation no.24.1
	b) Hospital, Maternity Homes, Health Club, Public Semi-public buildings not being special buildings	12 m.	Margins as per Table no 6.	Other requirements shall be as mentioned in the table no.20 of regulation no.24.1
	c) Clinics on plot upto area 300 sq.m.	9 m.	Margins as per Table no 6..	
2.	Educational buildings			
	a) Pre-primary School	6m.	Margins as per Table no 6.	Other requirements shall be as mentioned in the table no.20 of regulation no.24.1
	b) Primary School	9m.	4.5m. on all sides	
	c) Other Educational Buildings	12 m.	6.00 m. on all sides	
3.	Cinema Theatre/ Drama Theatre/ Assembly Hall/ Multiplex / Shopping Malls	15 m.	Front – 12 m. (only on one major road) Remaining 6 m. on all sides	Construction of Cinema Theatre/Multiplex shall confirm to the provisions of Maharashtra Cinema (Regulations) Rules, 1966 and as amended from time to time.

4.	Mangalkaryalaya like buildings	12 m.	Front – 12 m. (only on one major road) Remaining 6 m. on all sides	
5.	Petrol/Fuel Filling Stations with or without service bays	12 m.	6.00 m. on all sides	1) Fuel filling station shall not be permitted within a distance of 90 meter from the nearest gate of school, hospital and theatre, place of assembly or stadium. 2) In the case of kiosks and other buildings for sales office, snack bars etc. within the plot for fuel filling stations, the setbacks from the boundaries shall be 4.50 m. Further the other clearances for the installations shall be as per the Petroleum Rules of 1937.
6.	Mercantile/ Business/ hotel/ Commercial/ mix use with residential buildings.	12	Front 6.00 m. Side & rear 4.5 m.	i) Shops may also be allowed fronting side and rear margins. ii) Minimum area of Shops shall be 6 Sq.mt with a minimum width of 2.00 m.
7.	Stadium / Pavilion	12	6 m. on all sides	Covered portion shall not exceed 20 % of plot area. The spectators' gallery of the stadium shall not be counted towards FSI. Shops below spectator's gallery may be permissible.

NOTE:

- i) In case of plots fronting on National Highway, State Highway and Major District Roads, the building line shall be as per Ribbon Development Rules as given in Table above, whichever is more.
- ii) Side and rear marginal distances mentioned in above Table shall be subject to Regulation No.17.2.3, whichever is more.
- iii) In case of special building, marginal distances shall be as per said regulations.

17.2.3 Marginal distances for Buildings of Higher Heights**(a) Front Margin - Front margin shall be as given below with reference to height of building**

i)	Height above 18 m. & upto 24 m.	4.5 m and 6.00 m. for residential with mix use
ii)	Height above 24 m. & upto 36 m.	6.0 m.
iii)	Height above 36 m. & upto 50 m.	9.00 m.
iv)	Height above 50 m. & upto 70 m.	12.00 m.
v)	Height above 70 m. & upto 100 m.	14.00 m.
v)	Height above 100 m.	16.00 m.

Provided that, in case of group housing scheme where building abuts on internal road, the minimum 3.0 m. set back from internal road or distance between two buildings whichever is more shall be provided. For Development plan road or classified road or through road, passing through Group Housing Scheme, the setback as prescribed in the regulations shall be provided.

(b) Side or rear marginal distance - Side or rear marginal distance in relation to the height of the building for light and ventilation shall be as below

The marginal distance on all sides shall be as per **Table No.6** for building height 15.0 m. and below. For height more than 15.0 m., the marginal distance on all sides except the front side of a building shall be minimum $H/4$ (Where H = Height of the building above ground level) subject to a minimum of 3.0 m. for residential building, 4.5 m. for commercial building and 6.0 m. for special building mentioned in definition no. 2.77.13. Provided that such marginal distance shall be subject to maximum of 16.0 m. If the land owner wishes to keep higher margins he may be allowed to do so.

Provided further that the building height for the purposes of this regulation and for calculating the marginal distances shall be exclusive of height of parking floors upto 6.0 m.

Provided also that, for building having shops / commercial user on any floor, 50% of front marginal distances shall be made available exclusively for pedestrians.

(c) Provision for Step Margin: - Step margins may be allowed to be provided on upper floor at height 24 m. and above to achieve required marginal distances as mentioned in these regulations subject to structural stability and fire protection norms as prescribed from time to time. If building height 24 m. and above minimum side margin at ground level shall be 7.5 m. and if building height 50 m. and above the minimum side margin shall be 9.00 m. In congested area minimum side margin at ground level shall be 6.00 m.

17.2.4 In case of layout of two or more buildings of any users:-

i) Distance between two buildings- The distance between two buildings shall be the side/rear marginal distance required for the taller building between the two adjoining buildings.

ii) Provided that, the path way / internal road may be allowed to be proposed in such marginal distance by keeping 3.0 m. distance on both side from such internal road.

Provided also that, where rooms do not derive light and ventilation from the exterior open space, the distance between the two buildings may be reduced by 1 m. subject to a minimum of 3 m. (if necessary 6.0 m. in case of special building) and maximum of 8.0 m. No projections shall be

permitted in this exterior space.

17.2.5 In case of group housing scheme where building abuts on internal road, the minimum 3.0 m. set back from internal road or distance between two buildings whichever is more shall be provided. For Development plan road or classified road or through road, passing through Group Housing Scheme, the setback as prescribed in the regulations shall be provided.

17.2.6 Buildings Abutting Two or More Streets

When a Building abuts two or more streets, the setbacks from the streets shall be such as if the building is fronting on each such street

17.3 PERMISSIBLE FSI:-

Permissible basic FSI, additional FSI on payment of premium, Permissible TDR Loading on a plot in non-congested area for **Residential and Residential with mix uses** shall be as per the following Table No.8

Sr.no.	Road width in meter	Basic FSI	Additional FSI on payment of premium	Maximum permissible TDR loading	Maximum building potential on plot
1	2	3	4	5	6
1	Below 9.0 meter	1.10	—	--	1.10
2	9.00 meter and upto 12.00 meter	1.10	0.30	0.40	1.80
3	12.00 meter and upto 18.00 meter	1.10	0.50	0.65	2.25
4	18.00 meter and upto 24.00 meter	1.10	0.50	0.90	2.50
5	24.00 meter and upto 30.00 meter	1.10	0.50	1.15	2.75
6	30.00 meter and above	1.10	0.50	1.40	3.00

Note-

- For the other Non-Residential Buildings (except Residential and Residential with mix uses), the basic FSI for such type of buildings shall be 1.25.
- Additional FSI upto 0.20 on payment of premium shall be allowed for the redevelopment of Authorised Residential buildings on roads having width below 9 mt., subject to condition that the construction/redevelopment shall be allowed only if the building is more than 30 years old.
- Maximum permissible building potential on plot mentioned at column no.6 shall be exclusive of FSI allowed for Inclusive Housing as per Regulation No.15.6. There is no priority fix to utilise FSI or TDR as mention in Col 4 and 5. Other conditions of TDR utilisation shall be applicable as per the TDR Regulations No 22.

- iv) The restrictions of road width mentioned above shall not be applicable in cases where, the permissible FSI is more than the basic FSI in various schemes such as, slum rehabilitation scheme, redevelopment of dangerous buildings, cluster development for core area, redevelopment of MHADA buildings, MRTs and BRTs routes, etc.
- v) The maximum limits of FSI prescribed above shall be applicable to fresh permission and also to an existing building which has not been granted full occupation certificate but subject to production of stability certificate from structural engineer in respect of such existing building. However, in no case the rights of the flat owner / unit holders shall be adversely affected.
- vi) **Premium** - Rate of premium for the additional FSI as mentioned in column no 4 above shall be decided by Government from time to time. The premium collected shall be shared 50:50 between State Government & Corporation respectively. The premium of the Government shall be deposited by the planning authority in a Government head account.
- vii) The Municipal Commissioner shall deposit the amount collected through the charges for premium in a separate development fund called as "Pune Infrastructure fund" and shall utilize the same only for the purpose of developing new/ up-gradation of infrastructure as well as implementation of Development Plan proposals and creation of civic amenities.

17.4 INDUSTRIAL BUILDINGS

Minimum plot area, marginal space, Permissible FSI, Additional FSI with payment of premium for industrial building shall be as per the Table No 9 given below:-

Minimum plot area, marginal space, Permissible FSI-

Table No. 9						
Sr. No.	Min. road width	Plot Size in sq.m.	Basic Permissible FSI	Additional FSI on payment of premium	Min. Front Margins	Min. Side & Rear Margins
1	2	3	4	5	6	7
1	12m.	Upto1000	1.10	0.50	4.50	3.00
2	12m.	1001 to 5000	1.10	0.50	6.00	4.50
3	12m.	5000 and above	1.10	0.50	9.00	6.00

Note-

- i) In case of plots fronting on National Highway, State Highway and Major District Roads, the building line / control line shall be as per Ribbon Development Rules as given in Table above, whichever is more.
- ii) Front, side and rear marginal open spaces shall be as per above Table.
- iii) Minimum and maximum height shall be 3.60 m. & 4.2 m. respectively for industrial buildings. The greater height may be permitted as per the requirement.
- iv) In addition of provisions of these regulations, regulations prescribed under Factory Act shall be applicable.

- v) **Premium** - Rate of premium for the additional FSI as mentioned in column no 5 above shall be decided by Government from time to time. The premium collected shall be shared 50:50 between State Government & Corporation respectively. The premium of the Government shall be deposited by the planning authority in a Government head account
- vi) **Buffer zone**-For construction of industrial building, buffer zone of 23 m. wide shall be left from residential or incompatible zone, wherever necessary. Such buffer zone shall be part of sizable required recreational open space. Roads and marginal distance is may also be treated as a part of Buffer Zone. However, area of such buffer zone shall be counted in gross area for computation of FSI. Where green belt is shown in development plan between residential and industrial zone, area of such green belt shall be counted in gross area for calculation of FSI. Provided also that marginal distance for a building shall not be exclusive of buffer zone. The floor height for industrial building shall be as per requirement.

17.5 FSI of Green Belt

FSI of the green belt zone shown on the development plan may be allowed on remaining land of the owner by counting area of green belt in gross area of plot subject to condition that the area shall always be under tree cover. The owner shall plant trees in this area with proper planning at the rate of minimum 100 trees per hectare and should have been survived for atleast one year prior to issuance of occupation certificate.

Provided that, such FSI shall not be allowed if such green belt area is included in recreational open space to be left as per regulation no. 15.3.5

17.6 Permissible Structures / Projections in marginal open spaces/ distances

The following projections shall be permissible in marginal distances:

(a) **Projections into distances:** - Every open space provided either interior or exterior shall be kept free from any erection thereon and shall be open to the sky and no cornice, chajja, roof or weather shade more than 0.75 m. wide shall overhang or project over the said marginal distances so as to reduce the width to less than the minimum required. However, sloping/horizontal chajja provided over balcony/ gallery etc. may be permitted upto balcony projections at horizontal level.

(b) **Balconies** - as specified in regulation no 18.13

(c) **A canopy** not exceeding 5m. in length and 2.5 m. in width in the form of cantilever and unenclosed over the main entrance providing a minimum clear height of 2.40 m. below the beam bottom of canopy. The canopy shall not have access from upper floors (above floors), for using as sitting out place. There shall be a minimum clearance of 1.5 m. between the plot boundaries and canopy. Provided that, more than one canopy may be allowed in case of special buildings, as per requirement.

(d) **A projection** of maximum 30 cm. on roof top terrace level may be allowed throughout the periphery of the building. In case of pitched roof projection of maximum 45 cm. at rooftop terrace level throughout periphery of the building shall be allowed.

(e) **Accessory buildings:-** The following accessory buildings may be permitted in the marginal open spaces :-

- i) In an existing building where toilet is not provided, a single storeyed toilet subject to a maximum area of 4.0 sq. m. in the rear or side open space and at a distance of 7.5 m. from the road line or the front boundary and 1.5 m. from other boundaries may be permissible. The Commissioner may reduce 1.5 m. margin in exceptional cases to avoid hardship.

ii) Parking lock up garage not exceeding 2.4 m. in height shall be permissible in the rear corner of the plot with independent bungalow. Parking lock up garage when attached to main building shall be 7.5 m. away from the road line and shall be of such constructions giving fire resistance of 2 hours. The area of sanitary blocks and parking lock up garage shall be taken into account for the calculation of FSI.

iii) Suction tanks, soak pits, pump room(maximum 10 sq.m.), electric cabin of sub-station of gen-set area, electric meter room as per requirements, garbage shaft for wet and dry garbage separately with collection chamber, space required for fire hydrants, electrical and water-fittings, water tanks, dustbins etc.

iv) One watchman's cabin / booth not more than 5 sq. m. in built up area having min. 1.80 m. width or diameter. Cabin / booth shall be as per as possible at the entrance to the campus.

Note :- When a building abuts falling on three or more roads then above mentioned user, except (iv), shall be permissible in front setback facing the smaller road of less important from traffic point of view.

f) "Ramp" for basement in side and rear marginal distances subject to provisions under these regulations.

g) Fire escape staircase of single flight not less than 1.2 m.

h) Staircase mid-landing of 1.2 m. width with clear minimum headway of 2.1 m. below the mid-landing. However, clear distance from edge of landing to the plot boundary shall not be less than 1.8 mt.

i) Architectural projections - Architectural projections upto 1m. which will not reduce the side marginal spaces by 3 m., sky signs and Hoardings as per the policy approved by the Municipal Commissioner.

j) Construction of ottas, railings, barricades or supporting columns for canopy or porch shall not be permitted within the minimum required front marginal distances. However, steps may be permitted within 1.2 m. from the building line.

k) Supported double height terraces (within the building line) as mentioned in regulation no.18.26

17.7 Exclusion of structures / projections for FSI calculation

- i) Structures/ Projections /features / ornamental projection of glass façade permitted in marginal open spaces as mentioned in Regulation No.17.6 (a),(b),(c),(d) , (e)(iii), (f), (g), (h),(i), (j) (k).
- ii) Stilt / Multi-storied floors /podium/ basement used as parking including passage therein.
- iii) Areas covered by Porches, Entrance lobby / foyer, canopies, Air conditioning plant rooms, lift well, machine room and service floor of height not exceeding 1.8 m. for hospitals, shopping malls, plazas and Star category hotels (rating with three stars and above) on payment of premium as may be decided by the Commissioner.
- iv) Area of structure for an effluent treatment plant as required as per the requirements of the Maharashtra Pollution Control Board or other relevant authorities.
- v) Rockery, Well and well structures, plant, Nursery, Water pool platform around a tree, Fountain bench, Chabutara with open top and unenclosed sides, Ramps, Compound wall, Gate slide / swing, Steps outside the buildings, Domestic working place (open to sky), Overhead water tank on top of the building, Stair Case, Refuge area for high rise buildings as specified in

Regulation No. 18.28.6

- vi) Telecommunication tower, antenna and allied activities.
- vii) Atrium in shopping malls, public buildings on payment of premium as may be decided by the Commissioner..
- viii) Open to sky swimming pool of the top terrace and top most podium.
- ix) Structures permissible in recreational open space as per regulation No.15.3.7

17.8 Interior & Exterior chowk

17.8.1 (a) Interior chowk: Wherever habitable rooms or kitchen derives ventilation from inner chowk or interior open space, the size of such interior open space shall not be less than 3m. x 3m. upto height of 18m. and for height more than 18m., the interior open space shall not be less than H/6 m. x H/6 m. where H = height of highest wall of the chowk.

(b) Exterior chowk: The minimum width of the exterior chowk for the purpose of light and ventilation, shall not be less than 2.4 m. and depth shall not exceed 2 times the width, for buildings upto 17m. height and for height more than 17m., the exterior open space shall not be less than H/7 m. x H/7 m. where H = height of highest wall of the chowk. If the width of the exterior chowk is less than 2.4 m. it shall be treated as a notch and shall not be considered for deriving ventilation.

However, for (a) and (b) above maximum distance shall be subject to the maximum limit prescribed for distance between two buildings.

17.8.2 Where only water closet, bathroom, combined bathroom and water closet are abutting on the interior open space, the size of the interior open space shall be in line with the provision for ventilation shaft as given in Regulation no.18.15.3

17.9 Height of Building

17.9.1 (a) Height of building is allowed to the extent that is required to consume the maximum building potential on plot as given in the table under regulation no. 17.1 & 17.3 , subject to other restrictions as per these regulations, and prior approval of Chief Fire Officer, Pune Municipal Corporation, if required under this regulation.

Notwithstanding anything contained in these regulations, for the building having height more than 36.0 mt., the minimum road width shall be **12.0 mtr.** and for building having height equal to or more than 50.0 m., the minimum road width shall be **15.0 mtr.**

(b) The height restriction in Koregaon Park Area shall be as per special regulations applicable in Koregaon Park Area annexed in **Appendix- M**

(c) Notwithstanding anything contained in this regulation height of building shall not be more than 21 m. in following area. This height may be relaxed by Government in special cases.

i) Parvati - Area bounded by Singhagad Road on the north, Singhagad Road on the west, Southern boundary of P.L. Deshpande Udyan on the south, and Road from over bridge upto Laxminagar and western boundary of Tulsibagwale Colony in S. No. 89, 90 etc. of Parvati on the EAST

ii) Chatushrungi - S. Nos 105, 106 pt, 107 pt etc. of village Bhamburda.

Area bounded by Ganesh-khind Road on the North, Senapati Bapat Road on the east, S.No. 106-South boundary on the south, Western boundary of S. Nos. 107,105,106 - on the west .

17.10 Height Exemptions -

The appurtenant structures such as roof tanks and their supports, ventilating, air-conditioning, lift rooms and similar service equipment, stair cover, chimneys and parapet walls and architectural features not exceeding 1.20 m. in height and **Stilt Parking floors not exceeding 6.0 m in height**, shall not be included in computation of height of building for the purposes of marginal distances only.

17.11 High Rise Committee

a) For the buildings **height 70 mt. and more**, the building approval proposal shall be cleared from the High Rise Committee. The structure of the Committee is as under. However the **High Rise Committee** constituted by the Government vide resolution no TPS-1812/35/17/CR-68/12/UD-13/Dated 25/06/2015 shall be in force till the constitution of committee under this Regulation.

S. No.	Members	Post
1	Divisional Commissioner Pune Division, Pune	Chairman
2	Joint Director of Town Planning, Pune Division, Pune	Member
3	Chief Architect, Public works department to Govt. of Maharashtra	Member
4	Head of Department Structural Engineering, Govt. College of Engineering Pune	Member
5	Head of Department, Soil Mechanics, Govt. College of Engineering Pune	Member
6	Environmental Expert, Nominated by the Government	Member
7	Chief Fire Officer, Pune Municipal Corporation, Pune	Member
8	City Engineer Pune Municipal Corporation, Pune	Member Secretary
9	Structural Engineer of the concerned project	Invitee

b) Terms of Reference

- 1) The committee shall be of advisory nature and it will advise the Municipal Commissioner regarding the feasibility of development proposals that might be referred to it by the Commissioner.
- 2) In specific case, if the chairman desires, any expert from any fields may be invited for the meeting of the committee.
- 3) The Committee shall ensure that all such high rise building shall be planned, design and constructed as mentioned in the National Building Code of India, amended from time to time. Further such buildings shall also be planned, designed and constructed to ensure fire safety, structural safety, wind resistance and this shall be done in accordance with the provisions of the Maharashtra Fire Prevention and Life Safety Measures Act, 2006 as amended from time to time and requirements given in Part IV of National Building Code, 2005.

In addition to the above, the Committee may insist to provide suitable protection measures.

c) Building proposals to be referred to the Committee-

- 1) All new building proposals where the height of the proposed buildings from ground level exceed 70 meters shall be referred to the committee.
- 2) Apart from (1) above, any new building proposal, in the opinion of the Commissioner, which inter-alia involves major disturbance of and/or intervention to the existing natural land Formation and profile as also substantial reclamation may also be referred to the Committee.
- 3) The building proposals for which slenderness ratio (Ratio of minimum width of building to the height of the building) is more than 1:9 shall be in variably submitted to the committee.
- 4) In cases where the Corporation has issued IOD/approved plans / amended plans of building covered under serial no. (1) to (3) above before issue of this resolution, then such cases need not be referred to the Committee

d) Other Conditions

- 1) The Corporation shall render necessary help for functioning of the Committee i.e regarding provision of place for meetings, secretarial assistance, etc.
- 2) The Official members of the Committee (excluding officers of Corporations) shall be paid honorarium for their tenure as decided by the Municipal Commissioner.
- 3) The Commissioner shall levy additional scrutiny fee for such building proposal as decided by him
- 4) The Committee shall offer their remarks on such building proposals referred to it within a period 45 days from the date of receipt of the proposals.
- 5) It is mandatory for all the high rise buildings to comply with the Structural Design and Stability and Fire Safety norms.

17.12 Special Regulations for Koregaon Park area

Notwithstanding anything contained in these regulations, the development in Koregaon Park area shall be subject to special regulation mentioned in **Appendix-M**

PART- V
REQUIREMENTS OF PARTS OF BUILDINGS

18.0 This part sets out the standard space requirements of various parts of building, light and ventilation, the building services, fire safety, etc. The following parts of a building, wherever present, shall conform to the requirements given herein:

18.1 Plinth

18.1.1 i) The plinth of building shall be so located with respect to the surrounding ground level that adequate drainage of the site is assured. The height of the plinth shall not be less than 45 cm above the surrounding ground level. In areas subjected to flooding, the height of the plinth shall be at least 45cm. above the high flood level or greater than 45 cm. as may be decided by the Planning Authority in deserving cases.

18.1.2 Interior Courtyards: Every interior Courtyard shall be raised at least 0.15 m. above the surrounding ground level and shall be satisfactorily drained.

18.1.3 In the case of special housing schemes undertaken by public agencies for low income group and economically weaker section of society, the minimum height of plinth shall be not less than 30 cm.

18.2 Habitable Rooms

18.2.1 Size and dimension of Habitable Rooms

Internal dimensions and size of rooms for various uses and occupancies shall be as in table no.11 below.

No	Occupancy	Minimum Area in sq. m.	Minimum width in m.
(1)	(2)	(3)	(4)
1	a) Any habitable room in residential building / room from any other occupancy like hostels, residential hotel, lodging & boarding/housing etc except kitchen.	9.5	2.4
	b) Any Habitable room from any other occupancy like hostels, residential hotel, lodging & boarding-houses etc.	9.5	2.4
2	Room in a single – room tenement in Housing scheme for EWS & LIG.	12.5	3.0
3	a) Room in two-room tenements-		
	i) one of the rooms	9.5	2.4
	ii) other room	7.5	2.4
	b) Room in a two-room tenement in Housing scheme for EWS & LIG		
	i) one of the room	9.0	2.5
	ii) other room	6.5	2.1

4	Single bedded room in a hostel of a recognized educational institutions	7.5	2.4
5	a) Shop in R 1 zone	6.0	1.8
	b) Shop in other than R 1 zones	10	2.0
6	Class room in an educational building	38	5.5
7	Institutional building (Hospital)		
	a) Special room	9.5	3
	b) General Ward	40	5.5
8	Cinema Hall, auditorium assembly hall etc.	Inconformity with the Maharashtra Cinema Rules	

Note : Where enclosed balcony area is to be counted in minimum dimensions required for a room, then such enclosed width shall not be more than 1/3 of the dimension of that room.

18.2.2 Height of Habitable Rooms

The minimum and maximum height of a habitable room shall be given in Table No. 12 hereunder:

Table No.12 Height of Habitable Rooms			
No.	Occupancy	Minimum Height (m)	Maximum Height (m)
(1)	(2)	(3)	(4)
1	Flat Roof -		
	a) Any habitable room	2.75	4.2
	b) Habitable room in LIG Housing	2.6	4.2
	c) Air-conditioned habitable room	2.4	4.2
	d) Assembly Halls, Residential Hotels of 3 star category and above, Institutional, Educational, Industrial, Hazardous or storage occupancies, Departmental Stores, Malls, IT Buildings, Office Buildings, Entrance Halls and Lobbies to department stores and assembly halls.	3.6	4.2 Subject to written permission of the Municipal Commissioner greater height may be permitted.
2	e) shops	3.0	4.2
	Pitched roof-		
	a) Any habitable room	2.75	4.2
	b) Habitable room in EWS / LIG Housing.	2.6(average with 2.0 m. at the lowest point)	4.2(average with 3.2 m. at the lowest point)

Provided that -

- i) the minimum head-way under any beam shall be 2.4 m.
- ii) in all occupancies, except those included in serial no. 1 (d) in the Table above, any height in excess of 4.2 m. shall be deemed to have consumed additional FSI of 50 % of the relevant floor area.

18.3 Kitchen

18.3.1 Kitchen size -

- i) The area of the kitchen where separate dining area is provided shall be not less than 5.5sq.m. with a minimum width of 1.8m, where a kitchen, which is intended for use as a dining area also, shall have a floor area of not less than 7.5 sq.m. with a minimum width of 2.1m.
- ii) In case of special housing scheme, undertaken by public agencies for low income group and economically weaker section of the society, the size of a cooking alcove serving as cooking space shall not be less than 2.4sq.m. with a minimum width of 1.2m.. The size of individual kitchen provided in a two-roomed house shall be not less than 3sq.m. with a minimum width of 1.5 m.

18.3.2 **Height:** The room height of a kitchen measured from the surface of the floor to the lowest point in the ceiling (bottom of slab) shall not be less than 2.75 m.

18.3.3 **Other Requirement:** Every room to be used as kitchen shall have-

- i) unless separately provided, means for the washing of kitchen utensils which shall lead directly or through a sink to grated and trapped connection to the waste pipe;
- ii) an impermeable floor;
- iii) a flue, if found necessary,
- iv) window of not less than 1 sq.m. in area, opening directly on to an interior or exterior open space, but not into a shaft and
- v) refuse chutes, in the case of High Rise residential buildings more than 15 m. in height.

18.3.4 **Requirements regarding pantry:-**

A pantry shall have –

- i) A floor area of not less than 3 sq.m. with the smaller side not less than 1.4 m.
- ii) A sink for the cleaning of kitchen's utensils which shall drain through a grated and trapped connection to the waste water pipe where water borne sewerage system is not available and the grated connection shall be made to the pucca surface drain leading to soak pit. or other approved system of disposal; and
- iii) An impermeable floor and an impermeable ddo 0.9 m. high.

18.4 Bath Rooms, Water Closets, Combined bath room and water closet

18.4.1 Size of bathroom and water closet -

- i) The size of a bathroom shall be not less than 1.8 sq.m. with a minimum width 1.2 m. The size of a water closet shall be not less than 1.10 sq.m with a minimum width of 0.9m. The minimum area of a combined bathroom and water-closet shall be 2.8 sq.m. with a minimum width of 1.2 m.
- ii) In the case of EWS/LIG housing scheme the sizes of bathroom and water-closets shall be as follows:-

- a) The size of independent water-closet shall be at least 0.90sq.m. with minimum width of 0.9m.
- b) The size of independent bathroom shall be at least 1.20sq.m. with a minimum width of 1.00m.
- c) The size of combined bathroom & water-closet shall be atleast 1.80sq.m. with minimum width of 1.0m.

18.4.2 Height:- The Height of a bathroom or water closet measured from the surface of the floor to the lowest point in the ceiling (bottom of slab) shall be not less than 2.1 m.

18.4.3 Other Requirements - Every bathroom or water closet shall -

- i. be so situated that at least one of its walls shall open to external air,
- ii. not be directly over or under any room other than another water-closet, washing place, bath or terrace, unless it has a water-tight floor,
- iii. have platform or seat made of water-tight non-absorbent material;
- iv. be enclosed by walls or partitions and the surface of every such wall or partition shall be finished with a smooth impervious material to a height of not less than 1 m. above the floor of such a room.
- v. every water closet and/or a set of urinals shall have a flushing cistern of adequate capacity attached to it. In EWS/LIG housing, however, no such flushing cistern need be provided,
- vi. be provided with an impervious floor covering sloping towards the drain with a suitable grade and not towards veranda or any other room,
- vii. in High Density housing, pour flush water seal latrines (NEERI type) may be permitted when the sewerage system is not available and the water table in the area is not high.
- viii. all the sewerage outlets shall be connected to the sewerage system. Where no such systems exist a septic tank shall be provided within the plot conforming to the requirements of Regulation No.41.30.
- ix. have a window or ventilator, opening to a shaft or open space, of area not less than 0.3sq.m. with side not less than 0.3m.

18.4.4 Restriction on use of room containing water closet.

No room containing water closets shall be used for any purpose except as a lavatory and no such room shall open directly into any kitchen or cooking space by a door, window or other opening. Every room containing water closet shall have a door completely closing the entrance to it.

18.5 Ledge or Tand / Loft :-

Location and extent - Lofts may be provided over kitchen, habitable rooms, bathrooms, water closets, and corridor within a tenement in residential buildings, over shops and in industrial building, as mentioned in below Table No.13 subject to the following restrictions-

- i) The clear head room under the loft shall not be less than 2.2 m.
- ii) Loft in commercial areas and industrial building shall be located 2 m. away from the entrance.
- iii) Loft shall not interfere with the ventilation of the room under any circumstances.
- iv) The minimum headroom of Ledge or Tand / Loft shall be 2.2m.
- v) The maximum height between loft and ceiling shall be 1.5m.

Sr. No.	Rooms over which Permitted	Maximum Coverage (Percentage to area or room below)
(1)	(2)	(3)
1	Kitchen/Habitable room	25
2	Bathroom, water closet, corridor	100
3	Shops with width up to 3m.	33
4	Shops with width exceeding 3m.	50
5	Industrial	33

18.6 Mezzanine floor

18.6.1 Size of mezzanine floor : The minimum size of a mezzanine floor, if it is used as a habitable room shall not be less than 9.50 sq.m. The aggregate area of the mezzanine floor shall not exceed 50 % of the built up area of that floor.

Note :- Mezzanine floor area shall be counted towards FSI

18.6.2 Height -The minimum height of a mezzanine floor shall be 2.2 mt. The headroom under mezzanine room shall not be less than 2.20 mt.

18.6.3 Other Requirements of mezzanine floor :

A mezzanine floor may be permitted over a room or a compartment provided

- i) it conforms to the standards of living rooms as regards lighting and ventilation in case the size of mezzanine floor is 9.50 sq.m. or more.
- ii) it is so constructed as not to interfere, under any circumstances, with the ventilation of the space over & under it.
- iii) such mezzanine floor or any part thereof will not be used as a kitchen.
- iv) it is at least 1.8 mt. away from front wall of such rooms.
- v) access to the mezzanine floor is from within the respective room only.
- vi) in no case shall a mezzanine floor be closed so as to make it liable to be converted into unventilated compartments.

18.7 Store Room :-

18.7.1 Size :- The floor area of a store room in a residential building where light ventilation and height are provided at standards lower than as required for living room shall not be more than 3 sq. m. One or more store rooms may be allowed considering size of flat. Prayer/Pooja room may be allowed in same manner.

18.7.2 Height- The height of a store room shall not be less than 2.20 m.

18.8 Garage

18.8.1 Size of private Garage :- The size of a garage in individual residential building shall be not less than 2.5 m. X 5 m. and not more than 3 mt. X 6 mt. The garage, if located in the side open space, shall not be constructed within 3.0m. from the main building, but at least 7.5mt away from any access road.

18.8.2 Size of Public Garage. The size of a public garage shall be calculated based on the number of vehicles to be parked.

18.8.3 Height of private Garage :-The minimum and maximum height of garage shall be 2.4 mt. and 2.75 mt. respectively.

18.8.4 Plinth of private Garage :-The plinth of garage located at ground level shall not be less than 15 cm. above the surrounding ground level.

18.8.5 Set back of Private Garage :-

The garage shall setback behind the building line for the street / road on to which the plot abut, and shall not be located affecting the access ways to the building. If the garage is not set-back as aforesaid, the Planning Authority may require the owner or occupier of the garage to discontinue use, of premises or to take such other measures as the Planning Authority may consider necessary in order to prevent danger or obstruction to traffic along the street.

18.8.6 Location of Garage in case of Corner Site:

When the site fronts on two streets, the location of a garage (in a corner plot) (if provided within the marginal distances) shall be on diagonally opposite the point of intersections.

18.9 Roofs

The roof of a building shall be so constructed or framed as to permit effective drainage of the rain water there from by means of sufficient rain water pipes of adequate size, wherever required, so arranged, jointed and fixed as to ensure that the rain water is carried away from the building without causing dampness in any part of the walls or foundations of the building or those of an adjacent building.

The Municipal Commissioner may require rain water pipes to be connected to a storm water drain through a covered channel formed beneath the public footpath or in any other approved manner, if not used for rain water harvesting

Rainwater pipes shall be affixed to the outside of the walls of the building or in recesses or cut formed in such walls.

Top Terrace of a building shall not be sub-divided and it shall have only common access. However, intermediate terraces may be allowed to be attached with flat.

18.10 Basement

One or more basements may be permissible for following uses and shall be constructed after leaving the prescribed set-back / required front open space / required front margin, and prescribed building lines

- a) storage of household or other goods or ordinarily non-combustible material;
- b) strong rooms, bank lockers, safe deposit volts, radio/laser therapy unit, mortuary and medical allied uses, etc.
- c) air-conditioning equipments and other machines used for services and utilities of the building;
- d) parking spaces;
- e) D.G. set room, meter room and Electric substation (which will conform to required safety requirements);
- f) Effluent Treatment Plant, suction tank, pump room;

g) users strictly ancillary to the Principal user.

Provided that the users mentioned at (a) & (b) above shall be permitted only by counting in F.S.I. subject to the following conditions:

- i) All requirements regarding access, safety (including fire safety), ventilations, etc. shall be complied with.
- ii) All the planning standards (particularly as regarding parking) should be strictly adhered to. The basement shall not be used for residential purpose.
- iii) Users other than (a) and (b) shall not be counted in FSI.

Provided that,

- i) If the basement is proposed flushing to average surrounding ground level, then such basement can be extended in side and rear margins upto 3 mt. from the plot boundary. If the basement is proposed to be constructed below podium then marginal distances shall be as that of podium.
- ii) Multilevel basements may be permitted if the basement is used for parking. The ramps of minimum 3.0 m. width for entry and exit of vehicles separately shall be provided. In case of bonafide hardship, the Municipal Commissioner may allow only one ramp with not less than 6.0 m. in width.

The basement shall have the following requirements -

- (i) Every basement shall be in every part at least 2.4 mt. in height from the floor to the underside of the roof slab or ceiling soffit of beam.
- (ii) Adequate ventilation shall be provided for the basement with a ventilation area not less than 2.5% of the area of the basement. The standard of ventilation shall be the same as required by the particular occupancy according to these regulations. Any deficiency may be met by providing additional adequate mechanical ventilation in the form of blowers, exhaust fans, air conditioning systems etc.
- (iii) The minimum height of the ceiling of any basement shall ordinarily be 0.9 mt. and maximum shall be 1.2 mt. above the average surrounding ground level. However it does not apply to the mechanically ventilated basements. In such cases, basement may also be allowed flushing to the average ground level.
- (iv) Adequate arrangement shall be made such that surface drainage does not enter the basement.
- (v) The walls and floor of the basement shall be water-tight and be so designed that the effect of the surrounding soil and moisture, if any, is taken into account in design and adequate damp proofing treatment is given; and
- (f) The access to the basement shall be separate from the main and alternate staircase providing access and exit from higher floors. Where the staircase is continuous the same shall be of enclosed type serving as a fire separation from the basement floor and higher floors. Open ramps shall be permitted if they are constructed within the building line subject to the provision of (iv) above.

18.11 Ramp

A) Non Vehicular Ramp-

All the requirements of stairways in Regulation No 18.27 shall apply mutatis mutandis to non-vehicular ramp. In addition, the following requirement shall be complied with.

- a) Ramps with a slope of not steeper than 1 in 10 may be substituted for and shall comply with all the applicable requirements of required stairways as to enclosure, capacity and limited

dimensions. In certain cases steeper slopes may be permitted but in no case greater than 1 in 8. Ramps shall be surfaced with approved non-slip slipping material. Provided that in the case of public offices, hospitals, assembly halls, etc. the slope of the ramp shall not be more than 1: 12.

- b) The minimum width of the ramps in hospitals shall be 2.25 m.
- c) Handrails shall be provided on both sides of the ramp.
- d) Ramps shall lead directly to outside open space at ground level or courtyards or safe place.
- e) For building above 24 m. in height access to ramps from any floor of the building shall be through smoke stop door.
- f) When there is a difference in level between connected areas for horizontal exits, ramps not more than 1 in 10 slope shall be provided; steps shall not be used.
- g) For High Rise building, if marginal open space is greater than minimum 6 m. then ramps may be permitted.

B) Ramp to basements and upper Storeys for vehicles-

For parking spaces in a basement and upper floors, at least two ramps of minimum 3.00mt. width or one ramp of 6.00 meter width and slope not more than 1:10 shall be provided preferably at the opposite ends.

C) In case of special building mentioned in Regulation No 2.77.13, ramp may be permitted in the side and rear marginal distances after leaving 6.0 mt distance from the plot boundary for movement of fire-fighting vehicles. Provided that when a building abutting 3 or more roads, then ramps may be allowed in front marginal distances facing the smaller road or less important road from traffic point of view.

18.12 Podium

Podium for parking of the vehicle may be permitted with following requirements / conditions

- i) Height of podium shall be at least 2.4 m. in height from the floor to the soffit of beam.
- ii) Podium shall not be provided in front setback space. Podium shall be allowed at a distance of 6.00 m. from the plot boundary
- iii) Podium shall only be used for parking and it shall be designed to take load of fire engine.
- iv) Podium shall be permissible for plots admeasuring 2000 sq.m. and above. However in congested area it may be permitted in plots admeasuring 1000 sq.m. or more.
- v) Podium shall be permissible for joining two or more separate buildings in a plot buildings or wings of buildings subject to availability of manoeuvring space for Fire Engine. In such case the distance between two buildings/wings of the building shall be provided as otherwise required under these regulation.
- vi) The consent from the Chief Fire Officer shall be necessary before permitting the aforesaid podium.
- vii) For the plots having area 2000Sq.m. or more, recreational open space may be permitted on Podium subject to condition that out of required open/recreational space , at least 50% shall be provided on ground .

18.13 Balcony

Balcony or balconies of a minimum width 1.00m. and maximum of 2.00m. may be permitted at any floor except ground floor, not more than 15% of the built up area of the same floor and such balcony projection shall be subject to the following conditions

- (i) In non-congested area, no balcony shall reduce the marginal open space to less than 3 m. upto 24 m. building height. For height 24 m. and more no balcony shall reduce the marginal open space to less than 6m. In congested area balcony may be permitted on upper floors projecting in front setbacks except over lanes having width 4.50 m. or less and in marginal distances subject to 1.0 m. clear marginal distance from the plot boundary to the external face of the balcony.
- (ii) No balcony shall be allowed on ground floor which shall reduce minimum required front setback or marginal distance.
- (iii) The width of the balcony shall be measured perpendicular to the building upto the outermost edge of balcony.
- (iv) The balcony should not be enclosed and declaration regarding this shall be submitted by the owner/developer/Architect at the time of approval to the building permission and the same shall be mention in the agreement or sale deed.
- (v) Nothing shall be allowed beyond the outer edge of balcony.

18.14 Stilt-

Stilt may be permitted on any floor subject to height of floor upto the soffit of the beam shall not be less than 2.4 m. In case of stilt on ground floor, plinth shall not be more than 15 cm from surrounding ground level.

18.15 Lighting and Ventilation of Rooms**i) Adequacy and manner of provision-**

- 18.15.1 The minimum aggregate area of opening of habitable rooms and kitchens excluding doors shall be not less than 1/10th of floor area.
- 18.15.2 No portion of a room shall be assumed to be lighted if it is more than 7.5 m. from the opening assumed for lighting / ventilation of the portion, provided additional depth of any room beyond 7.5 m. may be permitted subject to provision of proportionate increase in the opening.
- 18.15.3 Where the lighting and ventilation requirements are not met through day lighting and natural ventilation, the same shall be ensured through artificial lighting and mechanical ventilation as per latest version of Part VIII - Building Services Section, Lighting and Ventilation of **National Building Code of India** published by the Bureau of Indian Standards. In the case of special types of buildings requiring artificial lighting and air-conditioning for special types of manufacturing or other process the requirements about natural day lighting and ventilation may be relaxed.

ii) Ventilation Shaft:-

For ventilating the space for water closets and bath room of staircase, if not opening on the

exterior side of a building, open on the ventilation shaft, the size of which shall not be less than the values given below in **Table No 14**

Table No 14		
Height of building in m.	Size of ventilation in sq. m	Minimum width of shaft in m.
Up to 10	1.2	0.90
Up to 12	2.4	1.20
Up to 18	4.0	1.50
Up to 24	5.4	1.80
Up to 30	8.0	2.40
Above 30	9.0	3.0

- iii) Artificial Lighting and Mechanical ventilation - where lighting and ventilation requirements are not met through day-lighting and natural ventilation, they shall be ensured through artificial lighting and ventilation in accordance with the provisions of Part 8, Building Services- Section 1, Lighting and Ventilation, **National Building Code of India, 2005.**
- iv) In residential lodging hotels and other establishments where attached toilets are provided with mechanical ventilation system the size of ventilation shaft prescribed in this regulation stand relaxed.

18.16 Overhead Tanks:

Every overhead water storage tank shall be maintained in a perfectly mosquito-proof condition by providing a properly fitting hinged cover and every tank more than 1.5 m. in height shall be provided with a permanently fixed iron ladder.

18.17 Parapet

Parapet walls and handrails provided on the edges of roof terraces, balcony etc. shall not be less than 1.05 mt. and not more than 1.20 mt. in height from the finished floor level.

18.18 Cabin:

Where cabins are provided, a clear passage not less than 0.9 m. wide will be maintained. The size of a cabin shall not be less than 3 sq.m. and the distance from the farthest space of cabin to the nearest exit shall not be more than 18.5 mt if the cabin does not derive direct light and ventilation from any open spaces / mechanical means, its maximum height shall be 2.2 m.

18.19 Society Office:

In the case of multi-storied multi-family dwelling apartments constructed for co-operative housing societies or apartment owner's co-operative societies, a Society Office upto 12 sq.m. shall be provided on the ground floor or uppermost floor. If the number of flats are more than 20 the maximum size of the Society Office shall be of dimension of 20 sq.m.

18.20 Wells

Wells intended for supply of water for human consumption or domestic purposes may be

permitted at suitable place.

18.20.1 Requirements: The well shall:

- (a) have minimum internal diameter of not less than 1 m.;
- (b) be constructed to a height not less than 1 m. above the surrounding ground level to form a parapet or curb and to prevent surface water from following into a well, and shall be surrounded with a paving constructed of impervious material which shall extend for a distance of not less than 1.8 m. in every direction from the parapet or the curb forming the well head and the upper surface for such paving shall be sloped away from a well;
- (c) be a sound and permanent construction (PUCCA) throughout. Temporary exposed (KUTCHA) wells shall only be permitted in fields or gardens for purposes of irrigation; and;
- (d) the interior surface of the lining or walls of the well shall be rendered impervious for depth of not less than 1.8 m. measured from the level of the ground immediately adjoining the well-head.

18.21 Septic Tanks

Every building, group of buildings together shall be either connected to the Municipal Drainage system or provided with sub-soil dispersion system in the form of septic tank which shall be governed by the following or any other alternative design and specifications

1) Design of septic tank:-

Where a septic tank is used for sewage disposal, the location, design and construction of the septic tank shall conform to requirements of the following Regulation

2. Location of Septic Tanks and Subsurface Absorption System:- A subsoil dispersion system shall not be closer than 18.00 m. of any source of drinking water such as well, to mitigate the possibility of bacterial pollution of water supply. It shall also be as far removed from the nearest habitable building as economically feasible but not closer than 6 m. to avoid damage to the structures.

3. Requirements:

- (a) **Dimensions of Septic Tanks:** Septic tanks shall have minimum width of 75 cm., minimum depth of 1 m. below the water level and a minimum liquid capacity of 1 cu.m. Length of tanks shall be 2 to 4 times the width.
- (b) Septic tanks may be constructed of brick work, stone masonry, concrete or other suitable materials.
- (c) Under no circumstances should effluent from a septic tank be allowed into an open channel drain or body of water without adequate treatment.
- (d) Minimum nominal diameter of pipe shall be 100 mm. further, at junctions of pipes in manholes; direction of flow from a branch connection should not make an angle exceeding 45 degree with the direction of flow in the main pipe.
- (e) The gradients of land drains under drainage as well as the bottom of dispersion trenches and soak way should be between 1:300 and 1:400.
- (f) Every septic tank shall be provided with ventilating pipe of at least 50 mm diameter. The top of the pipe shall be provided with a suitable cage of mosquito proof wire mesh. The ventilating pipe shall extend to a height, which would cause no smell nuisance to any

building in the area. Generally, the ventilating pipe may extend to a height of about 2 m. when the septic tank is at least 15 m. away from the nearest building and to a height of 2 m. above the top of the building when it is located closer than 15 m.

- (g) When the disposal of septic tank effluent is to seepage pit, the seepage pit may be of any suitable shape with the least cross sectional dimension of 90 cm. and not less than 100 cm. in depth below the invert level of the inlet pipe. The pit may be lined with stone, brick or concrete blocks with dry open joints which should be backed with at least 7.5 cm. of clean coarse aggregate. The lining above the inlet level should be finished with mortar. In the case of pits of large dimensions, the top portion may be narrowed to reduce the size of the RCC cover slabs. Where no lining is used, especially near trees, the entire pit should be filled with loose stones. A masonry ring may be constructed at the top of pit to prevent damage by flooding of the pit by surface run off. The inlet pipe may be taken down to a depth of 90 cm. from the top as an anti-mosquito measure.
- (h) When the disposal of septic tank effluent is to a dispersion trench, the dispersion trench shall be 50 to 100 cm. deep and 30 to 100 cm. wide excavated to a slight gradient and shall be provided with 15 to 25 cm. of washed gravel of crushed stones. Open jointed pipes placed inside the trench shall be made of unglazed earthenware clay or concrete and shall have minimum internal diameter of 75 to 100 mm. No dispersion trench should not be longer than 30 m. and trenches should not be placed closer than 1.8 mt.

18.22 Boundary Wall

The requirements of the boundary wall are given below:

- (a) Except with the special permission of the Municipal Commissioner the maximum height of the compound wall shall be 1.5 m. above the centre line of the front street. Compound wall upto 2.4 m. height may be permitted if the top 0.9 mt is of open type construction (railings). However Municipal Commissioner may allow the plinth and the boundary wall up to 0.90 m. above ground level and balance height may be of open railing or as decided by him.
- (b) In case of corner plot the height of boundary wall shall be restricted to 0.75 m. for a length equal to fanning of the road on the front and side of the intersections and balance height of 0.75 m. if required in accordance with (a) may be made of open construction (railings),
- (c) However, the provisions of (a) and (b) are not applicable to boundary wall of jails. In industrial buildings, electric sub stations, transformer stations institutional buildings like sanatoria, hospitals, industrial buildings like workshops, factories and educational buildings like schools, colleges, including the hostels, and other uses of public utility undertakings. Height upto 2.4 m. to boundary walls of these types of building may be permitted by the Municipal Commissioner.

18.23 Letter Box Room

A letter box of appropriate dimensions shall be provided on the ground floor of residential and commercial buildings with five and more storeys.

18.24 Meter Rooms

For all buildings above 15 m in height and in special occupancies, like educational, assembly, institutional, industrial, storage, hazardous and mixed occupancies with any of the aforesaid occupancies having area more than 500sq.m. on each floor, provision shall be made for an independent and ventilated meter (service) room, as per requirements of electric (service) supply

undertakings on the ground floor with direct access from outside for the purpose of termination of electric supply from the licensee's service and alternative supply cables. The door/doors provided for the service room shall have fire resistance of not less than two hours.

18.25 Chimneys

Chimneys, where provided, shall conform to the requirements of IS: 1646-1960 Indian Standard Code of Practice for Fire Safety of Building. Provided that the Chimneys shall be built at least 0.9 m. above flat roof. In the case of sloping roofs, the chimney top shall not be less than, 0.6 m. above the ridge of the roof in which the chimney penetrates.

18.26 Supported Double Height Terrace (within the building line)

Supported double height terraces (open terraces with railing having minimum height equal to two floors) within the building line, not exceeding 20% of the built up area of the same floor may be permitted without counting in FSI subject to payment of premium as decided by Commissioner Municipal Corporation.

18.27 EXIT REQUIREMENTS

18.27.1 General-The following general requirements shall apply to exits.

- (a) An exit may be a doorway; corridor, passageway(s) to an internal staircase, or external staircase, or to a VERANDA or terrace(s), which have access to the street, or to the roof of a building or a refuge area. An exit may also include a horizontal exit leading to an adjoining building at the same level.
- (b) Lifts and escalators shall not be considered as exits.
- (c) Every exit, exit access or exit discharge shall be continuously maintained free of all obstructions or impediments to full use in the case of fire or other emergency.
- (d) Every building meant for human occupancy shall be provided with exits sufficient to permit safe escape of occupants in case of fire or other emergency;
- (e) In every building, exits shall comply with the minimum requirements of this part, except those not accessible for general public use;
- (f) No building shall be altered to reduce the number, width or protection of exits to less than that required;
- (g) Exits shall be clearly visible and the routes to reach the exits shall be clearly marked and sign posted to guide the occupants to the floor concerned;
- (h) The floors of area covered for the means of exit shall be properly illuminated;
- (i) All exits shall provide continuous means of egress to the exterior of a building or to an exterior open space leading to a street and;
- (j) Exits shall be so arranged that they shall be reached without passing through another occupied unit.

18.27.2 Types of exits -

Exits shall be either of horizontal or vertical type. An exit may be doorway, corridor, and passageways to an internal staircase or external staircase, ramps or to a veranda and/or terraces which have access to the street or to roof of a building. An exit may also include a horizontal exit leading to an adjoining building at the same level. Lifts and escalators shall not be considered as exits.

18.27.3 Number and Size of Exits

The requisite number and size of various exits shall be provided, based on number of occupants in each room and floor based on the occupant load, capacity of exits; travel distance and height of building as per provisions of Regulation no. 18.27.5 to 18.27.8

18.27.4 Arrangement of Exits

Exits shall be so located so that the travel distance on the floor shall not exceed 22.5 m. for residential, education, institutional and hazardous occupancies and 30 m. for assembly business, mercantile, industrial, storage & hazardous occupancies. Wherever more than one exit is required for a floor of a building, they shall be placed as remote from each other as possible. All the exits shall be accessible from the entire floor area at all floor levels

18.27.5 Occupant Load -

For determining the exits required the number of persons within any floor area or the occupant load shall be based on the actual number of occupants but in no case, less than that specified in **Table No 15** below.

Table No 15 Occupant Load		
Sr. No.	Group of Occupancy	Occupant Load floor Area in sq.mt. per person
(1)	(2)	(3)
1	Residential	12.5
2	Educational	4.00
3	Institutional	15 (See Note-1)
4	Assembly	
	(a) with fixed or loose seats and dance floors	0.6 (See Note-2)
	(b) without seating facilities including dining rooms	1.5 (See Note-2)
5	Mercantile	
	(a) Street floor and sales basement	3
	(b) Upper sale floors	6
6	Business and industrial	10
7	Storage	30
8	Hazardous	10

Note 1 - Occupant load in dormitory portions of homes for the aged, orphanages, asylums, etc. where sleeping accommodation is provided shall be calculated at not less than 7.5 sq.m. floor area per person.

Note 2 - The gross area shall include, in addition to the main assembly room or space, any occupied connecting room or space in the same storey or in the storeys above or below where

entrance is common to such rooms and spaces and they are available for use by the occupants of the assembly space. No deductions shall be made in the gross area for corridors, closets or other sub-divisions. The area shall include all space serving the particular assembly occupancy.

18.27.6 Capacity of Exits -

1) Occupants per unit exit width shall be in accordance with **Table No.16**

Table No 16 Occupants per Unit Exit Width				
Sr.No.	Group or Occupancy	Number of Occupants		
		Stairways	Ramps	Doors
1	Residential	25	50	75
2	Educational	25	50	75
3	Institutional	25	50	75
4	Assembly	40	50	60
5	Business	50	60	75
6	Mercantile	50	60	75
7	Industrial	50	60	75
8	Storage	50	60	75
9	Hazardous	25	30	40

2) For the dormitory portions of homes for the aged, orphanages, mental hospitals, etc. these multipliers will be doubled.

3) The gross floor area shall include, in addition to the main assembly rooms or space, any occupied connecting room or space in the same storey or in the storey above or below where entrance is common to such rooms and space and they are available for use by the occupants of the assembly place.

4) No deductions shall be made in the gross area of the corridors, closets or other sub-divisions; the area shall include all space serving the particular assembly occupancy shall be reckoned.

18.27.7 Provision for Staircase-

All buildings having height more than ground floor shall have provision of staircase. The special buildings shall have two staircases out of which one shall be fire escape staircase. They shall be of enclosed type. At least one of them shall be on external walls of buildings and shall open directly to the exterior, interior open space or to an open place of safety. Further, the provision or otherwise of alternative staircases shall be subject to the requirements of travel distance being complied with.

Provided that for purely residential building/residential building along with ground floor mix use having height upto 24 meters and built up area on any floor does not exceed 500 sq.mts. an additional staircase shall not be insisted. Provided also that in such cases width of stair case shall

be minimum 1.50 mt.

18.27.8 Width of Stairways-

Notwithstanding anything contained in regulations, the following minimum width provision shall be made for staircases flight/corridor.

Table No 17		
Type of Building	Built-up area on floor served by single staircase	
	upto 500 sq.m.	More than 500 sq.m.
Multi-Storeyed Residential Buildings	1.20 m.	1.50 m
Residential Hotel Buildings	1.50 m.	1.80 m
Assembly buildings like auditoria, theatres, Cinemas etc., Mangalkaryalaya, marriage halls.	1.80 m.	2.00 m.
Institutional Buildings like hospitals & Educational	2.00 m.	2.30 m.
All other public buildings including commercial buildings.	1.50 m.	1.80 m.

Note:-

- i) for individual house and row housing with 2 storey's, the minimum shall be 0.75 m.
- ii) The width of the mid-landing/quarter landing should not be more than 1.5 times and the floor landing should not be more than two times of the width of the stair flight.

18.28 Other Requirements of Individual Exits- The detailed requirements of individual exits are given in Regulation no. 18.28.1 to 18.28.8.

18.28.1 Doorways:

- (i) Every exit doorway shall open into an enclosed stairway, a horizontal exit or a corridor or passage way providing continuous and protected means of egress
- (ii) No exit doorway shall be less than 90 cm in width in case of residential and 100 cm. in width in case of other buildings. Doorways shall be not less than 200 cm. in height. Doorways for bathrooms, water closet, stores etc. shall be not less than 75 cm. wide.
- (iii) Exit doorways shall open outwards, that is away from the room but shall not obstruct the travel along any exit. No door, when open, shall reduce the required width of stairway or landing to less than 90 cm. Overhead or sliding doors shall not be installed.
- (iv) Exit door shall not open immediately upon a flight of stairs, a landing equal to at least the width of the door shall be provided in the stairway at each doorway. Level of landing shall be the same as that of the floor which it serves.
- v) Exit doorway shall be openable from the side which they serve without the use of a key.

- vi) Mirrors shall not be placed in exit ways or exit doors to avoid confusion regarding the direction of exit.

18.28.2 Revolving Doors :

Revolving doors shall not be used as required exits except in residential, business and mercantile occupancies, but shall not constitute more than half the total required door width;

18.28.3 Stairways:

- i) Interior stair shall be constructed of non-combustible materials throughout;
- ii) Interior staircase shall be constructed as a self-contained unit with at least one side adjacent to an external wall and shall be completely enclosed;
- iii) A staircase shall not be arranged around a lift shaft
- iv) Hollow combustible construction shall not be permitted.
- v) The minimum width of treads without nosing shall be 25 cm. for an internal staircase for residential buildings. In the case of other buildings, the minimum treads shall be 30 cm. The treads shall be constructed and maintained in a manner to prevent slipping.
- vi) The maximum height of riser shall be 19 cm. in the case of residential buildings and 15 cm. in the case of other buildings. They shall be limited to 15 per flight.
- vii) Handrails shall be provided with a minimum height of 100 cm. from the centre of tread, to the top of the handrails. Balusters / railing shall be provided such that the width of staircase does not reduce.
- viii) Floor indicator - The number of each floor shall be conspicuously painted in figures at least 15 cm. large on the wall facing the flights of a stairway or at such suitable place as is distinctly visible from the flights.
- ix) The minimum headroom in a passage under the landing of a staircase shall be 2.2 m.
- x) For building more than 15m. in height or more access to main staircase shall be gained through at least half an hour fire resisting automatic closing doors placed in the enclosing wall of the staircase. It shall be a swing type door opening in the direction of the escape.
- xi) No living space, store or other fire risk spaces shall open directly into the external staircase.
- xii) External exit door of staircase enclosure at ground level shall open directly to the open spaces or should be reached without passing through any door other than a door provided to form a large lobby.
- xiii) In the case of assembly, institutional, residential hotels, industrial and hazardous occupancies, the exit sign with arrow indicating the way to the escape route shall be provided at a height of 0.5m. from the floor level on the wall and shall be illuminated by electric light connected to corridor circuits. All exit way marking signs should be flush with the wall and so designed that no mechanical damage shall occur to them due to moving of furniture or other heavy equipments. Further all landings of floor shall have floor indication boards indicating the floor number. The floor indication board shall be placed on the wall immediately facing the flight of stairs and nearest to the landing. It shall be of size not less than 0.5m. x 0.5m.
- xiv) In case of single staircase it shall terminate at the ground floor level and the access to the basement shall be by a separate staircase. Wherever the building is served by more than one staircase, one of the staircases may lead to basement levels, provided the same is separated at

ground level by either a ventilated lobby or cut-off screen wall without opening, having a fire resistance of not less than 2 hours with discharge point at two different ends or through enclosures. It shall also be cut off from the basement areas at various basement levels by a protected and ventilated lobby / lobbies.

18.28.4 Fire escape or external stairs –

Fire escape staircase, when provided, shall comply the following:

- i) External stairs shall always be kept in sound operable conditions.
- ii) All external stairs shall be directly connected to the ground.
- iii) Entrance to the external stairs shall be separate and remote from the internal staircase.
- iv) Care shall be taken to ensure that no wall opening or window opens on to or close to an external stairs.
- v) The route to the external stairs shall be free of obstructions at all times.
- vi) The external stairs shall be constructed of non-combustible materials, and any doorway leading it shall have the required fire resistance.
- vii) No external staircase, used as a fire escape, shall be inclined at an angle greater than 45 degree from the horizontal.
- viii) External stairs shall have straight flight not less than 1250 mm wide with 250 mm treads and risers not more than 190 mm. The number of risers shall be limited to 15 per flight.
- ix) Handrails shall be of a height not less than 1000 mm and not exceeding 1200 mm. There shall be provisions of balusters with maximum gap of 150 mm.
- x) The use of spiral staircase shall be limited to low occupant load and to a building not exceeding 9 m in height. A spiral stair case shall be not less than 1500 mm in diameter and shall be designed to give adequate headroom.
- xi) Unprotected steel frame staircase will not be accepted as means of escape. However, steel staircase in an enclosed fire rated compartment of 2 h will be accepted as means of escape.

18.28.5 Corridors and passageways:

- i) The minimum width of a corridor shall not be less than 75cm. in the case of 2 storeys row housing residential buildings and 100cm. In the case of other buildings and actual width shall be calculated based on the provision of Regulations No 18.27.3 to 18.27.5 (both inclusive)
- ii) Where there is more than one staircase serving a building, there shall be at least one smoke-stop door in the space between the staircases.
- iii) Exit corridors & passageways shall be of width not less than the aggregate required width of exit doorways leading from them in the direction of travel of the exterior/stairways.
- iv) Where stairways discharge through corridors & passageways the height of the corridors & passageways shall not be less than 2.4 mt.
- v) All means of exit including staircases, lifts, lobbies & corridors shall be adequately ventilated.

18.28.6 Refuge Area

For buildings more than 24 m in height, refuge area of 15 sq.m. or an area equivalent to 0.3 sq.m. per person to accommodate the occupants of two consecutive floors whichever is higher shall be provided as under:

The refuge area shall be provided on the periphery of the floor or preferably on a cantilever projection and open to air at least on one side protected with suitable railings.

- a) For floors above 24 m and upto 39 m--One refuge area on the floor immediately above 24m.
- b) For floors above 39 m --One refuge area on the floor immediately above 39 m and so on after every 15 m. Refuge area provided in excess of the requirements shall be counted towards FSI. However, area remained in excess because of planning constraints shall not more than 10% of required refuge area shall not be counted in FSI.

18.28.7 Lifts and Escalators:-

a) lifts :-

Provision of lift shall be made for all buildings more than 15mt in height. In case the height of the building is more than 24.0 mt , at least two lifts shall be provided. However, in the case of a proposal to add one additional floor to an existing building having a lift, it will not be necessary to raise the existing lift to the additional floor.

- (a) All the floors shall be accessible for 24 hours by the lifts. The lifts provided in the buildings shall not be considered as a means of escape in case of emergency.
- (b) Grounding switch at ground floor level to enable the fire service to ground the lift cars in any emergency shall also be provided;
- (c) The lift machine room shall be separate and no other machinery shall be installed therein.
- (d) The planning and design of lifts including their number, type and capacity depending on the occupancy of the building, the population of each floor based on the occupant load and the building height shall be in accordance with Section 5 - Installation of Lifts and Escalators of Part 8- Building Services, of the National Building Code of India, 2005.

b) Escalators :

Escalators may be permitted in addition to required lifts. Such escalators may be permitted in atrium area in shopping malls / public buildings.

18.28.8 Fire Lift

Where applicable, fire lifts shall be provided with a minimum capacity for 8 passengers and fully automated with emergency switch on ground level. In general, buildings 15 m in height or above shall be provided with fire lifts. In case of fire, only fireman shall operate the fire lift. In normal course, it may be used by other persons. Each fire lift shall be equipped with suitable inter-communication equipment for communicating with the control room on the ground floor of the building. The number and location of fire lifts in a building shall be decided after taking into consideration various factors like building population, floor area, compartmentation, etc.

18.29 Additional requirements in case of Housing Schemes

Following amenities shall be provided in any housing scheme and shall be counted in FSI

- i) Fitness Centre, Crèche, society office cum letter box room, laundry room, admeasuring area of about 20 sq.m. for every user, in scheme having minimum 100 flats and thereafter additional 20 sq.m. area for every 300 flats.
- ii) Sanitary block for servants having maximum area of 3.00 sq.m. in schemes having minimum 100 flats and thereafter additional 3.00 sq.m. area for every 200 flats.
- iii) Drivers room of size 12 sq.m. with attached toilet in schemes having minimum 100 flats and

thereafter additional 10 sq.m. area for every 300 flats.

19.0 FIRE PROTECTION REQUIREMENTS

All buildings shall be planned, designed and constructed to ensure fire safety and this shall be done in accordance with Part IV of Fire Protection of National Building Code of India and Maharashtra Fire Prevention and Life Safety Measures Act, 2006, as prescribed in **Appendix -L**. The provisions of the Appendix L shall deem to be modified time to time as per the Fire Protection of National Building Code of India and Maharashtra Fire Prevention and Life Safety Measures Act, 2006. In case of special buildings, the building schemes shall also be cleared by the Chief Fire Officer of the Authority.

PART- VI
PARKING, LOADING AND UNLOADING SPACES

20.0 PARKING, LOADING AND UNLOADING SPACES: -

20.1 Parking spaces –

Wherever a property is to be developed or redeveloped, parking spaces at the scale laid down in these Regulations shall be provided. When additions are made to an existing building, the new parking requirements shall be reckoned with reference to the additional space only and not to the whole of building but this concession shall not apply where the use is changed. The provisions for parking of vehicles shall be as given in **Table No. 19**

20.1.1 General space requirements

- (a) **Types:** The parking spaces mentioned below include parking spaces in basements or on a floor supported by stilts, podium or on upper floors, covered or uncovered spaces in the plot and / or lock up garages. The height of the stilt shall generally be allowed upto 3 m. and shall not be less than 2.5 m. from bottom of beam. More height may be allowed in case of shopping mall, hotels etc. as per requirements.
- (b) **Size of parking space -** The minimum sizes of parking spaces to be provided shall be as shown below in **Table No.20**

Table No 20		
Sr. No.	Type of Vehicle	Minimum Size/ area of parking space
(1)	(2)	(3)
(a)	Motor vehicle	2.5 m X 5 m
(b)	Scooter, Motor Cycle.	1.0 m. x 2.0 m.
(c)	Bicycle	0.50 m x 1.4 m.
(d)	Transport vehicle	3.75 m. X 7.5 m.
Note:	In the case of parking spaces for motor vehicle, upto 50 % of the prescribed space may be of the size of 2.3 m. X 4.5 m.	

- (c) **Marking of parking spaces:** Parking space shall be paved and clearly marked for different types of vehicles.
- (d) **Manoeuvring and other ancillary spaces:** Off street parking space must have adequate vehicular access to a street and the area shall be exclusive of drives, aisles and such other provisions required for adequate manoeuvring of vehicles.
- (e) **Ramps for Basement parking:** Ramps for parking in basement should conform to the requirement of Regulation n 18.11

Table No. 19
Off Street Parking Spaces

Sr. No.	Occupancy	One parking Space for every	Non Congested area			Congested area			remarks
			Car	Scooter	Cycle	Car	Scooter	Cycle	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

	b) Whole sale shop	For every 100sq. m. carpet area or fraction thereof	2	4	2	2	2	4	--
	c) Hazardous building	For every 100sq.m. carpet area	1	4	4	1	2	4	--
	d) office and I.T. Building	For every 200sq. m. carpet area or fraction thereof	5	12	4	5	12	4	--
7.	Industrial	For every 300sq. m. carpet area or fraction thereof	4	12	4	4	12	4	--
8.	Storage (any type)	For every 300sq. m. carpet area or fraction thereof	1	4	8	1	2	4	--
9.	Plots less than 200 sq.m. (any use)	Parking requirement shall be applicable as per the provisions for respective users as mentioned at sr.no.1 to 6 above.	--	--	--	--	--	--	--

Notes below table :-

- 1) For plots upto 100 sq. m. as in the case of shops, row houses parking space need not be insisted.
- 2) Fraction of parking unit need not be provided. However, in case where proportional number of vehicles is less than 1 (i.e. fraction) it will be rounded to the next full number.
- 3) In case of independent single family residential bungalows having plot area upto 300 sq. m., parking space need not be insisted separately.
- 4) In case parking as per above norms is not feasible due to site conditions, Mechanical /Hydraulic Parking shall be permissible at different level subject to satisfaction of all technical norms as per site conditions.
- 5) Independent building proposed only for parking may be permitted within the same premises but only after leaving the required marginal distance.

20.2	Off street parking space shall be provided with adequate vehicular access to a street, and the area of drives, aisles and such other provisions required for adequate manoeuvring of vehicle shall be exclusive of the parking space stipulated in these regulations.
20.3	To meet the parking requirements as per these regulations, common parking area for group of buildings, open or multi-storeyed, may be allowed in the same premises.
20.4	In addition to the parking spaces provided for building of Mercantile (Commercial) like office, market, departmental store, shopping mall and building of industrial and storage, loading and unloading spaces shall be provided at the rate of one space for each 1000 sq. m. of floor area or fraction thereof exceeding the first 200 sq. m. of floor area, shall be provided. The space shall not be less than 3.75 m. x 7.5 m.
20.5	The space to be left out for parking as given in this Regulation shall be in addition to the marginal distances left out for lighting and ventilation purposes. However, those spaces may be used for parking provided minimum distance of 3 m. (6.0 m. in case of special building) around the buildings is kept free of any parking or loading and unloading spaces. Such parking area may be allowed to cover on top by sheet roofing so as not to infringe the marginal distances to be kept open.
20.6	In case of parking spaces provided in basements, at least two separate ramps of adequate width and slope for entry and exit at opposite ends or one ramp with 6.0m. meter width shall be provided (as per Regulation No. 18.11)where parking of motor vehicles is envisaged.
20.7	Mechanical/Hydraulic parking may be allowed over and above required parking

PART - VII
ACQUISITION / DEVELOPMENT OF RESERVED SITES IN DEVELOPMENT PLAN

21.0 MANNER OF DEVELOPMENT OF RESERVED SITES IN DEVELOPMENT PLAN
(ACCOMMODATION RESERVATION PRINCIPLE)

The use of land situated within the Municipal Corporation limit which has been reserved for certain purpose in the Development Plan shall be regulated in regard to type and manner of development / redevelopment according to the provisions mentioned in following Table.

When owner is allowed to develop the reservation, he should have exclusive ownership/ title of the land without any restriction under any other Act or regulation in force.

Reservation	Person/Authority who may acquire/ develop	Principle For Development through Accommodation Reservation subject to which development is permissible
1	2	3
1)Recreational - 1.1) Open reservations like Garden, Play Ground, Children PG, Open Space, Recreation Ground Park, Park etc	Planning Authority/ Appropriate Authority / Owner	<p>Planning Authority may acquire the land and develop the same for the purpose. The ancillary users like indoor games, public toilet, changing Rooms, gymnasium, canteen, sport shop, meditation, yoga hall, may be allowed at one corner/side of the reservation subject to condition that maximum built-up area for such user shall be 15%, out of which maximum 10% shall be allowed on ground floor& remaining on first floor. However, if the Land under reservation is owned by any Government agency / Authority, in such cases the Planning Authority may allow such Government agency / Authority to Develop full reservation for the said purpose subject to condition as may be decided by the Commissioner and such Developed Amenity shall be open to the general Public.</p> <p>OR</p> <p>The Commissioner may allow the owner to develop the reservation on 70 % of the land and after handing over it to the planning authority free of cost then remaining 30 % land may be allowed to be developed as per adjoining use subject to following terms /conditions:-</p>

		<p>i) The owner shall be entitled to develop remaining 30 % land for the uses permissible in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p> <p>ii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI if any (after deducting in-situ FSI as mentioned in Sr. no (i) above) which shall be utilised as per the TDR utilisation regulations.</p> <p>iii) No reservation shall allow to be developed partly.</p>
1.2) Stadium, Sport Complex, Recreational Centre etc.	Planning Authority/ Appropriate Authority	Planning Authority/ Appropriate Authority shall acquire the land and develop the same for the purpose.
1.3) Swimming Tank/ Swimming Pool	Planning Authority/ Appropriate Authority/ Owner	<p>The Planning Authority/ Appropriate Authority may acquire and develop the site for the same purpose.</p> <p>OR</p> <p>The Planning Authority/ Appropriate Authority after acquiring the land or after acquiring and developing the same, as the case may be, lease out as per the provisions of the Municipal Corporations Act, to the Registered Public Institution for developing and running or only for running the same.</p> <p>OR</p> <p>The Owner may be allowed to develop according to the designs; specifications and conditions prescribed by the Municipal Commissioner and run the same.</p>
<p>2) Public Utilities</p> <p>a) Cremation round,</p> <p>b) Burial Ground,</p> <p>c) Slaughter House,</p> <p>d) Sewerage Treatment Plant,</p> <p>e) Water Treatment Plant,</p> <p>f) Water Tank</p>	Planning Authority/ Appropriate Authority	2) The Planning Authority/ Appropriate Authority shall acquire the land and develop the reservation for the same purpose.

<p>3) Commercial Utilities</p> <p>3.1) Market and Mandies</p> <p>a) Weekly Market/ b) Vegetable Market c) Open Market. d) Hawkers Market</p> <p>3.2) Shopping centres -</p> <p>a) Shopping Centre, b) Commercial Complex, c) Municipal Market d) Fish Market</p> <p>3.3) C2 Reservation earmarked on Development Plan etc.</p>	<p>Planning Authority /Appropriate Authority / Owner</p>	<p>The Planning Authority/ Appropriate Authority shall acquire the land and develop the reservation for the same purpose.</p> <p>OR</p> <p>i) The Commissioner may allow the owner to develop the reservation, subject to handing over to the Planning Authority 40 % independent plot along with 50% constructed amenity of total area free of cost in lieu of construction amenity TDR as per general Regulation No (iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The owner shall be entitled to develop remaining 60 % land for the uses permissible in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p> <p>iii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI if any (after deducting in-situ FSI as mentioned in sr.no (ii) above) which shall be utilised as per the TDR utilisation regulations.</p> <p>iv) Reservation shall allow to be developed in parts.</p>
<p>4) Health Facility</p> <p>a) Health Centre b) Dispensary c) Maternity Home d) Veterinary Hospital/Clinic e) Urban Health Centre f) Rural Hospital and like</p>	<p>Planning Authority /Appropriate Authority / Owner</p>	<p>The Planning Authority / Appropriate Authority may acquire and develop the reservation site for the same purpose.</p> <p>OR</p> <p>i) The Commissioner may allow the owner to develop the reservation, subject to handing over to the Planning Authority 40 % independent plot along with 50% constructed amenity of total area free of cost in lieu of construction amenity TDR as per general Regulation no (iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The owner shall be entitled to develop remaining 60 % land for the uses permissible in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p>

		<p>iii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI only (after deducting in-situ FSI as mentioned in sr. no (ii) above) which shall be utilised as per the TDR utilisation regulations.</p> <p>iv) Reservation shall be allowed to be developed in parts.</p>
<p>5) Transportation – 5.1) Depots and Stands- (a) Bus Stand (b) Bus Depot etc. (c) Metro Car Shed (d) MRTS Station (e) PMPML</p>	<p>Planning Authority /Appropriate Authority / Owner</p>	<p>The Planning Authority / Appropriate Authority may acquire and develop the reservation site for the same purpose.</p> <p>OR</p> <p>i) The Commissioner may allow the owner to develop the reservation, subject to handing over to the Planning Authority 50 % independent plot along with 50% constructed amenity of total area free of cost in lieu of construction amenity TDR as per general Regulation No. (iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The owner shall be entitled to develop remaining 50 % land for the uses permissible in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p>
<p>5.2) Roads- Proposed Development Plan Roads / Road widening.</p>	<p>Planning Authority/ Appropriate Authority.</p>	<p>The Planning Authority/ Appropriate Authority shall acquire the land and develop the reservation for the same purpose.</p>
<p>5.3) Parking -</p>	<p>Planning Authority /Appropriate Authority / Owner</p>	<p>i) The Planning Authority/ Appropriate Authority may acquire and develop the site for the same purpose.</p> <p>OR</p> <p>ii) The Planning Authority/ Appropriate Authority after acquiring the land or after acquiring and developing the same, as the case may be, lease out as per the provisions of the Municipal Corporations Act, to the Registered Public Institution for developing and running or only for running the same.</p> <p>OR</p> <p>The Owner may be allowed to develop parking space according to the designs,</p>

		<p>specifications and conditions prescribed by the Municipal Commissioner subject to handing over of constructed parking area equal to double the reservation area, to Planning Authority free of cost subject to condition that,</p> <p>i) The operation and the maintenance of the facility will be decided by Municipal Commissioner.</p> <p>ii) Parking spaces may be in basement or on stilts or on first/second floor with separate entry & exit.</p> <p>After handing over the above said parking area to the Planning Authority, the owner shall be entitled to construct with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot for other permissible user in that zone .</p> <p>iii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI if any (after deducting in-situ FSI as mentioned in sr. no. (ii) above) which shall be utilised as per the TDR utilisation regulations.</p>
<p>6) Educational – (a) Primary School (b) High School (c) College</p>	<p>Planning Authority/ Appropriate Authority/ Registered Public</p>	<p>The Planning Authority/ Appropriate Authority may acquire and develop the site for the same purpose. The Planning Authority/ Appropriate Authority after acquiring land or after acquiring and constructing the building on it, as the case may be, lease out the same as per the provisions of the Municipal Corporations Act, to the Registered Public Educational Institution trust for developing and running or only for running the same.</p> <p>OR</p> <p>The owner may be allowed to develop the reservation for the same purpose. The Registered Public Educational Institution trust on behalf of owner may be allowed to be develop subject to terms /conditions as prescribed by the Planning Authority.</p> <p>OR</p> <p>i) The Commissioner may allow the owner to develop the reservation, subject to handing</p>

21/03

		<p>over to the Planning Authority 50 % independent plot along with 50% constructed amenity of total area free of cost in lieu of construction amenity TDR as per general Regulation No.(iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The owner shall be entitled to develop remaining 50 % land for the uses permissible in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p> <p>iii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI if any (after deducting in-situ FSI as mentioned in sr. no. (ii) above) which shall be utilised as per the TDR utilisation regulations.</p> <p>Provided that the area of reservation to be handed over shall not be less than norms decided by the Education Department.</p> <p>iv) Reservation shall not be allowed to be developed in parts.</p>
(d)Educational Complex	Planning Authority/ Appropriate Authority/ Land Owner	<p>The Planning Authority/ Appropriate Authority may acquire and develop the site for the same purpose.</p> <p>OR</p> <p>The Planning Authority/ Appropriate Authority after acquiring land or after acquiring and constructing the building on it, as the case may be, lease out the same as per the provisions of the Municipal Corporations Act, to the Registered Public Educational Institution Trust for developing and running or only for running the same.</p> <p>OR</p> <p>The owner may be allowed to develop the reservation for the same purpose. The Registered Public Educational Institution trust on behalf of owner may be allowed to be develop subject to terms /conditions as prescribed by the Planning Authority.</p> <p>OR</p> <p>If the area of the Educational Complex</p>

		<p>reservation is more than 3.00 Hect, then</p> <p>i) The Commissioner may allow the owner to develop the reservation, subject to handing over to the Planning Authority 50 % independent plot along with 50% constructed amenity of total area free of cost in lieu of construction amenity TDR as per general Regulation No.(iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI if any (after deducting in-situ FSI as mentioned in sr. no (ii) above) which shall be utilised as per the TDR utilisation regulations.</p> <p>iii) The Planning Authority, if required, shall allow TDR to the owner after deducting in-situ FSI utilized on 50% land mentioned in(ii).</p>
<p>7) Residential(R)-</p> <p>(a)Public Housing EWS/LIG Housing.</p> <p>(b)High Density Housing.</p> <p>(c)Housing for Dis-housed.</p> <p>(d) Public Housing / Housing for Dis-housed.</p> <p>(e)Reservation similar as above.</p>	<p>Planning Authority/ Appropriate Authority/ Owner</p>	<p>Planning Authority / Appropriate Authority may acquire the reserved land and develop for the same purpose.</p> <p>OR</p> <p>i) The Municipal Commissioner may allow the owner to develop the reservation, subject to handing over of 40% land alongwith 50% built up area of basic FSI constructed tenements of 25 sq.m. to 30sq.mt carpet area to the Planning Authority free of cost in lieu of construction amenity TDR as per general Regulation No.(iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The owner shall be entitled to develop remaining 60 % land for the uses permissible in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p> <p>iii) The Planning Authority, if required, shall allow TDR to the owner after deducting in-situ FSI utilized on 40% land mentioned in (i).</p> <p>iv) The Planning Authority / Appropriate Authority shall allot such tenement on priority to the persons dispossessed by</p>

		<p>implementation of Development Plan.</p> <p>OR</p> <p>The Municipal Commissioner may allow the owner to develop the reservation, subject to</p> <p>a) Handing over of 50 % land to Planning Authority, for laying out plots for EWS/LIG , The owner shall thereafter be entitled to develop remaining plot as per the uses permissible in residential zone with permissible FSI of entire plot on remaining plot without taking into account the area handed over to the Planning Authority.</p> <p>The Planning Authority / Appropriate Authority shall prepare layout for EWS/LIG plots and allot such plots on priority to the persons dispossessed by implementation of Development Plan. The Planning Authority may construct EWS/LIG tenements on such land.</p> <p>Owner can select any one option of the above, once the permission for that option is granted and work commenced then he cannot be permitted to shift for other option.</p>
<p>8) Assembly and Institutional-</p> <p>Town Hall, drama Theatre, Auditorium, Samaj Mandir, Community Hall, Multipurpose Hall etc.</p>	<p>Planning Authority/ Appropriate Authority/ Owner</p>	<p>i) The Planning Authority / Appropriate Authority may acquire and develop the site for the same purpose.</p> <p>ii) The Planning Authority / Appropriate Authority after acquiring the land or after acquiring and developing the same, as the case may be, lease out as per the provisions of the Municipal Corporations Act, to a Registered Public Institution to develop and running or only for running the same.</p> <p>OR</p> <p>i) The Commissioner may allow the owner to develop the reservation, subject to handing over to the Planning Authority 50 % independent plot along with 50% constructed amenity of total area free of cost in lieu of construction amenity TDR as per general Regulation No.(iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The owner shall be entitled to develop remaining 50 % land for the uses permissible</p>

		<p>in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p> <p>iii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI if any (after deducting in-situ FSI as mentioned in sr no (ii) above) which shall be utilised as per the TDR utilisation regulations.</p> <p>iv) Reservation shall not be allowed to be developed in parts.</p>
9) Reservations of composite nature like Vegetable Market & Shopping Centre, Town Hall & Library, etc.	Planning Authority/ Appropriate Authority/ Owner	<p>i) The Planning Authority / Appropriate Authority may acquire and develop the site for the same purpose.</p> <p>Clarification-</p> <p>For the reservation of composite nature, proposed in Development Plan except Town Hall & Library, area of each user shall be considered equal i.e. 50-50% and such area shall be allowed to be developed as per the guidelines applicable for such reservation as mentioned in these regulations.</p> <p>For Town Hall & Library, area of Library shall be 10% of area of Town Hall.</p>
10) Reservations which are not included in these regulations but are compatible to other similar type of reservation.	Planning Authority/ Appropriate Authority/ Owner	<p>Planning Authority/ Appropriate Authority may acquire the reserved land and develop for the same purpose.</p> <p>OR</p> <p>The development permissions for such type of user under this Regulation may be granted by the Municipal Commissioner in consultation with the Divisional Joint Director of Town Planning, subject to verification of compatibility of both the users and allowed to be developed as per the guidelines applicable for such reservation as mentioned in these regulations.</p>
11) For other buildable reservations shown in Development Plan which are not covered above	Planning Authority/ Appropriate Authority/ Owner.	<p>The Planning Authority / Appropriate Authority may acquire and develop the reservation site for the same purpose. OR</p> <p>i) The Commissioner may allow the owner to develop the reservation, subject to handing over to the Planning Authority 40 % independent plot along with 50% constructed</p>

		<p>amenity of total area free of cost in lieu of construction amenity TDR as per general Regulation No.(iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The owner shall be entitled to develop remaining 60 % land for the uses permissible in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p> <p>iii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI if any (after deducting in-situ FSI as mentioned in sr. no (ii) above) which shall be utilised as per the TDR utilisation regulations.</p> <p>iv) Reservation shall be allowed to be developed in parts.</p>
12) Reservations for the Appropriate Authority other than Municipal Corporation	Planning Authority/ Appropriate Authority/ Owner	<p>Planning Authority / Appropriate Authority may acquire the reserved land and develop for the same purpose.</p> <p>OR</p> <p>The Municipal Corporation may allow the owner to Develop the reservation subject to condition that;</p> <p>i)Wherever the reservation is to be developed by the Appropriate Authority other than Municipal Corporation, No Objection Certificate from the Appropriate Authority shall be obtained before granting development permission.</p> <p>ii) The concerned Appropriate Authority (other than the State Government Department) shall deposit cost of construction for the built-up area to be handed over to it, as per Annual Statement of Rates with the Planning Authority. However, the Municipal Commissioner shall handover such constructed area to the State Government / concerned State Government Department free of cost.</p>

General conditions to allow development under above regulations:-

- i) The above permissions for development of reservations shall be granted by the Municipal Commissioner as per the norms mentioned in these regulations. Such permission may be granted by the Municipal Commissioner where the land is not actually put to acquisition under The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 or proposal to that effect is not under process.
- ii) If the area of reservation is not adequate to construct independent building as mentioned above OR When it is not possible to handover individual plot along with public amenity, then in such cases Municipal Commissioner may allow composite building on said land subject to condition that the built up area mentioned as above may be allowed to be handed over to the Planning Authority or Appropriate Authority, as the case may be, preferably on ground floor and subject to premium as may be decided by Government from time to time. If ground floor is utilised for parking, then on stilt/first floor with separate entry & exit from public street. In such cases, built-up area along with proportionate undivided share of land shall be handed over to the Planning Authority or Appropriate Authority, as the case may be. In such cases no compensation of proportionate undivided land share shall be permissible.
- iii) In cases where not specifically mentioned in this regulation, if the area under the reservation is owned by more than one owners, then the owner/s may come forward jointly or the owners holding atleast 50% or more area shall be allowed to develop the reservation on such land. It is mandatory for other owners to construct amenity contiguous to the earlier development.
- iv) The owner/developer shall be entitled for construction amenity TDR as per the TDR regulations after handing over the constructed amenity free of cost on the land surrendered to the planning Authority under this Regulation. For specific reservation where construction amenity is not required by the Commissioner, in such cases Municipal Commissioner should not insist for such amenity.
- v) It shall be obligatory on Planning Authority to make registered agreement with the developer /owner at the time of granting the development permission subject to terms and conditions as it deem fit. Occupancy Certificate shall be issued only after compliance of all terms & conditions and getting possession of the constructed amenity.
- vi) The above permissions for development of reservations shall be granted by the Municipal Commissioner as per the norms mentioned in these regulations
- vii) The area / built-up area to be handed over to the Planning Authority under these Regulations shall be earmarked on the sanctioned building plan clearly mentioning the same, and registered agreement to that effect shall be executed. After completion of construction, the said amenity shall be handed over by executing the deed of transfer in this respect and expenses thereon shall be borne by the owner. The occupation certificate to the construction belonging to owner shall be granted only after handing over said amenity to the Planning Authority. The constructed amenity shall be made available to the general public by the Municipal Commissioner within 3 month from possession as per the condition as Commissioner deem fit.
- viii) In cases, where permission for development under accommodation reservation principle is already granted as per earlier regulations, the same shall continue to be valid till completion of construction.
- ix) Provisions of Regulations of Inclusive Housing, Amenity Space if any, shall not be applicable for development under this Regulation. Moreover Regulation of required recreational open space shall not be applicable for development of reservation other than Residential purpose as

mention at sr. no.7.

- x) Notwithstanding anything contained in these regulations, there shall be no cap for utilization of available in-situ FSI/and TDR potential of the entire plot on the remaining plot provided that no relaxation in side margin shall be permissible.
- xi) Once sanction is granted under this regulation, the owner /developer shall have to complete the development and hand over the developed reservation to Planning Authority within the period as specified by Municipal Commissioner. Thereafter Planning Authority may levy penalty for any delay.

22.0 TRANSFERABLE DEVELOPMENT RIGHTS (TDR)

22.1 Transferable Development Rights (TDR) is compensation in the form of Floor Space Index (FSI) or Development Rights which shall entitle the owner for construction of built-up area subject to provisions in this regulation. This FSI credit shall be issued in a certificate which shall be called as Development Right Certificate (DRC).

Development Rights Certificate (DRC) shall be issued by Municipal Commissioner under his signature and endorse thereon in writing in figures and in words, the FSI credit in square meters of the built-up area to which the owner or lessee is entitled, the place from where it is generated and the rate of that plot as prescribed in the Annual Statement of Rates issued by the Registration Department for the concerned year.

22.2 CASES ELIGIBLE FOR TRANSFERABLE DEVELOPMENT RIGHTS (TDR):-

Compensation in terms of Transferable Development Rights (TDR) shall be permissible for

- i) lands under various reservations for public purposes, new roads, road widening etc. which are subjected to acquisition, proposed in Draft or Final Development Plan, prepared under the provisions of the Maharashtra Regional and Town Planning Act,1966;
- ii) lands under any deemed reservations according to any regulations prepared as per the provisions of Maharashtra Regional & Town Planning Act, 1966;
- iii) lands under any new road or road widening proposed under the provisions of Maharashtra Municipal Corporation Act ;
- iv) development or construction of the amenity on the reserved land;
- v) unutilized FSI of any structure or precinct which is declared as Heritage structure or Precinct under the provisions of Development Control Regulations, due to restrictions imposed in that regulation;
- vi) in lieu of constructing housing for slum-dwellers according to regulations prepared under the Maharashtra Regional & Town Planning Act, 1966;
- vii) The purposes as may be notified by the Government from time to time, by way of, modification to, new addition of, any of the provisions of sanctioned Development Control Regulations.

22.3 CASES NOT ELIGIBLE FOR TRANSFERABLE DEVELOPMENT RIGHTS (TDR):-

It shall not be permissible to grant Transferable Development Rights (TDR) in the following circumstances:-

- i) For earlier land acquisition or development for which compensation has been already paid partly or fully by any means;
- ii) where award of land has already been declared and which is valid under the Land Acquisition Act,

1894 or the Right to Fair Compensation & Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 unless lands are withdrawn from the award by the Appropriate Authority according to the provisions of the relevant Acts.

iii) In cases where layout has already been sanctioned and layout roads are incorporated as Development Plan roads prior to these regulations.

iv) in cases where layout is submitted along with proposed Development Plan Road, in such cases TDR shall not be permissible for the width of road that would be necessary according to the length as per Development Control Regulations;

v) if the compensation in the form of FSI / or by any means has already been granted to the owner.

vi) where lawful possession including by mutual agreement /or contract has been taken.

vii) For an existing user or retention user or any required compulsory open space or recreational open space or recreational ground, in any layout.

viii) For any designation, allocation of the use or zone which is not subjected to acquisition.

22.4 GENERATION OF THE TRANSFERABLE DEVELOPMENT RIGHTS (TDR)

22.4.1 Transferable Development Rights (TDR) against surrender of land :-

a) For Surrender of the gross area of the land which is subjected to acquisition, free of cost and free from all encumbrances, the owner shall be entitled for TDR or DR irrespective of the FSI permissible or development potential of the vary said land to be surrender and also that of land surrounding to such land at the rate as given below:-

Area Designated on DP	Entitlement for TDR/DR
Non-congested Area	2 times the area of surrendered land.
Congested Area	3 times the area of surrendered land.

(Explanation: Above entitlement may also be applicable to the compensation paid in the form of FSI to the owner to be utilised on unaffected part of same land parcel and in such cases the procedure of DRC shall not be insisted.)

Provided that, if levelling of land and construction/erection of the compound wall / fencing as per Clause No.40.4.1.b to the land under surrender is not permissible as per the prevailing Development Control Regulations, the quantum of TDR shall be reduced to 1:1.85 and 1:2.85 in non-congested area and congested area respectively.

Provided also that Additional / incentive Transferable Development Rights (TDR) to the extent of 20 % , 15 % , 10 % and 5% of the surrendered land area shall also be allowed to the land owners who submit the proposal for grant of Transferable Development Rights (TDR) within 1, 2 ,3 years and 5 years from the TDR notification (i.e. from 28/01/16) respectively.

Provided that the quantum of generation of TDR as prescribed above, shall not be applicable for TDR generated from construction of amenity or construction of reservation/roads, Slum TDR, and Heritage TDR. Also the quantum of Transferable Development Rights (TDR) generated for reservation in CRZ/BDP/HTHS areas or in areas which have some natural or legal constraint on development shall be as decided by the Government separately.

b) DRC shall be issued only after the land is surrendered to the Municipal Corporation, free of cost and free from encumbrances and after levelling the land to the surrounding ground level and after constructing / erecting a 1.5 m. high compound wall / fencing i.e. brick/stone wall up to 0.60 m.

above ground level and fencing above that up to remaining height with a gate, at the cost of the owner and to the satisfaction of the Municipal Commissioner. Provided that, if on certain lands such construction / erection of compound wall / fencing is prohibited or restricted by any regulation, then quantum of Transferable Development Rights (TDR) shall be reduced as prescribed in proviso to Clause 40.4.1.a.

Provided further that, such construction / erection of compound wall/ fencing shall not be necessary for area under Development Plan roads. In such cases TDR equivalent to entitlement as mentioned in Regulation No. 40.4.1.a shall be granted without any reduction.

c) If any contiguous land of the same owner/developer, in addition to the land under surrender for which Transferable Development Rights (TDR) is to be granted, remains unbuildable, the Municipal Commissioner may grant Transferable Development Rights (TDR) for such remaining unbuildable land also if the owner / developer hands it over free of cost and free from all encumbrance and encroachment. If such land is from the proposed roads then such land shall be utilised for road side parking, garden, open space or road side amenities including bus bays, public toilets or any compatible user as the Commissioner may decide and if the such land is from the proposed reservation then same shall be included in such proposed reservation and shall be developed for the same purpose. The Municipal Commissioner shall quarterly report such cases to Government.

d) In case of lessee, the award of Transferable Development Rights (TDR) shall be subject to lessee paying the lessor or depositing with the Planning Authority for payment to the lessor, an amount equivalent to the value of the lessors' interest to be determined by the Planning Authority on the basis of Land Acquisition Act, 1894 or the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 against the area of land surrendered free of cost and free from all encumbrances.

22.4.2 Transferable Development Rights (TDR) against Construction of Amenity-

When an owner or lessee with prior approval of Municipal Commissioner, may develop or construct the amenity on the surrendered plot or on the land which is already vested in the Planning Authority, at his own cost subject to such stipulations as may be prescribed and to the satisfaction of the Municipal Commissioner and hands over the said developed/constructed amenity free of cost to the Municipal Commissioner then he may be granted a Transferable Development Rights (TDR) in the form of FSI as per the following formula:-

Construction Amenity TDR in sq.m. = A/B * 1.25

Where,

A= cost of construction of amenity in rupees as per the rates of construction mentioned in Annual Statement of Rates (ASR) prepared by the Inspector General of Registration for the year in which construction of amenity is commenced.

B = land rate per sq.m. as per the Annual Statement of Rates (ASR) prepared by the Inspector General of Registration for the year in which construction of amenity is commenced.

22.5 UTILISATION TRANSFERABLE DEVELOPMENT RIGHTS (TDR):-

22.5.1 A holder of DRC who desires to use FSI credit therein on a particular plot of land shall attach valid DRCs to the extent required with his application for development permission. Proposal for Transferable Development Rights (TDR) utilisation shall be submitted alongwith the documents as may be prescribed by the Commissioner or by the Government from time to time.

22.5.2 With an application for development permission, where an owner seeks utilisation of DRC, he shall submit the DRC to the Municipal Commissioner who shall endorse thereon in writing in figures and words, the quantum of the TDR proposed to be utilised, before granting development permission. Before issuance of Occupation Certificate, the Commissioner shall endorse on the DRC, in writing in figures and words, the quantum of TDR/DRs actually used and the balance remaining if any.

22.5.3 The Transferable Development Rights (TDR) generated from any land use zone shall be utilised on any receiving plot irrespective of the land use zone and anywhere in congested or non-congested area earmarked on Development Plan. The equivalent quantum of Transferable Development Rights (TDR) to be permitted on receiving plot shall be governed by the formula given below:-

$$\text{Formula: } X = (R_g / R_r) \times Y$$

Where, X = Permissible Utilisation of TDR/DR in sq.m. on receiving plot

R_g = Rate for land in Rs. per sq.m. as per ASR of generating plots in generating year

R_r = Rate for land in Rs. per sq.m. as per ASR of receiving plot in generating year

Y = TDR debited from DRC in sq.m.

22.5.4 Utilisation of Transferable Development Rights (TDR) and Road Width Relation:-

1) Notwithstanding anything contained in any regulation, the total maximum permissible built-up area and utilisation of Transferable Development Rights (TDR) on receiving plot shall be, subject to the road width, as prescribed below:-

Sr. No.	Plots Fronting on Road width	Maximum permissible TDR Loading
1	2	3
1	9mt and above but less than 12	0.40
2	12mt and above but less than 18	0.65
3	18mt and above but less than 24	0.90
4	24mt and above but less than 30	1.15
5	30 mt. and above	1.40

Note:-

i) Column No.3 shows the maximum permissible TDR that can be utilised on any plot. Provided that specific area based restriction where TDR utilisation is not permissible by earlier regulations shall remain in force except for Gaothan / Congested areas and along NH/SH/Ring road/Arterial roads. Provided also that the above utilisation of TDR would be available to an existing road width of 9mt and above so marked under the relevant Municipal Corporation Act.

ii) Maximum Building potential mention in Table No. 5 and 8 Column No.6 shall includes the basic FSI, allowable TDR, Additional FSI if any, Road widening FSI of the very said plot if any . However the Municipal Commissioner shall not grant any relaxation due to such allowable loading potential unless he himself satisfied that there is constraint on development.

iii) Maximum permissible TDR loading as mentioned above on any plot shall be exclusive of FSI allowed for inclusive housing if any.

The quantum of maximum permissible TDR loading mentioned above shall include atleast 20 %

slum TDR (wherever applicable), DRC generated from the vary said land and/or DRC generated from other location up to the permissible limit mention above .

v) If a plot is situated on internal road having dead end within 50 mt. from the main road, then such plot shall be treated as fronting on main road for the purpose of utilisation of TDR.

2) Provided that, the restrictions of total maximum permissible built up area in terms of FSI with respect to road width mentioned above shall not be applicable in cases where, the permissible FSI is more than the basic FSI in various schemes, like Slum Rehabilitation Scheme, Redevelopment of cess buildings, redevelopment of dangerous buildings, Urban Renewal Scheme, Redevelopment of MHADA buildings/Colonies, Metro Influence Zone BRTs, TODs etc. where specific provisions which are sanctioned by the Government shall apply.

3) Provided that, the additional FSI permissible in certain categories of buildings such as, Educational building, Registered Charitable Institutional/ Medical / Hospital Building, Star Category Hotel, Religious Building etc. as per prevailing Development Control Regulations, if any, can be availed either by full or part utilization of TDR or full or part utilization of additional FSI at the option of owner. However, the restriction of road width mentioned as above shall not be applicable when the owner exercises his option of availing utilization of additional FSI and in such cases limitation of maximum building potential as mentioned above shall not be applicable.

4) The utilisation of Transferable Development Rights (TDR) shall be permissible by considering Gross Plot Area excluding area affected by reservations or deemed reservation, if any. This principle shall also be applicable to the reservations to be developed under the provisions of Accommodation Reservation, by considering the total area of such reservation before surrender.

5) Areas Restricted from Utilisation of Transferable Development Rights (TDR) :-

Utilisation of Transferable Development Rights (TDR) shall not be permitted in following areas:-

- a) Agricultural / no development / Green zone / HTHS Zone and Bio Diversity Park reservation in the Development Plan.
- b) Area within the flood control line i.e. blue line (prohibitive zone) as specified by Irrigation Department.
- c) Coastal regulation zone.
- d) Where the permissible basic Zonal FSI is less than 0.75.
- e) Area having developmental prohibition or restrictions imposed by any notification issued under the provisions of any Central/State Act (like CRZ regulations, Defence restriction areas, etc.) or under these regulations.

22.6 GENERAL STIPULATION:-

- 22.6.1** Development Rights (DRs) will be granted to an owner or lessee, only for reserved lands which are retainable and not vested or handed over to the Government /Urban Local Bodies and not exempted under section 20 or 21 of the then Urban Land (Ceiling and Regulations) Act, 1976 and undertaking to that effect shall be obtained, before a Development Right is granted. In the case of schemes sanctioned under section 20 or 21 of the said Act, the grant of Development Rights (DRs) shall be to such extent and subject to the conditions mentioned in section-20 scheme and such conditions as the Government may prescribed. In case of non-retainable land, the grant of Development Rights shall be to such extent and subject to such conditions as the Government may specify. The provisions of this Regulation shall be subject to the orders issued by the Government from time to time in this

regard.

Provided that, in case of lands having tenure other than Class-I, like Inam lands, tribal lands etc., N.O.C. from Competent Authority, mentioning i) share of Government and land holder ii) transfer of such land in the name of Planning / Appropriate Authority, shall be produced by the land holder at the time of submission of application for grant of TDR.

- 22.6.2** DRC shall be issued by the Municipal Commissioner as a certificate printed on bond paper in an appropriate form prescribed by him. Such a certificate shall be a "transferable and negotiable instrument" after the authentication by the Municipal Commissioner. The Municipal Commissioner shall maintain a register in a form considered appropriate by him of all transactions, etc. relating to grant of, or utilisation of, DRC.
- 22.6.3** The Commissioner shall issue DRC within 180 days from the date of application or reply from the applicant in respect of any requisition made by him, whichever is later.
- 22.6.4 Transfer of DRC-**
- 1) The Commissioner shall allow transfer of DRC in the following manner
- i) In case of death of holder of DRC, the DRC shall be transferred only on production of the documents as may be prescribed by him from time to time, after due verification and satisfaction regarding title and legal successor.
- ii) If a holder of DRC intends to transfer it to any other person, he shall submit the original DRC to the Commissioner with an application alongwith relevant documents as may be prescribed by the Commissioner and a registered agreement which is duly signed by Transferor and Transferee, for seeking endorsement of the new holders name, i.e., the transferee, on the said certificate. The transfer shall not be valid without endorsement by the Commissioner and in such circumstances the Certificate shall be available for use only to the holder / transferor.
- 2) The utilisation of TDR from certificate under transfer procedure shall not be permissible, during transfer procedure.
- 22.6.5** The Commissioner may refrain the DRC holder from utilizing the DRC in the following circumstances:-
- i. Under direction from a competent Court.
- ii. Where the Commissioner has reason to believe that the DRC is obtained a) by producing fraudulent documents b) by misrepresentation,
- 22.6.6** Any DRC may be utilised on one or more plots or lands whether vacant, or already developed fully or partly by erection of additional storeys, or in any other manner consistent with the prevailing Development Control Regulations,
- 22.6.7** DRC may be used on plots/land having Development Plan reservations of buildable nature, whether vacant or already developed for the same purpose, or on the lands under deemed reservations, if any, as per prevailing Regulations.
- 22.6.8** DRC may be used on plots/land available with the owner after surrendering the required land and construction to the Planning Authority under the provisions of Accommodation Reservation. In such circumstances, for the purpose of deciding Transferable Development Rights (TDR) receiving potential, the total area of the reservation before surrender, shall be considered.

22.6.9 Infrastructure Improvement Charges-

The utilizer shall pay to the Planning Authority, an infrastructure improvement charges, for a proposed quantum of TDR to be utilised, at the rate of 5% of construction cost as per the prevailing Annual Statement of Rates.

22.7 VESTING OF LAND :-

22.7.1 The Commissioner, before issuing DRC, shall verify and satisfy himself that the ownership and title of the land proposed for surrender is with the applicant, and get the Record of Right to be corrected in the name of Planning Authority.

22.7.2 In case the Appropriate Authority for reservation is other than Planning Authority, it shall be permissible for the Commissioner on the request of such authority to grant TDR under this regulation and hold such possession as a facilitator. Provided that, the Municipal Commissioner shall handover the possession of such land to concerned Appropriate Authority, after receipt of value of land, from such Appropriate Authority as per Annual Statement of Rates prevailing at the time of handing over possession of land under reservation.

Provided also that, if such Appropriate Authority is the State Government Department, the Municipal Commissioner shall handover the possession of such land to the concerned Department free of cost.

22.8 EFFECT OF THIS REGULATION:-

Provision of Generation of TDR from these regulations shall not be applicable where DRC has been issued prior to date of publication of TDR Regulations under section 37 (1AA) (a) of the MR & TP Act, 1966 i.e. dated 30/04/2015. However DRCs issued under the old Regulations shall be allowed to be utilised as per TDR zones of old Regulations without indexation but subject to all other conditions of these regulations. Such utilisations shall be allowed for one year only from the date 29/01/2016 (i.e. the date of sanctioned of TDR Regulations under section 37 (1AA) (c) of the MR & TP Act, 1966 vide notification dated 28/01/2016 which appeared in Government Gazette on 29/01/2016).

Provided also that old TDR purchased for utilisation on a specific plot with registered documents of sale and / or specific proposal for utilisation of such TDR pending in the ULBs prior to these regulations shall be allowed completely as per the old regulations.

23.0 RESERVATION CREDIT BOND (RCB)

The reservation credit bond is a bond specifying the amount of compensation in lieu of handing over of reserved land to the Corporation and shall be issued by the Municipal Commissioner. The amount mentioned in this credit bond may be used for payment of any charges to the Corporation from time to time in future till exhausting the amount mentioned therein. Reservation Credit Bond shall be issued subject to the following conditions.

- i) Such bond shall not bear any interest on the amount mentioned there in.
- ii) The amount of compensation to be paid to the owner shall be as per the provisions of the relevant Acts dealing with land acquisition as amended from time to time.
- iii) The land to be handed over to the Corporation shall be free from all encumbrances and procedure laid down in TDR regulations shall be followed.

The Municipal Commissioner shall endorse the entries of payment on such bond from time to time. He shall maintain a record in a form considered appropriate by him of all transactions relating to grant of or utilisation of reservation credit bonds.

PART - VIII
HIGHER FSI FOR CERTAIN USERS

24.0 GENERAL

Additional/higher Floor space index may be allowed in certain categories in non-congested area, except as otherwise specified and subject to following conditions:

- a) Permissible **additional FSI** for the buildings as mention in Table no 20 shall be the maximum permissible building potential according to road width as mention in column 6 of Table no.5 or 8 of Regulation no 17.1.1 or 17.3 (wherever applicable) **minus** Basic FSI. No restriction to avail the additional FSI in the form of FSI only.
- b) Such additional FSI shall be available for use for which additional FSI is granted only and other permissible uses shall be allowed within the basic Permissible FSI.
- c) **Premium** –Premium for additional F.S.I. shall be per column 4 of the table. Rate of the premium is based on the land rate mentioned in ASR for respective S.No./CTS No. The premium collected shall be shared 50:50 between State Government & Corporation respectively. Premium to be paid to the Government shall be deposited in the concerned Account Head of Urban Development Department at Government Treasury by the Planning Authority. The following quantum of premium shall be subject to the orders of the Government from time to time.
- d) The additional FSI shall also be permissible to existing authorised users subject to structural stability.
- e) The other conditions as mentioned in the Government Directives issued under section 154 of the M.R.&T.P.Act 1966 vide Resolution no TPS-1815/2647/CR-13/15/UD 13/Dared 14/03/2016 shall also be applicable.
- f) If the owner / developer desire to avail such additional FSI in future for new buildings , then while seeking building permission at first instance, the building plan shall be submitted considering the Marginal distances as required for the height of buildings for such additional FSI. No condonation in the required open spaces, parking and other requirements in these regulations shall be allowed. However for the existing building proposals, such condition need not be insisted. But proposal shall be cleared only after strictly confirming structural and fire safety norms.
- g) Exit Requirements, Requirements of Water Supply, Drainage and Sanitation Parking spaces requirements, Fire provision requirements shall conform the provisions as mentioned in these regulations
- h) No Amenity Spaces shall required to be provided for the uses mention in Table No.20, except at sr.no.(I)

Table No. 20

24.1 - Permissible Marginal spaces, permissible basic FSI, Additional FSI for buildings in non-congested area

Categories of the other buildings	Basic FSI	additional FSI	Rate of the Premium	Conditions if any,									
1	2	3	4	5									
A) Educational i) Pre-primary School, nursery Kinder garden and Special Educational Institute for Physically handicapped/Mentally ill.	As per Regulation No.17.1.1 or 17.3, wherever required	Maximum Building Potential limit as per road width as mention in column 4 of Table No. 5 or 8 (wherever required) minus basic FSI	10 %	Educational building excepting buildings for Pre-primary School, nursery Kinder garden and Special Educational Institute for Physically handicapped/Mentally ill. a) if the total area of the plot is not less than 0.4 hect. except lands reserved in development plan, and for the redevelopment of existing Municipal Schools, b) area as mentioned below is available for playground.									
ii) Primary School	As per Regulation No.17.1.1 or 17.3 wherever required	Maximum Building Potential limit as per road width as mention in column 4 of Table No. 5 or 8 (wherever required) minus basic FSI	20 %	<table border="1"> <thead> <tr> <th>Sr.No.</th> <th>Area of land</th> <th>Area of Play Ground</th> </tr> </thead> <tbody> <tr> <td>(i)</td> <td>Upto 5 Hect.</td> <td>40%</td> </tr> <tr> <td>(ii)</td> <td>Above 5 Hect.</td> <td>For first 5 hect. 40% and for remaining 20%</td> </tr> </tbody> </table>	Sr.No.	Area of land	Area of Play Ground	(i)	Upto 5 Hect.	40%	(ii)	Above 5 Hect.	For first 5 hect. 40% and for remaining 20%
Sr.No.	Area of land	Area of Play Ground											
(i)	Upto 5 Hect.	40%											
(ii)	Above 5 Hect.	For first 5 hect. 40% and for remaining 20%											
iii) Other Educational Buildings including boys/ girls / youth hostels within 500 m. periphery from the recognised educational institutions.	As per Regulation No.17.1.1 or 17.3 wherever required	Maximum Building Potential limit as per road width as mention in column 4 of Table No. 5 or 8 (wherever required) minus basic FSI	30 %	<p>Provided that, it shall not be necessary to increase area of existing playground; if any, when utilisation of additional FSI as otherwise permissible in these regulations, is proposed on upper floor of existing building.</p> <p>Provided further that, in case of existing building wherein utilisation of additional FSI is proposed, area of playground shall not be less than 40% or the existing area of playground whichever is minimum.</p> <p>Provided further that, in case of existing building wherein utilisation of additional FSI on upper floors is not possible and it is</p>									

necessary to expand the existing building to accommodate number of students, then in such exceptional circumstances, area of play ground may be permitted to be reduced, with the prior permission of Government.

Other Conditions-

- i) The Educational Institute shall be of Government/Semi Government public authorities, Charitable Institutions or Private Institutions
- ii) Educational buildings shall not be permissible within 60 m. from the existing assembly building and 90 m. from the existing petrol pump.
- iii) Educational building shall only be permitted if 40% area is available for playground. However, this provision shall not be applicable to already approved existing building wherein construction of additional floor is proposed.
- iv) No classroom shall admeasure less than 38 sq. m. with a minimum dimension of 5.50 m. The height of any classroom shall not be less than 3.60 m.
- v) While granting Additional FSI to Educational Institutions offering primary and secondary education 5 % seats shall be reserved for admission for Government nominees. Deputy Director, Education Department shall be competent to decide such nominations. However, this condition shall not be applicable for Higher Education, Technical Education and Medical Education.
- vi) As and when required, some rooms of Educational Buildings shall be made available to the Government by the concerned institutions.
- vii) The Educational Institution shall maintain records regarding free / concessional education rendered to the needy persons, which shall

DCPR-2017 FOR PUNE MUNICIPAL CORPORATION

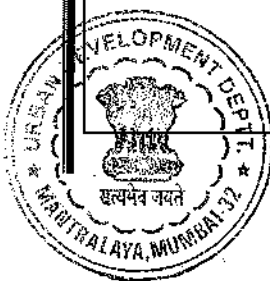

<p>be made available to the Director of School Education, Higher and Technical Education on demand.</p> <p>viii) The Director of School Education, Government of Maharashtra shall be the competent authority to monitor as to whether the Educational Institution is observing the terms and conditions referred to at (i), (ii) and (iii) above and, in case of any breach thereof or in case the Education being rendered by the Educational Institution are not to the satisfaction of the said Department, the Director of School Education shall have the right to suitably penalise the Educational Institution.</p> <p>ix) The Educational Institution shall file an undertaking that it shall abide by the above enumerated terms and conditions.</p> <p>x) Adequate Parking facilities as required per prevailing Development Control Regulation shall be provided.</p> <p>xi) While granting occupation certificate the Municipal Commissioner shall intimate to the Director of school Education for compliance of afore said condition along with copy of occupation certificate and plan.</p> <p>xii) Maximum of height of Educational building shall be as per The Maharashtra Fire protection and Life Safety Measure, Act, 2006</p> <p>xiii) Hostels shall not be misused and converted into other use. If it is found that the hostels are used for other purpose, Municipal Commissioner Authorised to take action as per the law.</p>				<p>B) Medical Institutions- Hospital, Maternity Homes, Health Club, buildings</p>
			<p>As per Regulation No.17.1.1 or 17.3, wherever required</p>	
			<p>Maximum Building Potential limit as per road width as mention in column 4 of Table No. 5 or 8 (wherever required) minus basic FSI</p>	
	<p>i) No premium for Government, Semi Government, public authorities</p>			
				<p>ii) Free medical treatment to the extent of atleast 20% of the total number of beds shall be given to persons from Economically Weaker Sections of society or to persons below the poverty line. In addition, 10% of the total number of patients in OPD shall be</p>

2017/36

<p>provided treatment at concessional rates, viz. rates that are being charged in government hospitals. The Medical Institution shall furnish the requisite periodical statements to the Director of Health Services in this regard.</p> <p>ii) The Medical Institution shall maintain records regarding free/concessional medical treatment rendered to the needy persons, which shall be made available to the Director of Health Services on demand.</p> <p>vi) Any Special ward in the hospital building shall not admeasure less than 9.0. sq.m. in area with no side less than 3 m.</p> <p>v) Area of the general wards shall not admeasure less than 40 sq. m. with no side less than 5.5. m.</p> <p>vi) Every building shall have a refuge collection area of minimum 7.50 sq. m. size with cover on top and unclosed on at least three sides. The same shall not be allowed in marginal open spaces. Modern method of incineration of the refuse may be adopted.</p> <p>vii) Minimum and maximum height shall be 3.00 m. & 4.2 m. respectively. The greater height may be permitted by the Authority as per the requirement.</p> <p>viii) The Director of Health Services, Government of Maharashtra shall be the Competent Authority to monitor as to whether the Medical Institution is observing the terms and conditions referred above and in case of any breach thereof or in case the medical services being rendered by the Medical Institution are not to the satisfaction of the Director of Health Services, the Director of Health Services shall have the right to suitably penalise the Medical Institution.</p> <p>ix) While granting occupation certificate the Municipal Commissioner shall intimate to the Director of Health Services,</p>	<p>hospitals.</p> <p>ii) 30% for Charitable Institutions</p> <p>iii) 40% for private hospitals</p>	<p>However maximum potential building shall be consider as 4.00 for Government Hospitals and 3.00 for other hospitals subject to Roads width 18 mt and more.</p>	
--	--	--	--

 <p>C) Institutional buildings/ Nationalised banks/ District Banks/ Central Bank/ Scheduled Bank/ Co-operative Bank.</p>	As per Regulation No.17.1.1 or 17.3 wherever required	Maximum Building Potential limit as per road width as mention in column 4 of Table No. 5 or 8 (wherever required) minus basic FSI	as above	<p>Government of Maharashtra for compliance of afore said condition along with copy of occupation certificate and plan.</p> <p>x) Maximum of height of building for hospitals, sanatorium and nursing homes, shall be as per The Maharashtra Fire protection and Life Safety Measure, Act, 2006.</p> <p>i) The institutional Buildings shall be of Government, Semi Government, public authorities or registered Charitable Institutions.</p> <p>ii) Minimum and maximum height shall be 3.60 m. & 4.2 m. respectively. The greater height may be permitted by the Authority as per the requirement.</p>
D) Starred category hotels (two star and above)	As per Regulation No.17.1.1 or 17.3 wherever required	Maximum Building Potential limit as per road width as mention in column 4 of Table No. 5 or 8 (wherever required) minus basic FSI. However maximum building potential shall be consider as 3.00 for Roads having width 18 mt. and more.	40% (up to four star) 50 % (five star and above)	<p>i) The star category hotels shall be constructed on independent plot.</p> <p>ii) Certificate from the Tourism Department, GOI shall be necessary.</p> <p>iii) Minimum and maximum height shall be 3.60 m. & 4.2 m. respectively. The greater height may be permitted by the Authority as per the requirement.</p> <p>iv) While granting Additional FSI to starred category Residential Hotels 5% of rooms shall be reserved for Government nominees free of cost. Provided that such rooms be reserved for a period of not exceeding thirty days in a calendar year in a particular hotel. The head of respective authorities shall be competent to decide and monitor whether the institution is observing the terms and conditions as mentioned.</p> <p>v) While granting occupation certificate the Municipal Commissioner shall intimate to the Competent Authority for compliance of afore said condition along with copy of occupation certificate and plan.</p>

<p>E) Buildings of Government and Semi-Government Offices, Local Authorities and Public Sector Undertakings:</p>	<p>As per Regulation No.17.1.1 or 17.3 wherever required</p>	<p>Maximum Building Potential limit as per road width as mention in column 4 of Table No. 5 or 8 (wherever required) minus basic FSI. However maximum building potential shall be consider as 4.00 for Roads having width 18 mt and more.</p>	<p>Government and Semi-Gove Office, Local Authorities – Nil. Public Sector – 30%</p>	<p>i) The Municipal Commissioner with the previous approval of State Govt. may exceed the additional FSI. ii) Minimum and maximum room height shall be 3.60 m. & 4.2 m. respectively. The greater height may be permitted by the Authority as per the requirement.</p>
<p>F) Religious Building:</p>	<p>As per Regulation No.17.1.1 or 17.3 wherever required</p>	<p>Maximum Building Potential limit as per road width as mention in column 4 of Table No. 5 or 8 (wherever required) minus basic FSI</p>	<p>15%</p>	<p>Structure used for worship like temple, church, mosque, gurudwara, agyari etc. (a) For any construction, addition or alteration or repairs of existing religious building prior permission from Home Department through Urban Development Department of Govt. of Maharashtra shall be mandatory. b) The proposal shall be in consistent with the Development Plan proposals. c) while granting occupation certificate the Municipal Commissioner shall intimate to the concerned Police Authority and Collector along with copy of occupation certificate and plan. d) subject to other conditions as decided by Municipal commissioner. e) It shall be necessary to obtain the No-Objection Certificate from concerned Police Authority and Collector, before grant of permission. f) Other ancillary user like, administration office, Dharmashala or Accommodation for devotees, eateries, convenience shops, etc.</p>

G) YatriNiwas,	As per Regulation No.17.1.1 or 17.3 wherever required	Maximum Building Potential limit as per road width as mention in column 4 of Table No. 5 or 8 (wherever required) minus basic FSI	15%	i) The building shall be on independent plot having minimum plot area of 1000 sq.mt. ii) Minimum and maximum height shall be 3.00 m. & 4.2 m. respectively. The greater height may be permitted by the Authority as per the requirement.
H) The Land in possession of Maharashtra State Road Transport Corporation, PMPML Pune, Metro Station	As per Regulation No.17.1.1 or 17.3 wherever required	Additional FSI 0.5 over and above the basic permissible FSI.	No premium	Out of total FSI, maximum 1.00 FSI shall be allowed to be developed for commercial use and remaining FSI shall be for the self-use of the said principle use. Appropriate land shall be kept open for parking of buses, movement of buses and passengers.
I) Basic shelter for urban poor and Housing schemes for backward class of the society	As per Regulation No.17.1.1 or 17.3, wherever required	Maximum Building Potential limit as per road width as mention in column 4 of Table No. 5 or 8 (wherever required) minus basic FSI or FSI upto 2.5, whichever is maximum	No premium	Any housing scheme undertaken by planning authority, government / semi government organisation, under the basic shelter for urban poor or similar programme / scheme of the Central / State Government, may be allowed FSI upto 2.5, or as permissible in these regulations whichever is maximum subject to following condition. i) The said scheme shall be for EWS/LIG housing having minimum width of road 9 mt. ii) The scheme shall be implemented by the Municipal Corporation / Government/semi-Government Authority stipulated by the Government, from time to time. iii) The use of the land under the Scheme shall be in consonance with the proposals of the sanctioned development plan. iv) Total permissible floor space index for the scheme shall be 2.50 of the gross plot area (excluding the area affected by the D.P. Reservations) v) The entire 2.50 FSI as made permissible shall be utilised of the scheme only.

20/11/2017

				<p>vi) All the development plan reservations on the land under the scheme shall be developed by the said authority and the amenities thus created shall be handed over to the planning authority.</p> <p>vii) Amenity spaces as required under these regulation shall be provided under this scheme</p>

24.2 ENTITLEMENT OF FSI FOR ROAD WIDENING OR CONSTRUCTION OF NEW ROADS / SURRENDER OF RESERVED LAND

The Municipal Commissioner may permit on the same plot, additional FSI of the area required for road widening or for construction of a new road proposed under the Development Plan, if the owner (including the lessee) of such land surrenders such land for road widening or construction of new road without claiming any monetary compensation in lieu thereof and hand over the same free of encumbrances to the satisfaction of the Municipal Commissioner. FSI generated against the surrender of land, shall be in proportion to the provisions mentioned in Regulation of TDR and may be utilised on the remaining land. If desired by the owner, TDR may be granted against such surrendered land instead of utilizing FSI on remaining land. Such TDR shall be allowed to be utilised as a Development Rights in accordance with the provisions of regulating Transfer of Development Rights (TDR). Thereafter, the road shall be transferred in the city survey records/revenue records in the name of the Municipal Corporation and shall vest in it becoming part of a public street.

24.3 DEVELOPMENT / REDEVELOPMENT FOR CONSTRUCTION OF STAFF QUARTERS OF THE STATE GOVERNMENT OR ITS STATUTORY BODIES OR MUNICIPAL CORPORATION ON PRIVATE LANDS

24.3.1 Regulation for staff quarters of the State Government or its statutory bodies or Municipal Corporation on land belonging to such Authorities situated in developable zones such as Residential / Public Semi-public / Commercial Zones etc. except restricted zone such as Green Belt, Agricultural Zone, No development Zone, CRZ, etc.

24.3.2 The basic FSI specified in these regulations may be allowed to be exceeded as per following table on the gross plot area solely for the project of construction of staff quarters (herein after referred to as —staff quarter project) for the employees of the Government, or its statutory bodies or the Municipal Corporation (hereinafter collectively referred to as —User Authority), on land belonging to such User Authority, by the PWD of the Government of Maharashtra or MHADA or Maharashtra Police Housing Corporation or Municipal Corporation or any other Public Agency nominated by the Government for this purpose, which also include any Special Purpose Vehicle, wherein the Government or a fully owned Company of the Government holds at least 51% equity share (hereinafter collectively referred to as —"implementing Public Authority")

24.3.3 Road width and plot area	Maximum permissible FSI including basic FSI
18.0 mt or above minimum plot area 4000 sq.m. and above	4.00
12.0 mt. or above but below 18.0 mt.	3.00

24.3.4 For the purpose of calculating the FSI, the entire area of the plot excluding area under Development Plan roads and Development Plan reservations, if any, shall be considered.

Provided that, the Development Plan reservations like Government Staff Quarters, Police Housing, Municipal Housing, Municipal Staff Quarters etc. on lands belonging to Government / Public Authorities / Local Authorities, shall not be excluded.

Provided further that, amalgamation of such Development Plan reservation/s with adjoining lands for the execution of project under this regulation, shall be permissible.

24.3.5 The total permissible FSI under this regulation shall be utilised for construction of staff quarters for the User Authority, subject to the following

i) The area of staff quarters for various categories of employees shall be as per the norms prescribed by the concerned User Authority and in no case shall the area of staff quarters exceed the maximum limit of carpet area as prescribed therein.

ii-a) Municipal Commissioner may also permit upto 1/3rd of the total permissible FSI under this regulation for construction of free sale area (hereinafter referred to as —free sale component) to be disposed of by the Implementing Public Authority as provided herein. The free sale component shall preferably be constructed in a separate block. Sub-division of plots shall be permissible on the basis of equitable distribution of FSI, in case construction of free sale component is permitted by the Municipal Commissioner.

The free sale component may be utilised for commercial use as per potential of plot as decided by the following committee. The extent of commercial use, if required shall be decided by the said committee strictly within the limits as specified in these regulations

- 1) Municipal Commissioner – Chairman
- 2) Police Commissioner – Member
- 3) Collector of Concerned District – Member
- 4) Superintendent Engineer (PWD) – Member

ii-b) If the User Authority required construction of staff quarters to the extent of full permissible FSI, then the User Authority shall pay full cost of construction + 5% of construction cost as establishment charges to the Implementing Public Authority.

ii-c) The flats constructed under the free sale component shall be first offered to the Central Government, its statutory bodies, Central /State PSUs for purchase as staff quarters and if the Central Government or its statutory Bodies or Central /State PSUs do not indicate willingness to purchase the same within the prescribed time limit, such flats shall be sold in open market.

24.3.6 i) Notwithstanding anything contained in these regulations, no amount shall be charged towards Premium, Scrutiny Fee etc., for the projects proposed under this regulation.

ii) The provisions of Inclusive Housing, mentioned in these regulations, shall not be applicable for development under this regulation.

24.3.7 For any staff quarters project under this regulations, a development agreement shall be executed between the User Authority and the Implementing Public Authority, which, inter alia, shall authorise the Implementing Authority to dispose of the flats constructed under the free sale component of the project, wherever applicable. Such development agreement shall contain the details regarding the modalities and conditions of transferring such quarters (whether free of cost or on payment/ receipt of certain amount by the User Authority) to the user authority and also conditions modalities of disposing of the flats under the free sale components by the Implementing Public Authority.

24.4 DEVELOPMENT / REDEVELOPMENT OF HOUSING SCHEMES OF MAHARASHTRA HOUSING AND AREA DEVELOPMENT AUTHORITY

Development / re-development of housing schemes of Maharashtra Housing and Area Development Authority shall be subject to the following provision.

- 1) The FSI for a new scheme of Low Cost Housing, implemented by MHADA departmentally on vacant lands for Economically Weaker Sections (EWS), Low Income Group (LIG) and Middle Income Group (MIG) categories shall be 2.50 on the gross plot area and atleast 60% built-up area

in such scheme shall be in the form of tenements under the EWS, LIG and MIG categories, as defined by the Government in Housing Department from time to time.

- 2) For redevelopment of existing housing schemes of MHADA, containing (i) EWS/LIG and/or (ii) MIG and/or (iii) HIG houses with carpet area less than the maximum carpet area prescribed for MIG, the total permissible FSI shall be 2.50 on the gross plot area (exclusive of the Fungible FSI).

2.1) Where redevelopment of buildings in existing housing schemes of MHADA is undertaken by the housing co-operative societies or the occupiers of such buildings or by the lessees of MHADA, the Rehabilitation Area Entitlement, Incentive FSI and sharing of balance FSI shall be as follows:-

A) Rehabilitation Area Entitlement:

- i) Under redevelopment of buildings in existing Housing Schemes of MHADA, the entitlement of rehabilitation area for an existing residential tenement shall be equal to sum total of -
- a) a basic entitlement equivalent to the carpet area of the existing tenement plus 35% thereof, subject to a minimum carpet area of 300 sq.ft. and
 - b) an additional entitlement governed by the size of the plot under redevelopment, in accordance with the Table No. 21 below:-

Table No. 21	
Area of the Plot under Redevelopment	Additional Entitlement (As % of the Carpet Area of the Existing Tenement)
Upto 4000 sq.m.	Nil
Above 4000 sq.m. to 2 hect.	15%
Above 2 hect to 5 hect.	25%
Above 5 hect to 10 hect.	35%
Above 10 hect.	45%

Provided that the maximum entitlement of rehabilitation area shall in no case exceed the maximum limit of carpet area prescribed limit for MIG category by the Govt. as applicable on the date of approval of the redevelopment project. Provided further that the entitlement of rehabilitation area as admissible under this regulation shall be exclusive of the area of balcony.

- ii) Under redevelopment of buildings in existing Housing Schemes of MHADA, the entitlement of rehabilitation area of any existing commercial/amenity unit in the Residential Housing Scheme shall be equal to the carpet area of the existing unit plus 20% thereof.

- B) Incentive FSI-** Incentive FSI admissible against the FSI required for rehabilitation, as calculated in (a) above, shall be based on the ratio (hereinafter referred to as Basic Ratio) of Land Rate (LR) in Rs./Sq.m. of the plot under redevelopment as per the Annual Statements of Rates (ASR) and Rate of Construction (RC)* in Rs./Sq.m. applicable to the area as per the ASR and shall be as given in the Table No.22 below:-

Basic Ratio (LR/RC)	Incentive (As % of Admissible Rehabilitation Area)
Above 6.00	40%
Above 4.00 and upto 6.00	50%
Above 2.00 and upto 4.00	60%
Upto 2.00	70%

Explanation:-

* RC is the rate of construction in respect of R.C.C. Construction, as published by the Chief Controlling Revenue Authority & Inspector General of Registration, Maharashtra State in the Annual Statements of Rates.

Provided that the above incentive shall be subject to the availability of the FSI on the Plot under redevelopment and its distribution by MHADA.

Provided further that in case there are more than one land rate applicable to different parts of the plot under redevelopment, a weighted average of all applicable rates shall be taken for calculating the Average Land Rate and the Basic Ratio.

Provided further that the Land Rate (LR) and the Rate of Construction (RC) for calculation of the Basic Ratio shall be taken for the year in which the redevelopment project is approved by the authority competent to approve it.

C) Sharing of the Balance FSI:-

The FSI remaining in balance after providing for the rehabilitation and the incentive components, calculated as per (a) and (b) above respectively, shall be shared between the Co-operative Housing Society and MHADA in the form of built-up area, as given in Table No. 23 below and the share of MHADA shall be handed over to MHADA free of cost.

Basic Ratio (LR/CR)	Sharing of balance FSI	
	Share of Co-operative Society	Share of MHADA
Above 6.00	30%	70%
Above 4.00 and upto 6.00	35%	65%
Above 2.00 and upto 4.00	40%	60%
Upto 2.00	45%	55%

2.2) Where redevelopment of buildings in the existing Housing Schemes of MHADA is undertaken by MHADA or jointly by the MHADA alongwith the housing societies or the occupiers of such building or by the lessees of MHADA, the Rehabilitation Area Entitlement, incentive FSI and sharing of balance FSI shall be as follows:

A) **Rehabilitation Area Entitlement:** The Rehabilitation Area Entitlement shall be increased by 10% of the existing carpet area, over and above the Rehabilitation Area Entitlement calculated in

(A) of 2.1 above, subject to the maximum of the size of MIG prescribed by the Government in the Housing Department.

B) Incentive FSI: Incentive FSI shall be the same as in (B) of 2.1 above.

C) Sharing of the balance FSI: Sharing of the balance FSI shall be the same as in FAÇADE of 2.1.

3) For the purpose of calculating the FSI, the entire area of the layout including Development Plan roads and internal roads but excluding the land under the reservation of public amenities shall be considered. Sub-division of plots shall be permissible on the basis of the compulsory open spaces as in these Regulations. For low cost housing schemes of MHADA for EWS/LIG categories, the prevailing Regulations of the DCR shall apply.

Provided that there shall be no restriction on the utilization of the FSI permissible under this Regulation except for the restrictions under any law, rule or regulation.

4) For the purpose of this Regulation the carpet areas for EWS, LIG or MIG tenements shall be as determined by the Government from time to time.

5) a) For providing the requisite infrastructure for the increased population, an infrastructure charge at the rate of 7% of the Land Rate as per the ASR of the year of approval of the redevelopment project shall be chargeable for the extra FSI (excluding the fungible FSI) granted over and above the normal FSI admissible for the redevelopment schemes. 50% of the Infrastructure Charge levied and collected by MHADA shall be transferred to the Municipal Corporation for developing necessary off site infrastructure.

b) No premium shall be charged for the FSI admissible as per the prevailing regulations

(i) Construction of EWS/LIG and MIG tenements by MHADA on a vacant plot, or(ii) in a redevelopment project for the construction of EWS/LIG and MIG tenements towards the share of MHADA, or (iii) for rehabilitation component of a redevelopment project.

6) Notwithstanding anything contained in these Regulations, the relaxation incorporated in the prevailing Regulation shall apply to the Housing Schemes under this Regulation for tenements under EWS/LIG and MIG categories. However, the front open space shall not be less than 3.6m.

7) a) In any Redevelopment Scheme where the Co-operative Housing Society Developer appointed by the Co-operative Housing Society has obtained No Objection Certificate from the MHADA, thereby sanctioning additional balance FSI with the consent of 70% of its members and where such NOC holder has made provision for alternative accommodation in the proposed building (including transit accommodation), then it shall be obligatory for all the occupiers / members to participate in the Redevelopment Scheme and vacate the existing tenements for the purpose of redevelopment. In case of failure to vacate the existing tenements, the provisions of section 9A of the MHAD Act mutatis mutandis shall apply for the purpose of getting the tenements vacated from the not co-operative members.

b) For redevelopment of buildings in any existing Housing Scheme of MHADA under clause 2.2 hereinabove, by MHADA, the consent of the Co-operative Housing Society in the form of a

valid Resolution as per the Co-operative Societies Act, 1960 will be sufficient. In respect of members not co-operating as per approval of the redevelopment project, action under section 95(A) of the Maharashtra Housing and Area Development Act, 1976 may be taken by MHADA.

8) A corpus fund, as may be decided by MHADA, shall be created by the Developer which shall remain with the Co-operative Housing Societies for the maintenance of the new buildings under the Rehabilitation Component.

24.5 REDEVELOPMENT OF EXISTING BUILDINGS BELONGING TO EWS / LIG GROUPS.

Reconstruction / Redevelopment of existing buildings of EWS / LIG undertaken by landlord and / or co-operative housing societies and / or occupiers having carpet area of all tenements less than the EWS / LIG norms prescribed by MHADA, which existed prior to these regulations which has ceased to exist in consequence of accidental fire / natural collapse or demolition for the reasons of the same having been declared unsafe by or under a lawful order of the Municipal Commissioner, shall be allowed subject to following conditions

- 1) FSI to be allowed for such redevelopment proposal shall be base FSI permissible under these regulations or the FSI consumed by the existing authorized building whichever is more. In addition to this minimum 15 sq. m. built up area per Residential flat shall be allowed as incentive to the owner excluding bungalow.
- 2) All the occupants of the old building shall be re-accommodated in the redeveloped building.
- 3) In case of fire gutted buildings the conditions of more than 30 years age of buildings shall not be made applicable, provided the structural stability certificate from nearest Govt. Engineering College shall be necessary.
- 4) The Committee comprises of Commissioner, Superintending Engineer, Public Works Department, State of Maharashtra, Chief Fire Officer, and the Head of department structural Engineering of Government Engineering College shall be set-up to decide whether the building is "dangerous or dilapidated or Unsafe"
- 5) Reconstruction of the building on the plots shall conform to the provisions of the sanctioned Development Plan and sanctioned Development Control regulations.

24.6 REDEVELOPMENT OF OLD DILAPIDATED/DANGEROUS BUILDINGS

Reconstruction / Redevelopment in whole or in part of any tenanted building which existed prior to these regulations which has ceased to exist in consequence of accidental fire / natural collapse or demolition for the reasons of the same having been declared dangerous or dilapidated or Unsafe by or under a lawful order of the Municipal Commissioner, shall be allowed subject to following conditions.

- a) Redevelopment of tenanted building undertaken by landlord and / or co-operative housing societies of landlord and / or occupiers shall be allowed, with an FSI equivalent to the Rehab Area plus 50% incentive FSI of the rehab area. Provided that Rehab Area will be the authorisedly utilised Area or 27.87 sq.mt. per tenement whichever is more.

However as per the road width if the potential of the Plot is more than what is mention above, then the balance potential available on plot after deducting rehab and incentive FSI may be allowed to be utilized to that extent by the way of TDR or

Additional FSI in 50- 50 proportion subject to limitation of additional FSI as mentioned in Table No. 5 or 8, if any.

- (b) All the certified tenants of the old building shall be re-accommodated in the redeveloped building. Each tenant shall be rehabilitated and given free of cost the carpet area occupied by him for residential purpose in the old building subject to the minimum carpet area of 27.87sq. mt. or existing carpet area whichever is more subject to maximum carpet area upto 70 sq.mt. (753 sqft.) . In case of non-residential occupier the area to be given in the reconstructed building shall be equivalent to the area occupied in the old building.

Provided that if the carpet area under Residential use exceeds 70 sq.mt., the cost of construction for Area exceeding 70 sq.mt. shall be paid by tenant / occupant to the developer. The cost of construction shall be as per the ready reckoner rate of that year. The carpet area exceeding 70 sq.mt. shall be considered for rehab FSI but shall not be consider for incentive FSI.

- (c) In case of fire gutted buildings the conditions of more than 30 years age of buildings shall not be made applicable, provided the structural stability certificate from nearest Govt. Engineering College shall be necessary.
- (d) The Committee comprises of Commissioner, Superintending Engineer, Public Works Department, State of Maharashtra, Joint Director, Town Planning, Chief Fire Officer, and the Head of department structural Engineering of Government Engineering College shall be set-up to decide whether the building is "dangerous or dilapidated or unsafe".

Note-

- (1) For the purpose of deciding authenticity of the structure if the approved plans of existing structure are not available, the Commissioner shall consider other evidences such as Assessment Record or City Survey Record or Sanad.
- (2) In case where there are number of buildings. on plot, in such cases, equivalent land component of the buildings which is declared unsafe shall be worked out and incentive FSI shall be based on such land component.
- (3) Reconstruction of the building on the plot shall conform to the provisions of the sanctioned Development Plan and sanctioned Development Control Regulations.
- (4) The new building may be permitted to be reconstructed in pursuance of an agreement to be executed on stamp paper by atleast 70 percent of the landlord / occupants in the original building, within the meaning of the Bombay Rents, Hotel and Lodging House Rents Control Act, 1947 or Apartment Act and its related provision and in such agreement provision for accommodation for all occupants in the new building on agreed terms shall be made and a copy of such agreement shall be deposited with the Municipal Corporation before commencement or undertaking reconstruction of the new buildings.
- (5) The carpet area of part or parts of the new building intended to be used as non-residential use shall not exceed the carpet area of part or parts of the original building so used
- (6) No new tenancy shall be created
- (7) An amount as may be decided by the Government shall be paid by the Owner /Developer / Society as additional Development Cess for the built up area over and above the Base FSI. A corpus fund as decided by the Municipal Commissioner is to be created by the Developer which will take care of the maintenance of the building for a period of 10 years.

24.7 Redevelopment of existing buildings

Reconstruction / Redevelopment schemes undertaken by the Corporation / Owners for the existing residential development.

The FSI to be allowed for such proposal shall be FSI permissible under these regulation no.17.1.1 or 17.3 wherever applicable or the FSI consumed by the existing authorized building whichever is more.

24.8 TRANSIT ORIENTED DEVELOPMENT (TOD)**24.8.1 Definitions**

- (i) **TOD zone** :- It is the area along/around the proposed MRTS/Metro corridor as will be delineated by Pune Municipal Corporation with approval of the State Government.
- (ii) **Base permissible FSI** :- It is the FSI that is otherwise permissible on any land with respect to zone shown as per the sanctioned development plan and the relevant provision of the Principal DCR excluding the TDR and the premium FSI, redevelopment incentive FSI that can be received.
- (iii) **Gross plot area** :- Gross Plot Area means total area of land after deducting area under reservation or deemed reservation like amenity space if any, area under D.P. Road and Road widening.
- (iv) **Principal DCPR** :- Principal DCPR means these DC Regulations excluding the provisions regarding TOD zone.

24.8.2 Date of coming into force :- The date of coming into force of these regulations shall be the date as notified by the Government.

24.8.3 Maximum Permissible FSI :- The maximum permissible total FSI in TOD zone shall be 4.00 including the base permissible FSI, subject to condition that, the additional FSI over and above the base permissible FSI shall be allowed within the overall limit of maximum permissible FSI, as given in the Table below-

Sr. No.	Road width in m.	Min .Plot Area in sq.m.	Maximum Permissible FSI
1	2	3	4
1	9 m. and up to 12 m.	Below 1000	2.00
2	12 m. and up to 18 m.	1000 or above	2.50
3	18 m. and up to 24 m.	2000 or above	3.00
4	24 m. and up to 30 m.	3000 or above	3.50
5	30 m. and above	4000 or above	4.00

Explanation:-

- 1) The maximum permissible FSI as per the above Table shall be determined by satisfaction of both the criteria's viz. Minimum Road width as well as plot area, simultaneously. However in case, both these criteria's are not satisfied simultaneously, the maximum permissible FSI

shall be the minimum of that permissible against each of these two criteria's, as illustrated below ;

Illustrations: -

Utilization of FSI

Plot Area in sqm	Road width					
	Less than 9m.	9 m. and up to 12 m	12 m. and up to 18 m	18 m. and up to 24 m.	24 m. and up to 30 m.	30 m. and above
Below 1000	Principal DCPR	2	2	2	2	2
1000 to below 2000	Principal DCPR	2	2.5	2.5	2.5	2.5
2000 to below 3000	Principal DCPR	2	2.5	3.0	3.0	3.0
3000 to below 4000	Principal DCPR	2	2.5	3.0	3.5	3.5
4000 or above	Principal DCPR	2	2.5	3.0	3.5	4.0

- 24.8.3.1 Premium to be Paid** - Additional FSI over and above base permissible FSI of respective land use zones as per principal DCPR, may be permitted on the payment of premium equivalent as would be decided by Government from time to time.
- 24.8.3.2 Integrated Mobility Plan:-** There shall be an Integrated Mobility Plan envisaging inter-linkages between different modes of mass transport, parking management, traffic management and pedestrianisation.
- 24.8.3.3** The maximum permissible FSI as given in Table under regulation 24.8.3 shall be calculated on the gross plot area.
- 24.8.3.4** In case of plot / plots falling partly within the TOD zone, the FSI permissible shall be as follows, provided that the total area of the plot (plot falling within TOD zone plus plot falling outside TOD zone) shall be as prescribed in the table in regulation no. 24.8.3 :-
- Where 50% or more area of such plot / plots falls within TOD zone, these regulations including FSI shall apply to the total area of such plot / plots.
 - Where less than 50% area of such plot / plots falls within TOD zone, these regulations including FSI shall be applicable to the part of plot / plots falling within TOD zone, whereas for the part of plot / plots falling outside TOD zone, these regulations except provisions regarding FSI shall be applicable. The FSI permissible for the part falling outside TOD zone shall be as per Principal Development Control Regulations.

Notwithstanding anything contained in any other provision of this DCPR the Parking, Double height terraces up to 20% and 15% balconies not enclosed, Stair cases, Lift wells with machine rooms, Refuge areas, Voids, Service Floor & Entrance lobbies of the building in TOD zone shall be free of FSI.

Notwithstanding anything contained in any other provisions of these regulations, TDR shall not be allowed to be received on the plots within TOD zone, irrespective of its location in congested area / non congested area as per the Development Plan of Pune.

24.8.4 Tenement Size

For any development or redevelopment within TOD zone, size of tenement shall be minimum 25 sqm and maximum 120 sqm of built-up area and out of total proposed tenements, the tenements equivalent to at least 50% of total FSI shall be of a size equal to or less than 60 sqm. These tenements shall not be allowed to be clubbed/amalgamated in any case.

24.8.5 Permissible mixed use in TOD zone:

Mixed use in the form of residential and commercial may be permissible on the residential plot in TOD zone fronting on the road width of 12 mt. and above. And mix use on plot / plots in commercial zone in Pune Municipal Corporation shall be permissible as per the principal DCPR and the maximum permissible FSI under these regulations shall be allowed on the payment of premium.

24.8.6 Other provisions regarding marginal open spaces shall be governed by the proposed height of structure, as given in the provisions 24.8.7 below and should conform to the Maharashtra Fire Prevention and Life Safety Measures Act, 2006 (Maharashtra Act no. III of 2007) as amended from time to time. No building permission shall be issued without NOC of the Fire Officer. Other regulations regarding room sizes, apertures for light and ventilation shall be as per the principal DCPR in force.

24.8.7 Marginal Spaces

Sr. No.	Building Height	Side and Rear Margins	Remark
a	15.0 mt and below	H/2-4	Minimum 3.0 mt. for Residential minimum 4.5 mt. for Commercial and Minimum 6.0 m. for Special Buildings.
b	Above 15.0 mt. and upto 24.0 mt.	H/4	
c	24.0 mt and above	H/5 subject to Maximum 12.0 mt.	

Note- However if Developer / Owner provides more than 12.00 mt. side and rear margins, it shall be permissible.

24.8.7.1 No projections shall be allowed in marginal spaces so that minimum 6 mt. marginal spaces remain free from all encumbrances for the movement of fire tenders. In case if ramp is necessary from accessibility, such ramp may be allowed after living 6 mt. clear margin,

24.8.7.2 For calculation of marginal distances the height of the parking floors (Maximum two floors above the Ground Level) shall not be taken in account, However height of such parking floors will be counted towards the total height of the building for deciding the building as high rise building and for civil Aviation purpose.

24.8.7.3 Car lift / mechanical parking shall be permissible, as per Principal DCPR as amended from time to time.

24.8.8 Parking

Parking in the TOD zone shall be provided as per the table given below.

Sr. No.	Occupancy	One parking space for every	Transit Oriented Development Influence Zone		
			Car	Scooter / Motorcycle	Cycle
1	Residential	For 4 units having carpet area From 25 and upto 40 sq.mt.	0	1	2
		For 2 units above 40 and upto 60 sq.mt.	1	1	2
		For every unit above 60 and upto 80 sq.mt.	1	2	2
		For every unit above 80 sq.mt	1	1	1
2	Govt. & Semi Govt. Private business buildings	100 sq.mt carpet area or fraction thereof	1	2	2

Note: i) Parking spaces for differently – abled persons shall be provided as per Indian Road Congress Code No. IRC 103:2012 in each new construction / development / re-development in the TOD zone.

ii) No on street parking shall be permissible, unless specifically allowed in the integrated mobility plan report.

24.8.8.1 Incentive for providing Public Parking in the area falling within the radius of 200 mt. from the Metro/MRTS Station.

If the owner / developer of the plot falling within the radius of 200 mt. from the Metro Station/MRTS, is willing to provide Public Parking space over and above the parking spaces required as per the table given in regulation No.24.8.8 of these regulations, the same shall be allowed and in that case the premium to be paid by such developer / owner as per regulation No.24.8.3.1 shall be reduced by the amount equal to the premium worked out for 25% of the area earmarked for such additional Public Parking space, subject to following conditions:-

- Such parking area shall be in the built-up form and shall be handed over to Planning Authority free of cost before granting the Occupation Certificate to the project. The Planning Authority should enter into an agreement with owner / developer for such parking space at the time of granting Commencement Certificate to the project. Such Public Parking area shall be clearly shown on the proposed building plan / layout and a condition to above effect shall be incorporated in the Commencement Certificate.
- The parking area shall have independent access from major road adjacent to the plot and with proper entry and exits.
- The parking area to be made available at individual site shall be at minimum 100 sq.mt. at one place either at Ground floor / Stilt floor or first floor.
- The maximum parking area that can be provided shall be decided by the Commissioner, Nashik Municipal Corporation, as the case may be, on considering the location of such site and the parking requirement.

- e) A board showing the location of such public parking space should be displayed at suitable places by the Planning Authority.
- f) Area covered under such parking shall not be counted towards FSI consumption.
- g) Concerned land owner / developer / society / public company shall not be allowed to operate the public parking.
- h) The proposed development shall be further subject to such conditions as may be decided by the Municipal Commissioner.
- 24.8.9** In case of metro rail, development or redevelopment, proposed by the Authority / individual applicant / any other Planning Authority, from the edge of the Metro Rail, within 20 mt. distance from the Metro Rail, on its either side, the concerned Planning Authority i.e. Pune Municipal Corporation before granting such permission for development / redevelopment shall seek prior NOC from the concerned Metro Railway Authority as required under the Metro Railways (Construction of Works) Act, 1978 from the point of view of safety of the Metro Railway and such other related matters.
- 24.8.10** In case of any conflict between these Regulations and any other Regulation/s of the DCR, these Regulations shall prevail for the TOD zone.
- 24.8.11** No Compound wall / fencing shall be permissible on the boundary of plot fronting on road and 50% front marginal distance (subject to minimum of 3.0 mt.) shall be kept accessible and to be used as foot paths, for pedestrians. However, it shall be permissible for the applicant to construct / erect fencing, on the boundary, after leaving the space for pedestrians as specified above.
- However for the plots situated on 9mt. and 12mt. wide Roads having 100% residential use therefore above rule shall not be made applicable.
- 24.8.12** Large wholesale stores, car dealer showrooms, warehouses/storages, auto service centres, Garages etc. shall not be permissible in TOD zone.
- 24.8.13** Provision of Inclusive housing shall not be applicable in TOD zone.
- 24.8.14** For Gunthewari development regularized under the provisions of Maharashtra Gunthewari Development Act, 2001 and falling in TOD zone, seeking provisions for redevelopment, these regulations shall apply.
- 24.8.15** The width of passage shall be minimum 1.5 mt. for residential use & 2.0 mt. for commercial use.

24.9 DEVELOPMENT OF HOUSING FOR EWS/LIG

If the owner constructs the housing for EWS / LIG in the form of tenements of size upto 50 sq.mt carpet area on his plot, then he shall be exempted from requirement of premium as mentioned in regulation No. 17.3 Table No. 8 subject to following conditions.

- i) Out of the total tenements, at least 40% tenements shall be of area not more than 30 sq.mt.
- ii) Only one tenement should be sold to a family. Adjoining tenement should not be sold to a close relative of such tenement owner. Affidavit to that effect shall be obtained from the land owner / developer and purchaser.
- iii) The size of tenement of 30 or 50 sq.m. shall be inclusive of common areas like staircases, passages etc. but exclusive of balcony, double height terraces.
- iv) Concessions in marginal spaces may be allowed by the Municipal Commissioner as mention in the SRA regulations.

24.10 REGULATIONS FOR DEVELOPMENT OF INFORMATION TECHNOLOGY ESTABLISHMENT

Development of Information Technology Establishments shall be regulated as per the Information Technology & Information Technology Enabled Services (IT/ITES) Policy 2015 as declared by Industries Department vide Government Resolution No. ITP 2013/CR-265/IND-2 dated 25/08/2015, along with the special regulations sanctioned by the Government vide notification No. TPB 4316/CR-167/2016/(3)/UD-11/dated 15th July, 2016 and amended time to time which are mention below.

- 1) The Commissioner may permit additional FSI upto 200 % over and above the basic permissible F.S.I. to all registered Public and Private IT/ITES Parks/AVGC Parks /IT SEZs or IT Parks in SEZs / Stand-alone IT/ITES units in public IT Park (including IT/ITES units located in Residential / Industrial/No Development/ Green/Agriculture Zone or any other land-use zone in which such users are permissible), which have been approved by the Directorate of Industries, proposed to be set up or already set up under present / previous IT/ITES policies, (hereinafter referred to as the "said unit") by charging premium of 30% of the land rate for the said land as prescribed in Annual Statement of Rates for the relevant year of granting such additional F.S.I. for Pune, Pimpri-Chinchwad, Navi Mumbai Notified Area, Municipal Corporations in Mumbai Metropolitan Region and 10% of the land rate for the said land as prescribed in Annual Statement of Rates for the relevant year of granting such additional F.S.I. for other Municipal Corporations.

In case of the Navi Mumbai Notified Area, the CIDCO as land owner may recover lease premium for additional F.S.I. if applicable under land disposal policy of CIDCO.

Provided that additional FSI above 100% and upto 200% shall be permissible only on plots having an access road of minimum 18 meters width.

Provided further that, the premium so collected shall be shared between the Planning Authority and the Government in the proportion of 50 : 50. The share of the Government shall be paid to the concerned Branch office of the Town Planning Department. (Explanation: - Premium charges shall be calculated on the value of lands under such zones, determined by considering the land rates of the said land as prescribed in Annual Statement of Rates (ASR). These charges shall be paid at the time of permitting additional F.S.I. by considering the ASR for the relevant year without applying the guidelines)

- 2) No premium shall be chargeable in Municipal Corporation areas, if they are covered under No Industry Districts and Naxalism affected areas of the State (as defined in the " Package Scheme of Incentives-2013" of the Industries, Energy & Labour Department of the State).
- 3) The total maximum permissible F.S.I. shall not exceed limit of 3.00.
- 4) Maximum 20% of total proposed Built-up area (excluding parking area) inclusive of such additional F.S.I. may be permitted for support services in IT Parks remaining built-up area shall be utilized for IT/ITES.
- 5) New said unit shall allocate at least 2% of the total proposed built-up area, for providing incubation facilities for new units. This area would be treated as a part of the Park to be used for IT activities and eligible for additional FSI benefits accordingly.
- 6) Premium to be received by the Planning Authority as per provisions in this regulation shall be deposited in a separate fund viz. "Critical Infrastructure Fund for IT/ITES Industries" and this fund shall be utilized only for creation of Critical Infrastructure for IT/ITES Industries;

Provided that in the event, the developer come forward for providing such off site infrastructure at his own cost, instead of paying premium as prescribed above, then the Planning Authority may determine the estimated cost of the work by using rates prescribed in District Schedule of Rates (DSR) of the relevant year, in which order for commencement of such work is issued. The Planning Authority shall also prescribe the standards for the work. After completion of the works, the Planning Authority shall verify and satisfy itself that the same is developed as per prescribed standards and thereafter, by deducting the cost of works, the balance amount of premium shall be recovered from such developer before issuing Occupancy Certificate.

Provided that, in case the cost of work is more than the premium to be recovered, such additional cost to be borne by such developer.

- 7) Permission for erecting towers and antenna upto height permitted by the Civil Aviation Department shall be granted by the Commissioner as per the procedure followed for development permission or otherwise as may be decided by the Government.
- 8) While developing site for IT/ITES with additional FSI, support services as defined in the IT Policy 2015, shall be allowed.
- 9) The sanctioned existing regulations in respect of I.T. Establishments, are proposed to be replaced suitably and for the Planning Authorities, which have no provisions in respect of I.T. Establishments, these regulations shall be proposed to be inserted as new regulations.
- 10) Notwithstanding anything contained in the Development Control Regulations of Planning Authorities, no amenity space is required to be left for development of plot/land upto 2.00 Hect. for IT/ITES.
- 11) Notwithstanding anything mentioned in these Regulations, special provisions mentioned in the existing Regulations of respective Planning Authority, which areas are not covered under these regulations shall continue to prevail unless otherwise specified.
- 12) The Directorate of industries will develop a web portal on which the developer of every IT park will be bound to provide / update detailed information about names of the units in the park, utilization of built-up area and activities being carried out, manpower employed in the It Park for IT/ITES and support services on yearly basis.

If a private IT park has availed additional FSI as per the provisions of IT/ITES policy and subsequently it is found that the built-up space in the park is being used for non IT/ITES / commercial activities / any other activity not permitted as per the IT/ITES policy under which the said park was approved, a penal action as below will be taken, the payment shall be shared between the concerned Planning Authority and the Government in the ratio of 3:1.

- a) The misuse shall be ascertained by physical site verification of the said private IT park by a team of officers from the Directorate of industries and the Planning Authority which has approved the building plans of the said private IT park.
- b) A per day penalty equal to 0.3% of the prevailing ready reckoner value of the built-up area that has been found to be used for non- IT/ITES activities.
- c) The penalty will be recovered from the date of commencement of unauthorized use till the day non IT use continues.

After payment of the penalty to the concerned Planning Authority which has sanctioned the building plans of the concerned private IT park, the said private IT Park will restore the use of premises to the original purpose for which LOI/ Registration was granted.

If the private IT Park fails to pay penalty and / or restore the use to its original intended use, the concerned Planning Authority will take suitable action under the Maharashtra Regional and Town Planning Act 1966, against the erring private IT Park under intimation to the Directorate of Industries. This provision will also be applicable to existing IT Parks.

24.11 REGULATION FOR DEVELOPMENT OF BIOTECHNOLOGY PARKS

A. DEFINITION-

The Biotechnology Units/ Parks shall mean Biotechnology units/ parks which are certified by the Development Commissioner (Industries) or any officer authorised by him in his behalf. The Biotechnology Park and unit/units outside park shall have minimum land area of 2 acres or 20000 sq.ft. built up area. The said requirement of 20000 sq.ft. shall be as per normal permissible FSI and without considering permissible additional FSI/ TDR/ Free of FSI area.

B. BIOTECHNOLOGY UNITS/ PARKS TO BE ALLOWED IN INDUSTRIAL ZONE-

Biotechnology Units/Parks shall be permitted in Industrial Zone on all plots fronting on roads having width more than 12 meter.

C. BIOTECHNOLOGY UNITS/PARK TO BE ALLOWED IN NO DEVELOPMENT ZONE EARMARKED IN THE DEVELOPMENT PLAN.

Biotechnology Units/Parks shall be permitted in No Development Zone subject to following conditions:-

- i) Maximum FSI limit shall be 0.20 and as far as possible the development shall be at one place of the total land.
- ii) The ground coverage shall not exceed 10% of the area of the plot.
- iii) Tree plantation shall be done at the rate of 500 Trees/Ha on the remaining land excluding the built up area and the surrounding open space/utility space.
- iv) The maximum height of buildings shall not exceed 24 mt.
- v) Essential residential development for the staff/ officer's accommodation shall be permitted upto the extent of 33% of the permissible built up area.
- vi) These users shall be permitted in No Development Zone, within a distance of 3 km. from the adjoining developable zone.
- vii) Development in plots affected by CRZ area shall be permissible subject to the notification issued by MOEF regarding CRZ.

D. ADDITIONAL FSI TO BIOTECHNOLOGY UNITS / PARK

Subject to approval by Director of Industries, the Commissioner/ Commissioner/ Competent Planning Authority or as the case may permit the floor space indices specified in these regulations to be exceeded to the extent of 100% over and above the permissible FSI (including for Biotechnology Units/Park located in No Development Zone proposed in the Development Plan) for biotechnology units/parks subject to following conditions:-

- i) Out of total built up area minimum 90% shall be used for Biotechnology purpose and maximum 10% (by deducting parking space) shall be used for ancillary users such as specified in the Govt. Resolution of Industry, Energy and Labour Department. No. BTP 2008/CR-1608/Ind-2, dated 10/2/09.
- ii) Additional FSI to Biotechnology units would be available to Biotechnology Parks duly approved

by the Directorate of Industries and after observance of all the regulation of environment.

iii) Parking spaces, as per the provision of Development Control Regulation shall be provided subject to minimum requirement of one parking space per 100 sq.mt. built up area.

iv) The additional FSI shall be granted upon payment of premium which shall be paid in the manner as may be determined by the Government. Such premium shall be recovered at the rate of 25% of the present day market value of the land under reference as indicated in the Ready Reckoner.

v) 25% of the total premium shall be paid to the Govt. and remaining 75% amount shall be paid to the said Authority.

vi) The premium so collected by the Planning Authorities shall be primarily used for development of offsite infrastructure required for the Biotechnology Parks.

vii) In the event, the developer comes forward for provision of such off site infrastructure at his own cost, then the said Planning Authority shall determine the estimated cost of the works and shall also prescribe the standards for the work. After completion of the works the said Planning Authority shall verify as to whether the same is as per prescribed standards and thereafter, by deducting the cost of works, the balance amount of premium shall be recovered by the said Planning Authority.

viii) No condonation in the required open spaces, parking and other requirement prescribed in the regulations shall be allowed in case of additional FSI.

ix) Development of biotechnology park shall be done as per the guidelines issued by Industries Department vide the said resolution.

24.12 DEVELOPMENT OF PUBLIC TOILET -

The owner if constructs public toilet in addition to the number of toilets required for his proposed development at the location required and as prescribed by the Municipal Commissioner, preferably on ground floor having separate access, he may be granted additional FSI equal to the built up area of such additional toilets. Provided such toilet shall be maintained by the owner at his own cost to the satisfaction of Commissioner.

PART -IX
STRUCTURAL SAFETY, WATER SUPPLY, DRAINAGE & SANITARY
REQUIREMENTS, OUTDOOR DISPLAY AND OTHER SERVICES

25.0 STRUCTURAL DESIGN

25.1 The structural design of foundations, elements made of masonry, timber, plain concrete; reinforced concrete, pre-stressed concrete and structural steel shall be carried out in accordance with Part 6. Structural design Section 1-Loads, courses and effects, Section 2-Soils and Foundation, Section-3-Timber and Bamboo, Section 4-Masonry, Section5-Concrete, Section 6-Steel, Section-7-Prefabrication, systems building and mixed / composite construction of National Building Code of India, amended from time to time. Proposed construction shall be as per the norms as specified by Indian Standard Institute, for the resistance of earthquake, Fire Safety and natural calamities. Certificate to that effect shall be submitted by the Licensed Structural Engineer of the developer / land owner, along with the proposal for development permission.

26.0 QUALITY OF MATERIALS AND WORKMANSHIP

26.1 All materials and workmanship shall be of good quality conforming generally to accepted standards of Public Works Department of Maharashtra and Indian Standard Specifications and Codes as included in Part 5 - Building Materials and Part 7 - Construction Practices and Safety of National Building Code of India, amended from time to time

26.2 All borrow pits dug in the course of construction and repair of buildings, roads, embankments etc. shall be deep and connected with each other in the formation of a drain directed towards the lowest level and properly stopped for discharge into a river stream, channel or drain and no person shall create any isolated borrow pit which is likely to cause accumulation of water which may breed mosquitoes.

27.0 ALTERNATIVE MATERIALS, METHODS OF DESIGN & CONSTRUCTION AND TESTS

27.1 The provision of the regulations are not intended to prevent the use of any material or method of design or construction, not specifically prescribed by the regulations, provided any such alternative has been approved.

27.1.1 The provision of these regulations is also not intended to prevent the adoption for architectural planning and layout conceived as an integrated development scheme.

27.2 The authority may approve any such alternative provided it is found that the proposed alternative is satisfactory and conform to the provisions of relevant parts regarding material, design, and construction and that material, method or work offered is, for the purpose intended, at least equivalent to that prescribed in the rules in quality, strength, compatibility, effectiveness, fire rating and resistance, durability and safety.

27.3 Tests: Whenever there is insufficient evidence of compliance with the provisions of the regulations of evidence that any material or method of design or construction does not conform to the requirements of the rules or in order to substantiate claims for alternative materials, design or methods of construction, the Municipal Commissioner may require tests sufficient in advance as proof of compliance. These tests shall be made by an approved agency at the expense of the owner

27.3.1 Test method shall be as specified by the regulations for the materials or design or construction in question. If there are no appropriate test methods specified in the regulations, the Authority shall determine the test procedure. For methods of tests for building materials; reference may be made to relevant Indian standards as given the National Building Code of India, published by the Bureau of Indian Standards. The latest version of the National building Code of India shall be taken into account at the time of enforcement of these rules.

27.3.2 Copies of the results of all such tests shall be retained by the authority for a period of not less than two year after the acceptance of the alternative material.

28.0 BUILDING SERVICES

28.1 The planning, design and installation of electrical installations, air-conditioning and heating work shall be carried out in accordance with Part 8 - Building Services, Section 2-Electrical and allied Installations, Section 3-Air Conditioning, heating and mechanical ventilation of National building Code of India, amended from time to time.

28.2 The planning design including the number of lifts, type of lifts, capacity of lifts depending on occupancy of building; population on each floor based on occupant load, height of building shall be in accordance with Section-5 installation of Lifts and Escalators of National Building Code of India, amended from time to time. In existing buildings, in case of proposal for one additional floor, existing lift may not be raised to the additional floor.

28.2.1 The lifts shall be maintained in working order properly.

29.0 WATER SUPPLY, DRAINAGE AND SANITARY REQUIREMENTS.

29.1 The planning, design, construction and installation of water supply, drainage and sanitation and gas supply systems shall be in accordance with the provisions of Part 9 - Plumbing Services- Section 1 Water Supply, Drainage and Sanitation, Section 2 - Gas supply of National Building Code of India as amended from time to time.

29.2 Requirements of water supply in building.

The total requirements of water supply shall be calculated based on the population as given below:

Occupancy	Basis
Residential Building	5 persons per tenement
Other Buildings	No. of persons on occupant load and area of floors given in Table No.10.

29.2.1 The requirements of water supply for various occupancies shall be as given in Table No.24 and Table No.25 or as specified by the Municipal Commissioner from time to time.

Table No.24		
PER CAPITA WATER REQUIREMENTS FOR VARIOUS OCCUPANCIES/USES		
Sr. No	Type of Occupancy	Consumption per head per day (in liters)
1	Residential	
	(a) in living units	135
	(b) Hotels with lodging accommodation (per bed)	180
2	Educational:	
	(a) Day Schools	45
	(b) Boarding Schools	135
3	Institutional (Medical Hospitals):	
	(a) No. of beds not exceeding 100	340
	(b) No. of beds exceeding 100	450
	(c) Medical quarters and hostels	135
4	Assembly-Cinema theatres, auditorium etc. (per seat of accommodation).	15
5	Government and Semi-public business.	45
6	Mercantile (Commercial)	
	(a) Restaurants (per seat)	70
	(b) Other business buildings.	45
7	Industrial	
	(a) Factories where bathrooms are to be provided	45
	(b) Factories where no bath-rooms are required to be provided.	30
8	Storage (including warehousing)	30
9	Hazardous	30
10	Intermediate / Stations (excluding mail and express stops).	45 (25)*
11	Junction Stations	70 (45)*
12	Terminal / Stations.	45
13	International and domestic Airports.	70

The value in parenthesis is for stations where bathing facilities are not provided.

Note: The number of persons for Sr. No. (10) to (13) shall be determined by the average number of passengers, handled by the station daily; due consideration may be given to the staff and workers

likely to use the facilities.

Table No.25		
FLUSHING STORAGE CAPACITIES		
Sr.No.	Classification of building	Storage capacity.
(1)	(2)	(3)
1	For tenements having common convenience	900 liters net per w. c. seat.
2	For residential premises other than tenements having common convenience	270 liters net for one w. c. seat and 180 liters for each additional seat in the same flat.
3	For Factories and Workshops	900 liters per w. c. seat and 180 liters per urinal seat.
4	For cinemas, public assembly halls, etc.	900 liters per w. c. seat and 350 liters per urinal seat.

30.0 DRAINAGE AND SANITATION REQUIREMENTS

30.1 General

There should be at least one water tap and arrangement for drainage in the vicinity of each water-closet or group of water-closets in all the buildings.

30.1.1 Each family dwelling unit on premises (abutting on a sewer or with a private sewage disposal system) shall have, at least, one water-closet and one kitchen type sink. A bath or shower shall also be installed to meet the basic requirement of sanitation and personal hygiene.

30.1.2 All other structures for human occupancy or use on premises, abutting on a sewer or with a private sewage disposal system, shall have adequate sanitary facilities, but in no case less than one water-closet and one other fixture for cleaning purposes.

30.2 For Residences

30.2.1 Dwelling with individual convenience shall have at least the following fitments:

- One bathroom provided with a tap and a floor trap,
- One water-closet with flushing apparatus with an ablution tap; and
- One tap with a floor trap or a sink in kitchen or wash place.

30.2.2 Dwelling without individual conveniences shall have the following fitments:

- One water tap with floor trap in each tenement,
- One water-closet with flushing apparatus and one ablution tap, bath for every two tenements, and
- One bath with water tap and floor trap for every two tenements.

30.3 For Buildings Other than Residences

30.3.1 The requirements for fitments for drainage and sanitation in the case of buildings other than residences shall be in accordance with Tables given in Appendix-O (1 to 14). The following shall

be, in addition, taken into consideration:

- a) The figures shown are based upon one (1) fixture being the minimum required for the number of persons indicated or part thereof.
- b) Building categories not included in the tables shall be considered separately by the Municipal Commissioner.
- c) Drinking fountains shall not be installed in the toilets.
- d) Where there is the danger of exposure to skin contamination with poisonous, infectious or irritating material, washbasin with eye wash jet and an emergency shower located in an area accessible at all times with the passage / right of way suitable for access to a wheel chair, shall be provided.
- e) When applying the provision of these tables for providing the number of fixtures, consideration shall be given to the accessibility of the fixtures. Using purely numerical basis may not result in an installation suited to the need of a specific building. For example, schools should be provided with toilet facilities on each floor. Similarly toilet facilities shall be provided for temporary workmen employed in any establishment according to the needs; and in any case one WC and one washbasin shall be provided.
- f) All buildings used for human habitation for dwelling work, occupation, medical care or any purpose detailed in the various tables, abutting a public sewer or a private sewage disposal system, shall be provided with minimum sanitary facilities as per the schedule in the tables. In case the disposal facilities are not available, they shall be provided as a part of the building design for ensuring high standards of sanitary conditions in accordance with this section.
- g) Workplaces where crèches are provided, they shall be provided with one WC for 10 persons or part thereof, one washbasin for 15 persons or part thereof, one kitchen sink with floor tap for preparing food / milk preparations. The sink provided shall be with a drinking water tap.
- h) In all types of buildings, individual toilets and pantry should be provided for executives and for meeting / seminar / conference rooms, etc. as per the user requirement.
- i) Where food is consumed indoors, water stations may be provided in place of drinking water fountains.

31.0 SIGNS AND OUTDOOR DISPLAY STRUCTURES

31.1 The display of advertising signs on buildings and land, shall be in accordance with Part 10, Section-2 "Signs and outdoor display structures" of National Building Code of India as amended from time to time and, shall be in accordance with respective rules/by-laws, directive given by Government, and also rules/by-laws framed by the corporation in this regards from time to time.

Prohibition of advertising signs and outdoor display structure in certain cases - Notwithstanding the provisions of sub-regulations no advertising sign or outdoor display structures shall be permitted on buildings of architectural, aesthetical, historical or heritage importance as may be decided by the Commissioner or on Government Buildings save that in the case of Government buildings only advertising signs or outdoor display structure may be permitted if they relate to the activities for the said buildings' own purposes or related programmers.

PART - X**SPECIAL PROVISIONS FOR CERTAIN BUILDINGS****32.0 PROVISIONS OF FACILITIES FOR DIFFERENTLY ABLED PERSONS**

Provisions for Barrier Free access in buildings for differently abled persons shall be as given in **Appendix-P**

33.0 INSTALLATION OF SOLAR ASSISTED WATER HEATING (SWH) SYSTEM/ ROOF TOP PHOTOVOLTAIC (RTPV) SYSTEM

SWH or RTPV systems shall be mandatory in all types of buildings to be constructed on plot area of more than 4000 sq m

In order to facilitate the installation of SWH/RTPV System, the new buildings shall have the following provisions:

- i) All such buildings where SWH/RTPV are to be installed will have open sunny roof area available for the installation of SWH/RTPV.
- ii) The roof loading adopted in the design of such building should be atleast 50 kg per sq.m. for the installation of SWH/RTPV.
- iii) At least 25% of the roof area shall be utilized for installation of the SWH/RTPV system.
- iv) Precaution should be taken that architectural elevation treatment should not cast shadow on terrace space. As far as possible, parapet of south, east and west sides of the terrace shall be of railing type (above 1 feet) such that it will not cast shadow on the solar collectors and maximum terrace space can be utilized.
- v) All such new buildings installed with SWH shall have an installed hot water line from the rooftop and insulated distribution pipelines to each of the points where hot water is required in the building.

34.0 RAIN WATER HARVESTING

The provision for Rain Water Harvesting shall be made as under:

- a) All the layout open spaces/amenity spaces of housing societies and new constructions/reconstruction/ additions on plots having area not less than 500sq.mt., in non-congested areas shall have one or more Rain Water Harvesting structures having a minimum total capacity as detailed in Schedule.

Provided that the Commissioner may approve the Rain Water Harvesting structures of specifications different from those in Schedule, subject to the minimum capacity of Rain Water Harvesting being ensured in each case.

- b) The owner/society of every building mentioned in the (a) above shall ensure that the Rain Water Harvesting System is maintained in good condition for storage of water for non-potable purposes or recharge of groundwater at all times.
- c) The Authority may impose a levy of not exceeding Rs.1000/- per annum for every 100 sq.mt. of built-up area for the failure of the owner of any building mentioned in the (a) above to provide or to maintain Rain Water Harvesting structures as required under these regulations. Failure to provide Rain Water Harvesting System shall deem to be breach of the conditions on which the development permission has been granted.

SCHEDULE

Rain Water Harvesting in a building site includes storage or recharging the ground water by rainwater falling on the terrace or any paved or unpaved surface within the building site.

1. The following systems may be adopted for harvesting the rainwater drawn from terrace and the paved surface.
 - i) Open well of a minimum 1.00 mt diameter and 6mt in depth into which rain water may be channelled and allowed to filter for removing silt and floating material. The well shall be provided with ventilating covers. The water from the open well may be used for non-potable domestic purposes such as washing, flushing and for watering the garden etc.
 - ii) Rain Water Harvesting for recharge of groundwater may be done through a bore-well around which a pit of 1m width may be excavated upto a depth of at least 3m and refilled with stone aggregate and sand. The filtered rain water may be channelled to the refilled pit for recharging the bore-well.
 - iii) An impressive surface/underground storage tank of required capacity may be constructed in the setback or other open spaces and the rain water may be channelled to the storage tank. The storage tank shall always be provided with ventilating covers and shall have drawn-off taps suitably placed so that rain water may be drawn off for domestic, washing, gardening and such other purposes. The storage tank shall be provided with an overflow.
 - iv) The surplus rain water after storage may be recharged in to ground through percolation pits or trenches or combination of pits and trenches. Depending on the geo-morphological and topographical conditions, the pits may be of the size of 1.20 m width X 1.20 m length X 2 m to 2.50 m depth. The trenches can be of 0.60 m width X 2 to 6 m length X 1.50 to 2 m depth. Terrace water shall be channelled to pits or trenches. Such pits or trenches shall be back filled with filter media comprising the following materials :
 - a) 40 mm stone aggregate as bottom layer upto 50% of the depth.
 - b) 20 mm stone aggregate as lower middle layer upto 20% of the depth.
 - c) Coarse sand as upper middle layer upto 20% of the depth.
 - d) A thin layer of fine sand as top layer.
 - e) Top 10% of the pits/trenches will be empty and a splash is to be provided in this portion in such a way that roof top water falls on the splash pad.
 - f) Brick masonry wall is to be constructed on the exposed surface of pits/trenches and the cement mortar plastered. The depth of wall below ground shall be such that the wall prevents lose soil entering into pits/ trenches. The projection of the wall above ground shall at least be 15 cm.
 - g) Perforated concrete slabs shall be provided on the pits/trenches.
 - h) If the open space surrounding the building is not paved, the top layer up to a sufficient depth shall be removed and refilled with coarse sand to allow percolation of rain water into ground.
 - v) The terrace shall be connected to the open well/bore-well/storage tank/ recharge pit/trench by means of HDPE / PVC pipes through filter media. A valve system shall be provided to enable the first washing from roof or terrace catchment, as they would contain undesirable dirt. The mouth of all pipes and opening shall be covered with mosquito (insect) proof wire net. For the efficient discharge of rain water, there shall be at least two rain water pipes of 100 mm dia. for

a roof area of 100 sq.m.

- vi) Rain Water Harvesting structures shall be sited as not to endanger the stability of building or earthwork. The structure shall be designed such that no dampness is caused in any part of the walls or foundation of the building or those of an adjacent building.
- vii) The water so collected/recharged shall as far as possible be used for non-drinking and non-cooking purpose. Provided that when the rain water in exceptional circumstances will be utilised for drinking and/or cooking purpose, it shall be ensured that proper filter arrangement and the separate outlet for bypassing the first rain water has been provided. Provided further that, it will be ensured that for such use, proper disinfectants and the water purification arrangements have been made.

35.0 REGULATION FOR WASTE WATER RECYCLING

35.1 Type of Waste Water

The Waste Water is of following types:--

Black Water.- means Waste Water from W.C. Urinals and M.S.W.

(ii) Grey Water.-means Waste Water from Bathrooms, Sinks, Shower and Wash Areas etc.

(iii) Apart from Residential Waste Water, Waste Water generated from Industrial, Medical, Commercial and Waste generated from Garbage shall also be treated as per the guidelines given by the Maharashtra Pollution Control Board.

35.2 APPLICABILITY

These Regulations shall be applicable to all Developments/ Redevelopments/part Developments for the uses as mention under (C-1) to (C-6) shall have the provision for treatment, recycling and reuse of Waste Water. The applicant shall along with his application for obtaining necessary layout approval/ building permission shall submit a plan showing the location of Waste Water Treatment Plant, furnishing details of calculations, references, implementation, etc. This Plan shall accompany with the applicant's commitment to monitor the system periodically from the date of occupation of the respective building.

35.3 REGULATIONS

35.3.1 (C-1) For Layout Approval/Building Permission

- (i) In case of Residential layouts, area admeasuring 10000 sq.m. or more, in addition to 10 % open space, prescribed in the bye- laws, a separate space for Waste Water Treatment and Recycling Plant should be proposed in the layout.
- (ii) On the layout Plan, all Drainage lines, Chambers, Plumbing lines should be marked in different colour and submit the layout for approval to the Municipal Corporation.
- (iii) The Recycled Water shall be used for Gardening, Car Washing, Toilet Flushing, Irrigation, etc. and in no case for drinking, bathing, washing utensils, clothes, etc
- (iv) In the Estimate of Waste Water Recycling Plant only provision for basic civil work and required machinery will be proposed by the Municipal Corporation other than these provisions, additional machinery, plumbing, Water tank pipe, landscape should be provided by Owner or Developer on his Own Cost.
- (v) A clause must be included by the Owner/ Developer in the purchase agreement that the purchaser, Owner of the Premises/Organization or Society of the purchasers shall ensure that:

- a. The Recycled Water is tested every six months either in Municipal Laboratory or in the laboratory approved by Municipal Corporation or by State Government and the result of which shall be made accessible to the Competent Authority/ EHO of the respective Ward Office.
- b. Any recommendation from testing laboratory for any form of corrective measures that are needed to be adopted shall be compiled. Copy of any such recommendation and necessary action taken shall also be sent by the testing laboratories to the Competent Authority/ EHO of respective Wards.
- c. Maintenance of Recycling Plant should be done by the Developer or Housing Society or Owner.

35.3.2 (C-2) Group Housing/Apartment Building

In case of Group Housing if the area admeasuring 4000 sq.m. and above or if consumption of Water is 20,000 litres per day or if a multi-storeyed building where there are 20 or more tenements then Waste Water Recycling Plant as mentioned in (C-1) above should be constructed.

35.3.3 (C-3) Educational, Industrial, Commercial, Government, Semi-Government Organizations, Hotels, Lodgings etc.

For all above buildings having built-up area 1500 sq.m. or more or if Water consumption is 20,000 litre per day whichever is minimum, then provision for Waste Water Treatment Plant as mentioned in (C-1) is applicable.

35.3.4 (C-4) Hospitals

Those Hospitals having 40 or more beds, Waste Water Recycling Plant as mentioned in (C-1) is applicable.

35.3.5 (C-5) Vehicle Servicing Garages

All Vehicle servicing garages shall ensure that the Waste Water generated through washing of vehicles is treated and recycled back for the same use as mentioned in (C-1)

35.3.6 (C-6) Other Hazardous uses

All other Establishments/ Buildings where chances of Waste Water generated containing harmful chemicals, toxins are likely and where such water cannot be directly led into municipal sewers, the concerned Competent Authority may direct the Owners, users of such Establishments, Buildings to treat their Waste Water as per the directions laid in (C-1)

35.4 INCENTIVE

i. The Owner/Developer/Society setting up and agreeing to periodically maintain such Waste Water Treatment and Recycling Plant entirely through their own expenditure shall be eligible for an incentive in the form of fiscal benefits in Property Tax to the extent of 5% to Tenement holder/Society.

35.5 Penalty Clause

(i) Any person / Owner / Developer / Organization / Society violating the provisions of these by-laws, he shall be fined Rs.2,500/- on the day of detection and if the violation continues, then he shall be fined Rs.100/- for every day as concrete action after written Notice from Municipal Corporation.

(ii) If any person / Owner /Developer / Organization / Society fails to operate as determined by the Authorised Officer of the Municipal Corporation and from the observations of test results and/or

physical verification) the Recycling plant, then he will be charged a penalty of Rs.300/- per day and disconnection of Water connection also.

36.0 SOLID WASTE MANAGEMENT

It shall be mandatory for:

i) Housing complexes, Commercial establishments, hostels, hospitals having aggregate built-up area more than 4,000 sq.m. or more.

ii) All three star or higher category hotels.

to establish a dedicated Solid waste management system to treat 100% wet waste being generated in such buildings.

The treatment of wet waste shall be done through an organic waste composters/ vermiculture pits or other similar technologies of suitable capacity installed through reputed vendors.

The disposal of dry waste, e-waste, hazardous waste shall be carried out through authorised recyclers or any other system as specified by the Municipal Commissioner.

37.0 INCENTIVE FOR GREEN BUILDINGS

The municipal corporation shall strive to promote green building concepts within the municipal area. In order to do so it may empanel agencies of repute as listed/ recognised by the State / Central Government. The following incentives shall be provided for green rated buildings.

i) Green buildings shall be entitled for incentive FSI as below.

GRIHA Three star / IGBC Silver or equivalent rating – 3% incentive FSI on basic FSI.

GRIHA Four star / IGBC Gold or equivalent rating – 5% incentive FSI on basic FSI.

GRIHA Five star / IGBC Platinum or equivalent rating – 7% incentive FSI on basic FSI.

Provided, achieving minimum GRIHA Three star / IGBC Silver or equivalent rating for construction projects shall be mandatory for all buildings belonging to Government, Semi-Government, local bodies and public sector undertakings.

ii) Incentive FSI will be awarded after pre-certification from the empanelled agency. This FSI shall be exclusive of the limits specified in this DCPR.

iii) In case that the developer fails to achieve committed rating as per pre-certification at the time of final occupancy, a penalty shall be imposed at the rate 2 times of the land cost as per ASR for the incentive FSI for the rating not achieved.

PART - XI
SPECIAL SCHEMES/ ACTIVITIES

38.0 SPECIAL TOWNSHIP PROJECTS

The Regulations for Special Township Projects in Municipal Corporation area shall be as sanctioned by Government vide notification no.TPS-1806/ 135/CR-31/ 06/ 6031/UD-13, dated 3rd June, 2006 and shall be subject to amendment by Government from time to time.

39.0 CONSERVATION OF HERITAGE BUILDINGS / PRECINCTS / NATURAL FEATURES

39.1 Applicability:

This regulation will apply to those buildings, artifacts, structures, areas and precincts of historic and/or architectural and /or cultural significance (hereinafter as 'Listed Buildings/Heritage Buildings and listed precincts/Heritage precincts') and those natural features of environmental significance including sacred graves, hills, hillocks, water bodies (and the areas adjoining the same) etc.

39.2 Preparation of List of Heritage Buildings, Heritage Precincts and Natural Features.

The Municipal Commissioner on advice of Heritage Committee shall prepare heritage list and shall issue public notice in the local newspapers declaring his intention to include the buildings, artefacts, areas and precincts of historic and /or cultural significance and the list of natural features of environmental significance, including sacred graves, hills, hillocks, water bodies etc. and invite objections and suggestions from any person in respect of the proposed inclusion within a period of 30 days from the date of such notice.

The Municipal Commissioner shall issue notice to the owner of the buildings, artifacts, areas and precincts of historic and/or cultural significance etc. and invite objections and suggestions from such person in respect of proposed inclusion within 30 days from the date of such notice.

The Municipal Commissioner, on respect of any objections or suggestions, shall decide the same after giving hearing to the objector and send to Government for approval. Government will sanction the said heritage list with modification, if required. This list will be called **Final Heritage List**. For this Modification under Section 37 need not be necessary.

Thereafter, the Municipal Commissioner may amend the Final Heritage List from time to time as and when required, on the advice of the Heritage Committee. In such case it shall not be necessary to follow the procedure under Section 37 of Maharashtra Regional and Town Planning Act of 1966 or to take approval from Government, but the procedure as laid down above in this regulation regarding publication and objection / suggestion shall be followed before finalising it.

39.3 Restriction on development, Redevelopment/repairs etc.

No development or redevelopment or engineering operations or addition, repairs renovation including the painting of buildings, replacement of special features or plastering or demolition of any part thereof of the said listed buildings, or listed precincts or listed natural features shall be allowed except with the prior written permission of the Municipal Commissioner. Before granting any such permissions, the Municipal Commissioner shall consult the Heritage Conservation Committee to be appointed by the State Government (hereinafter referred to as 'the said Heritage Conservation Committee') and shall act on the advice of the Heritage Conservation Committee.

Provided that before granting any permission for demolition or major alterations/addition to listed buildings (or buildings within listed precincts) objections and suggestions from the public shall be invited and duly considered by the Heritage Conservation Committee.

Provided that, in exceptional cases for reasons to be recorded in writing the Municipal Commissioner himself may overrule the advice of the Heritage Conservation Committee.

If the application for development, alteration, modification of the Heritage precincts or listed building is rejected under this regulation or while granting such permission any conditions are imposed on the owner which deprives him to use the FSI, the said owner shall be compensated by grant of Development Right Certificate.

39.4 Incentive uses for Heritage Buildings.

After the commencement of this Regulation, the Heritage Precincts or the Listed Buildings shall not be permitted to be used for any commercial or office purpose except with the permission of the Heritage Conservation Committee. However, in cases of buildings included in the Heritage Conservation List, if the owner /owners agree to maintain the listed Heritage Building as it is in the existing stage and to preserve its heritage with due repairs, the owner/owners may be allowed with the approval of the Heritage Conservation Committee to convert part of the whole of the non-commercial area to commercial /office use. Provided that, if the heritage building is not maintained suitably or if the heritage value of the building is allowed to be spoiled in any manner, the Municipal Commissioner shall withdraw the permission forthwith.

39.5 Grant of Transferable Development Rights to owners/lessees of heritage buildings/heritage precincts.

If the owner is deprived of using FSI on the said plot or development permission is granted to him with conditions which deprive him of use of FSI, then he shall be entitled for TDR as decided by the Commissioner in consultation of Heritage Conservation Committee. The utilization of this TDR shall be as per TDR Regulation.

39.6 Maintaining Skyline

Building included in heritage precincts shall maintain the skyline in the precincts (without any high-rise development) as may be existing in the surrounding area, so as not to demolish or destroy the value and beauty of the said heritage buildings/heritage precincts. The development within the precincts shall be in accordance with the guidelines framed by the Municipal Commissioner on the advice of the Heritage Conservation Committee.

39.7 Restrictive Covenants

Regulations existing as on date of this Regulation imposed under covenants terms and conditions, on the leasehold plots either by State Government or by the Municipal Corporation shall continue to be imposed, in addition to the Development Control Regulations. However, in case of any conflict with the heritage preservation interest/environmental conservation and the said Development Control and Promotion Regulations, this regulation shall prevail.

39.8 Grading of the listed buildings/Listed Precincts.

The Municipal Commissioner shall classify the Heritage Precincts, Heritage Buildings in "Grades" such as (I),(II), (III). The meaning of these grades and basic guidelines for development permissions are as follows:

Grade-I	Grade-II	Grade-III
(A) Definitions		
Heritage Grade-I comprises Buildings and precincts of National or Historic importance, excellence in architectural style, design technology and material usage and/or aesthetics; associated with a great historic event, personality, movement or institution. They have been and are the prime landmarks of the city and of National importance.	Heritage Grade -II (A and B) comprises buildings and precincts of Regional importance, possessing special architectural or aesthetic merit, or cultural or historical significance though of a lower scale than Heritage Grade-I. They are local landmarks, which contribute to the image and identity of the region. They may be the work of master craftsmen or may be models of proportion and ornamentation or designed to suit a particular climate.	Heritage Grade -III comprises buildings and precincts of local importance for townscape, they evoke architectural, aesthetic, or sociological interest though not as in Heritage Grade -II. These contribute to determine the character of the locality and can be representative of life-style of a particular community or region and, may also be distinguished by setting on a street line or special character of the façade and uniformity of height width and scale.
(B) Objective		
Heritage Grade-I richly deserves careful preservation.	Heritage Grade-II deserves intelligent conservation.	Heritage Grade-III deserves intelligent conservation (though on a lesser scale than Grade-II and special protection to unique features and attributes.)
I Scope for Change		
No interventions be permitted either on exterior or interior unless it is necessary in the interest of strengthening and prolonging the life of the buildings or precincts or any part of features thereof. For this purpose absolutely essential and minimum changes would be allowed and they must be in accordance with the original.	Grade-II (A) Internal changes and adaptive reuse and external changes may by and large be allowed but subject to strict scrutiny. Care would be taken to ensure the conservation of all special aspects for which it is included in Heritage Grade-II Grade-II (B) In addition to the above, extension of Additional building in the same plot or compound, in certain circumstances be allowed, provided that, the extension/additional building is in harmony with (and does not detract from) the existing heritage buildings or precincts especially in terms of height, and facade.	External, internal changes and adaptive reuse would by and large be allowed. Changes can include extensions, and additional buildings in the same plot or compound. However any changes should be such that they do not detract from the existing heritage building/precinct.

(D) Procedure		
Development permission for the changes would be given by the Commissioner on the advice of the Heritage Conservation Committee.	Development permission for the changes / additional construction would be given by the Commissioner on the advice of Heritage Conservation Committee.	Development permission for the changes / additional construction would be given by the Commissioner on the advice of the Heritage Conservation Committee.
I Vistas/ Surrounding Development		
All developments in areas surrounding Heritage Grade-I shall be regulated and controlled by ensuring that it does not mark the grandeur of or view from Heritage Grade-I		

39.9 Signs and outdoor display structures

No display or advertising signs and outdoor display structures on listed building and / or the Heritage Precincts shall be permitted except accordance with part X (sign and outdoor display structure) National Building Code of India.

Prohibition of advertising signs and outdoor display structure in certain cases :

Notwithstanding the provisions mentioned above no advertising sign or outdoor display structures shall be permitted on buildings of architectural aesthetic historic or heritage importance as may be decided by the Municipal Commissioner, Committee or on Government buildings, save that in the case of Government buildings only advertising signs or outdoor display structures may be permitted if they relate to the activities for the said buildings' own purposes or related programs.

Provided that, if the Heritage Conservation Committee so advises, the Municipal Commissioner shall refuse permission for any sign or outdoor display structure.

39.10 Composition of Heritage Conservation Committee.

There shall be Heritage Conservation Committee for the City. This Committee shall be constituted by the Municipal Commissioner. The committee shall comprise of the following members:

i)	Chairman Appointed by the Government	Chairman
ii)	Divisional/ District officer of Archaeological Survey of India	Member
iii)	Divisional/ District officer of Archaeological Survey of Maharashtra	Member
iv)	Joint Director Town Planning, Pune Division, Pune	Member
v)	Conveyor INTAC Pune Chapter	Member
vi)	Heritage Conservation Architect having 10 years of experience and membership of the Council of Architecture	Member
vii)	Historian having experience of 10 years in the field of History.	Member
viii)	Structural Engineer having experience of 10 years and	Member

	member of Institute of Engineers.	
ix)	City Engineer, Pune Municipal Corporation	Member
x)	Executive Engineer Heritage Pune Municipal Corporation	Member secretary

The tenure of the Members of categories (vi) to (viii) above shall change after every three years provided however that, the same person shall be eligible for reappointment as Member.

The Heritage Conservation Committee shall come into existence with effect from the date of its publication in the official Gazette.

No act of the Committee done in good faith, shall be deemed to be invalid by reason only of some defect subsequently discovered in the organization of the Committee or in the Constitution of the Committee or in the appointment of the Member or on the ground that such member was disqualified for being appointed.

The Chairman and in his absence the chosen Member of the Committee shall preside over the meeting of the Committee.

The Terms of reference of the Committee :-

- (i) To consider whether development permission should be granted under this Regulation and the conditions of such permission.
- (ii) To prepare a list or supplementary list of building artefacts, structures, areas precincts of historic aesthetic architectural cultural significance and a supplementary list of natural features of environmental significance including scared groves, hills, hillocks etc. water bodies (and the areas adjoining the same) to which this regulation would apply.
- (iii) To consider whether any relaxation, modification, alteration, or variance of any of the Development Control and Promotion Regulations is called for.
- (iv) To suggest amendments, changes or special regulations or modification to regulations for listed buildings and the heritage precincts regulated under these regulations
- (v) To consider on the extent of Development Rights to be granted to the owners of listed Building of the Heritage Precincts.
- (vi) To consider whether development Rights Certificates may be allowed to be consumed in a heritage precinct.
- (vii) To consider whether to allow commercial /office user of any listed building of Heritage Precincts and when to terminate the same.
- (viii) To regulate erection of outside advertisement/bill boards.
- (ix) To recommend guidelines to be adopted by those private parties who sponsor beautification schemes at public intersection and elsewhere.
- (x) To evaluate the cost of repairs to be given to the owners to bring the existing building back to the original condition. For this purpose, the Committee may suggest ways to raise funds through private sources.
- (xi) To prepare special designs and elements and guidelines for listed buildings and control of height and essential façade characteristics such as maintenance of the buildings and to suggest suitable design adopting new materials for replacements keeping the old form intact to the extent possible.
- (xii) To prepare guideline relating to design elements and conservation principles to be adhered to and to prepare other guideline for the purpose of this regulation.
- (xiii) To consider any other issue as may be required from time to time during course of scrutiny of development permissions and in overall interest of heritage/environmental conservation.

In the absence of Heritage Conservation Committee, the Municipal Commissioner shall consult the Government before giving such permission.

39.12 Heritage Conservation Fund

1. Heritage buildings included in the said list shall be maintained by the owners of the said buildings themselves, with a view to give monetary help for such maintenance/repairs a separate fund may be created which would be kept at the disposal of the Municipal Commissioner, Pune Municipal Corporation, who will utilise these funds on the advice of the Heritage conservation Committee. The commissioner may, in such cases disburse appropriate amount to the owner or may get maintenance/ repair work done through Municipal Corporation.
2. 2% of total development charges collected shall be transferred to the Heritage conservation fund.
3. The Municipal commissioner shall have right to remove any unauthorized construction in the property enlisted as heritage property as an encroachment for the Municipal land as defined and as per procedure laid down U/S 231 of the B.P.M.C. Act, 1941 and recover the expenses of such removal/ demolition work from the owner as arrears of land revenue.
4. The Municipal Commissioner shall have right to enter into any such heritage property to repair such property to avoid any damage or injury, and the amount shall be spent from Heritage conservation fund and shall be recovered from the owner as arrears of property tax.
5. If Heritage structure listed in Grade I needs conservation, preservation and immediate repairs and if the structure is affected due to vandalism by occupier/ owner, then the Municipal commissioner shall have right to acquire such heritage property and conserve its heritage value.

40.0 ERECTION OF MOBILE TOWERS:

Regulation for setting up of Telecommunication Cell Site(s)/Base Station(s) and installation of the equipments for Telecommunication Network in Municipal Corporation area shall be as per Appendix-Q

APPENDICES AND PROFORMAS

APPENDIX A-1

FORM FOR CONSTRUCTION OF BUILDING OR LAYOUT OF BUILDING / GROUP HOUSING

Application for permission for development under Section 44 / 58 of The Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BPMC Act, 1949.

From _____
(Name of the owner)

To,
The Municipal Commissioner,
Municipal Corporation, Pune

Sir,

I intend to carry out the under mentioned development in the site/plot of land, on Plot No..... Town and Revenue S.No.....City Survey No.....Maujesituated at Road / Street Societyin accordance with Section 44 / 58 of the Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BPMC Act, 1949.

I forward herewith the following plans and statements (Item i to ix) wherever applicable, in quadruplicate, signed by me (Name in block letters)and the Architect / Licensed Engineer / Structural Engineer / Supervisor, (License No.....), who has prepared the plans, designs and a copy of other statements /documents as applicable

- i) Key Plan (Location Plan), (to be shown on first copy of the set of plans)
- ii) Site Plan showing the surrounding land and existing access to the land proposed to be developed; (to be shown on first copy of the set of plans)
- iii) A detailed building plan showing the plan, section and elevations of the proposed development work along with existing structure to be retained/ to be demolished, if any;
- iv) Particulars of development in Form enclosed (to be submitted for development other than individual buildings);
- v) Copy of sanctioned layout plan if any;
- vi) An extract of record of rights, property register card (any other document showing ownership of land to be specified) alongwith consent of co-owners where third party interest is created;
- vii) Attested copy of receipt of payment of scrutiny fees;
- viii) Latest property tax receipt;
- ix) No Objection Certificate(s), wherever required.

I request that the proposed development/ construction may be approved and permission be accorded to me to execute the work.

FORM GIVING PARTICULARS OF DEVELOPMENT
(Item iv of Appendix A-1)

1.	(a) (i) Full Name of Applicant	-----
	(ii) Address of applicant	-----
	(iii) e-mail ID	-----
	(iv) Contact / Mobile No.	-----
	(b)(i) Name and address of Architect/ licensed Engineer/ Structural Engineer/ Supervisor employed.	-----
	(ii) No. and date of issue of License	-----
2.	(a) Is the plot of, a City Triangulation Survey Number, Revenue Survey Number or Hissa Number of a Survey Number or a Final Plot Number of a Town Planning Scheme or a plot of an approved layout?	
	(b) Please state Sanction Number and Date of Sub-division / Layout	
	(c) Whether the land is situated in Core Area or Outside Core Area?	
3.	(a) What is the total area of the plot according to the ownership document and measurement plan?	-----
	(b) Does it tally with the Revenue/CTS Record	-----
	(c) What is the actual area available on site measured by Architect/licensed Engineer/Structural Engineer / Supervisor? (The permission shall be based on the area whichever is minimum.)	-----
	(d) Is there any deduction in the original area of the plot on account of D.P. Roads, or reservation(s). If so, are they correctly marked on the site plan? Please state the total area of such deductions?	-----
	(e) Is there any water stream in the land? State the area of such land.	-----
	(e) What is the area remained for development after above deduction(s)?	-----
	(f) What is the area proposed for recreational open space? (in case of land having original holding more than 0.4 hecter) Please mention the area.	
	(g) Whether amenity space as required under Regulation no.13.4 is left? Please mention the area.	
	(f) What is the net plot area as per Regulation no.13.8? (excluding (g) above)	
4.	Are all plans as required under Regulation no.6.2 enclosed?	
5.	(a) In what zone does the plot fall?	-----
	(b) For what purpose the building is proposed? Is it permissible according to the land use	

	classification?	
6.	(a) Is road available as an approach to the land? What is the average existing width of the road? (If the plot abuts on two or more roads, the above information in respect of all roads should be given)	
	(b) Is the land fronting on D.P. road? If so, width of the D.P. road	
	(c) Is the land fronting on National or State highway? If so, is the Building line / control line maintained? Please state the distance.	
	(c) What is the height of the building above the average ground level of the plot?	
	(d) Is it within permissible limit of height specified in Regulation no. 15.9 i.e. 1.5 times of the road width plus front margin?	
	(e) Does height exceed the limit specified in (d) above? If so, is height approved by Director of Fire Services, M.S.?	
7.	Is the land subject to restrictions of blue / red flood line, airport, railway, electric line, land fill sites, archaeology, etc.? Please state the details along with 'No objection certificate 'if any.	
8.	(a) If there are existing structures on the plot	
	(i) Are they correctly marked and numbered on the site plan?	
	(ii) Are those proposed to be demolished immediately and hatched in yellow colour?	
	(iii) What is the plinth area and total floor area of all existing structures to be retained? (Please give details confirming to the plan submitted)	
9.	Is balcony area within the permissible limit of 15 %? State said balcony area and area counted in FSI.	
10.	Are double height terrace within the limit of 20%? Are they of supported type? State said double height terrace area and area counted in FSI.	
11.	(a) Please state the total built up area, (existing + proposed + extra balconies + extra double height terraces.)	
	(b) What is the basic permissible F.S.I. of the zone according to front road width?	
	(c) What is the premium FSI proposed to be consumed?	
	(d) What is the area of TDR proposed to be consumed?	
	(e) What is the additional FSI proposed to be consumed?	
	(f) Please state the overall F.S.I. utilised in the proposal?	

	(g) Is built-up area of each flat / unit mentioned on the plan?		
12.	Whether area for inclusive housing is required as per Regulation no.13.7? Please state the details.		
13.	(a) What is the width of the front marginal distance (s)? If the building abuts two or more roads, does the front marginal distance comply with Regulation?		
14.	(a) What is :	Permissible	Proposed
	(i) the side marginal distance (s)?		
	(ii) the rear marginal distance (s)?		
	(iii) the distance between buildings?		
15.	(a) What are the dimensions of the inner or outer chowk?		
	(b) Is / are room (s) dependent for its light and ventilation on the chowk? If so, are the dimensions of the chowk as required?		
16.	(a) Whether sizes of the rooms comply with the dimensions mentioned in the regulations?		
	(b) Whether use of every room / part mentioned on the plan?		
	(c) Whether every room derives light and ventilation required under the regulations?		
17.	If the height of the building is more than 15 meter above the average ground level, is provision for lifts made?		
	(a) If so, give details of lift.	Passenger Capacity	No. of Lifts
	(b) Details of Fire Lift.	Passenger Capacity	No. of Lifts
18.	(a) Does the building fall under purview of Regulation no.6.2.6.1?		
	(b) If so, is fire escape staircase provided in addition to regular staircase?		
	(c) Whether the ramps to the basement are provided leaving 6 m marginal distance for movement of fire fighting vehicle?		
	(d) If podiums are proposed, does it allow the movement of fire fighting vehicle properly?		
19.	(a) What are the requirements of parking spaces under the Regulation no.20? How many are proposed?	Required	Proposed
		Car	
		Scooter	
		Cycle	
	(b) (i) Are loading-unloading spaces necessary?		
	(ii) If so, what is the requirement?		
	(iii) How many are proposed?		

DCPR-2017 FOR PUNE MUNICIPAL CORPORATION

20.	Is the sanitary arrangement provided as per the regulation?	
21.	Details of the source of water to be used in the construction	
22.	Distance from the sewer.	
23.	Please explain in detail in what respect the proposal does not comply with the Development Control and Promotion Regulations and the reasons there for, attaching a separate sheet if necessary.	

I hereby declare that I am the Architect/ licensed Engineer/ Structural Engineer/ Supervisor employed for the proposed work and that the statements made in this form are true and correct to the best of my knowledge.

Stamps of Approval of Plans:**A AREA STATEMENTS**

1. Area of land
(Minimum area of a, b, c to be considered)
 - a) As per ownership document (7/12, CTS extract)
 - b) as per measurement sheet
 - c) as per site
2. Deductions for
 - (a) Proposed D.P./ D.P. Road widening Area
 - (b) Any D.P. Reservation area

(Total a+b)
3. Gross Area of Plot (1-2)
4. Recreational Open space
 - (a) Required -
 - (b) Proposed -
5. Amenity Space
 - (a) Required -
 - (b) Proposed -
6. Service road and Highway widening
7. Internal Road area
8. Area under layout plots
9. Net area of plots for FSI Calculations = (3-5b)
10. Permissible FSI factor for layout plots = (9/8)
11. Area for inclusive housing
 - (a) Required -
 - (b) Proposed -

Certificate of Area:

Certified that the plot under reference was surveyed by me on _____ and the dimensions of sides etc. of plot stated on plan are as measured on site and the area so worked out tallies with the area stated in document of Ownership/ T.P. Scheme Records/ Land Records Department/City Survey records.

APPENDIX 'C'

**QUALIFICATION, COMPETENCE, DUTIES AND RESPONSIBILITES ETC. OF LICENSED
TECHNICAL PERSONNEL OR ARCHITECT FOR PREPARATION OF SCHEMES FOR
DEVELOPMENT PERMISSION AND SUPERVISION**

C-1	General
C-1.1	The qualifications of the technical personnel and their competence to carry out different jobs for building permit and supervision for the purpose of licensing by the Authority shall be as given in Regulation no. C-2 to C-6. The procedure for licensing the technical personnel is given in Regulation no.C-6.
C-2	ARCHITECT
C-2.1	Qualifications- The minimum qualifications for an architect shall be the qualifications as provided for in the Architects Act, 1972for registration with the Council of Architecture. Such registered Architects shall not be required to again register their names with the Corporation. However, he shall submit the registration certificate to the Corporation.
C-2.2	Competence of Architect: To carry out work related to development permission as given below and shall be entitled to submit - (a) All plans and information connected with development permission. (b) Structural details and calculations for building on plot upto 500 sq. m. and upto 3 storeys or 11 m. height and (c) Certificate of supervision and completion for all buildings.
C-3	A)ENGINEER
C-3.1	Qualifications- 1) The qualifications for Licensing Engineer will be the corporate membership (Civil) of the Institution of Engineers or such Degree or Diploma in Civil or Structural Engineering or equivalent; 2) Diploma in Civil Engineering or equivalent, having experience of 10 years in the field of land and building planning.
C-3.2	Competence- To carry out work related to development permission as given below and shall be entitled to submit- (a) All plans and related information connected with development permission. (b) Structural details and calculations for building on plot upto 500 sq.m. and upto 3 storeys or 11 m.height, and (c) Certificate of supervision and completion for all building.
C-4	STRUCTURAL ENGINEER
	C-4.1 Qualifications- Qualifications for Licensing of structural engineers shall be as given below, with minimum 3 years of experience of structural engineering practice in designing and field work; (a) Graduate in Civil Engineering of recognised Indian or Foreign University and Chartered Engineer or Associated Member in Civil Engineering Division of Institution of Engineers (India)

	or equivalent Overseas Institution; and (b) Shall have post graduate degree in structural engineering. In the case of doctorate in structural engineering the experience shall not be required.						
C-4.2	Competence —he shall be entitled to submit the structural details and calculations for all buildings and supervision.						
C-4.2.1	Complicated buildings and sophisticated structures, as decided by the Municipal Commissioner, which are not within the horizontal areas and vertical limits under C-2.2 (b), C-3.2 (b), C-5.2 (a) (i) & C-5.2 (b) (i) shall be designed only by Structural Engineer.						
C-5	SUPERVISOR:						
C-5.1	Qualification (a) For Supervisor 1 :- (i) Three years architectural assistantship or intermediate in architecture with two years' experience, or (ii) Diploma in Civil engineering or equivalent qualifications with two years' experience. (iii) Draftsman in Civil Engineering from ITI or equivalent qualifications with Ten years' experience out of which five year shall be under Architect/Engineer. (b) For Supervisor - 2:- (i) Draftsman in Civil Engineering from ITI or equivalent qualifications with five years' experience under Architect / Engineer.						
C-5.2	Competence (a) For Supervisor-1: he shall be entitled to submit - (i) All plans and related information connected with development permission on plot upto 500 sq.m.; and (ii) Certificate of supervision of buildings on plot upto 500 sq. m. and completion thereof. (b) For Supervisor-2 : he shall be entitled to submit - (i) All Plans and related information upto 200 sq. m. built up area, and (ii) Certificate of supervision for limits at (i) above and completion thereof.						
C-6.	LICENSING-						
C-6.1	Technical Personnel to be licensed:- The Qualified technical personnel or group as given in regulations; No C-3, C-4, C-5 shall be licensed with the authority and the license shall be valid for three calendar years ending 31 st December after which it shall be renewed annually or every three years.						
C-6.2	Fees for Licensing- The annual licensing fees shall be as follows:- <table border="1" data-bbox="371 1771 1281 1944"> <tr> <td>For Engineer and structural Engineer</td> <td>1000 p.a.</td> </tr> <tr> <td>For supervisor (1)</td> <td>500 p. a.</td> </tr> <tr> <td>For supervisor (2)</td> <td>300 p. a.</td> </tr> </table>	For Engineer and structural Engineer	1000 p.a.	For supervisor (1)	500 p. a.	For supervisor (2)	300 p. a.
For Engineer and structural Engineer	1000 p.a.						
For supervisor (1)	500 p. a.						
For supervisor (2)	300 p. a.						
	The Municipal Commissioner may revise above fees from time to time, if necessary.						

C-6.3 Duties and Responsibilities of Architects / Licensed Technical Personnel:

The duties and responsibilities of architects / licensed technical personnel shall be as follows:-

- (1) It will be incumbent on every architect / licensed technical personnel, in all matters in which he may be professionally consulted or engaged, to assist and co-operate with the Municipal Commissioner and other Officers in carrying out and enforcing the provisions of Maharashtra Regional & Town Planning Act, 1966 and of any regulations for the time being in force under the same.
- (2) Every architect / licensed technical personnel shall be responsible for due compliance with the provisions of Maharashtra Regional & Town Planning Act, 1966 and the BPMC Act, 1949 and of any regulations for the time being in force under the said Act. It shall be obligatory on him to satisfy himself that a qualified and competent Mistry or Inspector of Works is constantly employed and present on the work to supervise the execution of all work and to prevent the use of any defective material therein and the improper execution of any such work.
- (3) Every architect / licensed technical personnel shall be responsible for carrying out work according to sanctioned plan.
- (4) Every architect / licensed technical personnel shall be responsible for correctness of the calculations and dimensions mentioned on the plan and shall be liable for consequences arising thereof.
- (5) Architect / licensed technical personnel shall not involve himself in any unauthorised development. He shall also make aware the client about legal provisions in respect of proposed development and consequences thereof.
- (6) When an architect / licensed technical personnel cease to be in the employment for the development work, he shall report the fact forthwith to the Municipal Commissioner.

APPENDIX 'D-1'
FORM FOR SANCTION OF BUILDING PERMISSION AND
COMMENCEMENT CERTIFICATE

To,

Sir,

With reference to your application No _____, dated _____ for the grant of sanction of Commencement Certificate under Section 44 of The Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BPMC Act, 1949 to carry out development work / Building on Plot No _____ Revenue Survey No _____, City Survey No _____, mauja _____ situated at Road /Street _____, Society _____ the Commencement Certificate/Building Permit is granted under Section 45 of the said Act, subject to the following conditions:

1. The land vacated in consequence of the enforcement of the set-back rule shall form part of the public street.
2. No new building or part thereof shall be occupied or allowed to be occupied or used or permitted to be used by any person until occupancy permission has been granted.
3. You will have to handover the amenity space to the Corporation before approval of final layout as per Regulation no.13.4. (wherever applicable)
4. You will have to submit an undertaking in respect of recreational open spaces as stipulated in Regulation.(wherever applicable)
5. The Commencement Certificate/ Building permit shall remain valid for a period of one year commencing from the date of its issue unless the work is not commenced within the valid period.
6. This permission does not entitle you to develop the land which does not vest in you.

APPENDIX 'D-2'

FORM FOR TENTATIVE APPROVAL FOR DEMARCATION OF LAND / SUB-DIVISION LAYOUT

To,

Sir,

With reference to your application No _____, dated _____ for the land sub-division approval, under Section 44 of The Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BPMC Act, 1949 to carry out development work in respect of land bearing Revenue Survey No _____, City Survey No _____, mauje _____ situated at Road /Street _____, Society _____, it is to inform you that, land sub-division layout is hereby tentatively approved and recommended for demarcation, subject to the following conditions:

1. You will get the land sub-division layout demarcated on the site by the Land Records Department and submit the certified copy to that effect for final approval.
2. It shall be the responsibility of the owner to carry out all the development work including construction of roads, sewer lines, water supply lines, culverts, bridges, street lighting, etc. and hand it over to the Municipal Corporation after developing them to the satisfaction of the Municipal Commissioner.
3. If you wish that the Municipal Corporation has to carry out these development works, then you will have to deposit the estimated expenses to the Municipal Corporation in advance, as decided by the Municipal Commissioner.
4. You will have to handover the amenity space to the Corporation before approval of final layout as per Regulation no.13.4. (applicable in case where owner is not allowed to develop)
5. You will have to submit an undertaking in respect of recreational open spaces as stipulated in Regulation.
6. This permission does not entitle you to develop the land which does not vest in you.

APPENDIX 'D-3'

FORM FOR FINAL APPROVAL TO THE LAND SUB-DIVISION / LAYOUT

To,

Sir,

With reference to your application No. _____, dated _____ for the land sub-division approval, under Section 44 of The Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BMC Act, 1949 to carry out development work in respect of land bearing Revenue Survey No _____, City Survey No _____, mauje _____ situated at Road /Street _____, Society _____, the land sub-division layout is finally approved as demarcated under Section 45 of the Maharashtra Regional & Town Planning Act, 1966, subject to the following conditions:

1.	It shall be the responsibility of the owner to carry out all the development work including construction of roads, sewer lines, water supply lines, culverts, bridges, street lighting, etc. and hand it over to the Municipal Council after developing them to the satisfaction of the Municipal Commissioner.
2.	If you wish that the Municipal Council should carry out these development works, then you will have to deposit the estimated expenses to the Municipal Council in advance, as decided by the Municipal Commissioner.
3.	As per the undertaking submitted by you in respect of recreational open space as stipulated in Regulation no.13.3, the said open space admeasuring ----- sq.m. stand vested in the name of plot holders of the layout or society of the plot holders and you have no right of ownership or interest in the said recreational open space.
	Since you have handed over the amenity space to the Corporation, you shall be entitled for FSI equivalent to TDR, on the remaining land. (wherever applicable)
4.	This permission does not entitle you to develop the land which does not vest in you.

APPENDIX 'H'

FORM FOR COMPLETION CERTIFICATE

To,

The Municipal Commissioner,
Pune Municipal Corporation

Sir,

I hereby certify that the erection / re-erection or part/ full development work in / on building / part building No _____ Plot No _____, Revenue Survey No. _____, City Survey No. _____, mauje _____, has been supervised by me and has been completed on _____ according to the plans sanctioned, vide office communication No _____ dated _____. The work has been completed to the best of my satisfaction. The workmanship and all the materials (type and grade) have been strictly in accordance with general and detailed specifications. No provisions of the Act or the building Regulations, no requisitions made, conditions prescribed or orders issued there under have been transgressed in the course of the work. I am enclosing three copies of the completion plans. The building is fit for occupancy for which it has been erected/ re-erected or altered, constructed and enlarged.

I have to request you to arrange for the inspection & grant permission for the occupation of the building.

Yours faithfully

APPENDIX 'L'

FIRE PROTECTION REQUIREMENTS

- 1** All buildings shall be planned, designed and constructed to ensure fire safety and this shall be done in accordance with Part IV of Fire Protection of National Building Code of India and Maharashtra Fire Prevention and Life Safety Measures Act, 2006. as amended from time to time, and Part IV of Fire Protection of National Building Code of India (for the provisions which are not covered in these regulations.) In case of special buildings, the building schemes shall also be cleared by the Fire Officer, Fire Brigade Department of the Corporation.

1.1 Construction materials

All materials of constructions in load bearing elements, stairways and corridors and facades shall be non-combustible.

The interior finish materials shall not have a flame spread ability rating exceeding Class I (see 3.4.15.2 of Part 4 of National Building Code)

The internal walls or staircase shall be of brick or reinforced concrete with a minimum of 2 h. fire rating.

The staircase shall be ventilated to the atmosphere at each landing and a vent at the top; the vent openings shall be of 0.5sq.m in the external wall and the top. If the staircase cannot be ventilated, because of location or other reasons, a positive pressure 50 Pa shall be maintained inside. The mechanism for pressurizing the staircase shall operate automatically with the fire alarm. The roof of the shaft shall be 1 m. above the surrounding roof. Glazing or glass bricks, if used in staircase, shall have fire resistance rating of minimum 2 h.

1.2 Lifts

General requirements of lifts shall be as follows:

- a) Walls of lift enclosures shall have a fire rating of 2 h; lifts shall have a vent at the top of area not less than 0.2 sq.m.
- b) Lift motor room shall be located preferably on top of the shaft and separated from the shaft by the floor of the room.
- c) Landing doors in lift enclosures shall have a fire resistance of not less than 1 h.
- d) The number of lifts in one row for a lift bank shall not exceed 4 and the total number of lifts in the bank (of two rows) shall not exceed 8. A wall of 2 h. fire rating shall separate individual shafts in a bank.
- e) Lift car door shall have a fire resistance rating of half an hour.
- f) Collapsible gates shall not be permitted for lifts and shall have solid doors with fire resistance of at least 1 h.
- g) If the lift shaft and lobby is in the core of the building, a positive pressure between 25 and 30 Pa shall be maintained in the lobby and a positive pressure of 50 Pa shall be maintained in the lift shaft. The mechanism for pressurization shall act automatically with the fire alarm; it shall be possible to operate this mechanically also.
- h) Exit from the lift lobby, if located in the core of the building, shall be through a self closing smoke stop door of half an hour fire resistance.
- i) Lifts shall not normally communicate with the basement; if, however, lifts are in

communication, the lift lobby of the basements shall be pressurized as in (g), with self-closing door as in (h)

- j) Grounding switch(es), at ground floor level, shall be provided on all the lifts to enable the fire service to ground the lifts.
- k) Telephone or other communication facilities shall be provided in lift cars for building of 30 m. in height and above. Communication system for lifts shall be connected to fire control room for the building.
- l) Suitable arrangements such as providing slope in the floor of lift lobby, shall be made to prevent water used during fire-fighting, etc., at any landing from entering the lift shafts.
- m) A sign shall be posted and maintained on every floor at or near the lift indicating that in case of fire, occupants shall use the stairs unless instructed otherwise. The sign shall also contain a plan for each floor showing the locations of the stairways. Alternate source of power supply shall be provided for all the lifts through a manually operated changeover switch.
- n) **Fire Lifts** -Following details shall apply for a fire lift :
 - i) To enable fire services personnel to reach the upper floors with the minimum delay, one fire lift per 1200 sq.m. of floor area shall be provided and shall be available for the exclusive use of the firemen in an emergency.
 - ii) The lift shall have a floor area of not less than 1.4 sq.m. It shall have loading capacity of not less than 545 kg (8 persons lift) with automatic closing doors of minimum 0.8 m. width.
 - iii) The electric supply shall be on a separate service from electric supply mains in a building and the cables run in a route safe from fire, that is, within the lift shaft. Lights and fans in the elevators having wooden panelling or sheet steel construction shall be operated on 24 V supply.
 - iv) Fire-fighting lift should be provided with a ceiling hatch for use in case of emergency, so that when the car gets stuck up, it shall be easily openable.
 - v) In case of failure of normal electric supply, it shall automatically trip over to alternate supply. For apartment houses, this changeover of supply could be done through manually operated changeover switch. Alternatively, the lift shall be so wired that in case of power failure, it comes down at the ground level and comes to stand-still with door open.
 - vi) The operation of a fire lift is by a simple toggle or two-button switch situated in a glass-fronted box adjacent to the lift at the entrance level. When the switch is on, landing call-points will become inoperative and the lift will be on car control only or on a priority control device. When the switch is off, the lift will return to normal working. This lift can be used by the occupants in normal times.
 - vii) The words 'Fire Lift' shall be conspicuously displayed in fluorescent paint on the lift landing doors at each floor level.
 - viii) The speed of the fire lift shall be such that it can reach the top floor from ground level within 1 minute.

1.3 Basements -

- i) Each basement shall be separately ventilated. Vents with cross-sectional area (aggregate) not less than 2.5% of the floor area spread evenly round the perimeter of the basement shall be provided in the form of grills or breakable stall board lights or pavement lights or by way of shafts.

Alternatively, a system of air inlets shall be provided at basement floor level and smoke outlets at basement ceiling level. Inlets and extracts may be terminated at ground level with stall board or pavement lights as before, but ducts to convey fresh air to the basement floor level have to be laid. Stall board and pavement lights should be in positions easily accessible to the fire brigade and clearly marked 'SMOKE OUTLET' or 'AIR INLET' with an indication of area served at or near the opening.

ii) The staircase of basements shall be of enclosed type having fire resistance of not less than 2 h and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such positions that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storeys of the building and shall communicate with basement through a lobby provided with fire resisting self-closing doors of 1 h resistance. For travel distance, if the travel distance exceeds as given therein, additional staircases shall be provided at proper places.

iii) In multi-storey basements, intake ducts may serve all basement levels, but each basement levels and basement compartment shall have separate smoke outlet duct or ducts. Ducts so provided shall have the same fire resistance rating as the compartment itself. Fire rating may be taken as the required smoke extraction time for smoke extraction ducts.

iv) Mechanical extractors for smoke venting system from lower basement levels shall also be provided. The system shall be of such design as to operate on actuation of heat / smoke sensitive detectors or sprinklers, if installed, and shall have a considerably superior performance compared to the standard units. It shall also have an arrangement to start it manually.

v) Mechanical extractors shall have an internal locking arrangement, so that extractors shall continue to operate and supply fans shall stop automatically with the actuation of fire detectors.

vi) Mechanical extractors shall be designated to permit 30 air changes per hour in case of fire or distress call. However, for normal operation, air changes schedule shall be as given in Part 8, Building Services, Section 3, Air-conditioning, Heating and Mechanical Ventilation of National Building Code.

vii) Mechanical extractors shall have an alternative source of supply.

viii) Ventilating ducts shall be integrated with the structure and made out of brick masonry or reinforced cement concrete as far as possible and when this duct crosses the transformer area or electrical switchboard, fire dampers shall be provided.

ix) Use of basements for kitchens working on gas fuel shall not be permitted, unless air conditioned. The basement shall not be permitted below the ward block of a hospital/nursing home unless it is fully sprinkled. Building services such as electrical sub-stations, boiler rooms in basements shall comply with the provisions of the Indian Electricity Act / Rules.

x) If cut-outs are provided from basements to the upper floors or to the atmospheres, all sides cut-out openings in the basements shall be protected by sprinkler head at close spacing so as to form a water curtain in the event of a fire.

xi) Openable windows on external wall shall be fitted with such locks that can be opened by a fireman's axe.

xii) All floors shall be compartmented with area not exceeding 750 sq.m. by a separation wall with 2 h fire rating, for floors with sprinklers the area may be increased by 50 percent. In long building, the fire separation walls shall be at distances not exceeding 40 m. For departmental stores, shopping centres and basements, the area may be reduced to 500 sq.m. for compartmentation.

Where this is not possible, the spacing of the sprinklers, care should be taken to prevent spray from one sprinkler impeding the performance of an adjacent sprinkler head.

1.4 Service Ducts/Shafts

- a) Service ducts and shafts shall be enclosed by walls of 2 h and doors of 1 h. fire rating. All such ducts/shafts shall be properly sealed and fire stopped at all floor levels.
- b) A vent opening at the top of the service shaft shall be provided having between one-fourth and one-half of the area of the shaft.

1.5 Refuse chutes

shall have opening at least 1 m. above roof level for venting purpose and they shall have an enclosure wall of non-combustible material with fire resistance of not less than 2 h. They shall not be located within the staircase enclosure or service shafts, or air-conditioning shafts inspection panel and doors shall be tight fitting with 1 h fire resistance; the chutes should be as far away as possible from exit.

1.6 Refuge Area

Provisions contained in Regulation No 18.28.6 shall apply for all buildings -

1.7 Electrical services shall conform to the following :

- (a) The electric distribution cables / wiring shall be laid in a separate duct. The duct shall be sealed at every floor with non-combustible materials having the same fire resistance as that of the duct. Low and medium voltage wiring running in shaft and in false ceiling shall run in separate conduits;
- (b) Water mains, telephone lines, intercom lines, gas pipes or any other service line shall not be laid in the duct for electrical cables; use of bus ducts / solid rising mains instead of cables is preferred;
- (c) Separate circuits for fire-fighting pumps, lifts, staircases and corridor lighting and blowers for pressurizing system shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes, so that fire in one circuit will not affect the others. Such circuits shall be protected at origin by an automatic circuit breaker with its no-volt coil removed. Master switches controlling essential service circuits shall be clearly labelled;
- (d) The inspection panel doors and any other opening in the shaft shall be provided with air-tight fire doors having fire resistance of not less than 2 h;
- (e) Medium and low voltage wiring running in shafts and within false ceiling shall run in metal conduit. Any 230 V wiring for lighting or other services above false ceiling shall have 660 V grade insulation. The false ceiling including all fixtures used for its suspension, shall be of non-combustible material and shall provide adequate fire resistance to the ceiling in order to prevent spread of fire across ceiling. Reference may be made to good practice;
- (f) An independent and well ventilated service room shall be provided on the ground level or first basement with direct access from outside or from the corridor for the purpose of termination of electric supply from the licensees' service and alternative supply cables. The doors provided for the service room shall have fire resistance of not less than 2 h.

Note : If service room is located at the first basement, it should have automatic fire extinguishing system.

- (g) If the licensees agree to provide meters on upper floors, the licensees' cable shall be segregated from consumers' cable by providing a partition in the duct. Meter rooms on upper floors shall not open into staircase enclosures and shall be ventilated directly to open air outside; and
- (h) Suitable circuit breakers shall be provided at the appropriate points.

1.8 Gas supply shall conform to the following:-

- a) Town Gas / L.P.Gas Supply Pipes – Where gas pipes are run in buildings, the same shall be run in separate shafts exclusively for this purpose and these shall be on external walls, away from the staircases. There shall be no interconnection of this shaft with the rest of the floors. LPG distribution pipes shall always be below the false ceiling. The length of these pipes shall be as short as possible. In the case of kitchen cooking range area, apart from providing hood, covering the entire cooking range, the exhaust system should be designed to take care of 30 cu.m. per minute per sq.m. of hood protected area. It should have grease filters using metallic grill to trap oil vapours escaping into the fume hood.

Note:- For detailed information on gas pipe installations, reference may be made to Para.9 'Plumbing Services, Section 3 Gas Supply', of National Building Code of India.

- b) All wiring in fume hoods shall be of fibre glass insulation. Thermal detectors shall be installed into fume hoods of large kitchens for hotels, hospitals and similar areas located in high rise buildings. Arrangements shall be made for automatic tripping of the exhaust fan in case of fire. If LPG is used, the same shall be shut off. The voltage shall be of 24 V or 100 V dc operated with the external rectifier. The valve shall be of the hand re-set type and shall be located in an area segregated from cooking ranges. Valves shall be easily accessible. The hood shall have manual facility for steam or carbon dioxide gas injection, depending on duty condition; and
- c) Gas meters shall be housed in a suitably constructed metal cupboard located in a well-ventilated space, keeping in view the fact that LPG is heavier than air and town gas is lighter than air.

1.9 Illumination of means of exit

Staircase and corridor lights shall conform to the following:

- a) The staircase and corridor lighting shall be on separate circuits and shall be independently connected so as it could be operated by one switch installation on the ground floor easily accessible to fire-fighting staff at any time irrespective of the position of the individual control of the light points, if any. It should be of miniature circuit breaker type of switch so as to avoid replacement of fuse in case of crisis;
- b) Staircase and corridor lighting shall also be connected to alternative supply. The alternative source of supply may be provided by battery continuously trickle charged from the electric mains;
- c) Suitable arrangements shall be made by installing double throw switches to ensure that the lighting installed in the staircase and the corridor does not get connected to two sources of supply simultaneously. Double throw switch shall be installed in the service room for terminating the stand-by supply.
- d) Emergency lights shall be provided in the staircase and corridor; and
- e) All wires and other accessories used for emergency light shall have fire retardant property.

1.10 A stand-by electric generator shall be installed to supply power to staircase and corridor lighting circuits, fire lifts, the stand-by fire pump, pressurisation fans and blowers, smoke extraction and

damper systems in case of failure of normal electric supply. The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously. If the stand-by pump is driven by diesel engine, the generator supply need not be connected to the stand-by pump. Where parallel HV / LV supply from a separate sub-station is provided with appropriate transformer for emergency, the provision of generator may be waived in consultation with the Authority.

1.11 Transformers shall conform to the following:-

- a) A sub-station or a switch-station with oil filled equipment shall not be located in the building. The sub-station structure shall have separate fire resisting walls/surroundings and shall necessarily be located at the periphery of the floor having separate access from fire escape staircase. The outside walls, ceiling, floor, openings including doors and windows to the sub-station area shall be provided with a fire resisting door of 2 h fire rating. Direct access to the transformer room shall be provided, preferably from outside fire escape staircase.
- b) The sub-station area needs to be maintained at negative air pressures and area in sub-station shall not be used as storage / dump areas.
- c) When housed inside the building, the transformer shall be of dry type and shall be cut off from the other portion of premises by walls/ doors / cut-outs having fire resistance rating of 4 h.

1.12 Air-conditioning shall conform to the following:

- a) Escape routes like staircases, common corridors, lift lobbies, etc. shall not be used as return air passage.
- b) The ducting shall be constructed of substantial gauge metal in accordance with good practice.
- c) Wherever the ducts pass through fire walls or floors, the opening around the ducts shall be sealed with materials having fire resistance rating of the compartment.
- d) Where duct crosses a compartment which is fire rated, the ducts shall be fire rated for same fire rating. Further depending on services passing around the duct work, which may get affected in case of fire temperature rising, the ducts shall be insulated.
- e) As far as possible, metallic ducts shall be used even for the return air instead of space above the false ceiling.
- f) Where plenum is used for return air passage, ceiling and its fixtures shall be of non-combustible material.
- g) The materials used for insulating the duct system (inside or outside) shall be of non-combustible material, glass wool shall not be wrapped or secured by any material of combustible nature.
- h) Area more than 750sq.m. on individual floor shall be segregated by a fire wall and automatic fire dampers for isolation shall be provided.
- i) Air ducts serving main floor areas, corridors, etc. shall not pass through the staircase enclosure.
- j) The air-handling units shall be separate for each floor and air ducts for every floor shall be separated and in no way inter-connected with the ducting of any other floor.
- k) If the air-handling unit serves more than one floor, the recommendations given above shall be compiled with in addition to the conditions given below:
 - i) Proper arrangements by way of automatic fire dampers working on smoke detector / or

fusible link for isolating all ducting at every floor from the main riser shall be made.

ii) When the automatic fire alarm operates, the respective air-handling units of the air-conditioning system shall automatically be switched off.

- l) The vertical shaft for treated fresh air shall be of masonry construction.
 - m) The air filters of the air-handling units shall be of non-combustible materials.
 - n) The air-handling unit room shall not be used for storage of any combustible materials.
 - o) Inspection panels shall be provided in the main trunking to facilitate the cleaning of ducts of accumulated dust and to obtain access for maintenance of fire dampers.
 - p) No combustible material shall be fixed nearer than 150 mm to any duct unless such duct is properly enclosed and protected with non-combustible material (glass wool or spyglass with neoprene facing enclosed and wrapped with aluminium sheeting) at least 3.2 mm thick and which would not readily conduct heat.
- q) Fire Dampers:-**
- 1) These shall be located in conditioned air ducts and return air ducts/ passages at the following points:
 - i) At the fire separation wall.
 - ii) Where ducts/passages enter the central vertical shaft.
 - iii) Where the ducts pass through floors.
 - iv) At the inlet of supply air duct and the return air duct of each compartment on every floor.
 - 2) The dampers shall operate automatically and shall simultaneously switch off the air-handling fans. Manual operation facilities shall also be provided. (Note- For blowers, where extraction system and duct accumulators are used, dampers shall be provided).
 - 3) Fire/smoke dampers (for smoke extraction shafts) for buildings more than 24 mt in height.
 - a) For apartment houses in non-ventilated lobbies / corridors operated by fusible link / smoke detectors and with manual control.
 - b) For other buildings on operation of smoke detection system and with manual control.
 - 4) Automatic fire dampers shall be so arranged as to close by gravity in the direction of air movement and to remain tightly closed on operation of a fusible link / smoke detector.

1.13 Provisions of boiler and boiler rooms shall conform to Indian Boiler Act. Further, the following additional aspects may be taken into account in the location of boiler room:

- a) The boilers shall not be allowed in sub-basement, may be allowed in the basements away from the escape routes.
- b) The boilers shall be installed in a fire resisting room of 4 h fire resistance rating and this room shall be situated on the periphery of the basement. Catch-pits shall be provided at the low level.
- c) Entry to this room shall be provided with a composite door of 2 h fire resistance.
- d) The boiler room shall be provided with fresh air inlets and smoke exhausts directly to the atmosphere.
- e) The furnace oil tank for the boiler, if located in the adjoining room shall be separated by fire resisting wall of 4 h rating. The entrance to this room shall be provided with double composite doors. A curb of suitable height shall be provided at the entrance in order to prevent the flow of

oil into the boiler room in case of tank rupture.

f) Foam inlets shall be provided on the external walls of the building near the ground level to enable the fire services to use foam in case of fire.

1.14 Provision of first-aid and fire-fighting appliances.

The first-aid fire-fighting equipment shall be provided on all floors, including basements, lift rooms, etc. in accordance with good practice in consultation with the Authority.

1.15 Fire alarm system :

i) All buildings with heights of 15 m or above shall be equipped with manually operated electrical fire alarm (MOEFA) system automatic fire alarm system in accordance with good practice. However, apartment buildings between 15 m and 30 m in height may be exempted from the installation of automatic fire alarm system provided the local fire brigade is suitably equipped for dealing with fire in a building of 15 m in height or above and in the opinion of the Authority, such building does not constitute a hazard to the safety of the adjacent property or occupants of the building itself.

ii) Manually operated electrical fire alarm system shall be installed in a building with one or more call boxes located at each floor. The call boxes shall conform of good practice.

iii) The installation of call boxes in hostels and such other places where these are likely to be misused shall as far as possible be provided. Location of call boxes in dwelling units shall preferably be inside the building.

1.16 Lightening protection of buildings:-

The lightning protection for buildings shall be provided as given in Para.8 'Building Services, Section 2, Electrical Installations' of National Building Code of India.

1.17 Fire control room:-

For all buildings 15 mt in height or above and apartment buildings with a height of 30 m and above, there shall be a control room on the entrance floor of the building with communication system (suitable public address system) to all floors and facilities for receiving the message from different floors. Details of all floor plans alongwith the details of fire-fighting equipment and installations shall be maintained in the fire control room. The fire control room shall also have facilities to detect the fire on any floor through indicator board connections; fire detection and alarm systems on all floors. The fire staff in-charge of the fire control room shall be responsible for the maintenance of the various services and fire-fighting equipment and installations in co-ordination with security, electrical and civil staff of the building.

1.18 Housekeeping:-

To eliminate fire hazards, good housekeeping, both inside and outside the building, shall be strictly maintained by the occupants and / or the owner of the building.

1.19 Fire drills and fire orders:-

Fire notices/orders shall be prepared to fulfil the requirements of fire-fighting and evacuation from the buildings in the event of fire and other emergency. The occupants shall be made thoroughly conversant with their actions in the event of emergency, by displaying fire notices at vantage points and through regular training. Such notices should be displayed prominently in broad lettering.

For guidelines for fire drills and evacuation procedures for high-rise buildings, Annexure E

of National Building Code of India may be referred.

1.20 Compartmentation:-

The building shall be suitably compartmentalized so that fire/smoke remain confined to the area where fire incident has occurred and does not spread to the remaining part of the building.

1.21 Materials for interior decoration / furnishing

The use of materials, which are combustible in nature and may spread toxic fume / gases should not be used for interior decoration / furnishing, etc.

For various types of occupancies, requirements given in National Building Code, Part IV shall be followed.

1.22 Fire Escape Chutes/ Controlled Lowering Device for evacuation :-

(A) High rise building having height more than 70 mt., shall necessarily be provided with ;

(i) fire escape chute shaft/s for every wing adjacent to staircase.

(ii) Walls of the shaft shall have 4 hours fire resistance.

(iii) One side of the shaft shall be at external face of the building with proper ventilation. (iv) The dimension of the shaft shall not be less than 2.5 m X 1.5m.

(v) The access to the fire escape chute's shaft shall be made at alternate floor level from staircase mid-landing with self-closing door having fire resistance of at least one hour.

(vi) The fire chute shall be of staggered type with landing of each section at the vertical height of not more than 21 m.

Alternatively,

(B) For High rise building having height more than 70 mt., "Controlled Lowering Device for evacuation" or "External Evacuation System" as approved by Chief Fire Officer of Corporation, shall be provided.

1.23 Fire Check Floor A high rise building having height more than 70 m, shall be provided with fire check floor (entire floor) at every 70 m. level. Height of the fire check floor shall not be more than 1.8 m. The fire check floor shall not be used for any purpose and it shall be the responsibility of the owner/occupier to maintain the same clean and free of encumbrances and encroachments at all times. Periphery of the Fire Check floor shall not be enclosed. Fire Drenchers shall be provided at the periphery of the each fire check floor externally.

1.24 Municipal Corporation shall charge Fire Infrastructure charges as may be decided by Municipal Commissioner with the approval of the Government, such charges shall be deposited in the separate account under the head of Fire Infrastructure charges and such amount shall only be used for establishment and expansion of Fire Infrastructure facilities.

APPENDIX 'M'
Regulation For Koregaon Park area.

- 1 Koregaon Park Area is bounded as below:-**
- i) The Koregaon Park North Road on the north ;
 - ii) The Ghorpadi village boundary on the east ;
 - iii) The Southern Railway line on the south ; and
 - iv) The Circuit House - Fitzgerald Bridge Road on the west.
- 2 Special Building Rules framed by the Collector of Pune for this area shall be applicable which are as given below.**
1. The minimum area of a building plot shall be as mentioned in the layout. No building plot as shown in the layout shall be sub-divided.
 2. No building shall be allowed to be erected in any plot unless the said plot has suitable access by an existing metalled road or by projected road which shall be previously constructed (i.e. metalled in conformity with the layout sanctioned by the Collector)
 3. Only one main building together with such outhouses as are reasonably required for the bona fide use and enjoyment by its occupants and their domestic servants shall be permitted to be erected in any building plot. Provided that this restriction shall not prevent the erection of two or more building on the same plot, if the plot admeasures at least twice or thrice as the case may be (according to the number of buildings) the minimum size required. Provided also that the same open space shall be required around each main building as if each of these were in a separate building plot.
 4. Every building to be built shall face the road and where the plot has frontage on more than one road the building shall face the more important road.
 5. Every building shall be set back at least 20 feet from the boundary of any road, 40feet or more in width and 15 feet from the other roads as shown in the layout.
 6. No building shall be constructed within 10 feet of the side boundaries of the plot.
 7. The distance between the main building and the rear boundary of the plot shall be; not less than 20 feet. Provided that , subsidiary buildings such as outhouse, a garage, stable, privy and the like may be permitted at the rear of the main building subject to the condition that such building shall be at a distance of not less than 10 feet from either any building in the compound or boundary of the plot.
 8. The open space to be kept around every building shall be open to sky and free from any erection except projection of roof, chajja or weather sheds, steps or hounds or fountains with parapet walls not more than 4 feet high. Provided that balcony or gallery may be allowed to project over such open space if the distance between the outer edge of such a projection and the boundary of the plot is not less than 10 feet.
 9. Not more than one-third of the total area of any building plot shall be built upon. In calculating the area covered by buildings the plinth area of the ;buildings and other structures excepting compound walls, steps, open ottas and open hounds or wells with parapet walls not more than 4 feet high or Chajja and weather sheds shall be taken into account. Area covered by a staircase and projections of any kind shall be considered as built over. Provided a balcony or gallery which

- a) is open on three sides;
- b) has no structure underneath on ground floor;
- c) projects not more than 4 feet from the walls; and
- d) length of which measured in a straight line does not exceed 2/3rd the length of the wall to which it is attached; shall not be counted in calculating the built over area.
10. No building shall contain more than two storeys including the ground floor.
11. If flats are constructed there shall be not more than two self-contained flats on each floor, each flat being occupied by one family only.
12. The minimum standard of accommodation to be provided exclusively for one family shall consist of one living room and one bed room together admeasuring not less than 250 sq.ft. one kitchen. one verandah not less than 6 ft. in width in front and rear, a bathroom and a water-closet or latrine.
13. In no circumstances shall one roomed tenements be allowed to be constructed or used as residence. No chawls or temporary sheds shall be allowed to be constructed.
14. Every building shall have a plinth of at least 2 feet above the general level of the ground.
15. No building shall exceed 100 feet in length in any direction.
16. All subsidiary buildings such as an outhouse providing auxiliary accommodation such as a garage, servant's quarter, stable, storeroom, privy etc. appurtenant to the main building but detached thereon shall be ground floor structures only and shall be constructed at the rear of the plot at a distance of not less than 10 feet from one another or from the main building or from the boundary of the plot.
17. Owner of the adjoining plots may be permitted with their mutual consent to group the subsidiary ground floor buildings, such as outhouses, stables, privies etc. along the common boundary in the rear of their plots provided that such building shall be at a distance of not less than 10 feet from any other building in the compound.
18. The minimum floor area of any room intended for human habitation shall be not less than 120 square feet.
19. No sides of a room for residential purposes shall be less than 10 feet long at least one side of every such room shall be an external wall abutting on the surrounding open space through its length or on an interior open yard (chowk) not less than 300 sq.ft in area and 15 feet in any direction or on an open verandah.
20. The height of every room inside the building shall be not less than 10 feet from the floor to ceiling and in the case of a sloping roof the height of the lowest point thereof shall be not less than 7 feet and 6 inches from the floor.
21. Every room shall be provided with windows or other apertures other than doors opening out into the internal air for the admission of light and air and the aggregate area of such openings shall not be less than 1/7th of the floor area of the room in which they are provided.
23. Privies shall be at the rear of the main building and not less than 10 feet from it. They shall be innocuous to the neighbors. They shall not be within 30 feet of a well and shall be screened from public view.
24. No cesspools shall be allowed to be constructed unless there exists an agency for clearing them regularly and properly.

25. No cesspool shall be used or made within 100 feet of any well.
26. No Khalkuwa Khalketi shall be used for reception of night soil.
27. No cattle shall be kept in any part of the residential buildings. No. stable or cattle shed shall be constructed within 10 feet of a residential building.
28. Shops may be allowed on the ground floor of the building in the plots reserved for shops only. The upper floor of the building may be used for residence. Provided all regulations applicable to residential building are adopted.
29. The Collector may within his discretion sanction or license the erection of any building other than a dwelling house if he is satisfied after necessary inquiry in the locality that the erection and user of such building will not adversely affect the amenities of the adjoining lands or buildings.
30. All buildings shall be of pucca construction and no easily combustible materials shall be used in their construction.
31. No boundary or compound wall or fence shall be erected on the boundary not to any street of a greater height than 4 feet measured from the centre of the road in front.
32. No addition to or alterations in a building shall be carried out without the previous written permission of the Collector.
33. In the case of land or building situate within the limits of a Municipal Corporation or any other local authority, the rules and bylaws of the Municipal Corporation or local Authority in that behalf shall apply in addition to regulations prescribed above.
34. The permission shall be liable to be revoked on breach of any of the conditions.
35. All the roads within lay-out will be constructed and got ready within six months from the date of sanctioning the layout.
36. Central arrangements for the delivery of water to the individual plot holder will be made and got ready within six months from the date of sanctioning the layout.
37. No building shall be used for other than the residential purposes.

Appendix 'N'
SCHEDULE FOR SERVICE INDUSTRIES

Sr. No.	Category of Industry	Service Industry Class - A (Permitted in R2 and C) Criteria for Classification and special conditions				Special Conditions if any
		Power requirement (in H.P.)	Employment (in persons)	Floor area (in sq. m.)	Maximum Permissible	
(1)	(2)	(3)	(4)	(5)	(6)	
I. Food Product						
1.	Preservation of meat, canning preserving and processing of fish crust aces and similar foods	-	-	-	-	Not permissible
2.	Manufacture of milk and dairy products such as butter, ghee, etc.	10	9	50	-	
3.	Canning & preservation of Fruits & Vegetables including production of Jam, Jelly, Sauce, etc.	-	-	-	-	
4.	(a) Rice huller (b) Groundnut decorticators (c) Grain Mill for production of flour (d) Manufacture of supari and Masala grindings. (e) Baby oil expellers	10 10 10 10 10	9 9 9 9 9	50 50 50 50 50	-	
5.	Manufacture of bakery products with no Floor above	10	9	75	-	(i) Operation shall be permitted only between 8.00 hrs. to 20.00 hrs. (ii) Fuel used shall be electricity, gas or smokeless coal.
6.	Manufacture of cocoa, chocolate, Sugar confectionary	-	-	-	-	Not permissible
7.	Coffee, curing roasting and grinding	2	9	50	-	
8.	Cashew nut processing like drying, shelling, roasting, salting etc.	-	-	-	-	Not permissible

DCPR-2017 FOR PUNE MUNICIPAL CORPORATION

9.	Manufacture of Ice	45	20	250	-	
10.	Sugarcane crushing & Fruit Juice	2	9	25	-	
II. BEVERAGES & TOBACCO						
11.	Manufacture of soft drinks and carbonated water	-	-	-	Not permissible	
12.	Manufacture of bidi	No Power to be used	as permitted	250	May also be permitted in R-1 zone	
III. TEXTILE & TEXTILE PRODUCTS						
13.	Handloom / power-loom of yarn for a maximum of 4 looms.	5	9	50	May also be permitted in R-1 zone in areas designated by the Municipal Commissioner.	
14.	Printing dyeing & bleaching cotton, woolen & silk textiles	-	-	-	Not permissible	
15.	Embroidery & making of crape laces & fringes	5	9	50	-	
16.	Manufacture of all types of textile garments including wearing apparel.	3	9	50	-	
17.	Manufacture of made up textiles goods such as curtains, mosquito net, mattresses, bedding material pillow cases, textile bags. etc.	3	9	50	-	
IV. WOOD PRODUCTS AND FURNITURE						
18.	Manufacture of wooden & cane boxes & packing cases.	-	-	-	Not permissible	
19.	Manufacture of structural wooden goods such as beams, posts, doors and windows	-	-	-	Not permissible	
20.	Manufacture of wooden furniture and fixtures	1	9	50	i) Shall not be permitted adjoining a dwelling unit. ii) Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.	
21.	Manufacture of bamboo and cane furniture and fixtures	1	9	50		
22.	Manufacture of wooden products such as utensils, toys, art wares etc	-	-	-	Not permissible	

PAPER PRODUCTS AND PRINTING PUBLISHING

	Manufacture of cartons and boxes from papers and paper board, paper pulp,	5	9	50	Manufacture with paper pulp not permissible.
24.	Printing & Publishing newspaper.	5	9	50	-
25.	Printing & Publishing periodicals, books journals, atlases, maps, envelope, printing picture, post-card, embossing				i) Operation shall be permitted only between 8.00 hrs. and 20.00 hrs. ii) No restrictions of power, number of employees, area of hours of operation shall apply if located in a building, in separate plot not less than 500 sq. m. and if special permission of the Municipal Commissioner is obtained
26.	Engraving etching block making etc.	10	9	120	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
27.	Book binding	10	9	120	-
VI. LEATHER PRODUCTS					
28.	Manufacture of leather footwear	-	-	-	Not permissible
29.	Manufacture of wearing apparel like coats, gloves etc.	-	-	-	Not permissible
30.	Manufacture of leather consumers goods such as upholstery suitcases, pocket books, cigarette and key cases, purses etc.	-	-	-	Not permissible
31.	Repair of footwear and other leather	5	9	50	
VII. RUBBER AND PLASTIC :					
32.	Re-treading and vulcanizing works	2	9	50	
33.	Manufacture of rubber balloons, hand gloves and allied products	2	9	50	
VIII. NON-METALLIC MINERAL PRODUCTS					
34.	Manufacture of structural stone goods, stone dressing, stone crushing and polishing	-	-	-	Not permissible

35.	Manufacture of earthen & plaster states and images, toys and art wares.	-	-	-	-	Not permissible
36.	Manufacture of cement concrete building components, concrete jellies, septic tank, plaster or paris work lime mortar etc.	-	-	-	-	Not permissible
IX.	METAL PRODUCTS :					
37.	Manufacture of furniture and fixtures primarily of metal.	-	-	-	-	Not permissible
38.	Plating & Polishing and buffing of metal products	-	-	-	-	Not permissible
39.	Manufacture of metal building components such as grills, gates. Doors and window frames, water tanks, wire nets, etc.	5	9	50		
40.	Manufacture and repair of sundry ferrous engineering products done by jobbing concerns such as mechanical works, shops with lathes, drills, grinders, welding equipment etc	-	-	-	-	Not permissible
41.	Total sharpening and razor sharpening works	1	6	25		Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
X	ELECTRICAL GOODS :					
42.	Repairs of household electrical appliances such as radio set. Television set, tape recorders, heaters, irons, shavers, vacuum cleaners, refrigerators, air-conditioners, washing machines, electric cooking ranges, motor rewinding works etc.	3	9	50		(i) Operation shall be permitted only between 8.00 hrs. 20.00 hrs. (ii) No spray painting permitted.
XI	TRANSPORT EQUIPMENT					
43.	Manufacturing of push cart, hand cart, etc.	10	9	50		
44.	(a) Servicing and repairing of bicycle, rickshaws, motor cycle and motor vehicles (b) Battery charging and repairs.	10	9	50		Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
		5	6	25		No spray painting permitted

OTHER MANUFACTURING AND REPAIR INDUSTRIES AND SERVICES

46.	Manufacture of jewellery and related articles	3	9	50	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
47.	Repair of watch, clock and jewellery	3	9	50	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
48.	Manufacture of sports and athletic goods	-	-	-	Not permissible
49.	Manufacture of Musical instruments and its repair.	3	9	50	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
50.	Mass manufacture of miscellaneous Products such as costume, jewellery, costume novelties, feather, plumes, artificial flowers, brooms, brushes, lamp shades, tobacco, pipes, cigarette holders, ivory goods, bandages, wigs and similar articles.	-	-	-	Not permissible
51.	(a) Repairs of locks, stoves, umbrellas, sewing machines, gas burners, buckets & other sundry household equipment. (b) Optical glass grinding and repairs	3	9	50	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
52.	Petrol filling stations/ CNG stations	10	9	(i) 30.5x16.75m. (ii) 36.5x30.5m	Plot size - without service bay Plot size - with service bay
53.	Laundries, Laundry service and cleaning, dyeing, bleaching and dry cleaning	5	9	50	(i) Cleaning & dyeing fluid used shall not have flash point lower than 138° F. (ii) Operation shall be permitted between 8.00 hrs. to 20.00 hrs. (iii) Machinery having day load capacity of 20 kg and above.
54.	Photo processing laboratories.	5	9	50	Operation shall be permitted between 8.00 hrs. to 20.00 hrs.
55.	Electronic Industry of assembly type (and not of manufacturing type including heating load).	10	20	250	In independent structure on independent plot with special permission of the Municipal Commissioner
56.	Bio-technology Unit	--	--	--	As per Regulation no.23.8
57.	Information Technology Unit	--	--	--	As per Regulation no.23.9

Appendix O-1

Sanitation Requirements - Office Buildings

Sr. No.	Fixtures	Public Toilets		Staff Toilets	
		Male	Female	Male	Female
(1)	(2)	(3)	(4)	(5)	(6)
i)	Executive Rooms and Conference Halls in Office Buildings Toilet suite comprising one WC, one washbasin (with optional shower stall if building is used round the clock at user's option) Pantry optional as per user requirement	Unit could be common for Male / Female or separate depending on the number of user of each facility		For individual officer rooms	
ii)	Main Office Toilets for Staff and Visitors				
	a) Water-closet	1 per 25	1 per 15	1 per 25	1 per 15
	b) Ablution tap with each water-closet	1 in each water-closet			
	c) Urinals	Nil up to 6 1 for 7-20 2 for 21-45 3 for 46-70 4 for 71-100		Nil up to 6 1 for 7-20 2 for 21-45 3 for 46-70 4 for 71-100

APPENDIX 'P'
PROVISIONS FOR BARRIER FREE ACCESS

Provisions for Barrier Free access in buildings for differently abled persons shall be as given below

1 Definitions

- 1.1 Non-ambulatory Disabilities:** – Impairments that, regardless of cause or manifestation, for all practical purposes, confine individuals to wheelchairs.
- 1.2 Semi - ambulatory Disabilities:** - Impairments that cause individuals to walk with difficulty or insecurity, individuals using braces or crutches, amputees, arthritics, spastics, and those with pulmonary and cardiac ills may be semi-ambulatory.
- 1.3 Hearing Disabilities:-** Deafness or hearing handicaps that might make an individual insecure in public areas because he is unable to communicate or hear warning signals.
- 1.4 Sight Disabilities:** - Total blindness or impairments, which affect sight to the extent that the individual, functioning in public areas, is insecure or exposed to danger.
- 1.5 Wheel Chair:** - Chair used by disabled people for mobility. The standard size of wheel chair shall be taken as 1050 mm x 750 mm.

- 2 Scope:-**These regulations are applicable to all buildings and facilities used by the public such as educational, institutional, assembly, commercial, business, mercantile buildings constructed on plot having an area of more than 2000 sq.m. It does not apply to private and public residences.
- 3 Site development:-**Level of the roads, access paths and parking areas shall be described in the plan along with specification of the materials.

3.1 Access Path / Walk Way: - Access path from plot entry and surface parking to building entrance shall be minimum 1800 mm wide having even surface without any steps. Slope, if any, shall not have gradient greater than 5%. Selection of floor material shall be made suitably to attract or to guide visually impaired persons (limited to coloured floor material whose colour and brightness is conspicuously different from that of the surrounding floor material or the material that emits different sound to guide visually impaired persons; hereinafter referred to as “guiding floor material”). Finishes shall have a non-slip surface with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.

3.2 Parking: For parking of vehicles of differently abled people, the following provisions shall be made-

- i) Surface parking for two car spaces shall be provided near entrance, with maximum travel distance of 30.0 m. from building entrance.
- ii) The width of parking bay shall be minimum 3.6 meter.
- iii) The information stating that the space is reserved for wheel chair users shall be conspicuously displayed.
- iv) Guiding floor materials shall be provided or a device, which guides visually impaired persons with audible signals, or other devices, which serves the same purpose, shall be

provided.

4 Building requirements

The specified facilities for the buildings for differently abled persons shall be as follows:

- i) Approach to plinth level
- ii) Corridor connecting the entrance/exit for the differently abled.
- iii) Stair-ways
- iv) Lift
- v) Toilet
- vi) Drinking Water

4.1 Approach to plinth level - Every building should have at least one entrance accessible to the differently abled and shall be indicated by proper signage. This entrance shall be approached through a ramp together with the stepped entry.

4.1.1 Ramped Approach - Ramp shall be finished with non-slip material to enter the building. Minimum width of ramp shall be 1800mm with maximum gradient 1:12. Length of ramp shall not exceed 9.0 meter having 800mm high hand rail on both sides extending 300mm beyond top and bottom of the ramp. Minimum gap from the adjacent wall to the hand rail shall be 50mm.

4.1.2 Stepped Approach:- For stepped approach size of tread shall not be less than 300mm and maximum riser shall be 150mm. Provision of 800mm high hand rail on both sides of the stepped approach similar to the ramped approach.

4.1.3 Exit/Entrance Door:- Minimum & clear opening of the entrance door shall be 900mm and it shall not be provided with a step that obstructs the passage of a wheel chair user. Threshold shall not be raised more than 12mm.

4.1.4 Entrance Landing:- Entrance landing shall be provided adjacent to ramp with the minimum dimension 1800mm x 2000mm. The entrance landing that adjoins the top end of a slope shall be provided with floor materials to attract the attention of visually impaired persons (limited to coloured floor material whose colour and brightness is conspicuously different from that of the surrounding floor material or the material that emits different sound to guide visually impaired persons hereinafter referred to as "guiding floor material"). Finishes shall have a non-slip surface with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.

4.2 Corridor connecting the entrance / exit for the differently abled: The corridor connecting the entrance / exit for differently abled, leading directly outdoors to a place where information concerning the overall use of the specified building can be provided to visually impaired persons either by a person or by signs, shall be provided as follows:

- a) 'Guiding floor materials' shall be provided or device that emits sound to guide visually impaired persons.
- b) The minimum width shall be 1500mm.
- c) In case there is a difference of level, slope ways shall be provided with a slope of 1:12.
- d) Hand rails shall be provided for ramps/slope ways.

4.3 Stair-ways - One of the stair-ways near the entrance / exit for the differently abled shall have the

following provisions:

- a) The minimum width shall be 1350 mm.
- b) Height of the riser shall not be more than 150 mm and width of the tread 300mm. The steps shall not have abrupt (square) nosing.
- c) Maximum number of risers on a flight shall be limited to 12.
- d) Hand rails shall be provided on both sides and shall extend 300 mm on the top and bottom of each flight of steps.

4.4 Lifts - Wherever lift is required as per regulations, provision of at least one lift shall be made for the wheel chair user with the following cage dimensions of lift recommended for passenger lift of 13 person capacity of Bureau of Indian Standards.

Clear internal width	1100 mm
Clear internal width	2000 mm
Entrance door width	900 mm

- a) A hand rail not less than 600mm long at 1000mm above floor level shall be fixed adjacent to the control panel.
 - b) The lift lobby shall be of an inside measurement of 1800 mm x 1800 mm or more.
 - c) The time of an automatically closing door should be minimum 5 seconds and the closing speed should not exceed 0.25 m/ sec.
 - d) The interior of the cage shall be provided with a device that audibly indicates the floor, the cage has reached indicates that the door of the cage of entrance/exit is either open or closed.
- 4.5 Toilets** - One special W.C. in a set of toilets shall be provided for the use of differently abled with essential provision of washbasin near the entrance for them.
- a) The minimum size shall be 1500 mm x 1750 mm.
 - b) Minimum clear opening of the door shall be 900mm and the door shall swing out.
 - c) Suitable arrangement of vertical/horizontal handrails with 50mm clearance from wall shall be made in the toilet.
 - d) The W.C. seat shall be 500mm from the floor.
- 4.6 Drinking Water**:- Suitable provision of drinking water shall be made for the differently abled near the special toilet provided for them.
- 4.7 Designing for Children** - In the buildings meant for the pre-dominant use of the children, it will be necessary to suitably alter the height of the handrail and other fittings & fixtures, etc.

Explanatory notes:

Guiding / Warning Floor Material:

The floor material to guide or to warn the visually impaired persons with a change of colour or material with conspicuously different texture and easily distinguishable from the rest of the surrounding floor materials is called guiding or warning floor material. The material with different texture gives audible signals with sensory warning when a person moves on this surface with walking stick. The guiding/warning floor material is meant to give the directional effect or warn a

person at critical places. This floor material shall be provided in the following areas:

- a) The access path to the building and to the parking area.
- b) The landing lobby towards the information board, reception, lifts, staircases and toilets.
- c) Immediately at the beginning/end of walkway where there is a vehicular traffic.
- d) At the location abruptly changing in level or beginning/end of a ramp.
- e) Immediately in front of an entrance/exit and the landing.

Proper signage:

Appropriate identification of specific facilities within a building for the differently abled persons should be done with proper signals. Visually impaired persons make use of other senses such as hearing and touch to compensate for the lack of vision, whereas visual signals benefit those with hearing disabilities.

Signs should be designed and located so that they are easily legible by using suitable letter size (not less than 20 mm high). For visually impaired persons, information board in brail should be installed on the wall at a suitable height and it should be possible to approach them closely. To ensure safe walking, there should not be any protruding sign which creates obstruction in walking. Public Address System may also be provided in busy public areas.

The symbols/information should be in contrasting colour and properly illuminated because people with limited vision may be able to differentiate amongst primary colours. International Symbol Mark for wheel chair be installed in a lift, toilet, staircase, parking areas, etc., that have been provided for the differently abled.

-- ** --

Appendix 'Q'

REGULATIONS FOR ERECTION OF MOBILE TOWERS**1.0 ERECTION OF MOBILE TOWERS:**

Regulation for setting up of Telecommunication Cell Site(s)/Base Station(s) and installation of the equipments for Telecommunication Network in Pune Municipal Corporation area.

1.1 Applicability:

This Regulation, shall apply to all existing and/or proposed Telecommunication Cell Sites/Base Stations installed or to be installed in Pune Municipal Corporation area.

1.2 Control Over Development

No Telecommunication Cell Site/Base Station shall be setup or installed without the previous permission in writing of the Municipal Commissioner. The permission shall be granted in the same manner as prescribed under Sections 44 to 47 of the Maharashtra Regional and Town Planning Act, 1966.

If the Municipal Commissioner does not dispose of the application within a period of 60 days from the date of submission, the said application by the Telecom Service Provider/Infrastructure Provider (TSP/IP) shall be deemed to have been approved as per the provisions under Section 45 of the Maharashtra Regional and Town Planning Act, 1966.

1.3 Procedure for Obtaining Development Permission

- A** All the applications for setting up or installation of any Telecommunication Cell Site/ Base Station (TCS/BS) or erection of a part thereof, shall be made to the Municipal Commissioner by the concerned Telecom Service Provider (TSP) or the concerned Infrastructure Provider (IP), in such form and containing such particulars as may be prescribed by the Municipal Commissioner.
- B** The application to the Municipal Commissioner for obtaining the aforesaid development permission shall be accompanied by the following documents-
- (a) All the documents as otherwise required to be attached for any development permission under the sanctioned Development Control Regulations for the area in which the site under application is located.
 - (b) Plans showing Location Map, Key Plan, Site Plan, Block Plan and Plans of the proposed work. In case of roof-top tower, the copy of Occupation Certificate or copy of sanctioned building plans or copy of Commencement Certificate issued by the Municipal Commissioner or any other valid proof, in respect of the building on which the erection of roof-top tower is proposed, showing that such building is authorised.
 - (c) Notarised consent of the Owner of premises, which shall mean and include consent of the owner of property or no-objection certificate of the concerned registered Co-op Housing Society or notarised consent of 70% of the total number legal occupants in case of Apartments or Condominium or no-objection certificate of the lessor in case of a lease -hold property.
 - (d) Copy of agreement between the TSP/IP and the Owner of premises.
 - (e) Copy of Access Service License/ Infrastructure Provider (IP) Registration Certificate, granted

to the TSP/IP by the Department of Telecommunications (DoT), Government of India (GoI).

- (f) Copy of clearance from the Standing Advisory Committee for Frequency Allocations (SACFA) or copy of application made to SACFA for the said Location submitted to Wireless Planning Commission (WPC) wing of the Department of Telecommunications (DoT), with registration number as WPC Acknowledgement, along with an undertaking that in case of any objection/ rejection, TSPs/IPs will take corrective actions or remove the TCS/BS.
- (g) Acknowledgement receipt issued by Telecom Enforcement Resource and Monitoring (TERM) Cells in respect of the self-certificate submitted by TSP/IP regarding mobile towers/Base Transceiver Station (BTS) (Ground-based or Roof-Top or Pole/wall-mounted) in the format as prescribed by Telecom Engineering Centre (TEC), DoT, establishing/certifying that all General Public areas around the TCS/BS will be within safe Electro-Magnetic Radiation (EMR) exposure limit as per peak traffic measurement after the antennae starts radiating.
- (h) Copy of Structural Stability Certificate for any ground-based Base Transceiver Station (BTS).

OR

In case of any roof-top BTS tower, Structural Stability Certificate for the building, based on written approval of any authorized Structural Engineer of the State/local Body/Central Building Research Institute (CBRT), Roorkee/ IIT/ NIT or any other Agency, authorized by the Municipal Commissioner.

Provided that such NOC shall not be required for the single pole antennae or cellular signal boosters.

- (i) Copy of the type test certificate issued by Automotive Research Association of India (ARAI) to the manufacturers of the Diesel Generator (DG) Sets.
- (j) Notarised undertaking from the Applicant/Owner of premises :-
 - (i) That the cabin will not be utilized for any purpose other than the Telecommunication Cell Site/Base Station.
 - (ii) That if the said activity is discontinued by the Applicant, the said cabin will be demolished forthwith by the Applicant /Owner of premises.
- (k) No objection certificate from the Authority concerned under the Civil Aviation Ministry (hereinafter referred to as the said Authority) in case of any building falling in any area where such no objection certificate of the said Authority is required under the relevant rules or law.
- (l) No objection certificate of the Maharashtra Pollution Control Board regarding compliance with the norms prescribed for noise levels and smoke levels for the power generating sets having capacity above 100 kw, to be provided for Base Transceiver Stations.
- (m) No objection certificate of the Chief Fire Officer of the Municipal Corporation only in case of High Rise buildings having height of 15 mtr. or more measured from ground level.
- (n) Copy of clearance from the State Environment Department as well as the Forest Department, in case of forest, protected areas, if applicable.
- (o) Data Sheet containing the information regarding -
 - (a) Name of Telecom Service Provider/ Infrastructure Provider,
 - (b) Location,
 - (c) Tower Reference-

- (i) Height and Weight of Tower,
 - (ii) Ground Based Tower/Roof Top Tower,
 - (iii) Number of Antennae planned on Tower,
 - (iv) Permissible maximum EMF Radiation Level,
 - (v) Proposed maximum EMF Radiation Level.
- (p) Requisite fees, charges, as applicable.
- C** In case of a listed Heritage building/ Heritage precinct and/or in case of cessed buildings and/or in case of area under Environmentally Sensitive Zone (ESZ), notified by the Ministry of Environment and Forest (MoEF), Government of India (GoI), all the applications for installation of any TCS/BS or erection of a part thereof, shall be made to the concerned Municipal Commissioner, which will forward it to the Heritage Conservation Committee concerned and/or High Level Monitoring Committee (HLMC) appointed/constituted by MoEF respectively.
- D** The erection of the Base Station including tower, shall be commenced within 90 days from the date of receipt of permission from the Municipal Commissioner and report of erection shall be made to the Municipal Commissioner.

1.4 Leviable charges

The Municipal Commissioner, while granting permission under sub regulation (3) hereinabove, shall levy and collect the following charges:-

- (a) Development Charge.-Development charge shall be levied and collected by the Municipal Commissioner as per the provisions under section L24-B of The Maharashtra Regional and Town Planning Act, 1966. For the purpose of assessing the development charge, the setting up of Base Station on land and on roof-tops shall be classified under commercial category, calculated over the foot print area occupied by the Telecommunication Cell Site/Base Station.
- (b) Administrative Fee.-Over and above the development charge as stipulated in clause 4 (a) above, TSP/IP shall pay to the Municipal Corporation, a onetime non-refundable Administrative fee of Rs.30000, or as per the rates revised from time to time by the Government.

1.5 Planning Norms For Erection of TCS /BS

- (a) Notwithstanding the land use provisions under these regulations, subject to the compliance of other provisions of these Regulations, it shall be permissible to install TCB/BS, on
 - (i) all land uses as earmarked in development plan,
 - (ii) all lands which are designated for non-buildable reservations in development plan, subject to the condition that the maximum permissible area for installation of such TCS/BS shall not be more than 5% of the area of the reserved site or 100 sq.m., whichever is less, and shall be located in one corner of the reserved site.
 - (iii) all lands which are designated as open spaces/recreational open spaces/recreational grounds in a sanctioned layout, where such installation shall be permissible only with the no-objection certificate of the concerned registered co-operative housing society or consent of 70% of the total number of legal occupants/plot holders of such layout, subject to the condition that the maximum permissible area for installation of such TCS/BS shall not be more than 5% of such area or 100 sq.m, whichever is less, and the same shall be located in one corner of such area.

- (iv) all buildable reservations in development plan, except for buildings of uses mentioned in Regulation no.36.5(f), where such installation shall be permissible on the roof top, but only after development of the said reservation.
- (v) all open lands in slum areas belonging to the Government/public Authority planning Authority, where only ground-based TCS/BS shall be permissible and no Roof-Top Tower shall be permissible, save as provided in Regulation no.36.5(a)(vi) herein below.
- (vi) public buildings in slum areas, like public toilets, community centres etc., constructed by any Public Authority or to be constructed by the TSP/IP, where construction of Roof Top Towers shall be permissible, subject to maintenance and compliance of other terms and conditions specified by the Municipal Commissioner.
- (b) No permission for installation of TCS/BS shall be granted in ecologically important areas, without ecological impact assessment and review of installation site. The Forest Department should be consulted before installation of TCS/BS in and-around protected areas and Zoos.
- (c) The TCS/BS must have clear access by means of an existing road having minimum width of 6 mtr. for locations falling in Congested area as earmarked on DP and 9 mtr., for locations falling outside such Congested area. However, in exceptional circumstances, the Municipal Commissioner may relax such road width suitably, but in no case, shall it be less than 5 mtr.
- (d) In case of both ground-based towers and roof-top towers, there shall be no nearby buildings right in front of the antenna(e) of equivalent height, taking into account the tilt of the lowest antenna on tower, as per the details in the Table No.32 below:-

Table No.32

Sr. No.	Number of Antenna(e) Pointed in the Same Direction	Building/ Structure Safe Distance from the Antenna(e) at the Same Height (in mtr.)
(1)	(2)	(3)
1	1	20
2	2	35
3	4	45
4	6	55

Provided that the antennae at the same height only are to be counted, as the beam width of mobile antennae, in the vertical direction, is very narrow.

(Explanation.-The distance figures in the above Table are based on empirical estimation considering that all the antennae are emitting at their maximum RF power of 20 Watts and exactly in the same direction with the same height.)

Provided further that above norms shall automatically stand revised as per the latest guidelines, issued by the DoT from time to time.

- (e) In case of Wall Mounted/Pole Mounted Antenna(e) :-

- (i) Wherever the antennae are mounted on the wall of a building or pole or along the road, their height should be at least 5 mtr., above ground level/road level. Provided that such installations

shall have to comply with the prescribed radiation limits.

- (ii) As far as safe distance of buildings from antenna(e) is concerned, guidelines as in Regulation no.36.5 (d) above shall apply.
- (f) Installation of Base Station antenna(e) shall not be permissible within the premises of schools, colleges, and hospitals as well as on the adjoining land /building within 3 mtr., from the boundary of premises of schools, colleges and hospitals. Also antenna(e) shall not be directed/ positioned towards any school/college/ hospital building.
- (g) The existing Base Station antenna(e) approved earlier on any school/college/ hospital, building shall not be renewed further after the expiry of period of approval and the same shall be removed immediately thereafter, subject to the provisions of Regulation no.36.7 (d).
- (h) Access to Base Station Antenna site shall be prohibited for the general public, by putting in place suitable measures such as wire-fencing, locking of the door to the roof, etc.
- (i) The roof-top TCS, IBS towers shall be put only on buildings which are declared structurally strong enough to bear the load of such installation. The base connection to the building should be got designed from a qualified structural engineer. Structural safety certificate of the composite structure [Building + Tower(s)] shall have to be obtained from any of the recognized Government Institutes.
- (j) While according permission for installation of TCS/BS, permissible for erection of a cabin at ground level may be granted. However, the same shall not be allowed in the prescribed marginal distances. The area of such cabin shall not be more than 20 sq. mt. for each TSP/IP, subject to the certificate of structural safety. Built-up area of such cabin(s) shall not be counted towards built-up area or FSI.
- (k) No permission for installation of TCS/BS shall be granted on buildings which are unauthorized and structurally unsafe. If permission for installation of such structures is granted on a building, which is declared as unauthorized at a later point of time, the Municipal Commissioner shall first take recourse to the provisions of sections 52, 53, 54 and 55 of the Maharashtra Regional and Town Planning Act, 1966 or other relevant laws, as the case may be, against such unauthorized building and in case the Municipal Commissioner, after completing the due process of law, decides to undertake any action of demolition against such unauthorised building then such decision shall also be conveyed to the concerned TSP/IP with a direction to relocate the TCS/BS within a period of 90 days, after which the Municipal Commissioner shall not be under any obligation to send any further intimation to the TSP/IP concerned before demolishing such unauthorised building, and it shall not be liable to pay compensation for the loss of the Base Station as a consequence of the demolition of the unauthorised building. The TSP/IP shall indemnify the Municipal Commissioner to this effect, while seeking permission for installation of TCS/BS.
- (l) Permission for installation of TCS/BS, once granted shall remain valid for next 5 years. The TSP/IP shall apply for renewal of permission to the Municipal Commissioner. The Municipal Commissioner, while considering renewal, shall insist upon submission of fresh structural stability certificate for buildings more than 30 years of age. Administrative fee shall be levied and collected as prescribed in Regulation no.36.4 (b) hereinabove, for every such renewal. If TSP/IP fails to apply for renewal alongwith all necessary documents before the expiry of earlier permission, then such TSP/IP shall be liable for action under the provisions of the Maharashtra Regional and Town Planning Act, 1966.
- (m) In case of any existing TCS/BS on a slum structure, every effort shall be made to relocate such

TCS/BS on a nearby suitable public building or any other authorised structure or open land in the slum. If such relocation is not possible, then such TCS/BS may be allowed to be continued on such slum structure subject to its structural suitability, till the TCS/BS is shifted to any other authorised structure or till the redevelopment of the slum, whichever is earlier.

- (n) While granting permission for TCS/BS, the Municipal Commissioner shall stipulate that TSP/IP shall conduct regular audit in accordance with the directions/guidelines issued by TERM Cell or DoT from time to time.

1.6 Electro-Magnetic Field (EMF) Radiation Norms

- (a) Prior to installation of TCS/BS, the TSP/IP shall have to obtain Site clearance from the Standing Advisory Committee on Frequency Allocation (SACFA) of the Department of Telecommunication (DoT) for every site from the point of view of interference with other wireless users, aviation hazards and obstruction to any other existing microwave links.
- (b) The Electro-Magnetic Field (EMF) radiation from BTS towers shall be subject to the regulations framed by the DoT from time to time. The TSP/IP shall periodically conduct audit and monitor EMF radiation in Urban localities, hospitals and educational/industrial /residential / recreational premises, especially around the Protected Areas (PAs) and ecologically sensitive areas, in accordance with the guidelines issued by DoT in this regard. It shall be binding on TSP/ IP to follow the mechanism prescribed by the DoT/TERM Cell at local level for ensuring control on the EMF radiation and for notifying on continual basis the radiation level at critical location. For all the existing as well as new BTSs/Towers, TSPs are required to submit self-certificates periodically in the format prescribed by TEC, DoT, in order to ensure that normally all general public areas around the TCS/BS site are within the safe EMR exposure limits. Audit of the self-certification furnished by the TSPs shall be done by the TERM Cell periodically. TERM Cell shall carry out test audit of the BTS sites on random basis as per the guidelines received from DoT and also in respect of all cases where there is a public complaint. The TERM Cell shall have due regard to the instructions issued by DoT regarding technical audit of TCS/BS, including radiation of towers within safe limits. These shall include Roof Top/Ground Based./Pole Mounted/Wall Mounted Towers. The TERM Cell shall also verify antenna orientation, safe distance from the Tower (exclusion zone) etc. For non-compliance of EMF standards, Telecom Service Provider shall be liable for penal action by the TERM Cell and/or Department of Telecommunication (DoT). Any violation noticed may attract heavy penalties on TSPs and may also lead to shut down of TCS/ BS, in case the violation persists.

1.7 Miscellaneous Provisions

- (a) Any complaint concerning illegal installation of TCS/BS on any building or any query of any nature regarding the installation of telecommunication equipment, shall be addressed to the Municipal Commissioner which shall intimate the concerned TSP/IP about the same with a direction to resolve the issue under intimation to the Municipal Commissioner, within such period as may be prescribed by the Municipal Commissioner.
- (b) The TSP/IP, who has erected TCS/BS without due permission, shall apply to the concerned Municipal Commissioner for regularization within 180 days from the date of coming into force of this Regulation. In case such application is made within the prescribed period, then the offence, if any, registered against the TSP/IP may be compounded by the Municipal Commissioner under section 143 of the Maharashtra Regional and Town Planning Act, 1966, subject to the provisions of these regulations.

- (c) The TSPs/IPs who have earlier erected TCS/BS with due permission, shall apply afresh, for validation of the previous permission, to the Municipal Commissioner within a period of 90 days from the date of commencement of this Regulation, in order to ensure due compliance of this Regulation. However Administrative fee in such cases shall not be leviable if appropriate fee/ Development charge, not less than the amount prescribed under Regulation no.36.4 (b)above, has already been paid. In case the amount paid is less than what is prescribed hereinabove, the difference in amount shall be recovered from the TSP/IP.
- (d) Any existing TCS/BS not conforming to any of the above provisions shall have to be removed within one year from the date of commencement of this Regulation, unless the same is specifically regularized by the Municipal Commissioner following due compliance by TSP/IP. However, operation of such non-conforming Telecommunication Cell Site/Base station shall be discontinued within a period of 30 days from the date of receipt of notice from the Municipal Commissioner to that effect, which shall however be issued only after obtaining the consent of the TERM Cell of DoT.
- (e) The Licensees shall try to share the tower for fixing their respective antennae provided the prescribed conditions are duly fulfilled, so as to ensure curtailing of multiple towers and optimizing the use of the existing ones.
- (f) Sign boards and Warning signs ("Danger", "RF Radiation", "Restricted Area", "Don't Enter" etc.) shall be provided at TCS/BS antenna sites which are clearly visible and identifiable.
- (g) The TSP/IP shall display the details of the following on a board (minimum size 24" x 48") separately or prominently on the cabin, for the perusal of general public in such a way that the same shall be clearly visible and identifiable.
- i. Name of TSP/IP :-
 - ii. Location :-
 - iii. Tower Reference :-
 - (a) Height, (b) Weight (c) Number of antennae planned on tower, (d) Permissible EMF radiation level (e) Proposed EMF radiation level.
 - iv. Due date for next renewal.
 - v. Contact Person's name, address and Telephone Number
 - vi. Address of Complaint Redressing Authority with Telephone Numbers
 - vii. Police Control Room- 100
 - viii. Fire Control Room – 101
 - ix. Ambulance – 102
 - x. Other important information, if any.
- Provided that in case of Telecommunication Cell Site/Base station on roof-top, the aforesaid information shall be displayed on the ground floor of the building.
- (h) The Municipal Commissioner shall display the list of authorized TCS/BS on their official web site, along with the date of permission and due date for renewal of permission.
- (i) TCS/BS Tower shall be inspected for distortion of members, torques of nuts and bolts at least once in five years. However, in case of areas affected by any natural calamity, such as cyclone,

earthquake, flood, etc., such inspection shall be carried out immediately after such incident suo motu or on being directed by the Municipal Commissioner. Such inspection shall be carried out only by a qualified structural engineer and a certificate to that effect shall be submitted to the Municipal Commissioner.

- (j) TCS/BS Towers located in highly corrosive environment shall be painted every year. Other towers shall be painted at least once in five years to give additional protection.
- (k) The Municipal Commissioner shall make efforts to provide Single Window clearance to TSP/ IP for disposal of their applications in a time bound manner.

1.8 Notwithstanding anything contained hereinabove, all the Regulations/Bye-Laws/ Memorandum /Directions /Guidelines in this regard, issued or to be issued from time to time, by the Department of Telecommunications, Government of India, shall prevail and be binding on TSP/IP and also on the Municipal Corporation, in which case, this Regulation shall stand modified to that extent.

1.9 Powers of Interpretation and Removal of Doubt.-

If any interpretation is required regarding the clauses of this Regulation, then the matter shall be referred to the Urban Development Department, Government of Maharashtra, whose decision shall be final.

**DEVELOPMENT CONTROL AND PROMOTION REGULATIONS - 2015
FOR NASHIK MUNICIPAL CORPORATION,**

PART - I ADMINISTRATION

1.0 SHORT TITLE, EXTENT AND COMMENCEMENT

- 1.1** These Regulations shall be called as "Development Control and Promotion Regulations Nashik - 2015"
- 1.2** These Regulations shall apply to the building activities and development works on lands within the jurisdiction of Nashik Municipal Corporation excluding certain final plots in TPS No.1 of Nashik (First Varied) where Arbitrator has framed special regulation for such plots.
- 1.3** These Regulations shall come into force only when these are sanctioned by the Government under section 31 of the Act by publishing a notice to that effect in the Government Gazette and these shall replace all existing building bye-laws and Development Control Rules.
- 1.4 Savings:** Notwithstanding anything contained herein, any permission granted or any action taken under the Regulations in force prior to these Regulations shall be valid and continue to be so valid, unless otherwise specified.

Provided that the words 'action taken' in this regulation shall also include the issuance of demand note for granting development permission.

2.0 DEFINITIONS

2.1 General

- 2.1.1** In these Regulations, unless the context otherwise requires, the definitions given hereunder shall have meaning indicated against each of them.
- 2.1.2** Words and expressions which are not defined in these Regulations shall have the same meaning or sense as in the -
- i) Maharashtra Municipal Corporation Act, 1949,
ii) The Maharashtra Regional and Town Planning Act, 1966 and
iii) National Building Code 2005 or amended from time to time
- 2.2 Act :Act in these Regulations means –**
The Maharashtra Regional and Town Planning Act, 1966;
- 2.3 Authority -** Authority means Municipal Commissioner of Nashik Municipal Corporation or an officer authorised by him.
- 2.4 Alteration -** Any change in existing authorized building or change from one occupancy to another, or a structural change, such as an addition to the area or height, or the removal of part of a building, or any change to the structure, such as the construction of, cutting into or removal of any wall, column, beam, joist, floor, roof or other support or a change to or closing of any required means of ingress or egress as provided under these regulations. However modification in respect of gardening, white washing, painting, plastering, pointing, paving and retiling shall not be deemed to be alteration.
- 2.5 Advertising Sign -** Any surface or structure with characters, letters or illustrations applied thereto

Beb

and displayed in any manner whatsoever out door for purposes of advertising or to give information regarding or to attract the public to any place for public performance, article or merchandise whatsoever, or is attached to, or forms a part of building, or is connected with any building or is fixed to a tree or to the ground or to any pole, screen, fence or hoarding or displayed in space.

- 2.6 **Air-conditioning** -The process of treating air so as to control simultaneously its temperature, humidity, cleanliness and distribution to meet the requirement of conditioned space.
- 2.7 **Accessory Building** -A building separate from the main building on a plot and containing one or more rooms for accessory use such as servant quarters, garage, store rooms etc.
- 2.8 **Accessory / Ancillary Use** -Any use of the premises subordinate to the principal use and incidental to the principal use.
- 2.9 **Amenity Space** - For the purpose of these Regulations, amenity space means a statutory space kept in any layout to be used for any of the amenities such as parks, gardens, recreational grounds, playgrounds, sports complex, auditorium, cultural / community center, convenience shopping, municipal market, shopping mall, vegetable market, parking lots, nursery, primary and secondary schools, junior college, clinics, dispensaries, hospitals, veterinary hospital, health club, sub post-office, police station, electric substation, banks, ATM of Banks, library, electronic cyber library, open market, hawkers zone, garbage bin, arogya kothi, night shelter, Government offices, public housing by Municipal Corporation/Mhada, bus stand, water supply installation, electricity supply installation, sewage treatment plant and includes other utilities, services and conveniences.
- 2.10 **Access**-A clear approach to a plot or a building.
- 2.11 **Architect** - An Architect is a person registered with Council of Architecture as per Architects Act, 1972 as an Architect.
- 2.12 **Atrium** - Atrium means a sky lighted naturally/mechanically ventilated area in buildings, with no intermediate floors, used as circulation space or entrance foyer.
- 2.13 **Balcony** - A Horizontal cantilever projection shown in the figure below, including parapet and handrail balustrade to serve as a passage or sitting out place with at least one side fully open, except being provided with railing or parapet wall for safety.

Open Balcony permissible but not entitled for enclosure

- 2.14 Basement** - The lower storey of a building below or partly below the ground level.
- 2.15 Building**- Any structure for whatsoever purpose and of whatsoever materials constructed and every part thereof whether used as human habitation or not and includes foundation, plinth, walls, floors, roofs, chimneys, wells, door steps, fencing, plumbing and building services, fixed -platforms, verandahs, balcony; cornice or projection, part of a building or anything affixed thereto or any wall fence enclosing or intended to enclose any land or space and signs and outdoor display structures. However, tents, shamianas and the tarpaulin shelters erected for temporary and ceremonial occasions with the permission of the Municipal Commissioner shall not be considered as building.
- 2.16 Built up Area**- The area covered by a building on all floors including cantilevered portion, mezzanine floors if any but excepting the areas excluded specifically from FSI under these Regulations.
- 2.17 Building Line**- The line upto which the plinth of a building adjoining a street or an extension of a street or on a future street may lawfully extend.
- 2.18 Building Height** - The vertical distance measured in the case of flat roofs, from the average level of the ground around and contiguous to the building to the terrace of last floor of the building adjacent to the external walls; to the highest point of the building and in the case of pitched roofs, up to the point where the external surface of the outer wall intersects the finished surface of the sloping roof; and in the case of gable facing road, the mid-point between the eaves level and the ridge. Architectural features serving no other function except that of decoration shall be excluded for the purpose of measuring heights.
- 2.19 Carpet Area** - The net usable floor area of an apartment, excluding the area covered by the external walls, areas under services shafts, exclusive balcony or verandah area and exclusive open terrace area, but includes the area covered by the internal partition walls of the apartment.
- Explanation** - For the purpose of this clause, the expression "exclusive balcony or verandah area" means the area of the balcony or verandah as the case may be which is appurtenant to the net usable floor area of an apartment meant for the exclusive use of the allottee and "exclusive open terrace area" means the area of open terrace which is appurtenant to the net usable floor area of an apartment, meant for the exclusive use of the allottee.
- 2.20 Chajja** -A sloping or horizontal structural overhang usually provided over openings on external walls to provide protection from sun and rain and for purpose of architectural appearance.
- 2.21 Chimney** - An upright shaft containing one or more flues provided for the conveyance to the outer air of any product of combustion resulting from the operation of heat producing appliance or equipment employing solid, liquid or gaseous fuel.
- 2.22 Cluster** - A cluster is any defined area with proper access.

R/b

- 2.23 Combustible Material** - A material, if it burns or adds heat to a fire when tested for combustibility in accordance with IS - 3808 - 1966 Method of Test for combustibility of building materials, given in the National Building Code.
- 2.24 Control Line** -A line on either side of a highway or part of highway beyond the building line fixed in respect of such highway by the Highway Authority from time to time.
- 2.25 Courtyard or Chowk**-A space permanently open to sky enclosed on sides fully or partially by buildings and may be at ground level or any other level within or adjacent to a building.
- 2.26 Canopy** -A projection over any entrance.
- 2.27 Core Area** - A Core Area means the core area as shown on the Development Plan.
- 2.28 Convenience Shopping**-Means shops for domestic needs having area upto 20.00sq.m.
- 2.29 Corridor** -A common passage or circulation space including a common entrance hall.
- 2.30 Detached Building** - A building whose walls and roofs are independent of any other building with marginal distances on all sides as specified.
- 2.31 Development** - Development with its grammatical variations means the carrying out of buildings, engineering, mining or other operations in, or over, or under land or the making of any material change, in any building or land or in the use of any building or land or any material or structural change in any Heritage building or its precinct and includes demolition of any existing building, structure or erection of part of such building, structure of erection and reclamation, redevelopment and layout or sub-division of any land and to develop shall be construed accordingly.
- 2.32 Development Plan** -“Development Plan” means a plan for the development of the area within the jurisdiction of a Planning Authority and includes the revised development plan.
- 2.33 Drain** -The word “Drain” shall have the same meaning assigned thereto as under Bombay Provincial Municipal Corporation Act, 1949,
- 2.34 Dwelling Unit /Tenement** -An independent housing unit with separate facilities for living, cooking and sanitary requirements.
- 2.35 Enclosed Stair- case** - A stair case separated by fire resistant walls and door (s) from the rest of the building.
- 2.36 Existing Building or Use**- A building, structure or its use existing authorisedly.
- 2.37 Exit** - A passage, channel or means of egress from any building, storey or floor area to a street or other open space of safety.
- 2.37.1 Vertical Exit** -A vertical exit is a means of exit used for ascension or descension between two or more levels including stairways, smoke proof towers, ramps, escalators and fire escapes.
- 2.37.2 Horizontal Exit**- A horizontal exit is a protected opening through or around a firewall or a bridge connecting two buildings.
- 2.37.3 Outside Exit** - An outside exit is an exit from the building to a public way, to an open area leading to a public way, to an enclosed fire resistive passage to a public way.
- 2.38 External Wall** - External Wall means an outer wall of a building, not being a party wall even though adjoining to a wall of another building and also means a wall abutting on an interior open space of any building.

- 2.39 **Escalator** - A power driven, inclined, continuous stairway used for raising or lowering passengers.
- 2.40 **Fire and/ or Emergency Alarm System** - An arrangement of call points or detectors, sounders and other equipments for the transmission and indication of alarm signals; for testing of circuits and, whenever required, for the operation of auxiliary services. This device may be workable automatically or manually to alert the occupants in the event of fire or other emergency.
- 2.41 **Fire lift** - One of the lifts specially designed for use by fire service personnel in the event of fire.
- 2.42 **Fire Proof Door** - A door or shutter fitted to a wall opening, and constructed and erected with the requirement to check the transmission of heat and fire for a specified period.
- 2.43 **Fire Resisting Material**- Material which has certain degree of fire resistance.
- 2.44 **Fire Resistance** - The time during which a material fulfills its function of contributing to the fire safety of a building when subjected to prescribed conditions of heat and load or restraint. The fire resistance test of structures shall be done in accordance with "IS -3809 - 1966 Fire Resistance Test of Structures".
- 2.45 **Fire Separation** - The distance in meters measured from any other building on the site, or from other site, or from the opposite side of a street or other public space to the building.
- 2.46 **Fire Service Inlets** - A connection provided at the base of a building for pumping up water through in-built fire-fighting arrangements by fire service pumps in accordance with the recommendations of the Fire Services Authority.
- 2.47 **Fire Tower** - An enclosed staircase which can only be approached from the various floors through landings or lobbies separated from both, the floor areas and the staircase by fire resisting doors and open to the outer air.
- 2.48 **Floor** - The lower surface in a storey on which one normally walks in a building. The general term floor unless otherwise specifically mentioned shall not refer to a mezzanine floor.
- Note** - The sequential numbering of floor shall be determined by its relation to the determining entrance level. For floor at or above ground level, with direct entrance from / to road or street shall be termed as ground floor. The other floors above ground floor shall be numbered in sequence as Floor 1, Floor 2, etc., with the number increasing upwards. The stilt shall be termed as stilt floor or Stilt floor 1, Stilt floor 2 etc. and floors above shall be numbered as Floor 1, Floor 2, etc.,
- 2.49 **Floor space index (F. S. I)** - The quotient obtained by dividing the total built-up area on all floors, excluding exempted areas as given in Regulation no.15.8.2 by the area of the plot.

$$\text{F.S.I.} = \frac{\text{Total built-up area on all floors}}{\text{Plot area}}$$

Plot area

- 2.49.1 **Premium FSI** – Premium FSI is FSI granted by the Municipal Commissioner on payment at prescribed rates.
- 2.50 **Footing**-A foundation unit constructed in brick work, masonry or concrete under the base of a wall or column for the purpose of distributing the load over a large area.
- 2.51 **Foundation** -That part of the structure which is in direct contact with and transmitting loads to the ground.
- 2.52 **Front** - The distance between the boundary line of plot abutting the means of access / road / street and the building. In case of plots facing two or more means of accesses / roads / streets, the plot

Rsch

shall be deemed to front on all such means of access / road / streets.

- 2.53 Future Urbanizable Zone** –Future urbanizable zone is a residential zone wherein development is allowed, subject to fulfillment of certain requirements as mentioned in this DCPR.
- 2.54 Gallery** - An intermediate floor or platform projecting from a wall of an auditorium or a hall providing extra floor area, additional seating accommodation etc. These shall also include the structures provided for seating in stadia.
- 2.55 Garage Private-** A building or portion thereof, designed and used for parking of privately owned motor driven or other vehicles.
- 2.56 Garage Public** -A building or portion thereof, designed as other than a private garage, operated for gain, designed or used for repairing, servicing, hiring, selling or storing or parking motor driven or other vehicles.
- 2.57 Group Housing Scheme-** Group Housing Scheme means a building or a group of buildings constructed or to be constructed with one or more floors, consisting of more than one dwelling units and having common service facilities. Common service facilities means facilities like stair case, balcony, corridor, and verandah, lift, etc.
- 2.58 Ground Level** - The average level of ground in a plot (site).
- 2.59 Habitable Room** - Habitable room or living room means, a room constructed or intended for human habitation.
- 2.60 Home Occupation** - Home occupation means occupation, other than an eating or a drinking place, offering services to the general public, customarily carried out by a member of the family residing on the premises without employing hired labour, and for which there is no display to indicate from the exterior of the building that it is being utilized in whole or in part for any purpose other than a residential or dwelling use, and in connection with which no article or service is sold or exhibited for sale except that which is produced therein, which shall be non-hazardous and not affecting the safety of the inhabitants of the building and the neighborhood and provided that no mechanical equipment is used except for what is customarily used for purely domestic or household purposes and / or employing licensable goods. If motive power is used, the total electricity load should not exceed 0.75 KW. 'Home Occupation' may also include such similar occupations as may be specified by the Municipal Commissioner with the approval of Divisional Head of Town Planning and subject to such terms and conditions as may be prescribed.
- 2.61 Information Technology Establishment (ITE)** - ITE means an establishment which is in the business of developing either software or hardware relating to computers or computer technology as approved by Director of Industries.
- 2.62 Ledge or Tand** - A shelf like projection, supported in any manner whatsoever, except by vertical supports within a room itself but not having projection wider than 0.60 meter.
- 2.63 Licensed Engineer / Structural Engineer / Supervisor** -A qualified Engineer/Structural Engineer / Supervisor licensed by the Municipal Commissioner, Nashik Municipal Corporation.
- 2.64 Lift** - An appliance designed to transport persons or materials between two or more levels in a vertical or substantially, vertical direction, by means of a guided car platform.
- 2.64.1 Lift Machine** - Part of the lift equipment comprising the motor(s) and the control gear there with, reduction gear (if any), brakes and winding drum or sheave, by which the lift car is raised or lowered.

- 2.64.2 **Lift Well** - Unobstructed space within an enclosure provided for the vertical movement of the lift car(s) and any counter weights, including the lift pit and the space for top clearance.
- 2.65 **Loft** -Loft means, an intermediate floor between two floors, with a maximum height of 1.5 m., which is constructed and used for storage purpose.
- 2.66 **Laying out of New Street** -It includes provision of road for leveling, formation, metalling or paving of a road and footpaths, etc. including laying out of the services such as water supply, drainage, etc.
- 2.67 **Mall**- A large enclosed shopping area.
- 2.68 **Marginal distance / Set back** -Minimum distance required to be left open to sky between the boundary of the building plot and the building excluding court yard/chowk, which is an integral part of the plot.
- 2.69 **Masonry** - An assemblage of masonry units properly bound together with mortar.
- 2.70 **Mezzanine floor** - An intermediate floor between two floors of any story, forming an integral part of floor below, overhanging or overlooking a floor beneath, not being a loft between the floor and the ceiling of any storey.
- 2.71 **Means of Access** -These shall include the road/street/vehicular access way, pathway upto the plot and to the building within a plot.
- 2.72 **Net plot area**- The net plot area shall be as per Regulation no. 13.9.
- 2.73 **Non-Combustible Material** - A material which does not burn nor add heat to a fire when tested for combustibility in accordance with IS: 3808 - 1966 'Method of Test for Combustibility of Building Materials'.
- 2.74 **Non-conforming User** - Any lawful use / building existed on the site but which does not conform to the zoning shown on the Development Plan.
- 2.75 **Occupancy or Use Group** - The principal occupancy or use for which a building or a part of a building is used, or intended to be used, for the purposes of classification of a building according to the occupancy. Occupancy shall be deemed to include subsidiary occupancies which are contingent upon it. Buildings with mixed occupancies are those buildings in which more than one occupancy are present in different portions of the building. The occupancy classification shall have the meaning given from 2.75.1 to 2.75.12 unless otherwise spelt out in Development Plan.
- 2.75.1 **Residential Buildings**- These shall include any building in which sleeping accommodation is provided for normal residential purposes with or without cooking or dining or both facilities. It includes one or two or multi-family dwellings, lodging or rooming houses, residential hotels, hostels, dormitories, dharmshalas, apartment houses, flats, service apartment, studio apartment and private garages incidental thereto.
- 2.75.2 **Educational Buildings** -A building exclusively used for a school or college recognized by the appropriate Board or University, or any other competent authority involving assembly for instruction, education or recreation incidental to educational use, and including a building for such other users incidental thereto such as library, a research institution. It shall also include quarters for essential staff required to reside in the premises and a building used as a hostel whether attached or not to an educational institution whether situated in its campus or not and, also includes buildings used for daycare purposes more than 8 hours per week.

- 2.75.3 Institutional Buildings** - A building constructed or used by Government, Semi-Government organization or registered trusts or persons and used for medical or other treatment, or an auditorium or complex for cultural and allied activities or for an Hospice care of persons suffering from physical or mental illness, handicap, disease or infirmity, care of orphans, abandoned women, children and infants, convalescents, destitute or aged persons and for penal or correctional detention with restricted liberty of the inmates ordinarily providing sleeping accommodation, and includes hospitals, sanatoria, custodial and penal institutions such as jails, prisons, mental hospitals, houses of correctional detention and reformatories.
- 2.75.4 Assembly Buildings** - These shall include any building or part of building where groups of people congregate or gather for amusement, recreation or social, religious, patriotic, civil, travel and similar purposes, e.g. theatres, motion picture house, drive-in-theatres, multiplexes, assembly halls, city halls, town halls, auditoria, exhibition halls, museums, mangalkaryalaya, cultural center, skating rinks, places of worship, dance theatres, club & gymkhana, passenger stations and terminals of air, surface and other public transportation services, recreation piers and stadia having built up area more than 1000 sq.m.
- 2.75.5 Business Buildings**- These shall include any building or part of building, which is used for transaction of business for the keeping of accounts and records for similar purposes; offices, banks, professional establishments, I.T. establishments, call center, offices for private entrepreneurs, court houses, libraries shall be classified in this group in so far as principal function of these is transaction of public business and the keeping of books and records.
- 2.75.6 Office Building / Premises** - The premises whose sole or principal use is to be used as an office or for office purpose; "office purposes" shall include the purpose of administration, clerical work, handling money, telephone/ telegraph/ computer operations and "clerical work" shall include writing, book-keeping, sorting papers, typing, filing, duplicating, drawing of matter for publication and the editorial preparation of matter for publication.
- 2.75.7 Mercantile (Commercial) Buildings**-These shall mean and include any building or part of a building, which is used as shops, stores, market, malls for display and sale of merchandise either wholesale or retail Office, storage and service facilities incidental to the sale of merchandise and located in the same building shall be included under this group.
- 2.75.8 Public-Semipublic Building** – A building constructed or used by Government, Semi Government Organization, Government Undertaking, Local Authorities, for conducting public semipublic use like municipal office, post office, telephone office, etc.
- 2.75.9 Wholesale Establishments** -These shall mean and include establishments wholly or partly engaged in wholesale trade, manufactures, wholesale outlets including related storage facilities, A.P.M.C. establishments, warehouses and establishments engaged in truck transport including truck transport booking agencies.
- 2.75.10 Industrial Buildings** - These shall mean and include any building or part of a building or structure, in which products or materials of all kinds and properties are fabricated, assembled or processed like assembling plants, laboratories, power plants, smoke houses, refineries, gas plants, mills, dairies, factories etc.
- 2.75.11 Storage Buildings** - These shall mean and include any building or part of a building used primarily for the storage or sheltering of goods, wares or merchandise, like ware houses, cold storage, freight depots, transit sheds, godowns, store houses, public garages, hangars, truck terminals, grain elevators, barns and stables.

Beh

- 2.75.12 Hazardous Buildings** - These shall mean and include any building or part of a building which is used for the storage, handling, manufacture or processing of highly combustible or explosive materials or products which are liable to burn with extreme rapidity and / or which may produce poisonous gases or explosions during storage, handling, manufacturing or processing, which involve highly corrosive, toxic or noxious alkalis, acids or other liquids or chemicals producing flames, fumes and explosive, mixtures of dust or which result in the division of matter into fine particles subject to spontaneous ignition.
- 2.75.13 Special Buildings** – These shall mean buildings as specified in regulation no 6.2.6.1.
- 2.76 Owner** - The person who has legal title for land or building.
- 2.77 Parapet** - A low wall or railing built along the edge of a roof, terraces, balcony, verandah etc.
- 2.78 Parking Space** - An enclosed or unenclosed, covered or open area sufficient in size to park vehicles. Parking space shall be served by a driveway connecting them with a street or alley and permitting ingress or egress of vehicles.
- 2.79 Permit / Permission** - A permission or authorisation in writing by the Authority to carry out the work regulated by these Regulations.
- 2.80 Plinth** - The portion of a structure between the surface of the surrounding ground and surface of the floor immediately above the ground.
- 2.81 Plot / Site**-A parcel or piece of land enclosed by definite boundaries and approved by an authority as a building site, under these Regulations.
- 2.82 Porch** -A covered surface supported on pillars or otherwise for the purpose of pedestrian or vehicular approach to a building.
- 2.83 Podium** –A continuous projecting base or pedestal under or around a building, generally used for parking and movement of vehicles, within the permissible area as specified in these regulations.
- 2.84 Recreational Open Space / Layout open space** – Recreational open space means a statutory common open space kept in any layout or group housing scheme or campus planning, exclusive of margins and approaches, on ground only.
- 2.85 Road / Street** - Any highway, street, lane, pathway, alley, stairway, passageway, carriageway, footway, square place or bridge, whether a thoroughfare or not, over which the public have a right of passage or access or have passed and had access uninterruptedly for a specified period, whether existing or proposed in any scheme, and includes all bunds, channels, ditches, storm-water drains, culverts, sidewalks, traffic islands, roadside trees and hedges, retaining walls, fences, barriers and railings within the street lines.
- 2.86 Road / Street Line** - The line defining the side limit of a road / street.
- 2.87 Room Height** - The vertical distance measured from the finished floor surface to the finished ceiling/ slab surface. In case of pitched roofs, the room height shall be the average height between bottom of the eaves and bottom of ridge.
- 2.88 Row Housing** -A row of houses with front and rear marginal distances.
- 2.89 Semi Detached Building** - A building detached on three sides with marginal distances as specified.
- 2.90 Site corner** - The site at the junctions of and fronting on two or more intersecting streets.

Reeb

- 2.91 Site, Depth of** - The mean horizontal distance between the front and rear side boundaries.
- 2.92 Site, Double Frontage** -A site, having a frontage on two streets other than a corner plot.
- 2.93 Site, Interior or Tandem** - A site, access to which is by a passage from a street whether such passage forms part of the site or not.
- 2.94 Smoke Stop Door** - A door for preventing or checking the spread of smoke from one area to another.
- 2.95 Stair Cover** -A structure with a covering roof over a stair case and its landing built to enclose only the stair for the purpose of providing protection from weather and not used for human habitation.
- 2.96 Stilts or Stilt Floors** - Stilts or stilt floors means portion of a building above ground level consisting of structural column supporting the super structure with at least two sides open for the purpose of parking vehicles, scooters, cycles, etc.
- 2.97 Storage** - A place where goods are stored.
- 2.98 Store Room** -A room used as storage space.
- 2.99 Storey** - The portion of a building included between the surface of any floor and the surface of the floor next above it, or if there be no floor above it, then the space between any floor and the ceiling next above it.
- 2.100 Telecommunication Cell Site/Base Station (TCS/BS)** - Telecommunication Cell Site/Base Station (TCS/BS) for any Telecom Operator shall mean and include tower of requisite height and dimensions, delta, single pole antennae, microwave antenna, cabin of requisite dimensions for housing equipment, telecom transceiver machinery, related civil work, requisite wires and cables, power supply equipment, Diesel Generator (DG) Set/ Alternate power supply mechanism, cabin /cupboard for housing any or all of the aforesaid items as necessary.
- 2.101 Tenement** -An independent dwelling unit with a kitchen or cooking alcove.
- 2.102 Terrace** - A flat, open to sky roof of a building or a part of a building having parapet.
- 2.102.1 Supported double Height Terrace** - Open terraces with railing having minimum height equal to two floors within building line.
- 2.103 To Erect** - To erect a building means
- to erect a new building on any site whether previously built upon or not;
 - to re-erect any building of which portions above the plinth level have been pulled down, burnt or destroyed; and
 - conversion from one occupancy to another.
- 2.104 Travel Distance** - The distance from the remotest point on a floor of a building to a place of safety, be it a vertical exit, horizontal exit or an outside exit measured along the line of travel.
- 2.105 Tower like structure** - A structure in which the height of the tower like portion is at least twice the width of the broader base.
- 2.106 Unsafe Building** - Unsafe buildings are those which are structurally unsafe, unsanitary or not provided with adequate means of ingress or egress which constitute a fire hazard or are otherwise dangerous to human life or which in relation to existing use constitute a hazard to safety or health or public welfare, by reason of inadequate maintenance, dilapidation or abandonment.

Beh

- 2.107 Verandah** - A covered area with at least one side open to the outside with the exception of 1 m. high parapet on the ground floor to be provided on the open side.
- 2.108 Water Closet (WC)** -A privy with arrangement for flushing the pan with water. It does not include a bathroom.
- 2.109 Water Course** - A natural channel or an artificial one formed by draining or diversion of a natural channel meant for carrying storm water and waste water.
- 2.110 Width of Road** - The whole extent of space within the boundaries of road when applied to a new road, as laid down in the city surveys map or development plan or prescribed road lines by any Act or Law and measured at right angles to the course or intended course of direction of such road whichever is more.
- 2.111 Window** -An opening to the outside other than the door which provides all or part of the required natural light, ventilation or both, to the interior space.

3.0 APPLICABILITY OF REGULATIONS

- 3.1** These regulations shall apply to all development, redevelopment, erection and/or re-erection of a building, change of user etc. as well as to the design, construction or reconstruction of, and additions and alteration to a building. These regulations shall also apply to any revision of the development permissions/building permissions granted earlier under any Development Control Regulations. Further, these Regulations shall apply to development work defined in Regulation No. 3.2 to 3.6. However, features approved by earlier permission shall remain intact unless it contradicts the provisions of FSI under these regulations.
- 3.2 Construction /Part Construction** - Where the whole or part of a building is demolished or altered or reconstructed, removed, except where otherwise specifically stipulated, these Regulations apply only to the extent of the work involved.
- 3.3 Change of Occupancy / User:** -Where the occupancy or the user of a building is changed, except where otherwise specifically stipulated, these Regulations shall apply to all parts of the building affected by the change.
- 3.4 Reconstruction** - The reconstruction, in whole or part of a building which has ceased to exist due to an accidental fire, natural collapse or demolition, having been declared unsafe, or which is likely to be demolished by or under an order of the Municipal Corporation and for which the necessary certificate has been given by the said Municipal Corporation, shall be allowed subject to the provisions in these Regulations.
- 3.5 Revised permission** – Any development permission granted earlier may be revised provided that, third party interest established in pursuance of such permission, if any, are not adversely affected. In such case, consent of the adversely affected persons shall be necessary. While granting the revised permission, the approved plans and commencement certificate of the earlier permission with the owner and office, shall be stamped as 'CANCELLED' by the Authority.
- 3.6 Development of sites or land sub-division or amalgamation of land** –Where land is to be developed, sub-divided or two or more plot are to be amalgamated or a layout is to be prepared , these Regulations shall apply to the entire area under development, sub-division, amalgamation and layout.

Provided that, where a part of an existing layout is being altered, these regulations shall apply only to that part which is being altered, without adversely affecting the requirement of layout roads, recreational open space, etc. of earlier sanctioned layout.

Beh

4.0 INTERPRETATION

- 4.1 In these Regulations, the use of present tense includes the future tense, the masculine gender includes the feminine and the neutral, the singular number includes the plural and the plural includes the singular. The word "person" includes a corporation/company, "writing" includes "printing and typing" and "signature" includes thumb impression made by a person who cannot write if his name is written near such thumb impression or digital signature in case of e submissions.
- 4.2 Whenever sizes and dimensions of rooms and spaces within buildings are specified, they shall mean clear dimensions unless otherwise specified in these Regulations. However, sizes and dimensions may not be disputed with reference to finished/unfinished surfaces unless it differ overall dimensions of the building.

5.0 DEVELOPMENT PERMISSION AND COMMENCEMENT CERTIFICATE

- 5.1 No person shall carry out any development, in contravention of the Development Plan proposals.
- 5.2 No person shall carry out any development work including development of land by laying out into suitable plots or amalgamation of plots or development of any land as group housing scheme or to erect, re-erect or make alterations or demolish any building or cause the same to be done without first obtaining a separate building permit / commencement certificate for each such development work / building from the Municipal Commissioner.
- 5.3 No temporary construction shall be carried out without obtaining prior approval of the Municipal Commissioner, which may be granted subject to such conditions as may be deemed necessary by him. However, temporary site office/watchman cabin/labour-material shed/toilet may be constructed without permission after the development permission is granted. These temporary constructions shall be removed after the completion of construction under development permission.

5.4 Development undertaken on behalf of Government -

As per the provisions of Section 58 of The Maharashtra Regional and Town Planning Act, 1966, the office in-charge of the Government Department shall inform in writing to the Municipal Commissioner of the intention to carry out its purpose along with details of such development or construction as specified below :-

- i) An official letter by the authorised officer of Government Department addressed to the Municipal Commissioner, giving full particulars of the development work or any operational construction.
- ii) Ownership documents and measurement plan issued by the Competent Authority of Land Records Department.
- iii) Development / building plans conforming to the provisions of Development Plan and these Regulations for the proposed development work to the scale specified in these Regulations.
- iv) The proposals of the Development Plan or Town Planning Scheme affecting the land.
- v) A Site Plan (with required number of copies) of the area proposed to be developed to the scale.
- vi) Detailed plan (with required number of copies) showing the plan, sections and elevations of the proposed development work to the scale, including existing building specified either to be retained or to be demolished.

- 5.4.1 The operational construction of the Government, whether temporary or permanent which is necessary for the operation, maintenance, development or execution of any of the following services shall be exempted from the provisions of these Regulations:-

Beck

- i) Railways;
- ii) National Highways;
- iii) National Waterways;
- iv) Airways and Aerodromes;
- v) Major Ports;
- vi) Posts and Telegraphs, telephones, wireless, broadcasting and other like forms of communication, excluding mobile towers;
- vii) Regional grid for electricity;
- viii) Defence Authorities;
- ix) Any other essential public service as may be notified by the State Government.

All such constructions shall however, conform to the prescribed requirements for the provision of essential services, water supply connection, drains, etc.

5.4.2 However the following constructions of the Government Departments do not come under the purview of operational construction for the purpose of exemption under Regulation No.5.4.1.

- i) New residential building (other than gate lodges, quarters for limited essential operational staff and the like), roads and drains in railway colonies, hospitals, clubs, institutes and schools in case of Railways; and
- ii) New building, new construction or new installation or any extension thereof, in case of any other services.

5.4.3 However, no permission shall be necessary for the following types of works:-

- i) The carrying out of any works by the Central or State Government or any local authority-
 - (a) required for the maintenance or improvement of highway, road or public street, being works carried out on land within the boundaries of such highway, road or public street; or
 - (b) required for the purpose of inspecting, repairing or renewing any drains, sewers mains, pipes, cable; telephone or cables, or other apparatus including the breaking open of any street, or other land for the purpose.

Provided that the concerned authority shall inform the local authority, in writing, one month before carrying out such development.

- ii) The excavation (including excavation of wells) made in the ordinary course of agricultural operation.
- iii) The construction of a road intended to give access to land solely for agricultural purpose.
- iv) Normal use of land which has been used temporarily for other purposes like marriage pandals or for festive occasions; and
- v) In case of land normally used for one purpose and occasionally used for any other purpose, such occasional use of land for that other purpose.

6.0 PROCEDURE FOR OBTAINING DEVELOPMENT PERMISSION /BUILDING PERMISSION (COMMENCEMENT CERTIFICATE)

6.1 Notice - Every person who intends to carry out development and erect, re-erect or make alterations in any place in a building or demolish any building, shall give notice in writing to the Authority of his said intention in the prescribed form (See Appendix A1 or A2) and such notice shall be accompanied by the payment receipt of required scrutiny fee and any other fee/ charges prescribed by the Municipal Commissioner from time to time and the plans and statements in sufficient copies

(See Regulation No. 6.1.1), as required under Regulation No.6.2 and 6.3. The plans may be ordinary prints on Ferro paper or any other type (prints only).One set of plans shall be retained in the office of the Municipal Commissioner for record after the issue of permission or refusal. The plans may be submitted in the form of soft copy as may be specified by the Municipal Commissioner from time to time.

6.1.1 Copies of Plans and Statements - Minimum four copies of plans and statements shall be made available along with the notice. In case of building schemes, where clearance is required from other agencies like Fire Services, number of copies of plans required shall be as decided by the Authority.

6.2 Information Accompanying Notice - The notice shall be accompanied by the key (location plan), site plan, sub-division layout plan/ building plan, services plans, specifications and certificate of supervision and ownership title as prescribed in Regulation No.6.2.1 to 6.2.13.

6.2.1 Size of drawing sheets and colouring of plans.

6.2.1.1 The size of drawing sheets shall be any of those specified in Table No 1.

**Table No 1
DRAWING SHEET SIZES**

Sr. No.	Designation	Trimmed Size (In mm)
(1)	(2)	(3)
1	AO	841 x 1189
2	A1	594 x 841
3	A2	420 x 594
4	A3	297 x 420
5	A4	210 x 297

If necessary, submission of plans on sheets bigger than A0 size is also permissible.

6.2.1.2 Colouring Notations for Plans: - The Plans shall be coloured as specified in Table No. 2 herein under. Prints of plans shall be on one side of paper only.

6.2.1.3 Dimensions: All dimensions shall be indicated in metric units.

**Table No -2
COLOURING OF PLANS**

Sr. No.	Item	Site Plan		Building Plan	
		White Plan	Ammonia Print	White Plan	Ammonia Print
(1)	(2)	(3)	(4)	(5)	(6)
1.	Plot lines	Thick Black	Thick Black	Thick Black	Thick Black
2.	Existing Street	Black	Blue
3.	Future street if any	Black dotted	Blue dotted
4.	Permissible Building lines	Thick dotted black	Thick dotted blue
5.	Existing work	Black (outline)	Blue	Black	Blue
6.	Work proposed to be demolished	Yellow hatched	Yellow hatched	Yellow hatched	Yellow hatched
7.	Proposed work	Red filled in	Red	Red	Red
8.	Drainage & sewerage work	Red dotted	Red dotted	Red dotted	Red dotted
9.	Water supply work	Black dotted	Black	Black	Black dotted

Belh

		thin	dotted thin	dotted thin	thin
10.	Deviations from the sanctioned plan	Red hatched	Red hatched	Red hatched	Red hatched
Note:-	For land development/sub-division/layout/building plan, suitable colouring notations shall be used which shall be indexed.				

6.2.2 Ownership title and area - Every application for development permission and commencement certificate shall be accompanied by the following documents for verifying the ownership and area etc. of the land:-

- Attested copy of original registered sale / lease - deed /power of attorney, wherever applicable.
- V.F.No.7/12 extracts or property register card of a date not more than six months prior to the date of submission and a certified copy of the Measurement Plan of the property under development proposal.
- Statement of area of the holding by triangulation method /CAD (computer added designs and draftings) based softwares from the qualified licensed technical personnel or architect with an affidavit from the owner with regard to the area in the form prescribed by the Municipal Commissioner.
- Any other document prescribed by the Municipal Commissioner.
- Wherever third party interest is created by way of agreement to sale or mortgage etc. the registered consent of such interested persons shall be submitted with the application.
- A certified copy of approved sub-division / amalgamation / layout of land from the concerned authority.
- In the case of land leased by the Government or local authorities, no objection certificate of Government or such authorities shall be obtained if there is deviation from lease conditions and shall be attached to the application for development permission in respect of such land.

6.2.3 Key Plan or Location Plan - A key plan drawn to a scale of not less than 1:10,000 shall be submitted as a part of building plan / development proposal along with the application for a building permit and commencement certificate; showing the boundary and location of the site with respect to neighbourhood landmarks or with respect to the area within the radius of 200 m. from the site, whichever is more.

6.2.4 Site Plan - The site plan shall be submitted with an application for building permission drawn to a scale of 1:500 or more as may be decided by the Authority. This plan shall be based on the measurement plan duly authenticated by the appropriate officer of the Department of Land Records. This plan shall have the following details:-

- The boundaries of the site and of any contiguous land belonging to the neighbouring owners;
- The position of the site in relation to neighbouring streets ;
- The name of the street, if any, from which the building is proposed to derive access;
- All existing buildings contained in the site with their names (where the buildings are given names) and their property numbers;
- The position of the building and of other buildings, if any, which the applicant intends to erect, upon his contiguous land referred to in (a) above in relation to;
 - The boundaries of the site and, in a case where the site has been partitioned, the boundaries of the portions owned by others;
 - All adjacent streets, buildings (with number of storeys and height) and premises within a distance of 12 m. of the work site and of the contiguous land (if any) referred to in (a), and

Bech

- f) The means of access from the street to the building and to all other buildings (if any) which the applicant intends to erect upon.
- g) The space to be left around the building to secure free circulation of air, admission of light and access;
- h) The width of the street (if any) in front and the street (if any) at the side of or near the building, including the proposed roads;
- i) The direction of the north line relative to the plan of the building;
- j) Any existing physical features, such as wells, tanks, drains, pipe lines, high tension line, railway line, trees, etc.;
- k) The ground area of the whole property and the break-up of the built-up area on each floor;
- l) A plan indicating parking spaces as required and provided under these regulations;
- m) Overhead electric supply lines, if any, including space for electrical transformer / sub-station according to these regulations or as per the requirements of the electric distribution company.
- n) Any water course existing on site;
- o) Existing alignments of water supply and drainage line;
- p) Such other particulars as may be prescribed by the Municipal Commissioner.

6.2.5 Sub-Division/ Layout Plan - In the case of development of land, the notice shall be accompanied by the sub-division/ layout plan which shall be drawn to a scale of not less than 1:500, however, for layout having areas of 4.0 ha. and above, the plan shall be drawn to a scale of not less than 1:1000, containing the following:

- (a) Scale used and north point;
- (b) The location of all proposed and existing roads with their existing /proposed widths within the land;
- (c) Dimension of plots;
- (d) The location of drains, sewers, public facilities and services, electrical lines, natural water courses, water bodies and streams etc.
- (e) Table indicating size, area and use of all plots in the sub-division/ layout plan;
- (f) The statement indicating the total area of the site, area utilized under roads, recreational open spaces, amenity spaces, playground, recreation spaces and development plan reservations/ roads, schools, shopping and other public places along with their percentage with reference to the total area of the site proposed to be sub-divided / laid out;
- (g) In case of plots which are sub-divided in built-up areas, in addition to the above, the means of access to the sub-division from existing streets;
- (h) Contour plan of site, wherever necessary.

6.2.6 Building Plan - The plans of the buildings with elevations and sections accompanying the notice shall be drawn to a scale of 1:100 or to a scale as may be directed by the Municipal Commissioner and shall

- (a) include floor plans of all floors together with the built-up area, clearly indicating the sizes of rooms and the position and width of staircases, ramps and other exit ways, lift-wells, lift machine rooms and lift pit details. It shall also include ground floor plan as well as basement plans and shall indicate the details of parking spaces, loading and unloading spaces provided around and within building as also the access ways and the appurtenant open spaces with projections in dotted lines, distance from any building existing on the plot in figured

Belk

dimensions along with accessory building;

- (b) show the statement of built-up area of every flat or shop or any unit along with proportionate common built-up area and carpet area attached to it and area of balcony / enclosed balcony and double height terraces, if any attached to the said unit;
- (c) show the use or occupancy of all parts of the building;
- (d) show exact location of essential services e.g. wc, sink, bath and the like;
- (e) include sectional drawings of the building showing all sectional details;
- (f) show all street elevations;
- (g) give dimensions of the projected portions beyond the permissible building line;
- (h) include terrace plan indicating the drainage and the slopes of the roof;
- (i) give indications of the north point relative to the plans; and
- (j) give dimensions and details of doors, windows and ventilators;

6.2.6.1 Building Plans for Special Buildings :- For

- (i) multistoried buildings which are more than 24.00m. height; or
- (ii) special buildings like educational, assembly, mercantile, institutional, public and semipublic, industrial, storage and hazardous buildings having built-up area more than 500 sq. m. on each floor; or
- (iii) mixed occupancies with any of the aforesaid occupancies mentioned in (ii) above, having built-up area more than 500 sq. m. on each floor;

the following additional information shall be furnished/indicated in the Building Plans, in addition to the items (a) to (j) of Regulation No. 6.2.6.:-

- (a) access to fire appliances/vehicles with details of vehicular turning circle and clear motorable access way around the building;
- (b) size (width) of main and alternate staircases, wherever necessary, along with balcony approach, corridor, ventilated lobby approach;
- (c) location and details of lift enclosures;
- (d) location and size of fire lift;
- (e) smoke stop lobby/door, where provided;
- (f) refuse chutes, refuse chamber, service duct, etc.;
- (g) vehicular parking spaces;
- (h) refuge area, if any;
- (i) details of Building Services :-Air-conditioning system with position of fire dampers, mechanical ventilation system, electrical services, boilers, gas pipes etc.,
- (j) details of exits including provision of ramps, etc. for hospitals and buildings requiring special fire protection measures,
- (k) location of generator, transformer and switch gear room;
- (l) smoke exhaustor system, if any;
- (m) details of fire alarm system network;
- (n) location of centralized control, connecting all fire alarm systems, built in fire protection arrangements and public address system etc.
- (o) location and dimensions of static water storage tank and pump room along with fire

R. B. B.

service inlets for mobile pump and water storage tank;

- (p) location and details of fixed fire protection installations such as sprinklers, wet risers, hose reels, drenchers, CO₂ installation etc.;
- (q) location and details of first aid, firefighting equipment's / installations.

Provided further that, the provision of fire escape stair case shall be made as per Regulation No.17.4.4

Provided further that, certificate of structural engineer about earthquake safety shall also be necessary.

6.2.7 Service Plan - Plans, elevations and sections of private water supply, grey water supply, sewage disposal system and details of building services, where required by the Authority, shall be made available on a scale not less than 1:100 in general and 1:1000 for layouts.

6.2.8 No Objection Certificate - In case of development / construction of buildings requiring clearance from the authorities like Civil Aviation Authority, Railways, Directorate of Industries, Maharashtra Pollution Control Board, District Magistrate, Inspectorate of Boilers and Smoke Nuisance, Defence Authorities, Archeological Department etc., the relevant no objection certificates from these authorities, applicable to the occupancy, shall also accompany the application.

In case of a building identified in Regulation No.6.2.6.1, the building scheme shall also be cleared by the Chief Fire Officer of the Municipal Corporation.

6.2.9 Supervision - The notice shall be further accompanied by a certificate of supervision in the prescribed form given in Appendix B, by a licensed Architect/ Engineer/ Structural Engineer, as the case may be. In the event of the said licensed technical personnel ceasing to be employed for the development work, further development work shall stand suspended till a new licensed technical person is appointed.

6.2.10 Building/ Layout Permission Fee- The notice shall be accompanied by self attested copy of Receipt of payment of Building/ Layout Permission Fee. The building permission fee or layout /subdivision of land fees shall be as decided by the Municipal Commissioner from time to time, subject to Government orders, if any.

6.2.11 Development Charges- Development charges as required under Section 124A of the Maharashtra Regional and Town Planning Act, 1966 shall be deposited with the Planning Authority before issue of development permission/ commencement certificate. In case of revised permission where no development is carried out in pursuance of the earlier permission, amount of difference of development charges, if any, shall be levied and recovered. In case of revised permission, where development is commenced in pursuance of earlier permission, development charges shall be levied on the land and built-up area, over and above the area covered in the earlier permission.

6.2.12 Charges for Premium FSI - Charges for Premium FSI as may be required to be recovered under these regulations shall be paid to the Planning Authority before issue of development permission/ commencement certificate. The amount of premium collected shall be kept in a separate account and it shall be utilised for development of civic amenities and infrastructure.

6.2.13 Tax receipt for tax clearance - The notice shall also be accompanied by self attested copy of the tax receipt from the Assessment Department of the Municipal Corporation for payment of Tax up to date.

6.3 Signing the Plan -

All the plans shall be duly signed by the owner, co-owner, if any, and the Architect or Licensed

Red

Engineer / Structural Engineer / Supervisor and shall indicate his name, address and license number allotted by the Authority.

6.4 Qualification and Competence of the Architect / Licensed Engineer / Structural Engineer/ Supervisor and Registration of Developer -

Architect/ Engineer/Structural Engineer/ Supervisor referred to in Clause 6.3 shall be registered / licensed by the Authority as competent to plan and carry out various works as given in Appendix "C". The qualification and procedure for registration and licensing of the Engineer / Structural Engineer / Supervisor / Developer shall be as given in Appendix- "C". Architects registered with council of Architecture shall not be required to register with the Authority.

6.5 Discretionary Powers:-

6.5.1 Interpretation.

In conformity with the intent and spirit of these regulations, the Municipal Commissioner may,

- (i) decide on matters where there is doubt / error in interpretation of these Regulations in consultation with the Divisional Head of Town Planning, Nashik Division, Nashik;
- (ii) decide the extent of the proposal of development plan with respect to survey number, where boundaries of the survey number shown on development plan varies with the boundaries as per revenue record/ measurement plan/ city survey sheets.
- (iii) determine and establish the location of zonal boundaries in exceptional cases, or in cases of doubt or controversy;
- (iv) decide the alignment of development plan road, where the street layout actually on the ground varies from the street layout as shown on the Development Plan;
- (v) authorise erection of a building or use of premises for a public service undertaking for public utility purposes only, where he finds such authorisation to be reasonably necessary for the public convenience and welfare, even if it is not permitted in any Land Use Classification,
- (vi) modified the limit of a zone where the boundary line of the zone divide the plot, while deciding such boundary, the zone prevails over larger portion of the plot having area more than 50% shall be considered.

6.5.2 Relaxation.

In specific cases, where a clearly demonstrable hardship is caused, the Municipal Commissioner may permit any of the dimensions / provision prescribed by these regulations to be modified provided the relaxation sought does not violate the health safety, fire safety, structural safety and public safety of the inhabitants of the buildings and the neighborhood. However, no relaxation for the setback required from the road boundary or F.S.I. or parking requirements shall be granted under any circumstances, unless otherwise specified in these regulations.

While granting such permission, conditions may be imposed on size, cost or duration of the structure, abrogation of claim of compensation, payment of deposit and its forfeiture for noncompliance.

6.5.3 Temporary Constructions -The Municipal Commissioner may grant permission for temporary construction for a period not exceeding six months at a time and in the aggregate not exceeding for a period of one year, such a permission may be given by him for the construction of the following, viz.:-

- (i) Structures for protection from the rain or covering of the terraces during the monsoon only.
- (ii) Pandals for fairs, ceremonies, religious function, etc.

Handwritten signature

- (iii) Structures for godowns/storage of construction materials within the site.
- (iv) Temporary site offices and watchman chowkies within the site only during the phase of construction of the main building.
- (v) Structures of exhibitions/ circuses etc.
- (vi) Structures for storage of machinery, before installation for factories in industrial lands within the site.
- (vii) Structures for ancillary works for quarrying operations in conforming zones.
- (viii) MAFCO stalls, government milk booths and telephone booths.
- (ix) Transit accommodation for persons to be rehabilitated in a new construction.
- (x) Structures for educational and medical facilities within the site of the proposed building during the phase of planning and constructing the said permanent buildings.
- (xi) Ready mix concrete plant.

Provided that, temporary constructions for structures etc. mentioned at (iii), (iv), (vi), (ix) and (x) may be permitted to be continued temporarily by the Municipal Commissioner, but in any case not beyond completion of construction of the main structure or building and that structure in (vii) and (viii) may be continued on annual renewal basis by the Municipal Commissioner beyond a period of one year.

Provided further that approval of Chief Fire Officer of the authority shall be obtained wherever necessary.

6.6 Grant or Refusal of permission

- 6.6.1** The Authority may either sanction or refuse the plans or may sanction them with such modifications or directions as it may deem necessary after having recovered the necessary charges and there upon shall communicate its decision to the person giving the notice in the prescribed form given in Appendix D1/D2/D3 and E1/E2 as the case may be.
- 6.6.2** (i) The building plans for buildings identified in Regulation No. 6.2.6.1 shall also be subject to the scrutiny of the Chief Fire Officer, Fire Brigade and the sanction / building permission shall be issued by the Authority after the clearance from the Chief Fire Officer.
- (ii) In case of land subdivision or plotted layout, tentative layout shall be recommended for demarcation at first instance. After having demarcated the layout by the Land Records Department, the owner shall submit the demarcated layout for final approval to the Authority and the Authority shall examine the provision laid down in Regulation No.6.8 and grant final approval if it is in accordance with the layout recommended for demarcation and confirming to the regulations. This shall also be mandatory to Group Housing Scheme where roads in the adjoining layouts/ Development Plan roads are to be coordinated and/or amenity space is to be earmarked.
- 6.6.3** If within sixty (60) days of receipt of the notice, along with necessary fees under 6.2.10 of the regulations, the Authority fails to intimate in writing to the person, who has given the notice; of its refusal or sanction or sanction with such modifications or directions, the notice with its plans and statements shall be deemed to have been sanctioned, provided nothing shall be construed to authorise any person to do anything on the site of the work in contravention or against the terms of lease or titles of the land.

Provided further that, the development proposal, for which the permission was applied for, is strictly in conformity with the requirements of provisions of these regulations, or regulations framed in this behalf under any law for the time being in force and the same in no way violates either provisions of

Rsch

any draft or final plan or proposals published by means of notice, submitted for sanction under the Act. Provided further that any development carried out in pursuance of such deemed permission which is in contravention of the provisions mentioned above, shall be deemed to be an unauthorised development for purposes of Sections 52 to 57 of the Maharashtra Regional and Town Planning Act, 1966 and other relevant Acts.

Provided further that upon receipt of intimation of any claim for deemed permission, the Authority shall within fifteen days from the date of receipt of such claim, communicate its remarks, if any, regarding deemed permission to the applicant, failing which, the proposal shall be approved and commencement certificate and one set of duly approved plans for proposed development shall be issued to the applicant within fifteen days thereafter.

Provided further that necessary explanation shall be called from the concerned officer of the Authority for not processing and disposing of the proposal within 60 days.

- 6.6.4 After the plan has been scrutinised and objections have been pointed out, the owner giving notice shall modify the plan, comply with the objections raised and resubmit it. The prints of plans submitted for final approval, shall not contain superimposed corrections. The authority shall grant or refuse the commencement certificate / building permit within 60 days from the date of resubmission. No new objections may generally be raised when they are resubmitted after compliance of earlier objections, except in circumstances to be quoted for additional compliances.

6.7 Commencement of work

The commencement certificate/development permission shall remain valid for 4 years in the aggregate but shall have to be renewed every year from the date of its issue. The application for renewal shall be made before expiry of one year if the work is not already commenced. Such renewal can be done for three consecutive terms of one year after which proposals shall have to be submitted to obtain development permission afresh. If application for renewal is made after expiry of the stipulated period during which commencement certificate is valid, then the Authority may condone the delay for submission of application for renewal by charging necessary fees; but in any case, commencement certificate shall not be renewed beyond 4 years from the date of commencement certificate/ development permission. Provided that no such renewal shall be necessary if the work is commenced within the period of valid permission and such permission shall remain valid till the work is completed.

For the purpose of this regulation, "Commencement" shall mean as under:-

(a)	For layout, sub-division and amalgamation	Final demarcation and provision of water bound macadam roads complete.
(b)	For a building work including additions and alterations.	Construction of basement upto ground level slab or construction of building at plinth level whichever is minimum.
(c)	For bridges and overhead tanks construction.	Foundation and work up to the base floor.
(d)	For underground works	Foundation and work upto floor of underground floor.

- 6.8 In case of land subdivision / group housing schemes, it shall be the responsibility of the owner / developer to construct all infrastructure including roads with asphaltting, storm water drains, sewer lines, water supply lines, development of recreational open spaces etc. In case of land subdivision, these works shall generally be completed within two years and phase wise building permission shall be granted depending upon the percentage of infrastructure work completed. The layout plots should

Seeh

be released for construction in stages according to infrastructure work completed. The condition to that effect shall be incorporated in the commencement certificate. In case of group housing scheme, these works shall be completed before completion of the project and occupancy certificate shall be granted phase wise as per completion of infrastructure work.

After handing over roads and infrastructure to the corporation on completion of scheme, the responsibility of maintenance of such road and infrastructure shall lie with the corporation.

7.0 PROCEDURE DURING CONSTRUCTION

- 7.1 Owner / Architect / Developer / Engineer / Structural Engineer / Supervisor or any licensed Technical persons' liability:** - Neither the grant of permission nor approval of the drawing nor inspection by the Authority during erection of the building, shall in any way relieve the Owner / Architect / Developer / Engineer / Structural Engineer / Supervisor or any licensed Technical persons of such building / development, from full responsibility for carrying out the work in accordance with these Regulations and safety norms as prescribed by the Bureau of Indian Standards.
- 7.2 Documents at site –**
- (i) **Development Permission:** The person to whom a development permission is issued shall during construction, keep -
- (a) posted at a conspicuous place on the site for which permission has been issued, a copy of a development permission; and
- (b) a copy of the approved drawings referred to in Regulation No.6.6 on the site for which the permission was granted.
- (ii) **Display board:** Display board mentioning name of the owner, name of architect, name of structural engineer, except for small individual plot holders.
- 7.3 Deviation during constructions-**If during construction of a building any departure of a substantial nature from the sanctioned plans is intended by way of internal or external additions, sanction of the Authority shall be necessary. A revised plan showing the deviation shall be submitted and the procedure laid down for the original plans shall apply to all such amended plans. Any work done in contravention of the sanctioned plans, without prior approval of the Authority shall be deemed as unauthorised. However, any changes made within the internal layout of a residential or commercial unit, which do not violate FSI or other regulations, shall not be treated as unauthorised.
- 7.4 Completion Certificate -** The owner through his licensed surveyor / engineer / structural engineer / supervisor or his architect, as the case may be, who has supervised the construction, shall furnish a building completion certificate to the Authority in the form in **Appendix 'F'**. This certificate shall be accompanied by three sets of plans of the completed development.
- 7.5 Occupancy certificate -** The Authority after inspection of the work and after satisfying himself that there is no deviation from the sanctioned plans, issue an occupancy certificate in the form in **Appendix- G** or refuse to sanction the occupancy certificate in **Appendix – H** within 21 days from the date of receipt of the said completion certificate, failing which the work shall be deemed to have been approved for occupation, provided the construction conforms to the sanctioned plans. One set of plans, certified by the Authority, shall be returned to the owner along with the occupancy certificate. Where the occupancy certificate is refused or rejected, the reasons for refusal or rejection shall be given in intimation of the rejection or the refusal.

In case of building identified in Regulation No.6.2.6.1, the occupancy certificate shall be issued by the Authority, only after the clearance from the Chief Fire Officer, regarding the

Rech

completion of the work from fire protection point of view.

- 7.6 Part occupancy certificate:-** When requested by the holder of the development permission, the Authority may issue a part occupancy certificate for a building or part thereof, before completion of the entire work, as per development permission, provided sufficient precautionary measures are taken by the holder to ensure public safety and health. The occupancy certificate shall be subject to the owners indemnifying the Authority in the form in **Appendix 'I'**.

8.0 INSPECTION

The Authority shall have the power to carry out inspection of the work under the provisions of the Act, at various stages to ascertain whether the work is proceeding as per the provisions of regulations and sanctioned plan.

9.0 UNSAFE BUILDINGS

All unsafe buildings shall be considered to constitute danger to public safety and hygiene and sanitation and shall be restored by repairs or demolished or dealt with as otherwise directed by the Authority. The redevelopment of such buildings shall be as per the provisions of the Regulation No. 23.13.

10.0 OFFENCES AND PENALTIES

- 10.1 Offences and penalties:-** Any person who contravene any of the provisions of these regulations / any requirements or obligations imposed on him by virtue of these regulations including the maintenance of fire protection services and appliances and lifts in working order or who interferes with or obstructs any person in the discharge of his duties shall be guilty of an offence and upon conviction shall:

- (a) be punished with a fine as fixed by the Municipal Commissioner and as stipulated in Section 52 of The Maharashtra Regional and Town Planning Act, 1966;
- (b) further the Authority may take suitable actions including demolition of unauthorised works, as stipulated under Section 53 of The Maharashtra Regional and Town Planning Act, 1966;
- (c) in case of Licensed Engineer / Structural Engineer / Supervisor, the Authority may take suitable action against him which may include cancellation of license and debarring him from further practice / business for a period as decided by the Authority;
- (d) in case of registered architects, the Municipal Commissioner may report to the Council of Architecture to take suitable action against the Registered Architect as per the provisions of Architects Act, 1972.

10.2. Revocation of Permission:-

- 1) Without prejudice to the powers of revocation conferred by Section 51 of the Maharashtra Regional and Town Planning Act, 1966, the Authority may, after giving the opportunity of being heard, revoke any development permission issued under these regulations where it is noticed by it that there had been any false statement or any misrepresentation of material fact in the application on the basis of which the development permission was issued and thereupon the whole work carried out in pursuance of such permission shall be treated as unauthorised.
- 2) In the case of revocation of the permission under sub- regulation (1), no compensation shall be paid.

10A Amendment to appendices

The Municipal Commissioner may amend the appendices A to J(except appendix C & J) in these regulations as and when necessary. Further, any error is observed in text of any

Boeh

regulation, it may be rectified by the Municipal Commissioner in consultation with the Director of Town Planning.

Rch

PART II
GENERAL LAND DEVELOPMENT REQUIREMENTS

11.0 REQUIREMENTS OF SITE**11.1 SITES NOT ELIGIBLE FOR CONSTRUCTION OF BUILDING**

No piece of land shall be used as a site for the construction of building

- (a) If the Authority considers that the site is insanitary, incapable of being well drained or it is dangerous to construct a building on it;
- (b) If the entire site is within a distance of 6 m. from the edge of water mark of a minor watercourse (like nalla) and 15 m. from the edge of water mark of a major water course (like river) shown on Development Plan or village/city survey map or otherwise, provided that where a minor water course passes through a low lying land without any well-defined banks, the owner of the property may be permitted by the Municipal Commissioner to restrict and or to realign the same within the same land along with cross section as determined by the Corporation; modified from time to time without changing the position of the inlet and outlet of the water course. In such case marginal open spaces shall be as required under these regulations subject to minimum 4.50 m. from the edge of the trained nala.

Notwithstanding anything contained hereinabove, the Municipal Commissioner shall be entitled to take cognizance of the existence of all water courses whether shown on the Development Plan or not, while sanctioning layouts and no person shall take any action without the permission of the Commissioner which results in reducing the water way or closing or filling up of any existing water course. If any watercourse, whether shown in the Development Plan/Revenue Record or not, but existing on the site/land, owned by private person, the area under such water course shall not be deducted for computation of FSI.

- (c) If the owner of the plot has not shown to the satisfaction of the Authority all the measures required to safeguard the construction from constantly getting damp;
- (d) If the proposed building is for assembly uses, for cinemas / theatres, as well as for public worship which has not been previously approved by the appropriate Authority;
- (e) If the building is proposed on any area filled up with carcasses, excreta, filth and offensive matter till the production of certificate from the Authority to the effect that it is safe from the health and sanitary point of view, to be built upon;
- (f) If the use of the site is for the purpose, which in the opinion of the Authority will be a source of annoyance to the health and comfort of the inhabitants of the neighbourhood;
- (g) If the proposed occupancy of the building on the site does not conform to the land use proposals in the development plans or Zoning Regulations,
- (h) If the level of the site is less than prescribed datum level depending on topography and drainage aspects;
- (i) If it doesn't derive access from an authorised street/means of access described in these Regulations;
- (j) If the site is not developable by virtue of restrictions imposed under any law or guidelines of any Government department and;
- (k) If the site is hilly and having gradient more than 1:5.

11.2 DISTANCE OF SITE FROM ELECTRIC LINES

No structure including verandah or balcony shall be allowed to be erected or re-erected or any

Isob

additions or alterations made to a building on a site within the distance quoted in **Table No. 3** below in accordance with the prevailing Indian Electricity Rules and its amendments from time to time between the building and any overhead electric supply line.

Table No. 3

Electric Lines	Vertically (m.)	Horizontally (m.)
(1)	(2)	(3)
(a) Low and medium voltage Lines and Service Lines.	2.5	1.2
(b) High voltage lines up to and including 33,000 V.	3.7	2.0
(c) Extra High voltage beyond 33,000 V.	3.7	2.0
	(Plus 0.3 m. for every additional 33,000 V. or part thereof)	(Plus 0.3 m. for every additional 33,000 V. or part thereof)
Note : The minimum clearance specified above shall be measured from maximum sag for vertical clearance and from maximum deflection due to wind pressure for horizontal clearance.		

11.3 CONSTRUCTION WITHIN FLOOD LINE

Construction within flood line of river Godavari, Dama, Waghadi, Nasardi and Waldevi

- i) Area between the river bank and blue flood line (Flood line towards the river bank) shall be prohibited zone for any construction except parking, open vegetable market with otta type construction, garden, open space, cremation and burial ground, or like uses, provided the land is feasible for utilization.

Provided further that redevelopment of the authorised existing properties within river bank and blue flood line, in core area, marked on development plan, may be permitted at a height of 0.45 m. above red flood line level, in consultation with Irrigation Department.

- ii) Area between blue flood line and red flood line shall be restrictive zone for the purposes of construction. The construction within this area may be permitted at a height of 0.45 m. above the red flood line level.
- iii) If the area between the river bank and blue flood line or red flood line forms the part of the entire plot in developable zone i.e. residential, commercial, public-semi-public, industrial, future urbanizable zone, then, FSI of this part of land may be allowed to be utilised on remaining land.
- iv) The blue and red flood line shown on the development plan shall stand modified as and when it is modified by the Irrigation Department.

11.4 DEVELOPMENT WITHIN 30 M. FROM RAILWAY BOUNDARY

For any construction within 30 m. from railway boundary, No Objection Certificate from Railway Authority shall be necessary.

11.5 ENVIRONMENTAL CLEARANCE

Environmental clearance certificate shall be submitted for the project as may be prescribed by the Ministry of Environment from time to time.

Rooh

11.6 RESTRICTIONS IN THE VICINITY GANDHI NAGAR AIRPORT

Height restriction in the vicinity of the Gandhi Nagar Airport, as may be specified by the concerned authority from time to time, shall be observed.

11.7 CONSERVATION LINE FOR PANDAV LENI

A conservation line around Pandav Leni has been earmarked by the Archeological Survey of India, which is upto 300 m. from the periphery of Pandav Leni. Development within this conservation zone shall be subject to following conditions;

- i) No construction activity is permissible within 100 meters distance from the periphery of leni.
- ii) Between 100 m. to 300 m. construction is permissible upto a height of 9.0 m. or as specified by Archeological Survey of India from time to time.
- iii) For every construction in this conservation zone, NOC from Archeological Survey of India is necessary.

11.8 DEVELOPMENT ALONG HIGHWAYS / CLASSIFIED ROADS

The development along the highways shall be subject to the provisions of State Highways Act, 1965 and National Highway Act, 1956 and orders issued by Public Works Department in this regards, from time to time.

A service road of 12 m. wide shall be provided along State and National Highways on both sides. These service road may not be provided where development / construction is already taken place without the provision of the service roads.

11.9 DEVELOPMENT WITHIN 500 M. FROM THE JAIL PREMISES

The developments around from the jail premises may be permitted with prior consent of the committee constituted in this regard vide government order no.UOR-81-2013-UD-11, Dated 4 December, 2013, & 6 August, 2015. This provision shall be subject to the orders issued by the Government from time to time.

11.10 DISTANCES FROM LAND FILL SITES

For any residential development, segregating distance from the land fill site shall be observed as specified under Solid Waste Management Rules in force from time to time.

11.11 DEVELOPMENT OF CYCLE TRACK ALONG RIVER & NALLA

A cycle track shall be developed in green belt areas earmarked on Development Plan along the rivers. Also, cycle track proposal is shown on canal land in the Development Plan.

A distance of 6 m. from the edge of minor water course (nalla) is to be left as marginal distance for construction of any building. A 3 m. strip of land from the edge of such water course out of this 6 m. distance to be left, shall be available for use as cycle track for general public. The compound wall shall be constructed excluding this distance of 3 m. strip for cycle track. The owner shall be entitled for FSI of this strip of land for cycle track, in-situ. This 3m. wide strip shall be handed over to Municipal Corporation for which, owner shall be entitled for TDR or in-situ FSI equivalent to 35% of the area of 3m. wide strip. This regulation shall be applicable for development of land along nallas specified in **Plan-A** annexed with this DCPR. Where development is already taken place and it is not possible to make provision for such 3 m. wide cycle track, then Municipal Commissioner shall be empowered to decide not to apply this regulation for particular stretch of nalla. In such cases, normal marginal distances under these

Handwritten signature

regulations shall apply.

12.0 MEANS OF ACCESS

- 12.1 Every plot / building whether existing or proposed, shall have means of access as required in these Regulations.
- 12.2 Every person who erects a building shall not at any time erect or cause or permit to erect or re-erect any building which in any way encroaches upon or diminishes the area set apart as means of access.

13.0 REGULATIONS FOR LAND SUB-DIVISION AND LAYOUT

13.1 OBLIGATION TO PREPARE LAYOUT

Building layout or Sub-division proposal shall be submitted for the following:

- (i) When more than one building, excepting accessory buildings in the case of residential building, is proposed on any land, the owner of the land shall submit proposal for proper layout of building.
- (ii) When development and redevelopment of any land which includes division and sub-division or amalgamation of plots for various land uses is proposed.

13.2 ROADS / STREETS IN LAND SUB-DIVISION OR LAYOUT

- A) For Residential Development -The plots shall abut on a existing public means of access like street / road. Minimum width of access / layout road / internal road in any development proposal / subdivision / group housing shall be as given in **Table No.4**.

Sr. No.	Length of Means of access in m.	Width of Means of access in m.
i	upto150	9.00
ii	above 150 and to upto300	12.00
iii	more than 300	15.00

- B) For Other than Residential Development -The minimum width of access / layout road / internal road in any development proposal other than residential (for commercial/industrial use) shall be as given in **Table No.4 (a)**.

Sr. No.	Length of Mean of access in m.	Width of Means of access in m.
i	Upto 75	12
ii	Above 75 to 150	15
iii	Above 150	18 or more

NOTE – 1 The means of access shall be clear of required marginal distances from the existing building line. In no case, development on plots shall be permitted unless it is accessible by the authorized public street existing prior to coming in to force of these Regulations or road from the

Beck

layout sanctioned prior to these Regulations.

NOTE – 2 For layout or part of layout where plots of 50 sq. m. or less are proposed for Economical Weaker Sections (EWS), 4.5 wide road of length upto 60 m. and 6 m. wide road of length upto 100 m. maybe permitted so that EWS plots shall abut on both sides of such 6 m. wide road.

C) In case of group housing scheme minimum width of internal means of access shall be as under

Table (4b)		
Sr. no.	Length of Mean of access in m.	Width of Means of access in m.
i	Upto 150	7.50
ii	Above 150 to 300	9.00
iii	Above 300 to 600	12.00
iv	Above 600	15.00

NOTE – 1 In case of group housing scheme, building as mentioned in Regulation No.6.2.6.1 is proposed then such building shall be accessible from minimum road width of 12 m. and road network shall be planned accordingly.

NOTE – 2 It shall be necessary to provide through roads, in group housing scheme of area more than 2 Hecter, so as to coordinate the adjoining major road link (15 m. and above) or give way to new road link for adjoining area. The road width required for such road link shall be as per Table no.4. This shall not bar coordination of smaller width roads approaching from adjoining area, if owner so desires. Further the authority may insist on coordination of smaller width road from adjoining area, if required from planning point of view.

- 13.2.1 Pathways** -In case of group housing scheme / campus planning, a pedestrian approach to the buildings from road / street / internal means of access, wherever necessary, shall be through paved pathway of width not less than 3.0 m. & 6.0 m., provided its length measured from farthest building is not more than 60 m. and 100 m. respectively from the main / internal means of access. If the length is more than 100m., then regular street as provided in Table No.4b shall be necessary. The marginal distances shall not be required from such pathways, however, distance between two buildings shall be maintained. This provision shall not apply to development under Regulation No.23.10.
- 13.2.2** The length of means of access shall be determined by the distance from the farthest plot (building) to the public street. The length of the subsidiary access way shall be measured from the point of its origin to the next wider road on which it meets.
- 13.2.3** In the interest of general development of an area, the Authority may require the mean of access to be of larger width than that required under Regulation No. 13.2.
- 13.2.4** While granting the development permission for land sub-division or group housing/campus planning, it shall be necessary to coordinate the roads in the adjoining lands subject to provisions mentioned in Regulation No.13.2.C – NOTE - 2.
- 13.2.5** In case where a private passage is unrestrictedly used by public for more than 10 years as a means of access of width not less than 9 m. to a number of plots, the Authority may take steps including improvement under, the provision of relevant Act to declare it as a public street.

- 13.2.6** In core areas in the case of plots facing street / means of access less than 4.5 m. in width, the plot boundary shall be shifted to be away by 2.25 m. from the central line of the street/ means of access way to give rise to a new street / means of access way of width of 4.5 m. clear from the structural projections.
- 13.2.7** Means of access shall be leveled, metalled, flagged, paved, sewered, drained, channeled, lighted, laid with water supply line and provided with trees for shade (wherever necessary) to the satisfaction of the Authority, free of encroachment and shall be maintained in a condition to the satisfaction of the Authority .
- 13.2.8** If any private street or any other means of access to a building is not constructed & maintained as specified above, the authority may by written notice require the owner or owners of the several premises fronting or adjoining the said street or other means of access or abutting thereon or to which access is obtained through such street or other means of access or which shall benefit by works executed to carry out any or more of the aforesaid requirements in such manner and within such time as the authority shall direct. If the owner or owners fail to comply with this direction, the authority may arrange for its execution and recover the expenses incurred from the owner/ owners.
- 13.2.9 Access from the Highways/classified roads:** Generally the plot / building along Highway and classified roads shall derive access from service road. However, highway amenities like petrol pump; hotel, etc. may have an access direct from Highways and such other roads having a width of 30 m. or more. The above shall be subject to the provisions of State Highways Act, 1965 and National Highway Act, 1956.
- 13.2.10** For building identified in Regulation No. 6.2.6.1, the following additional provisions of means of access shall be ensured;
- The width of the main street on which the plot abuts shall not be less than 12m. and one end of this street shall join another street of width not less than 12 m. in width subject to Regulation No.13.2.
 - The marginal distances on its all sides (see Regulation No. 15.0) shall be minimum 6 m. and the layout for the same shall be approved in consultation with the Chief Fire Officer, Nashik Municipal Corporation and the same shall be of hard surface capable of taking the weight of fire engine, weighing up to 45 tones. The said marginal distances shall be kept free of obstructions and shall be motorable.
 - Main entrances to the plot shall be of adequate width to allow easy access to the fire engine and in no case it shall measure less than 4.5 m. The entrance gate shall fold back against the compound wall of the premises, thus leaving the exterior access way within the plot free for movement of fire engine / fire service vehicles. If main entrance at boundary wall is built over, the minimum clearance shall be 4.5 m.
- 13.2.11** In addition to the provisions of Regulation No. 13.2, Cul-de-sacs giving access to plots and extending upto 150 m. normally and 275 m. maximum with an additional turning space at 150m. shall be allowed only in residential area, provided that Cul-de-sacs would be permissible only on straight roads and further provided that cul-de-sacs ends shall be higher in level than the level of starting point. The turning space, in any case shall be not less than 81 sq. m. in area with no dimension being less than 9 m.
- 13.2.12** Areas under roads shall be handed over to the Planning Authority by way of deed after development of the same to the satisfaction of the Authority, within such period as may be specified in commencement letter / development permission, for which nominal amount of Re 1/-

shall be paid by the Planning Authority.

- 13.2.13 Intersection of Roads** - At junctions of roads meeting at right angles, the rounding off at the intersection shall be done, unless otherwise directed by the Authority, with the tangent length from the point of intersection to the curve being $1/2$ the road width across the direction of tangent as given below: The building shall also set back at required marginal distance from this rounding off.

Fig. 1- Rounding off intersections at junctions

Fig.2. - Rounding off intersection at junctions.

- 13.2.14** For junctions of road meetings at less than 60 degree, the rounding off or cut or similar treatment shall have tangent length of U and V from the intersections point as shown in fig 2. The tangent length at obtuse angle junction shall be equal to half the width of the road from which the vehicle enters as shown in fig. 2. Provided however, that the radius for the junction rounding shall not be less than 6 m.

13.2.15 Land Locked Plot :-

In case of a plot surrounded on all sides by other plots i.e. a land locked plot which has no access to any street or road, the Commissioner may acquire access through an adjoining plot or plots which shall, as far as possible be nearest to the street or road, to the land locked plot, at the cost of owner of the land-locked plot and such other conditions as the Commissioner may specify.

13.3 RECREATIONAL OPEN SPACES

- 13.3.1** In any layout or subdivision or any development of land for any use/zone admeasuring 0.40 Ha. or more after deducting D.P. road and reservation area, if any, 10%of the entire holding area shall be reserved as recreational open space which shall as far as possible be provided in one place. In case of land admeasuring more than 0.8 Ha., recreational open space may be allowed to be left at different locations in the same layout, provided that the size and other dimensions conform to the provisions herein below.

In case of development of land for educational purpose, 40% of the gross area (or as decided by the Government from time to time) shall be earmarked for playground which shall be inclusive of 10% recreational open space. Notwithstanding anything contained in this rule, the shape and location of such open space shall be such that it can be properly used as playground.

Boel

Provided that, the above-mentioned area of 0.4 Ha. shall be measured with reference to original holding as on 11th January 1967 and not with reference to sub-divided holding in revenue / city survey record thereafter without the permission under the Maharashtra Regional & Town Planning Act, 1966. If such sub-divided holding in revenue/city survey record admeasures less than 0.4, then 10% open space shall be left which shall not be in any case less than 250 sq.mt., in such cases.

Provided further that, in case of lands declared surplus or retainable under Urban Land (C & R) Act, 1976, if the entire retainable holding or entire surplus holding independently admeasures 0.4 Ha., or more, then 10 percent recreational open space shall be necessary in respective holding.

Provided further that such recreational open space shall also be necessary for group housing scheme or campus/ cluster planning for any use / zone.

Provided further that, no such open space shall be necessary in case of layout or subdivision of plots from already sanctioned layout by the Authority where the requisite recreational open space has already been left in the sanctioned layout.

Provided further that no such open space shall be necessary for development of the reservations in the development plans designated for the purpose other than residential.

- 13.3.2** The owner shall have to give an undertaking that the recreational open space shall be for the common use of all the residents or occupants of the layout / building unit.
- a) On sanction of the development permission, the recreational open space shall deem to have vested in the society / association of the residents / occupants except otherwise specified. In case such society or association is to be formed, the owner shall give undertaking to the Municipal Commissioner that he will transfer the recreational open space to the society/ association whenever it is formed. The recreational open space shall not be sold to any other person and it shall not be put to any other user except for the common use of residents/ occupants as mentioned in Regulation No.13.3.8
- b) If the authority is convinced that there is misuse of open spaces; in such case the authority shall take over the land of recreational open space.
- 13.3.3** No permission shall be granted to delete / reduce open spaces of the existing sanctioned layout / subdivision. However, while revising the layout, such recreational open space may be rearranged without decrease in area subject to minimum prescribed area under these Regulations with the consent of plot / tenement holders / co-owners; but such revision of recreational open space area shall ordinarily not be allowed after a period of 4 years from the first sanction.
- 13.3.4** The open spaces shall be exclusive of means of accesses / internal roads / designations or reservations in development plan roads and areas for road widening.
- 13.3.5** No such recreational open spaces shall admeasure less than 400 sq. m. and for sub-divided holding less than 0.4 hect. mentioned in Regulation No.13.3.1, it shall not be less than 250 sq.m.
- 13.3.6** Such recreational open space may be allowed to be left in green belt area shown on the development plan excluding 18 mt. width along Godavari river & 15 mt. along other rivers out of green belt area or out of goda park, provided, such recreational space meets the requirements as per these regulations. However, no construction as per Regulation No.13.3.8 shall be allowed in such open space except as provided in Regulation No.14.7.
- 13.3.7 Minimum dimensions** -The minimum dimensions of such recreational open space shall be not less than 10m. and if the average width of such recreational open space is less than 20m. the length

Beh

thereof shall not exceed 2 ½ times the average width.

13.3.8 If required, structure and uses which can be permitted free of FSI in the recreational open spaces shall be as under:

- 1) There shall be two storeyed structure with maximum 15% built up area of recreational open space, out of which 10% built up area shall be allowed on ground floor and remaining 5% can be permitted on 1st floor. In case of stilt, additional floor may be allowed.
- 2) The structures used for the purpose of pavilion or gymnasium or club house or vipashyana and yoga center or crèche or kindergarten or library or water tank, health out post if required by the Authority or other structures for the purpose of sports and recreation activity may be permitted.
- 3) No detached toilet block shall be permitted.
- 4) A swimming pool may also be permitted in such a recreational open space. The ownership of such structures and other appurtenant users shall vest in all the owners on account of whose cumulative holdings, the recreational open space is required to be kept in the land.
- 5) The proposal for the construction of such structure should come as a proposal from the owner/s, owners' society / societies or federation of owners' societies and shall be meant for the beneficial use of the owners / members of such society / societies / federation of societies.
- 6) Such structure shall not be used for any other purpose, except for recreational activity.
- 7) The remaining area of the recreational open space shall be kept open to sky and properly accessible to all members as a place of recreation, garden or a playground.
- 8) The owners' society / societies, the federation of the owners' societies shall submit to the Authority, a registered undertaking agreeing to the conditions in (5) to (7) above while obtaining permission for the above said construction.

13.3.9 Every plot meant for a recreational open space shall have an independent means of access. In case of group housing scheme, if such recreational open space is surrounded by buildings and is meant for use by the occupants of those buildings, then independent means of access may not be insisted.

13.4 PROVISION FOR AMENITY SPACE

In any layout or development proposal, amenity space as given below shall be provided while granting permission to the layout / development proposal. This amenity space shall be handed over to the authority at the time of final approval to the layout / development permission.

Sr. No.	Area under permission	Area allocation for amenity space
1	0 to 1.0 hectare	12%
2	Above 1.0 to 5.0 hectare	10% subject to minimum of sr.no.1
3	Above 5.0 hectare	8% subject to minimum of sr.no.2

This amenity space shall be deemed to be a reservation in development plan and Floor Space Index (FSI) in lieu thereof may be made available in-situ (on remaining land). The calculation of this in-situ FSI shall be shown on the layout / building plan. If the owner desires to have TDR against it, instead of in-situ FSI, then he may be awarded TDR.

The generation of TDR or in-situ FSI shall be equivalent to the quantum mentioned in TDR Regulation No.22. Further, the utilisation of in-situ FSI only, may exceed the limits mentioned in Regulation No.15.4.

Rede

Provided that, if there is any development plan reservation except D. P. road or road widening, then area of such reservations shall be adjusted against this amenity space and the owner of the said land shall not be required to part with the area for the amenity space to that extent. However, such area under reservation shall be handed over to the planning authority at the time of final approval of the development proposal.

Provided further that, the Commissioner shall ensure that amenity space shall be earmarked in the layout in such a way that after amalgamating the amenity spaces in the adjacent layouts, it becomes larger in area, and is approachable by minimum 12 m. wide road.

Provided further that, if the amenity space is less than 200 sq. m. in area and not suitable for creation of amenity, then, Municipal Commissioner may instead of open land insist for amenity space in the form of built up area equal to 50% of amenity space as mentioned in table under Regulation No. 13.4 this built up amenity space preferable on ground floor.

Provided further that, this regulation shall not be applicable to Regulation No 14.5.(v), wherein separate provision for land for public amenities / utilities is made.

Provided further that, this regulation shall not be applicable where entire development permission is for amenities specified in definition of amenity space.

Provided further that this regulation shall not be applicable for revision of earlier sanctioned development permissions granted under the regulation in force prior to these regulation where no such amenity space is provided in earlier sanctioned development permission.

13.4.1 Development of Amenity Spaces

Development of amenity space shall be carried out by the Authority, or the owner may be allowed to develop the same for the amenities as per priorities mentioned here in below, if allowed to do so by the Municipal Commissioner.

1. The priority for development of particular amenity may be decided by the Municipal Commissioner.
2. If the Municipal Commissioner is of the opinion that the amenity space is required for Playground, Garden, Park, Municipal Primary School, Municipal High School, Municipal Hospital/Dispensary, Fire Brigade Station, Police Station, Electric Sub Station and such other services, then, such amenity space shall be handed over to the Municipal Corporation & Municipal Corporation shall develop the same for the said purpose.

If the Municipal Commissioner is of the opinion that the amenity space is not required for above mentioned purposes then on satisfaction that the proposal is in public interest he may allow the owner to develop the same for the amenities mentioned in this regulation. However, building plan for development of such amenity shall be approved along with the regular proposal of development on the land and the development of such amenity shall be carried out simultaneously with of development on owner's land. At any point of time, if it is observed that there is breach of condition, the development permission of the entire land shall be revoked by the Municipal Commissioner. The agreement to above effect shall be executed and also condition to that effect shall be incorporated in commencement letter. The owner shall not be entitled for any FSI/TDR when he is allowed to develop the amenity space.

After construction of the amenity, it shall be the responsibility of the owner to maintain the amenity and make it available for the use by the public, on reasonable charges. This shall be the part of agreement to be executed between the Municipal Commissioner and the owner.

Wherever, after construction of amenity, if is to be handed over to the Municipal Corporation free of cost as per agreement, then, the owner shall be entitled for the TDR as mentioned in Regulation No.22.0.

Beh

3. Any other use not mentioned in these regulations may be allowed to be developed by the Municipal Commissioner in consultation with the Joint Director, Town Planning, Nashik Division.

13.5 DEVELOPMENT OF AMENITY SPACES IN EARLIER SANCTIONED LAYOUT

The amenity spaces which are earmarked in the layout tentatively or finally sanctioned earlier and not developed so far, may also be allowed to be developed for any of the uses mentioned in these regulation.

13.6 PROVISION FOR ELECTRIC SUB-STATION

In case of development/re-development of any land, building or premises mentioned below, provision for electric sub-stations may be made as under, if the requirement for the same is considered necessary by the concerned power supply authority.

Sr. No.	Plot Area	Maximum requirements
1	Plot above 2000 sq.m.	One single transformer sub-station of the size of 5m.x5m. and height of not more than 5m.
2	Layout or sub-division of a plot measuring 2.0 ha. or more.	A suitable site for an electric sub-station (11kv/33kv/110kv.) as decided by the Commissioner.

Provided that the sub-station is constructed in such a manner that it is away from main building at a distance of atleast 3 mt. and in general does not affect the required side marginal distances or prescribed width or internal access or larger open space or as may be decided by the Commissioner.

13.7 PROVISION FOR INCLUSIVE HOUSING

1) (a) For the sub-division or layout of the land admeasuring 4000 sq. mt. or more for residential purpose, minimum 20% of the net plot area shall have to be provided---

i) either in the form of developed plots of 30 to 50 sq. mt. size for Economically Weaker Sections/Low Income Groups (EWS/LIG), (hereinafter referred to as "affordable plots") in which plots of 30 sq.mt. size shall be kept for EWS.

or

ii) in the form of equivalent 20% net plot area for constructing EWS/LIG tenements, which area shall be handed over to MHADA at the land rate prescribed in the Annual Statement of Rates prepared by the Inspector General of Registration, Maharashtra State, Pune (hereinafter referred to as ASR) of the year in which final approval is accorded to such sub-division or layout.

Provided that the equivalent affordable Housing Plots or 20% plot area can also be provided at some other location (s) within the same Administrative Ward of the Municipal Corporation.

b) The Landowner/Developer shall sell the affordable plots to MHADA at one place in lieu of equivalent FSI to be utilized in the remaining plots. If MHADA declines to purchase the same within a reasonable time of six months, he can sell the affordable plots in the open market, in such case additional FSI of affordable plots shall not be admissible.

Provided that in case the Land Owner/Developer desires not to utilize such additional FSI in the same land, fully or partly, then he shall be awarded TDR in lieu of such unutilized additional FSI. The utilization of this TDR shall be subject to the prevailing provisions of DCR and as per the following formula :-

Abel

$$\text{Formula: } X = \frac{R_g}{R_r} \times Y$$

Where, X = Utilisation of Development Right (DR) on the receiving plot.

R_g = Land Rate in Rs. Per Sq. m. as per the Annual Schedule of Rates (hereinafter referred to as 'ASR') of generating plot in the year when project is sanctioned.

R_r = Land Rate in Rs. Per Sq.m. as per ASR of the receiving plot of the same year of generating plot.

Y = Unutilized additional FSI.

2) For a plot of land, admeasuring 4000 sq.mt. or more to be developed for a Housing Scheme consisting of one or more buildings (hereinafter referred to as 'the said Scheme'), EWS/LIG Housing in the form of tenements of size ranging between 30 to 50 Sq.mt., (hereinafter referred to as 'affordable housing tenements') shall be constructed at least to the extent of 20% of the basic zonal FSI, subject to the following conditions:-

- a) The built up area of the EWS/LIG tenements constructed under the Scheme shall not be counted towards FSI.
- b) The Landowner/Developer shall construct the stock of the affordable housing tenements in the same plot and the Planning Authority shall ensure that the Occupation Certificate for the rest of the development under the said Scheme is not issued till the Occupation Certificate is issued for the Affordable Housing tenements under the said Scheme.

Provided further that the equivalent Affordable Housing tenements can also be provided at some other location(s) within the same Administrative Ward of the Municipal Corporation and such construction shall be free of FSI upto the limit of 50% of the admissible FSI of such alternative plot.

- c) The completion of the Affordable Housing tenements under the said Scheme, along with necessary particulars, including a copy of the Occupation Certificate granted by the Planning Authority in respect thereof, shall be immediately intimated by the Landowner / Developer to MHADA. Upon such intimation, MHADA, within a period of six months from the date of receipt of such intimation, shall either purchase such affordable housing tenements or allot such tenements to the allottees selected by MHADA through a system of lottery, drawn after such Affordable Housing tenements have been granted Occupation Certificate and thereafter, the Land Owner/Developer shall dispose of such tenements to MHADA or such allottees, as the case may be, at rates equal to 125% of the construction rates in the ASR applicable to the land under the Scheme, on the date of grant of Occupation Certificate to such Affordable Housing tenements.

Provided that there shall be no obligation to construct affordable Housing tenements in the redevelopment project of any co-operative Housing Society in which the carpet area of existing individual residential tenements does not exceed 80 sq. mtr.

Provided further that in case of individual bungalow Housing Scheme, these provisions shall not apply in case of redevelopment of individual bungalow. However, if redevelopment for total plot under layout is proposed, these provisions shall be applicable.

- d) The Landowner/Developer may also be permitted to utilize 1/4th of the total 20% FSI earmarked for Affordable Housing towards construction of Affordable Housing Tenements in the form of service quarters on the same plot but in a separate block which shall have to be sold as service quarters only to the purchasers of free sale flats under the said Scheme.
- e) There shall be no obligation to construct affordable housing tenements in accordance with these provisions in any Housing Scheme or residential development project wherein, owing to the relevant provisions of the Development Control Regulations, 20% or more of the basic

Beh

zonal FSI is required to be utilized towards construction of residential tenements for the EWS / LIG and also for the development / redevelopment of any land owned by the Government or any Semi-Government organization, Provided such development / redevelopment is undertaken by the Government or such Semi-Government organization. by itself or through any other agency under BOT or PPP model.

Provided that in case of development of reservation for Public Housing, Housing the Dishoused, Public Housing/ High Density Housing and the EWS/LIG tenements constructed under the provisions of any other Act, these provisions shall not be applicable.

- 3) Amalgamation of affordable plots/affordable tenements shall not be allowed.
- 4) These provisions shall be applicable prospectively and shall not be applicable to any Housing Scheme or residential development project wherein Commencement Certificate had been issued prior to the date of coming into force of these provisions and was valid on such date.

13.8 PLOT AREA, PLOT WIDTH FOR VARIOUS USES:

Minimum plot areas and widths for various uses shall be as given below in the **Table No. 5.**

Table No 5				
MINIMUM PLOT AREA, MINIMUM WIDTH, FOR VARIOUS USES				
Sr. No.	Uses	Plot area (in sq.m.)	Min. Plot Width	Type of Development
(1)	(2)	(3)	(4)	(5)
1	Residential and Commercial (except those in 2,3 & 4 below)	i) 30 and above but upto 125	As per Table No. 7	Row
		ii) Above 100 but less than 250		Semi-detached/ Detached
		iii) 250 & above		Detached
2	Plots in EWS Housing / High Density Housing / Sites and Services / Slum Up gradation / Reconstruction Scheme by public authority.	20 and above but upto 125	As per Table No. 7	Row
3	Petrol Filling station-			
	(a) Without service bay	510	16.75 m	Detached
	(b) With service bay	1100	30.5 m	Detached.
4.	Industrial	300	10 m	Detached.
Note : in case of sr.no.1, pattern of development permissible within a plot shall be shown in dotted line while approving the layout. However change in pattern may be permitted in future, if it fits in to above pattern of development and does not disturb the overall pattern of development already approved.				

13.9 NET PLOT AREA AND COMPUTATION OF FSI

For the purpose of computing FSI/Built-up area, the net area of the plot shall be as under.

- i) In case of a plotted layout/sub-division /group housing scheme / any development, net area

Asch

shall be the gross plot area, after deducting, the area covered by amenity space under Regulation No 13.4, Development Plan proposals, if any.

- ii) For the purpose of computation of FSI/built up area the net area of the plot shall be considered.
- iii) In case of plotted layout, FSI of such net area shall be distributed on all plots on prorata basis.
- iv) In case of plots from already approved layouts, the plot area shall be treated as net plot area.
- v) The above regulations in respect of net plot area and computation of FSI shall apply to proposals in all land use zones.

Illustration showing calculations as per above provisions for layouts in Residential Zone.

a) Area Statement-

A	AREA STATEMENT	AREA
1.	Area of land (Minimum area of a, b, c to be considered)	30000
	a) As per ownership document (7/12, CTS extract)	30,000
	b) as per measurement sheet	30,050
	c) as per site	30,010
2.	Deductions for	
	(a) Proposed D.P. road / D.P. road widening area	4000
	(b) Any D.P. Reservation area	5000
	(Total a+b)	9000
3.	Gross Area of Plot (1-2)	21000
4.	Recreational Open space	
	(a) Required	2100
	(b) Proposed	2105
5.	Amenity Space -	
	(a) Required - (say 10%)	2100
	(b) Proposed -	2100
6.	Service road and Highway widening	--
7.	Internal Road area	3400
8.	Area under layout plots	13395
9.	Net area of plots for FSI Calculations = (3-5b) i.e.(21000-2100)	18900
10.	Pro-rata FSI factor for layout plots = (9/8)	1.410

b) Distribution of FSI on each plot

Plot no.	Plot area (sq.m.)	Roundin g area of Road (if any) (sq.m.)	Remaining Plot area (b-c) (sq.m.)	Built up area on pro-rata basis i.e. (d x Pro-rata FSI factor) i.e. d x 1.410	Front Road width (m.)	Permissibl e basic FSI	Permissible Built-up area on basic FSI (e x g) (sq.m.)
(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)
1.	10 x 15	--	150	211.50	9	1.1	232.65

Bel

Note 1 : If FSI of development plan proposal/ amenity space is proposed to be utilised in the same land, then while calculating the pro-rata factor, area of such development plan proposal/FSI of amenity space shall be added to serial no.9. This area to be added shall be equivalent to the entitlement for TDR.

Note 2 : The area worked above on the basis of prorata calculations shall correspond to basic FSI of 1.10 for all other purposes like, limit of premium/ TDR, etc.

Note 3: The FSI against the plot(s) to be handed over against the inclusive housing required under Regulation No.13.7 shall be utilised as desired by the owner on plots in the same layout, subject to other stipulations mentioned in this DCPR.

13.10 TRANSFER OF DP SITES (OTHER THAN DP ROAD) IN LIEU OF FSI

If in any development proposal, owner desires to hand over the reserved site to the Planning Authority and the Commissioner agrees for taking over such reserved site, then FSI of such reserved site equivalent to the TDR may be allowed to be utilized on the remaining land. The utilisation of this in-situ FSI only, may exceed the maximum limit specified in Regulation No.15.4. Transfer deed to that effect shall be executed and FSI calculation shall be mentioned on the plans of development proposal. In case of plotted layout, distribution of FSI of plots in pursuance of such transfer shall be as desired by the owner and may differ from plot to plot. If some FSI remains unutilized, the owner shall be entitled for TDR against the remaining FSI.

13.11 RELOCATION OF DP SITES/DP PROPOSALS

If the land proposed to be laid out for any development is affected by any reservations for public purposes, the authority may agree to adjust the location of such reservation to suit development without altering the area of such reservation. Provided that no such shifting of the reservations shall be permitted

- (a) If the reservation proposed to be relocated is in parts;
- (b) Beyond 300 mts. of the location in the Development Plan;
- (c) Beyond the same holding of the owner in which such reservation is located;
- (d) Unless the alternative location and size is at least similar to the location and size of the Development Plan as regards access, levels, etc.;
- (e) Unless the relocation is within area covered by the layout or development permission under sanction; and
- (f) If the land is reserved in view of its geographical location like Bio-Diversity Proposal, Nalla training reservation etc.
- (g) if the reservation is already shifted under these regulations.

Provided that relocation of the reservation from a land may also be permitted on any land within 500 meters belonging to other owner's land if the other owner consents to such relocation of reservation on his land and consents to hand over his land to the Planning Authority in lieu of TDR subject to conditions mentioned in sub Regulation No. (a)(d)(f) and (g) above.

All such relocation of the reservations / alignment of roads shall be reported by the Municipal Commissioner to the Government under intimation to the Director of Town planning, at the time of sanctioning the development permission. The Development Plan shall be deemed to be modified to that extent.

Provided further that, the width of Development Plan roads shown along the Municipal Corporation Boundary shall be inclusive of road width, if available, in sanctioned layout or existed

Beh

on site in Regional Plan area. However, straight road alignment shall be achieved.

13.12 AMALGAMATION OF PLOTS

- 13.12.1** Amalgamation of plots shall be permissible if they form a sizable plot from planning point of view and are contiguous.
- 13.12.2** a) Amalgamation of plot having incompatible zoning in development plan shall not be allowed.
b) Amalgamation of plot which is not desirable from planning point of view (eg. as shown in below) shall not be permitted.

These plots shall not be amalgamated.

This plots shall not be amalgamated.

Beck

PART III
LAND USE CLASSIFICATION AND PERMISSIBLE USES.

14.0 GENERAL

- (1) In case of Development / re-development of any land, building or premises, the intended use shall conform to the use of zones, purpose of designation, allocation or reservation, as the case may be, unless specified otherwise.
- (2) **Reservations lapsed under section 127 of the Act.** – If the reservation in the earlier sanctioned development plan is lapsed in pursuance of notice under section 127 of Maharashtra Regional and Town Planning Act, 1966, then the corresponding reservation shall stand lapsed in this revised development plan to the extent of area covered in the said notice. The Municipal Commissioner shall take decision on such matters.
- (3) **Lawful existing non-conforming uses** - Any lawful non-conforming use of premises existing prior to the date of enforcement of these regulations, shall continue and may be allowed to be expanded within the holding at the time of original sanction and that when a building, containing non-conforming use is pulled down or has fallen down, the use of the new building shall be in conformity with these Regulations or with lawful existing use.
- (4) **Discontinuance of zoning in pursuance of existing use** – If any land is shown in zone like Public Semi-public, public utility, because of the activity existed there-on; such lands shall be deemed to have been shown in the adjoining predominant zone after such activity ceases to exist.
- (5) **Existing features shown on development plan** – The existing features shown on development plan are indicative and stand modified on development plan as per actual position. Mention of particular use on development plan, shall not bar the owner from permission allowed in the zone shown for such land. Also, boundaries of s. no., alignment of existing road / nalla and other physical features of land shall be as per measurement plan of Land Records Department, and the land unaffected by such physical features shall be allowed to be developed for the uses permissible under the adjoining predominant land use zone.
- (6) **Development of Parking** – The Municipal Commissioner may develop any area for public parking underground or above ground irrespective of its existing use or proposed use in development plan.

The different land use classification & different uses permissible in that land use are given below.

14.1 PURELY RESIDENTIAL ZONE - R 1

(Plot abutting on roads below 9 m. in core area and below 12 m. width in outside core area.)

14.1.1 The following uses and accessory uses to the principal use shall be permitted in buildings or premises in purely Residential Zone subject to other regulations:

- (i) Any residences.
- (ii) Customary Home occupation, i.e. occupations customarily carried out by the members of household without employing hired labour and shall include stitching, embroidery, Beauty Parlour, etc, with or without motive power. If motive power is used, the total electricity load should not exceed 1 H. P.
- (iii) Medical and Dental Practitioner's Dispensaries including pathological laboratory, diagnostic clinics, polyclinics, to be permitted on any floor. However, in case of mixed use, maternity

Rach

homes, clinics, nursing home with indoor patients with separate means of access of staircase from within the building or outside, but not within the prescribed marginal distances. The built up area for such use shall not exceed 500 sq.m.

- (iv) Professional Offices in residential tenement for own purpose not exceeding carpet area of 50 sq. m. each.
- (v) Community halls, welfare center, gymnasias (each not exceeding 100 sq.m.)
- (vi) Primary and nursery schools including students' hostels except trade schools.
- (vii) Religious buildings.
- (viii) Public Libraries and Museums in independent structures.
- (ix) Club Houses in residential complexes,
- (x) Parks and Playgrounds not being used for business purpose.
- (xi) Bus shelters, Taxi-Rickshaw stands.
- (xii) Convenience shops not more than 20 sq.m. each, up to 10% of permissible built up area, such as ration shops, chemist shop, pan shops, dhobi/ dry cleaning shops, darners, tailors, groceries, confectionary and other general provisions, hair dressing Saloon and beauty parlour, bicycle hire and repair; shoe repair, umbrella repair, vegetable & fruit stalls, milk shops, dispensaries, floweriest, bangles and other articles needed by women, small bakeries, newspaper stalls, tea and breakfast stalls, ATM, etc.
- (xiii) Police chowky, telephone exchanges, government and municipal sub -offices, post and telegraph offices, branch offices of banks with safe deposit vaults, electrical sub-stations, fire station, civil defence and home guard warden posts, first aid posts, municipal bit offices, pumping stations and water installations and ancillary structures thereof required to cater to the local area.
- (xiv) Information technology establishment (ITE) (pertaining to software only) on the plots/ premises fronting on roads having width 9.00 m. and above.
- (xv) Flour mill and wet / dry masala grinding / book binding subject to following conditions:
 - (a) It is located on ground floor.
 - (b) Adequate care has been taken in structural design.
 - (c) It does not cause any nuisance to the neighbour and residents of upper floor.
 - (d) Power requirement does not exceed 10 hp.
- (xvi) Roads, bridge, culverts and construction for any mode of transportation.
- (xvii) Burial grounds, cremation grounds and essential public utilities on a road having width 9 m. and above.
- (xviii) Raisin production.
- (xix) Agricultural, horticultural and allied uses (except agro-based industries).
- (xx) Public conveniences.

14.2 RESIDENTIAL ZONE R-2

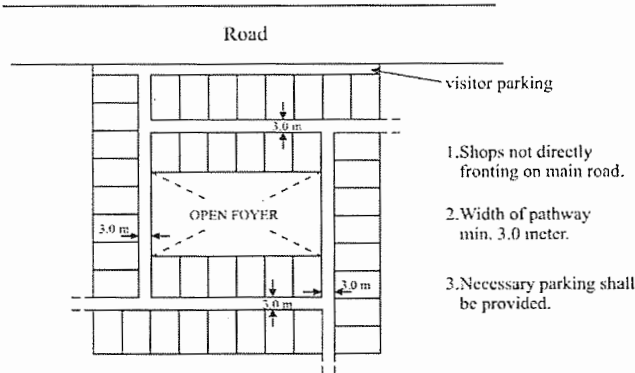

(Residential plots abutting on road having width 9 m. and above in core area and 12 m. and above in outside core area)

14.2.1 In this zone the following uses, mix uses may be permitted:

- (i) i) All Uses permitted in R1 zone shall be permitted in R 2 zone.

- ii) All uses or mix uses may be permitted irrespective of restriction on floor or area except uses at sr.no. 14.5(ii), 14.6(vii), 14.6(ix), 14.6(xix), 14.6(xxii), 14.6 (xxvii) to 14.6 (xxxii) and like.
- iii) A pedestrianised shopping precinct on ground floor only may be allowed subject to the condition that no shop in such pedestrianised precinct shall be allowed to open directly on the road in front. The minimum width of pedestrian way provided shall be 3 m. clear of all steps or projections and bollards shall be placed at the entrance of such pedestrian passage to prevent entry of vehicles provided further that satisfactory arrangements for natural or artificial ventilation are made as may be directed by the Municipal Commissioner.

- iv) The following uses shall be permitted in independent premises / building:
- a) Bulk storage and sale of kerosene in separate godowns confirming to the existing regulations of Chief Controller of Explosives, Government of India provided further that the applicant shall make adequate fire-fighting arrangements at his cost in his plot to the entire satisfaction of the Municipal Commissioner.
- b) Storage and sale of LPG in cylinders in a separate godown confirming to the existing regulations of Chief Controller of Explosives, Government of India provided further that the applicant shall make adequate firefighting arrangements at his cost in his plot to the entire satisfaction of the Municipal Commissioner.
- c) **Service Industries** - The Service Industries may be permitted in one or more independent plot in R2 and Commercial zones along with the limitation of area, maximum number of persons to be employed, maximum permissible power requirement and the special conditions if any as given in **Table No. 6** for service industries.

Table No.6
SCHEDULE FOR SERVICE INDUSTRIES

Sr. No.	Category of Industry	Service Industry Class -A (Permitted in R2 and C) Criteria for Classification and special conditions.				Special Conditions if any
		Power requirement (in H.P.)	Employment (in persons)	Floor area (in sq. m.)	Maximum Permissible

47.	Repair of watch, clock and jewellery	3	9	50	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
48.	Manufacture of sports and athletic goods	-	-	-	Not permissible
49.	Manufacture of Musical instruments and its repair.	3	9	50	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.
50	Mass manufacture of miscellaneous Products such as costume, jewellery, costume novelties, feather, plumes, artificial flowers, brooms, brushes, lamp shades, tobacco pipes, cigarette holders, ivory goods, bandages, wigs and similar articles.	-	-	-	Not permissible
51.	(a) Repairs of locks, stoves, umbrellas, sewing machines, gas burners, buckets & other sundry household equipment.	3	9	50	Operation shall be permitted only between 8.00 hrs. to 20.00 hrs.

DCPR-2015 FOR NASHIK MUNICIPAL CORPORATION

	(b) Optical glass grinding and repairs	3	9	50	
52.	Petrol filling stations	10	9	(i) 30.5x16.75m. (ii) 36.5x30.5m	Plot size - without service bay Plot size - with service bay
53.	Laundries, Laundry service and cleaning, dyeing, bleaching and dry cleaning.	5	9	50	(i) Cleaning & dyeing fluid used shall not have flash point lower than 138° F. (ii) Operation shall be permitted between 8.00 hrs. to 20.00 hrs. (iii) Machinery having day load capacity of 20 kg and above.
54.	Photo processing laboratories.	5	9	50	Operation shall be permitted between 8.00 hrs. to 20.00 hrs.
55.	Electronic Industry of assembly type (and not of manufacturing type including heating load).	10	20	250	In independent structure on independent plot with special permission of the Municipal Commissioner
56.	Bio-technology Unit	--	--	--	As per Regulation no.23.8
57.	Information Technology Unit	--	--	--	As per Regulation no.23.9

Note:- The service industries which are specified as 'Not Permissible' in column of Special Conditions, may be permitted subject to restriction on power requirement, employment, floor area as may be decided by the district authorities of the Industries Department.

14.3 FUTURE URBANIZABLE ZONE

In this zone, all uses permissible in residential zone may be allowed subject to fulfillment of following requirements

- i) For extending offsite infrastructure like road, water supply, sewage line, electricity, to the land, the expenses shall be borne by the owner and shall be deposited with the Municipal Corporation as per the expenses communicated by it. The owner shall have liberty to construct such infrastructure at his own cost, as per the drawing, design and specification approved by the Municipal Commissioner.
- ii) If the land is located on development plan road of width more than 18 m. then construction of road of width upto 18 m. to his land, shall be the liability of the owner. Else 12m. wide road with asphaltting, shall be necessary.

14.4 COMMERCIAL ZONE

In commercial zones, buildings or premises shall be used for the uses and purposes given below, provided all goods offered for sale shall be displayed within the building, excluding passages.

- i) Any use permitted in residential zone without area and floor restrictions.
- ii) Uses permissible in Public Semi-public Zone.
- iii) Public utility buildings.
- iv) Whole-sale establishments with storage area, subject to fire protection requirements and any commercial use.

14.5 INDUSTRIAL ZONE

Industries shall include any building or part of a building or structure, in which products or materials of all kinds and properties are fabricated, assembled or processed, for example assembly plants, laboratories, dry cleaning plants, power plants, pumping station; smoke houses, laundries, gas plants, refineries, dairies and saw - mills.

The following users shall be permissible in Industrial Zone.

- i) The service industries as given in Table No.6
- ii) Any industry / industries may be permitted only with the special permission of the Municipal Commissioner who may grant it after such scrutiny as may be necessary to ensure that the location is appropriate and is not likely to cause nuisance and hazard to adjoining owners. Before granting any such permission, the Municipal Commissioner may prescribe special conditions about minimum size of plot and minimum buffer open distance from the industrial building/ industrial use to residential or habitable zone/ use, which shall not however be less than 23 m.
- iii) Building or premises in industrial zone may be used for any industrial as well as accessory uses like banks, canteens, welfare centre and such other common purposes considered necessary for the industrial workers, quarters of watchmen, caretakers or other essential staff required to be maintained on the premises. Such residential/commercial/other uses may be permitted up to 25% of the permissible FSI.
- iv) Following uses may also be permitted:
 - (a) Parking lots.
 - (b) Building of public utility concerns.
 - (c) The branches of Scheduled Banks.

Reh

- (d) Residential Hotels, Restaurants.
- (e) Shopping center, malls.
- (f) Storage Buildings.
- (g) Drive-in -Theaters, cinema or theaters, subject to provision of provision of the Bombay Cinemas (Regulation) Act, 1953.
- (h) Highway amenities as permitted in Agriculture zone with full FSI.

v) Allowing Residential / Commercial User In Industrial Zone:- (Conversion of Industrial Zone to Residential Zone):

a) With previous approval of Municipal Commissioner in consultation with the Divisional Head of concerned division of the Town Planning Directorate and on such conditions as deemed appropriate by him, The existing or newly built-up area of Industrial unit, in the Industrial zone may be permitted to be utilised for residential or commercial purposes.

b) With the previous approval of the Municipal Commissioner, in consultation with the Divisional Head of Town Planning Directorate, The lands in the Industrial Zone including lands in industrial zone in Town Planning Scheme area, may be utilised for any of the permissible users in the Residential and Commercial Zone subject to the following conditions :

i) Such user shall be allowed only on payments of **Premium** at the rate **20 %** of the land value arrived as per Annual Statement of rates (without considering the guidelines therein) of the respective year.

ii) The Residential/ Commercial user in respect of industries which are not in operation shall not be permitted unless NOC from Labour Commissioner, Maharashtra State, Mumbai stating that all legal dues have been paid to the workers or satisfactory arrangement between management and workers have been made, is obtained. However, in respect of any open land in the Industrial Zone where industry never existed, NOC from Labour Commissioner shall not be required.

iii) In the layout or sub-division of such land admeasuring upto 2 Ha., 10% land for public utilities and amenities, like electric sub-station, bus-station, sub-post office, police out-post and such other amenities/utilities as may be considered necessary shall be provided.

iv) In such layouts of sub-division having area more than 2 Ha. and upto 5 hect, 20% land shall be provided for public utilities and amenities like electric sub-station, bus-station, sub-post office, police out-post, garden, playground, school, dispensary and such other amenities/utilities as may be considered necessary.

v) In such layout or sub division each more than 5Ha. in area, 25% land for public utilities and amenities like electric, sub-station, bus-station, sub-post office, police out post, garden, playground, school dispensary and such other amenities shall be provided.

vi) With the special written permission of the Municipal Commissioner, The land having area up to 0.20 hectare in size which are allocated for industrial use may be permitted to be used for Residential purpose or any other permissible users in Residential Zone. Provided that, in such case the owner / developer shall require to provide either by providing 10% amenity space in the form of open land or 5% built up space in the proposed construction at appropriate location preferably on ground floor. Provided that, amenity TDR as per regulation containing provisions of TDR, shall be permissible.

vii) The land under public utility / amenity shall be handed over to the Planning Authority in lieu of FSI / TDR with proper access and basic land development. These areas will be in addition to the recreational space as required to be provided under these regulations.

Provided that, at least 50% of total land provided for public amenity/ utility space shall be

Boch

reserved for unbuildable purposes such as garden, recreational ground, etc.

Provided also that irrespective of land use zone, where the provisions of Development Control Regulations provide for amenity Space in Residential area which is more than what is stipulated in these regulations, then Amenity Space which is more shall only be provided.

c) The required segregating distance between Industrial Zone and the area over which Residential use is permitted under this regulation, shall be provided within such land intended to be used for residential or commercial purpose.

d) Such residential or local commercial development shall be allowed within the permissible FSI of the nearby Residential or Commercial Zone.

e) Provision for Amenity Spaces shall be considered to be reservations in the Development Plan and Transferable Development Rights against such amenity as per Regulation No.22 may be given or FSI of the same equivalent to the TDR quantum shall be available for utilisation on the remaining land. Moreover, the owner shall be entitled to develop remaining land with permissible TDR potential including the land under amenity space subject to maximum permissible limit of FSI (Maximum Building Potential) as mentioned in Regulation No.15.4.

provided that,

i) Residential/Commercial user may be allowed on the part area of the land holding subject to the condition that total area of the entire land holding shall be considered for deciding the percentage of the land to be reserved for public amenity/ utility spaces, as per these regulations.

ii) If Development Plan Reservations (excluding DP Road/Road widening) are in the land under I to R conversions, then such reservation may be adjusted in amenity space as mention in following manner.

a) If the area under development plan reservation is less than the required area of public amenity space as per the said regulation, then only the difference between the area shall be provided for public amenity spaces.

b) If the area under development plan reservation is more than the required area of public amenity spaces as per the said regulation, then the area for public amenity spaces shall be provided equal to Development Plan reservation area.

iii) Out of the total area proposed to be utilised for residential development, 20% of the same shall be built for residential tenements having built up area 30 sq.mt and upto 50 sq.m. or in the plotted development, 20 % area shall be of plots upto 150 sq.m.

iv) While allowing such conversion minimum 20 % built up area shall be used for offices and commercial purpose.

v) The provision of inclusive housing as mentioned in regulation no. 13.7 shall not be applicable while allowing such conversion.

14.6 AGRICULTURAL ZONE / NO DEVELOPMENT ZONE

The following uses shall be permissible:-

- (i) All agricultural uses.
- (ii) Agriculture research and agriculture education.
- (iii) Garden, forestry, nursery, public parks, private parks; play fields, summer camps for recreation of all types.
- (iv) Golf Course and Links, Race tracks, and shooting ranges.
- (v) L.P.G. Godown subject to the following conditions-
 - a) Minimum area of the plot shall be 2000sq. m.
 - b) Maximum permissible F.S.I. shall be 0.2 of gross plot area.

Beh

- c) Only ground floor structure shall be permitted.
- d) No Objection Certificate from the Controller of Explosives and the Chief Fire Officer shall be submitted along with the proposal.
- e) Any additional condition as may be imposed by the Municipal Commissioner.
- (vi) Pottery manufacture.
- (vii) Storage and drying of fertilizer.
- (viii) Public utility establishments such as electric sub-stations, receiving stations, sewage disposal, water works alongwith residential quarters for essential staff for such works.
- (ix) Farm houses subject to following conditions:-
- (a) The land in which it is to be constructed is actually put under agricultural use.
- (b) Minimum plot area under above use shall be 0.4 Ha.
- (c) Farm house shall be permitted in accordance with the provisions of Maharashtra Land Revenue Code, 1966.
- (d) The FSI shall not exceed 0.0375 of gross plot area subject to a maximum built up area of 400 sq.m. in any case.
- (e) Only ground floor structure with or without stilt shall be permissible with 12m. margin from the boundary of land.
- (x) Swimming pools / sports and games, health clubs, cafeteria, canteen, tennis courts, etc.
- (xi) **Amusement park**, in a plot of not less than 5 ha. in area, with recreational and amusement devices like a giant wheel, roller coaster, merry-go-round or similar rides both indoor and outdoor, oceanic -park, swimming pool, magic mountain and lake, ethnic village, shops for souvenirs/citations, toys, goods, refreshments and beverages on the following conditions with the special permission of the Municipal Commissioner.
- a. The required infrastructure, like proper and adequate access to the park, water supply, sanitation, conservancy services, sewage disposal and adequate off-street parking will have to be provided and maintained by the promoters of the project at their cost and to the satisfaction of the Planning Authority Municipal Commissioner.
- b. The promoters of the project shall provide adequate facilities for collection and disposal of garbage at their cost, and to the satisfaction of the Municipal Commissioner and will keep, at all times, the entire environment clean, neat and hygienic.
- c. Structures for indoor rides and ancillary activities, such as administrative offices, exhibition hall or auditorium, restaurant, hotels, open air theatre, essential staff quarters, store buildings, fast food shops, museum, souvenir and small shops, ancillary structures to swimming pool, may be permitted subject to a maximum floor space index not exceeding 0.20; i.e. FSI of 0.15 for principal activity and 0.05 for ancillary activities.
- d. Structures permitted in the amusement park (except those intended for park apparatus, entertainment such as magic mountain etc. and other equipment) should be ground floor structures, with the construction blending with the surrounding environment and landscape.
- e. Except for minor dressing, hills and natural features, if any, shall be maintained in their natural condition and beautified with planting of trees etc.
- f. All trees already growing on the land shall be preserved to the extent possible, except that if it becomes necessary to cut any tree, the required permission of the Municipal Commissioner should be obtained under the law relevant Act. At least 5 trees per 100 sq. m. shall be planted and grown within the area of the park.
- g. Sufficient parking facilities and ancillary facilities for cars, buses, transport vehicles etc. shall be provided on site as prescribed by and to the satisfaction of the Municipal

Reeb

Commissioner.

h. The promoters of the project will prepare a suitable layout with appropriate landscaping of the recreational and other facilities and obtain approval of the Municipal Commissioner.

i. No objection certificate of the Tourism Department shall be obtained.

j. The development shall be regulated according to other requirements of these and all applicable rules and Regulations and subject to all other clearances as may be required.

k. Proper arrangements for safety, Regulations of traffic approaches to the park etc. shall be made to the satisfaction of the Planning Authority and Police from the law and order and traffic aspects.

(xii) Tourism activities as specified in Regulation No.39

(xiii) Mobile Phone Towers with ancillary equipments as specified in Regulation No.36

(xiv) ITE with ancillary development subject to following conditions:

a) Total FSI shall not exceed 0.2.

b) Ancillary residential development shall not have FSI of more than 50%.

c) On 50% of plot area, trees shall be planted at the rate of 500 trees per hect.

d) Plot shall front on 12 m. wide road.

This provision shall be subject to change as per the policies decided by the Government from time to time.

(xv) Automobile Showrooms and workshops with FSI of 0.20 free of premium and further FSI upto 0.30 with the payment of premium at the rate of 30% of land rate in ASR, so that total FSI shall not exceed 0.50.

(xvi) Bus Terminus and any use related to transportation and communication.

(xvii) Research and Development Centers on following conditions:-

1. The area of land shall be minimum 10 hectare.

2. FSI permissible shall be maximum 0.20.

3. Out of the total allowable FSI, FSI for staff Quarters shall not exceed 50%.

4. Total strength of the employees shall be limited to 10 per hect.

5. On 50% of plot area, trees shall be planted at the rate of 500 trees per hect.

This provision shall be subject to change as per the policies decided by the Government from time to time.

xviii) Ancillary service industries for agriculture produce marketing and management, Ancillary service uses for agro related products like flowers, fruits, vegetables, poultry products, marine products, related collection centers, auction hall, godowns, grading services and packing units, knowledge parks, cold storages, utility services (like banking, insurance, post office services) as service industries for agriculture produce marketing on the land owned by individuals / organizations with FSI of 0.20. Additional FSI above 0.20 and up to 0.50 shall be subject to payment of premium at the rate of 30% of rate of ASR.

xix) Bio-technology unit as per stipulations given in Regulation No. 23.8 with maximum permissible FSI of 0.20.

xx) Petrol Pump/LPG Pump/CNG Pump: Petrol Pump, LPG Pump, CNG Pump shall be permissible in No Development Zone subject to following conditions:-

a) The minimum size of plot shall be,

i) 30.50 m. x 16.75 m. in the case of Petrol/LPG/CNG Filling Station with kiosk without service bay;

Bek

- ii) 36.50 m. x 30.50 m. in the case of Petrol/LPG/CNG Filling Station with service bay.
- b) Plot shall be located /fronting on National Highway, State Highway, Major District Road, Other District Road or Village Road or other road with a minimum width of 12.00 m. or more.
- c) Permission from Government of India, Petroleum Ministry and Chief Controller of Explosives shall be necessary.
- d) NOC from Public Works Department and other related departments shall be obtained as per the prevailing rules. As regards service road / building line / control line, the Government Resolution, Public Works Department, No. RBD-1081/ 871/Raste-7, dated 09 March 2001 and the circulars issued in this regard from time to time shall be observed. Instructions contained in Government of India, Ministry of Road Transport and Highways letters dated 25/09/2003 and 17/10/2003 and its enclosures as amended from time to time shall be observed.
- e) Petrol/LPG/CNG station shall not be permitted within a distance of 90 meter from junction of roads having minimum width of 12 m. each.
- f) In the case of kiosks and other buildings for sales office, snack bars etc. within the plot for Petrol/LPG/CNG filling stations, the setbacks from the boundaries shall be 4.50 m. Further the other clearances for the installations shall be as per the Petroleum Rules of 1937.
- xxi) Land fill sites, bio-gas plants, power generation from waste.
- xxi-A) Solid waste management.
- (xxii) Power generation from non-conventional sources of energy. Area covered under solar panels shall not be counted in FSI.
- (xxiii) Any educational use with FSI of 0.20 free of premium and further FSI upto 0.80 with the payment of premium at the rate of 30% of land rate in ASR, so that total FSI shall not exceed 1.0.
- xxiv) Mangal karyalaya / lawns.
- a) Minimum area for mangal karyalaya shall be 0.40 hect. with FSI of 0.50. It may be permitted along with essential guest rooms not exceeding 30% of the area of mangal karyalaya. Area for parking shall be 40% of gross area which shall be properly earmarked and bounded by bifurcating wall. FSI above 0.20 shall be subject to payment of premium at the rate 30% of land rate in ASR.
- b) Lawns for ceremony shall be 0.80 hect. with FSI of 0.20. Covered area (pandal) open on three sides shall not be counted for FSI. Area for parking shall be 40% of gross area.
- (xxv) Brick, tile manufacture.
- (xxvi) Fish Farming.
- (xxvii) Sand clay or gravel quarries.
- (xxviii) Scrap Market with FSI of Residential zone with FSI of 0.20 free of premium and further FSI upto 0.30 with the payment of premium at the rate of 30% of land rate in ASR, so that total FSI shall not exceed 0.50.
- (xxix) Mining and quarrying operations subject to stipulations mentioned in Regulation No.35.0.
- (xxx) Any industry / industries may be permitted only with the special permission of the Municipal Commissioner who may grant it after such scrutiny as may be necessary to ensure that the location is appropriate and is not likely to cause nuisance and hazard to adjoining owners. Before granting any such permission, the Municipal Commissioner may prescribe special conditions about minimum size of plot and minimum buffer open distance from the industrial

Handwritten signature

building/ industrial use to residential or habitable zone / use, which shall not however be less than 23 m. such industrial use shall be allowed FSI of 0.20 free of premium and further FSI upto 0.30 with payment of premium at the rate of 30% of land rate in ASR, so that total FSI shall not exceed 0.50.

- (xxxix) Town planning scheme for minimum 20 hector area, with proper road network subject to condition that entire cost of scheme shall be borne by the owners. After sanction of preliminary scheme under section 86 of the act. all uses as that of residential zone, shall be permitted.

However, if the owners come together for development on aforesaid concept of town planning scheme instead of undertaking town planning scheme under the Act, the Municipal Commissioner may allow such development subject to availability of existing approach road of minimum 15.0 m. width and earmarking 40% of the land for roads, park, playground, garden, social infrastructure, sale by the Corporation, which shall be handed over to the Corporation, in lieu of FSI equivalent to such area handed over to the Corporation. and the plot within such scheme shall be allowed to be developed with the development potential as given in the table under Regulation No. 15.4. However, development permission for uses permissible in residential zone, shall be granted phase wise after completion of physical infrastructure works including off site infrastructure and handing over of land to the Corporation.

- (xxxixii) **Development of Cinema and TV Film production**, shooting, editing and recording studios with its ancillary and supporting users, including construction of staff quarters, rest rooms, canteens etc. subject to the following conditions:

- a. The minimum plot area (necessarily under one ownership) shall not be less than 2 hectares.
- b. The total permissible FSI shall not exceed 0.2 on gross plot area after deducting Development Plan Road/ Reservation area if any.
- c. Out of the permissible built up area equivalent to 0.2 FSI, built up areas for ancillary and supporting users shall not exceed 1/3rd of permissible FSI
- d. The construction shall be confined to 10% of the plot and the remaining plot (excluding areas required for parking, roads etc.) shall be planted with trees at the rate of 500 trees per hectare.

- (xxxixiii) Pradhan Mantri Aawas Yojna Regulation - This entire regulation shall be as per the final decision of the Govt. in regard to the notice No. TPS-1716/VIP/76/CR 596/16/UD-13, dated 10.11.2016 under sec. 37(1AA) of M.R. & T.P. Act. in respect of stanardised DCPR for D Class Municipal Corporations.

- (xxxixiv) Residential and Institutional use subject to following conditions.

- (i) Minimum area of land shall be 10.0 hect.
- (ii) Land shall front on minimum 12 m. wide existing road.
- (iii) Basic FSI shall be 1.1
- (iv) The offsite infrastructure like road, water supply, sewerage treatment plant having zero discharge shall be developed by land owner at his own cost, unless this infrastructure is provided by Municipal Corporation or any appropriate authority.
- (v) 10% of the entire holding area shall be handed over to the Planning Authority free of cost, without any FSI/TDR and free of all encumbrances for sale by Planning Authority for residential, commercial or industrial use depending upon the nature of development. This 10% area shall be over and above recreational open space and amenity space to be provided as per regulation. This 10% area shall front on minimum 12 m. wide road.
- (vi) Premium for the gross area at the rate of 5% of the value of the land as given in the Annual statement of rates shall be paid to the Planning Authority.

Note – 1) The permissible FSI for uses mentioned above shall be 0.20, if not specified.

Beek

- 2) The buildings of Government/ Semi Government / Government Institutions bodies shall be permissible with permissible basic FSI of the Residential zone.

14.7 GREEN BELT

Following uses shall be permissible

- i) Agriculture,
- ii) Tree Plantation, Gardens, River front development, Landscaping, Recreational open space etc.
- iii) Development of pedestrian pathways, Jogging track, Cycle track, Boat club etc.
- iv) Swimming pool, club house, recreational facilities excluding 18 m. belt along river bank and subject to other provisions in these regulations.
- v) Public Toilet
- vi) Recreational open space

14.8 PUBLIC /SEMI PUBLIC ZONE.

The following uses shall be permissible:

- (i) Pre-primary Schools, Primary Schools, High Schools, Technical / Trade Schools, Colleges, Educational Complex, Hostels for students and essential staff quarters.
- (ii) Hospital, Sanatoria, Dispensary, Maternity Homes, Health Centre, Complex of such uses, Dharmashala for the visitors to patients, pilgrims and like, essential staff quarters, veterinary hospital, auditorium exhibition hall and gallery.
- (iii) Training institutions, Home for the aged, essential quarters.
- (iv) Government/ Semi -Government/ Local Self-Government offices, Court buildings, essential staff quarters and public housing by Government /Government bodies.
- (v) Post Office, Telegraph office, Telephone Exchange, Radio Station, Complex of such uses, Staff quarters and similar public /Semi-public uses.
- (vi) Library, Mangal Karyalaya, Gymnasium, Gymkhana, Water tanks, Stadium, Community hall, Religious Structures, etc.
- (vii) Commercial use upto 15% shall be permissible subject to following conditions:
 - (a) Convenience shopping, Branch of Bank, hotels etc. shall be permissible. However, shops for liquor, pan, cigarette, tobacco, lottery tickets and such other uses which do not serve public purpose, and outlets / godowns for domestic gas, kerosene shops, godowns which are dangerous to public health shall not be permitted.
 - (b) The Municipal Commissioner shall not allow sub - division of land on which such a commercial development has taken place/ would take place.
 - (c) The landowner / developer / institution shall give guarantee in writing to the Municipal Commissioner for following the stipulated conditions scrupulously.
- (viii) Petrol/LPG/CNG Pumps as per Regulation no. 15.2.2.
- (ix) Fire Station
- (x) Traffic & Transportation activities

14.9 USES PERMISSIBLE IN PROPOSED RESERVATIONS-

- 1) The uses permissible in a reserved site shall be conforming to the use for which it is reserved unless and otherwise specified. The required parking, public toilets and separate place for

Koch

garbage bins shall also be provided in the reserved site itself. Such uses may also be permitted in existing sites.

- 2) Where the Authority or the Appropriate Authority proposes to use land / building / premises reserved for one specific public purpose / purposes, partly for different public purpose / purposes, it may do so, provided that such partial use shall not exceed 40% of the reserved area and such combination shall not be of incompatible uses. However, area upto 300 sq.m. from any reserved land may be allowed to be developed for construction of **arogya kothi** i.e. waste segregation center at ward level with allied use.
- 3) Any site reserved for specific purpose in the development plan may be allowed to be developed for any other public purpose with the permission of the Government.
- 4) Municipal Corporation may acquire and develop any of the reservation proposed in the development plan, partly or fully, for multistory public parking, irrespective of its designation, if amenity of parking is direly needed in the area.
- 5) Combination of uses as mentioned below may be permissible even if the reservation is for a specific purpose.
 - a) **Playground** – In playground reservation, minimum 90% area shall be kept open for open play activities. In remaining 10% of area, covered swimming pool & allied construction, gymnasium, covered badminton court, pavilion, watchman quarter, small restaurant or food stalls to the extent of 20 sq.m. (for every 4000 sq.m. reservation area) may be permitted. The FSI permissible shall be 0.15.
 - b) **Stadium / sports complex** - In addition to the uses permissible in playground mentioned above, shops below the spectators' tiered gallery may be permitted. The FSI permissible shall be 0.25.
 - c) **Garden / park / Goda park** – In addition to the main use of garden, open swimming pool & allied construction, water tank, rain water harvesting system, gardener / watchman quarter, small restaurant or food stalls to the extent of 20 sq.m. (for every 4000 sq.m. reservation area) may be permitted. Total FSI used for such constructions shall not exceed 0.04 of the garden area.
 - d) **Weekly Market** – Weekly vegetable market with open ottas, cattle market and ancillary petty convenience shops.
 - e) **Vegetable Market** – Open or covered ottas, alongwith petty convenient shops, fruit stalls may be permitted.
 - f) **Municipal Market** – Shopping, vegetable market, hawkers place, etc and departmental stores, offices, banks / community hall on upper floors.
 - g) **Auditorium/Drama Theatre**-In addition to Auditorium, Drama theatre / natyagriha, art gallery, exhibition hall, library, small restaurant to the extent of 20 sq.m. (for every 4000 sq.m. reservation area) and allied users such as guest rooms for the artists may be permitted.
 - h) **Educational amenity** – all types of educational activities along with canteen.
 - i) **Medical amenity** – Any sort of medical facilities alongwith ancillary construction such as staff quarters, chemist shop, restaurant, ATM, PCO, cyber café of not more than 20 sq.m., etc. and sleeping accommodation for guests in case of bigger hospitals of built up area not less than 2000 sq.m. may be permitted.
 - j) **Truck Terminus** – In addition to minimum 60% area for parking of trucks, ancillary office restaurant, hotel, motel, lodging facility for drivers, petrol pump, auto repair centre, auto service centre, shops for auto spare parts, shops for daily needs, ATM, PCO, primary health centre / first aid centre and provision for loading-unloading may be permitted. Moreover,

Belh

these reservation may also be developed for bus stand, bus-MRT interchange with mall.

- k) **Bus Stand**-In addition to Bus Stand, bus-MRT interchange with mall.
- l) **Fire Brigade Station** – fire brigade station along with allied activities.
- m) **Parking** – parking, public convenience, bus-MRT interchange with mall and allied activities. However, 15% area may be utilized for other public purpose as may be decided by the Municipal Commissioner.
- n) **Sadhu gram/ Pilgrim centre** – any activity related to Kumbh mela during the period of Kumbh mela, public meeting, exhibition, sports activities, open parking, recreation, playground, open weekly bazar, other open uses.
The lands owned by registered Public trusts in sadhu gram reservation, on or before the date of publication of Development Plan under section 26, shall be entitled for development for sadhu gram.
- o) **Public Amenity** – any amenity, along with ancillary use on the lines mentioned above.
- p) **Sewage Treatment Plant** – principal use with allied activities.
- q) **Municipal Solid Waste Facility** – principal use with allied activities.
- r) **Water Works**– principal use with allied activities.
- s) **Cremation Ground/ Burial Ground** - principal use with allied activities and interchangeability among one another.
- t) **Other reservations** – other reservations may be developed for the respective purposes along with ancillary use on the line mentioned above.

Note:-

- 1) The permissible FSI for above uses shall be as that of residential zone, including premium, FSI and loading of TDR, if not specified.

14.10 ADDITIONAL USES:

The lists of uses mentioned under the various land use zoning herein above may be amended by the Municipal Commissioner from time to time, with the consent of Joint Director of Town Planning, Nashik Division, Nashik.

Belh

PART IV
GENERAL BUILDING REQUIREMENTS –
SETBACK, MARGINAL DISTANCE, HEIGHT AND FSI

15.0 GENERAL

Following regulations for core area shall be applicable for the lands included in core area as shown on the Development Plan. For the areas outside core area in the Development Plan, regulation for non-core area shall apply. However, in Core area, if the original land holding is more than 0.40 Hect., then regulations of non-core area except FSI shall apply FSI in such cases shall be as per Regulation No. 15.1.

15.1 REGULATIONS FOR CORE AREA**15.1.1 Residential Buildings****(a) Floor Space Index.**

The maximum permissible basic floor space index, permissible TDR loading and additional FSI on payment of premium shall be as per the following table.

Table					
Sr.no.	Road width in meter	Basic FSI	Additional FSI on payment of premium	Maximum permissible TDR loading	Maximum building potential on plot
1	Below 9.0 meter	1.50	--	--	1.50
2	9.00 meter and upto 12.00 meter	2.00	--	--	2.00
3	12.00 meter and upto 18.00 meter	2.00	0.25	--	2.25
4	18.00 meter and upto 24.00 meter	2.00	0.25	0.25	2.50
5	24.00 meter and upto 30.00 meter	2.00	0.25	0.50	2.75
6	30.00 meter and above	2.00	0.25	0.75	3.00

(b) Setback (Road side margin/s) - The minimum front setback from the existing or proposed road/roads shall be as under:-

Sr. No.	Road width	For Purely Residential	For commercial or mixed Users
(i)	For streets more than 4.5 but upto 6.0 m. in width.	1.00 m.	2.00 m.
(ii)	For streets above 6 m.	1.50 m	2.00m.
(iii)	For streets below 12 m.	1.50 m.	2.00 m.
(iv)	For streets 12 m. and above.	1.50 m.	3.00 m.
(v)	For streets 18 m. and above.	2.00 m.	4.50 m.

Bech

- (c) **Side & rear marginal distances** - Side & rear marginal distances for construction in a plot shall be as below

Residential Plot Area	Side	Rear
Upto 250 sq. m	0.00	0.00
Above 250 & upto 500 sq. m	1.00 m.	1.00 m.
Above 500 sq. m.	2.00 m.	2.00 m.
Special building	as per regulations of Special building	
NOTE :- For light and ventilation, provisions in Regulation No.15.11 shall apply.		

- d) For streets less than 4.5 m. in width, no setback shall be prescribed subject to condition that no lane shall be less than 4.5 m. in width clear of structural projection. For lanes less than 4.5 m. in width, a setback of 2.25 m. shall be prescribed from the center line of such lane. Streets less than 4.5 m. shall be treated as lanes only when they serve as access to the properties fronting on them.
- e) Above set back and marginal distances shall be applicable for buildings with ground + 3storey or parking + 4storey structures. For buildings having height more than this but less than 15 m., marginal distances shall be increased by 1 m. For buildings having height more than this, marginal distances shall be as per regulations of non-core area.
- f) Structural projections such as balconies, cornices, weather sheds, roof projections etc. shall be allowed in the setback distance prescribed above as per Regulation No. 15.8.
- g) Height- The height of the building shall be governed by Regulation No. 15.9.
- h) Steps may be allowed within marginal distance.
- i) Parking – parking shall be provided as per the provisions in Regulation No.20.0.

15.1.2 Public semipublic, Educational, Medical, Institutional, Mercantile, and Other Buildings

- (a) Floor Space Index - Maximum FSI permissible shall be as per table under Regulation No. 15.1.1, and subject to payment of premium as would be decided by Government from time to time.
- (b) Marginal Distance - For these buildings marginal distances shall be 3 m. on all sides.

For buildings having height more than 15 m., regulations of outside core area shall apply for front, side and rear marginal distances.

Provided that for buildings like cinema theatre, multiplex, assembly buildings, shopping malls, regulation of outside core area, except FSI, shall apply.

- 15.1.3 Pathway for access to the internal building or interior part of the building shall not be less than 3.6m. (12 ft) in width.
- 15.1.4 If the width of property is less than 3.6 m. (12 ft), the entire ground floor shall be on stilts.
- 15.1.5 Front setback (marginal distances) as prescribed by the Highway or any other rules shall be applicable if they are over and above as prescribed in these regulations.

15.2 REGULATIONS FOR OUTSIDE CORE AREA.

15.2.1 Residential Buildings

The provisions as given in Table 7 shall apply for the residential buildings, mix use building permissible in areas outside core areas and residential buildings permissible in industrial areas.

2.	M.D.R./O.D.R.	450	15	6.0 m. from road line or as specified by Highway rules whichever is more	3.0	3.0	
3.	Other roads 24 m. wide and above	300	12	6.0 m.	3.0	3.0	
4.	Roads of width below 24m. wide and up to 18m.	250	12	4.5m.	3.00	3.00	
5.	Roads of width below 18m. wide and up to 15m.	250	10	4.5m.	2.25	2.25	Margins only for G + 2 or stilt + 2 structure
6.	Road of width below 15 m. and above 9 m.	150	8	3.0 m	2.25	2.25	Margins only for G + 2 or stilt + 2 structure

DCPR-2015 FOR NASHIK MUNICIPAL CORPORATION

Sr. No.	Description of Road / housing pattern	Minimum Required					Remarks
		Plot Size	Width Of Plot	Set Back from road front	Side marginal distance	Rear marginal distance	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
7.	Road of width upto 9 m.	100	7	3.0 m.	1.5	1.5	Margins only for G + 1 or stilt + 1 structure
8.	Row housing on roads of width 12m. and below	30 to 125	3.50	2.25 m.	0.00 (in case of corner plot, 1.5 or building line of the adjoining road whichever is more)	1.5	Margins only for G+1 or Stilt+1 structure
9.	Row housing for L.I.G. EWS/High Density Housing, Slum Up-gradation etc. by public authority	20 to 50	3.00	0.90 m. from pathway 2.25 m. from road boundary	-do-	0.90	Only G+1 or Stilt+1 structure.
10.	36 m. wide D. P. Road from Gangapur S. No. 12 to Ambad S. No. 199.	300	12	3.00 (for commercial use also)	3.00	3.00	
11.	30 m. wide D.P. road along canal in Dasak shivar.	250	10	4.5m.	2.25	2.25	Margins only for G + 2 or stilt + 2 structure

Notes :

(1) Marginal distances mentioned in above table shall be subject to distances mentioned in Regulation no. 15.6. In case of sr.no. 5 to 9, and 11, structures having higher height may be permitted subject to marginal distance mentioned in Regulation no. 15.6.

Beek

- (2) The minimum area of plots fronting on service roads along highways, shall be with reference to the width of service road.
- (3) For semidetached buildings, side margin shall be on one side only. Plots for semidetached buildings shall be in pairs.
- (4) Row-housing plots at the junction of two roads shall be larger to maintain the setback from both roads. Not more than 12 and not less than 43 plots shall be allowed in each block of row housing. Each block shall be separated from the other by 6 m. road or 6 m. side marginal distance of the plot or space including side marginal distance of the plot.
- (5) No garage shall be permitted in a building having stilt or basement provided for parking.
- (6) Subsidiary structure such as garage (limited to one), outhouse, independent sanitary block may be permitted only in plots having area more than 250 sq.m. or more.
- (7) Construction of ottas, railings, barricades or supporting columns for canopy or porch shall not be allowed in front marginal distances. However, steps may be permitted within 1.2 m. from the building line. Also supporting columns for canopy or porch may be allowed within building line.
- (8) Ribbon development rules may be relaxed with the consent of the Highway Authority only.
- (9) In case of special building as specified in Regulation no 6.2.6.1, marginal distances shall be as per said regulations.
- (10) The plot width to depth ratio shall be 1 : 1.5 to 1 : 2.5; as far as possible in case of plotted layout development permission.
- (11) In Public Housing Schemes for E.W.S. undertaken by government or semi-government organisations, marginal distances shall be as per their respective schemes and rules.
- (12) The front setback set-out in already approved and partially developed layouts / schemes, may be retained as per said approval, so as to maintain the building line.
- (13) The pattern of development like semi-detached, row housing, etc. in already approved layout shall be as per said approved layout.
- (14) Where commencement certificate is granted prior to publication of draft development plan and the said plot is affected by new road proposed in the development plan, then front margin stand relaxed to that extent.
- (15) Rear or side marginal distances for development along nalla or water courses shall be subject to Regulation No.11.1(b),11.3 and 11.11.

15.2.2 Other Buildings : The Provision as given in Table No.8 below shall apply for different categories of other buildings in non-core area.				
Table No. 8				
Sr. No.	Type of Building	Min. road width required	Minimum marginal distances	Other Stipulations
(1)	(2)	(3)	(4)	(5)
1.	i) Hospital, Maternity Homes, Health Club, Public-Semipublic buildings not being special buildings	12 m.	Front margin as per table no. 7 remaining sides 4.5 m.	Basic FSI, Additional FSI, rate of Premium and the conditions, if any, shall be as per Regulation No. 23.1
	ii) Clinics on plot upto area 300 sq.m.	9 m.	Front margin as per table no. 7 other all sides 3.0 m.	-----
1A	i) Hospital, Maternity Homes, Health Club, Public-Semipublic buildings being special buildings	12 m.	6 m. on all sides	Basic FSI, Additional FSI, rate of Premium and the conditions, if any, shall be as per Regulation No. 23.1
2.	Educational buildings	6m.& not more than 24 m.	As per Table No.7	Basic FSI, Additional FSI, rate of Premium and the conditions, if any, shall be as per Regulation No. 23.1
	i) Pre-primary School	9m.& not more than 24 m.	6 m. on all sides	Basic FSI, Additional FSI, rate of Premium and the conditions, if any, shall be as per Regulation No. 23.1
	ii) Primary School	15 m.	--do--	Basic FSI, Additional FSI, rate of Premium and the conditions, if any, shall be as per Regulation No. 23.1
3.	Cinema Theatre/ Drama Theatre/ Assembly Hall/ Multiplex / Shopping Malls	15 m.	Front - 12 m. (only on one major road) Remaining front and/or all sides - 6 m.	-----

Reds

Sr. No.	Type of Building	Min. road width required	Minimum marginal distances	Other Stipulations
(1)	(2)	(3)	(4)	(5)
4.	MangalKaryalaya like buildings	15 m.	--do--	
5.	Petrol/Fuel Filling Stations with or without service bays	12 m.	4.5 m. on all sides	<p>i) Plot should not be located within the distance of 90 m. from any junction of roads having min. width 12 m. each. In case of 'T' junction, this restriction of 90 m. shall apply on a side where perpendicular road meets the junction..</p> <p>ii) Restrictions imposed by Ribbon Development Rules, IRC, MoRTH shall apply.</p> <p>iii) Petrol filling station shall not be sited on the convex side of a road curve. In case the curve is not very sharp and cars moving out of the station are completely visible to the traffic from a distance of at least 90 m. and vice versa, a petrol station may be permitted on such a convex curve.</p>
6.	Mercantile/ Business/ hotel/ Commercial/ mix use with residential buildings.	12	Front 4.5 m. Side & rear 3.0 m.	Shops may also be allowed fronting side and rear margins.
7.	Stadium / Pavilion	12	6 m. on all sides	Covered portion shall not exceed 20% of plot area. The spectators' gallery of the stadium shall not be counted towards FSI. Shops below spectator's gallery may be permissible.

NOTE:

- In case of plots fronting on National Highway, State Highway and Major District Roads, the building line shall be as per Ribbon Development Rules as given in Table above, whichever is more.
- Side and rear marginal distances mentioned in above Table shall be subject to Regulation no. 15.6 and 15.7, whichever is more.
- Rear or side marginal distances for development along nalla or water courses shall be subject to Regulation No.11.1(b),11.3 and 11.11.
- In case of special building as specified in Regulation no. 6.2.6.1, marginal distances shall be as per said regulations.

Beh

15.2.3 INDUSTRIAL BUILDINGS

Minimum plot area, marginal space, Permissible FSI, Additional FSI with payment of premium for industrial building shall be as per the Table No. 9 given below:-

a) Minimum plot area, marginal space, Permissible FSI-

Table No. 9						
Sr. No.	Min. road width	Plot Size in sq.m.	Basic Permissible FSI	Additional FSI on payment of premium	Min. Front Margins	Min. Side & Rear Margins
1	2	3	4	5	6	7
1	12 m.	Upto1000	1.10	0.30	4.50	3.00
2	12 m.	1001 to 5000	1.10	0.30	9.00	6.00
3	12 m.	5000 and above	1.10	0.30	12.00	9.00

Note-

- i) In case of plots fronting on National Highway, State Highway and Major District Roads, the building line / control line shall be as per Ribbon Development Rules as given in Table above, whichever is more.
- ii) Front, side and rear marginal open spaces shall be as per above Table.
- iii) Minimum and maximum height shall be 3.60 m. & 4.2 m. respectively for industrial buildings. The greater height may be permitted as per the requirement.
- iv) In addition of provisions of these regulations, regulations prescribed under Factory Act shall be applicable.
- v) **Premium** - Rate of premium for the additional FSI as mentioned in column no 5 above shall be decided by Government from time to time. The premium collected shall be shared 50:50 between State Government & Corporation respectively. The premium of the Government shall be deposited by the planning authority in a Government head account
- vi) **Buffer zone**-For construction of industrial building, buffer zone of 23 m. wide shall be left from residential or incompatible zone, wherever necessary. Such buffer zone shall be part of sizable required recreational open space. Roads and marginal distance is may also be treated as a part of Buffer Zone. However, area of such buffer zone shall be counted in gross area for computation of FSI. Where green belt is shown in development plan between residential and industrial zone, area of such green belt shall be counted in gross area for calculation of FSI. Provided also that marginal distance for a building shall not be exclusive of buffer zone. The floor height for industrial building shall be as per requirement.

Reeb

15.3 CHARGES FOR PREMIUM FSI

The premium FSI mentioned in above regulations shall be available on payment of charges to the Corporation as mentioned below at the rate of land mentioned in ASR prepared by Inspector General of Registration, Maharashtra State for the respective year.

Charges for Premium FSI	as may be decided by the Government from time to time
-------------------------	---

The premium collected shall be shared 50:50 between State Government & Planning Authority respectively. The premium of the Government shall be deposited by the Planning Authority in a Government head account.

15.4 MAXIMUM PERMISSIBLE FSI / TDR ON A PLOT

In case of plots located outside core area, the maximum permissible FSI including basic FSI, Premium FSI, TDR admissible under these regulations taken together shall not exceed the limit given below

Sr. No.	Road width in m.	Basic FSI	Additional FSI on payment of premium	Maximum Permissible TDR loading	Maximum Building potential on plot
1	2	3	4	5	6
1	Below 9 m.	1.10	--	--	1.10
2	9 m. and up to 12 m.	1.10	0.30	0.40	1.80
3	12 m. and up to 18 m.	1.10	0.50	0.65	2.25
4	18 m. and up to 24 m.	1.10	0.50	0.90	2.50
5	24 m. and up to 30 m.	1.10	0.50	1.15	2.75
6	30 m. and above	1.10	0.50	1.40	3.00

Notes

1. For commercial use, additional 0.15 basic FSI shall be allowed, over and above maximum building potential on plot.
2. Additional FSI upto 0.20 on payment of premium shall be allowed for the redevelopment of Authorised Residential buildings on roads having width below 9 m., subject to condition that the construction/redevelopment shall be allowed only if the building is more than 30 years old.
3. Maximum permissible building potential on plot mentioned at column no. 6 shall be exclusive of FSI allowed for Inclusive Housing regulation.

Provided that, the restrictions of road width mentioned above shall not be applicable in cases where, the permissible FSI is more than the basic FSI in various schemes such as, slum rehabilitation scheme, redevelopment of dangerous buildings, cluster development for core area, redevelopment of MHADA buildings etc.

Provided further that, the maximum limits of FSI prescribed above shall be applicable to fresh permission and also to an existing building which has not been granted full occupation certificate but subject to production of stability certificate from structural engineer in respect of such existing building. However, in no case the rights of the flat owner / unit holders shall be adversely affected.

Bech

15.5 FSI OF GREEN BELT

FSI of the green belt zone shown on the development plan may be allowed on remaining land of the owner by counting area of green belt in gross area of plot subject to condition that owner shall develop cycle track and plant trees in this area with proper planning at the rate of minimum 100 trees per hectare and should have been survived for at least one year prior to issuance of occupation certificate.

Provided that such cycle track shall be kept open for the public use.

Provided further that such FSI shall not be allowed if such green belt area is included in recreational open space to be left as per Regulation No. 13.3.6.

15.6 REQUIREMENTS OF MARGINAL DISTANCES

(a) Side or rear marginal distance in relation to the height of the building for light and ventilations:

- i) The marginal distance on all sides shall be as per Table No.7 for building height 15.0 m. and below. For height more than 15.0 m., the marginal distance on all sides except the front side of a building shall be minimum H/4 (Where H = Height of the building above ground level) subject to a minimum of 3.0 m. for residential building, 4.5 m. for commercial building and 6.0 m. for special building mentioned in Regulation No. 6.2.6.1

Provided that, such marginal distance shall be subject to maximum of 16.0 m. Such marginal distance over and above 6.0 m. in core area and 9.0 m. in non core area (on ground) may be allowed to be left on upper floor/s to achieve required marginal distance (stepped marginal distances).

Provided further that, the building height for the purposes of this regulation shall be exclusive of height of parking floors upto 6.0 m. However, this shall be applicable for calculating the height for the purposes of marginal distances only.

- (b) **Front margin** – Front margin shall be as per Regulation No.15.2.1 or as given below with reference to height of building.

i)	Height above 15 m. & upto 18 m.	6.00 m.
ii)	Height above 18 m. & upto 24 m.	6.00 m.
iii)	Height above 24 m. & upto 36 m.	7.50 m.
iv)	Height above 36 m. & upto 48 m.	9.00 m.
v)	Height above 48 m. & upto 60 m.	12.00 m.
vi)	Height above 60 m.	15.00 m.

Provided that, in case of group housing scheme where building abuts on internal road, the minimum 3.0 m. set back from internal road or distance between two buildings whichever is more shall be provided. For Development plan road or classified road or through road, passing through Group Housing Scheme, the setback as prescribed in the regulations shall be provided.

- (c) Distance between two buildings- The distance between two buildings shall be the side marginal distance required for the higher building between two adjoining buildings.

15.7 BUILDINGS ABUTTING TWO OR MORE STREETS

When a Building abuts two or more streets, the setbacks from the streets shall be such as if the building is fronting on each such street.

Seel

15.8 PERMISSIBLE STRUCTURES / PROJECTIONS IN MARGINAL DISTANCES

15.8.1 The following projections shall be permissible in marginal distances:

- (a) Projections into marginal distances:- Every marginal distances provided either interior or exterior shall be kept free from any erection thereon and shall be open to the sky and no cornice, chajja, roof or weather shade more than 0.75 m. wide shall overhang or project over the said marginal distances so as to reduce the width to less than the minimum required. However, sloping/horizontal chajja provided over balcony/ gallery etc. may be permitted upto balcony projections at horizontal level.
- (b) A canopy not exceeding 5m. in length and 2.5 m. in width in the form of cantilever and unenclosed over the main entrance providing a minimum clear height of 2.40 m. below the beam bottom of canopy. The canopy shall not have access from upper floors (above floors), for using as sitting out place. There shall be a minimum clearance of 1.5 m. between the plot boundaries and canopy.

Provided that more than one canopy may be allowed in case of special buildings, as per requirement.

- (c) **Balcony** :- Balcony or balconies of a minimum width 1.00 m. and maximum of 2.00 m. may be permitted at any floor except ground floor, not more than 15 % of the built up area of the same floor and such balcony projection shall be subject to the following conditions
- (i) In non-core area, no balcony shall reduce the marginal open space to less than 3 m. In core area balcony may be permitted on upper floors projecting in front setbacks except over lanes having width 4.50 m. or less and in marginal distances subject to 1.0 m. clear marginal distance from the plot boundary to the external face of the balcony.
- (ii) No balcony shall be allowed on ground floor which shall reduce minimum required front setback or marginal distance.
- (iii) The width of the balcony shall be measured perpendicular to the building upto the outermost edge of balcony.
- (iv) The balcony should not be enclosed and declaration regarding this shall be submitted by the owner/developer/Architect at the time of approval of building permission and the same shall be mention in the agreement or sale deed.
- (v) Nothing shall be allowed beyond the outer edge of balcony.
- (d) A projection of maximum 30 cm. on roof top terrace level may be allowed throughout the periphery of the building. In case of pitched roof projection of maximum 45 cm. at roof top terrace level throughout periphery of the building shall be allowed.
- (e) Accessory buildings:- The following accessory buildings may be permitted in the marginal distances -
- (i) In an existing building where toilet is not provided, a single storeyed toilet subject to a maximum area of 4.0 sq. m. in the rear or side marginal distance and at a distance of 7.5 m. from the road line or the front boundary and 1.5 m. from other boundaries may be permissible. The Municipal Commissioner may reduce 1.5 m. margin in exceptional cases to avoid hardship.
- (ii) Parking lock up garage not exceeding 2.4 m. in height shall be permissible in the rear corner of the plot with independent bungalow. Parking lock up garage when attached to main building shall be 7.5 m. away from the road line and shall be of such constructions giving fire resistance of 2 hours. The area of parking lock up garage shall be taken into

Reh

account for the calculation of FSI.

(iii) Suction tanks, soak pits, pump room, electric cabin of substation or gen-set area, electric meter room as per requirement, garbage shaft for wet and dry garbage separately with collection chamber, space required for fire hydrants, electrical and water-fittings, water tanks, dustbins, etc.

(iv) One watchman's cabin / booth not more than 5 sq. m. in built up area having min. 1.80 m. width or diameter of cabin / booth for each entrance to the campus.

Note :- When a building abuts on three or more roads then above mentioned user, except (iv), shall be permissible in front setback facing the smaller road or less important from traffic point of view.

- (f) "Ramp" for basement, in side and rear marginal distances. In case of special buildings, ramps may be allowed, subject to 6.0 m. clear marginal distance for movement of fire fighting vehicle
- (g) Staircase mid-landing of 1.2 m. width with clear minimum headway of 2.1 m. below the mid-landing. However, clear distance from edge of landing to the plot boundary shall not be less than 1.8 m. In case of special buildings, this shall be subject to 6.0 m. clear marginal distance.
- (h) Architectural projections upto 1.00 m. which will not reduce the marginal space more than 2.00 m.

15.8.2 Exclusion of structures / projections for FSI calculation

All structures, excluding following, shall be counted in FSI.

- (a) Structures/ Projections mentioned in Regulation 15.8.1 (a), (b), (c), (d), (e)(iii), (f), (g),
- (b) Stilt / Multi-storeyed floor/podium / basement used as parking.
- (c) Areas covered by (i) Lofts (ii) Service floor of height not exceeding 1.8 m. for hotels rating with three stars and above and hospitals .
- (d) Area of structure for an effluent treatment plant as required as per the requirements of the Maharashtra Pollution Control Board or other relevant authorities.
- (e) Areas covered by service ducts, stilt. Area of lifts on all floors excluding any one floor.
- (f) Rockery, well and well structures, plant, nursery, water pool, swimming pool (if uncovered), platform around a tree, fountain bench, chabutara with top and unenclosed sides, ramps, compound wall, gate slide / swing, steps outside the buildings, domestic working place (open to sky), overhead water tank on top of the building and refuge area for high rise buildings.
- (g) Area covered by new lift in an existing building with height upto 15m., in core area.
- (h) Telecommunication tower, antenna and allied activities.
- (i) Structure permissible in recreational open space in layout or group housing scheme.
- (j) Atrium in any building. Atrium may be allowed to be covered on top with transparent sheets.
- (k) Escalators as provided in Regulation No.17.4.9.2.
- (l) Staircases and fire escape staircases, Entrance lobby / lobbies, lift wells with machine rooms.
- (m) Supported double height terraces (within the building line)-

Supported double height terraces (open terraces with railing having minimum height equal to two floors) within the building line, not exceeding 20% of the built up area of the same floor.

Isel

15.9 HEIGHT OF BUILDING –

- (a) Height of building is allowed to the extent that is required to consume the maximum building potential on plot as given in the table under regulation no. 15.4, subject to other restrictions as per these regulations, and prior approval of Chief Fire Officer, Nashik Municipal Corporation, if required under this regulation.

Provided that, for the building having height equal to or more than 24.0 m. the minimum road width shall be 12.0 m.

For the scrutiny of buildings having heights 70 m. and more, High-rise Committee shall be constituted by the Municipal Commissioner. The structure of the committee is shall be as under.

Constitution of the committee.

Sr. No.	Member	Post
1.	Divisional Commissioner	Chairman
2.	Joint Director of Town Planning, Nashik Division Nashik	Member
3.	Head of Department, Soil Mechanics, College of Engineering.	Member
4.	Head of Department, Structural Engineering, College of Engineering.	Member
5.	City Engineer, Nashik Municipal Corporation	Member
6.	Chief Fire Officer, Nashik Municipal Corporation	Member
7.	Environmental Expert, Nominated by the Government	Member
8.	Deputy Director / Assistant Director, Town planning, Nashik Municipal Corporation	Member secretary

- i) The committee shall be of advisory in nature and it will advise the Municipal Commissioner regarding the feasibility of the development proposal considering the opinion of the expert members of the committee.
- ii) In specific case, if the chairman desires, any experts from other fields may be invited for the meeting of the committee.
- iii) The non-official members shall be paid honorarium as may be decided by the Commissioner.
- iv) The Commissioner may levy additional scrutiny fees for such building proposals.
- (b) For buildings in the vicinity of aerodromes, the maximum height of such buildings shall be subject to values framed by the Civil Aviation Authorities or the development permission shall be considered only after applicant produces NOC from Air Port Authority.
- (c) In addition to (b) for Industrial Chimneys coming in the vicinity of aerodromes, it shall be of such height and character as prescribed by Civil Aviation Authorities and all Industrial Chimneys shall be of such character as prescribed by the Chief Inspector of Steam Boilers and Smoke Nuisance, and
- (d) Buildings intended for hazardous godowns storage of inflammable materials and storage of explosives shall be single storied structures only.
- (e) The above regulation for height of building shall apply to all land use zones.

Note : For the purpose of Regulation No. 15.9 (a), the width of the street may be prescribed width of the street, shown on Development Plan or width resulting from the prescription of a regular line of street under the relevant act whichever is more.

15.10 HEIGHT EXEMPTIONS -

The appurtenant structures such as roof tanks and their supports, ventilating, air-conditioning, lift rooms and similar service equipment, stair cover, chimneys and parapet walls and architectural features not exceeding 1 m. in height shall not be included in computation of height of building for marginal distance only.

15.11 INTERIOR & EXTERIOR CHOWK

15.11.1 (a) Interior chowk: Wherever habitable rooms or kitchen derives ventilation from inner chowk or interior open space, the size of such interior open space shall not be less than 3m. x 3m. upto height of 18m. and for height more than 18m., the interior open space shall not be less than H/6 m. x H/6 m. where H = height of highest wall of the chowk.

(b) Exterior chowk: The minimum width of the exterior chowk for the purpose of light and ventilation, shall not be less than 2.4 m. and depth shall not exceed 2 times the width, for buildings upto 17m. height and for height more than 17m., the exterior open space shall not be less than H/7 m. x H/7 m. where H = height of highest wall of the chowk. If the width of the exterior chowk is less than 2.4 m. it shall be treated as a notch and shall not be considered for deriving ventilation.

However, for (a) and (b) above maximum distance shall be subject to the maximum limit prescribed for distance between two buildings.

15.11.2 Where only water closet, bathroom, combined bathroom and water closet are abutting on the interior open space, the size of the interior open space shall be in line with the provision for ventilation shaft as given in Regulation No.16.13.4.

15.12 TRANSIT ORIENTED DEVELOPMENT (TOD)**15.12.1 Definitions**

(i) TOD zone:- It is the area along/around the proposed MRTS/Metro corridor as will be delineated by Nashik Municipal Corporation with approval of the State Government.

(ii) Base permissible FSI:- It is the FSI that is otherwise permissible on any land with respect to zone shown as per the sanctioned development plan and the relevant provision of the Principal DCR excluding the TDR and the premium FSI, redevelopment incentive FSI that can be received.

(iii) Gross plot area:- Gross Plot Area means total area of land after deducting area under reservation or deemed reservation like amenity space if any, area under D.P. Road and Road widening.

(iv) Principal DCPR:- Principal DCPR means these DC Regulations excluding the provisions regarding TOD zone.

15.12.2 Date of coming into force:- The date of coming into force of these regulations shall be the date on which construction work of Metro Rail /MRTS actually commences.

15.12.2.1 Maximum Permissible FSI :- The maximum permissible total FSI in TOD zone shall be 4.00 including the base permissible FSI, subject to condition that, the additional FSI over and above the base permissible FSI shall be allowed within the overall limit of maximum permissible FSI, as given in the Table below-

Fbch

Sr. No.	Road width in m.	Min .Plot Area in sqm.	Maximum Permissible FSI
1	2	3	4
1	9 m. and up to 12 m.	Below 1000	2.00
2	12 m. and up to 18 m.	1000 or above	2.50
3	18 m. and up to 24 m.	2000 or above	3.00
4	24 m. and up to 30 m.	3000 or above	3.50
5	30 m. and above	4000 or above	4.00

Explanation:-

- 1) The maximum permissible FSI as per the above Table shall be determined by satisfaction of both the criterias viz. Minimum Road width as well as plot area, simultaneously. However in case, both these criterias are not satisfied simultaneously, the maximum permissible FSI shall be the minimum of that permissible against each of these two criterias, as illustrated below ;

Illustrations: -**Utilization of FSI**

Plot Area in sqm	Road width					
	Less than 9mt.	9 m. and up to 12 m	12 m. and up to 18 m	18 m. and up to 24 m.	24 m. and up to 30 m.	30 m. and above
Below 1000	Principal DCPR	2	2	2	2	2
1000 to below 2000	Principal DCPR	2	2.5	2.5	2.5	2.5
2000 to below 3000	Principal DCPR	2	2.5	3.0	3.0	3.0
3000 to below 4000	Principal DCPR	2	2.5	3.0	3.5	3.5
4000 or above	Principal DCPR	2	2.5	3.0	3.5	4.0

- 15.12.2.2 Premium to be Paid** - Additional FSI over and above base permissible FSI of respective land use zones as per principal DCPR, may be permitted on the payment of premium equivalent as would be decided by Government from time to time.
- 15.12.2.3 Integrated Mobility Plan:-** There shall be an Integrated Mobility Plan envisaging inter-linkages between different modes of mass transport, parking management, traffic management and pedestrianisation.
- 15.12.2.4** The maximum permissible FSI as given in Table under Regulation No. 15.12.2.1 shall be calculated on the gross plot area.
- 15.12.2.5** In case of plot / plots falling partly within the TOD zone, the FSI permissible shall be as follows, provided that the total area of the plot (plot falling within TOD zone plus plot falling outside TOD zone) shall be as prescribed in the table in Regulation No. 15.12.2.1 :-
- (i) Where 50% or more area of such plot / plots falls within TOD zone, these regulations including FSI shall apply to the total area of such plot / plots.
- (ii) Where less than 50% area of such plot / plots falls within TOD zone, these regulations

Bech

including FSI shall be applicable to the part of plot / plots falling within TOD zone, whereas for the part of plot / plots falling outside TOD zone, these regulations except provisions regarding FSI shall be applicable. The FSI permissible for the part falling outside TOD zone shall be as per Principal Development Control Regulations.

15.12.2.6 Notwithstanding anything contained in any other provision of this DCPR the Parking, Double height terraces up to 20% and 15% balconies not enclosed, Stair cases, Lift wells with machine rooms, Refuge areas, Voids, Service Floor & Entrance lobbies of the building in TOD zone shall be free of FSI.

15.12.2.7 Notwithstanding anything contained in any other provisions of these regulations, TDR shall not be allowed to be received on the plots within TOD zone, irrespective of its location in congested area / non congested area as per the Development Plan of Nashik.

15.12.3 Tenement Size

For any development or redevelopment within TOD zone, size of tenement shall be minimum 25 sq. m. and maximum 120 sq. m. of built-up area and out of total proposed tenements, the tenements equivalent to at least 50% of total FSI shall be of a size equal to or less than 60 sq. m. These tenements shall not be allowed to be clubbed/amalgamated in any case.

15.12.4 Permissible mixed use in TOD zone:

Mixed use in the form of residential and commercial may be permissible on the residential plot in TOD zone fronting on the road width of 12 m. and above. And mix use on plot / plots in commercial zone in Nashik Municipal Corporation shall be permissible as per the principal DCPR and the maximum permissible FSI under these regulations shall be allowed on the payment of premium.

15.12.5 Other provisions regarding marginal open spaces shall be governed by the proposed height of structure, as given in the Regulation No. 15.12.6 below and should conform to the Maharashtra Fire Prevention and Life Safety Measures Act, 2006 (Maharashtra Act no. III of 2007) as amended from time to time. No building permission shall be issued without NOC of the Fire Officer. Other regulations regarding room sizes, apertures for light and ventilation shall be as per the principal DCPR in force.

15.12.6 Marginal Spaces

Sr. No.	Building Height	Side and Rear Margins	Remark
a	15.0 m. and below	H/2-4	Minimum 3.0 m. for Residential minimum 4.5 m. for Commercial and Minimum 6.0 m. for Special Buildings.
b	Above 15.0 m. and upto 18.0 m.	H/4	Minimum 6.0 m. for all Buildings.
c	18.0 m. and above	H/5 subject to Maximum 12.0 m.	Minimum 6.0 m.

Note- However if Developer / Owner provide more than 12.00 m. side and rear margins, it shall be permissible.

12.12.6.1 No projections shall be allowed in marginal spaces so that minimum 6 m. marginal spaces remain free from all encumbrances for the movement of fire tenders. In case if ramp is necessary from accessibility, such ramp may be allowed after living 6 m. clear margin,

15.12.6.2 For calculation of marginal distances the height of the parking floors (Maximum two floors above the Ground Level) shall not be taken in account, However height of such parking floors will be counted towards the total height of the building for deciding the building as high rise building

Rseb

and for civil Aviation purpose.

15.12.6.3 Car lift / mechanical parking shall be permissible, as per Principal DCPR as amended from time to time.

15.12.7 Parking

Parking in the TOD zone shall be provided as per the table given below.

Sr. No.	Occupancy	One parking space for every	Transit Oriented Development Influence Zone		
			Car	Scooter / Motorcycle	Cycle
1	Residential	For 4 units having carpet area From 25 and upto 40 sq. m.	0	1	2
		For 2 units above 40 and upto 60 sq. m.	1	1	2
		For every unit above 60 and upto 80 sq.m.	1	2	2
		For every unit above 80 sq.m.	1	1	1
2	Govt. & Semi Govt. Private business buildings	100 sq. m. carpet area or fraction thereof	1	2	2

Note: i) Parking spaces for differently – abled persons shall be provided as per Indian Road Congress Code No. IRC 103:2012 in each new construction / development / re-development in the TOD zone.

ii) No on street parking shall be permissible, unless specifically allowed in the integrated mobility plan report.

15.12.7.1 Incentive for providing Public Parking in the area falling within the radius of 200 m. from the Metro/MRTS Station.

If the owner / developer of the plot falling within the radius of 200 m. from the Metro Station/MRTS, is willing to provide Public Parking space over and above the parking spaces required as per the table given in Regulation No.15.12.7 of these regulations, the same shall be allowed and in that case the premium to be paid by such developer / owner as per Regulation No.15.12.2.2 shall be reduced by the amount equal to the premium worked out for 25% of the area earmarked for such additional Public Parking space, subject to following conditions:-

- Such parking area shall be in the built-up form and shall be handed over to Planning Authority free of cost before granting the Occupation Certificate to the project. The Planning Authority should enter into an agreement with owner / developer for such parking space at the time of granting Commencement Certificate to the project. Such Public Parking area shall be clearly shown on the proposed building plan / layout and a condition to above effect shall be incorporated in the Commencement Certificate.
- The parking area shall have independent access from major road adjacent to the plot and with proper entry and exits.
- The parking area to be made available at individual site shall be at minimum 100 sq. m. at one

Rooh

place either at Ground floor / Stilt floor or first floor.

- d) The maximum parking area that can be provided shall be decided by the Commissioner, Nashik Municipal Corporation, as the case may be, on considering the location of such site and the parking requirement.
- e) A board showing the location of such public parking space should be displayed at suitable places by the Planning Authority.
- f) Area covered under such parking shall not be counted towards FSI consumption.
- g) Concerned land owner / developer / society / public company shall not be allowed to operate the public parking.
- h) The proposed development shall be further subject to such conditions as may be decided by the Municipal Commissioner.

15.12.8 In case of metro rail, development or redevelopment, proposed by the Authority / individual applicant / any other Planning Authority, from the edge of the Metro Rail, within 20 m. distance from the Metro Rail, on its either side, the concerned Planning Authority i.e. Nashik Municipal Corporation before granting such permission for development / redevelopment shall seek prior NOC from the concerned Metro Railway Authority as required under the Metro Railways (Construction of Works) Act, 1978 from the point of view of safety of the Metro Railway and such other related matters.

15.12.9 In case of any conflict between these Regulations and any other Regulation/s of the DCR, these Regulations shall prevail for the TOD zone.

15.12.10 No Compound wall / fencing shall be permissible on the boundary of plot fronting on road and 50% front marginal distance (subject to minimum of 3.0 m.) shall be kept accessible and to be used as foot paths, for pedestrians. However, it shall be permissible for the applicant to construct / erect fencing, on the boundary, after leaving the space for pedestrians as specified above.

However for the plots situated on 9mt. and 12mt. wide Roads having 100% residential use therefore above rule shall not be made applicable.

15.12.10.1 Large wholesale stores, car dealer showrooms, warehouses/storages, auto service centers, Garages etc. shall not be permissible in TOD zone.

15.12.10.2 Provision of Inclusive housing shall not be applicable in TOD zone.

15.12.10.3 For Gunthewari development regularized under the provisions of Maharashtra Gunthewari Development Act, 2001 and falling in TOD zone, seeking provisions for redevelopment, these regulations shall apply.

15.12.10.4 The width of passage shall be minimum 1.5 m. for residential use & 2.0 m. for commercial use.

Rohit

PART V
REQUIREMENTS OF PARTS OF BUILDINGS

16.0 Requirements for the various parts of the building shall be as given below

16.1 Plinth

16.1.1 Main Building: The plinth or any part of a building or out house shall be so located with respect to surrounding ground level that adequate drainage of the site is assured but height shall not be less than 0.45 m. above the surrounding ground level. In areas subject to flooding, the height of the plinth shall be at least 0.45 m. above the high flood level. In case of special housing scheme undertaken by public agencies for LIG /EWS, the minimum height shall not be less than 0.30 m.

16.1.2 Interior Courtyards: Every interior Courtyard shall be raised at least 0.15 m. above the surrounding ground level and shall be satisfactorily drained.

16.2 Habitable Rooms

16.2.1 Size - A habitable room shall have a carpet area of minimum, 7.20 sq.m. except those in the hostels attached to recognised educational institutions, the minimum size of a habitable room for the residence of a single person shall be 5.76 sq. m; the minimum width of a habitable room shall be 2.4 m. Where there is more than one room, one shall be not less than 7.20 sq. m., and other 5.76 sq. m. Where enclosed balcony area is to be counted in minimum dimensions required for a room, then such enclosed width shall not be more than 1/3 of the dimension of that room.

16.2.1.1 The size of the room in a single room tenement shall not be less than 10.5 sq. m. with a minimum width of 2.4 m.

16.2.2 Height:-The height of all rooms for human habitation shall not be less than 2.75 m. measured from the surface of the floor to the lowest point of the ceiling (bottom of slab). The minimum clear head room under beam shall be 2.4 m. In case of centrally air conditioned building, height of the habitable room shall not be less than 2.4 m, measured from the surface of the floor to the underside of the slab or to the underside of the false ceiling.

16.2.2.1 In the case of pitched roof, the average height shall not be less than 2.75 m. and the minimum height at eaves level shall not be less than 2.1 m.

16.2.2.2 However, the maximum room height shall be 4.75m. in case of all buildings excepting Residential Hotels of the category of 3 starred and above, Assembly, Institutional, Educational, Industrial, Hazardous and Storage occupancies, and in case of portions common to two floors of duplex flats. For such buildings height of room shall be as per requirement. Duplex flats shall mean a residential flat divided on two floors with an internal staircase connecting the two floors.

16.2.2.3 Height of room for Information Technology Establishment (I. T. E.) for any telematics equipment storage erection facility can have a height as required for effective functioning of that system.

16.3 Kitchen

16.3.1 Kitchen size - The area of the kitchen shall not be less than 3.3 sq. m. with a minimum width of 1.5 m.

16.3.1.1 In the case of single room tenement as given in Regulation no. 16.2.1.1, no provision for kitchen is necessary. Where alcoves (a cooking space having direct access from the main room without any inter communicating door) are provided, the size shall not be less than 2.4 sq. m. with a minimum

Beh

width of 1.2 m.

16.3.2 Height: The room height of a kitchen measured from the surface of the floor to the lowest point in the ceiling (bottom of slab) shall not be less than 2.75 m., subject to provisions of Regulation No.16.2.2.1.

16.3.3 Other Requirement: Every room to be used as kitchen shall have-

- (a) Means for the washing of kitchen utensils which shall lead directly or through a sink to grated and trapped connection to the waste pipe;
- (b) Impermeable floor.
- (c) Window of not less than 1.0 sq. m. area, opening directly on to an interior or exterior open space, but not into a ventilation shaft.

16.4 Bath Rooms, Water Closets, Combined bath room and water closet

16.4.1 Size - The minimum size shall be as under-

- (a) Independent Bathroom 1.00 x 1.20 m.
- (b) Independent Water closet 0.9 m. x 1 .10 m.
- (c) Combined bath room and water closet. 1.80 sq. m. with minimum width of 1.00 m.

16.4.2 Height:- The Height of a bathroom or water closet measured from the surface of the floor to the lowest point in the ceiling (bottom of slab) shall be not less than 2.1 m.

16.4.3 Other Requirements - Every bathroom or water closet shall -

- (a) be so situated that at least one of its wall shall open to external air with the size of opening (windows, ventilators, louvers) not less than 0.3 sq. m. in area and side not less than 0.3 m. (See Regulation No. 16.13.3)
- (b) have the platform or seat made of water tight non-absorbent material,
- (c) be enclosed by walls or partitions and the surface of every such wall or partitions shall be finished with a smooth impervious material to a height of not less than 1 m. above the floor of such a room; and
- (d) be provided with an impervious floor covering, sloping towards the drain with a suitable grade and not towards verandah or any other room.

16.4.4 No room containing water closets shall be used for any purpose except as a lavatory and no such room shall open directly into any kitchen or cooking space by a door, window or other opening. Every room containing water closet shall have a door completely closing the entrance to it.

16.5 Loft

The maximum depth of a loft shall be 1.5 m. and the loft may be provided, over residential kitchens, habitable rooms, bath rooms, corridors and over shop floor, built up to an area 25 per cent over kitchens and full space of bath rooms, water closets and corridors. In the shops loft over an area upto 33% of the carpet area may be provided. However, loft will not be allowed where mezzanine floor is provided.

16.5.1 The clear head room under loft shall not be less than 2.1 m.

16.5.2 Loft in commercial areas and industrial buildings shall be located 2 m. away from the entrance.

Bel

16.6 Mezzanine floor

16.6.1 Size: The aggregate area of the mezzanine floor shall not exceed 50 % of the built up area of that floor. The minimum size of a mezzanine floor if it is used as a habitable room shall not be less than 9.00 sq.m.

Note :- Mezzanine floor area shall be counted towards F. S. I.

16.6.2 Height -The minimum height of a mezzanine floor shall be 2.2 m. The headroom under mezzanine room shall not be less than 2.10 m.

16.6.3 Other Requirements: A mezzanine floor may be permitted in a room, provided that it conforms to the standards of habitable rooms as regards lighting and ventilation.

16.7 Store Room :-

16.7.1 Size :- The floor area of a store room in a residential building where light ventilation and height are provided at standards lower than as required for living room shall not be more than 3 sq. m. One or more store rooms may be allowed considering size of flat.

Prayer/pooja room may be allowed in same manner.

16.7.2 Height- The height of a store room shall not be less than 2.10 m.

16.8 Garage

16.8.1 Size:- The size of a garage in individual residential building shall be not less than 2.5 m. X 5 m. and not more than 3 m. X 6 m. The area of parking lock up garage shall be included in FSI calculations.

16.8.2 Height:-The maximum head room in a garage shall be 2.4 m.

16.8.3 The plinth of garage located at ground level shall not be less than 15 cm. above the surrounding ground level.

16.8.4 The garage shall be setback behind the building line for the street / road on to which the plot abut, and shall not be located affecting the access ways to the building.

16.8.5 Corner Site: When the site fronts on two streets, the location of a garage (in a corner plot) (if provided within the marginal distances) shall be on diagonally opposite the point of intersections.

16.9 Roofs

16.9.1 The roof of a building shall be so constructed or framed as to permit effective drainage of the rain water there from by means of sufficient rain water pipes of adequate size, wherever required, so arranged, jointed and fixed as to ensure that the rain water is carried away from the building without causing dampness in any part of the walls or foundations of the building or those of an adjacent building.

16.9.2 The Municipal Commissioner may require rain water pipes to be connected to a storm water drain through a covered channel formed beneath the public footpath or in any other approved manner, if not used for rain water harvesting

16.9.3 Rainwater pipes shall be affixed to the outside of the walls of the building or in such other manner as may be approved by the Municipal Commissioner.

16.9.4 Top Terrace of a building shall not be sub-divided and it shall have only common access. However,

Rooh

intermediate terraces may be allowed to be attached with flat and shall not be counted in balcony area. In no case, such area shall be allowed to be enclosed.

16.10 Basement

16.10.1 Basement shall generally be constructed within the prescribed setbacks and prescribed building line in one or two level and may be put to only following uses:

Following user shall be permissible free of FSI.

- (i) Air conditioning equipment and other machines used for services and utilities of the building;
- (ii) Parking spaces,
- (iii) DG set room, meter room and electric sub-station, effluent treatment plant, suction tank, pump room.

Following user shall be permissible and counted in FSI.

- (i) Storage incidental to principle use
- (ii) Bank locker, strong room, safe deposit vault, radio/laser therapy unit and mortuary.

Provided that if the basement is constructed below ground level and only for parking, then such basement can be extended in side and rear margins upto 3 m. form the plot boundary.

16.10.2 The basement shall not be used for any other user than mentioned above.

16.10.3 Multilevel basements may be permitted if the basement is used for parking. The ramps of minimum 3.0 m. width for entry and exit of vehicle separately shall be provided. In case of bona-fide hardship, the Municipal Commissioner may allow only one ramp with not less than 6.0 m. in width.

16.10.4 If the basement is proposed to be constructed below podium then marginal distances shall be as that of podium.

16.10.5 The basement shall have the following requirements -

- (a) Every basement shall be in every part at least 2.4 m. in height from the floor to the soffit of beam.
- (b) Adequate ventilation shall be provided for the basement with a ventilation area not less than 2.5% of the area of the basement. Any deficiency may be met by providing additional adequate mechanical ventilation in the form of blowers, exhaust fans, air conditioning systems etc.
- (c) The minimum height of the ceiling of any basement shall ordinarily be 0.9 m. and maximum of 1.2 m. above the average surrounding ground level. However it does not apply to the mechanically ventilated basements. In such cases, basement may also be allowed flushing to the average ground level
- (d) Adequate arrangement shall be made such that surface drainage does not enter the basement.
- (e) The walls and floor of the basement shall be water-tight and be so designed that the effect of the surrounding soil and moisture, if any, are taken into account in design and adequate damp proofing treatment is given; and
- (f) The access to the basement shall be separate from the main and alternate staircase providing access and exit from higher floors. Where the staircase is continuous in case of building served by more than one staircase, the same shall be of enclosed type serving as a fire separation from the basement floor and higher floors [see Regulation No. 17.4.3 (m)] Open ramps shall be permitted if

Rohit

they are constructed within the building line subject to the provision of (d).

16.11 Podium

Podium for parking of the vehicle may be permitted with following requirements / conditions

- i) Height of podium shall be at least 2.4 m. from the floor to the soffit of beam.
- ii) Podium shall not be provided in front setback space.
- iii) Minimum 6.0 m. distance shall be observed between plot boundary and podium subject to requirements of Fire Brigade Authority.
- iv) Podium shall only be used for parking and it shall be designed to take load of fire engine.
- v) Podium shall be permissible for plots having 2000sq.m. and above and may be in multilevel. However in core area the same shall be minimum 1000sq.m.
- vi) Podium shall be permissible for joining two or more buildings or wings of buildings.

16.12 Lighting and Ventilation of Rooms

16.12.1 The minimum aggregate area of opening of habitable rooms and kitchens excluding doors shall be not less than $1/10^{\text{th}}$ of floor area.

16.12.2 No portion of a room shall be assumed to be lighted if it is more than 7.5 m. from the opening assumed for lighting / ventilation of the portion, provided additional depth of any room beyond 7.5 m. may be permitted subject to provision of proportionate increase in the opening.

16.12.3 Where the lighting and ventilation requirements are not met through day lighting and natural ventilation, the same shall be ensured through artificial lighting and mechanical ventilation as per latest version of Part VIII - Building Services Section, Lighting and Ventilation of National Building Code of India published by the Bureau of Indian Standards. In the case of special types of buildings requiring artificial lighting and air-conditioning for special types of manufacturing or other process the requirements about natural day lighting and ventilation may be relaxed.

16.12.4. Ventilation Shaft:-

For ventilating the space for water closets and bath room or staircase if not opening on the exterior side of a building, open on the ventilation shaft, the size of which shall not be less than the values given below in Table No.10:

Table No.10		
Height of building in m.	Size of ventilation in sq. m	Minimum width of shaft in m.
Up to 10	1.2	0.90
Up to 12	3.0	1.50
Up to 18	4.5	1.80
Up to 24	5.4	1.80
Up to 30	8.0	2.40
Above 30	9.0	3.00

16.12.5 In residential lodging hotels where attached toilets are provided with mechanical ventilation system installed as per Regulation No. 16.12.3., the size of ventilation shaft stand relaxed

Rock

16.13 Parapet

Parapet walls and handrails provided on the edges of roof terraces, balcony etc. shall not be less than 1.05 m. and not more than 1.20 m. in height. For elevational treatment, height may be allowed upto 2.4m.

16.14 Wells

Wells intended for supply of water for human consumption or domestic purposes may be permitted at suitable place.

16.14.1 Requirements: The well shall:

- (a) have minimum internal diameter of not less than 1 m.;
- (b) be constructed to a height not less than 1 m. above the surrounding ground level to form a parapet or curb and to prevent surface water from following into a well, and shall be surrounded with a paving constructed of impervious material which shall extend for a distance of not less than 1.8 m. in every direction from the parapet or the curb forming the well head and the upper surface for such paving shall be sloped away from a well;
- (c) be a sound and permanent construction (PUCCA) throughout;
- (d) the interior surface of the lining or walls of the well shall be rendered impervious for depth of not less than 1.8 m. measured from the level of the ground immediately adjoining the well-head.

16.15 Septic Tanks

Where a septic tank is used for sewage disposal, the location, design and construction of the septic tank shall conform to requirements of Regulation No.16.15.1 and 16.15.2.

16.15.1 Location of Septic Tanks and Subsurface Absorption System:- A subsoil dispersion system shall not be closer than 12.00 m. of any source of drinking water, so as to avoid the possibility of bacterial pollution of water supply.

16.15.2 Requirements:

- (a) Dimensions of Septic Tanks: Septic tanks shall have minimum width of 75 cm., minimum depth of 1 m. below the water level and a minimum liquid capacity of 1 cu.m. Length of tanks shall be 2 to 4 times the width.
- (b) Septic tanks may be constructed of brick work, stone masonry, concrete or other suitable materials.
- (c) Under no circumstances should effluent from a septic tank be allowed into an open channel drain or body of water without adequate treatment.
- (d) Minimum nominal diameter of pipe shall be 100 mm. further, at junctions of pipes in manholes; direction of flow from a branch connection should not make an angle exceeding 45 degree with the direction of flow in the main pipe.
- (e) The gradients of land drains under drainage as well as the bottom of dispersion trenches and soak way should be between 1:300 and 1:400.
- (f) Every septic tank shall be provided with ventilating pipe of at least 50 mm diameter. The top of the pipe shall be provided with a suitable cage of mosquito proof wire mesh.

The ventilating pipe shall extend to a height, which would cause no smell nuisance to any building in the area. Generally, the ventilating pipe may extend to a height of about 2 m.

Seeb

when the septic tank is at least 15 m. away from the nearest building and to a height of 2 m. above the top of the building when it is located closer than 15 m.

- (g) When the disposal of septic tank effluent is to seepage pit, the seepage pit may be of any suitable shape with the least cross sectional dimension of 90 cm. and not less than 100 cm. in depth below the invert level of the inlet pipe. The pit may be lined with stone, brick or concrete blocks with dry open joints which should be backed with at least 7.5 cm. of clean coarse aggregate. The lining above the inlet level should be finished with mortar. In the case of pits of large dimensions, the top portion may be narrowed to reduce the size of the RCC cover slabs. Where no lining is used, especially near trees, the entire pit should be filled with loose stones. A masonry ring may be constructed at the top of pit to prevent damage by flooding of the pit by surface run off. The inlet pipe may be taken down to a depth of 90 cm. from the top as an anti-mosquito measure.
- (h) When the disposal of septic tank effluent is to a dispersion trench, the dispersion trench shall be 50 to 100 cm. deep and 30 to 100 cm. wide excavated to a slight gradient and shall be provided with 15 to 25 cm. of washed gravel or crushed stones. Open jointed pipes placed inside the trench shall be made of unglazed earthenware clay or concrete and shall have minimum internal diameter of 75 to 100 mm. Each dispersion trench should not be longer than 30 m. and trenches should not be placed closer than 1.8 m.

16.15.3 Septic Tank Requirements:- Requirements specified by State and Central Government, Public Health Institutes such as NEERI, for modern methods of disposal, may also be permissible.

16.16 Boundary Wall

The requirements of the boundary wall are given below:

- (a) Except with the special permission of the Municipal Commissioner the maximum height of the compound wall shall be 1.5 m. above the center line of the front street. Compound wall upto 2:4 m. height may be permitted if the top 0.9m. is of open type construction (railings).
- (b) In case of corner plot the height of boundary wall shall be restricted to 0.75 m. for a length equal to fanning of the road on the front and side of the intersections and balance height of 0.75 m. if required in accordance with (a) may be made of open construction (railings),
- (c) However, the provisions of (a) and (b) are not applicable to boundary wall of jails. In industrial buildings, electric sub stations, transformer stations institutional buildings like sanatoria, hospitals, industrial buildings like workshops, factories and educational buildings like schools, colleges, including the hostels, and other uses of public utility undertakings. Height upto 2.4 m. to boundary walls of these types of building may be permitted by the Municipal Commissioner.
- (d) The compound gate should open entirely inside the property and shall not open on any access/pathway/ road/street.

16.17 Office-cum-Letter Box Room

In the case of multi-storeyed multi-family dwelling apartments constructed by existing or proposed Cooperative Housing Societies or Apartment Owners Associations, Limited Companies and proposed societies, an office-cum-letter box room of appropriate size as per requirement shall be provided on the ground floor.

16.18 Meter Rooms

Meter room size shall be as per requirement of M.S.E.D.C.L. or as per number of tenements/units.

Reh

- 16.18.1** The spaces for provision of transformers shall be provided as given in Regulation no.13.6 or as per the requirements of M.S.E.D.C.L.

16.19 Chimneys

- 16.19.1** Chimneys, where provided shall conform the requirements of IS 145-1960 of latest version.
- 16.19.2** Notwithstanding the provisions of Regulation No. 16.19.1, the Chimneys shall be built at least 0.9m. above parapet wall. In the case of sloping roofs, the chimney top shall not be less than, 0:6 m. above the ridge of the roof in which the chimney penetrates.

17.0 EXIT REQUIREMENTS

- 17.1** General-The following general requirements shall apply to exits.

- (a) Every building meant for human occupancy shall be provided with exits sufficient to permit safe escape of occupants in case of fire or other emergency;
- (b) In every building, exits shall comply with the minimum requirements of this part, except those not accessible for general public use;
- (c) All exits shall be free of obstructions;
- (d) No building shall be altered to reduce the number, width or protection of exits to less than that required;
- (e) Exits shall be clearly visible and the routes to reach the exits shall be clearly marked and sign posted to guide the occupants to the floor concerned;
- (f) All exit ways shall be properly illuminated;
- (g) Fire-fighting equipment where provided along exits shall be suitably located and clearly marked but must not obstruct the exit way and yet there should be clear indication about its location from either side of the exit way;
- (h) Alarm devices shall be installed for buildings above 15m. in height, to insure prompt evacuation of the occupants concerned through the exits;
- (i) All exits shall provide continuous means of egress to the exterior of a building or to an exterior open space leading to a street and;
- (j) Exits shall be so arranged that they shall be reached without passing through another occupied unit.

17.2 Types of exits -

Exits shall be either of horizontal or vertical type. An exit may be doorway, corridor, and passageways to an internal staircase or external staircase, ramps or to a verandah and/or terraces which have access to the street or to roof of a building. An exit may also include a horizontal exit leading to an adjoining building at the same level. Lifts and escalators shall not be considered as exits.

17.3 Number and Size of Exits

The requisite number and size of various exits shall be provided, based on number of occupants in each room and floor based on the occupant load, capacity of exits; travel distance and height of building as per provisions of Regulation No. 17.3.1. to 17.3.5.

17.3.1 The buildings specified in Regulation No.17.4.4 shall have two staircases out of which one shall be fire escape staircase. This shall be subject to the provisions mentioned in the said regulations.

17.3.2 Arrangement of Exits

Exits shall be so located so that the travel distance on the floor shall not exceed as given below:

Type of Building	Travel Distance
1) Residential, Educational, Institutional and Hazardous occupancies	22.5 m.
2) Assembly, Business, Mercantile, Industrial and Storage occupancies	30.0 m.

Wherever more than one exit is required for a floor of a building, they shall be placed as remote from each other as possible. All the exits shall be accessible from the entire floor area at all floor levels

17.3.3 Occupant Load -

For determining the exits required the number of persons within any floor area or the occupant load shall be based on the actual number of occupants but in no case, less than that specified in **Table 11** below.

Table No -11 Occupant Load		
Sr. No.	Group of Occupancy	Occupant Load Gross Area*in sq. m. per person
(1)	(2)	(3)
1	Residential	12.5
2	Educational	04.00
3	Institutional	15 (see Note-1)
4	Assembly	
	(a) with fixed or loose seats and dance floors	0.6 (see Note-2)
	(b) without seating facilities including dining rooms	1.5 (see Note-2)
5	Mercantile	
	(a) Street floor and sales basement	3
	(b) Upper sale floors	6
6	Business and industrial	10
7	Storage	30
8	Hazardous	10

* The gross area shall mean plinth area or covered area

Note 1 - Occupant load in dormitory portions of homes for the aged, orphanages, insane asylums, etc. where sleeping accommodation is provided shall be calculated @ not less than 7.5 sq. m. gross area/ person.

Note 2 - The gross area shall include, in addition to the main assembly room or space, any occupied connecting room or space in the same storey or in the storeys above or below where

Rohit

entrance is common to such rooms and spaces and they are available for use by the occupants of the assembly space. No deductions shall be made in the gross area for corridors, closets or other sub-divisions. The area shall include all space serving the particular assembly occupancy.

17.3.4 Capacity of Exits -

The capacity of exits (doors and stairways) indicating the number of persons that could be safely evacuated through a unit exit width of 50 cm. shall be as given in Table -12.

Table No -12 Occupants per Unit Exit Width				
Sr. No.	Group or Occupancy	Number of Occupants		
		Stairways	Ramps	Doors
1	Residential	25	50	75
2	Educational	25	50	75
3	Institutional	25	50	75
4	Assembly	40	50	60
5	Business	50	60	75
6	Mercantile	50	60	75
7	Industrial	50	60	75
8	Storage	50	60	75
9	Hazardous	25	30	40

17.3.5 Width of Stairways-

The following minimum width provisions shall be made for stairways;

- i) For Individual House & Row housing with G+2 storeys – minimum 0.75m.
- ii) For Housing scheme in Regulation No. 23.15– minimum 1.00m.
- iii) Other types –for building mentioned below, minimum width shall be as follows

Type of Building	Built-up area on floor served by single staircase	
	upto 500 sq. m.	More than 500 sq. m.
Multistoried Residential Buildings	1.20 m.	1.50 m
Residential Hotel Buildings	1.50 m.	1.80 m
Assembly buildings like auditoria, theatres, Cinemas etc., mangal karyalaya, marriage halls.	1.80 m.	2.00 m.
Institutional Buildings like hospitals & Educational	2.00 m.	2.30 m.
All other public buildings including commercial buildings.	1.50 m.	1.80 m.

17.4 Other Requirements of Individual Exits- The detailed requirements of individual exits are given in Regulation No. 17.4.1 to 17.4.6.

17.4.1 Doorways:

- (a) Every exit doorway shall open into an enclosed stairway, a horizontal exit or a corridor or

Reeb

passage way providing continuous and protected means of egress

- (b) No exit doorway shall be less than 90 cm. in width in case of residential and 100 cm. in width in case of other buildings. Doorways shall be not less than 200 cm. in height. Doorways for bathrooms, water closet, stores etc. shall be not less than 75 cm. wide.
- (c) Exit doorways shall open outwards, that is away from the room but shall not obstruct the travel along any exit. No door, when open, shall reduce the required width of stairway or landing to less than 90 cm.
- (d) Exit door shall not open immediately upon a flight of stairs, a landing equal to at least the width of the door shall be provided in the stairway at each doorway. Level of landing shall be the same as that of the floor which it serves.

17.4.2 Revolving Doors :

Revolving doors shall not be used as required exits except in residential, business and mercantile occupancies, but shall not constitute more than half the total required door width;

17.4.3 Stairways:

- a) Interior stair shall be constructed of non-combustible materials throughout;
- b) Interior staircase shall be constructed as a self-contained unit with at least one side adjacent to an external wall and shall be completely enclosed;
- c) A staircase shall not be arranged around a lift shaft unless the latter is entirely enclosed by a material of required fire- resistance rating. For buildings more than 15m. in height, the staircase location shall be to the satisfaction of Fire Officer, Fire Brigade Authority, wherever necessary.
- d) Hollow combustible construction shall not be permitted.
- e) The minimum width of an internal staircase shall be as per the provisions of Regulation No. 17.3.5.
- f) The minimum width of treads without nosing shall be 25 cm. for an internal staircase for residential buildings. In the case of other buildings, the minimum treads shall be 30 cm. The treads shall be constructed and maintained in a manner to prevent slipping.
- g) The maximum height of riser shall be 20 cm. in the case of residential buildings and 15 cm. in the case of other buildings. They shall be limited to 12 per flight. For low income housing scheme in narrow plots, the riser may be provided in one flight.
- h) Handrails shall be provided with a minimum height of 90 cm. from the tread,
- i) The minimum unobstructed headroom in a passage under the landing of a staircase and under the staircase shall be 2.2 m.
- j) No living space, store or other fire risk spaces shall open directly into the external staircase or staircases.
- k) External exit door of staircase enclosure at ground level shall open directly to the open spaces or can be reached without passing through a large lobby.
- l) In the case of assembly, institutional, residential hotels, industrial and hazardous occupancies, the exit sign with arrow indicating the way to the escape route shall be provided on the wall / floor and shall be illuminated by electric light connected to corridor circuits. All exit way marking signs should be flush with the wall and so designed that no mechanical damage shall occur to them due to moving of furniture or other heavy equipments. Further all landings of

floor shall have floor indication boards indicating the floor number. The floor indication board shall be placed on the wall immediately facing the flight of stairs and nearest to the landing. It shall be of appropriate size.

- m) In case of single staircase it shall terminate at the ground floor level and the access to the basement shall be by a separate staircase. Wherever the building is served by more than one staircase, one of the staircases may lead to basement levels, provided the same is separated at ground level by either a ventilated lobby or cut-off screen wall without opening, having a fire resistance of not less than 2 hours with discharge point at two different ends or through enclosures. It shall also be cut off from the basement areas at various basement levels by a protected and ventilated lobby / lobbies. The staircase shall be lighted and ventilated and the minimum size of openings on walls abutting to open spaces shall be 0.3 sq. m. per landing.

17.4.4. Fire escape or external stairs –

Fire escape staircase shall be provided in case of following buildings.

- 1) Residential buildings having height more than 24 m. and less than 70m., additional fire escape staircase shall be necessary.
Provided that, it will not be necessary if built-up area on any floor does not exceed 500 sq. m.
- 2) Building having height 70 m. or more shall be provided with additional fire escape staircase, having width not less than 2.00 m. irrespective of the built up area on the floor.
- 3) For buildings above 15m. in height specified in Regulation No. 6.2.6.1 but excluding 17.4.4.(1) and 17.4.4.(2) above, fire escape staircase shall be provided.

This shall be subject to following -

- (a) Fire escape shall not be taken into account in calculating the evacuation time of building;
- (b) All fire escapes shall be directly connected to the ground;
- (c) Entrance to fire escape shall be separate and remote from the internal staircase;
- (d) The route to fire escape shall be free of obstructions at all times, except a doorway leading to the fire escape; which shall have the required fire resistance;
- (e) Fire escape shall be constructed of non-combustible materials;
- (f) Fire escape stairs shall have straight flights not less than 75 cm. wide with 25 cm. treads and risers not more than 20 cm. The number of risers shall be limited to 16 per flight.
- (g) Handrail shall be of height not less than 90 cm.
- (h) Fire escape staircase shall be connected to other staircases through common passage at every floor.
- (i) Unprotected steel frame staircase will not be accepted as means of escape. However, steel staircase in an enclosed fire rated compartment of 2 h. will be accepted as means of access.

17.4.5 Spiral stairs (fire escape) -

The use of spiral staircase shall be limited to low occupant load and to a building of height 9 m. unless they are connected to platforms, such as balconies and terraces to allow escapee to pause.

A spiral fire escape shall not be less than 150 cm. in diameter and shall be designed to give adequate headroom.

[Handwritten signature]

17.4.6 Ramps:

- (1) Ramps for pedestrians.-
 - (a) Ramps with a slope of not more than 1 in 10 may be substituted for and shall comply with all the applicable requirements of required stairways as to enclosure capacity and limiting dimensions. Ramps shall be surfaced with approved non-slipping material;
 - (b) The minimum width of the ramps in hospitals on a plot area upto 2000 sq. m. shall be 1.50m. and on a plot above 2000 sq. m. shall be 2.25 m.
 - (c) Handrails shall be provided on both sides of the ramp.
- (2) Ramps for basement or storeyed parking - For parking spaces in a basement and upper floors, at least two ramps of minimum 3 m. width and slope of not steeper than 1:8, shall be provided preferably to the opposite ends. Due to space restriction, one ramp may be allowed which shall not less than 6.0 m. in width. Such ramps may be permitted in the side and rear marginal distances. However, in case of special building mentioned in Regulation No.6.2.6.1, ramp may be permitted in the side and rear marginal distances after leaving 6.0 m. distance around building for movement of firefighting vehicles. In case of building as per Regulation No. 23.15, this shall not be applicable upto the height of 24 m. Provided that when a building abutting 3 or more roads, then ramps shall be allowed in front marginal distances facing the smaller road or less important road from traffic point of view.

17.4.7 Corridors:

- (a) The minimum width of a corridor other than internal passages shall be calculated based on the provisions of a Regulation No.17.3.3 to 17.3.5 as per the corresponding width of staircase;
- (b) In case of more than one main staircase of the building interconnected by a corridor or other enclosed space, there shall be at least one smoke stop door across the corridor or enclosed space between the doors in the enclosing walls of any two staircases.
- (c) The passages (covered or uncovered) including an arcade, a courtyard, a porch or portico, spaces to be left open to sky in accordance with these Regulations, in any premises shall not be used for any other purpose than the one permissible.

17.4.8 Refuge Area

For buildings more than 24 m. in height, refuge area of 15 sq. m. or an area equivalent to 0.3 sq. m. per person to accommodate the occupants of two consecutive floors whichever is higher shall be provided as under:

The refuge area shall be provided on the periphery of the floor or preferably on a cantilever projection and open to air at least on one side protected with suitable railings.

- a) For floors above 24 m. and upto 39 m. – One refuge area on the floor immediately above 24 m.
- b) For floors above 39 m. – One refuge area on the floor immediately above 39 m and so on after every 15 m. Refuge area provided in excess of the requirements shall be counted towards FSI. However, area remained in excess because of planning constraints shall not be counted in FSI.

17.4.9 Lifts and Escalators:-

Provision of lift shall be made for all buildings more than 16m. in height

17.4.9.1 Lifts:

- (a) All the floors shall be accessible for 24 hours by the lifts. The lifts provided in the buildings

Red

shall not be considered as a means of escape in case of emergency.

- (b) Grounding switch at ground floor level to enable the fire service to ground the lift cars in any emergency shall also be provided;
- (c) The lift machine room shall be separate and no other machinery shall be installed therein.

17.4.9.2 Escalators :

Escalators may be permitted in addition to required lifts. Such escalators may be permitted in atrium area in shopping malls / public buildings.

17.4.10 Fire Lift

Where applicable, fire lifts shall be provided with a minimum capacity for 8 passengers and fully automated with emergency switch on ground level. In general, buildings 15 m. in height or above shall be provided with fire lifts. In case of fire, only fireman shall operate the fire lift. In normal course, it may be used by other persons. Each fire lift shall be equipped with suitable inter-communication equipment for communicating with the control room on the ground floor of the building. The number and location of fire lifts in a building shall be decided after taking into consideration various factors like building population, floor area, compartmentation, etc.

17.4.11 Additional requirements in case of Housing Schemes

Following amenities shall be provided in any housing scheme and shall be counted in FSI

- i) Fitness Centre, Crèche, society office cum letter box room, admeasuring area of about 20 sq. m. in scheme having minimum 100 flats and thereafter additional 20 sq. m. area for every 300 flats.
- ii) Sanitary block for servants having maximum area of 3.00 sq.m. in schemes having minimum 100 flats and thereafter additional 3.00 sq.m. area for every 200 flats.
- iii) Drivers room of size 12 sq.m. with attached toilet in schemes having minimum 100 flats and thereafter additional 10 sq.m. area for every 300 flats.

In case of scheme having more than 1000 flats, the above amenities shall be reasonably provided keeping in view the above requirements.

18.0 FIRE PROTECTION REQUIREMENTS

All buildings shall be planned, designed and constructed to ensure fire safety and this shall be done in accordance with Part IV of Fire Protection of National Building Code of India and Maharashtra Fire Prevention and Life Safety Measures Act, 2006, as prescribed in Appendix 'J' In case of buildings identified in Regulation No. 6.2.6.1., the building schemes shall also be cleared by the Fire Officer, Fire Brigade Authority.

19.0 SPECIAL REQUIREMENTS OF OTHER BUILDINGS:-

19.1 Educational buildings.

19.1.1 Educational building shall only be permitted if area as mentioned below is available for playground.

Sr.No.	Area of land	Area of Play Ground
(i)	Upto 5 Hec	40%
(ii)	Above 5 Hec	For first 5 hec. 40% and for remaining 20%

Redh

However, this provision shall not be applicable to already approved existing building wherein construction of additional floor is proposed.

19.1.2 No classroom shall admeasure less than 38 sq. m. with a min dimension of 5.50 m.

19.1.3 The height of any classroom shall not be less than 3.60 m.

19.2 Institutional Buildings

(Hospital, Maternity Homes and Health Centre, Sanatoria).

19.2.1 Hospitals and Sanatoria (special buildings), preferably, shall be constructed on independent plot.

19.2.2 Every building shall have a refuge collection area of minimum 7.50 sq. m. size. The same shall not be allowed in marginal distances. Modern method of incineration of the refuge may be adopted.

19.3 Cinema Theatre/Multiplex

19.3.1 Construction of Cinema Theatre / Multiplex shall confirm to the provisions of Maharashtra Cinema (Regulations) Rules, 1966, as amended from time to time.

19.4 Mercantile Buildings.

19.4.1 Minimum area of shop shall be 6 Sq. m. with a minimum width of 2.0 m.

19.5 Industrial Building

19.5.1 In the case of Industrial Buildings with different operations/processes, the different (gaseous, solid, liquid) effluents shall be so treated, subject to the approval of Maharashtra Prevention of Water Pollution Control Board and Chief Inspector of Steam Boilers and Smoke Nuisance, before letting it out in to the air, ground or water course.

19.5.2 For construction of industrial building, buffer zone of 23 m. wide shall be left from residential or incompatible zone, wherever necessary. Such buffer zone may be part of sizable required recreational open space. Roads and marginal distance may also be treated as part of buffer zone. However, area of such buffer zone shall be counted in gross area for computation of FSI. Where green belt is shown in development plan between residential and industrial zone, area of such green belt shall be counted in gross area for calculation of FSI.

Provided that marginal distance for a building shall not be exclusive of buffer zone.

The floor height for industrial building shall be as per requirement.

Beh

PART VI
PARKING, LOADING AND UNLOADING SPACES

20.0 PARKING, LOADING AND UNLOADING SPACES: -

20.1 Parking spaces –

Wherever a property is to be developed or redeveloped, parking spaces at the scale laid down in these Regulations shall be provided. When additions are made to an existing building, the new parking requirements will be reckoned with reference to the additional space only and not to the whole of building but this concession shall not apply where the use is changed. The provisions for parking of vehicles shall be as given in **Table No. 14**.

20.1.1 General space requirements

- (i) **Types:** The parking spaces mentioned below include parking spaces in basements or on a floor supported by stilts, podium or on upper floors, covered or uncovered spaces in the plot and / or lock up garages. The height of the stilt shall generally be allowed upto 3 m. and shall not be less than 2.4 m. from bottom of beam. More height may be allowed in case of shopping malls, hotels etc. as per requirements.
- (ii) **Size of parking space -** The minimum sizes of parking spaces to be provided shall be as shown below in **Table No.13**

Table No- 13		
Sr. No.	Type of Vehicle	Minimum Size/ area of parking space
(1)	(2)	(3)
(a)	Motor vehicle	2.5 m. X 5 m.
(b)	Scooter, Motor Cycle.	1.0 m. x 2.0 m.
(c)	Bicycle	0.50 m. x 1.4 m.
(d)	Transport vehicle	3.75 m. X 7.5 m.
Note:	In the case of parking spaces for motor vehicle, upto 50 percent of the prescribed space may be of the size of 2.3 m. X 4.5 m.	

- (iii) **Marking of parking spaces:** Parking space shall be paved and clearly marked for different types of vehicles.
- (iv) **Maneuvering and other ancillary spaces:** Off street parking space must have adequate vehicular access to a street and the area shall be exclusive of drives, aisles and such other provisions required for adequate maneuvering of vehicles.
- (v) **Ramps for Basement parking:-** Ramps for parking in basement should conform to the requirement of Regulation No.17.4.6.
- (vi) **Bus bay for schools / multiplex / assembly buildings/group housing:-** While granting development permission, a bus bay of required size shall be provided along main road on which plot abuts. This shall be applicable for housing scheme having more than 500 flats.

Table No 14
Off Street Parking Spaces

Sr. No.	Occupancy	One parking Space for every (3)	Core Area			Outside Core Area		
			Car (4)	Scooter (5)	Cycle (6)	Car (7)	Scooter (8)	Cycle (9)
1.	Residential i) Multi-family residential	(2)	2	2	2	3	2	2
		(a) One Tenement having Carpet area equal to 120 sq. m. and above	1	2	2	2	2	2
		(b) One Tenement having Carpet area equal to or above 80 but less than 120 sq. m.	1	4	2	1	4	2
		(c) One tenement having Carpet area equal to or above 40 but less than 80 sq. m.	1	4	4	1	4	4
		(d) Four tenements having Carpet area upto 40 sq. m.	2	3	3	2	3	3
	ii) Lodging establishments tourist homes, hotels with lodging accommodation.	(a) For every five guest rooms	0	8	2	2	8	4
	iii) Restaurants	(a) For hotel, eating houses 40 sq. m. of Carpet area of restaurant including kitchen, pantry hall, dining rooms etc.	2	3	3	2	4	2
	iv) Three and above star hotels	For every five guest rooms	2	6	5	2	6	5
2.	Institutional (Hospital, Medical Institutions)	For 80 sq. m. Carpet area or fraction thereof.	4	12	8	4	12	8
3.	Assembly (theatres, cinema houses, concert halls, auditoria, assembly halls including those of college and hostels)	For every 40 Seats.	4	20	8	5	20	8
4.	Mangal Karyalaya / Marriage Halls, Cultural Halls	For every 100 sq.m. Carpet up area / covered area or fraction thereof.	4	20	8	5	20	8

DCPR-2015 FOR NASHIK MUNICIPAL CORPORATION

5.	Educational – Schools and administrative as well as public service areas therein	100 sq. m. Carpet area of administrative as well as public service areas of the school	2	4	4	2	4	4	4
		For every 3 class rooms	2 (LCV/Mini bus/Tempo)	20	10	2	20	20	10
	iii) College	100 sq. m. Carpet area of administrative as well as public service areas of the college	2	15	10	2	20	20	10
6.	Government or semipublic or private business buildings.	For every 3 class rooms	2	75	30	2	90	30	30
7.	Mercantile (markets, department al stores, shops and other Commercial users) including wholesale markets	100 sq. m. Carpet area or fraction thereof	2	12	4	3	15	4	4
8.	Industrial	100 sq. m. Carpet area or fraction thereof	2	4	4	2	4	4	4
9.	Storage (any type)	200 sq. m. Carpet area or fraction thereof	2	8	3	2	8	8	3
10.	Plots less than 200 sq. m. (any use)	200 sq. m. Carpet area or fraction thereof	0	2	4	1	4	4	8
			0	2	4	1	4	4	8

Note 1 :- For plots upto 100 sq. m. as in the case of shops, row houses parking space need not be insisted.
Note 2 :- Fraction of parking unit need not be provided. However, in case where proportional number of vehicles is less than 1 (i.e. fraction) it will be rounded to the next full number.

Note 3 :- In case of independent single family residential bungalows having plot area upto 300 sq. m., parking space need not be insisted separately.

Note 4 :- Further a garage shall be allowed in rear or side marginal distance at one corner having minimum dimension of 2.5 m. x 5.0 m. & maximum dimension 3 m. x 6 m. i.e. minimum 12.5 sq. m. and maximum 18.0 sq. m. Carpet area.

Note 5 :- Mechanical Parking shall be permissible in case of parking provided over and above the requisite parking requirements stipulated under these regulation.

- 20.2 Off street parking space shall be provided with adequate vehicular access to a street, and the area of drives, aisles and such other provisions required for adequate maneuvering of vehicle shall be exclusive of the parking space stipulated in these regulations.
- 20.3 To meet the parking requirements as per these regulations, common parking area for group of buildings, open or multi-storeyed, may be allowed in the same premises.
- 20.4 In addition to the parking spaces provided for building of Mercantile (Commercial) like office, market, departmental store, shopping mall and building of industrial and storage, loading and unloading spaces shall be provided at the rate of one space for each 1000 sq. m. of floor area or fraction thereof exceeding the first 200 sq. m. of floor area, shall be provided. The space shall not be less than 3.75 m. x 7.5 m.
- 20.5 Parking lock up garages shall be included in the calculation for floor space for F.S.I. calculations.
- 20.6 The space to be left out for parking as given in Regulation No.20.1 to 20.5 shall be in addition to the marginal distances left out for lighting and ventilation purposes as given in Regulation no.15.6. Those spaces may be used for parking provided minimum distance of 3 m. (6.0 m. in case of special building mentioned in Regulation No.6.2.6.1) around the buildings is kept free of any parking or loading and unloading spaces excepting the buildings as mentioned in Regulation No.20.5. Such parking area may be allowed to cover on top by sheet roofing so as not to infringe the marginal distances to be kept open.
- 20.7 In case of parking spaces provided in basements, at least two separate ramps of adequate width and slope for entry and exit (as per Regulation No. 17.4.6) shall be provided preferably at opposite ends.
- 20.8 In addition to the regular parking area as per this regulation, provisions for visitors parking at 5% of the regular parking required under these regulations shall be made in respect of residential buildings.

		utilisation regulations.
6) Educational – (a) Primary School (b) High School (c) College	Planning Authority/ Appropriate Authority/ Registered Public Educational Institution Trust/Owner	<p>The Planning Authority/ Appropriate Authority may acquire and develop the site for the same purpose. The Planning Authority/ Appropriate Authority after acquiring land or after acquiring and constructing the building on it, as the case may be, lease out the same as per the provisions of the Municipal Corporations Act, to the Registered Public Educational Institution trust for developing and running or only for running the same.</p> <p style="text-align: center;">OR</p> <p>The owner may be allowed to develop the reservation for the same purpose. The Registered Public Educational Institution trust on behalf of owner may be allowed to be develop subject to terms /conditions as prescribed by the Planning Authority.</p> <p style="text-align: center;">OR</p> <p>i) The Commissioner may allow the owner to develop the reservation, subject to handing over to the Planning Authority 50 % independent plot along with 50% constructed amenity of total area free of cost in lieu of construction amenity TDR as per general Regulation No.(iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The owner shall be entitled to develop remaining 50 % land for the uses permissible in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p> <p>iii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI if any (after deducting in-situ FSI as mentioned in sr. no. (ii) above) which shall be utilised as per the TDR utilisation regulations.</p> <p>Provided that the area of reservation to be handed over shall not be less than norms decided by the Education Department.</p> <p>iv) Reservation shall not be allowed to be developed in parts.</p>
(d) Educational Complex	Planning Authority/ Appropriate Authority/ Land Owner	<p>The Planning Authority/ Appropriate Authority may acquire and develop the site for the same purpose.</p> <p style="text-align: center;">OR</p> <p>The Planning Authority/ Appropriate Authority after acquiring land or after acquiring and constructing the building on it, as the case may be, lease out the same</p>

		<p>as per the provisions of the Municipal Corporations Act, to the Registered Public Educational Institution Trust for developing and running or only for running the same.</p> <p style="text-align: center;">OR</p> <p>The owner may be allowed to develop the reservation for the same purpose. The Registered Public Educational Institution trust on behalf of owner may be allowed to be develop subject to terms /conditions as prescribed by the Planning Authority.</p> <p style="text-align: center;">OR</p> <p>If the area of the Educational Complex reservation is more than 3.00 Hect, then</p> <p>i) The Commissioner may allow the owner to develop the reservation, subject to handing over to the Planning Authority 50 %independent plot along with 50% constructed amenity of total area free of cost in lieu of construction amenity TDR as per general Regulation No.(iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI if any (after deducting in-situ FSI as mentioned in sr. no (ii) above) which shall be utilised as per the TDR utilisation regulations.</p> <p>iii) The Planning Authority, if required, shall allow TDR to the owner after deducting in-situ FSI utilized on 50% land mentioned in (ii).</p>
<p>7) Residential(R)-</p> <p>(a)Public Housing EWS/LIG Housing.</p> <p>(b)High Density Housing.</p> <p>(c)Housing for Dis-housed.</p> <p>(d) Public Housing / Housing for Dis-housed.</p> <p>(e)Reservation similar as above.</p>	<p>Planning Authority/ Appropriate Authority/ Owner</p>	<p>Planning Authority / Appropriate Authority may acquire the reserved land and develop for the same purpose.</p> <p style="text-align: center;">OR</p> <p>i) The Municipal Commissioner may allow the owner to develop the reservation, subject to handing over of 40% land alongwith 50% built up area of basic FSI constructed tenements of 25 sq.m. to 30sq.mt carpet area to the Planning Authority free of cost in lieu of construction amenity TDR as per general Regulation No.(iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The owner shall be entitled to develop remaining 60 % land for the uses permissible in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p>

Roh

		<p>iii) The Planning Authority, if required, shall allow TDR to the owner after deducting in-situ FSI utilized on 40% land mentioned in (i).</p> <p>iv) The Planning Authority / Appropriate Authority shall allot such tenement on priority to the persons dispossessed by implementation of Development Plan.</p> <p style="text-align: center;">OR</p> <p>The Municipal Commissioner may allow the owner to develop the reservation, subject to</p> <p>a) Handing over of 50 % land to Planning Authority, for laying out plots for EWS/LIG, The owner shall thereafter be entitled to develop remaining plot as per the uses permissible in residential zone with permissible FSI of entire plot on remaining plot without taking into account the area handed over to the Planning Authority.</p> <p>The Planning Authority / Appropriate Authority shall prepare layout for EWS/LIG plots and allot such plots on priority to the persons dispossessed by implementation of Development Plan. The Planning Authority may construct EWS/LIG tenements on such land.</p> <p>Owner can select any one option of the above, once the permission for that option is granted and work commenced then he cannot be permitted to shift for other option.</p>
<p>8) Assembly and Institutional- Town Hall, drama Theatre, Auditorium, Samaj Mandir, Community Hall, Multipurpose Hall etc.</p>	<p>Planning Authority/ Appropriate Authority/ Owner</p>	<p>i) The Planning Authority / Appropriate Authority may acquire and develop the site for the same purpose.</p> <p>ii) The Planning Authority / Appropriate Authority after acquiring the land or after acquiring and developing the same, as the case may be, lease out as per the provisions of the Municipal Corporations Act, to a Registered Public Institution to develop and running or only for running the same.</p> <p style="text-align: center;">OR</p> <p>i) The Commissioner may allow the owner to develop the reservation, subject to handing over to the Planning Authority 50 % independent plot along with 50% constructed amenity of total area free of cost in lieu of construction amenity TDR as per general Regulation No.(iii) mention below & as per norms prescribed by Municipal Commissioner.</p> <p>ii) The owner shall be entitled to develop remaining</p>

Rech

		<p>50 % land for the uses permissible in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p> <p>iii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI if any (after deducting in-situ FSI as mentioned in sr. no. (ii) above) which shall be utilised as per the TDR utilisation regulations.</p> <p>iv) Reservation shall not be allowed to be developed in parts.</p>
9) Reservations of composite nature like Vegetable Market & Shopping Centre, Town Hall & Library, etc.	Planning Authority/ Appropriate Authority/ Owner	<p>i) The Planning Authority / Appropriate Authority may acquire and develop the site for the same purpose.</p> <p>Clarification-</p> <p>For the reservation of composite nature, proposed in Development Plan except Town Hall & Library, area of each user shall be considered equal i.e. 50-50% and such area shall be allowed to be developed as per the guidelines applicable for such reservation as mentioned in these regulations.</p> <p>For Town Hall & Library, area of Library shall be 10% of area of Town Hall.</p>
10) Reservations which are not included in these regulations but are compatible to other similar type of reservation.	Planning Authority/ Appropriate Authority/ Owner	<p>Planning Authority/ Appropriate Authority may acquire the reserved land and develop for the same purpose.</p> <p style="text-align: center;">OR</p> <p>The development permissions for such type of user under this Regulation may be granted by the Municipal Commissioner in consultation with the Divisional Joint Director of Town Planning, subject to verification of compatibility of both the users and allowed to be developed as per the guidelines applicable for such reservation as mentioned in these regulations.</p>
11) For other buildable reservations shown in Development Plan which are not covered above	Planning Authority/ Appropriate Authority Owner.	<p>The Planning Authority / Appropriate Authority may acquire and develop the reservation site for the same purpose.</p> <p style="text-align: center;">OR</p> <p>i) The Municipal Commissioner may allow the owner to develop the reservation, subject to handing over to the Planning Authority 40 % independent plot along with 50% constructed amenity of total area free of cost in lieu of construction amenity TDR as per general Regulation No.(iii) mention below & as per</p>

Boch

		<p>norms prescribed by the Municipal Commissioner.</p> <p>ii) The owner shall be entitled to develop remaining 60 % land for the uses permissible in adjoining zone with full permissible FSI of the entire Plot and permissible TDR potential of the entire Plot.</p> <p>iii) The Municipal Commissioner, if required, shall allow the TDR for the unutilised FSI if any (after deducting in-situ FSI as mentioned in sr. no (ii) above) which shall be utilised as per the TDR utilisation regulations.</p> <p>iv) Reservation shall be allowed to be developed in parts.</p>
12) Reservations for the Appropriate Authority other than Municipal Corporation	Planning Authority/ Appropriate Authority/ Owner	<p>Planning Authority / Appropriate Authority may acquire the reserved land and develop for the same purpose.</p> <p style="text-align: center;">OR</p> <p>The Municipal Corporation may allow the owner to Develop the reservation subject to condition that;</p> <p>i) Wherever the reservation is to be developed by the Appropriate Authority other than Municipal Corporation, No Objection Certificate from the Appropriate Authority shall be obtained before granting development permission.</p> <p>ii) The concerned Appropriate Authority (other than the State Government Department) shall deposit cost of construction for the built-up area to be handed over to it, as per Annual Statement of Rates with the Planning Authority. However, the Municipal Commissioner shall handover such constructed area to the State Government / concerned State Government Department free of cost.</p>

General conditions to allow development under above regulations:-

- i) If the area of reservation is not adequate to construct independent building as mentioned above OR When it is not possible to handover individual plot along with public amenity, then in such cases Municipal Commissioner may allow composite building on said land subject to condition that the built up area mentioned as above may be allowed to be handed over to the Planning Authority or Appropriate Authority, as the case may be, preferably on ground floor and subject to premium as may be decided by Government from time to time. If ground floor is utilised for parking, then on stilt/first floor with separate entry & exit from public street. In such cases, built-up area along with proportionate undivided share of land shall be handed over to the Planning Authority or Appropriate Authority, as the case may be. In such cases no compensation of proportionate undivided land share shall be permissible.
- ii) In cases where not specifically mentioned in this regulation, if the area under the reservation is owned by more than one owners, then the owner/s may come forward jointly or the owners holding at least 50% or more area shall be allowed to develop the reservation on such land. It is mandatory for other owners to construct amenity contiguous to the earlier development.

Seh

- iii) The owner/developer shall be entitled for construction amenity TDR as per the TDR regulations after handing over the constructed amenity free of cost on the land surrendered to the planning Authority under this Regulation. For specific reservation where construction amenity is not required by the Commissioner, in such cases Municipal Commissioner should not insist for such amenity.
- iv) It shall be obligatory on Planning Authority to make registered agreement with the developer /owner at the time of granting the development permission subject to terms and conditions as it deem fit. Occupancy Certificate shall be issued only after compliance of all terms & conditions and getting possession of the constructed amenity.
- v) The above permissions for development of reservations shall be granted by the Municipal Commissioner as per the norms mentioned in these regulations
- vi) The area / built-up area to be handed over to the Planning Authority under these Regulations shall be earmarked on the sanctioned building plan clearly mentioning the same, and registered agreement to that effect shall be executed. After completion of construction, the said amenity shall be handed over by executing the deed of transfer in this respect and expenses thereon shall be borne by the owner. The occupation certificate to the construction belonging to owner shall be granted only after handing over said amenity to the Planning Authority. The constructed amenity shall be made available to the general public by the Municipal Commissioner within 3 month from possession as per the condition as Municipal Commissioner deem fit.
- vii) In cases, where permission for development under accommodation reservation principle is already granted as per earlier regulations, the same shall continue to be valid till completion of construction.
- viii) Provisions of Regulations of Inclusive Housing, Amenity Space if any, shall not be applicable for development under this Regulation. Moreover Regulation of required recreational open space shall not be applicable for development of reservation other than Residential purpose as mention at sr. no 7.
- ix) Not withstanding anything contained in these regulations, there shall be no cap for utilization of available in-situ FSI/and TDR potential of the entire plot on the remaining plot provided that no relaxation in side margin shall be permissible.
- x) Once sanction is granted under this regulation, the owner /developer shall have to complete the development and hand over the developed reservation to Planning Authority within the period as specified by Municipal Commissioner. Thereafter Planning Authority may levy penalty for any delay.

22.0 TRANSFERABLE DEVELOPMENT RIGHTS:

- 22.1 Transferable Development Rights (TDR) is compensation in the form of Floor Space Index (FSI) or Development Rights which shall entitle the owner for construction of built-up area subject to provisions in this regulation. This FSI credit shall be issued in a certificate which shall be called as Development Right Certificate (DRC).

Development Rights Certificate (DRC) shall be issued by Municipal Commissioner under his signature and endorse thereon in writing in figures and in words, the FSI credit in square meters of the built-up area to which the owner or lessee is entitled, the place from where it is generated and the rate of that plot as prescribed in the Annual Statement of Rates issued by the Registration Department for the concerned year.

22.2 CASES ELIGIBLE FOR TRANSFERABLE DEVELOPMENT RIGHTS (TDR):-

Compensation in terms of Transferable Development Rights (TDR) shall be permissible for

- i) lands under various reservations for public purposes, new roads, road widening etc. which are subjected to acquisition, proposed in Draft or Final Development Plan, prepared under the provisions of the Maharashtra Regional and Town Planning Act,1966;
- ii) lands under any deemed reservations according to any regulations prepared as per the

Beh

- provisions of Maharashtra Regional & Town Planning Act, 1966;
- iii) lands under any new road or road widening proposed under the provisions of Maharashtra Municipal Corporation Act ;
- iv) development or construction of the amenity on the reserved land;
- v) unutilized FSI of any structure or precinct which is declared as Heritage structure or Precinct under the provisions of Development Control Regulations, due to restrictions imposed in that regulation;
- vi) in lieu of constructing housing for slum-dwellers according to regulations prepared under the Maharashtra Regional & Town Planning Act, 1966;
- vii) The purposes as may be notified by the Government from time to time, by way of, modification to, new addition of, any of the provisions of sanctioned Development Control Regulations.

22.3 CASES NOT ELIGIBLE FOR TRANSFERABLE DEVELOPMENT RIGHTS (TDR):-

It shall not be permissible to grant Transferable Development Rights (TDR) in the following circumstances:-

- i) For earlier land acquisition or development for which compensation has been already paid partly or fully by any means;
- ii) where award of land has already been declared and which is valid under the Land Acquisition Act, 1894 or the Right to Fair Compensation & Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 unless lands are withdrawn from the award by the Appropriate Authority according to the provisions of the relevant Acts.
- iii) In cases where layout has already been sanctioned and layout roads are incorporated as Development Plan roads prior to these regulations.
- iv) in cases where layout is submitted along with proposed Development Plan Road, in such cases TDR shall not be permissible for the width of road that would be necessary according to the length as per Development Control Regulations;
- v) if the compensation in the form of FSI / or by any means has already been granted to the owner.
- vi) where lawful possession including by mutual agreement /or contract has been taken.
- vii) For an existing user or retention user or any required compulsory open space or recreational open space or recreational ground, in any layout.
- viii) For any designation, allocation of the use or zone which is not subjected to acquisition.

22.4 GENERATION OF THE TRANSFERABLE DEVELOPMENT RIGHTS (TDR)

22.4.1 Transferable Development Rights (TDR) against surrender of land :-

- 22.4.1.1 For Surrender of the gross area of the land which is subjected to acquisition, free of cost and free from all encumbrances, the owner shall be entitled for TDR or DR irrespective of the FSI permissible or development potential of the vary said land to be surrender and also that of land surrounding to such land at the rate as given below:-

Area Designated on DP	Entitlement for TDR/DR
Non-core Area	2 times the area of surrendered land.
Core Area	3 times the area of surrendered land.

(Explanation: Above entitlement may also be applicable to the compensation paid in the form of FSI to the owner to be utilised on unaffected part of same land parcel and in such cases the procedure of DRC shall not be insisted.)

Provided that, if leveling of land and construction/erection of the compound wall / fencing as per Clause No.22.4.1.2 to the land under surrender is not permissible as per the prevailing Development Control Regulations, the quantum of TDR shall be reduced to 1:1.85 and 1:2.85 in non-core area and core area respectively.

Provided also that Additional / incentive Transferable Development Rights (TDR) to the extent of 20 %, 15 % , 10 % and 5% of the surrendered land area shall also be allowed to the land owners who submit the proposal for grant of Transferable Development Rights (TDR) within 1, 2, 3 years and 5 years from this notification respectively.

Provided that the quantum of generation of TDR as prescribed above, shall not be applicable for TDR generated from construction of amenity or construction of reservation/roads, Slum TDR, and Heritage TDR. Also the quantum of Transferable Development Rights (TDR) generated for reservation in CRZ/BDP/HTHS areas or in areas which have some natural or legal constraint on development shall be as decided by the Government separately.

- 22.4.1.2** DRC shall be issued only after the land is surrendered to the Municipal Corporation, free of cost and free from encumbrances and after levelling the land to the surrounding ground level and after constructing / erecting a 1.5 m. high compound wall / fencing i.e. brick/stone wall up to 0.60 m. above ground level and fencing above that up to remaining height with a gate, at the cost of the owner and to the satisfaction of the Municipal Commissioner. Provided that, if on certain lands such construction / erection of compound wall / fencing is prohibited or restricted by any regulation, then quantum of Transferable Development Rights (TDR) shall be reduced as prescribed in proviso to Clause 22.4.1.1.

Provided further that, such construction / erection of compound wall/ fencing shall not be necessary for area under Development Plan roads. In such cases TDR equivalent to entitlement as mentioned in Regulation No. 22.4.1.1 shall be granted without any reduction.

- 22.4.1.3** If any contiguous land of the same owner/developer, in addition to the land under surrender for which Transferable Development Rights (TDR) is to be granted, remains unbuildable, the Municipal Commissioner may grant Transferable Development Rights (TDR) for such remaining unbuildable land also if the owner / developer hands it over free of cost and free from all encumbrance and encroachment. If such land is from the proposed roads then such land shall be utilised for road side parking, garden, open space or road side amenities including bus bays, public toilets or any compatible user as the Commissioner may decide and if the such land is from the proposed reservation then same shall be included in such proposed reservation and shall be developed for the same purpose. The Municipal Commissioner shall quarterly report such cases to Government.
- 22.4.1.4** In case of lessee, the award of Transferable Development Rights (TDR) shall be subject to lessee paying the lessor or depositing with the Planning Authority for payment to the lessor, an amount equivalent to the value of the lessors' interest to be determined by the Planning Authority on the basis of Land Acquisition Act, 1894 or the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 against the area of land surrendered free of cost and free from all encumbrances.

22.4.2 Transferable Development Rights (TDR) against Construction of Amenity-

When an owner or lessee with prior approval of Municipal Commissioner, may develop or

Bebh

construct the amenity on the surrendered plot or on the land which is already vested in the Planning Authority, at his own cost subject to such stipulations as may be prescribed and to the satisfaction of the Municipal Commissioner and hands over the said developed/constructed amenity free of cost to the Municipal Commissioner then he may be granted a Transferable Development Rights (TDR) in the form of FSI as per the following formula:-

Construction Amenity TDR in sq.m. = A/B * 1.25

Where,

A= cost of construction of amenity in rupees as per the rates of construction mentioned in Annual Statement of Rates (ASR) prepared by the Inspector General of Registration for the year in which construction of amenity is commenced.

B = land rate per sq.m. as per the Annual Statement of Rates (ASR) prepared by the Inspector General of Registration for the year in which construction of amenity is commenced.

22.5 UTILISATION TRANSFERABLE DEVELOPMENT RIGHTS (TDR):-

22.5.1 A holder of DRC who desires to use FSI credit therein on a particular plot of land shall attach valid DRCs to the extent required with his application for development permission. Proposal for Transferable Development Rights (TDR) utilisation shall be submitted alongwith the documents as may be prescribed by the Municipal Commissioner or by the Government from time to time.

22.5.2 With an application for development permission, where an owner seeks utilisation of DRC, he shall submit the DRC to the Municipal Commissioner who shall endorse thereon in writing in figures and words, the quantum of the TDR proposed to be utilised, before granting development permission. Before issuance of Occupation Certificate, the Municipal Commissioner shall endorse on the DRC, in writing in figures and words, the quantum of TDR/DRs actually used and the balance remaining if any.

22.5.3 The Transferable Development Rights (TDR) generated from any land use zone shall be utilised on any receiving plot irrespective of the land use zone and anywhere in core or non-core area earmarked on Development Plan. The equivalent quantum of Transferable Development Rights (TDR) to be permitted on receiving plot shall be governed by the formula given below:-

Formula: X = (Rg / Rr) x Y

Where, X = Permissible Utilisation of TDR/DR in sq.m. on receiving plot

Rg = Rate for land in Rs. per sq. m. as per ASR of generating plots in generating year

Rr = Rate for land in Rs. per sq. m. as per ASR of receiving plot in generating year

Y = TDR debited from DRC in sq. m.

22.5.4 Utilisation of Transferable Development Rights (TDR) and Road Width Relation:-

22.5.4.1 Notwithstanding anything contained in any regulation, the total maximum permissible built-up area and utilisation of Transferable Development Rights (TDR) on receiving plot shall be, subject to the road width, as prescribed below:-

Sr. No.	Plots Fronting on Road width	Maximum permissible TDR Loading
1	2	3
1	9m. and above but less than 12m.	0.40
2	12m. and above but less than 18m.	0.65
3	18m. and above but less than 24m.	0.90

5	30 m. and above	1.40

Roel

Note:-

i) Column No.3 shows the maximum permissible TDR that can be utilised on any plot. Provided that specific area based restriction where TDR utilisation is not permissible by earlier regulations shall remain in force except for core areas.

Provided also that the above utilisation of TDR would be available to an existing road width of 9 m. and above so marked under the relevant Municipal Corporation Act.

ii) FSI loading limit on such plot (Maximum Building potential) shall be the basic FSI+TDR +Additional FSI on payment of premium if any +Road widening FSI of the very said plot if any.

However, the Municipal Commissioner shall not grant any relaxation due to such allowable loading potential unless he himself satisfied that there is constraint on development.

iii) Maximum permissible TDR loading as mentioned above on any plot shall be exclusive of FSI allowed for inclusive housing if any.

iv) The priority and quantum of maximum permissible TDR loading mentioned above shall include atleast 20 % slum TDR (wherever applicable) and DRC generated from the vary said land and/or DRC generated from other location up to the permissible limit mention above .

v) If a plot is situated on internal road having dead end within 50 m. from the main road, then such plot shall be treated as fronting on main road for the purpose of utilisation of TDR.

22.5.4.2 Provided that, the restrictions of total maximum permissible built up area in terms of FSI with respect to road width mentioned above shall not be applicable in cases where, the permissible FSI is more than the basic FSI in various schemes, like Slum Rehabilitation Scheme, Redevelopment of cess buildings, redevelopment of dangerous buildings, Urban Renewal Scheme, Redevelopment of MHADA buildings/Colonies, Metro Influence Zone BRTs, TODs etc. where specific provisions which are sanctioned by the Government shall apply.

22.5.4.3 Provided that, the additional FSI permissible in certain categories of buildings such as, Educational building, Registered Charitable Institutional/ Medical / Hospital Building, Star Category Hotel, Religious Building etc. as per prevailing Development Control Regulations, if any, can be availed either by full or part utilization of TDR or full or part utilization of additional FSI at the option of owner. However, the restriction of road width mentioned as above shall not be applicable when the owner exercises his option of availing utilization of additional FSI and in such cases limitation of maximum building potential as mentioned in Regulation No 15.4. shall not be applicable.

22.5.4.4 The utilisation of Transferable Development Rights (TDR) shall be permissible by considering Gross Plot Area excluding area affected by reservations or deemed reservation, if any. This principle shall also be applicable to the reservations to be developed under the provisions of Accommodation Reservation, by considering the total area of such reservation before surrender.

22.5.4.5 Areas Restricted from Utilisation of Transferable Development Rights (TDR) :-

Utilisation of Transferable Development Rights (TDR) shall not be permitted in following areas:-

- Agricultural / no development / Green zone / HTHS Zone and Bio Diversity Park reservation in the Development Plan.
- Area within the flood control line i.e. blue line (prohibitive zone) as specified by Irrigation Department.
- Coastal regulation zone.
- Where the permissible basic Zonal FSI is less than 0.75.

Reh

e) Area having developmental prohibition or restrictions imposed by any notification issued under the provisions of any Central/State Act (like CRZ regulations, Defence restriction areas, etc.) or under these regulations.

22.6 GENERAL STIPULATION:-

22.6.1 Development Rights (DRs) will be granted to an owner or lessee, only for reserved lands which are retainable and not vested or handed over to the Government /Urban Local Bodies and not exempted under section 20 or 21 of the then Urban Land (Ceiling and Regulations) Act, 1976 and undertaking to that effect shall be obtained, before a Development Right is granted. In the case of schemes sanctioned under section 20 or 21 of the said Act, the grant of Development Rights (DRs) shall be to such extent and subject to the conditions mentioned in section-20 scheme and such conditions as the Government may prescribe. In case of non-retainable land, the grant of Development Rights shall be to such extent and subject to such conditions as the Government may specify. The provisions of this Regulation shall be subject to the orders issued by the Government from time to time in this regard.

Provided that, in case of lands having tenure other than Class-I, like Inam lands, tribal lands etc., N.O.C. from Competent Authority, mentioning i)share of Government and land holder ii)transfer of such land in the name of Planning / Appropriate Authority, shall be produced by the land holder at the time of submission of application for grant of TDR.

22.6.2 DRC shall be issued by the Municipal Commissioner as a certificate printed on bond paper in an appropriate form prescribed by him. Such a certificate shall be a "transferable and negotiable instrument" after the authentication by the Municipal Commissioner. The Municipal Commissioner shall maintain a register in a form considered appropriate by him of all transactions, etc. relating to grant of, or utilisation of, DRC.

22.6.3 The Municipal Commissioner shall issue DRC within 180 days from the date of application or reply from the applicant in respect of any requisition made by him, whichever is later.

22.6.4 Transfer of DRC-

22.6.4.1 The Municipal Commissioner shall allow transfer of DRC in the following manner

i) In case of death of holder of DRC, the DRC shall be transferred only on production of the documents as may be prescribed by him from time to time, after due verification and satisfaction regarding title and legal successor.

ii) If a holder of DRC intends to transfer it to any other person, he shall submit the original DRC to the Municipal Commissioner with an application alongwith relevant documents as may be prescribed by the Municipal Commissioner and a registered agreement which is duly signed by Transferor and Transferee, for seeking endorsement of the new holders name, i.e., the transferee, on the said certificate. The transfer shall not be valid without endorsement by the Municipal Commissioner and in such circumstances the Certificate shall be available for use only to the holder / transferor.

22.6.4.2 The utilisation of TDR from certificate under transfer procedure shall not be permissible, during transfer procedure.

22.6.5 The Municipal Commissioner may refrain the DRC holder from utilizing the DRC in the following circumstances:-

i. Under direction from a competent Court.

ii. Where the Municipal Commissioner has reason to believe that the DRC is obtained a) by producing fraudulent documents b) by misrepresentation,

Rooh

- 22.6.6** Any DRC may be utilised on one or more plots or lands whether vacant, or already developed fully or partly by erection of additional storeys, or in any other manner consistent with the prevailing Development Control Regulations,
- 22.6.7** DRC may be used on plots/land having Development Plan reservations of buildable nature, whether vacant or already developed for the same purpose, or on the lands under deemed reservations, if any, as per prevailing Regulations.
- 22.6.8** DRC may be used on plots/land available with the owner after surrendering the required land and construction to the Planning Authority under the provisions of Accommodation Reservation. In such circumstances, for the purpose of deciding Transferable Development Rights (TDR) receiving potential, the total area of the reservation before surrender, shall be considered.

22.6.9 Infrastructure Improvement Charges-

The utilizer shall pay to the Planning Authority, an infrastructure improvement charges, for a proposed quantum of TDR to be utilised, at the rate of 5% of construction cost as per the prevailing Annual Statement of Rates.

22.7 VESTING OF LAND :-

- 22.7.1** The Municipal Commissioner, before issuing DRC, shall verify and satisfy himself that the ownership and title of the land proposed for surrender is with the applicant, and get the Record of Right to be corrected in the name of Planning Authority.
- 22.7.2** In case the Appropriate Authority for reservation is other than Planning Authority, it shall be permissible for the Municipal Commissioner on the request of such authority to grant TDR under this regulation and hold such possession as a facilitator. Provided that, the Municipal Commissioner shall handover the possession of such land to concerned Appropriate Authority, after receipt of value of land, from such Appropriate Authority as per Annual Statement of Rates prevailing at the time of handing over possession of land under reservation.

Provided also that, if such Appropriate Authority is the State Government Department, the Municipal Commissioner shall handover the possession of such land to the concerned Department free of cost.

22.8 EFFECT OF THIS REGULATION:-

- a) Provision of Generation of TDR from these regulations shall not be applicable where DRC has been issued prior to date of publication these regulations

However DRCs issued under the old Regulations shall be allowed to be utilised as per TDR zones of old Regulations without indexation but subject to all other conditions of these regulations. Such utilisations shall be allowed for one year only.

Provided also that, old TDR purchased for utilisation on a specific plot with registered documents of sale and / or specific proposal for utilisation of such TDR pending in the ULBs prior to these regulations shall be allowed completely as per the old regulations.

22.9 PROVISION FOR "SINHASTHA TRANSFERABLE DEVELOPMENT RIGHTS" (SINHASTHA TDRS)

- a) The built up area for the purpose of F.S.I. credited in the form of "Sinhastha Transferable Development Rights" (Sinhastha TDRs) shall be equal to the 2.5 (Two and Half) times of the gross area of the Sadhugram reservation land and DRC's shall be issued only after the land is surrendered to the Nashik Municipal Corporation free of cost and free of encumbrances.
- b) Additional incentive TDR to the extent of 0.5 (Half) times of the gross area of the surrendered

Rohit

land of Sadhugram reservation shall also be allowed to the land owner who submit proposal of land surrender of the Sadhugram reservation to the Commissioner, Nashik Municipal Corporation within 15 days of sanction of Sinhashtha Transferable Development Rights regulation by the Government.

c) Utilisation of Sinhashtha TDR of Sadhugram reservation on receiving plot excluding zone A, shall be as per formula given below :

Formula : $X = (R_g/R_r) \times Y$

Where, X = Utilisation of Sinhashtha TDR in sq. m. on receiving plot.

R_g = Rate in Rs. Per sq. m. as per ASR of generating plots in generating year.

Y = TDR debited form "DRC in sq. m.

d) In case of surrender of land affected by the "Sadhugram" reservation to the Nashik Municipal Corporation in lieu of "Sinhashtha TDR", owner shall be entitled for full quantum of TDR specified above if he pays the cost of construction of compound wall and gate to the Planning authority as specified by the Municipal Commissioner.

22A RESERVATION CREDIT BOND –

The reservation credit bond is a bond on paper specifying the amount of compensation in lieu of handing over of reserved land to the Corporation and shall be issued by the Municipal Commissioner. The amount mentioned in this credit bond shall be used for payment of charges to the Corporation from time to time in future till exhausting the amount mentioned therein. If the owner of reserved land desires to handover the reserved land to the Corporation and the Municipal Commissioner agrees to it, then Reservation Credit Bond shall be issued by the Municipal Commissioner, subject to the following.

- i) Such bond shall not bear any interest on the amount mentioned there in.
- ii) The amount of compensation to be paid to the owner shall be as per the provisions of The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act. 2013, amended from time to time.
- iii) The land to be handed over to the Corporation shall be free from all encumbrances and procedure laid down in TDR regulations shall be followed.
- iv) The Municipal Commissioner or an officer authorised by him, not below the rank of Assistant Director of Town Planning, shall endorse the entries of payment on such bond from time to time.

PART VIII
ADDITIONAL FSI IN CERTAIN CATEGORIES
IN NON-CORE AREAS

23.0 GENERAL

Additional/higher Floor space index may be allowed in certain categories in non-core area, except as otherwise specified, as mentioned in Regulation No 23.1 and subject to following conditions:

- a) Permissible additional FSI for the buildings as mention in Table under Regulation No 23.1 shall be the maximum permissible building potential according to road width as mention in column 6 of Table under Regulation No. 15.4 minus Basic FSI. The percentage of additional FSI shall be applicable on basic FSI, permissible in the said area.
- b) Such additional FSI shall be available for use for which additional FSI is granted only and other permissible uses shall be allowed within the basic Permissible FSI.
- c) **Premium** – Premium for additional F.S.I. shall be per column 4 of the table. Rate of the premium is based on the land rate mentioned in ASR for respective S. No./CTS No. The premium collected shall be shared 50:50 between State Government & Corporation respectively. Premium to be paid to the Government shall be deposited in the concerned Account Head of Urban Development Department at Government Treasury by the Planning Authority. The following quantum of premium shall be subject to the orders of the Government from time to time.
- d) The additional FSI shall also be permissible to existing authorised users subject to structural stability.
- e) The other conditions as mentioned in the Government Directives issued under section 154 of the M.R.& T.P. Act 1966 vide Resolution no TPS-1815/2647/CR-13/15/UD 13/Dared 14/03/2016 shall also be applicable.
- f) If the owner / developer desire to avail such additional FSI in future for new buildings , then while seeking building permission at first instance, the building plan shall be submitted considering the Marginal distances as required for the height of buildings for such additional FSI. No condonation in the required open spaces, parking and other requirements in these regulations shall be allowed. However for the existing building proposals, such condition need not be insisted. But proposal shall be cleared only after strictly confirming structural and fire safety norms.
- g) Exit Requirements, Requirements of Water Supply, Drainage and Sanitation Parking spaces requirements, Fire provision requirements shall conform the provisions as mentioned in these regulations.

Bech

- ii) The scheme shall be implemented by the Municipal Corporation / Government/semi-Government Authority stipulated by the Government, from time to time.
- iii) The use of the land under the Scheme shall be in consonance with the proposals of the sanctioned development plan.
- iv) Total permissible floor space index for the scheme shall be 2.50 of the gross plot area (excluding the area affected by the D.P. Reservations)
- v) The entire 2.50 FSI as made permissible shall be utilised of the scheme only.
- vi) All the development plan reservations on the land under the scheme shall be developed by the said authority and the amenities thus created shall be handed over to the planning authority.

Bch

23.2 ROAD WIDENING AND CONSTRUCTION OF NEW ROADS

The Municipal Commissioner may permit on the same plot, additional FSI of the area required for road widening or for construction of a new road proposed under the Development Plan, if the owner (including the lessee) of such land surrenders such land for road widening or construction of new road without claiming any monetary compensation in lieu thereof and hand over the same free of encumbrances to the satisfaction of the Municipal Commissioner. FSI generated against the surrender of land, shall be in proportion to the provisions mentioned in Regulation no. 22.3 of TDR and may be utilised on the remaining land. If desired by the owner, TDR may be granted against such surrendered land instead of utilizing FSI on remaining land. Such TDR shall be allowed to be utilised as a Development Rights in accordance with the rules regulating Transfer of Development Rights (TDR). Thereafter, the road shall be transferred in the city survey records/revenue records in the name of the Municipal Corporation and shall vest in it becoming part of a public street.

23.3 STAFF QUARTERS OF STATE GOVERNMENT OR ITS STATUTORY BODIES OR MUNICIPAL CORPORATIONS ON LANDS BELONGING TO SUCH PUBLIC AUTHORITIES

23.3.1.1 Regulation for staff quarters of the State Government or its statutory bodies or Municipal Corporation on land belonging to such Authorities situated in developable zones such as Residential / Public Semi-public / Commercial Zones etc. except restricted zone such as Green Belt, Agricultural Zone, No development Zone, CRZ, etc.

23.3.1.2 The basic FSI specified in these regulations may be allowed to be exceeded as per following table on the gross plot area solely for the project of construction of staff quarters (herein after referred to as —staff quarter project) for the employees of the Government, or its statutory bodies or the Municipal Corporation (hereinafter collectively referred to as —User Authority), on land belonging to such User Authority, by the PWD of the Government of Maharashtra or MHADA or Maharashtra Police Housing Corporation or Municipal Corporation or any other Public Agency nominated by the Government for this purpose, which also include any Special Purpose Vehicle, wherein the Government or a fully owned Company of the Government holds at least 51% equity share (hereinafter collectively referred to as —“implementing Public Authority”)

23.3.1.3	Road width and plot area	Maximum permissible FSI including basic FSI
	15.0 m. or above minimum plot area 4000 sq. m. and above	3.00
	12.0 m. or above but below 15.0 m.	2.50

23.3.1.4 For the purpose of calculation the FSI, the entire area of the plot excluding area under Development Plan roads and Development Plan reservations, if any, shall be considered.

Provided that, the Development Plan reservations like Government Staff Quarters, Police Housing, Municipal Housing, Municipal Staff Quarters etc. on lands belonging to Government / Public Authorities / Local Authorities, shall not be excluded.

Provided further that, amalgamation of such Development Plan reservation/s with adjoining lands for the execution of project under this regulation, shall be permissible.

23.3.1.5 The total permissible FSI under this regulation shall be utilised for construction of staff quarters for the User Authority, subject to the following

i) The area of staff quarters for various categories of employees shall be as per the norms

Rosh

prescribed by the concerned User Authority and in no case shall the area of staff quarters exceed the maximum limit of carpet area as prescribed therein.

ii-a) Municipal Commissioner may also permit upto 1/3rd of the total permissible FSI under this regulation for construction of free sale area (hereinafter referred to as —free sale component) to be disposed of by the Implementing Public Authority as provided herein. The free sale component shall preferably be constructed in a separate block. Sub-division of plots shall be permissible on the basis of equitable distribution of FSI, in case construction of free sale component is permitted by the Municipal Commissioner.

The free sale component may be utilised for commercial use as per potential of plot as decided by the following committee. The extent of commercial use, if required shall be decided by the said committee strictly within the limits as specified in these regulations

- 1) Municipal Commissioner – Chairman
- 2) Police Commissioner – Member
- 3) Collector of Concerned District – Member
- 4) Superintendent Engineer (PWD) – Member

ii-b) If the User Authority required construction of staff quarters to the extent of full permissible FSI, then the User Authority shall pay full cost of construction + 5% of construction cost as establishment charges to the Implementing Public Authority.

ii-c) The flats constructed under the free sale component shall be first offered to the Central Government, its statutory bodies, Central /State PSUs for purchase as staff quarters and if the Central Government or its statutory Bodies or Central /State PSUs do not indicate willingness to purchase the same within the prescribed time limit, such flats shall be sold in open market.

23.3.1.6 i) Notwithstanding anything contained in these regulations, no amount shall be charged towards Premium, Scrutiny Fee etc., for the projects proposed under this regulation.

ii) The provisions of Inclusive Housing, mentioned in these regulations, shall not be applicable for development under this regulation.

23.3.1.7 For any staff quarters project under this regulations, a development agreement shall be executed between the User Authority and the Implementing Public Authority, which, inter alia, shall authorise the Implementing Authority to dispose of the flats constructed under the free sale component of the project, wherever applicable. Such development agreement shall contain the details regarding the modalities and conditions of transferring such quarters (whether free of cost or on payment/ receipt of certain amount by the User Authority) to the user authority and also conditions modalities of disposing of the flats under the free sale components by the Implementing Public Authority.

23.4 BIOTECHNOLOGY UNITS/ PARKS

The Municipal Commissioner may grant additional 100 percent FSI on basic permissible FSI for biotechnology units/ parks approved by Director of Industries, including those, located in Agriculture Zone proposed in the Development Plan subject to following condition:

- i) Out of total built up area minimum 90% shall be used for Biotechnology purpose and maximum 10% shall be used for ancillary users.
- ii) The additional FSI shall be granted on payment of premium. Such premium shall be recovered at the rate of 25% of the market value of the land as per the Annual Statement of Rate or as

Bech

decided by the Government from time to time.

- iii) Out of the total premium 75% shall be paid to the Municipal Corporation and 25% premium shall be paid to the Government.

23.5 INFORMATION TECHNOLOGY ESTABLISHMENT

Development of Information Technology Establishments shall be regulated as per the Information Technology & Information Technology Enabled Services (IT/ITES) Policy 2015 as declared by Industries Department vide Government Resolution No. ITP 2013/CR-265/IND-2 dated 25/08/2015, along with the special regulations sanctioned by the Government vide Notification No. TPB 4316/CR-167/2016/(3)/UD-11/dated 15th July, 2016 and amended time to time which are mention below.

1) The Commissioner may permit additional FSI upto 200 % over and above the basic permissible F.S.I. to all registered Public and Private IT/ITES Parks/AVGC Parks /IT SEZs or IT Parks in SEZs / Stand-alone IT/ITES units in public IT Park (including IT/ITES units located in Residential / Industrial/No Development/ Green/Agriculture Zone or any other land-use zone in which such users are permissible), which have been approved by the Directorate of Industries, proposed to be set up or already set up under present / previous IT/ITES policies, (hereinafter referred to as the "said unit") by charging premium of 30% of the land rate for the said land as prescribed in Annual Statement of Rates for the relevant year of granting such additional F.S.I. for Pune, Pimpri-Chinchwad, Navi Mumbai Notified Area, Municipal Corporations in Mumbai Metropolitan Region and 10% of the land rate for the said land as prescribed in Annual Statement of Rates for the relevant year of granting such additional F.S.I. for other Municipal Corporations.

In case of the Navi Mumbai Notified Area, the CIDCO as land owner may recover lease premium for additional F.S.I. if applicable under land disposal policy of CIDCO.

Provided that additional FSI above 100% and upto 200% shall be permissible only on plots having an access road of minimum 18 meters width.

Provided further that, the premium so collected shall be shared between the Planning Authority and the Government in the proportion of 50 : 50. The share of the Government shall be paid to the concerned Branch office of the Town Planning Department. (Explanation: - Premium charges shall be calculated on the value of lands under such zones, determined by considering the land rates of the said land as prescribed in Annual Statement of Rates (ASR). These charges shall be paid at the time of permitting additional F.S.I. by considering the ASR for the relevant year without applying the guidelines)

2) No premium shall be chargeable in Municipal Corporation areas, if they are covered under No Industry Districts and Naxalism affected areas of the State (as defined in the "Package Scheme of Incentives-2013" of the Industries, Energy & Labour Department of the State).

3) The total maximum permissible F.S.I. shall not exceed limit of 3.00.

4) Maximum 40% of total proposed Built-up area (excluding parking area) inclusive of such additional F.S.I. may be permitted for support services in IT Parks in Municipal Corporations which are not covered under Serial No. 4 above and remaining built-up area shall be utilized for IT/ITES.

5) New said unit shall allocate at least 2% of the total proposed built-up area, for providing incubation facilities for new units. This area would be treated as a part of the Park to be used for IT activities and eligible for additional FSI benefits accordingly.

6) Premium to be received by the Planning Authority as per provisions in this regulation shall be deposited in a separate fund viz. "Critical Infrastructure Fund for IT/ITES Industries" and this fund shall be utilized only for creation of Critical Infrastructure for IT/ITES Industries;

Beh

Provided that in the event, the developer come forward for providing such off site infrastructure at his own cost, instead of paying premium as prescribed above, then the Planning Authority may determine the estimated cost of the work by using rates prescribed in District Schedule of Rates (DSR) of the relevant year, in which order for commencement of such work is issued. The Planning Authority shall also prescribe the standards for the work. After completion of the works, the Planning Authority shall verify and satisfy itself that the same is developed as per prescribed standards and thereafter, by deducting the cost of works, the balance amount of premium shall be recovered from such developer before issuing Occupancy Certificate.

Provided that, in case the cost of work is more than the premium to be recovered, such additional cost to be borne by such developer.

7) Permission for erecting towers and antenna upto height permitted by the Civil Aviation Department shall be granted by the Commissioner as per the procedure followed for development permission or otherwise as may be decided by the Government.

8) While developing site for IT/ITES with additional FSI, support services as defined in the IT Policy 2015, shall be allowed.

9) The sanctioned existing regulations in respect of I.T. Establishments are proposed to be replaced suitably and for the Planning Authorities, which have no provisions in respect of I.T. Establishments, these regulations shall be proposed to be inserted as new regulations.

10) Notwithstanding anything contained in the Development Control Regulations of Planning Authorities, no amenity space is required to be left for development of plot/land upto 2.00 Hect. for IT/ITES.

11) Notwithstanding anything mentioned in these Regulations, special provisions mentioned in the existing Regulations of respective Planning Authority, which areas are not covered under these regulations shall continue to prevail unless otherwise specified.

12) The Directorate of industries will develop a web portal on which the developer of every IT park will be bound to provide / update detailed information about names of the units in the park, utilization of built-up area and activities being carried out, manpower employed in the It Park for IT/ITES and support services on yearly basis.

If a private IT park has availed additional FSI as per the provisions of IT/ITES policy and subsequently it is found that the built-up space in the park is being used for non IT/ITES / commercial activities / any other activity not permitted as per the IT/ITES policy under which the said park was approved, a penal action as below will be taken, the payment shall be shared between the concerned Planning Authority and the Government in the ratio of 3:1.

a) The misuse shall be ascertained by physical site verification of the said private IT park by a team of officers from the Directorate of industries and the Planning Authority which has approved the building plans of the said private IT park.

b)) A per day penalty equal to 0.3% of the prevailing ready reckoner value of the built-up area that has been found to be used for non- IT/ITES activities.

c) The penalty will be recovered from the date of commencement of unauthorized use till the day non IT use continues.

After payment of the penalty to the concerned Planning Authority which has sanctioned the building plans of the concerned private IT park, the said private IT Park will restore the use of premises to the original purpose for which LOI/ Registration was granted. If the private IT Park fails to pay penalty and / or restore the use to its original intended use, the concerned Planning Authority will take suitable action under the Maharashtra Regional and Town Planning Act 1966, against the erring private IT Park under intimation to the Directorate of Industries. This provision

will also be applicable to existing IT Parks.

23.6 DEVELOPMENT / REDEVELOPMENT OF HOUSING SCHEMES OF MAHARASHTRA HOUSING AND AREA DEVELOPMENT AUTHORITY

- 1) The FSI for a new scheme on vacant lands of low Cost Housing Scheme for Economically Weaker Section, Low Income Groups and Middle Income Groups of MHADA having at least 60 percent built-up area of the tenements under EWS, LIG and MIG categories, shall be 2.50
- 2) For redevelopment of any existing housing scheme of MHADA, undertaken by the MHADA departmentally or jointly with societies /occupiers of buildings or housing societies/ occupiers of building or by lessees of MHADA or by developer, the FSI shall be as under.-
 - a) Total permissible FSI shall be maximum 2.5 on gross plot area.
 - b) The incentive FSI admissible against the FSI required for rehab shall be as under:-
 - i) In congested area, for the area upto 4000 sq. m., the incentive FSI admissible will be 50 percent.
 - ii) In congested area, for the area above 4000 sq. m., the incentive FSI admissible will be 60 percent.
 - iii) In outside congested area, for the area upto 4000 sq. m., the incentive FSI admissible will be 60 percent.
 - iv) In outside congested area, for the area above 4000 sq. m., the incentive FSI will be 75 percent.
 - c) Difference between 2.5 FSI and the FSI required for "rehab + incentive" shall be shared between MHADA and Occupiers Society/ developer in the ratio of 2:1
 - d) In the scheme, for the land allotted for societies of MIG and HIG and developed plot allotted individually to MIG and HIG group, the permissible FSI shall be as per prevailing Development Control and Promotion Regulations
- 3) In case of grant of NOC with additional permissible built-up area outside congested area over and above the permissible FSI as per sanctioned DCR prevailing at the time of allotment by MHADA for the purpose of undertaking Redevelopment / Utilisation, MHADA shall charge premium at the rate decided by Government in Housing Department from time to time.
- 4) For the purpose of calculating the FSI, the entire area of the layout including development plan roads and internal roads but excluding the land under the reservation of public amenities shall be considered. Sub-division of plots will be permissible on the basis of compulsory recreational open space as in these Regulations. For low cost Housing Schemes of MHADA for EWS, LIG categories, the Regulations in the Schedule below shall apply.
- 5) For the purpose of this Regulation, the carpet areas for EWS, LIG or MIG tenements shall be as determined by the Government from time to time.
- 6) For the offsite infrastructure, MHADA shall pay to the municipal council 12.5 percent of the charges collected by MHADA for the grant of additional FSI (FSI over and above the normally permissible FSI) for the Redevelopment Schemes
- 7) In any Redevelopment Scheme where the Co-operative Housing Society / Developer appointed by the Co-operative Housing Society has obtained No Objection Certificate from the

Beh

MHADA thereby sanctioning additional balance FSI with a consent of 70 percent of its members and where such NOC holder has made provision for alternative accommodation in the proposed building (including transit accommodation) then it shall be obligatory for all the occupiers/ members to participate in the Redevelopment Scheme and vacate the existing tenements, for the purpose of redevelopment. In case of failure to vacate the existing tenements the provisions of Section 95-A of the MHADA Act mutatis mutandis shall apply for the purpose of getting the tenements vacated from the non-cooperative members

- 8) A corpus fund, as may be decided by MHADA, shall be created by the Developer which will remain with societies for its maintenance.

SCHEDULE

The following provisions shall be applicable only for Low Cost Housing Schemes i.e. Economically Weaker Sections and Low Income Group Housing Schemes only undertaken by Maharashtra Housing & Area Development Authority (MHADA)

1. Minimum Plot Size:-

- (a) In the case of a growing house for EWS and LIG category a plot of 25 sq. m., a room of minimum size of 5.57 sq.m. (60 sq.ft.) with toilet arrangement in the first phase shall be permitted. In the second phase, one room of 9.30 sq.m. (100 sq.ft.) may be allowed to be added. However, commencement and occupation certificates shall be granted initially to the first phase only and subsequent certificates for second phase issued as required.
- (b) **Multi-purpose rooms:-** A multi-purpose room shall be allowed with size upto 12.5 sq.m. with a minimum width of 2.4 m.
- (c) **Cooking space (alcove):-** Provision of separate kitchen shall not be necessary. However, cooking space shall be allowed with a minimum size of 2.4 sq.m. with minimum width of 1.2m.
- (d) **Combined toilet:-** A combined toilet shall be permitted for more than one tenement with a minimum area of 1.85 sq.m. with minimum width of one meter.
- (e) **Height:-** The average height for a habitable room with sloping roof shall be minimum 2.5 m. with minimum height of 2 m. at the eaves. In the case of a flat roof, minimum clear height shall be 2.6 m. for a habitable room. Kitchen areas shall have minimum clear height/average height of 2.4 m. and bath and water closet (without loft) shall have a clear minimum height of 2.2 m.
- (f) **Plinth:-** The minimum plinth height shall be 30 cm. and in areas subject to flooding the plinth shall be higher than the high flood level.

2. **External walls:-** 115 mm, thick external brick wall without plaster shall be permitted

3. **Staircases:-** Single flight staircases without landing between the two floors shall be permitted.

4. **Front marginal distance:-** The front marginal distance from roads having width of 9.14 m. and below shall be a minimum of 1.5 m for buildings with height of upto 10 m.

5. **Marginal Distance (side and rear):-** The distance between two ground floor structures shall be of a minimum of 4.5 m for purpose of light and ventilation of habitable rooms. In case of toilets deriving light and ventilation from open space, the distance between the two ground floor structures shall be a minimum of 1.5 m.

6. Pathways:-

The widths of pathways shall be as follows :-

- (i) 1.5 m. width of pathways upto 20 m. in length;
- (ii) 2.0 m. width for pathways upto 30 m. in length;
- (iii) 2.5 m. width for pathways upto 40 m. in length;
- (iv) 3.0 m. width for pathways upto 50 m. in length

7. **Flushing cistern:-** In water closets, flushing cistern shall not be essential and toilets without this provision may be permitted
8. **Water closet pan size:-** The water closet seat shall be of a minimum of 0.46 m. (18 inches) in length.
9. **Septic tank and leaching pits (soak pits):-**A septic tank shall be provided with capacity of 141.6 litres (five cubic feet) per capita. Where the municipal services are likely to be available within four to five years or so, pour flush water seal latrines (NEERI type) shall be permitted where the municipal sewerage system is not available and the water table in the area is not high.
10. **Convenience shopping:-** Convenience Shopping as defined in these Regulations shall be permitted along layout roads with width of 12.2 m. to 18.49 m. provided that a minimum set-back of 1.5m and a minimum plot area of 25.2 sq.m is available and is provided.
11. **Recreation Ground:-** In the layouts, provision for recreation ground shall be on the lines prescribed in these Regulations
12. **Ancillary structures:-** Ancillary structures such as underground tank, overhead tank, substations etc. shall be permissible in the compulsory recreation open space subject to the condition that not more than 10 percent of such space shall be utilised for such purposes.
13. Other provisions of these regulations shall continue to be applicable for such schemes.

23.7 REDEVELOPMENT OF EXISTING BUILDINGS

While reconstructing any existing building in whole or in part, the entitlement of FSI without any premium/charges shall be equal to the authorisedly utilised FSI, including TDR / additional FSI/premium FSI, if any. In addition to this, said development shall also be entitled for FSI, additional FSI, premium FSI, if any, permissible under these regulations, by charging premium as the case may be.

23.8 REDEVELOPMENT OF DANGEROUS BUILDINGS

Reconstruction / Redevelopment in whole or in part of any tenanted building which existed prior to these regulations which has ceased to exist in consequence of accidental fire / natural collapse or demolition for the reasons of the same having been declared dangerous or dilapidated or Unsafe by or under a lawful order of the Municipal Commissioner, shall be allowed subject to following conditions.

- a) Redevelopment of tenanted building undertaken by landlord and / or co-operative housing societies of landlord and / or occupiers shall be allowed, with an FSI equivalent to the Rehab Area plus 50% incentive FSI of the rehab area. Provided that Rehab Area will be the authorisedly utilised Area or 27.87 sq.m. per tenement whichever is more.

However as per the road width if the potential of the Plot is more than what is mention above, then the balance potential available on plot after deducting rehab and incentive FSI may be allowed to be utilized to that extent by the way of TDR or Additional FSI on payment of

Kelb

premium if any.

(b) All the certified tenants of the old building shall be re-accommodated in the redeveloped building. Each tenant shall be rehabilitated and given free of cost the carpet area occupied by him for residential purpose in the old building subject to the minimum carpet area of 27.87sq. m. or existing carpet area whichever is more subject to maximum carpet area upto 70 sq.m. (753 sq. ft.) In case of non-residential occupier the area to be given in the reconstructed building shall be equivalent to the area occupied in the old building.

Provided that if the carpet area under Residential use exceeds 70 sq. m., the cost of construction for Area exceeding 70 sq. m. shall be paid by tenant / occupant to the developer. The cost of construction shall be as per the ready reckoner rate of that year. The carpet area exceeding 70 sq. m. shall be considered for rehab FSI but shall not be consider for incentive FSI.

(c) In case of fire gutted buildings the conditions of more than 30 years age of buildings shall not be made applicable, provided the structural stability certificate from nearest Govt. Engineering College shall be necessary.

(d) The Committee comprises of Municipal Commissioner, Superintending Engineer, Public Works Department, State of Maharashtra, Joint Director, Town Planning, Chief Fire Officer, and the Head of department structural Engineering of Government Engineering College shall be set-up to decide whether the building is "dangerous or dilapidated or unsafe".

Notes:-

- (1) For the purpose of deciding authenticity of the structure if the approved plans of existing structure are not available, the Commissioner shall consider other evidences such as Assessment Record or City Survey Record or Sanad.
- (2) In case where there are number of buildings on plot, in such cases, equivalent land component of the buildings which is declared unsafe shall be worked out and incentive FSI shall be based on such land component.
- (3) Reconstruction of the building on the plot shall conform to the provisions of the sanctioned Development Plan and sanctioned Development Control Regulations.
- (4) The new building may be permitted to be reconstructed in pursuance of an agreement to be executed on stamp paper by at least 70 percent of the landlord / occupants in the original building, within the meaning of the Bombay Rents, Hotel and Lodging House Rents Control Act, 1947 or Apartment Act and its related provision and in such agreement provision for accommodation for all occupants in the new building on agreed terms shall be made and a copy of such agreement shall be deposited with the Municipal Corporation before commencement or undertaking reconstruction of the new buildings.
- (5) The carpet area of part or parts of the new building intended to be used as non-residential use shall not exceed the carpet area of part or parts of the original building so used
- (6) No new tenancy shall be created
- (7) An amount as may be decided by the Government shall be paid by the Owner /Developer / Society as additional Development Cess for the built up area over and above the Base FSI. A corpus fund as decided by the Municipal Commissioner is to be created by the Developer which will take care of the maintenance of the building for a period of 10 years.

23.9 DEVELOPMENT OF HOUSING FOR EWS/LIG

If the owner constructs the housing for EWS / LIG section of the society in the form of tenements of size upto 50 sq.mt carpet area on his plot, then he shall be exempted from payment of premium as to maximum permissible mentioned in table given in Regulation No.15.4. subject to

following conditions.

- i) Out of the total tenements, at least 40% tenements shall be of carpet area not more than 30 sq. m.
- ii) Only one tenement should be sold to a family. Adjoining tenement should not be sold to a close relative of such tenement owner. Affidavit to that effect shall be obtained from the land owner / developer and purchaser.
- iii) The size of tenement of 30 or 50 sq. m. shall be inclusive of common areas like staircases, passages etc. but exclusive of balcony, double height terraces.

Notwithstanding anything contained in these regulations, the development of such housing scheme shall be entitled for concession as given below

Marginal distances (except front margin), the room sizes, parking and other requirements shall be as per the Regulation No.23.6.

23.10 DEVELOPMENT OF PUBLIC TOILET

The owner if constructs public toilet in addition to the number of toilets required for his proposed development at the location required and as prescribed by the Municipal Commissioner, preferably on ground floor having separate access, he may be granted additional FSI equal to the built up area of such additional toilets. Provided such toilet shall be maintained by the owner at his own cost to the satisfaction of Municipal Commissioner.

Boch

PART IX
STRUCTURAL SAFETY, WATER SUPPLY, DRAINAGE & SANITARY
REQUIREMENTS, OUTDOOR DISPLAY AND OTHER SERVICES

24.0 STRUCTURAL DESIGN

- 24.1** The structural design of foundations, elements made of masonry, timber, plain concrete; reinforced concrete, pre-stressed concrete and structural steel shall be carried out in accordance with Part 6. Structural design Section 1-Loads, courses and effects, Section 2-Soils and Foundation, Section-3-Timber and Bamboo, Section 4-Masonry, Section5-Concrete, Section 6-Steel, Section-7-Prefabrication, systems building and mixed / composite construction of National Building Code of India, amended from time to time.

25.0 QUALITY OF MATERIALS AND WORKMANSHIP

- 25.1** All materials and workmanship shall be of good quality conforming generally to accepted standards of Public Works Department of Maharashtra and Indian Standard Specifications and Codes as included in Part 5 - Building Materials and Part 7 - Construction Practices and Safety of National Building Code of India, amended from time to time
- 25.2** All borrow pits dug in the course of construction and repair of buildings, roads, embankments etc. shall be deep and connected with each other in the formation of a drain directed towards the lowest level and properly stopped for discharge into a river stream, channel or drain and no person shall create any isolated borrow pit which is likely to cause accumulation of water which may breed mosquitoes.

26.0 ALTERNATIVE MATERIALS, METHODS OF DESIGN & CONSTRUCTION AND TESTS

- 26.1** The provision of the regulations are not intended to prevent the use of any material or method of design or construction, not specifically prescribed by the regulations, provided any such alternative has been approved.
- 26.1.1** The provision of these regulations is also not intended to prevent the adoption for architectural planning and layout conceived as an integrated development scheme.
- 26.2** The authority may approve any such alternative provided it is found that the proposed alternative is satisfactory and conform to the provisions of relevant parts regarding material, design, and construction and that material, method or work offered is, for the purpose intended, at least equivalent to that prescribed in the rules in quality, strength, compatibility, effectiveness, fire rating and resistance, durability and safety.
- 26.3 Tests:** Whenever there is insufficient evidence of compliance with the provisions of the regulations of evidence that any material or method of design or construction does not conform to the requirements of the rules or in order to substantiate claims for alternative materials, design or methods of construction, the Municipal Commissioner may require tests sufficient in advance as proof of compliance. These tests shall be made by an approved agency at the expense of the owner.
- 26.3.1** Test method shall be as specified by the regulations for the materials or design or construction in question. If there are no appropriate test methods specified in the regulations, the Authority shall determine the test procedure. For methods of tests for building materials; reference may be made to relevant Indian standards as given the National Building Code of India, published by the Bureau of

Handwritten signature

Indian Standards. The latest version of the National building Code of India shall be taken into account at the time of enforcement of these rules.

- 26.3.2 Copies of the results of all such tests shall be retained by the authority for a period of not less than two year after the acceptance of the alternative material.

27.0 BUILDING SERVICES

- 27.1 The planning, design and installation of electrical installations, air-conditioning and heating work shall be carried out in accordance with Part 8 - Building Services, Section 2-Electrical and allied Installations, Section 3-Air Conditioning, heating and mechanical ventilation of National building Code of India, amended from time to time.
- 27.2 The planning design including the number of lifts, type of lifts, capacity of lifts depending on occupancy of building; population on each floor based on occupant load, height of building shall be in accordance with Section-5 installation of Lifts and Escalators of National Building Code of India, amended from time to time. In existing buildings, in case of proposal for one additional floor, existing lift may not be raised to the additional floor.
- 27.2.1 The lifts shall be maintained in working order properly.

28.0 WATER SUPPLY, DRAINAGE AND SANITARY REQUIREMENTS.

- 28.1 The planning, design, construction and installation of water supply, drainage and sanitation and gas supply systems shall be in accordance with the provisions of Part 9 - Plumbing Services- Section 1 Water Supply, Drainage and Sanitation, Section 2 - Gas supply of National Building Code of India as amended from time to time.

- 28.2 Requirements of water supply in building.

The total requirements of water supply shall be calculated based on the population as given below:

Occupancy	Basis
Residential Building	5 persons per tenement
Other Buildings	No. of persons on occupant load and area of floors given in Table No.11.

- 28.2.1 The requirements of water supply for various occupancies shall be as given in **Table 16** and 17 or as specified by the Municipal Commissioner from time to time.

Table No. 16

PER CAPITA WATER REQUIREMENTS FOR VARIOUS OCCUPANCIES/USES		
Sr. No.	Type of Occupancy	Consumption per head per day (in liters)
1	Residential	
	(a) in living units	135
	(b) Hotels with lodging accommodation (per bed)	180
2	Educational:	
	(a) Day Schools	45
	(b) Boarding Schools	135

3	Institutional (Medical Hospitals):	
	(a) No. of beds not exceeding 100	340
	(b) No. of beds exceeding 100	450
	(c) Medical quarters and hostels	135
4	Assembly-Cinema theatres, auditorium etc. (per seat of accommodation).	15
5	Government and Semi-public business.	45
6	Mercantile (Commercial)	
	(a) Restaurants (per seat)	70
	(b) Other business buildings.	45
7	Industrial	
	(a) Factories where bathrooms are to be provided	45
	(b) Factories where no bath-rooms are required to be provided.	30
8	Storage (including warehousing)	30
9	Hazardous	30
10	Intermediate / Stations (excluding mail and express stops).	45 (25)*
11	Junction Stations	70 (45)*
12	Terminal / Stations.	45
13	International and domestic Airports.	70

The value in parenthesis is for stations where bathing facilities are not provided.

NOTE: The number of persons for Sr. No. (10) to (13) shall be determined by the average number of passengers, handled by the station daily; due consideration may be given to the staff and workers likely to use the facilities.

Table No. 17

FLUSHING STORAGE CAPACITIES		
Sr.No.	Classification of building	Storage capacity.
(1)	(2)	(3)
1	For tenements having common convenience	900 liters net per w. c. seat.
2	For residential premises other than tenements having common convenience	270 liters net for one w. c. seat and 180 liters for each additional seat in the same flat.
3	For Factories and Workshops	900 liters per w. c. seat and 180 liters per urinal seat.
4	For cinemas, public assembly halls, etc.	900 liters per w. c. seat and 350 liters per urinal seat.

Bech

29.0 DRAINAGE AND SANITATION REQUIREMENTS

29.1 General

There should be at least one water tap and arrangement for drainage in the vicinity of each water-closet or group of water-closets in all the buildings.

29.1.1 Each family dwelling unit on premises (abutting on a sewer or with a private sewage disposal system) shall have, at least, one water-closet and one kitchen type sink. A bath or shower shall also be installed to meet the basic requirement of sanitation and personal hygiene.

29.1.2 All other structures for human occupancy or use on premises, abutting on a sewer or with a private sewage disposal system, shall have adequate sanitary facilities, but in no case less than one water-closet and one other fixture for cleaning purposes.

29.1.2 For Residences

29.2.1 Dwelling with individual convenience shall have at least the following fitments:

- a) One bathroom provided with a tap and a floor trap,
- b) One water-closet with flushing apparatus with an ablution tap; and
- c) One tap with a floor trap or a sink in kitchen or wash place.

29.2.2 Dwelling without individual conveniences shall have the following fitments:

- a) One water tap with floor trap in each tenement,
- b) One water-closet with flushing apparatus and one ablution tap, bath for every two tenements, and
- c) One bath with water tap and floor trap for every two tenements.

29.3 For Buildings Other than Residences

29.3.1 The requirements for fitments for drainage and sanitation in the case of buildings other than residences shall be in accordance with **Table 18 to Table 31**. The following shall be, in addition, taken into consideration:

- a) The figures shown are based upon one (1) fixture being the minimum required for the number of persons indicated or part thereof.
- b) Building categories not included in the tables shall be considered separately by the Municipal Commissioner.
- c) Drinking fountains shall not be installed in the toilets.
- d) Where there is the danger of exposure to skin contamination with poisonous, infectious or irritating material, washbasin with eye wash jet and an emergency shower located in an area accessible at all times with the passage / right of way suitable for access to a wheel chair, shall be provided.
- e) When applying the provision of these tables for providing the number of fixtures, consideration shall be given to the accessibility of the fixtures. Using purely numerical basis may not result in an installation suited to the need of a specific building. For example, schools should be provided with toilet facilities on each floor. Similarly toilet facilities shall be provided for temporary workmen employed in any establishment according to the needs; and in any case one WC and one washbasin shall be provided.
- f) All buildings used for human habitation for dwelling work, occupation, medical care or any purpose detailed in the various tables, abutting a public sewer or a private sewage disposal system, shall be provided with minimum sanitary facilities as per the schedule in the tables. In

Bech

case the disposal facilities are not available, they shall be provided as a part of the building design for ensuring high standards of sanitary conditions in accordance with this section.

- g) Workplaces where crèches are provided, they shall be provided with one WC for 10 persons or part thereof, one washbasin for 15 persons or part thereof, one kitchen sink with floor tap for preparing food / milk preparations. The sink provided shall be with a drinking water tap.
- h) In all types of buildings, individual toilets and pantry should be provided for executives and for meeting / seminar / conference rooms, etc. as per the user requirement.
- i) Where food is consumed indoors, water stations may be provided in place of drinking water fountains.

30.0 SIGNS AND OUTDOOR DISPLAY STRUCTURES

- 30.1 The display of advertising signs on buildings and land, shall be in accordance with Part 10, Section 2 "Signs and outdoor display structures" of National Building Code of India as amended from time to time.
- 30.2 Prohibition of advertising signs and outdoor display structure in certain cases - Notwithstanding the provisions of sub-regulations no advertising sign or outdoor display structures shall be permitted on buildings of architectural, aesthetical, historical or heritage importance as may be decided by the Municipal Commissioner or on Government Buildings save that in the case of Government buildings only advertising signs or outdoor display structure may be permitted if they relate to the activities for the said buildings' own purposes or related programmes.

Bel

PART X

SPECIAL PROVISIONS IN CERTAIN BUILDINGS

31.0 PROVISION OF FACILITIES FOR DIFFERENTLY ABLED PERSONS:

31.1 Definitions

- 31.1 Non-ambulatory Disabilities:** – Impairments that, regardless of cause or manifestation, for all practical purposes, confine individuals to wheelchairs.
- 31.2 Semi - ambulatory Disabilities:** - Impairments that cause individuals to walk with difficulty or insecurity, individuals using braces or crutches, amputees, arthritics, spastics, and those with pulmonary and cardiac ills may be semi-ambulatory.
- 31.3 Hearing Disabilities:-** Deafness or hearing handicaps that might make an individual insecure in public areas because he is unable to communicate or hear warning signals.
- 31.4 Sight Disabilities:** - Total blindness or impairments, which affect sight to the extent that the individual, functioning in public areas, is insecure or exposed to danger.
- 31.5 Wheel Chair:** - Chair used by disabled people for mobility. The standard size of wheel chair shall be taken as 1050 mm x 750 mm.

31.2 Scope:-These regulations are applicable to all buildings and facilities used by the public such as educational, institutional, assembly, commercial, business, mercantile buildings constructed on plot having an area of more than 2000 sq. m. It does not apply to private and public residences.

31.3 Site development:-Level of the roads, access paths and parking areas shall be described in the plan along with specification of the materials.

31.3.1 Access Path / Walk Way: - Access path from plot entry and surface parking to building entrance shall be minimum of 1800 mm wide having even surface without any steps. Slope, if any, shall not have gradient greater than 5%. Selection of floor material shall be made suitably to attract or to guide visually impaired persons (limited to coloured floor material whose colour and brightness is conspicuously different from that of the surrounding floor material or the material that emits different sound to guide visually impaired persons; hereinafter referred to as "guiding floor material"). Finishes shall have a non-slip surface with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.

31.3.2 Parking: For parking of vehicles of differently abled people, the following provisions shall be made-

- i) Surface parking for two car spaces shall be provided near entrance, with maximum travel distance of 30.0 m. from building entrance.
- ii) The width of parking bay shall be minimum 3.6 m.
- iii) The information stating that the space is reserved for wheel chair users shall be conspicuously displayed.
- iv) Guiding floor materials shall be provided or a device, which guides visually impaired persons with audible signals, or other devices, which serves the same purpose, shall be provided.

Rekh

31.4 Building requirements

The specified facilities for the buildings for differently abled persons shall be as follows:

- i) Approach to plinth level
- ii) Corridor connecting the entrance/exit for the differently abled.
- iii) Stair-ways
- iv) Lift
- v) Toilet
- vi) Drinking Water

31.4.1 Approach to plinth level - Every building should have at least one entrance accessible to the differently abled and shall be indicated by proper signage. This entrance shall be approached through a ramp together with the stepped entry.

31.4.1.1 Ramped Approach – Ramp shall be finished with non-slip material to enter the building. Minimum width of ramp shall be 1800mm with maximum gradient 1:12. Length of ramp shall not exceed 9.0 meter having 800mm high hand rail on both sides extending 300mm beyond top and bottom of the ramp. Minimum gap from the adjacent wall to the hand rail shall be 50mm.

31.4.1.2 Stepped Approach:- For stepped approach size of tread shall not be less than 300mm and maximum riser shall be 150mm. Provision of 800mm high hand rail on both sides of the stepped approach similar to the ramped approach.

31.4.1.3 Exit/Entrance Door:- Minimum & clear opening of the entrance door shall be 900mm and it shall not be provided with a step that obstructs the passage of a wheel chair user. Threshold shall not be raised more than 12mm.

31.4.1.4 Entrance Landing:- Entrance landing shall be provided adjacent to ramp with the minimum dimension 1800mm x 2000mm. The entrance landing that adjoins the top end of a slope shall be provided with floor materials to attract the attention of visually impaired persons (limited to coloured floor material whose colour and brightness is conspicuously different from that of the surrounding floor material or the material that emits different sound to guide visually impaired persons hereinafter referred to as “guiding floor material”). Finishes shall have a non-slip surface with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.

31.4.2 Corridor connecting the entrance / exit for the differently abled: The corridor connecting the entrance / exit for differently abled, leading directly outdoors to a place where information concerning the overall use of the specified building can be provided to visually impaired persons either by a person or by signs, shall be provided as follows:

- a) ‘Guiding floor materials’ shall be provided or device that emits sound to guide visually impaired persons.
- b) The minimum width shall be 1500mm.
- c) In case there is a difference of level, slope ways shall be provided with a slope of 1:12.
- d) Hand rails shall be provided for ramps/slope ways.

31.4.3 Stair-ways - One of the stair-ways near the entrance / exit for the differently abled shall have the following provisions:

- a) The minimum width shall be 1350 mm.

Bech

- b) Height of the riser shall not be more than 150 mm and width of the tread 300mm. The steps shall not have abrupt (square) nosing.
- c) Maximum number of risers on a flight shall be limited to 12.
- d) Hand rails shall be provided on both sides and shall extend 300 mm on the top and bottom of each flight of steps.

31.4.4 Lifts - Wherever lift is required as per regulations, provision of at least one lift shall be made for the wheel chair user with the following cage dimensions of lift recommended for passenger lift of 13 person capacity of Bureau of Indian Standards.

Clear internal width	1100 mm
Clear internal width	2000 mm
Entrance door width	900 mm

- a) A hand rail not less than 600mm long at 1000mm above floor level shall be fixed adjacent to the control panel.
- b) The lift lobby shall be of an inside measurement of 1800 mm x 1800 mm or more.
- c) The time of an automatically closing door should be minimum 5 seconds and the closing speed should not exceed 0.25 m/ sec.
- d) The interior of the cage shall be provided with a device that audibly indicates the floor, the cage has reached indicates that the door of the cage of entrance/exit is either open or closed.

31.4.5 Toilets - One special W.C. in a set of toilets shall be provided for the use of differently abled with essential provision of washbasin near the entrance for them.

- a) The minimum size shall be 1500 mm x 1750 mm.
- b) Minimum clear opening of the door shall be 900mm and the door shall swing out.
- c) Suitable arrangement of vertical/horizontal handrails with 50mm clearance from wall shall be made in the toilet.
- d) The W.C. seat shall be 500mm from the floor.

31.4.6 Drinking Water:-Suitable provision of drinking water shall be made for the differently abled near the special toilet provided for them.

31.4.7 Designing for Children - In the buildings meant for the pre-dominant use of the children, it will be necessary to suitably alter the height of the handrail and other fittings & fixtures, etc.

Explanatory notes:

Guiding / Warning Floor Material:

The floor material to guide or to warn the visually impaired persons with a change of colour or material with conspicuously different texture and easily distinguishable from the rest of the surrounding floor materials is called guiding or warning floor material. The material with different texture gives audible signals with sensory warning when a person moves on this surface with walking stick. The guiding/warning floor material is meant to give the directional effect or warn a person at critical places. This floor material shall be provided in the following areas:

- a) The access path to the building and to the parking area.
- b) The landing lobby towards the information board, reception, lifts, staircases and toilets.

Beh

- c) Immediately at the beginning/end of walkway where there is a vehicular traffic.
- d) At the location abruptly changing in level or beginning/end of a ramp.
- e) Immediately in front of an entrance/exit and the landing.

Proper signage:

Appropriate identification of specific facilities within a building for the differently abled persons should be done with proper signals. Visually impaired persons make use of other senses such as hearing and touch to compensate for the lack of vision, whereas visual signals benefit those with hearing disabilities.

Signs should be designed and located so that they are easily legible by using suitable letter size (not less than 20 mm high). For visually impaired persons, information board in brail should be installed on the wall at a suitable height and it should be possible to approach them closely. To ensure safe walking, there should not be any protruding sign which creates obstruction in walking. Public Address System may also be provided in busy public areas.

The symbols/information should be in contrasting colour and properly illuminated because people with limited vision may be able to differentiate amongst primary colours. International Symbol Mark for wheel chair be installed in a lift, toilet, staircase, parking areas, etc., that have been provided for the differently abled.

32.0 INSTALLATION OF SOLAR ASSISTED WATER HEATING SYSTEM:

1. Solar water heating systems shall be installed in the building for hospitals, hotels, hostels, guest houses, police men/ army barracks, canteens, laboratories and research institutions, schools and colleges and other institutes, and housing schemes having more than 50 flats.
2. The hospitals and hotels, where the hot water requirements are of continuous nature, must be provided with auxiliary back-up system.
3. The installation of Gas instantaneous water heaters or electrical back-up in all such water heating system shall be optional depending on the nature of requirement of hot water.
4. This shall not be applicable for housing scheme mentioned in regulation no. 23.15.

32.1 Guidelines for design of new buildings

In order to facilitate the installation of Solar Water Heating System, the new buildings shall have the following provisions:

- i) All such buildings where solar water heating systems are to be installed will have open sunny roof area available for the installation of Solar Water Heating System.
- ii) The roof loading adopted in the design of such building should be atleast 50 kg per sq.m. for the installation of solar water heating system.
- iii) An Open area of 3 sq.m. would be required for installation of a collector which supplies about 100 liters of water per day. At least 60% of the roof area may be utilized for installation of the system.
- iv) Precaution should be taken that architectural elevation treatment should not cast shadow on terrace space. As far as possible, parapet of south, east and west sides of the terrace shall be of railing type (above 1 feet) such that it will not cast shadow on the solar collectors and maximum terrace space can be utilized.
- v) Solar Water Heating System can also be integrated with the building design. These can either be put on the south side sloping parapet. As far as possible the solar collectors shall be installed at an inclination of latitude + 15 degree to the south.

Beh

- vi) The capacity of the Solar Water Heating System to be installed on the building shall be decided on the basis of the average occupancy of the building. The norms for hospitals, hotels and other functional buildings are given below.

Type of Building	Per capita capacity recommended (litre per day)
Residential – Homes/Flats/etc.	25
Hospitals	100
Hotels Five Star	150
Hotels other than Five Star	100
Guest House	25
Policemen / Army Barrack	25
Hostels, Schools, Colleges and other institutions where hot water is needed	25
Laboratory and Research Institutions	As required

- vii) All the new buildings to be constructed shall have an installed hot water line from the rooftop and insulated distribution pipelines to each of the points where hot water is required in the building.
- viii) Whenever the hot water is utilized for cooking or for hospital purpose stainless steel storage tank & pipelines should be used.
- ix) If shadow free area is not available for installation of Solar Hot Water systems due to nearby high-rise buildings or structures or trees, in such cases solar water heating system may not be installed.

34.2 Guidelines for selection of Solar Water Heating Systems for all buildings.

Developers should follow the following guidelines for selection/installation of Water heating system.

- i) As far as possible, use of electrical storage type water heater should be discouraged and instant electrical water heater (4 and 5 star labeled) may be used.
- ii) In case control mechanism is not provided, at least 30% higher capacity system may be installed.
- iii) All renewable energy water heating systems/practices shall conform to relevant Bureau of Indian Standards (IS 12933 Part (1&2)) and/or be obtained from Ministry of New and Renewable Energy, New Delhi, approved Manufacturers and their authorized dealers.
- iv) Both flat plate collector (FPC) type and Evacuated Tube Collector(ETC) type systems are eligible for installation. The installation of ETC type Solar Water Heating system shall be carried out as per the specifications / guidelines of MNRE, GoI .
- v) All products/practices adopted for generating hot water with renewable energy shall confirm to relevant Indian Standards or products from Manufacturers approved by Ministry of New and Renewable Energy, New Delhi.

32.3 Piping and insulation

The Solar Water Heater system piping can be done using medium class (B class) GI pipe as per IS1239 with proper insulation and cladding.

Any other pipe that can withstand high temperature upto 100 degrees C having less heat loss character can be considered.

32.4 Other Requirements

- a) Vertical pipe risers serving storage water heaters and storage tanks not having integral heat traps and serving a non-recalculating system shall have heat traps on both, the inlet and outlet piping as close as practical to the storage tank.
- b) At least 50% of the heating requirement shall be met from solar heat/heat recovery.

32.5 Concession in House Tax

The building having solar assisted water heating system installed as per above norms shall be entitled for concession in house tax as decided by the Municipal Corporation subject to condition that the said system is in operation.

33.0 RAIN WATER HARVESTING

The provision for Rain Water Harvesting shall be made as under:

- a) All the layout recreational open spaces/amenity spaces of housing societies and new constructions/ reconstruction/ additions on plots having area, not less than 500 sq.mt., area shall have one or more Rain Water Harvesting structures having a minimum total capacity as detailed in Schedule.

Provided that the Municipal Commissioner may approve the Rain Water Harvesting structures of specifications different from those in Schedule, subject to the minimum capacity of Rain Water Harvesting being ensured in each case.

- b) The owner/society of every building mentioned in the (a) above shall ensure that the Rain Water Harvesting structure is maintained in good condition for storage of water for non-potable purposes or recharge of groundwater at all times.
- c) The Authority may impose a levy of not exceeding Rs.1000/- per annum for every 100 sq.m. of built-up area for the failure of the owner of any building mentioned in the (a) above to provide or to maintain Rain Water Harvesting structures as required under these regulations

SCHEDULE

Rain Water Harvesting in a building site includes storage or recharging the ground water by rainwater falling on the terrace or any paved or unpaved surface within the building site.

1. The following systems may be adopted for harvesting the rainwater drawn from terrace and the paved surface.
 - i) Open well of a minimum 1m dia. and 6m in depth into which rain water may be channeled and allowed to filter for removing silt and floating material. The well shall be provided with ventilating covers. The water from the open well may be used for non-potable domestic purposes such as washing, flushing and for watering the garden etc.
 - ii) Rain Water Harvesting for recharge of groundwater may be done through a bore-well around which a pit of 1m width may be excavated upto a depth of at least 3m and refilled with stone aggregate and sand. The filtered rain water may be channeled to the refilled pit for recharging the bore-well.
 - iii) An impressive surface/underground storage tank of required capacity may be constructed in the setback or other open spaces and the rain water may be channeled to the storage tank. The storage tank shall always be provided with ventilating covers and shall have draw-off taps suitably placed so that rain water may be drawn off for domestic, washing, gardening and such other purposes. The storage tank shall be provided with an overflow.
 - iv) The surplus rain water after storage may be recharged in to ground through percolation pits or trenches or combination of pits and trenches. Depending on the geo-morphological and topographical conditions, the pits may be of the size of 1.20 m width X 1.20 m length X 2 m to 2.50 m depth. The trenches can be of 0.60 m width X 2 to 6 m length X 1.50 to 2 m depth.

Beb

Terrace water shall be channeled to pits or trenches. Such pits or trenches shall be back filled with filter media comprising the following materials :-

- a) 40 mm stone aggregate as bottom layer upto 50% of the depth.
 - b) 20 mm stone aggregate as lower middle layer upto 20% of the depth.
 - c) Coarse sand as upper middle layer upto 20% of the depth.
 - d) A thin layer of fine sand as top layer.
 - e) Top 10% of the pits/trenches will be empty and a splash is to be provided in this portion in such a way that roof top water falls on the splash pad.
 - f) Brick masonry wall is to be constructed on the exposed surface of pits/trenches and the cement mortar plastered. The depth of wall below ground shall be such that the wall prevents loose soil entering into pits/ trenches. The projection of the wall above ground shall at least be 15 cm.
 - g) Perforated concrete slabs shall be provided on the pits/trenches.
 - h) If the marginal distances surrounding the building is not paved, the top layer up to a sufficient depth shall be removed and refilled with coarse sand to allow percolation of rain water into ground
- 2) The terrace shall be connected to the open well/bore-well/storage tank/ recharge pit/trench by means of HDPE / PVC pipes through filter media. A valve system shall be provided to enable the first washing from roof or terrace catchment, as they would contain undesirable dirt. The mouth of all pipes and opening shall be covered with mosquito (insect) proof wire net. For the efficient discharge of rain water, there shall be at least two rain water pipes of 100 mm dia. for a roof area of 100 sq.m.
 - 3) Rain Water Harvesting structures shall be sited as not to endanger the stability of building or earthwork. The structure shall be designed such that no dampness is caused in any part of the walls or foundation of the building or those of an adjacent building.
 - 4) The water so collected/recharged shall as far as possible be used for non-drinking and non-cooking purpose. Provided that when the rain water in exceptional circumstances will be utilised for drinking and/or cooking purpose, it shall be ensured that proper filter arrangement and the separate outlet for bypassing the first rain water has been provided.

It will be ensured that for such use, proper disinfectants and the water purification arrangements have been made.

34.0 GREY WATER REUSE

Regulations for Waste Water Treatment & Recycling :

A. TYPES OF WASTE WATER

- 1) **Black Water:** It means waste water from W.C. urinals and M.S.W.
- 2) **Grey Water:** It means waste water from bathrooms, sinks and wash areas
- 3) Apart from residential waste water, waste water generated from industrial, medical, commercial usage shall also be treated as per guidelines given by the Pollution Control Board.

B. APPLICABILITY

These regulations shall be applicable to all developments/ redevelopments, part developments on plots having an area of 4,000 sq. m. or more as well those mentioned under (C-2) to (C-6) shall have the provision for treatment, recycling and reuse of waste water. The applicant shall along with his application for obtaining necessary layout approval/building permission shall submit a plan showing the location of waste water treatment plant, furnishing details of calculations, references, implementation, etc. This plan shall accompany with the applicant's commitment to monitor the system periodically from the date of occupation of the respective building.

Rab

C. REGULATIONS

(C-1) For layout approval/building permission

- I. In case of residential layouts, area admeasuring 4000 sq. m. (1 acre) or more, in addition to the open space prescribed in the bye-laws, a separate space for waste water treatment & recycling plant should be earmarked in the layout.
- II. The recycled water shall be used for gardening, car washing, toilet flushing, irrigation, etc and in no case for drinking, bathing, washing utensils, clothes, etc
- III. On the layout plan, all chambers, plumbing lines which are a part of waste water treatment should be marked an different colour while submitting the layout for approval to the Municipal Corporation.
- IV. Only provision for basic civil work and required machinery will be proposed by the concerned Municipal Corporation. Other than this provision for additional machinery, pipes, tanks, landscape should be provided by owner/developer at his own cost.
- V. A clause must be included by the owner/developer in the purchase agreement that the purchaser, owner of the premises /organization or society of the purchasers shall ensure that.
 - a. The recycled water is tested every six months either in Municipal Laboratory or in the laboratory approved by Municipal Corporation or by State Government and the result of which shall be made accessible to the competent Authority /EHO of the respective Ward Office.
 - b. Any recommendation from testing laboratory for any form of corrective measures that are needed to be adopted shall be compiled, Copy of any such recommendation and necessary action taken shall also be sent by the testing laboratories to the Competent Authority/EHO of respective wards

(C-2) Group Housing/Apartment Building

In case of group housing if the built-up area is 2000 sq. m. or above or if consumption of water is 20,000 lit/day or more, or if a multi-storied building which has 50 tenements or more, then waste water treatment and recycling plant as mentioned in (C-1) should be constructed

(C-3) Educational, Industrial, Commercial, Government, Semi-government organization, hotels, lodging, etc.

For all buildings in this category having a build-up area of 1500 sq. m. or more and if water consumption is 20,000 lit/day or more, then provision for waste water treatment and recycling plant as mentioned in (C-1) is mandatory.

(C-4) Hospitals

All hospitals having 40 or more beds, must provide a waste water treatment and recycling plant as mentioned in (C-1)

(C-5) Vehicle Servicing Garages

All vehicle servicing garages shall ensure that the waste water generated through washing of vehicles is treated and recycled back for the same use as mentioned in (C-1)

(C-6) Other hazardous uses

All other establishments/buildings where chances of waste water generated containing harmful chemicals, toxins are likely and where such water cannot be directly led into municipal sewers, the concerned competent authority may direct the owners, users of such establishments, buildings to treat their waste water as per the directions laid in (C-1)

Rohit

D. PENALTY

- i Any owner/developer/organization /society violating the provisions of these bye-laws, shall be fined Rs. 2500/- on the day of detection and if the violation continues, than shall be fined Rs.100 for every day as concrete action after written notice from the concerned competent authority.
- ii. If the results of test as mentioned in (C-1 v. a. b.) are not satisfactory, then the concerned owner/developer/organization/society shall be charged a penalty of Rs. 300/- per day till the necessary preventive action is taken and disconnection of water connection also.

A handwritten signature or set of initials in dark ink, appearing to be 'Roh' or similar.

PART XII
REGULATIONS FOR SPECIAL ACTIVITIES

35.0 MINING OR QUARRYING OPERATIONS:-

The Municipal Commissioner, may grant permission for Mining or Quarrying operations in agriculture zone on following conditions:

- i) Pits and holes created in the process of mining and quarrying should be appropriately filled up and not left open.
- ii) The site shall be restored so as to make it safe either by developing a garden or by planting fruit growing trees around it or by making it a water reservoir.
- iii) Mining & quarrying operation should be in a controlled manner, so that it would not cause nuisance to other.
- iv) Hill tops and hill slopes from which rain water flows should not be allowed to be used for mining and quarrying.
- v) The natural landscape and environment should not affect adversely.
- vi) Quarrying shall be regulated in accordance with the method to be prescribed by the District Collector.
- vii) Regulations prescribed by the Revenue authorities regarding, settlement and restoration of environment shall be strictly followed.
- viii) Quarrying shall not be permitted within 500m from the Core area (gaathan) / village settlements/ residential zone / existing development and from the national highway / state highway, rivers, water reservoir, lakes, forts, archeological sites, historical places and places of tourist interest.
- ix) The conditions prescribed under Maharashtra Minor Mineral Extraction Rules and Regulations shall be observed.

36.0. ERECTION OF MOBILE TOWERS:

Regulation for setting up of Telecommunication Cell Site(s)/Base Station(s) and installation of the equipments for Telecommunication Network in Municipal Corporation area.

36.1 Applicability:

This Regulation, shall apply to all existing and/or proposed Telecommunication Cell Sites/Base Stations installed or to be installed in Municipal Corporation area.

36.2 Control Over Development

No Telecommunication Cell Site/Base Station shall be setup or installed without the previous permission in writing of the Municipal Commissioner. The permission shall be granted in the same manner as prescribed under Sections 44 to 47 of the Maharashtra Regional and Town Planning Act, 1966.

If the Municipal Commissioner does not dispose of the application within a period of 60 days from the date of submission, the said application by the Telecom Service Provider/Infrastructure Provider (TSP/IP) shall be deemed to have been approved as per the provisions under Section 45 of the

Bele

Maharashtra Regional and Town Planning Act, 1966.

36.3 Procedure for Obtaining Development Permission

- A** All the applications for setting up or installation of any Telecommunication Cell Site/ Base Station (TCS/BS) or erection of a part thereof, shall be made to the Municipal Commissioner by the concerned Telecom Service Provider (TSP) or the concerned Infrastructure Provider (IP), in such form and containing such particulars as may be prescribed by the Municipal Commissioner.
- B** The application to the Municipal Commissioner for obtaining the aforesaid development permission shall be accompanied by the following documents-
- (a) All the documents as otherwise required to be attached for any development permission under the sanctioned Development Control Regulations for the area in which the site under application is located.
 - (b) Plans showing Location Map, Key Plan, Site Plan, Block Plan and Plans of the proposed work. In case of roof-top tower, the copy of Occupation Certificate or copy of sanctioned building plans or copy of Commencement Certificate issued by the Municipal Commissioner or any other valid proof, in respect of the building on which the erection of roof-top tower is proposed, showing that such building is authorised.
 - (c) Notarised consent of the Owner of premises, which shall mean and include consent of the owner of property or no-objection certificate of the concerned registered Co-op Housing Society or notarised consent of 70% of the total number legal occupants in case of Apartments or Condominium or no-objection certificate of the lessor in case of a lease -hold property.
 - (d) Copy of agreement between the TSP/IP and the Owner of premises.
 - (e) Copy of Access Service License/ Infrastructure Provider (IP) Registration Certificate, granted to the TSP/IP by the Department of Telecommunications (DoT), Government of India (GoI).
 - (f) Copy of clearance from the Standing Advisory Committee for Frequency Allocations (SACFA) or copy of application made to SACFA for the said Location submitted to Wireless Planning Commission (WPC) wing of the Department of Telecommunications (DoT), with registration number as WPC Acknowledgement, along with an undertaking that in case of any objection/ rejection, TSPs/IPs will take corrective actions or remove the TCS/BS.
 - (g) Acknowledgement receipt issued by Telecom Enforcement Resource and Monitoring (TERM) Cells in respect of the self-certificate submitted by TSP/IP regarding mobile towers/Base Transceiver Station (BTS) (Ground-based or Roof-Top or Pole/wall-mounted) in the format as prescribed by Telecom Engineering Centre (TEC), DoT, establishing/certifying that all General Public areas around the TCS/BS will be within safe Electro-Magnetic Radiation (EMR) exposure limit as per peak traffic measurement after the antennae starts radiating.
 - (h) Copy of Structural Stability Certificate for any ground-based Base Transceiver Station (BTS).

OR

In case of any roof-top BTS tower, Structural Stability Certificate for the building, based on written approval of any authorized Structural Engineer of the State/local Body/Central Building Research Institute (CBRT), Roorkee/ IIT/ NIT or any other Agency, authorized by the Municipal Commissioner.

Provided that such NOC shall not be required for the single pole antennae or cellular signal boosters.

- (i) Copy of the type test certificate issued by Automotive Research Association of India (ARAI)

Beh

to the manufacturers of the Diesel Generator (DG) Sets.

- (j) Notarised undertaking from the Applicant/Owner of premises :-
- (i) That the cabin will not be utilized for any purpose other than the Telecommunication Cell Site/Base Station.
- (ii) That if the said activity is discontinued by the Applicant, the said cabin will be demolished forthwith by the Applicant /Owner of premises.
- (k) No objection certificate from the Authority concerned under the Civil Aviation Ministry (hereinafter referred to as the said Authority) in case of any building falling in any area where such no objection certificate of the said Authority is required under the relevant rules or law.
- (l) No objection certificate of the Maharashtra Pollution Control Board regarding compliance with the norms prescribed for noise levels and smoke levels for the power generating sets having capacity above 100 kw, to be provided for Base Transceiver Stations.
- (m) No objection certificate of the Chief Fire Officer of the Municipal Corporation only in case of High Rise buildings having height of 15 mtr. or more measured from ground level.
- (n) Copy of clearance from the State Environment Department as well as the Forest Department, in case of forest, protected areas, if applicable.
- (o) Data Sheet containing the information regarding –
- (a) Name of Telecom Service Provider/ Infrastructure Provider,
- (b) Location,
- (c) Tower Reference-
- (i) Height and Weight of Tower,
- (ii) Ground Based Tower/Roof Top Tower,
- (iii) Number of Antennae planned on Tower,
- (iv) Permissible maximum EMF Radiation Level,
- (v) Proposed maximum EMF Radiation Level.
- (p) Requisite fees, charges, as applicable.

C In case of a listed Heritage building/ Heritage precinct and/or in case of cessed buildings and/or in case of area under Environmentally Sensitive Zone (ESZ), notified by the Ministry of Environment and Forest (MoEF), Government of India (GoI), all the applications for installation of any TCS/BS or erection of a part thereof, shall be made to the concerned Municipal Commissioner, which will forward it to the Heritage Conservation Committee concerned and/or High Level Monitoring Committee (HLMC) appointed/constituted by MoEF respectively.

D The erection of the Base Station including tower, shall be commenced within 90 days from the date of receipt of permission from the Municipal Commissioner and report of erection shall be made to the Municipal Commissioner.

36.4 Leviable charges

The Municipal Commissioner, while granting permission under sub regulation (3) hereinabove, shall levy and collect the following charges:-

- (a) Development Charge.-Development charge shall be levied and collected by the Municipal Commissioner as per the provisions under section L24-B of The Maharashtra Regional and Town Planning Act, 1966. For the purpose of assessing the development charge, the setting up of Base Station on land and on roof-tops shall be classified under commercial category,

calculated over the foot print area occupied by the Telecommunication Cell Site/Base Station.

- (b) Administrative Fee.-Over and above the development charge as stipulated in clause 4 (a) above, TSP/IP shall pay to the Municipal Corporation, a one time non-refundable Administrative fee of Rs.30000, or as per the rates revised from time to time by the Government.

36.5 Planning Norms For Erection of TCS /BS

- (a) Notwithstanding the land use provisions under these regulations, subject to the compliance of other provisions of these Regulations, it shall be permissible to install TCB/BS, on
- (i) all land uses as earmarked in development plan,
 - (ii) all lands which are designated for non-buildable reservations in development plan, subject to the condition that the maximum permissible area for installation of such TCS/BS shall not be more than 5% of the area of the reserved site or 100 sq. m., whichever is less, and shall be located in one corner of the reserved site.
 - (iii) all lands which are designated as open spaces/recreational open spaces/recreational grounds in a sanctioned layout, where such installation shall be permissible only with the no-objection certificate of the concerned registered co-operative housing society or consent of 70% of the total number of legal occupants/plot holders of such layout, subject to the condition that the maximum permissible area for installation of such TCS/BS shall not be more than 5% of such area or 100 sq. m, whichever is less, and the same shall be located in one corner of such area.
 - (iv) all buildable reservations in development plan, except for buildings of uses mentioned in Regulation no.36.5(f), where such installation shall be permissible on the roof top, but only after development of the said reservation.
 - (v) all open lands in slum areas belonging to the Government/public Authority planning Authority, where only ground-based TCS/BS shall be permissible and no Roof-Top Tower shall be permissible, save as provided in Regulation no.36.5(a)(vi) herein below.
 - (vi) public buildings in slum areas, like public toilets, community centers etc., constructed by any Public Authority or to be constructed by the TSP/IP, where construction of Roof Top Towers shall be permissible, subject to maintenance and compliance of other terms and conditions specified by the Municipal Commissioner.
- (b) No permission for installation of TCS/BS shall be granted in ecologically important areas, without ecological impact assessment and review of installation site. The Forest Department should be consulted before installation of TCS/BS in and-around protected areas and Zoos.
- (c) The TCS/BS must have clear access by means of an existing road having minimum width of 6 mtr. for locations falling in Core area as earmarked on DP and 9 m., for locations falling outside such Core area. However, in exceptional circumstances, the Municipal Commissioner may relax such road width suitably, but in no case, shall it be less than 5 m.
- (d) In case of both ground-based towers and roof-top towers, there shall be no nearby buildings right in front of the antenna(e) of equivalent height, taking into account the tilt of the lowest antenna on tower, as per the details in the **Table No.32** below:-

Red

Table No.32

Sr. No.	Number of Antenna(e) Pointed in the Same Direction	Building/ Structure Safe Distance from the Antenna(e) at the Same Height (in m.)
(1)	(2)	(3)
1	1	20
2	2	35
3	4	45
4	6	55

Provided that the antennae at the same height only are to be counted, as the beam width of mobile antennae, in the vertical direction, is very narrow.

(Explanation.-The distance figures in the above Table are based on empirical estimation considering that all the antennae are emitting at their maximum RF power of 20 Watts and exactly in the same direction with the same height.)

Provided further that above norms shall automatically stand revised as per the latest guidelines, issued by the DoT from time to time.

- (e) In case of Wall Mounted/Pole Mounted Antenna(e) :-
- (i) Wherever the antennae are mounted on the wall of a building or pole or along the road, their height should be atleast 5 mtr., above ground level/road level. Provided that such installations shall have to comply with the prescribed radiation limits.
 - (ii) As far as safe distance of buildings from antenna(e) is concerned, guidelines as in Regulation No.36.5 (d) above shall apply.
- (f) Installation of Base Station antenna(e) shall not be permissible within the premises of schools, colleges, and hospitals as well as on the adjoining land /building within 3 m., from the boundary of premises of schools, colleges and hospitals. Also antenna(e) shall not be directed/ positioned towards any school/college/ hospital building.
- (g) The existing Base Station antenna(e) approved earlier on any school/college/ hospital, building shall not be renewed further after the expiry of period of approval and the same shall be removed immediately thereafter, subject to the provisions of Regulation no.36.7 (d).
- (h) Access to Base Station Antenna site shall be prohibited for the general public, by putting in place suitable measures such as wire-fencing, locking of the door to the roof, etc.
- (i) The roof-top TCS, IBS towers shall be put only on buildings which are declared structurally strong enough to bear the load of such installation. The base connection to the building should be got designed from a qualified structural engineer. Structural safety certificate of the composite structure [Building + Tower(s)] shall have to be obtained from any of the recognized Government Institutes.
- (j) While according permission for installation of TCS/BS, permissible for erection of a cabin at ground level may be granted. However, the same shall not be allowed in the prescribed marginal distances. The area of such cabin shall not be more than 20 sq. mt. for each TSP/IP, subject to the

Beh

certificate of structural safety. Built-up area of such cabin(s) shall not be counted towards built-up area or FSI.

- (k) No permission for installation of TCS/BS shall be granted on buildings which are unauthorized and structurally unsafe. If permission for installation of such structures is granted on a building, which is declared as unauthorized at a later point of time, the Municipal Commissioner shall first take recourse to the provisions of sections 52, 53, 54 and 55 of the Maharashtra Regional and Town Planning Act, 1966 or other relevant laws, as the case may be, against such unauthorized building and in case the Municipal Commissioner, after completing the due process of law, decides to undertake any action of demolition against such unauthorised building then such decision shall also be conveyed to the concerned TSP/IP with a direction to relocate the TCS/BS within a period of 90 days, after which the Municipal Commissioner shall not be under any obligation to send any further intimation to the TSP/IP concerned before demolishing such unauthorised building, and it shall not be liable to pay compensation for the loss of the Base Station as a consequence of the demolition of the unauthorised building. The TSP/IP shall indemnify the Municipal Commissioner to this effect, while seeking permission for installation of TCS/BS.
- (l) Permission for installation of TCS/BS, once granted shall remain valid for next 5 years. The TSP/IP shall apply for renewal of permission to the Municipal Commissioner. The Municipal Commissioner, while considering renewal, shall insist upon submission of fresh structural stability certificate for buildings more than 30 years of age. Administrative fee shall be levied and collected as prescribed in Regulation no.36.4 (b) hereinabove, for every such renewal. If TSP/IP fails to apply for renewal along with all necessary documents before the expiry of earlier permission, then such TSP/IP shall be liable for action under the provisions of the Maharashtra Regional and Town Planning Act, 1966.
- (m) In case of any existing TCS/BS on a slum structure, every effort shall be made to relocate such TCS/BS on a nearby suitable public building or any other authorised structure or open land in the slum. If such relocation is not possible, then such TCS/BS may be allowed to be continued on such slum structure subject to its structural suitability, till the TCS/BS is shifted to any other authorised structure or till the redevelopment of the slum, whichever is earlier.
- (n) While granting permission for TCS/BS, the Municipal Commissioner shall stipulate that TSP/IP shall conduct regular audit in accordance with the directions/guidelines issued by TERM Cell or DoT from time to time.

36.6 Electro-Magnetic Field (EMF) Radiation Norms

- (a) Prior to installation of TCS/BS, the TSP/IP shall have to obtain Site clearance from the Standing Advisory Committee on Frequency Allocation (SACFA) of the Department of Telecommunication (DoT) for every site from the point of view of interference with other wireless users, aviation hazards and obstruction to any other existing microwave links.
- (b) The Electro-Magnetic Field (EMF) radiation from BTS towers shall be subject to the regulations framed by the DoT from time to time. The TSP/IP shall periodically conduct audit and monitor EMF radiation in Urban localities, hospitals and educational/industrial /residential / recreational premises, especially around the Protected Areas (PAs) and ecologically sensitive areas, in accordance with the guidelines issued by DoT in this regard. It shall be binding on TSP/ IP to follow the mechanism prescribed by the DoT/TERM Cell at local level for ensuring control on the EMF radiation and for notifying on continual basis the radiation level at critical location. For all the existing as well as new BTSs/Towers, TSPs are required to submit self-certificates periodically in the format prescribed by TEC, DoT, in order to ensure that normally all general public areas around

Bch

the TCS/BS site are within the safe EMR exposure limits. Audit of the self-certification furnished by the TSPs shall be done by the TERM Cell periodically. TERM Cell shall carry out test audit of the BTS sites on random basis as per the guidelines received from DoT and also in respect of all cases where there is a public complaint. The TERM Cell shall have due regard to the instructions issued by DoT regarding technical audit of TCS/BS, including radiation of towers within safe limits. These shall include Roof Top/Ground Based./Pole Mounted/Wall Mounted Towers. The TERM Cell shall also verify antenna orientation, safe distance from the Tower (exclusion zone) etc. For non-compliance of EMF standards, Telecom Service Provider shall be liable for penal action by the TERM Cell and/or Department of Telecommunication (DoT). Any violation noticed may attract heavy penalties on TSPs and may also lead to shut down of TCS/ BS, in case the violation persists.

36.7 Miscellaneous Provisions

- (a) Any complaint concerning illegal installation of TCS/BS on any building or any query of any nature regarding the installation of telecommunication equipment, shall be addressed to the Municipal Commissioner which shall intimate the concerned TSP/IP about the same with a direction to resolve the issue under intimation to the Municipal Commissioner, within such period as may be prescribed by the Municipal Commissioner.
- (b) The TSP/IP, who has erected TCS/BS without due permission, shall apply to the concerned Municipal Commissioner for regularization within 180 days from the date of coming into force of this Regulation. In case such application is made within the prescribed period, then the offence, if any, registered against the TSP/IP may be compounded by the Municipal Commissioner under section 143 of the Maharashtra Regional and Town Planning Act, 1966, subject to the provisions of these regulations.
- (c) The TSPs/IPs who have earlier erected TCS/BS with due permission, shall apply afresh, for validation of the previous permission, to the Municipal Commissioner within a period of 90 days from the date of commencement of this Regulation, in order to ensure due compliance of this Regulation. However Administrative fee in such cases shall not be leviable if appropriate fee/ Development charge, not less than the amount prescribed under Regulation No.36.4 (b) above, has already been paid. In case the amount paid is less than what is prescribed hereinabove, the difference in amount shall be recovered from the TSP/IP.
- (d) Any existing TCS/BS not conforming to any of the above provisions shall have to be removed within one year from the date of commencement of this Regulation, unless the same is specifically regularized by the Municipal Commissioner following due compliance by TSP/IP. However, operation of such non-conforming Telecommunication Cell Site/Base station shall be discontinued within a period of 30 days from the date of receipt of notice from the Municipal Commissioner to that effect, which shall however be issued only after obtaining the consent of the TERM Cell of DoT.
- (e) The Licensees shall try to share the tower for fixing their respective antennae provided the prescribed conditions are duly fulfilled, so as to ensure curtailing of multiple towers and optimizing the use of the existing ones.
- (f) Sign boards and Warning signs ("Danger", "RF Radiation", "Restricted Area", "Don't Enter" etc.) shall be provided at TCS/BS antenna sites which are clearly visible and identifiable.
- (g) The TSP/IP shall display the details of the following on a board (minimum size 24" x 48") separately or prominently on the cabin, for the perusal of general public in such a way that the same shall be clearly visible and identifiable.

Abel

- i. Name of TSP/IP :-
- ii. Location :-
- iii. Tower Reference :-
 - (a) Height, (b) Weight (c) Number of antennae planned on tower, (d) Permissible EMF radiation level (e) Proposed EMF radiation level.
- iv. Due date for next renewal.
- v. Contact Person's name, address and Telephone Number
- vi. Address of Complaint Redressing Authority with Telephone Numbers
- vii. Police Control Room- 100
- viii. Fire Control Room – 101
- ix. Ambulance – 102
- x. Other important information, if any.

Provided that in case of Telecommunication Cell Site/Base station on roof-top, the aforesaid information shall be displayed on the ground floor of the building.

- (h) The Municipal Commissioner shall display the list of authorized TCS/BS on their official web site, along with the date of permission and due date for renewal of permission.
- (i) TCS/BS Tower shall be inspected for distortion of members, torques of nuts and bolts at least once in five years. However, in case of areas affected by any natural calamity, such as cyclone, earthquake, flood, etc., such inspection shall be carried out immediately after such incident suo-moto or on being directed by the Municipal Commissioner. Such inspection shall be carried out only by a qualified structural engineer and a certificate to that effect shall be submitted to the Municipal Commissioner.
- (j) TCS/BS Towers located in highly corrosive environment shall be painted every year. Other towers shall be painted at least once in five years to give additional protection.
- (k) The Municipal Commissioner shall make efforts to provide Single Window clearance to TSP/ IP for disposal of their applications in a time bound manner.

36.8 Notwithstanding anything contained hereinabove, all the Regulations/Bye-Laws/ Memorandum / Directions /Guidelines in this regard, issued or to be issued from time to time, by the Department of Telecommunications, Government of India, shall prevail and be binding on TSP/IP and also on the Municipal Corporation, in which case, this Regulation shall stand modified to that extent.

36.9 Powers of Interpretation and Removal of Doubt-

If any interpretation is required regarding the clauses of this Regulation, then the matter shall be referred to the Urban Development Department, Government of Maharashtra, whose decision shall be final.

Rich

PART XII
SPECIAL SCHEMES

37.0 SPECIAL TOWNSHIP PROJECTS

This regulation is kept in abeyance.

38.0 CONSERVATION OF HERITAGE BUILDINGS / PRECINCTS / NATURAL FEATURES

38.1 Applicability:

This regulation will apply to those buildings, artifacts, structures, areas and precincts of historic and/or architectural and /or cultural significance (hereinafter as 'Listed Buildings/Heritage Buildings and listed precincts/Heritage precincts') and those natural features of environmental significance including sacred graves, hills, hillocks, water bodies (and the areas adjoining the same) etc.

38.2 Preparation of list of Heritage Buildings, Heritage Precincts and Natural Features.

The Municipal Commissioner in consultation with Heritage Conservation Committee, shall prepare list of buildings, artifacts, areas and precincts of historic and /or cultural significance and the list of those natural features of environmental significance including sacred graves, hills, hillocks, water bodies (and areas adjoining the same) etc. to which this regulation applies. Whenever such list is to be prepared independently or required to be amended, it shall not be necessary to follow the procedure under Section 37 of Maharashtra Regional and Town Planning Act of 1966. The procedure as laid down in this regulation shall be followed.

The Municipal Commissioner shall issue public notice in the local newspapers declaring his intention to include the buildings, artifacts, areas and precincts of historic and /or cultural significance and the list of natural features of environmental significance, including sacred graves, hills, hillocks, water bodies etc. and invite objections and suggestions from any person in respect of the proposed inclusion within a period of 30 days from the date of such notice.

The Municipal Commissioner shall issue notice to the owner of the buildings, artifacts, areas and precincts of historic and/or cultural significance etc. and invite objections and suggestions from such person in respect of proposed inclusion within 30 days from the date of such notice.

The Municipal Commissioner on respect of any objections or suggestions shall decide the same after giving hearing to the objector.

Provided that, the Municipal Commissioner may supplement or amend the list from time to time either suo-moto or on the advice of the Heritage Committee after following the procedure as described above.

Provided further that, any draft list published as above, shall be the part these regulations after sanction by the Government.

38.3 Restriction on development, Redevelopment/repairs etc.

No development or redevelopment or engineering operations or addition, repairs renovation including the painting of buildings, replacement of special features or plastering or demolition of any part thereof of the said listed buildings, or listed precincts or listed natural features shall be allowed except with the prior written permission of the Municipal Commissioner. Before granting any such permissions, the Municipal Commissioner shall consult the Heritage Conservation Committee to be appointed by the State Government (hereinafter referred to as 'the said Heritage

Conservation Committee') and shall act on the advice of the Heritage Conservation Committee.

Provided that before granting any permission for demolition or major alterations/addition to listed buildings (or buildings within listed precincts) objections and suggestions from the public shall be invited and duly considered by the Heritage Conservation Committee.

Provided that, in exceptional cases for reasons to be recorded in writing the Municipal Commissioner may overrule the advice of the Heritage Conservation Committee.

Provided further that, the power to overrule the advice of the Heritage Conservation Committee, shall not be delegated by the Municipal Commissioner to any other officer.

If the application for development, alteration, modification of the Heritage precincts or listed building is rejected under this regulation or while granting such permission any conditions are imposed on the owner which deprives him to use the FSI, the said owner shall be compensated by grant of Development Right Certificate.

38.4 Incentive uses for Heritage Buildings.

After the commencement of this Regulation, the Heritage Precincts or the Listed Buildings shall not be permitted to be used for any commercial or office purpose except with the permission of the Heritage Conservation Committee. However, in cases of buildings included in the Heritage Conservation List, if the owner /owners agree to maintain the listed Heritage Building as it is in the existing stage and to preserve its heritage with due repairs, the owner/owners may be allowed with the approval of the Heritage Conservation Committee to convert part of the whole of the non-commercial area to commercial /office use. Provided that, if the heritage building is not maintained suitably or if the heritage value of the building is allowed to be spoiled in any manner, the Municipal Commissioner shall withdraw the permission forthwith.

38.5 Grant of Transferable Development Rights to owners/lessees of heritage buildings/heritage precincts.

If the owner is deprived of using FSI on the said plot or development permission is granted to him with conditions which deprives him of use of FSI, then he shall be entitled for TDR as decided by the Commissioner in consultation of Heritage Conservation Committee. The utilisation of this TDR shall be as per TDR Regulation No.22

38.6 Maintaining Skyline

Building included in heritage precincts shall maintain the skyline in the precincts (without any high-rise development) as may be existing in the surrounding area, so as not to demolish or destroy the value and beauty of the said heritage buildings/heritage precincts. The development within the precincts shall be in accordance with the guidelines framed by the Municipal Commissioner on the advice of the Heritage Conservation Committee.

38.7 Restrictive Covenants

Regulations existing as on date of this Regulation imposed under covenants terms and conditions, on the leasehold plots either by State Government or by the Municipal Corporation shall continue to be imposed, in addition to the Development Control and Promotion Regulations. However, in case of any conflict with the heritage preservation interest/environmental conservation and the said Development Control and Promotion Regulations, this regulation shall prevail.

38.8 Grading of the listed buildings/Listed Precincts.

The Municipal Commissioner shall classify the Heritage Precincts, Heritage Buildings in "Grades" such as (i), (ii), (iii). The meaning of these grades and basic guidelines for development permissions are as follows:

Bel

Grade-I	Grade-II	Grade-III
(A) Definitions		
Heritage Grade-I comprises Buildings and precincts of National or Historic importance, excellence in architectural style, design technology and material usage and/or aesthetics; associated with a great historic event, personality, movement or institution. They have been and are the prime landmarks of the city and of National importance.	Heritage Grade –II (A and B) comprises buildings and precincts of Regional importance, possessing special architectural or aesthetic merit, or cultural or historical significance though of a lower scale than Heritage Grade-I. They are local landmarks, which contribute to the image and identity of the region. They may be the work of master craftsmen or may be models of proportion and ornamentation or designed to suit a particular climate.	Heritage Grade –III comprises buildings and precincts of local importance for townscape, they evoke architectural, aesthetic, or sociological interest though not as in Heritage Grade –II. These contribute to determine the character of the locality and can be representative of life-style of a particular community or region and, may also be distinguished by setting on a street line or special character of the façade and uniformity of height width and scale.
(B) Objective		
Heritage Grade-I richly deserves careful preservation.	Heritage Grade-II deserves intelligent conservation.	Heritage Grade-III deserves intelligent conservation (though on a lesser scale than Grade-II and special protection to unique features and attributes.)
(C) Scope for Change		
No interventions be permitted either on exterior or interior unless it is necessary in the interest of strengthening and prolonging the life of the buildings or precincts or any part of features thereof. For this purpose absolutely essential and minimum changes would be allowed and they must be in accordance with the original.	Grade-II (A) Internal changes and adaptive reuse and external changes may by and large be allowed but subject to strict scrutiny. Care would be taken to ensure the conservation of all special aspects for which it is included in Heritage Grade-II Grade-II (B) In addition to the above, extension of Additional building in the same plot or compound, in certain circumstances be allowed, provided that, the extension/additional building is in harmony with (and does not	External, internal changes and adaptive reuse would by and large be allowed. Changes can include extensions, and additional buildings in the same plot or compound. However any changes should be such that they do not detract from the existing heritage building/precinct.

Beh

	detract from) the existing heritage buildings or precincts especially in terms of height, and facade.	
(D) Procedure		
Development permission for the changes would be given by the Commissioner on the advice of the Heritage Conservation Committee.	Development permission for the changes / additional construction would be given by the Commissioner on the advice of Heritage Conservation Committee.	Development permission for the changes / additional construction would be given by the Commissioner on the advice of the Heritage Conservation Committee.
(E) Vistas/ Surrounding Development		
All developments in areas surrounding Heritage Grade-I shall be regulated and controlled by ensuring that it does not mark the grandeur of or view from Heritage Grade-I		

38.9 Signs and outdoor display structures

No display or advertising signs and outdoor display structures on listed building and / or the Heritage Precincts shall be permitted except accordance with part X (sign and outdoor display structure) National Building Code of India.

Prohibition of advertising signs and outdoor display structure in certain cases :

Notwithstanding the provisions mentioned above no advertising sign or outdoor display structures shall be permitted on buildings of architectural aesthetic historic or heritage importance as may be decided by the Municipal Commissioner, Committee or on Government buildings, save that in the case of Government buildings only advertising signs or outdoor display structures may be permitted if they relate to the activities for the said buildings' own purposes or related programs.

Provided that, if the Heritage Conservation Committee so advises, the Municipal Commissioner shall refuse permission for any sign or outdoor display structure.

38.10 Composition of Heritage Conservation Committee.

There shall be Heritage Conservation Committee for the City. This Committee is to be constituted by the Government. The committee shall comprise of the following members:

Member having knowledge of architecture, art, conservation as

i)	Nominated by the Government of Maharashtra	Chairman
ii)	Architects having 10 years of experience and membership of the Council of Architecture and he should be (i) Urban Designer : or (ii) Heritage Conservation Architect (architects shall be those having experience in conservation architecture)	Member
iii)	Environmentalist having in-depth knowledge and experience of 10 years of the subject matter.	1 Member

Bel

iv)	Expert in the field of history having 10 years of experience	Member
v)	Deputy / Assistant Director of Town Planning, Nashik Municipal Corporation	Member
vi)	Eminent structural engineer having experience of 10 years in the field of conservation.	Member
vii)	Representative of the Department of Archaeology, Govt. of Maharashtra.	Member
viii)	Representative of Archaeological Survey of India.	Member

The Committee shall have the powers to co-opt five additional members who may have lesser experience, but who have special knowledge of the subject matter.

Provided that, the additional members may be co-opted, for special purposes or on sub-committees of the Heritage Conservation Committee.

The tenure of the Members of categories (i) to (iv) above shall change after every three years provided however that, the same person shall be eligible for reappointment as Member.

The Heritage Conservation Committee shall come into existence with effect from the date of its publication in the official Gazette.

No act of the Committee done in good faith, shall be deemed to be invalid by reason only of some defect subsequently discovered in the organisation of the Committee or in the Constitution of the Committee or in the appointment of the Member or on the ground that such member was disqualified for being appointed.

The Chairman and in his absence the chosen Member of the Committee shall preside over the meeting of the Committee.

The Terms of reference of the Committee shall be inter alia.

- (i) To advise the Municipal Commissioner whether development permission should be granted under this Regulation and the conditions of such permission.
- (ii) To prepare a list or supplementary list of building artifacts, structures, areas precincts of historic aesthetic architectural cultural significance and a supplementary list of natural features of environmental significance including scared groves, hills, hillocks etc. water bodies (and the areas adjoining the same) to which this regulation would apply.
- (iii) To advise whether any relaxation, modification, alteration, or variance of any of the Development Control and Promotion Regulations is called for.
- (iv) To suggest amendments, changes or special regulations or modification to regulations for listed buildings and the heritage precincts regulated under these regulations and to advise the Municipal Commissioner regarding the same.
- (v) To advise on the extent of Development Rights to be granted to the owners of listed Building of the Heritage Precincts.
- (vi) To advise whether development Rights Certificates may be allowed to be consumed in a heritage precinct.
- (vii) To advise whether to allow commercial /office user of any listed building of Heritage Precincts and when to terminate the same.
- (viii) To advise the Commissioner to regulate erection of outside advertisement/bill boards.
- (ix) To recommend to the Commissioner guidelines to be adopted by those private parties who sponsor beautification schemes at public intersection and elsewhere.
- (x) To recommend to the Commissioner to evaluate the cost of repairs to be given to the owners to bring the existing building back to the original condition. For this purpose the Committee may also try to help the Municipal Commissioner to raise funds through private sources.
- (xi) To prepare special designs and elements and guidelines for listed buildings and control of

Isch

height and essential façade characteristics such as maintenance of the buildings and to suggest suitable design adopting new materials for replacements keeping the old form intact to the extent possible.

- (xii) To prepare guideline relating to design elements and conservation principles to be adhered to and to prepare other guideline for the purpose of this regulation.

To advice the Municipal Commissioner on any other issue as may be required from time to time during course of scrutiny of development permissions and in overall interest of heritage/environmental conservation.

39.0 TOURISM DEVELOPMENT ACTIVITIES

The Municipal Commissioner may allow the development of tourism activities in Agriculture Zone, as per following terms & conditions-

General Conditions –

Where the lands are located in unique/picturesque area, particularly suitable for development of tourism in view of existing water body, scenic beauty, tree plantation or geological formation etc. such area can be specified as Tourism Development Zone on request of land owner. The minimum area of such site, however, shall not be less than 1.00 Ha.

Tourism Development Zone can be developed by individual or company or partnership firm or Government / Semi-government Organizations / Corporations.

On the request of owner/applicant, Tourism Development Zone shall be identified by the following Committee taking into consideration the location of area and its surrounding –

Constitution of committee -

Sr.No.	Name	Position
(i)	Municipal Commissioner	Chairman
(ii)	Regional officer MTDC	Member
(iii)	Environmentalist to be appointed by Municipal Commissioner	Member
(iv)	Deputy Director /Assistant Director, town Planning, Municipal Corporation.	Member Secretary

This Committee may be called “Tourism Development Zone Committee” (TDZC). The tenure of the member at Sr.No.3 shall be of 3 years, however, the same person shall be eligible for reappointment as a member.

4) Condition for development

- i) Maximum permissible FSI in this zone shall be 0.25 of net plot area.
- ii) The uses like resort, Holiday camp, recreational activities, amusement park, may be permitted in this zone.
- iii) If the site is located adjacent to forts, archeological and historical monuments, the development shall be governed by the rules prescribed by the archeological department.
- iv) No development shall be permissible within 500 m. from full reservoir level (FRL) of the irrigation projects on the upstream side and within such distance as may be prescribed under river zone management guidelines on the down-stream side, except for existing core area (gaathan) and its 100 m. Periphery and except for the purpose of restoration, conservation, improvement, maintenance and management of the places of recreational and tourism value

Beh

and projects.

- v) If the site is located near natural lakes, then, development shall be governed by the following

Distance from high flood line (HFL) / full storage level (FSL)	Development to be allowed
Upto 100 m.	Not permissible
Above 100 m. to 300 m.	Ground floor structure with maximum height of 5 m.
Above 300 m. to 500 m.	G+1 storey structure with maximum height of 9 m.
Above 500 m..	Within permissible FSI and subject to other regulations

- vi) No subdivision of land shall be allowed and structure to be constructed shall not allowed to be sold and condition to that effect shall be stamped on the approved plan.
- vii) the land should have approach of minimum 9 m. wide road.
- viii) the land having slope steeper than 1:5, shall not be eligible for development.
- 5) **Infrastructural Facilities** – All the infrastructural facilities required in site as specified by Municipal Commissioner and also as suggested by Tourism Development Zone Committee shall be provided by the developer at his own cost on the site. Proper arrangement for treatment and disposal of sewage and solid waste shall be made to the satisfaction of Municipal Commissioner & Maharashtra Pollution Control Board. No untreated effluent shall be allowed to pass into any watercourse. However, no effluent shall be allowed to pass into natural water body.
- 6) **Environment & Education** – Places where rare species of migratory birds are known to visit and where there is a heritage of flora & fauna shall be given preference for development as Tourism Development Zone. Efforts should be made for creating environmental awareness among the local population & especially among school going children in nearby area.

40.0 CLUSTER DEVELOPMENT FOR CORE AREA

This regulation is kept in abeyance.

41.0 SLUM REHABILITATION SCHEME

This regulation is kept in abeyance.

42.0 INNOVATIVE DEVELOPMENT PROPOSALS

If any development proposal is submitted by the owner or developer, consisting of new concepts, innovative ideas, then such proposal may be approved by the Authority in consultation with the Director of Town Planning, Maharashtra State, Pune, if it is, otherwise, in accordance with the spirit of these regulations.

APPENDIX A-1
FORM FOR CONSTRUCTION OF BUILDING OR LAYOUT OF BUILDING / GROUP HOUSING

Application for permission for development under Section 44 / 58 of The Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BPMC Act, 1949.

From _____
(Name of the owner)

To,
The Municipal Commissioner,
Municipal Corporation, Nashik
Sir,

I intend to carry out the under mentioned development in the site/plot of land, on Plot No..... Town and Revenue S.No.....City Survey No.....Maujesituated at Road / Street Societyin accordance with Section 44 / 58 of the Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BPMC Act, 1949.

I forward herewith the following plans and statements (Item i to ix) wherever applicable, in quadruplicate, signed by me (Name in block letters)and the Architect / Licensed Engineer / Structural Engineer / Supervisor, (License No.....), who has prepared the plans, designs and a copy of other statements /documents as applicable

- i) Key Plan (Location Plan), (to be shown on first copy of the set of plans)
- ii) Site Plan showing the surrounding land and existing access to the land proposed to be developed; (to be shown on first copy of the set of plans)
- iii) A detailed building plan showing the plan, section and elevations of the proposed development work along with existing structure to be retained/ to be demolished, if any;
- iv) Particulars of development in Form enclosed (to be submitted for development other than individual buildings);
- v) Copy of sanctioned layout plan if any;
- vi) An extract of record of rights, property register card (any other document showing ownership of land to be specified) alongwith consent of co-owners where third party interest is created;
- vii) Attested copy of receipt of payment of scrutiny fees;
- viii) Latest property tax receipt;
- ix) No Objection Certificate(s), wherever required.

I request that the proposed development/ construction may be approved and permission be accorded to me to execute the work.

FORM GIVING PARTICULARS OF DEVELOPMENT
(Itemiv of Appendix A-1)

1.	(a) (i) Full Name of Applicant	-----
	(ii) Address of applicant	-----
	(iii) e-mail ID	-----
	(iv) Contact / Mobile No.	-----
	(b)(i) Name and address of Architect/ licensed Engineer/ Structural Engineer/ Supervisor employed.	-----
	(ii) No. and date of issue of License	-----
2.	(a) Is the plot of, a City Triangulation Survey Number, Revenue Survey Number or Hissa Number of a Survey Number or a Final Plot Number of a Town Planning Scheme or a plot of an approved layout?	
	(b) Please state Sanction Number and Date of Sub-division / Layout	
	(c) Whether the land is situated in Core Area or Outside Core Area?	
3.	(a) What is the total area of the plot according to the ownership document and measurement plan?	-----
	(b) Does it tally with the Revenue/CTS Record	-----
	(c) What is the actual area available on site measured by Architect/licensed Engineer/Structural Engineer / Supervisor? (The permission shall be based on the area whichever is minimum.)	-----
	(d) Is there any deduction in the original area of the plot on account of D.P. roads, or reservation(s). If so, are they correctly marked on the site plan? Please state the total area of such deductions?	-----
	(e) Is there any water stream in the land? State the area of such land.	-----
	(e) What is the area remained for development after above deduction(s)?	-----
	(f) What is the area proposed for recreational open space? (in case of land having original holding more than 0.4 hector) Please mention the area.	-----
	(g) Whether amenity space as required under Regulation no.13.4 is left? Please mention the area.	-----
	(f) What is the net plot area as per Regulation no.13.8? (excluding (g) above)	-----
	4.	Are all plans as required under Regulation no.6.2 enclosed?
5.	(a) In what zone does the plot fall?	-----
	(b) For what purpose the building is proposed? Is it permissible according to the land use classification?	

Beh

6.	(a) Is road available as an approach to the land? What is the average existing width of the road? (If the plot abuts on two or more roads, the above information in respect of all roads should be given)	
	(b) Is the land fronting on D.P. road? If so, width of the D.P. road	
	(c) Is the land fronting on National or State highway? If so, is the Building line / control line maintained? Please state the distance.	
	(c) What is the height of the building above the average ground level of the plot?	
	(d) Is it within permissible limit of height specified in Regulation no. 15.9 i.e. 1.5 times of the road width plus front margin?	
	(e) Does height exceed the limit specified in (d) above? If so, is height approved by Director of Fire Services, M.S.?	
7.	Is the land subject to restrictions of blue / red flood line, airport, railway, electric line, land fill sites, archeology, etc.? Please state the details along with 'No objection certificate' if any.	
8.	(a) If there are existing structures on the plot	
	(i) Are they correctly marked and numbered on the site plan?	
	(ii) Are those proposed to be demolished immediately and hatched in yellow colour?	
	(iii) What is the plinth area and total floor area of all existing structures to be retained? (Please give details confirming to the plan submitted)	
9.	Is balcony area within the permissible limit of 15 % ? State said balcony area and area counted in FSI.	
10.	Are double height terrace within the limit of 20%? Are they of supported type? State said double height terrace area and area counted in FSI.	
11.	(a) Please state the total built up area, (existing + proposed + extra balconies + extra double height terraces.)	
	(b) What is the basic permissible F.S.I. of the zone according to front road width?	
	(c) What is the premium FSI proposed to be consumed?	
	(d) What is the area of TDR proposed to be consumed?	
	(e) What is the additional FSI proposed to be consumed?	
	(f) Please state the overall F.S.I. utilised in the proposal?	
	(g) Is built-up area of each flat / unit mentioned on the plan?	
12.	Whether area for inclusive housing is required	

	as per Regulation no.13.7? Please state the details.		
13.	(a) What is the width of the front marginal distance (s)? If the building abuts two or more roads, does the front marginal distance comply with Regulation?		
14.	(a) What is :	Permissible	Proposed
	(i) the side marginal distance (s)?		
	(ii) the rear marginal distance (s)?		
	(iii) the distance between buildings?		
15.	(a) What are the dimensions of the inner or outer chowk?		
	(b) Is / are room (s) dependent for its light and ventilation on the chowk? If so, are the dimensions of the chowk as required?		
16.	(a) Whether sizes of the rooms comply with the dimensions mentioned in the regulations?		
	(b) Whether use of every room / part mentioned on the plan?		
	(c) Whether every room derives light and ventilation required under the regulations?		
17.	If the height of the building is more than 15 meter above the average ground level, is provision for lifts made?		
	(a) If so, give details of lift.	Passenger Capacity	No. of Lifts
	(b) Details of Fire Lift.	Passenger Capacity	No. of Lifts
18.	(a) Does the building fall under purview of Regulation No.6.2.6.1?		
	(b) If so, is fire escape staircase provided in addition to regular staircase?		
	(c) Whether the ramps to the basement are provided leaving 6 m marginal distance for movement of fire fighting vehicle?		
	(d) If podiums are proposed; does it allow the movement of fire fighting vehicle properly?		
19.	(a) What are the requirements of parking spaces under the Regulation no.20? How many are proposed?	Required	Proposed
		Car	
		Scooter	
		Cycle	
	(b) (i) Are loading-unloading spaces necessary?		
	(ii) If so, what is the requirement?		
	(iii) How many are proposed?		
20.	Is the sanitary arrangement provided as per the regulation?		
21.	Details of the source of water to be used in the construction		

22.	Distance from the sewer.	
23.	Please explain in detail in what respect the proposal does not comply with the Development Control and Promotion Regulations and the reasons there for, attaching a separate sheet if necessary.	

I hereby declare that I am the Architect/ licensed Engineer/ Structural Engineer/ Supervisor employed for the proposed work and that the statements made in this form are true and correct to the best of my knowledge.

APPENDIX A-2

FORM FOR SUB-DIVISION OF LAND AS PLOTTED LAYOUT

Application for permission for development under Section 44 / 58 of The Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BPMC Act, 1949.

From
(Name of the owner)

To,
The Municipal Commissioner,
Municipal Corporation, Nashik.

Sir,
I intend to carry out the under mentioned development in the site/plot of land, bearing S.No./Gut No. City Survey No....., Mouje, situated at Road/ Street in accordance with Section 44/58 of The Maharashtra Regional and Town Planning Act, 1966 read with Section 253 of the BPMC Act, 1949.

I forward herewith the following plans and statements (Item 1 to 6) wherever applicable, in quadruplicate, signed by me (Name in block letters) and the Architect / Licensed Engineer / Structural Engineer / Supervisor (License No.....), who has prepared the plans, designs and a copy of other statements /documents as applicable (Items 7 to 10).

- (1) Key Plan (Location Plan);(to be shown on first copy of the set of plans)
- (2) Site Plan showing the surrounding land and existing access to the land included in the layout;(to be shown on first copy of the set of plans)
- (3) A layout plan showing,
 - (i) sub-divisions of the land or plot with dimensions and area of each of the proposed sub-divisions and its use according to prescribed regulations;
 - (ii) width of the proposed streets; and
 - (iii) dimensions and area of recreational open spaces provided in the layout.
 - (iv) dimensions and area of amenity space provided in the layout.
- (4) An extract of record of rights property register card (any other document showing ownership of land to be specified) alongwith consent of co-owners where third party interest is created.
- (5) Particulars of development in Form enclosed.
- (6) Attested copy of Receipt for payment of scrutiny fees.
- (7) No Objection Certificate, wherever required.

I request that the proposed layout may please be approved and permission accorded to me to execute the work.

**FORM GIVING PARTICULARS OF DEVELOPMENT
(PART OF APPENDIX 1.....ITEM 5)**

1.	(a) (i) Full Name of Applicant	
	(ii) Address of applicant	
	(iii) e-mail ID	
	(iv) Mobile No.	
	(b) (i) Name and address of Architect/ Engineer employed.	licensed
	(ii) No. and date of issue of License	
2.	(a) Is the plot of, a City Triangulation Survey Number, Revenue Survey Number or Hissa Number of a Survey Number or a Final Plot Number of a Town Planning Scheme?	
	(b) Whether the land is situated in Core Area or Outside Core Area?	
3.	(a) What is the total area of the plot according to the ownership document and measurement plan?	
	(b) Does it tally with the Revenue/CTS Record	
	(c) What is the actual area available on site measured by Architect/ licensed Engineer/ Structural Engineer / Supervisor? (The permission shall be based on the area whichever is minimum.)	
	(d) Is there any deduction in the original area of the plot on account of D.P. roads, or reservation(s). If so, are they correctly marked on the site plan? Please state the total area of such deductions?	
	(e) Is there any water stream in the land? State the area of such land and state whether it is excluded?	
	(e) What is the area remained for development after above deduction(s)?	
	(f) What is the area proposed for recreational open space? (in case of land having original holding more than 0.4 hecter) Please mention the area.	
	(g) Whether amenity space as required under Regulation no.13.4 is left? Please mention the area.	
	(f) What is the net plot area as per Regulation no.13.9? (excluding (g) above)	
	5.	Are all plans as required under Regulation no.6.2 enclosed?
6.	(a) In what zone does the plot fall?	
	(b) For what purpose the layout is proposed? Is it permissible according to the land use classification?	
7.	(a) Is road available as an approach to the land? What is the average existing width of the road? (If the plot abuts on two or more roads, the above information in respect of all roads should be given)	
	(b) Is the land fronting on D.P. road? If so, width of the D.P. road	
	(c) Is the land fronting on National or State highway? If so, is the Building line / control line maintained? Please state the distance.	
8.	Is the land subject to restrictions of blue / red flood line,	

Handwritten signature

	airport, railway, electric line, land fill sites, archeology, etc? Please state the details along with 'No objection certificate' if any.	
9.	Whether the internal roads proposed in the layout conform to the Regulation no.12.	
10	Whether roads in the layout are co-ordinated with the roads in the surrounding layout?	
11	Whether the area and dimensions of plots are proposed as per prescribed regulations?	
11.	Whether area for inclusive housing is required as per Regulation no. 13.7? Please state the details.	

I hereby declare that I am the Architect/ licensed Engineer employed for the proposed work and that the statements made in this form are true and correct to the best of my knowledge.

APPENDIX 'C'

**QUALIFICATION, COMPETENCE, DUTIES AND RESPONSIBILITIES ETC. OF LICENSED
TECHNICAL PERSONNEL OR ARCHITECT FOR PREPARATION OF SCHEMES FOR
DEVELOPMENT PERMISSION AND SUPERVISION**

C-1	General
C-1.1	The qualifications of the technical personnel and their competence to carry out different jobs for building permit and supervision for the purpose of licensing by the Authority shall be as given in Regulation no. C-2 to C-6. The procedures for licensing the technical personnel is given in Regulation no.C-6.
C-2	ARCHITECT
C-2.1	Qualifications- The minimum qualifications for an architect shall be the qualifications as provided for in the Architects Act, 1972 for registration with the Council of Architecture. Such registered Architects shall not be required to again register their names with the Corporation. However, he shall submit the registration certificate to the Corporation.
*C-2.2	Competence of Architect: To carry out work related to development permission as given below and shall be entitled to submit - (a) All plans and information connected with development permission. (b) Structural details and calculations for building on plot upto 500 sq. m. and upto 3 storeys or 11 m. height and (c) Certificate of supervision and completion for all buildings.
C-3	A)ENGINEER
C-3.1	Qualifications- 1) The qualifications for Licensing Engineer will be the corporate membership (Civil) of the Institution of Engineers or such Degree or Diploma in Civil or Structural Engineering or equivalent; 2) Diploma in Civil Engineering or equivalent, having experience of 10 years in the field of land and building planning.
*C-3.2	Competence- To carry out work related to development permission as given below and shall be entitled to submit- (a) All plans and related information connected with development permission. (b) Structural details and calculations for building on plot upto 500 sq.m. and upto 3 storeys or 11 mt. height, and (c) Certificate of supervision and completion for all building.
C-4	STRUCTURAL ENGINEER
C-4.1	Qualifications- Qualifications for Licensing of structural engineers shall be as given below, with minimum 3 years experience of structural engineering practice in designing and field work; (a) Graduate in Civil Engineering of recognised Indian or Foreign University and Chartered Engineer or Associated Member in Civil Engineering Division of Institution of Engineers (India)

Beh

	or equivalent Overseas Institution; and (b) Shall have post graduate degree in structural engineering. In the case of doctorate in structural engineering the experience shall not be required.						
* C-4.2	Competence —he shall be entitled to submit the structural details and calculations for all buildings and supervision.						
*C-4.2.1.	Complicated buildings and sophisticated structures, as decided by the Municipal Commissioner, which are not within the horizontal areas and vertical limits under C-2.2 (b), C-3.2 (b), C-5.2 (a) (i)& C-5.2 (b) (i) shall be designed only by Structural Engineer.						
C-5	SUPERVISOR:						
C-5.1	Qualification (a) For Supervisor 1 :- (i) Three years architectural assistantship or intermediate in architecture with two years' experience, or (ii) Diploma in Civil engineering or equivalent qualifications with two years' experience. (iii) Draftsman in Civil Engineering from ITI or equivalent qualifications with Ten years' experience out of which five year shall be under Architect/Engineer. (b) For Supervisor - 2:- (i) Draftsman in Civil Engineering from ITI or equivalent qualifications with five years' experience under Architect / Engineer.						
C-5.2	Competence (a) For Supervisor-1: he shall be entitled to submit - (i) All plans and related information connected with development permission on plot upto 500sq. m.; and (ii) Certificate of supervision of buildings on plot upto 500 sq. m. and completion thereof. (b) For Supervisor-2 : he shall be entitled to submit - (i) All Plans and related information upto 200 sq. m. built up area and (ii) Certificate of supervision for limits at (i) above and completion thereof.						
C-6.	LICENSING-						
* C-6.1	Technical Personnel to be licensed:- The Qualified technical personnel or group as given in regulations; No C-3, C-4, C-5 shall be licensed with the authority and the license shall be valid for three calendar years ending 31 st December after which it shall be renewed annually or every three years.						
* C-6.2	Fees for Licensing- The annual licensing fees shall be as follows:- <table border="1" style="margin-left: 20px;"> <tr> <td>For Engineer and structural Engineer</td> <td>1000 p.a.</td> </tr> <tr> <td>For supervisor (1)</td> <td>500 p. a.</td> </tr> <tr> <td>For supervisor (2)</td> <td>300 p. a.</td> </tr> </table>	For Engineer and structural Engineer	1000 p.a.	For supervisor (1)	500 p. a.	For supervisor (2)	300 p. a.
For Engineer and structural Engineer	1000 p.a.						
For supervisor (1)	500 p. a.						
For supervisor (2)	300 p. a.						
	The Municipal Commissioner may revise above fees from time to time, if necessary.						

Reeb

*** C-6.3 Duties and Responsibilities of Architects / Licensed Technical Personnel:**

The duties and responsibilities of architects / licensed technical personnel shall be as follows:-

(1) It will be incumbent on every architect / licensed technical personnel, in all matters in which he may be professionally consulted or engaged, to assist and co-operate with the Municipal Commissioner and other Officers in carrying out and enforcing the provisions of Maharashtra Regional & Town Planning Act, 1966 and of any regulations for the time being in force under the same.

(2) Every architect / licensed technical personnel shall be responsible for due compliance with the provisions of Maharashtra Regional & Town Planning Act, 1966 and the BPMP Act, 1949 and of any regulations for the time being in force under the said Act. It shall be obligatory on him to satisfy himself that a qualified and competent Maistry or Inspector of Works is constantly employed and present on the work to supervise the execution of all work and to prevent the use of any defective material therein and the improper execution of any such work.

(3) Every architect / licensed technical personnel shall be responsible for carrying out work according to sanctioned plan.

(4) Every architect / licensed technical personnel shall be responsible for correctness of the calculations and dimensions mentioned on the plan and shall be liable for consequences arising thereof.

(5) Architect / licensed technical personnel shall not involve himself in any unauthorised development. He shall also make aware the client about legal provisions in respect of proposed development and consequences thereof.

(6) When an architect / licensed technical personnel cease to be in the employment for the development work, he shall report the fact forthwith to the Municipal Commissioner.

APPENDIX 'J'
FIRE PROTECTION REQUIREMENTS

- 1** All buildings shall be planned, designed and constructed to ensure fire safety and this shall be done in accordance with Part IV of Fire Protection of National Building Code of India and Maharashtra Fire Prevention and Life Safety Measures Act, 2006. as amended from time to time, and Part IV of Fire Protection of National Building Code of India (for the provisions which are not covered in these regulations.) In case of building identified in Regulation No.6.2.2.g, the building schemes shall also be cleared by the Fire Officer, Fire Brigade Department of the Corporation.

1.1 Construction materials

All materials of constructions in load bearing elements, stairways and corridors and facades shall be non-combustible.

The interior finish materials shall not have a flame spread ability rating exceeding Class I (see 3.4.15.2 of Part 4 of National Building Code)

The internal walls or staircase shall be of brick or reinforced concrete with a minimum of 2 h. fire rating.

The staircase shall be ventilated to the atmosphere at each landing and a vent at the top; the vent openings shall be of 0.5sq.m in the external wall and the top. If the staircase cannot be ventilated, because of location or other reasons, a positive pressure 50 Pa shall be maintained inside. The mechanism for pressurizing the staircase shall operate automatically with the fire alarm. The roof of the shaft shall be 1 m. above the surrounding roof. Glazing or glass bricks, if used in staircase, shall have fire resistance rating of minimum 2 h.

1.2 Lifts

General requirements of lifts shall be as follows:

- a) Walls of lift enclosures shall have a fire rating of 2 h; lifts shall have a vent at the top of area not less than 0.2 sq.m.
- b) Lift motor room shall be located preferably on top of the shaft and separated from the shaft by the floor of the room.
- c) Landing doors in lift enclosures shall have a fire resistance of not less than 1 h.
- d) The number of lifts in one row for a lift bank shall not exceed 4 and the total number of lifts in the bank (of two rows) shall not exceed 8. A wall of 2 h. fire rating shall separate individual shafts in a bank.
- e) Lift car door shall have a fire resistance rating of half an hour.
- f) Collapsible gates shall not be permitted for lifts and shall have solid doors with fire resistance of at least 1 h.
- g) If the lift shaft and lobby is in the core of the building, a positive pressure between 25 and 30 Pa shall be maintained in the lobby and a positive pressure of 50 Pa shall be maintained in the lift shaft. The mechanism for pressurization shall act automatically with the fire alarm; it shall be possible to operate this mechanically also.
- h) Exit from the lift lobby, if located in the core of the building, shall be through a self closing smoke stop door of half an hour fire resistance.
- i) Lifts shall not normally communicate with the basement; if, however, lifts are in communication, the lift lobby of the basements shall be pressurized as in (g), with self-closing door as in (h)
- j) Grounding switch(es), at ground floor level, shall be provided on all the lifts to enable the fire service to ground the lifts.

Beh

- k) Telephone or other communication facilities shall be provided in lift cars for building of 30 m. in height and above. Communication system for lifts shall be connected to fire control room for the building.
- l) Suitable arrangements such as providing slope in the floor of lift lobby, shall be made to prevent water used during fire-fighting, etc., at any landing from entering the lift shafts.
- m) A sign shall be posted and maintained on every floor at or near the lift indicating that in case of fire, occupants shall use the stairs unless instructed otherwise. The sign shall also contain a plan for each floor showing the locations of the stairways. Alternate source of power supply shall be provided for all the lifts through a manually operated changeover switch.
- n) **Fire Lifts** -Following details shall apply for a fire lift :
- i) To enable fire services personnel to reach the upper floors with the minimum delay, one fire lift per 1200 sq.m. of floor area shall be provided and shall be available for the exclusive use of the firemen in an emergency.
 - ii) The lift shall have a floor area of not less than 1.4 sq.m. It shall have loading capacity of not less than 545 kg (8 persons lift) with automatic closing doors of minimum 0.8 m. width.
 - iii) The electric supply shall be on a separate service from electric supply mains in a building and the cables run in a route safe from fire, that is, within the lift shaft. Lights and fans in the elevators having wooden panelling or sheet steel construction shall be operated on 24 V supply.
 - iv) Fire-fighting lift should be provided with a ceiling hatch for use in case of emergency, so that when the car gets stuck up, it shall be easily openable.
 - v) In case of failure of normal electric supply, it shall automatically trip over to alternate supply. For apartment houses, this changeover of supply could be done through manually operated changeover switch. Alternatively, the lift shall be so wired that in case of power failure, it comes down at the ground level and comes to stand-still with door open.
 - vi) The operation of a fire lift is by a simple toggle or two-button switch situated in a glass-fronted box adjacent to the lift at the entrance level. When the switch is on, landing call-points will become inoperative and the lift will be on car control only or on a priority control device. When the switch is off, the lift will return to normal working. This lift can be used by the occupants in normal times.
 - vii) The words 'Fire Lift' shall be conspicuously displayed in fluorescent paint on the lift landing doors at each floor level.
 - viii) The speed of the fire lift shall be such that it can reach the top floor from ground level within 1 minute.

1.3 Basements -

- i) Each basement shall be separately ventilated. Vents with cross-sectional area (aggregate) not less than 2.5 percent of the floor area spread evenly round the perimeter of the basement shall be provided in the form of grills or breakable stall board lights or pavement lights or by way of shafts. Alternatively, a system of air inlets shall be provided at basement floor level and smoke outlets at basement ceiling level. Inlets and extracts may be terminated at ground level with stall board or pavement lights as before, but ducts to convey fresh air to the basement floor level have to be laid. Stall board and pavement lights should be in positions easily accessible to the fire brigade and clearly marked 'SMOKE OUTLET' or 'AIR INLET' with an indication of area served at or near the opening.
- ii) The staircase of basements shall be of enclosed type having fire resistance of not less than 2 h and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such positions that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storeys of the building and shall communicate with basement through

a lobby provided with fire resisting self-closing doors of 1 h resistance. For travel distance, if the travel distance exceeds as given therein, additional staircases shall be provided at proper places.

iii) In multi-storey basements, intake ducts may serve all basement levels, but each basement levels and basement compartment shall have separate smoke outlet duct or ducts. Ducts so provided shall have the same fire resistance rating as the compartment itself. Fire rating may be taken as the required smoke extraction time for smoke extraction ducts.

iv) Mechanical extractors for smoke venting system from lower basement levels shall also be provided. The system shall be of such design as to operate on actuation of heat / smoke sensitive detectors or sprinklers, if installed, and shall have a considerably superior performance compared to the standard units. It shall also have an arrangement to start it manually.

v) Mechanical extractors shall have an internal locking arrangement, so that extractors shall continue to operate and supply fans shall stop automatically with the actuation of fire detectors.

vi) Mechanical extractors shall be designed to permit 30 air changes per hour in case of fire or distress call. However, for normal operation, air changes schedule shall be as given in Part 8, Building Services, Section 3, Air-conditioning, Heating and Mechanical Ventilation of National Building Code.

vii) Mechanical extractors shall have an alternative source of supply.

viii) Ventilating ducts shall be integrated with the structure and made out of brick masonry or reinforced cement concrete as far as possible and when this duct crosses the transformer area or electrical switchboard, fire dampers shall be provided.

ix) Use of basements for kitchens working on gas fuel shall not be permitted, unless air conditioned. The basement shall not be permitted below the ward block of a hospital/nursing home unless it is fully sprinkled. Building services such as electrical sub-stations, boiler rooms in basements shall comply with the provisions of the Indian Electricity Act / Rules.

x) If cut-outs are provided from basements to the upper floors or to the atmospheres, all sides cut-out openings in the basements shall be protected by sprinkler head at close spacing so as to form a water curtain in the event of a fire.

xi) Openable windows on external wall shall be fitted with such locks that can be opened by a fireman's axe.

xii) All floors shall be compartmented with area not exceeding 750 sq.m. by a separation wall with 2 h fire rating, for floors with sprinklers the area may be increased by 50 percent. In long building, the fire separation walls shall be at distances not exceeding 40 m. For departmental stores, shopping centres and basements, the area may be reduced to 500 sq.m. for compartmentation. Where this is not possible, the spacing of the sprinklers, care should be taken to prevent spray from one sprinkler impeding the performance of an adjacent sprinkler head.

1.4 Service Ducts/Shafts

a) Service ducts and shafts shall be enclosed by walls of 2 h and doors of 1 h. fire rating. All such ducts/shafts shall be properly sealed and fire stopped at all floor levels.

b) A vent opening at the top of the service shaft shall be provided having between one-fourth and one-half of the area of the shaft.

1.5 Refuse chutes

shall have opening at least 1 m. above roof level for venting purpose and they shall have an enclosure wall of non-combustible material with fire resistance of not less than 2 h. They shall not be located within the staircase enclosure or service shafts, or air-conditioning shafts inspection panel and doors shall be tight fitting with 1 h fire resistance; the chutes should be as far away as possible from exit.

1.6 Refuge Area

Provisions contained in Regulation No shall apply for all buildings -

1.7 Electrical services shall conform to the following :

(a) The electric distribution cables / wiring shall be laid in a separate duct. The duct shall be

Beh

sealed at every floor with non-combustible materials having the same fire resistance as that of the duct. Low and medium voltage wiring running in shaft and in false ceiling shall run in separate conduits;

- (b) Water mains, telephone lines, intercom lines, gas pipes or any other service line shall not be laid in the duct for electrical cables; use of bus ducts / solid rising mains instead of cables is preferred;
- (c) Separate circuits for fire-fighting pumps, lifts, staircases and corridor lighting and blowers for pressurizing system shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes, so that fire in one circuit will not affect the others. Such circuits shall be protected at origin by an automatic circuit breaker with its no-volt coil removed. Master switches controlling essential service circuits shall be clearly labelled;
- (d) The inspection panel doors and any other opening in the shaft shall be provided with air-tight fire doors having fire resistance of not less than 2 h;
- (e) Medium and low voltage wiring running in shafts and within false ceiling shall run in metal conduit. Any 230 V wiring for lighting or other services above false ceiling shall have 660 V grade insulation. The false ceiling including all fixtures used for its suspension, shall be of non-combustible material and shall provide adequate fire resistance to the ceiling in order to prevent spread of fire across ceiling. Reference may be made to good practice;
- (f) An independent and well ventilated service room shall be provided on the ground level or first basement with direct access from outside or from the corridor for the purpose of termination of electric supply from the licensees' service and alternative supply cables. The doors provided for the service room shall have fire resistance of not less than 2 h.

Note : If service room is located at the first basement, it should have automatic fire extinguishing system.

- (g) If the licensees agree to provide meters on upper floors, the licensees' cable shall be segregated from consumers' cable by providing a partition in the duct. Meter rooms on upper floors shall not open into staircase enclosures and shall be ventilated directly to open air outside; and
- (h) Suitable circuit breakers shall be provided at the appropriate points.

1.8 Gas supply shall conform to the following:-

- a) Town Gas / L.P. Gas Supply Pipes – Where gas pipes are run in buildings, the same shall be run in separate shafts exclusively for this purpose and these shall be on external walls, away from the staircases. There shall be no interconnection of this shaft with the rest of the floors. LPG distribution pipes shall always be below the false ceiling. The length of these pipes shall be as short as possible. In the case of kitchen cooking range area, apart from providing hood, covering the entire cooking range, the exhaust system should be designed to take care of 30 cu.m. per minute per sq.m. of hood protected area. It should have grease filters using metallic grill to trap oil vapours escaping into the fume hood.

Note:- For detailed information on gas pipe installations, reference may be made to Para.9 'Plumbing Services, Section 3 Gas Supply', of National Building Code of India.

- b) All wiring in fume hoods shall be of fibre glass insulation. Thermal detectors shall be installed into fume hoods of large kitchens for hotels, hospitals and similar areas located in high rise buildings. Arrangements shall be made for automatic tripping of the exhaust fan in case of fire. If LPG is used, the same shall be shut off. The voltage shall be of 24 V or 100 V dc operated with the external rectifier. The valve shall be of the hand re-set type and shall be located in an area segregated from cooking ranges. Valves shall be easily accessible. The hood shall have

Bele

manual facility for steam or carbon dioxide gas injection, depending on duty condition; and

c) Gas meters shall be housed in a suitably constructed metal cupboard located in a well ventilated space, keeping in view the fact that LPG is heavier than air and town gas is lighter than air.

1.9 Illumination of means of exit

Staircase and corridor lights shall conform to the following:

- a) The staircase and corridor lighting shall be on separate circuits and shall be independently connected so as it could be operated by one switch installation on the ground floor easily accessible to fire-fighting staff at any time irrespective of the position of the individual control of the light points, if any. It should be of miniature circuit breaker type of switch so as to avoid replacement of fuse in case of crisis;
- b) Staircase and corridor lighting shall also be connected to alternative supply. The alternative source of supply may be provided by battery continuously trickle charged from the electric mains;
- c) Suitable arrangements shall be made by installing double throw switches to ensure that the lighting installed in the staircase and the corridor does not get connected to two sources of supply simultaneously. Double throw switch shall be installed in the service room for terminating the stand-by supply.
- d) Emergency lights shall be provided in the staircase and corridor; and
- e) All wires and other accessories used for emergency light shall have fire retardant property.

1.10 A stand-by electric generator shall be installed to supply power to staircase and corridor lighting circuits, fire lifts, the stand-by fire pump, pressurisation fans and blowers, smoke extraction and damper systems in case of failure of normal electric supply. The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously. If the stand-by pump is driven by diesel engine, the generator supply need not be connected to the stand-by pump. Where parallel HV / LV supply from a separate sub-station is provided with appropriate transformer for emergency, the provision of generator may be waived in consultation with the Authority.

1.11 Transformers shall conform to the following:-

- a) A sub-station or a switch-station with oil filled equipment shall not be located in the building. The sub-station structure shall have separate fire resisting walls/surroundings and shall necessarily be located at the periphery of the floor having separate access from fire escape staircase. The outside walls, ceiling, floor, openings including doors and windows to the sub-station area shall be provided with a fire resisting door of 2 h fire rating. Direct access to the transformer room shall be provided, preferably from outside fire escape staircase.
- b) The sub-station area needs to be maintained at negative air pressures and area in sub-station shall not be used as storage / dump areas.
- c) When housed inside the building, the transformer shall be of dry type and shall be cut off from the other portion of premises by walls/ doors / cut-outs having fire resistance rating of 4 h.

1.12 Air-conditioning shall conform to the following:

- a) Escape routes like staircases, common corridors, lift lobbies, etc. shall not be used as return air passage.
- b) The ducting shall be constructed of substantial gauge metal in accordance with good practice.
- c) Wherever the ducts pass through fire walls or floors, the opening around the ducts shall be sealed with materials having fire resistance rating of the compartment.
- d) Where duct crosses a compartment which is fire rated, the ducts shall be fire rated for same fire rating. Further depending on services passing around the duct work, which may get affected in case of fire temperature rising, the ducts shall be insulated.
- e) As far as possible, metallic ducts shall be used even for the return air instead of space above

Beh

the false ceiling.

- f) Where plenum is used for return air passage, ceiling and its fixtures shall be of non-combustible material.
 - g) The materials used for insulating the duct system (inside or outside) shall be of non-combustible material, glass wool shall not be wrapped or secured by any material of combustible nature.
 - h) Area more than 750 sq.m. on individual floor shall be segregated by a fire wall and automatic fire dampers for isolation shall be provided.
 - i) Air ducts serving main floor areas, corridors, etc. shall not pass through the staircase enclosure.
 - j) The air-handling units shall be separate for each floor and air ducts for every floor shall be separated and in no way inter-connected with the ducting of any other floor.
 - k) If the air-handling unit serves more than one floor, the recommendations given above shall be compiled with in addition to the conditions given below:
 - i) Proper arrangements by way of automatic fire dampers working on smoke detector / or fusible link for isolating all ducting at every floor from the main riser shall be made.
 - ii) When the automatic fire alarm operates, the respective air-handling units of the air-conditioning system shall automatically be switched off.
 - l) The vertical shaft for treated fresh air shall be of masonry construction.
 - m) The air filters of the air-handling units shall be of non-combustible materials.
 - n) The air-handling unit room shall not be used for storage of any combustible materials.
 - o) Inspection panels shall be provided in the main trunking to facilitate the cleaning of ducts of accumulated dust and to obtain access for maintenance of fire dampers.
 - p) No combustible material shall be fixed nearer than 150 mm to any duct unless such duct is properly enclosed and protected with non-combustible material (glass wool or spyglass with neoprene facing enclosed and wrapped with aluminium sheeting) at least 3.2 mm thick and which would not readily conduct heat.
 - q) **Fire Dampers:-**
 - 1) These shall be located in conditioned air ducts and return air ducts/ passages at the following points:
 - i. At the fire separation wall.
 - ii. Where ducts/passages enter the central vertical shaft.
 - iii. Where the ducts pass through floors.
 - iv. At the inlet of supply air duct and the return air duct of each compartment on every floor.
 - 2) The dampers shall operate automatically and shall simultaneously switch off the air-handling fans. Manual operation facilities shall also be provided. (Note- For blowers, where extraction system and duct accumulators are used, dampers shall be provided).
 - 3) Fire/smoke dampers (for smoke extraction shafts) for buildings more than 24 m. in height.
 - a) For apartment houses in non-ventilated lobbies / corridors operated by fusible link / smoke detectors and with manual control.
 - b) For other buildings on operation of smoke detection system and with manual control.
 - 4) Automatic fire dampers shall be so arranged as to close by gravity in the direction of air movement and to remain tightly closed on operation of a fusible link / smoke detector.
- 1.13 Provisions of boiler and boiler rooms** shall conform to Indian Boiler Act. Further, the following additional aspects may be taken into account in the location of boiler room:
- a) The boilers shall not be allowed in sub-basement, may be allowed in the basements away from

Beh

the escape routes.

- b) The boilers shall be installed in a fire resisting room of 4 h fire resistance rating and this room shall be situated on the periphery of the basement. Catch-pits shall be provided at the low level.
- c) Entry to this room shall be provided with a composite door of 2 h fire resistance.
- d) The boiler room shall be provided with fresh air inlets and smoke exhausts directly to the atmosphere.
- e) The furnace oil tank for the boiler, if located in the adjoining room shall be separated by fire resisting wall of 4 h rating. The entrance to this room shall be provided with double composite doors. A curb of suitable height shall be provided at the entrance in order to prevent the flow of oil into the boiler room in case of tank rupture.
- f) Foam inlets shall be provided on the external walls of the building near the ground level to enable the fire services to use foam in case of fire.

1.14 Provision of first-aid and fire-fighting appliances.

The first-aid fire-fighting equipment shall be provided on all floors, including basements, lift rooms, etc. in accordance with good practice in consultation with the Authority.

1.15 Fire alarm system :

i) All buildings with heights of 15 m. or above shall be equipped with manually operated electrical fire alarm (MOEFA) system automatic fire alarm system in accordance with good practice. However, apartment buildings between 15 m. and 30 m. in height may be exempted from the installation of automatic fire alarm system provided the local fire brigade is suitably equipped for dealing with fire in a building of 15 m. in height or above and in the opinion of the Authority, such building does not constitute a hazard to the safety of the adjacent property or occupants of the building itself.

ii) Manually operated electrical fire alarm system shall be installed in a building with one or more call boxes located at each floor. The call boxes shall conform of good practice.

iii) The installation of call boxes in hostels and such other places where these are likely to be misused shall as far as possible be provided. Location of call boxes in dwelling units shall preferably be inside the building.

1.16 Lightening protection of buildings:-

The lightning protection for buildings shall be provided as given in Para.8 'Building Services, Section 2, Electrical Installations' of National Building Code of India.

1.17 Fire control room:-

For all buildings 15 m. in height or above and apartment buildings with a height of 30 m. and above, there shall be a control room on the entrance floor of the building with communication system (suitable public address system) to all floors and facilities for receiving the message from different floors. Details of all floor plans along with the details of fire-fighting equipment and installations shall be maintained in the fire control room. The fire control room shall also have facilities to detect the fire on any floor through indicator board connections; fire detection and alarm systems on all floors. The fire staff in-charge of the fire control room shall be responsible for the maintenance of the various services and fire-fighting equipment and installations in co-ordination with security, electrical and civil staff of the building.

1.18 Housekeeping:-

To eliminate fire hazards, good housekeeping, both inside and outside the building, shall be strictly maintained by the occupants and / or the owner of the building.

1.19 Fire drills and fire orders:-

Fire notices/orders shall be prepared to fulfil the requirements of fire-fighting and evacuation from the buildings in the event of fire and other emergency. The occupants shall be made thoroughly conversant with their actions in the event of emergency, by displaying fire notices at vantage points and through regular training. Such notices should be displayed prominently in broad lettering.

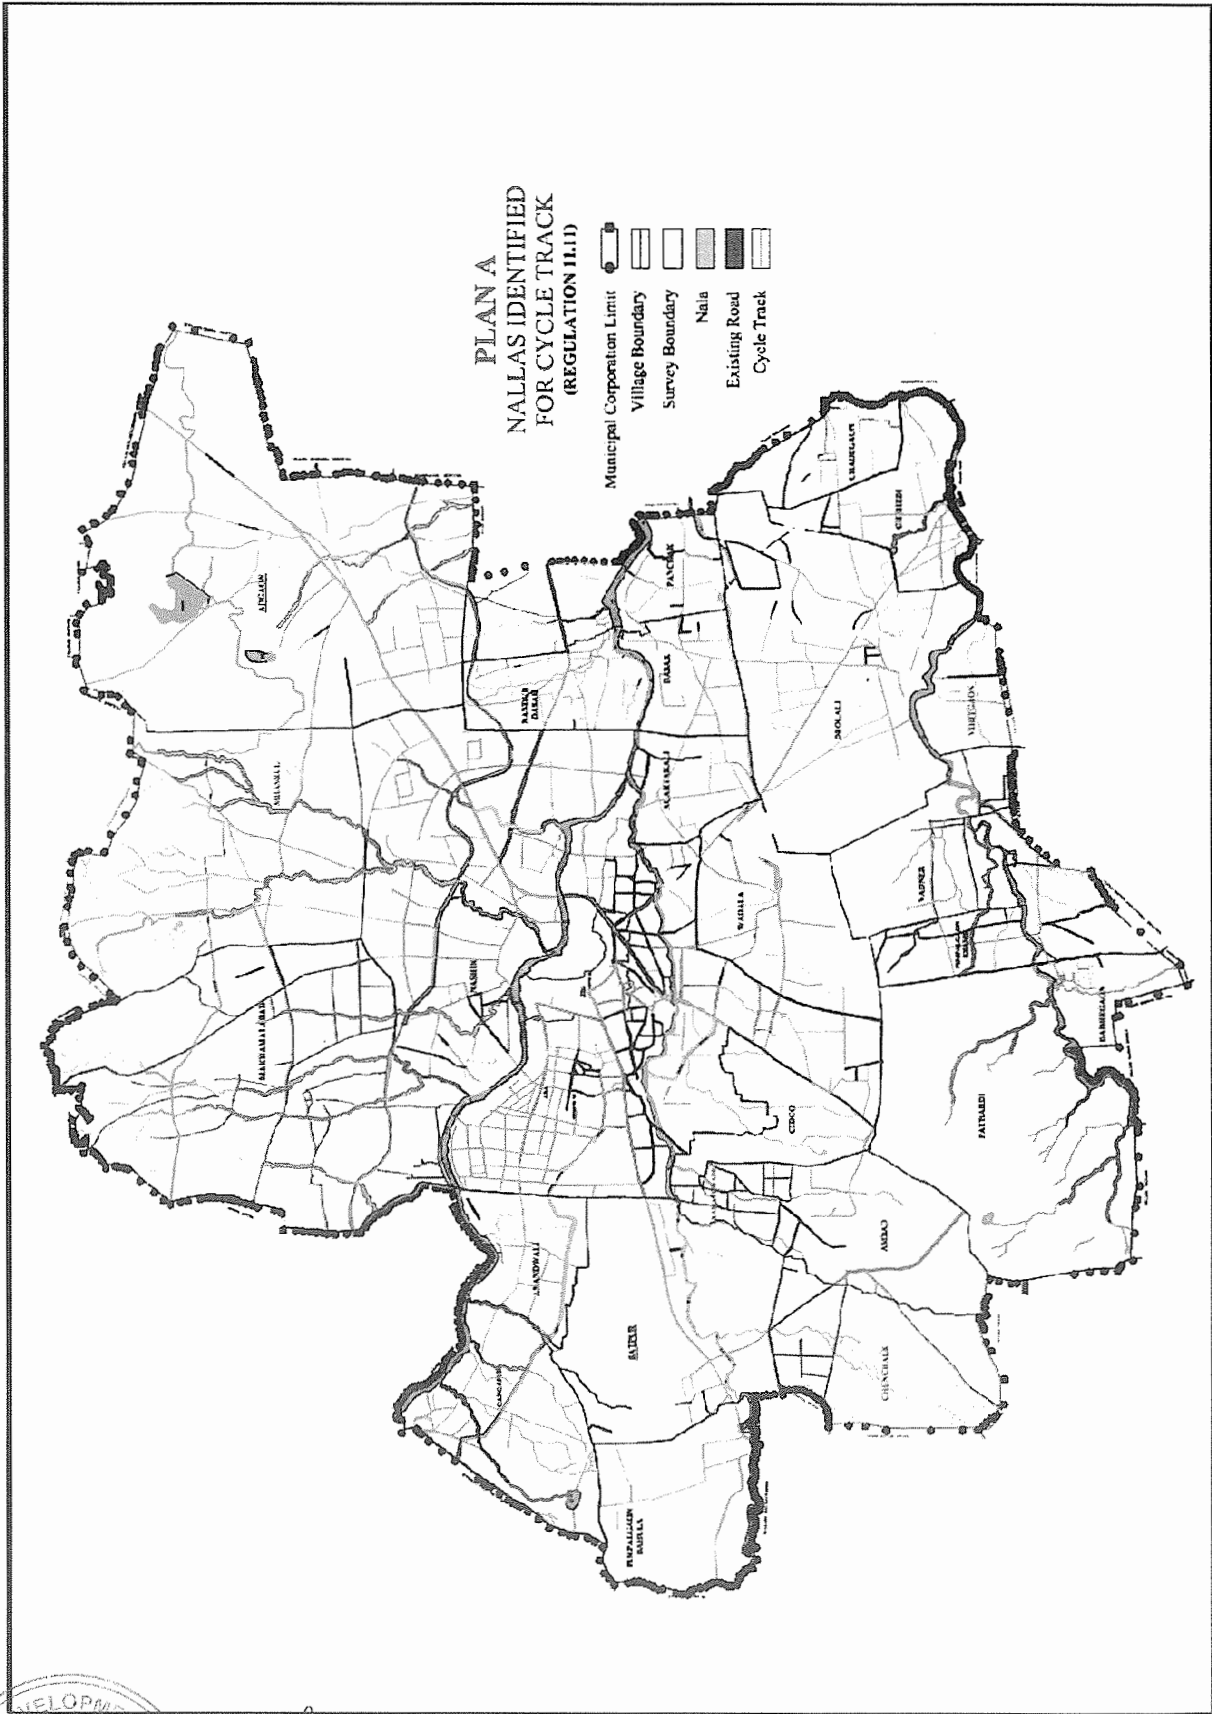

For guidelines for fire drills and evacuation procedures for high-rise buildings, Annexure E of National Building Code of India may be referred.

- 1.20 Compartmentation:-**
The building shall be suitably compartmentalized so that fire/smoke remain confined to the area where fire incident has occurred and does not spread to the remaining part of the building.
- 1.21 Materials for interior decoration / furnishing**
The use of materials, which are combustible in nature and may spread toxic fume / gases should not be used for interior decoration / furnishing, etc.
For various types of occupancies, requirements given in National Building Code, Part IV shall be followed.
- 1.22 Fire Escape Chutes/ Controlled Lowering Device for evacuation :-**
(A) High rise building having height more than 70 m., shall necessarily be provided with ;
(i) fire escape chute shaft/s for every wing adjacent to staircase.
(ii) Walls of the shaft shall have 4 hours fire resistance.
(iii) One side of the shaft shall be at external face of the building with proper ventilation. (iv) The dimension of the shaft shall not be less than 2.5 m X 1.5m.
(v) The access to the fire escape chute's shaft shall be made at alternate floor level from staircase mid-landing with self-closing door having fire resistance of at least one hour.
(vi) The fire chute shall be of staggered type with landing of each section at the vertical height of not more than 21 m.
Alternatively,
(B) For High rise building having height more than 70 m., "Controlled Lowering Device for evacuation" or "External Evacuation System" as approved by Chief Fire Officer of Corporation, shall be provided.
- 1.23** Fire Check Floor A high rise building having height more than 70 m, shall be provided with fire check floor (entire floor) at every 70 m. level. Height of the fire check floor shall not be more than 1.8 m. The fire check floor shall not be used for any purpose and it shall be the responsibility of the owner/occupier to maintain the same clean and free of encumbrances and encroachments at all times. Periphery of the Fire Check floor shall not be enclosed. Fire Drenchers shall be provided at the periphery of the each fire check floor externally.
- 1.24** Municipal Corporation shall charge Fire Infrastructure charges as may be decided by Municipal Commissioner with the approval of the Government, such charges shall be deposited in the separate account under the head of Fire Infrastructure charges and such amount shall only be used for establishment and expansion of Fire Infrastructure facilities.

NOTIFICATION
URBAN DEVELOPMENT DEPARTMENT
 Mantralaya, Mumbai 400 032.
 Date: 9th December, 1999

No. TPS 1894/3327/UD-13

**Maharashtra
 Regional &
 Town
 Planning
 Act 1966**

Whereas the Government of Maharashtra Urban Development Department Notification No. TPS/1890/619/CR-89/90/UD-13 dt. 17th December 1990 has sanctioned the Development Control Rules for Pimpri Chinchwad Municipal Corporation (hereinafter referred to as the "said Development Control Rules") for the areas under the jurisdiction of the Pimpri Chinchwad Municipal Corporation;

And whereas, the Pimpri Chinchwad Municipal Corporation as being the planning Authority resolved under its General Body Resolutions No. 2714 dt. 21st April 1994 to initiate Minor Modification to the said Development Control Rules under section 37 of the Maharashtra Regional and Town Planning Act, 1966 (the Maharashtra Act xxxvii of 1966) (hereinafter referred to as "the said Act.") in respect for Development Control Rules Nos. 2.18, 2.52.1, 6.2.12, 8.A, 12.3A 10.0, 10.1, II.I.A, 10.4.A, 11.3, 11.3.1, 11.3.1.1, 11.3.1.3, 11.6 (ii), 12.2.2, 13.1.3.A, 13.1.3.B, 13.1.4.2, 13.4.1, 13.4.1, C & D 13.4.2.1.C, 13.4.2, Table No. 6 M-1.1 (Appendix M), M-2.1 (a) M-2.2.1, Table No. 25, Table No. 27 (i) & Table No. 27(ii); M-7 i, M-8, N-2.2.6, N-2.1.2, N-2.1.3, N-2.3, Appendix-R with suitable and relevant modifications in the said development control rule numbers as listed from Sr.No. 1 to 35 in the notice and followed all legal formalities under Section 37 of the said act and thereafter submitted a proposal of modification so as to include modified rules in lieu of Development Control Rules in the said Development Control rules listed above (hereinafter referred to as "the said Modification") to the Government of sanction vide letter No. NRV/KMV/99/94, dt. 18/12/1994.

And whereas, the Government of Maharashtra after making inquiries and after consulting the Director of Town Planning, Maharashtra State, Pune is satisfied that the said proposal of modifications is necessary and shall be sanctioned and made applicable with immediate effect.

Now, therefore, in exercise of the powers conferred under Sub-Section 2 of Section 37 of the said Act, the Government of Maharashtra hereby sanctions the proposal of modification with some changes and for that purpose amends the Government in Urban Development Department's Notification No. TPS 1890/619/CR-89/90/UD-13, dated 17/12/1990 as shown in the Schedule attached viz. MODIFIED DEVELOPMENT CONTROL REGULATIONS OF PIMPRI CHINCHWAD MUNICIPAL CORPORATION.

Note: The afore said schedule of modification to the Development Control Rules for Pimpri Chinchwad Municipal Corporation is kept open for inspection of the public during hours in the office of the Pimpri Chinchwad Municipal Corporation, Pimpri.

By order and in the name of Governor of Maharashtra.

PART - I : ADMINISTRATION

1. SHORT TITLE, EXTENT AND COMMENCEMENT

- 1.1** These Development Control Rules shall be called the Development Control Rules for Pimpri Chinchwad Municipal Corporation, Pimpri 1985
- 1.2** For all statutory purposes the English version of standardised building bye-laws shall be considered as authentic.
- 1.2.1** These Development Control rules shall apply to building activity and development work in areas under the jurisdiction of Pimpri Chinchwad Municipal Corporation, Pimpri.
- 1.3** These rules shall supersede all Development Control Rules and bye-laws framed and Sanctioned under the Maharashtra Regional and Town Planning Act, 1966 the Bombay Provincial Municipal Corporation Act 1949. Except the rules applicable to the lands acquired for Pimpri Chinchwad New Town Development Authority.

DOD

2. DEFINITIONS

2.0 General

2.0.1 In these rules, unless the context otherwise requires, the definitions given under 2.1 to 2.90 shall have the meaning indicated against each of them.

2.0.2 Words and expressions not defined in these rules shall have the same meaning or sense as in

- i) The Bombay Provincial Municipal Corporation Act, 1949
- ii) The Maharashtra Regional and Town Planning Act, 1966 and
- iii) Urban Land (C&R) Act, 1976

2.1 Accessory Building - A building separated from the main building on a plot and containing one or more accessory uses.

2.2 Accessory Use - Any use of the premises subordinate to the principal use and customarily incidental to the principal use.

2.3 Act - shall mean :

- i) The Bombay Provincial Municipal Corporation Act, 1949
- ii) The Maharashtra Regional and Town Planning Act, 1966 and
- iii) Urban Land (C&R) Act, 1976

2.4 Advertising Sign - Any surface of structure with characters, letters or illustration applied there to and displayed in any manner whatsoever out of doors for purposes of advertising or to give information regarding or to attract the public to any place person, public performance, article or merchandise whatsoever, and which surface or structure is attached to, forms part of or is connected with any building or is fixed to a tree or to the ground or any pole, screen, fence or hoarding or displayed in space.

2.5 Air-Conditioning - The process of treating air so as to control a simultaneously its temperature, humidity cleanliness and distribution to meet the requirement of conditioned space.

2.6 Alteration - Alteration as referred to in Section 43 (i) of the Maharashtra Region and Town Planning Act shall not include a change from one occupancy to another or a structural change, including construction of outlaying into or removal of any wall, partition or a change in or closing of any means of ingress or egress, all such operations not being exempt from the requirement of permission.

2.7 Automatic Sprinkler System - An arrangement of piping and sprinklers, designed to operate automatically by the heat of fire and to discharge water upon that and which may also simultaneously give automatic audible alarm.

2.8 Balcony - A horizontal projection including a handrail or balustrade to serve as passage or sitting out place.

2.9 Basement or Cellar - Storey a building below or partly below ground level.

2.10 Building - The word building shall have the same meaning assigned thereto as under the B. P. M. C. Act, 1949.

- 2.11 Built-up-Area** - Ground area covered immediately above the plinth level by the building or external area of any upper floor whichever is more except the areas covered by Rule No. 13.4.2
- 2.12 Building Height of** - The vertical distance measured in the case of flat roofs, from the average level of the ground and contiguous to the building to the highest point of the building and in the case of pitched roofs up to the mid point between the eaves level and ridge. Architectural features serving no other function except that of decoration and height of stilt floor shall be excluded for the purpose of ascertaining height.
- 2.13 Building Line** - The line upto which the plinth of a building adjoining a street or an extension of a street or future street may lawfully extend; it includes one lines prescribed, if any, scheme and/or development plan.
- 2.14 Cabin** - A non-residential enclosure constructed of non-load bearing non masonry partitions.
- 2.15 Carpet Area**- The net floor area within an apartment excluding the area of walls.
- 2.16 Chajja** - A sloping or horizontal structural overhang usually provided over openings on external walls to provide protection from sun and rain.
- 2.17 Chimney** - The construction by means of which a flue is formed for the purpose of carrying the products of combustion to the open air, chimney includes chimney stack and the flue pipe.
- 2.18 Combustible Material** - Means that material which when burnt adds heat to a fire when tested for combustibility in accordance with the IS : 3808-1966 method of test for combustibility of Building Materials : National Building Code.
- 2.18-A** Congested area relates to the existing congested as shown bounded on the plan with 'Black Verge' and existing gothans of villages included in the Corporation limits.
- 2.19 Courtyard or Chowk** - A space permanently open to the sky, enclosed fully or partially by building and may be at ground level or any other level, within or adjacent to a building
- 2.19.1 Chowk, Inner**- A chowk enclosed on all sides.
- 2.19.2 Chowk, Outer**- A chowk where one of the sides is not enclosed.
- 2.20 Detached Building** - A building whose walls and roofs are independent of any other building with open space on all sides as specified.
- 2.21 Development** - 'Development' with its grammatical variations means the carrying out of building engineering mining or other operations, in or over, or under land or water or the making of any material change, in any building or land, or in the use of any building or land, and includes redevelopment and layout and sub-division of any land and 'to develop' shall be constructed accordingly.
- 2.22** The word drain shall have the same meaning as per the B. P. M. C. Act, 1949
- 2.23 Drainage** - The removal of any liquid by a system constructed for the purpose

- 2.24 Enclosed Staircase** - A staircase separated by fire resistant walls and door(s) from the rest of the building.
- 2.25 Exit**-A passage, channel or a means of egress from any building, storey or floor area to a street or other open space of safety.
- 2.26 Existing Building or Use** - A building, structure or its use existing authorisably before the commencement of these rules.
- 2.27.1 Vertical Exit** - A vertical exit is a means of exit used for ascension or descension between two or more levels including stairways, smoke proof towers, ramps escalator and fire escapes.
- 2.27.2 Horizontal Exit** - A horizontal exit is protected opening through or around a fire wall or a bridge connecting two buildings.
- 2.27.3 Outside Exit**-An outside exit is an exit from the building to a public way, to an open area leading to public way or to an enclosed fire resistive passage leading to a public way.
- 2.28 External Wall**-An outerwall of a building not being a party wall even though adjoining to a wall of another building and also means a wall abutting on an interior open space of any building.
- 2.29 Fire and/or Emergency Alarm System** - An arrangement of call points or detectors, sounders and other equipment's for the transmission and indication of alarm signals, for testing of circuits and wherever required for the operation of auxiliary services. This device may be workable automatically or manually to alert the occupants in the event of fire or other emergency.
- 2.30 Fire Lifts** - One of the lifts specially designed for use by the fire service personnel in the event of fire.
- 2.31 Fire Proof Door** - A door or shutter fitted to a wall opening and constructed and erected with the requirements to check the transmission of heat and fire for specified period.
- 2.32 Fire Resistance** - The time during which it fulfills its function of contributing to the fire safety of a building when subjected to prescribed conditions of heat and load or restraint. The fire resistance test of structures shall be done in accordance with IS : 3809-1966 Fire Resistance Test of Structures.
- 2.33 Fire Separation** - The distance in meters measured from any other building on the site or from the other site or from the opposite side of the street or other public space to the building.
- 2.34 Fire Service Inlets** - A connection provided at the base of a building for pumping up water through in built fire fighting arrangements by fire services pumps in accordance with recommendations of the Fire Service Authority.

- 2.35 Fire Tower** - An enclosed staircase which can only be approached from the various floor through landings or lobbies separated from both the floor areas and the staircase by fire-resisting doors, and open to the outer air.
- 2.35-A Floor Area**- Floor area shall mean covered area of a building at any floor level.
- 2.35-B Fitness Center** - Fitness center in a building means and includes the built up premises including toilet facilities provided in the building including gymnasium for the benefit of its inmates and for the purpose of fitness, physical exercises, yoga and such other activities as may be permitted by the Corporation from time to time.
- 2.36 Floor Area Ratio (F. A. R.)** - The quotient obtained by dividing the total covered area (Plinth area) on all floors excluding exempted areas as given in Rule No.13.4.2 by the area of the plot.
- $$\text{FAR} = \frac{\text{Total Covered Area On All Floors}}{\text{Plot Area}}$$
- Note : The terms, F. A. R. is synonymous with Floor space Index (F. S. I.)**
- 2.37 Footing** - A foundation unit constructed in brick work, masonry or concrete under the base of a wall or column for the purpose of distributing the load over a large area.
- 2.38 Foundation** - That part of the structure, which is in direct contact with a transmitting loads to the ground.
- 2.39 Front** - The space between the boundary line of plot abutting the means of accesses/road/street and the building line. In case of plots facing towards or more means of accesses/roads/streets, the plot shall be deemed to front on all such means of accesses/roads/streets.
- 2.40 Gallery** - An intermediate floor or platform projecting from a wall of an auditorium or a hall providing extra floor area, additional seating accommodation etc. These shall also include the structures provided for seating in stadia.
- 2.41 A Gaothan** - Relates to the tenure of the land and means an area free of assessment and entered as gaothan land in the Property Register Card. It shall not include Exinam or Khalsa or Sarkari or any other tenure lands.
- 2.42 Garage, Private** - A building or portion thereof designed and used for parking or private owned motor driven or other vehicles.
- 2.43 Garage, Public** - A building or portion thereof other than a private garage operated for gain designed or used for repairing, servicing hiring selling or storing or parking motor driven or other vehicles.
- 2.44 Habitable Room (or Living Room)** - 'Habitable Room or Living Room' means a room constructed or intended for human habitation.
- 2.45 Holding Contiguous** - A contiguous piece of land in one ownership irrespective of separate property register cards.

- 2.46 Home Occupation** - Occupation other than that of operating an eating or drinking place offering services to the general public, carried on by a member of the family residing on the premises and in accordance with which there is no display that will indicate from the exterior that the building is being utilized in whole or in part for any purpose other than as a residential (dwelling) use and in connection with which no article or service is sold or held up for sale except that produced, which is non-hazardous and not affecting the safety of the inhabitants and neighborhood by a member of the family residing on the premises and no mechanical equipment is used except as is customary for purely domestic or household purposes and/ or employing licensable goods.
- 2.47 Ledge or Tand** - A shelf-like projection, supported in any manner whatsoever except by vertical supports within a room itself but not projecting wider than half meter.
- 2.48 Licensed Architect / Engineer / Structural Engineer** - A qualified architect engineer, structural engineer, who has been licensed by the Authority or who is entitled to practice as an Architect under the Architects Registration Act 1972.
- 2.49 Lift** - An appliance designed to transport persons or materials between two or more levels in a vertical or substantially vertical direction by means of a guided car platform.
- 2.50 Loft** - An intermediate floor between two floors or a residual space in a pitched roof above normal floor level, which is constructed and adopted for storage purpose.
- 2.51 Mezzanine Floor** - An intermediate floor between two floor levels above ground level.
- 2.52 Non-Combustible** - A material which does not burn nor add heat to a fire when tested for combustibility in accordance with IS: 3808-1966 Method of Test for Combustibility of Building Materials.
- 2.53 Occupancy or Use Group** - The principal occupancy for which a building or a part of a building is used or intended to be used; for the purpose of classification of a building according to the occupancy, an occupancy shall be deemed to include subsidiary occupancies which are contingent upon it. Buildings with mixed occupancies are those buildings in which more than one occupancy is present in different portions of the buildings.
The occupancy classification shall have the meaning given from 2.53.1 to 2.56.9 unless otherwise spelt out in the Development Plan.
- 2.53.1 Residential Buildings** - Means a building in which sleeping accommodation is provided for normal residential purpose with or without cooking or dining facilities and includes one or more family dwelling, lodging or rooming houses, hostels, dormitories apartment houses and flats and private garage of such building.
- 2.53.2 Education Buildings** - These shall include any building used for school, college or day-care purpose for more than 8 hours per week involving assembly for instructions, education or recreation incidental to education.

- 2.53.3 Institutional Building** - These shall include any building or part thereof which is used for purpose such as medical or other treatment or care of persons infirmity care of infants, convalescents or aged persons and for penal or correctional detention in which the liberty of the inmates is restricted. Institutional buildings ordinarily provide sleeping accommodation for the occupants. They include hospitals, sanatoria, custodial institutions and penal institutions like jails prisons, mental hospitals, reformatories etc.
- 2.53.4 Assembly Building** - These shall include any building or part of a building where groups of people congregate or gather for amusement, recreation, social religious, patriotic, civil, travel and similar purposes; for example theaters, motion picture houses, drive-in-theatres, assembly hall, city halls, town halls, auditorium, exhibition, museums, mangal karyalaya, skating rinks, gymnasiums, restaurants, eating houses, boarding houses, places of worship, dance halls, club room, gymkhana, passenger stations and terminals or air, surface and other public transportation services, recreation piers and stadia etc;
- 2.53.5 Business Buildings** - These shall include any building or part of a building, which is used for transaction of business for the keeping of accounts and records for similar purposes; offices, banks, professional, establishments, court houses, record and references libraries shall be classified in this group in so far as principal function of these is transaction of public business and the keeping of books and records.
- 2.53.5.1 Office Buildings (Premises)** - The premises whose sole or principal use is to be used as an office, or for office purpose; 'office purpose' includes the purpose of administration, clerical work, handling money, telephone and telegraph operating computers and 'clerical work', includes writing, book keeping, sorting papers, typing filling, duplicating, punching cards or tapes, machine calculating drawing of matter for publication and the editorial preparations of matter for publication.
- 2.53.6 Mercantile Buildings** - These shall include any building or part of a building which is used as shops, stores, market, for display and sale of merchandise either wholesale or retail, office, storage and service facilities incidental to the sale of merchandise and located in the same building shall be included under this group.
- 2.53.6.1 Whole Sale Establishment** - These shall include establishments wholly or partly engaged in whole sale trade, manufacturer's whole sale outlets including related storage facilities, warehouses and establishments engaged in truck transport/including Truck Transport booking agencies.
- 2.53.7 Industrial Building** - These shall include any building or part of a building or structure, in which products or materials of all kinds and properties are fabricated, assembled or processed like assembly plants, laboratories, power plants, smoke houses, refineries, gas plants, mills dairies, factories etc.
- 2.53.8 Storage Building** - These shall include any building or part of a building used primarily for the storage or sheltering of goods, wares of merchandise, like ware houses, cold storage's, freight depots, transit sheds, store houses, public garages, hangers, truck terminals, grain elevators, barns and stables.

- 2.53.9 Hazardous Building** - These shall include any building or part of building which is used for the storage, handling, manufacture or processing of highly combustible or explosive materials or products which involve a highly corrosive, toxic or non toxicious alkalies, acids or other liquids of chemicals producing flame, fumes and explosion mixtures or dust or which result in the division of matter into the fine particles subject to spontaneous ignition.
- 2.53.10 Public Building** - Except where otherwise defined means a building owned and used by Government or Semi-Government Authority, Public Registered Trust or such other public agency, for public agency, public purposes such as public worship education, health and public offices of Government or Semi-Government Authorities.
- 2.54 Owner** - The owner shall have the meaning as assigned thereto in the Act.
- 2.55 Parapet** - A low wall or railing built along the edge of a roof or a floor.
- 2.56 Parking Space** - An area enclosed or unenclosed, covered or open, sufficient in size to park vehicles, together with a driveway connecting the parking space with a street or alley and permitting ingress and egress of the vehicles.
- 2.57 Partition** - An interior non-load-bearing medium, one Storey or part Storey in height.
- 2.58 Party Wall- It Includes :**
- a) a wall forming part of a building and being used or constructed to be used in any part of the height or length of such wall for separation of adjoining building belonging to different owners or occupied or constructed or adopted to be occupied by different persons; or
 - b) a wall forming part of a building and standing in any part of the length of such wall to a greater extent than the projection of the footing on one side on ground of different owners.
- 2.59 Permanent Open Air Space** - Air space is deemed to be permanently open if:
- a) it is a street or any other area not encroached upon by any structure of any kind; and
 - b) its a freedom from encroachment in future by a structure of any kind is assure either by law or by contract or by the fact the ground below it is a street or is permanently and irrevocably appropriated as an open space:
- 2.60 Plinth** - The portion of a structure between the surface of the surrounding ground and surface of the floor, immediately above the ground, as specified in the rule no. 15.1 to 15.9.4
- 2.61 Plinth Area** - The maximum built up covered area measured externally at the floor level or the basement or of any Storey, whichever is higher.
- 2.62 Porch** - A covered surface supported on pillars or otherwise for the purpose of pedestrian or vehicular approach to a building.
- 2.63 Road / Street** - Shall include any public or private street as defined in the B. P. M. C. Act 1949.

- 2.64 Road/ Street Level or Grade** - The officially established elevation or grade of the centre line of the street upon which a plot fronts and if there is no officially established grade, the existing grade of the street at its mid-point.
- 2.65 Road/ Street Line** - The line defining the side limits of a road/ street.
- 2.66 Room / Height** - The vertical distance measured from the finished floor surface to the finished ceiling / slab surface. In case of pitched roofs, the room height shall be the vertical distance measured from the finished floor surface up to the point of the sloping roof.
- 2.67 Row Housing**-A row of houses with only front and rear open spaces.
- 2.68 Semi-Detached Building** - A building detached on three sides with open spaces as specified,
- 2.69 Service Road**-A road/ lane provided at the rear or side of a plot for service purposes.
- 2.70 Site or Plot**-A parcel/ piece of land enclosed by definite boundaries.
- 2.71 Site Corner**-A site at the junction of land fronting on two or more intersecting streets.
- 2.72 Site depth of**- The mean horizontal distance between the front and rear site boundaries.
- 2.73 Site Double Frontage** - A site, having a frontage on two streets other than a corner plot.
- 2.74 Site Interior of Tandem** - A site, access to which is by a passage from a street whether such passage forms part of the site or not.
- 2.75 Smoke Stop Door**-A door for preventing or checking the spread of smoke from one area to another.
- 2.76 Stair Cover** - A structure with a covering roof cover a staircase and its landing built to enclose only the stair for the purpose of providing protection from weather and not used for human habitation.
- 2.76-A Stilts of Stilts Floor** - Ground level portion of a building consisting of structural columns supporting the superstructure above without any enclosures and not more than 2.50 m in the height from the ground level for the purpose of vehicular parking only.
- 2.77 Storey** - The portion of the building included between the surface of any floor and the surface of the floor next above it or if there be no floor above it, then the space between any floor and the ceiling next above it.
- 2.78 Tenement** - An independent dwelling unit with a kitchen.
- 2.79 Travel Distance** - the distance from the remotest point on a floor of a building to a place of safety be it a vertical exit, horizontal exit or an outside exit measured along the line of travel.
- 2.80 Tower Like Structure** - Structures shall be deemed to be tower like structures when height of tower like part is at least twice the height of the broader base.

- 2.81 Volume Plot Ratio (V. P.R.)** - The ratio of volume of building measured in cubic meters to the area of plot measured in sq. meters and expressed in meters.
- 2.82 Water Closet (W. C.)** - A Privy with arrangement for flushing the pan with water, it does not include a bathroom.
- 2.83 Water Course** - A natural channel or an artificial one formed by training or diversion of a natural channel for carrying storm and waste water.
- 2.83.1 Major Water Course** - A water course which carries storm water discharging from a contributing area of not less than 160 H.
- Note** - The decision of the Authority as regards the calculation of the contributing area shall be final.
- 2.83.2 Minor Water Course** - A water course, which is not a major one,
- 2.84 Width of Road** - The whole extent of space within the boundaries of road when applied to a new road, as laid down in the city survey map or development plan or prescribed road lines by any Act or law and measured as right angles to the course or intended course of direction of such road.
- 2.85 Authority**- Wherever there is a word 'authority' it means Pimpri-Chinchwad Municipal Corporation.
- 2.86 Non-Ambulatory Disabilities** - Impairments that, regardless of cause or manifestation, for all practical purposes, confine individuals to wheelchairs.
- 2.87 Non-Ambulatory Disabilities** - Impairments that cause individuals to walk with difficulty or insecurity. Individuals using braces or crutches, amputees, arbritics, spastics and those with pulmonary and cardiac ills may be semi-ambulatory.
- 2.88 Hearing Disabilities** - Deafness or hearing handicaps that might make an individual insecure in public areas because he is unable to communicate or hear warning signals.
- 2.89 Sight Disabilities** - Total blindness or impairments affecting sight to the extent that the individual, functioning in public areas, is insecure or exposed to danger.
- 2.90 Wheel Chair** - Chair used by Disabled people for mobility. The standard size of wheel chair shall be taken as 1050mm x 750mm.

DOD

3. APPLICABILITY OF THE DEVELOPMENT CONTROL RULES:

- 3.1** In addition to the provisions contained in Section 44, 58 and 69 of MR & TP Act 1966 and Section 253 to 269* of Bombay Provincial Municipal Corporation Act the Development Control Rules shall apply to the building activity given under 3.2.
- 3.2** These rules shall apply to all 'development'.
- 3.2.1** Where a building is erected, these rules apply to the design and construction of the building.
- 3.2.2** Where the whole or any part of the building is removed, these rules apply to all parts of the building whether removed or not.
- 3.2.3** Where the whole or any part of the building is demolished these rules apply to any remaining part and to the work involved in demolition.
- 3.2.4** Where a building is altered these rules apply to the whole building whether existing or new except that the rules apply only to part if that part is completely self contained with respect to facilities and safety measures required to the rules
- 3.2.5** Where the occupancy of a building is changed, these rules apply to all parts of the building affected by the change.

DDD

4. INTERPRETATION:

- 4.1 In the D. C. Rules, the use of present tense includes the future tense, the masculine gender includes the feminine and the neutral, the singular, number includes the plural and the plural includes the singular. The word person includes a corporation and 'Singular' includes thumb impression made by a person who cannot write if his name is written near to such thumb impression.
- 4.2 Whenever sizes and dimensions of rooms and spaces within buildings are specified, they shall mean the clear dimensions unless otherwise specified, in these rules.

ODD

5. BUILDING PERMISSION COMMENCEMENT CERTIFICATE REQUIRED :

5.1 No person shall carry out any development erect, re-erect or make alterations or demolish any building or cause the same be done without first obtaining a separate building permission / commencement certificate for each such development work / building from the Authority. Any change in the use of the land or building excluding those specified in clauses (vii), (viii) & (ix) of Section 43 of the MR & TP Act shall also require permission of authority.

5.1.1 The following operational construction of the Government, whether temporary or permanent, which is necessary for the operation, maintenance, development or execution of any of the following services may be exempted from the purview of the rules.

- i) Railways;
- ii) National Highways;
- iii) National Waterways;
- iv) Airways and Aerodromes;
- v) Posts and Telegraphs, telephones, wireless, broadcasting and other like forms of communications;
- vi) Regional grid for electricity; and
- vii) Any other service which the State Government may, if it is opinion that the operation, maintenance, development or execution of such service is essential to the life of the community, by notification, declare to be a service for the purpose of this clause.

5.1.1.1 However the following constructions of the Government departments do not come under the purview of operational construction for the purpose of exemption under Rule No.5.1.1

- i) New Residential Building (other than gate lodges, quarters for limited essential operational staff and the like), offices, roads and drains in railway colonies, hospitals, clubs, institutes and schools in the case of railways; and
- ii) A new building, new construction or new installation or any extension thereof, in the case of any other services.

5.1.1.2 In the context of Rules No. 5.1.1 (i) for the purpose of deciding what constitute 'Operational Construction' the following may be used as the basis.

- i) Repairs, renovation etc; the following works in the existing installations, buildings, etc. of the Railways;
 - a) All Railways tracks in the outside the yards including the formation, culverts, bridges, tunnels and side drains.
 - b) Buildings, platforms, foot over bridges, subways, sheds over platforms yards, master's and train dispatcher's offices, weigh bridges, turn-tables, lifting-towers gantries.
 - c) Running (Loco) sheds, carriage and wagon depots, carriage washing arrangements, running rooms, train examiner's office and depots in the yards, permanent way inspector's and Signal Inspector's Stores in the yards, water tanks, overhead and ground level, pipe lines and pumping stations.
 - d) Goods sheds, parcel offices, good platforms.

- e) Store sheds, sub-stations
- f) Signals, signal cabin, control cabin in hump yard
- ii) Fencing or walling for protection of railway lines and yards.
- iii) All over head electric equipment for electric traction.

Note 1 - In the case of new railway lines, the Railway Administration should make a reference to the State Government for their views before finalizing the project.

Note 2 - For the construction of new station buildings, goods sheds, parcel offices, goods platforms and workshops or their major remodelling as distinct from repairs, renovations etc., referred to under Item i) (a to f) above, reference to the Authority will be necessary.

ODD

6. PROCEDURE FOR OBTAINING BUILDING PERMISSION/ COMMENCEMENT CERTIFICATE

6.1 Notice - Every persons who intends to carry out development and erect, re-erect or make alterations in a building or demolish any building shall give notice in writing to the Authority of his said intention in the prescribed form (See Appendix A) and such notice shall be accompanied by plans and statements in sufficient copies (see Rule No. 6.1.1) as required under 6.2 and 6.3. The plans may be ordinary prints on Ferro paper or any other type. Provided however that in the case of change in the use of land or building not entailing any construction work, the owner shall submit a copy of the sanctioned plan of the premises in which the change in use is proposed showing the original and proposed use.

6.1.1 Copies of Plans and Statements- Normally 4 copies of plans and statements shall be made available along with the notice. In case of building schemes, where the clearance is required from other agencies like P. C. M. C. Fire Service (see Rule No. 6.2.6.1) and others, numbers of copies of plans required shall be as decided by the Authority.

6.2 Information Accompanying Notice - The Notice shall be accompanied by the key (location) plan, site plan, sub-division layout plan, building plan, service plans specifications and certificate of supervision and ownership title as prescribed 6.2.1 to 6.2.12.

6.2.1 Sizes of Drawing Sheets & Colouring Plans - 6.2.1.1 The size of drawing sheets shall be any of these specified in Table 1.

6.2.1.2 Colouring Notation for Plans - The plans shall be coloured as specified in Table 2. Further, prints of plans shall be on one side of paper only.

6.2.1.3 Dimensions - All dimensions shall be indicated in metric units.

**TABLE 1
DRAWING SHEET SIZES**

Sr. No.	Designation	Trimmed Size, MM
1.	AO	841 X 1189
2.	A1	594x 841
3.	A2	420x594
4.	A3	297x 420
5.	A4	210 x 297
6.	A5	148 x 210

6.2.2 Ownership Title - Every application for a building permission/commencement certificate shall be accompanied by the following for verifying for proof ownership :

- i) latest property register card or if not available 7/12 extract
- ii) other documents if requisitioned by the authority

12.	Recreation Ground	Green Wash	Green Wash	Green Wash	Green Wash	Green Wash	Green Wash

NOTE: For land development / subdivision / layout, suitable colouring notations shall be used which shall be indexed

6.2.3 Key Plan (or location) Plan - A key plan drawn to a scale of not less than **1:10,000** shall be submitted along with the application for building permission/ commencement certificate showing the boundary locations of the site with respect to neighborhood land-marks.

6.2.4 Site Plan - The site plan sent with an application for permission shall be drawn to a scale of 1:500 or such other nearest scale available and shall show :

- a) the boundaries of the site and of any contiguous land belonging to the owner thereof;
- b) the position of the site in relation to neighboring street;
- c) the name of the streets in which the building is proposed to be situated, if any;
- d) all existing buildings standing on, over or under the site;
- e) the position of the building, and of all other buildings (if any) which the applicant intends to erect upon his contiguous land referred to in (a) in relation to;
 - i) the boundaries of the site and in case where the site has been partitioned, the boundaries of the portion owned by the applicant and also of the portion owned by others.
 - ii) adjacent streets and buildings on adjoining plots (with number of storeys and height and marginal open spaces).
 - iii) if there is no street within a distance of 12 m of the site, the nearest existing street.
- f) the means of access from the street to the building, and to all other building (if any) which the applicant intends to erect upon his contiguous land referred to in (a);
- g) space to be left about the building to secure a free circulation of air, admission of light and access for scavenging purposes;
- h) the width of the street (if any) in front and of the street (if any) at the side or near the buildings;
- i) the direction of north point relative to the plan of the buildings;
- j) any existing physical features, such as walls, drains, tree etc.
- k) the ground area of the whole property and the breakup of covered area on each floor with the calculations for percentage covered in each floor in terms of the total area of the plot as required under the rules governing the coverage of the area;
- l) electric supply line, water supply and drainage line;
- m) such other particulars as may be prescribed by the authority.

6.2.5 Sub Division / Layout Plan - In the case of development work, the notice shall be accompanied by the sub division layout Plan which shall be drawn on a scale of not less than 1:500 containing the following :

- a) scale used and north point;
- b) the location of all proposed and existing roads with their existing/proposed/prescribed width within the land;
- c) dimensions of plot along with building lines showing the setbacks with dimensions within each plot;
- d) the location of drains, sewers, public facilities and services and electrical lines etc.

- e) table indicating size, area and use of all the plots in the sub-division layout plan;
- f) a statement indicating the total areas of the site, area utilised under roads, open spaces of parks, play grounds recreation spaces and development plan reservations, schools, shopping and other public places along with their percentage with reference to the total area of the site proposed to be subdivided;
- g) in case plots which are sub-divided in built-up areas in addition to the above, the means of access to the sub division from existing streets.

6.2.6 Building Plan - The plans of the buildings and elevations and sections accompanying the notice shall be drawn to a scale of 1: 100. The building plan shall:

- a) include floor plans of all *floors together with the covered area* clearly indicating the sizes of rooms and the position and width of staircase, ramps and other exit ways lift wells, lift machine room and lift pit details. It shall also include ground floor plans as well as basement plans and shall indicate the details of parking space, loading and unloading spaces provided around and within building as also the access ways and the appurtenant open spaces with projections in dotted lines, distance from any building existing on the plot in figured dimensions along with necessary building.
*Note - to indicate in Proforma 1 in Appendix A
- b) show the use or occupancy of all parts of the building.
- c) show exact location of essential services, for example, WC, Sink, bath and the like.
- d) include sectional drawings of the building showing all sectional details.
- e) show all street elevations.
- f) give dimensions of the projected portions beyond the permissible building line.
- g) include terrace plan indicating the drainage and the slope of the roof.
- h) give indications of the north point relative to the plans; and
- i) give dimensions of doors, windows and ventilators.
- j) such other particulars as may be prescribed by the authority.

6.2.6.1 Building Plans for Multistoried / Special Buildings - For multistoried buildings which are more than 15 m height and for special building like educational, assembly, institutional, industrial, storage and hazardous and mixed occupancies with any of the aforesaid occupancies having area more than 150 sq. m. the following additional information shall be furnished / indicated in the Building Plans in addition to the items (a) to (j) of Rules No. 6.2.6

- a) access to fire appliances / vehicles with details of vehicular turning circle and clear motor able accessary around the building up to 6 m width.
- b) size (width) of main and alternate staircases along with balcony approach corridor, ventilated lobby approach.
- c) location and details of lift enclosures;
- d) location and size of fire lift;
- e) smoke stop lobby / door, where provided;

- f) refuse chutes, refuse chamber, service duct, etc.
- g) vehicular parking spaces;
- h) refuse area, if any;
- i) **Details of Building Services** - Air-conditioning system with position of fire dampers, mechanical ventilation system, electrical services, boilers, gas pipes etc.
- j) details of exits including provision of ramps etc; for hospitals and buildings requiring special Fire Protection measures;
- k) location of generator, transformer and switch gear room;
- l) smoke exhausted system if any;
- m) details of fire alarm system network;
- n) location of centralized control connecting all fire alarm system built in fire protecting arrangements and public address system etc.
- o) location and dimensions of static water storage tank and pump room along with fire service inlets for mobile pump and water storage tank;
- p) location and details of fixed fire protection installations such as sprinklers, wet risers, hose-reels, drenches, CO₂ installation etc. and
- q) location and details of first aid, fire fighting equipment's / installations.

6.2.7 Service Plan - Details of private water supply, sewage disposal system and details of building services, where required by the Authority, shall be made available on a scale not less than 1 : 100.

6.2.8 Specifications - General specification of the proposed constructions, giving type and grade of materials to be used in the form given in Appendix A, duly signed by licensed Architect/ Engineer / Structural Engineer as the case may be shall accompany the notice.

6.2.9 Supervision - The notice shall be further accompanied by a certificate of supervision in the prescribed form given in Appendix B, by the licensed Architect / Engineer / Structural Engineer as the case may be. In the event of the said licensed technical personnel ceasing to be employed for the development work, the further development work shall stand suspended till a new licensed technical person is appointed and his certificate of supervision along with a certificate for the previous work erected (either from the old Architect or new) is accepted by the authority.

6.2.10 Building Permission Fee - The notice shall be accompanied by an attested copy of Receipt of Payment of Building Permission Application Fee.

6.2.11 No Objection Certificate - In the case of certain occupancies, requiring clearance from the authorities like Civil Aviation Authorities, Railways, Directorate of Industries, Maharashtra Prevention of Water Pollution Board, District Magistrate, Inspectorate of Boilers and Smoke Nuisance etc. the relevant no objection certificates from those authorities, applicable to the occupancy, shall also accompany the application.

6.2.12 Clearance Certificate for Tax Arrears - The notice shall also be accompanied by an attested copy of clearance certificate from the Assessment Department of the Corporation for payment of Tax up-to-date.

6.3 Signing the Plans - All the plans shall be duly signed by the owner or a holder of Power of Attorney from the owner and the licensed Architect/ Engineer/ Structural Engineer as the case may be and shall indicate their names, addresses and license numbers allotted by the authority.

NOTE-TO INDICATE ON PLANS AS IN PROFORMA III IN APPENDIX-A

6.4 Qualifications and Competence of the Licensed Architect / Engineer / Structural Engineer - Architects, Engineers and Structural Engineers referred to under 6.2.5, 6.2.6 and 6.3 shall be licensed by the Authority as competent to do the various working as given in Appendix C. The qualifications and procedure for licensing the architect, engineer, structural engineer and supervisor shall be as given in Appendix C.

6.5 Schedule of Fee

6.5.1 Building Permission Fee

6.5.1.1 Development of Land / Sub-Division / Layout of Land - The fees for submitting proposals for development of land/sub-division layout of land shall be as follows:-

Area to be Developed	Fees
Upto 0.3 Ha	Rs. 150/-
0.3 to 1 Ha	Rs. 300/-
1 to 2.5 Ha	Rs. 600/-
2.5 to 5 Ha	Rs. 900/-
Above 5 Ha	Rs. 900/- + Rs. 100/- Ha or part thereof for area above 5 Ha

6.5.1.2 Residential Building - The following scales of fee shall be applicable for building permission for residential building :-

Sr. No.	Purpose	Scale of Fee
1.	To construct or reconstruct a building covered under Section 253 to 269 of BPMCA Act 1949	Rs. 20/- per 10 sq. m. to built over area or part thereof with a minimum of Rs. 100/- and maximum of Rs. 10,000/- per proposal. Nominal fee of Rs. 10/- for constructions Restricted to 30 sq. m. built over area
2.	For alteration and/ or additions to the existing building covered under Section 253 to 269 of BPMCA Act 1949	Same as above for additional built up area + Rs. 50/- for alternations.

3.	For alterations covered under Section 253 to 269 of BPMCA Act 1948	Rs.50/-perproposal
4.	In the case of amended plans for sanctioned proposal	with every amended proposal a fee of Rs. 100/- where in no extra floor area is proposed. Otherwise as for the additional area proposed Rs. 20/-per 10 sq. m. built over area or Rs. 100/- and a maximum of Rs. 10,000/-perproposal.
5.	Application for renewal of a sanctioned proposal, plans remaining the same before the end of each year from the date of commencement Certificate/ Building Permission	No fees
6.	Application for renewal of a sanctioned proposal plans remaining the same after the end of each year from the date of Commencement Certificate/ Building Permission	Rs. 100/-permonthorpartthereof (the number of months being calculated for the delay period) if application is submitted after the expiry of the date of validity but within 3 years from original sanction.

6.5.1.3 In case of proposals from medical, educational and charitable institutions, which are duly registered, fees shall be charged at one-fourth of the basic scale, subject to a minimum of Rs. 100/- and a maximum of Rs. 2,500/- per proposal.

6.5.1.4 In case of proposals for industrial, business and commercial buildings, cinema theatres and entertainment halls, hotels and lodging houses, fees shall be charged at double the basic scale, subject to a minimum of Rs. 200/- and a maximum of Rs. 20,000/- per proposal. For the purpose of this rule a residential building with even a single shop will be treated as a commercial building. Similarly in any staff quarters in industrial premises shall be considered as a industrial building.

6.5.2 Boundary Wall - The fees for constructing compound wall shall be Rs. 10/-.

6.5.3 Exemptions to Rule 6.5.1 - For special housing schemes for economically weaker section of society and low income group and slum clearance schemes under taken by public agencies or subsidised by State Government with plinth area of tenement not more than 30 sq. m. the building permission fee may be exempted.

6.5.4 Rules for Fixation of Fees-The following Rules shall apply:-

- 1) The total plinth area on all floors shall be taken as the basis for calculation of fees including the basement floors and accessory building.
- 2) No notice under section 253 to 269 of the Bombay Provincial Municipal Corporation Act shall be deemed valid unless and until the person giving notice has paid the fees to the Municipal Corporation and an attested copy of the receipt of such payment is attached with the notice.
- 3) In case the proposal is finally rejected, 10% of the fees shall be retained and the balance shall be refunded to the applicants within one month of the date of rejection.

6.5.5 Fees for Depositing Building Material/ Temporary Erections on Public Streets.

6.5.5.1 The stacking of building materials and debris on public roads, highways shall be prohibited except with special permission of the Authority. Where such permission has been granted, the license fee for depositing building materials and debris on public roads, highways etc. shall be as follows :

- a) For construction of residential buildings Rs. 25/- per sq. m. per week
- b) For construction of non-residential buildings Rs. 50/- per sq. m. per week

Note - The stacking of materials would be permitted till the completion of the building. If after completion of the building, in the opinion of the Authority, certain material has not been cleared or left in a stage causing annoyance or inconvenience, the Authority shall take necessary action against the owner and any cost incurred in the removal of such material, which has been carried out by the Authority, shall be recovered from the owner.

6.6 Delegation of and Discretionary Powers

6.6.1 Delegation of Powers - Any of the powers, duties or functions conferred or imposed upon and vested in the Commissioner by any of the foregoing rules may be exercised, performed or discharged under the Commissioner's control and subject to his revision and to such conditions and limitations, if any as he shall think fit to prescribed by any Municipal Officer whom the Commissioner generally or specially empower in writing in this behalf and in each of the said rules the work 'COMMISSIONER' shall to that extent to which any Municipal Officer is so empowered, be deemed to include such Officer.

6.6.2 Discretionary Powers

6.6.2.1 In conformity with the intent and spirit of these rules commissioner may:

- i) decide on matter is where it is alleged that there is an error in any order, requirement, decision, determination or interpretation made by him in the application of these rules;
- ii) determine and establish the location of zonal boundaries in exceptional cases or in cases of doubt or controversy;
- iii) interpret the provisions of these rules where the street layout actually on the ground varies from the street layout as shown on the Development Plan;
- iv) modify the limit of a zone where the boundary line of the zone divides a plot and
- v) authorize operational constructions of a public service undertaking for public utility purposes only where he finds such an authorization to be reasonably necessary for the public convenience and welfare even if it is not permitted in any Land use Classification.

6.6.2.2 In specific cases where a clearly demonstrable hardship is caused the Commissioner may by special written permission;

- i) Permit any of the dimensions / provisions prescribed by these rules to be relaxed provided the relaxation sought does not violate the health safety, fire safety, structural safety and public safety of the inhabitants of the buildings and the neighborhood. However no relaxation in the front setback and F. S. I. shall be granted under any circumstances.

While granting permission under (i) conditions may be imposed on size cost or duration of the structure, abrogation of claim of compensation payment of deposit and its forfeiture for non compliance and payment of premium.

6.7 Grant of Permission or Refusal

6.7.1 The Authority may either sanction or refuse the plans and specifications or may sanction them with such modifications or directions as it may deem necessary and thereupon shall communicate its decision to the person giving the notice in the prescribed form given in Appendix D and E.

6.7.2 The building plans for building identified in Rule No. 6.2.6.1 shall also be subject to the scrutiny of the Chief Fire Officer, Pimpri Chinchwad Municipal Corporation, Fire Brigade.

6.7.3 If within Sixty (60) days of the receipt of the notice, under 6.1 of the rule or within 60 days of the re-submission of plans under 6.7.4 the Authority fails to intimate in writing to the person, who has given the notice of its refusal or sanction with such modification or directions, the permission application with its plans and statements shall be deemed to have been sanctioned.

6.7.4 Once the plan has been scrutinized and objections have been pointed out, the owner giving notice shall modify the plan, comply with the objections raised and resubmit it. The prints of Plans submitted for final approval shall not contain superimposed corrections. The Authority shall grant or refuse the Commencement Certificate / Building Permission within 60 days from the date of resubmission. No new objections may generally be raised when they are resubmitted after compliance of earlier objections.

6.8 Revocation of Permission

6.8.1 In addition to the provision of Section 51 of Maharashtra Regional and Town Planning Act, 1966 the Authority may revoke any building permission issued under the provisions of the rules, wherever there has been any false statement or any misrepresentation of material fact in the application on which the building permission was based, similarly in case of deemed permission, the development carried out is not according to rules, the whole work shall be treated as unauthorised.

In the case of revocation of permission based on false statements or any material misrepresentation of fact in the application, no compensation would be payable.

□□□

7. PROCEDURE DURING CONSTRUCTION:

7.1 Neither the granting of the permission nor the approval of the drawings and specifications, nor inspections made by the Authority during erection of the building shall in any way relieve the owner of such building from full responsibility for carrying out the work in accordance with the requirements of the rules.

7.2 **Notice for Commencement of Work** - Within one year from the date of issue of building permission the owner shall commence the work for which the building permission has been issued the owner shall give notice to the Authority of the intention to start work on the building site in the Performa given in Appendix F. The owner shall commence the work after 7 days from the date of receipt of such notice by Authority. In case of inspection/direction by the work may be commenced earlier.

Note - This rule does not dispense with the liability of the owner to apply for renewal of the building permission if it is expected that the work would not be complete within period of one year from the date of commencement certificate (the period of validity of the commencement certificate).

7.3 Documents at Site

7.3.1 Where tests of any materials are made to ensure conformity with the requirement of the rules records of the test data shall be kept available for inspection during the construction of the building and for such a period thereafter as required by the Authority.

7.3.2 The person to whom a building permission is issued shall during construction keep :
a) Pasted in a conspicuous place on the site in respect of which the permission was issued, a copy of the building permission and approved plans.

7.4 **Checking of Plinth / Columns up to Plinth Level** - The owner shall give notice in prescribed form given in appendix G to the Authority after the completion of work up to plinth level with the view to enable the Authority to ensure that the work is carried out in accordance with the sanctioned plans. The Authority shall carry out inspection within seven days from the receipt of such notice and give permission, for carrying out further construction work as per sanctioned plans in prescribed Performa given in H. Within the above period if the permission is not refused, the permission shall be deemed to have been given.

7.5 **Deviation During Construction** - If during the construction of a building any departure which is not of a substantial, nature from the sanctioned plan is intended to be made by way of addition which does not violate any provisions regarding general building requirements, structural stability and fire safety requirement of the rules alternations may be made and sanction of the authority shall be obtained immediately and in any case before application for occupation certificate and the procedure laid down for original plans shall apply to all such amended plans except the building permission fee.

Provided further that if any such alternations are likely to result in increasing the number of tenements, the built-over area / FSI or change in the marginal open spaces or the height of the building. No such alternations shall be carried unless sanction to the amended plans is first obtained.

- 7.6 Completion Certificate** - The owner through the licensed architect, engineer, structural engineer, as the case may be who has supervised the construction, shall give notice to the authority regarding completion of work described in the building permission. The completion certificate shall be submitted in the prescribed form by four sets of completion plan. One of the sets, duly certified as Completion Plan shall be returned to the owner along with the issue of full occupancy certificate (see rule no 7.7).
- 7.7 Occupancy Certificate** - The Authority, on receipt of the completion, certificate, shall inspect the work and sanction or refuse an occupancy certificate, in the Proforma given in Appendix K within 21 days from the date of receipt of completion certificate, after which period it shall be deemed to have been approved by the Authority for occupation provided the building has been constructed as per the sanctioned plans. Where the occupancy certificate is refused, the various reasons shall be quoted for rejection, at the first instance itself.
- 7.7.1 Part Occupancy Certificate** - Upon the request of the holder the building permission the authority may issue a part, occupancy certificate for building of part thereof, before completion of the entire work as per building permission provided sufficient precautionary measures are taken by the holder of the building permission to ensure public safety and health safety. The part occupancy certificate shall be given by Authority subject to the owner indemnifying the authority as per the Proforma given in Appendix I.
- 7.7.2** In the case of buildings identified in rules No. 6.2.6.1 the work shall also be subject to the inspection of the Chief Fire Officer, Pimpri Chinchwad Municipal Corporation / Fire Brigade and the occupancy certificate shall be issued by the Authority only after the clearance from the Chief Fire Officer regarding the completion of the work from the fire protection point of view.

DDD

8. INSPECTION:

8-A Amendment Modification to Appendices : Except where the same are prescribed in B. P. M. C. Act 1949 or MR & TPA Act, 1966 or the rules or bye-laws framed there under the Commissioner from time to time add, alter or amend Appendices A, B and D to L.

8.1 The Authority shall have the power to carry out inspection of the work at various stages to ascertain whether the work is proceeding as per the provisions of rules and sanctioned plan **Section 458(5) of Bombay Provincial Municipal Corporation Act 1949 shall** apply for the procedure for inspections by the Authority and for action to be taken by the authority arising out of the inspection carried out.

DOD

PART - II : GENERAL BUILDING REQUIREMENTS

9. REQUIREMENTS OF SITES

9.1 No. piece of land shall be used as a site for the construction of building:

- a) If the Authority considers that the site is insanitary or that it is dangerous to construct a building on it;
- b) If the site is adjacent to any water course shown on the Development Plan.

Provided however, that the Corporation may allow the construction of building in such a site after determining the water way required and subject to the condition that retaining wall (or such other protection work) is constructed by the applicant at his cost at the edge of such waterway.

Provided further that where a water course passes through a low lying land without well defined bank, the owner of the property may be permitted by the authority to restrict or divert the water course to an alignment and cross section as determined by the authority.

Notwithstanding the above, the authority shall be entitled to take cognisance of the existence of all water course whether shown on the development plan or not while sanctioning layouts and no person shall take any action without the permission of Authority which results in reducing the water way or closing or filling up of any existing water course.

- c) If the site is not drained properly or is incapable of being well drained;
- d) If the owner of the building has not shown to the satisfaction of the authority all the measures required to safeguard the construction from constantly getting damp;
- e) If the building is proposed on any area filled up with carcasses, excreta filthy and offensive matter till the production of certificate from the Health Officer and Corporation Engineer to the effect that it is from the health and sanitary point of view fit to be built upon;
- f) If the plot has not been approved as a building site by Authority.
- g) If the level of the site is less than prescribed Datum level depending on topography and drainage aspects.

9.1.1 Site Development : Level of the roads, access paths and parking areas identified for physically handicapped persons shall be described in the plan along with specification of the materials. This is applicable to all public buildings and facilities used by the public, to provide facilities for physically handicapped persons. It does not apply to private and public residences.

9.2 Distance of Site from Electric Lines-No verandah, balcony or the like shall be allowed to be erected or re-erected or any additions or alternations made to a building on a site within the distance quoted below in accordance with the current India Electricity Rules and its amendments from time to time between the building and any overhead electric supply line :

	Vertically m	Horizontally m
a) Low and medium voltage lines and service lines	2.5	1.2
b) High voltage lines upto and including 33,000V	3.7	2.0
	(Plus 0.3 m for every additional 33,000V or part thereof)	(plus 0.3m for every additional 33,000V or thereof)

9.2.1 The minimum clearance specified in clause 9.2 above shall be measured from maximum sag for vertical clearance and from maximum deflection due to wind pressure for horizontal clearance.

9.3 N. 0. C. for Railway Authority - No construction shall be allowed within a distance of 30 mt. from the Railway Boundary without obtaining written permission of Railway Authority.

DOD

10. PUBLIC STREETS AND MEANS OF ACCESS

- 10.1** Every site or plot or building existing or proposed shall have public or internal means of access free of encroachments as required in these.
- 10.2** Every person who erects a building shall not at any time create or cause or permit to erect or re-erect any building which in any way encroaches upon or diminishes the area set apart as means of access.
- 10.3** **Width of Means of Access** - the plots shall abut on a public means of access like street / road, Plots which do not abut on a street shall abut / front on a means of access, the width and other requirements of which shall be as given in Table 3.

TABLE 3 : MEANS OF ACCESS

Sr.No.	Width of Means of Access in mt.	Length of Means Access in mt.
i)	6.0	75
ii)	7.5	150
iii)	9.0	300
iv)	12.0	Above 300

Note 1 : The means of access shall be clear of marginal open space of at least 3 m from the existing building line.

Note 2 : If the development is only on one side of the means of access, the above prescribed widths may be reduced 1 m in each case.

In no case, development on plot shall be permitted unless it is accessible by a public street of width not less than 6 m. Provided further, that for all industrial buildings, theaters, cinema houses, assembly halls, stadia, educational building, markets, other building which attract large crowd, the means of access shall not be less than 12 m. serving upto a length of 200 m and for length more than 200 m the width shall not be less than 15 m. Similarly, such means of access can be reduced to 10 m in width provided it gives access to only two plots.

- 10.3.1 Pathways** - The approach to the building from road / street / internal means of access shall be through paved pathway of width not less than 1.5m provided its length is not more than 20 m. from the main / internal means of access provided that there is a minimum set back of 1 meter between the edge of the pathway & front wall of the building.

- 10.3.1.1** In the case of special housing schemes for Low Income Group and Economically Weaker Section of Society developed upto two storied Row Housing Scheme, the pathway width shall be 1.5 m which shall not serve more than 50 m and 8 plots on each side of pathway. Provided that there is a minimum set back of 1 m between the edge of the pathway and the front wall of the building.

- 10.3.1.2 Access Path / Walk way for Physically Handicapped Persons** : Access path from plot entry and surface parking to building entrance shall be of minimum of 1800 mm. wide having even surface without any steps. Slope if any shall not have gradient greater than 5%. Selection of floor material shall be made suitably to attract or to guide visually impaired persons (limited to coloured floor materials whose colour and brightness is conspicuously different from that of the surrounding floor material or the material that emit different sound to guide visually impaired persons (hereinafter referred to as "guiding floor material") (Refer Appendix-U for explanatory notes). Finishes shall have a non slip surface with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.
- 10.3.2** The length of main means of access shall be determined by the distance from the farthest plot (building) to the public street. The length of the subsidiary access way shall be measured from the point of its origin to the next wider road on which it meets. Provided that in the case of a U loop the length shall be considered a half the length of the loop.
- 10.3.3** In the interest of general development of an area the Authority may require the means of access to be of larger width than that required under bye law no. 10.3.
- 10.3.4** Notwithstanding the above, in partially built-up plots, if the area still to be built upon does not exceed 5000 sq. m. an access of 3.6m width and even if it is built over at height of not less than 4.5 may be considered as adequate means of access. If access for areas to be built upon not exceeding 5000 sq. m. provided such area is used for Low Income Group housing and the tenement density permissible is 75 percent of the tenement density permissible in that zone.
- 10.3.5** In gaathan / congested areas in the case of plots facing street / means of access less than 4.5 m in width, the plot boundary shall be shifted to be away by 2.25 m from the central line of the street / means of accessway to give rise to a new street / means of accessway width of 4.5m.
- 10.4** Means of access shall be levelled, metalled flagged, paved, sewered, drained channeled, lighted, laid with water supply line and provided with trees for shade to the satisfaction of the authority, fees of encroachment by any structure or fixture so as not to reduce its width below the minimum required under rule No. 10.3 and shall be maintained in a condition to the satisfaction of the authority.
- 10.4-A Private Street** : If any Private street or other means of access is not constructed or maintained as specified in sub-regulation or if structure or fixtures arise there in contravention of that rule the Commissioner may by written notice direct the owner or owners of the several premises fronting or adjoining the said street or other means of access or abutting thereon or to which access is obtained through such street or other means of access or which access is obtained through such street or other means of access or which shall be benefited by works executed to carry out any or all of the shall direct. If the owner or owners fail to comply with his direction the Commissioner may arrange for its execution and recover the expenses incurred from the owner or owners.

10.4.1 If any structure of fixture is set upon a means of access so as to reduce its width below the minimum required, the Authority may remove the same further and recovered the expenses so incurred from the owner.

10.5 Access from Highways Important Roads - No premises other than Highway amenities like petrol pumps, motels, etc. shall have an access direct from highways and such other roads having a width of 30 mtrs or more. The above will be subject to the provisions of State Highway Act, 1955 and National Highway Act, 1956.

Provided that in suitable cases the Planning Authority may suspended the operation of this rule till service roads are provided

10.6 For buildings identified in rule no. 6.2.6.1 the following additional provisions means of access shall be ensured :

- a) The width of the main street on which the building abuts shall not be less than 12 mtrs and one end of this street shall join another street of width not less than 12m in width (See Rule No. 10: 3).
- b) The approach to special building and open spaces on all sides (See Rule No. 13.1) upto 6 m width and the layout for the same shall be done in consultation with Chief Fire Officer, Pimpri Chinchwad Municipal Corporation, Fire Brigade and the same shall be of hard surface capable of taking the weight of fire engine, weighing upto 18 tonnes. The said open space shall be kept free of obstructions and shall motorable.
- c) Main entrances to the plot shall be of adequate width to allow easy access to the fire engine and in no case it shall measure less than 4.5 meters. The entrance gate shall fold back against the compound wall of the premises, thus leaving the exterior access way within the plot free for movement of fire service vehicles. If main entrance at boundary wall is built over; the minimum clearance shall be 4.5 m.

ODD

11. RULES FOR SUB-DIVISION OF LAND AND LAYOUT:

- 11.1 Layouts or sub-division or amalgamation proposals shall be submitted for the following.
- i) When more than one building is proposed on any land excepting for accessory buildings in the case of residential buildings, the owner of the land shall submit proposal for proper layout of buildings or sub-division of his entire recognized plot.
 - ii) When development and redevelopment of any tract of X Land includes division and sub-division or amalgamation of plots for various Land uses within a colony.

11.1-A Every Sub-Division, layout shall contain sub-plots being formed after subdivision access there to recreational open space, if any, required under Regulation 10 11.2 and 11.3 spaces for other ancillary uses if any required under Regulation 11.7 and 11.8 as also all the reservations, designations, allocations road or road widening proposals of the Development Plan and the regular lines of streets prescribed under the B. P. M. C. Act 1949. Where there is a conflict between the width or widening lines proposed in the Development Plan and those under the regular line of a street, the wider of the two shall prevail. Provided that the Commissioner may without any reduction in area allow adjustment in the boundaries of reserved site within the same holding and confirming to the zoning provisions to suit the development. In doing so, he will ensure that the shapes of altered, allocated / reserved sites are such that they can be developed in conformity with this regulations and provided however that no such shifting of the reservation shall be permitted.

- a) Beyond 200 m of the location in Development Plan.
- b) Unless the alternative location is at least similar to the location of the Development Plan as regards access, levels etc.

All such alternations in the reservation, alignment or roads shall be reported by the Planning Authority to Government at the time of sanctioning the layout.

11.2 Roads/ Streets in Land Sub Division or Layout-

11.2.1 The width of roads / streets / public and internal access ways including pathways shall conform to provisions or rule no.10.3 to 10.5

11.2.2 In addition to the provisions of rule no. 10.3 Cul-De-sacs giving access to plots and extending upto 150 m normally and 275 m maximum with an additional turning space at 150 m will be allowed only in residential areas, provided that Cul-De-sacs would be permissible only on straight roads and further provided that cut de sac ends shall be higher in level than the level of starting point. The turning space, in which case shall be not less than 81 sq. m. in area with no dimension being less than 9 m.

11.2.3 **Intersection of Roads** - At junctions of roads meeting at right angles rounding off at the intersection shall be done, unless otherwise directed by the Authority, with the tangent length from the point of intersection to the curve being $\frac{1}{2}$ the road width across the direction of tangent as given below :

FIG. 1 : ROUNDING OFF INTERSECTIONS AT JUNCTIONS

FIG. 2 : ROUNDING OFF INTERSECTIONS AT JUNCTIONS

- 11.2.3.1 For junction of road meeting at less than 60 degrees the rounding off or cut or similar treatment shall have tangent length of U and V from the intersections point as shown in diagram 2. The tangent length at obtuse angle junction shall be equal to half the width of the road from which the vehicle enters as shown in diagram 2.

Provided however that the radius for the junction rounding shall not be less than 6 m.

11.3 Open Spaces

- 11.3.1 For land admeasuring 0.2 ha or more, layouts or sub-division or amalgamation proposals shall be submitted.

In any layout or subdivision of land admeasuring 0.20 Ha or more 10% of the entire holding area shall be reserved as recreational space, which shall be as far as possible be provided in one place.

Notwithstanding anything contained in this rule the shape and location of such open space shall be such that it can be properly utilised as play ground. No deduction in F. S. I. for Road/ Open Spaces shall be made in layout for area between 0.20 Ha to 0.36 Ha. However for the areas above 0.36 Ha deduction shall be made for open space and not for the road for computation of F. S. I.

- 11.3.1 (a)** However the area of F. S. I. computation shall be 90% of the net area (after deducting amenity area) in case of change of industrial to Residential user as specified in regulation no. M 6.5
- 11.3.1.1** No such recreational space shall admeasures less than 200 sq. meters.
- 11.3.1.2** The minimum dimension of such recreational space in no case be less the 7.5 m and if the average width of such recreational space is less than 24 m the length there of shall not exceed $2\frac{1}{2}$ times the average width.
- 11.3.1.3** The structures and uses to be permitted in the recreational open spaces shall be as per the following provisions :
- i) They shall be two storeyed structure with the maximum 15% built-up area out of which 10% built-up area shall be allowed on ground floor/ still floor and remaining 5% may be consumed on one floor above. This shall be subject to maximum 300 sq. mts. This facility shall be available for open space having area 500 sq. mts. and above only.
 - ii) The structures shall be used for the purpose of pavilions or gymnasium or club houses and other structures for the purpose of sport and recreation activity may be permitted.
 - iii) No detached toilet block shall be permitted.
 - iv) A swimming pool may also be permitted in such a recreation open space and shall be free of F. S. I.
 - v) Elevated/ under ground water reservoir, Electric sub-stations etc. may be build and shall not utilize more than 10% additional of the open space in which they are located.
 - vi) Such structures shall not be used for any other purpose except for recreational / sports activities. Structures for such sports and recreational activities shall confirm to the following requirements.
 - a) The Ownership of such structures and other appurtenant users shall be vest by provision in a deed of conveyance in all the owners on account of whose cumulative holdings the recreational open space is required to be kept as recreational open space or ground viz. "Recreation Ground" in the layout or sub division of the land.
 - b) The proposal for construction of such structure should come as a proposal from the owner / owners / society / societies or federation of societies without any profit nature and shall be meant for the beneficial use of the owner/ owners / members of such society / societies or federation of societies.
 - c) Such structures shall not be used for any other purpose except for recreational activities, for which a security deposit as decided by the Commissioner will have to be paid to the corporation.

- d) The remaining area of the recreational open space for play ground shall be kept open to sky and properly accessible to all members as a place of recreation, garden or a playground.
- e) The owner / owners / society / societies or federation of the societies shall submit to the Commissioner a registered undertaking agreeing to the conditions in (a) to (d) above.

11.3.1.4 Independent means of access may not be insisted upon if recreational space is approachable directly from every building in the layout. Further the building line shall be at least 3 m away from the boundary of recreational open space.

11.3.1.5 Whenever called upon by the Planning Authority to do so, under provisions of Section 202, 203 of BPMC Act areas under roads and open space in Bye Law Nos. 10.3 to 10.5, 11.3 shall be handed over to the Planning Authority after development of the same for which nominal amount (or Rs. 1/-) shall be paid by the Planning Authority. In case of the owners who undertake to develop the open space for bonafide reasons as recreational community open spaces, the authority may permit the owner to develop the open space unless the authority is convinced that there is no misuse of open spaces in which case the authority shall take over the land.

11.3.2 In addition to open space under 11.3.1 in the case of sub-division of land in industrial zones of area 0.8 hectare or more 5% of the total area shall be reserved as amenity area, which shall also serve as a general parking space. When such amenity area exceeds 1500 sq. m. the excess area could be utilized for the construction of buildings for banks, canteens, welfare centers and such other common purposes considered necessary for industrial user, as approved by the Authority.

11.4 Size of Plots

11.4.1 Residential and Commercial Zones (excluding weaker section housing schemes undertaken by public authorities) - The minimum size of plots in residential layouts shall be 50 sq. m. subject however to the following provisions :

- a) Plots having areas upto 125 sq. m. shall be permitted only for row housing schemes and the width of such plots shall be between 4.5 to 8 m.
- b) Plots having areas between 125 sq. m. to 250 sq. m. shall be permitted for row housing, semi detached housing or detached housing and the width of such plots shall be between 8 to 12 m. and
- c) Plots above 250 sq. m. would be permitted for row housing, semi-detached or detached housing and the width of plots in this category shall be above 12 m. and no dimension of plot shall be less than 12 m.

The above rules will also apply to sub-division schemes, layouts and building construction pattern in commercial zones.

- 11.4.1.1** For special housing schemes, for Low Income Group and Economically Weaker Section of Society and Slum Clearances Schemes, the minimum plot size shall be 20 sq. m. with a minimum width of 3.6 m.
- 11.4.2 Industrial Zones** - The width of plot shall not be less than 15 m and the size of plot shall not be less than 300 sq. m.
- 11.4.3 Other Building** - The minimum size of plots for buildings for other use like business, educational, mercantile, petrol filling station etc, shall be decided by authority subject to rule no. 11.4.3.1 to 11.4.3.3.
- 11.4.3.1 Cinema Theaters / Assembly Halls** - Minimum size of plot for Cinema theaters / assembly building used for public entertainment with fixed seats shall be on the basis of seating capacity of the building at the rate of 3 sq. m. per seat.
- 11.4.3.2 Mangal Karyalaya**- The minimum size of plot shall be 1000 sq. m.
- 11.4.3.3 Petrol Filling Station**- The minimum size of plot shall be
- a) 30.50m. x 15.75 m. the case of petrol filling station with kiosk without service bay.
 - b) 36.5 m. x 30.5 m. in the case of petrol filling Station with service bay.
- 11.4.4 F. A. R. / Built-up Area / Tenement Density Calculation on Net Plot Area** - for the purpose of F. A. R. / Built-up Area/ Tenement density calculation the net area of plot shall only be considered. In the case of a layout such net area shall be calculated after deducting from the gross area of plot; the areas covered by means of access and recreational and amenity open space.
- 11.5** If the land proposed to be laid out is affected by any reservations for public purposes, the Municipal Commissioner may agree to adjust the location of such reservation to suit the development without altering the area of such reservation, provided however, that no such shifting of the reservation shall be permitted.
- a) beyond 200 mt. of the location in the Development Plan.
 - b) beyond the holding of the owner in which such reservation is located, and
 - c) unless the alternative location is at least similar to the location of the Development Plan as regards access, levels etc.
- All such alternations in the reservations / alignment of roads shall be reported by the Municipal Commissioner to Government at the time of sanctioning the layout.
- 11.6 Convenience Shopping** - In the case of layouts or sub-division of areas in residential and commercial zones, provision shall be made for convenience shopping. Such shopping areas shall not however exceed 5 % of the area of the plots (in Industrial Zones Provisions of Rule No. 11.3.2 shall apply). Further the following provisions shall apply :
- i) Such convenience shopping may be distributed within the layout area so that it is available within 300 m. from any parts of the layout.

- ii) Such convenience shops shall not have an area of more than 20 sq. m. each and shall comprise of the following shopping activities only:
- a) Food Grain Shops (Ration Shops) and Groceries and General Provisions
 - b) PanShops
 - c) Tobacconist
 - d) Shops for Collection & Distribution of Clothes for cleaning and dyeing
 - e) Darner
 - f) Tailors
 - g) Hair Dressing Saloon and Beauty Parlour
 - h) Bicycle Hire and Repair
 - i) Vegetable and Fruit Stalls
 - j) Milk Shops
 - k) Floweriest
 - l) Bangles and Other Articles needed by Women
 - m) Small Bakeries
 - n) Newspaper Stalls
 - o) Book and Stationery etc.
 - p) Medicine and Chemist Shops
 - q) Plumbers, Electrician, Radio, Television and Video Equipment's Repair Shops and Video Liberties
 - r) Floor Mills upto 10 HP.
 - s) Sport shops each not exceeding 75 sq. mtrs.
 - t) Personal Services Establishments, Travel Agencies etc.
 - u) Goldsmiths, Photo Studio, Optician, Watches shop
 - v) PCO's / STD's other equipment based Communication Facilities
 - w) Tea shops of Amrittulya type the above user shops be also permitted in RZone

The Municipal Commissioner, may from time to time add to alter or amend the above list.

- 11.7** In any layout or sub-division of plot 2 Ha or more, a suitable site for an electric substation as directed by the Authority shall be provided.
- 11.8** **Amenities and Facilities for Layout of Larger Areas** - For large layouts admeasuring three hectares and more in area provision of not less than 5 % of the total area shall be made in the layout for nursery schools, police post and such other public purposes deemed necessary for the layout and as may be directed by the Municipal Commissioner.

□□□

12. LAND USE CLASSIFICATION AND USES PERMITTED

12.1 The various building uses and occupancies and premises to be permitted in the various zones shall be as given in Appendix M.

12.2 Uses as specifically Designated on Development Plan.

12.2.1 Where the use of a site is specifically designated on the Development Plan, it shall be used only for the purpose so designated.

- a) Provided that where a site is designated for one specific public purposes on the Development Plan, the Commissioner may use the structure existing or to be built thereon or permit the use of the structure in combination with other purposes provided the same is in conformity with these rules and the zone is in which the site falls;
- b) In the case of specific designation in Development Plan for schools and their Play-grounds or markets and service Industries and Commissioner may interchange their uses provided the designations are on adjoining or nearby building or premises;
- c) Construction of multi-storied garages may only be permitted on parking lots.

12.2.2 Uses to be in Conformity with the Zones - Where the use of buildings or premises is not specifically designated on the Development Plan, it shall be in conformity with the Zone in which they fall.

- a) Provided any lawful use of premises existing prior to the date of enforcement of these rule shall continue.
- b) provided that a non-conforming industrial use shall be as far as possible be shifted to conforming use Zone within 10 years from, the date of which the sanctioned revised Development Plan came into force.
- c) In case a building accommodating any non-confirming use collapses or pulled down or is destroyed any new building on the site shall conform to these regulations and to the land use prescribed for the plot/ land in development plan.

Provided further that non-confirming Cattle Stables and industries causing nuisance shall be shifted to a confirming area within such period as may be decided by the Municipal Commissioner.

12.2.3 Widths of Roads in the Development Plan - Notwithstanding anything contained in the Development Plan the Commissioner may from time to time prescribe, after following the procedure in the B. P. M. C. Act 1949, regular lines of streets wider than the prevailing Regular line of the respective street. Such regular lines of street will have the same effect or road lines in the Development Plan.

12.3 Other Stipulation

- 1) **General** - In every case of development/redevelopment of any land, building or premises the intended use shall conform to the use, zones purpose of designation, allocation or reservation as the case may be unless specified otherwise.
- 2) **Development of land partly designated/allocated/reserved** - Where building exists on a site shown as allocation, designation or reservation in the Development Plan only its appropriate part as used for such allocation, designation or reservation shall be used for the said purpose and the remaining part of the building or of the developed public land may be put to use in conformity with the purpose of development plan as otherwise permissible in the case of adjacent land use.
- 3) **Combination of public purpose used in reserved sites** - Where the corporation or the appropriate authority propose/ proposes to land/building premises reserved for one specific public purpose for different public purposes/purposes it may do so with the previous approval of the government provided that the combination of such second user conforms to these regulations and the permissible use in the zone in which the site falls provided that this shall not apply :-
 - a) to any site being developed for an educational or medical purposes or club/ gymkhana where in a branch of a bank may be allowed.
 - b) to any site being developed for medical purpose wherein shops of pharmacists or chemists may be permitted.
 - c) to any site encumbered by another non-educational user and being redeveloped for educational purpose in which case the existing non-educational uses may be allowed to continue without any increase in the net floor area covered by them.
 - d) to any site being developed for recreational use such as garden, playground, recreation ground, park etc. each measuring not less than 400 sq. mt. at one piece, wherein electric sub-station which may utilise not more than 10 percent of the site in which they are located is proposed.
- 4) **Shifting and/or inter-changing the purpose of designations/ reservation** - In the Development Plan, the Commissioner with the consent of interested person may shift, interchange the designation/reservation in the same or on adjoining lands/building to which an access is available or has to be provided and the same is not encumbered provided that the area of such designation/ reservation is not reduced.

12.3.1 Non-Conforming Uses - Where a non-conforming industry has been granted a written permission without a condition for its shifting to a conforming zone at the end of a specific period, additions thereto for the manufacture of new articles or for starting new process may be permitted by the authority (Commissioner) for only for the duration of the period allowed for shifting when :

- a) Such schemes or an integral part of and are directly connected with the process carried on in the existing unit.

- b) Such schemes of additions do not envisage more than 5% increase in the employment and do not result in increasing existing authorized floor space for the industrial user.
- c) Such addition is for preventing undue loss or for improving the working efficiency of the existing unit or for balancing the existing production units for the industry;
- d) Satisfactory means of access as required under these rules for industrial zones is provided and maintained; and
- e) Parking, loading and unloading space are provided according to these rules.

Before permitting any such additions, the Commissioner shall first satisfy himself that the degree of nuisance from the existing unit will in no way be increased by such additions.

12.3.2 Other (Non-Conforming Users Other than Industries and Cattle Stables) - Where non-conforming user existing prior to the date of enforcement of these rules is allowed to be continued in the Development Plan; any additions to such non-conforming use (other than those provided in 12.3.1) not exceeding the permissible floor area ratio/total permissible Built-up Area for the nonconforming user, whichever is less, may be permitted subject to the following terms and conditions, namely;

- a) The whole building is owned and occupied by one establishment only;
- b) The proposed additions are for preventing undue loss or for improving working efficiency.
- c) The additions and alternations are meant for the existing occupant and not proposed to be let out;
- d) Open spaces and parking spaces acquired under the Development Control Rules shall be provided.

DOD

13. OPEN SPACES, AREA AND HEIGHT LIMITATIONS

13.1 Exterior Open Spaces - The provisions for open spaces at the front; side and rear of the buildings, depending upon occupancy, plot size nature of development (namely row-housing, semi-detached and detached), width of road fronting the plot, the locality shall be as given in Appendix N.

13.1.1 Buildings shall be set back at least 3 m from internal means of access in a layout of buildings.

13.1.2 Building Abutting Two or More Streets - When a building abuts two or more streets, the set backs from the streets shall be such as if the building was fronting each such street.

13.1.3 Open Spaces and Height of Building - The open spaces at sides and rear shall be provided as per table 27.

13.1.3 (A) Manner of computing front open space/set back where the street is to be widened - If the building plot abuts any Road which is proposed to be widened under the Development Plan or regular lines of street under B. P. M. C. Act 1949 the front open space, road side setback shall be measured from the resulting line or the center line of the widened road as the case may be.

Where there is any conflict between the width provided in the Development Plan and the width resulting from the prescribed regular line of street under the B. P. M. C. Act 1949 the larger of the two shall prevail.

13.1.3 (B) Building with Length/Depth - Building with length / depth exceeding 40 meters, following rear and side margins shall be observed.

If the length or depth of the building exceeds 40 mtrs. then the side and rear margins required shall be increased as shown below.

Length/Depth in Meter	Marginal Distance which Ever is Higher
1) upto 40	3 m or $(H/2) - 3$ m
2) above 40 to 60	$(H/2) - 3$ m + 10%
3) above 60 to 75	$(H/2) - 3$ m + 20%
4) above 75 to 100	$(H/2) - 3$ m + 30%
6) above 100 to 300	$(H/2) - 3$ m + 40%

NOTE : $H/2 - 3$ means height divided by 2 and from which 3 m shall be deducted. Where length of the building exceeds 75 m at every 45 m an opening of 6 m width and 5 m height shall be maintained for circulation of traffic. This shall not be computed in F. S. I. and Parking. This provision shall not apply for industrial buildings.

13.1.4 Open Spaces Separate for each Building or Wing - The spaces between the two buildings or wings shall be minimum 7.50 m. which shall be free from any projections of balconies and terraces etc.

13.1.4.1 However, in case of single storeyed accessory buildings to residential buildings the separation between buildings shall be not less than 1.5 m.

13.1.4.2 Open space whether interior or exterior shall be kept free of any erection thereon and shall remain open to sky except features permissible under regulations.

13.1.5 Interior Open Space (Chowk)

13.2.1 Inner Chowk - One side of every room excepting bath, W. C. and store room and not abutting on either the front, rear or side (s) open spaces (see rule no.15.13.4) shall abut on an interior open space (courtyard inner chowk) whose minimum width shall be 3 m. Further such Inner Chowk shall have an area at all levels of chowk of not less than the square 115th the height of the highest wall abutting the chowk. Provided that when any room (excluding staircase bay) and bathrooms and water closet (see rule no.13.2.1.1) is dependent for its light and ventilation on an inner chowk, the dimension shall be such as is required for each wing of the building.

13.2.1.1 Where only water closet and bathroom are abutting on the interior open space, the size of the interior open space shall be in line with the provision for ventilation shaft as given in rule no.15.13.5.

13.2.2 Outer Chowk - The minimum width of outer chowk (as distinguished from its depth) shall be not less than 2.4 m. if the width of the outer chowk is less than 2.4 m. then it shall be treated as a notch and the provision of outer chowk shall not apply. However, if the depth of outer chowk is more than the width, the provisions of rule no.13.1.4 shall apply for the open spaces to be left between the wings.

13.3 Area and Height Limitations - The area and height limitations through covered area, height of buildings and number of storeys, tenement density. Floor Area Ratio for various occupancies, facing different road width shall be as given in Appendix m and regulation 13.5 hereinafter.

13.4 Exemption to Open Spaces/ Covered Area

13.4.1 Features Permitted in Open Spaces

a) **Projections into Open Spaces** - Every open space provided either in interior or exterior shall be kept free from any erection thereon and shall be open to sky and no cornice, chajja, roof or weather shade more than 0.75 m. wide shall overhang or project over the said open space so as to reduce the width to less than, the minimum required. However, sloping chajja provided over balcony / gallery etc. may be permitted to project 0.3 m. beyond balcony projection at an angle of 30 degree from horizontal level.

b) A canopy not exceeding 5 m in length and 2.5 m in width in the form of cantilever and unenclosed over the main entrance providing a minimum clear height of 2.1 m. below the canopy also be permitted in the open space. The canopy shall not have access from upper floors (above floors). There shall be a minimum clearance of 1.5 m between the plot boundaries and canopy.

- c) Balcony or balconies of a minimum width of 1.0 may be permitted free of F. S. I. at any floor, not more than 15% of the total F. S. I. and such balcony projection shall be subject to the following conditions :
- i) In non-congested area no balconies shall reduce the marginal open space to less than 3 m. In congested area balcony may be permitted on upper floors projecting in front set backs except over lanes having width 4.50 or less. No balcony shall be allowed on ground floor, which shall reduce, minimum required front set back or marginal open space. The width of the balcony will be measured perpendicular to the building line and measured from the balcony's outermost edge.
 - ii) Balconies may be allowed to be enclosed. When balconies are enclosed, one third of the area of their faces shall have louvers or glass shutters or grills on the top and rest of the area except the parapet shall have glazed shutters.
 - iii) The dividing wall for balconies up to 1.80 m. width between the balcony and the room may be permitted to be removed on payment of premium as decided by the Municipal Commissioner from time to time. The premium is non-refundable and non-transferable. However, if this is done without prior permission, double the amount of premium shall be levied by the Municipal Commissioner.
- d) Balcony like projections of maximum width of 2.4 m. projecting beyond the building line at alternate floors only may be allowed free of F. S. I. as a sitting out place. A premium for the same shall be charged as prescribed by the Municipal Commissioner from time to time.

In non-congested area, no such projection shall reduce the marginal open space to less than 3.00 m. the width of the same shall be measured perpendicular to the building line and measured from the outermost edge. These projections shall not be included in ground coverage calculations. However these shall not be closed in any case.

In congested areas balcony may be permitted on upper floors projecting in front set back and no balcony shall project over lanes and also shall not reduce the required minimum marginal open space.

13.4.2.1 Accessory Building - The following accessory buildings may be permitted in the marginal open spaces :

- a) In an existing building a single storeyed sanitary block subject to a maximum area of 4 sq. m. in the rear and side open space and at a distance of 7.5 m. from the road line or the front boundary or 1.5 m from other boundaries may be permitted where facilities are not adequate. The Authority may reduce the 1.5 m. margin in rare cases to avoid hardships;
- b) Parking lock up garage not exceeding 2.4 m. in height shall normally be permitted in the rear corner of the plot. Provided that in exceptional cases where such a location is not possible it may be permitted in the side or rear open spaces at a distance of 7.5 m. from any road line or the front boundary of the plot.

Parking lock up garage when attached to main building shall be 7.5 m. away from the road line and shall be of such construction giving fire resistance of 2 hours.

The areas of sanitary blocks and parking lock-up garages shall be taken into account for the calculation for F. A. R. and covered area calculations, subject to the provisions of rule no. 13.4.2 (g) except that the area of one garage per plot shall not be counted within the maximum ground coverage permissible.

- c) Suction tanks, Pump room, Electric meter room or sub-station, garbage shafts, space required for fire hydrants, electrical and water fittings, water tanks, dustbin etc.
- d) One watchman's booth not more than 3 sq. m. in area and not more than 1.2 m. in width or diameter (Not to be taken into account for the computation of F. S. I.).
- e) Suction tank, pump room and items under rule no. 13.4.2 (b).

13.4.2 In addition to Rule No. 13.4.2.1 (a), (b) and (c) and 15.6.3 the following shall not be included in covered area of F. A. R. and built up area calculations -

- a) A basement or stilt floor space constructed under a building and used as parking space.
- b) A basement constructed under a building and used as a residential common interest of flat buyers with no dividing wall in building having tenements only.
- c) A basement structure constructed under building and used as locker, safe deposit vault or a strong room of the bank situated in the same building with special permission in writing by the Municipal Commissioner.
- d) A basement constructed under a building and used for air-conditioning plant, meter room electric sub-station (use accessory to the principal use).
- e) Areas covered by stair case rooms for stair flights of width 0.75 m. and above in case of row housing, penthouses and duplexes 1.2 m. and above in case of residential, 1.5 m. and above in case of commercial/industrial/educational/institutional and special building subject to the premium to be decided by the Municipal Commissioner. However no premium shall be charged for Government, Semi-Government Offices.
- f) Lift-rooms, lift-wells or Architectural features, chimneys and elevated tanks of permissible area of fire escape stairways and lifts with cantilevered fire escape passages according to the Chief Fire Officer's requirements.
- g) In every residential building, constructed or proposed to be constructed for the use of a co-operative housing society or an apartment owners association, an office room will be permitted on the ground floor or floor 1. In an already developed property, it may be on an upper floor. The area of the room shall be limited to 12 sq. mt. If the number of tenements in the building does not exceed 20 and 20 sq. mt. otherwise.
- h) Area of sanitary blocks consisting of bathroom and water closet for each wing of each floor of a building of prescribed dimensions deriving access from a common passage as required for the use of domestic servants engaged in the premises.

- i) Area covered by - i) Lofts, ii) Meter Rooms, iii) Porches, iv) Canopies, v) Air Conditioning Plant Rooms, vi) Electric Substations, vii) Service Floors of height non-exceeding 1.5 mtr. with the special permission of the commissioner.
- j) Area of structures for an effluent treatment plan as required to be provided by industries as per requirements of the Maharashtra Pollution Control Board or other relevant authority.
- k) Areas covered by service ducts, pump rooms, electric sub-stations, niches upto 1 mtrs depth below window sill passages and additional amenity of lift and or staircase beyond those required under the regulations.
- l) Area of one milk booth under the public distribution systems with the permission of the Commissioner.
- m) Rookery well and well structures plant nursery, water pool, swimming pool (if uncovered) platform round a tree trunk fountain bench, chabutara with open top unclosed sides by wall, ramps, compound wall, gate, side swing overhead water tanks on the top of the building provided that the distance between terrace and soffit of tank is less than 1.50 meters.
- n) Area of one telephone booth and one telephone exchange (PB X) per building with the permission of the Commissioner.
- o) Area of one room for installation of telephone concentrators as per requirements of Manager Telephone Nigam Limited but not exceeding 20 sq. mtr. per building with the permissions of the Commissioner.
- p) Area of a separate letter box on the ground floor of residential and commercial buildings with 5 or more storeys to the satisfaction of Commissioner.
- q) Area of a covered passage of clear width not more than 1.52 mtr. leading from a lift exit at a terrace level to the existing stair case so as to enable descent to the lower floors in a building to reach tenements not having direct access to a new lift in building without an existing lift.
- r) Area of one fitness center for a Co-Op. Housing Society or Apartment owners Association as provided in regulation no. M. 1. 1 (17).

13.5 The height and number of storeyes shall be governed by the provisions of Appendix N and the following clauses :

- a) (i) In the case of gaathan / congested plots abutting roads upto (20') 6 m. width, the maximum height of building shall not exceed the sum of 1.5 times the width of the road plus the front marginal open space within the premises.
- (ii) In the case of gaathan / congested plots abutting on roads of width between 6 m. -10 m. (20' - 30') the maximum height of the building shall be 10 m. (30') plus front marginal open space within the premises.

(iii) In the case of gaothan / congested plots abutting on other roads, the maximum height of building shall not exceed the sum of the width of the road plus front marginal open space within the premises.

(iv) In the case of non-gaothan / non-congested plots the maximum height of buildings shall not in any case exceed 18 meters.

b) Not-with standing any thing contained in sub-rule (a) (i) to (iv) above, for buildings in the vicinity of aerodromes, the maximum height of such buildings shall not exceed 12 m. of values framed by the Civil Aviation Authorities excepting that within 0.9 km of the Air Port references point no building shall be permitted.

c) In addition to (b) for Industrial chimneys coming in the air port zone, it shall be of such height and character as prescribed by Civil Aviation Authorities and all industrial chimneys shall be of such character as prescribed by the Chief Inspector of Steam Boilers and Smoke Nuisance.

13.5.1 (i) For the purpose of Rule No.13.5 (a) the width of the street may be prescribed width of the street, provided the height of the building does not exceed twice the width of the existing street plus the width of the open space between the existing street and the building ($2w + \text{open space}$).

(ii) Further to provisions of (i) the width of the open space between the street and the building shall be calculated by dividing the area of land between the street and the building by the length of the front face of the building.

13.5.2 Height Exemptions - The following appurtenant structures shall not be included in the height of the building.

Roof tanks and their supports, ventilating, air-conditioning, lift rooms and similar service equipment's stair cover, chimneys and parapet walls and architectural features not exceeding 1 m. in height.

ODD

14. PARKING LOADING AND UNLOADING SPACES

- 14.1 Each off-street parking space provided for Motor Vehicles shall not be less than 2 - 5 m. x 5 m. areas and for scooters and cycles the parking spaces provided shall not be less than 3 sq. m. and 1.4 sq. m. respectively.
- 14.2 For buildings of different occupancies off street space for vehicles shall be provided as given in 14.2.1 **The provision for parking of vehicles shall be as given in table 6.**

Table No. 6 : OFF STREET PARKING SPACE

Sr. No.	Occupancy	One Parking Space for Every	Non-Congested Area			Congested Area			
			Car Nos.	Scooter Nos.	Cycle Nos.	Car Nos.	Scooter Nos.	Cycle Nos.	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	
1)	Residential i) Multi - Family residential & above	a) 1 Tenement having carpet area 150 sq. mt.	2	2	2	2	2	2	
		b) 1 tenement having carpet area 80 sq. mt. to 150 sq. mt.	1	2	2	1	2	2	
		c) 2 tenement having carpet area upto 80sq.mt.	1	4	4	1	2	2	
	ii) Lodging establishments, tourist homes	Every five guest rooms	3	4	4	3	4	4	
	iii) 4 & 5 star/hotels	Every five guest rooms	3	6	4	3	6	4	
	iv) Restaurants grade I, II, III	For every 80 sq. mt. & part of there of	2	8	4	0	8	8	
2)	Hospital, Medical Institutions	Every 20 Beds	3	10	20	3	10	20	
3)	Assembly a) Theaters Concert, Houses, Concert Halls	Every 40 Seats	3	10	10	3	10	10	
		b) Mangal Karayalaya Community Hall	For Every 100 sq. m. area & part thereof	3	12	4	3	12	4
		c) Community Hall & Club House (in Layout Open Space)	For Every 100 sq. m. area	1	4	2	1	4	2

(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
4)	Educational a) School	per 100 sq. mt. or part thereof of the built up area	1	2	8	1	2	8
	b) College	per 100 sq. mt. or there of the built up area	2	20	10	2	20	10
5)	Government or Semi-Public or Buildings	per 100 sq. mt. or part there of built up area	2	10	4	2	10	4
6)	a) Mercantile (Shop/ Offices)	per 100 sq. mt. or part there of built up area	2	6	2	2	4	4
	b) Industrial	per 300 sq. m. or fraction there of	2	12	8	2	12	4
	c) Storage Type		1	4	8	1	2	4
7)	Plots Less than 200sq.mt.	—	0	2	4	0	2	4
	Plots Less than 100sq.mt.	—	0	1	2	0	1	2

Note : In case where proportionate No. of Vehicles in less than one i.e fraction, will be rounded to next whole no.

ODD

Note 1 : Not more than 50% of the rear and side marginal open spaces only (excluding entire front open space) may be permitted to be used for offstreet parking as above, the balance of the parking provision if required, would have to be under stilts, basement, lock up garages or areas beyond the marginal open spaces, provided that in the case of cinemas and similar assembly buildings at entry 3 above, the parking spaces shall be totally clear of minimum marginal open space except that one row of car parking may be allowed in the front open space without reducing the clear vehicular access way to less than 6 m.

Note 2 : In the case of auditoria, for educational buildings parking space shall be as per serial no. 4.

- 14.3** Offstreet parking space shall be provided with adequate vehicular access to a street; and the area of drives, aisles and such other provisions required for adequate manouvering of vehicle shall be exclusive of the parking space stipulated in these rules.
- 14.4** If the total parking space required by these Rules is provided by a group of property owners for their mutual benefit, such use of this space may be construed as meeting the off-street parking requirement under these Rules subject to the approval of the Authority. In such cases, the details of requirements for total development should be submitted, if a common parking space is proposed for the group of buildings and the owners of such buildings shall submit the layout showing such reservation, of parking space and also a registered undertaking that the area earmarked for the parking space will be kept unbuilt and will be developed as a parking lot.
- 14.5** In addition to the parking spaces provided, for building of - a) Mercantiles, b) Wholesale establishment, c) Hazardous and d) Industrial storage, loading and unloading spaces shall be provided at the rate of one space for each 1000 sq. m. of floor area of fraction thereof exceeding the first 200 sq. m. of floor area. Each such loading and unloading space shall not be less than 3.75 m. x 7.5 m.
- 14.6** In the case of parking spaces provided in basements, at least two ramps of adequate width and slope (See Rule No. 17) shall be provided, located preferably at opposite ends.
- 14.7 Podium Parking :**
- a) The ground coverage shall be measured the level from where the use commences.
 - b) Front margin shall be maintained as per the D. C. Rules.
 - c) Distance between podium floor and plot boundary shall be minimum 1.50 m. podium floor shall not be allowed in front marginal open space.
 - d) Podium floor shall be used exclusively for parking purpose. Height of podium shall be 2.40 m. upto beam bottom from ground level.
 - e) Marginal distances shall be measured excluding a distance of 1.5 m. from plot boundary (from podium roof).
 - f) Podium slab and its ramp shall be designed for load of fire engine and other heavy vehicles.
 - g) Podium shall be allowed for plots having area 2000 sq. m. and above for non congested area and 200 sq. m. and above for congested area.

14.8 Parking:

For parking of vehicles ofhandicapped people, the following provisions shall be made in addition to the existing requirements for all public buildings and facilities used by the public.

- a) Surface parking for two car spaces shall be provided near entrance for the physically handicapped persons with maximum travel distance of 30 mt. from building entrance.
- b) The width of parking bay shall be minimum 3.60 mt.
- c) The information stating that the space is reserved for wheel chair users shall be conspicuously displayed.
- d) Guiding floor, materials shall be provided or a device which guides visually impaired persons with audible signals or other devices which serves the same purpose shall be provided.

ODD

15. PLINTH

15.1 Main Buildings - The minimum height of plinth for any buildings shall be 45 cm provided that in the case of special housing schemes for L. I. G. & E.W. S. Housing the plinth height may be allowed to be reduced to 30 cm.

15.1.1 Approach to Plinth Level - The following provisions shall be made in addition to the existing requirements for physically handicapped persons for all public buildings and facilities used by the public.

Every building shall have at least one entrance accessible to the handicapped and shall be indicated by proper signage. This entrance shall be approached through a ramp together with the stepped entry.

- a) **Ramped Approach** : Ramp shall be finished with no slip material to enter the building. Minimum width of ramp shall be 1800 mm. with maximum, gradient 1: 12. Length of ramp shall not exceed 9.0 mt. having 800 mm. high hand rail on both sides extending 300 mm. beyond top and bottom of the ramp. Minimum gap from the adjacent wall to the hand rail shall be 50 mm.
- b) **Stepped Approach** : For stepped approach size of-tread shall not be less than 300 mm. and maximum riser shall be 150 mm- Provision of 800 min. high hand rail on both sides of the stepped approach similar to the ramped approach shall be made. In the buildings meant for the predominant use of the children, it will be necessary to suitably alter the height of the handrail and other fittings and fixtures, etc.
- c) **Exit / Entrance Door** : Minimum clear opening of the entrance door shall be 900 mm. and it shall not be provided with a step that obstructs the passage of wheel chair user. Threshold shall not be raised more than 12 mm.
- d) **Entrance Landing** : Entrance landing shall be provided adjacent to ramp with the minimum dimension 1800 mm x 2000 mm. The entrance landing that adjoin the top end of a slope shall be provided with floor materials to attract the attention of visually impaired persons (limited to coloured floor material whose colour and rightness is conspicuously different from that of the surrounding floor material or the material that emit different sound to guide visually impaired persons (hereinafter referred to as 'guiding, floor material') (Appendix-U for explanatory notes). Finishes shall have a non slip surface with, a texture traversable by a wheel chair. Curbs wherever provided; should blend to a common level.

15.2 Habitable Rooms

15.2.1 Size - N habitable room shall have a floor area of less than 9.3 sq. m. except those in the hostels attached to recognized educational institutions wherein the minimum size of a habitable room for the residence of a single person shall be 7.5 sq. m. The minimum width of a habitable room shall be 2.4 m. One full side of a habitable room in which windows of minimum light and ventilation are provided shall abut on the required open space. In a two roomed tenement one room shall not be less than 4.3 sq. m. and other 7.5 sq. m.

15.2.1.1 In the case of Special Housing Scheme for Low Income Group, Economically Weaker Section of Society, the size of single room tenement shall be not less than 12.5 sq. m. with a minimum width of 2.4 m.

15.2.2 Height - The height of any room for human habitation including that of kitchen shall not be less than 2.75 m measured from the surface of the floor to the lowest point of the ceiling (bottom of slab). In case of centrally air-conditioned building height of the habitable room shall not be less than 2.4 m measured from the surface of the floor to the underside of the slab or to the underside of the false ceiling. The minimum clear head room under beam shall be 2.4 m.

15.2.2.1 In the case of pitched roof the average height shall not be less than 2.75 m and the minimum height at above level shall not be less than 2.1 m.

15.2.2.2 However, the maximum room height shall be 4.2 m, in case of all buildings excepting Residential Hotels of the category of 3 star and above. Assembly, Institutional, Educational, Industrial, Hazardous and Storage occupancies and in case of portions common to two floors of duplex flats.

Duplex flats shall mean Residential flat divided on two floors .with an internal stair case connecting the two floors.

15.3 Kitchen

15.3.1.1 Size -The area of the kitchen shall be not less than 5.5 sq.m. with a minimum width of 1.8 m. A kitchen width is also intended for use as a dinning room shall have a floor area not less than 9.5 sq. m. with a minimum width of 2.4 m.

15.3.1.2 In the case of Special Housing Scheme as given in rule no. 15.2.1.1 provision for kitchen may not be insisted. In case of double room tenements, the size of kitchen shall be not less than 5.5 sq. m. with a minimum width of 1.5 m. Where alcoves (cooking space having direct access from the main room without any intercommunicating door) are provided, the size shall not be less than 3 sq. m. with a minimum width of 1.5 m.

15.3.2 Other Requirements- Every room to be used as kitchen shall have:

- a) Unless separately provided, means for washing of kitchen utensils which shall load directly or through a sink to grated and trapped connection to the waste pipe;
- b) Window of not less than 1 sq. m, in area, opening directly on to an interior or exterior open space ; but not into a shaft (See Rule No. 15.13.5) and
- c) In case of multi-storeyed residential building more than 15 mt in height, refuse chutes.

15.4 Bath Room and Water Closets :

15.4.1 Size - The size of a bathroom shall be not less than 1.8 sq. mt with a minimum width of 1.2 mt. The minimum size of a water-closet shall be 1.1 sq. mt. with minimum width of 0.9 mt. If it is a combined bathroom and water closet the minimum area shall be 2.6 sq. m. with a minimum size of 1.2 mt.

15.4.1.1 In case of special Housing scheme given in Rule No. 15.2.1.1 the minimum size of bath rooms / water closets shall be as follows :

- a) Independent Water Closet - 1.1 x 0.9 mt
- b) Independent bath Rooms - 1.3 x 1.1 mt
- c) Combined bath room and water closet 2.0 sq. mt. with minimum width of 1.1 mt.

15.4.2 Height - The height of bath room or water closet measured from the surface of the floor to the lowest point in the ceiling (bottom of slab) shall be not less than 2.2 mt.

15.4.3 Other Requirements - Every bath room or water closet shall:

- a) be so situated that at least one of its walls shall open to external air with the size of opening (windows, ventilators, louvers) not less than 0.3 sq. m. in area and side not less than 0.3 (See Rule No. 15.13.4);
- b) not be directly over any room other than another water-closet, washing place, bath or terrace;
- c) have the platform or seat made of water-tight non-absorbent material;
- d) be enclosed by walls or partitions and the surface of every such wall or partition shall be finished with a smooth impervious material to a height of not less than 1 m above the floor or such a room; and
- e) be provided with an impervious floor covering sloping towards the drain with a suitable grade and not towards verandah or any other room.

15.4.4 No room containing water closets shall be used for any purpose except as a lavatory and no such room shall open directly into any kitchen or cooking space by a door, window or other opening. Every room containing water closet shall have a door completely closing the entrance to it.

15.4.5 Toilets - One special W. C. in a set of toilet shall be provided for the use of handicapped with essential provision of wash basin near the entrance for the handicapped for the public building and facilities used by the public :

- a) The minimum size shall be 1500 mm. × 1750 mm.
- b) Minimum clear opening of the door shall be 900 mm. and the door shall swing out;
- c) Suitable arrangement of vertical / horizontal handrails with 50 mm. clearance from wall shall be made in the toilets.;
- d) The W. C. seat shall be 500 mm. from the floor.

15.5 Loft - The maximum height of a loft shall 1.5m and the loft may be provided over residential kitchens, bath rooms, corridors and over shop floors, built up to an area of 25 percent over kitchens and full space of bath rooms, water closets and corridors, In shops with width upto 3 m lofts of 33.33% of the covered area may be provided. In shops with width above 3 m loft to 50 % of the covered area may be provided. The clear headroom under the loft shall not be less than 2.2 m.

15.6 Ledge or Tand

15.6.1 Size - A Ledge or Tand in habitable room shall not cover more than 25 percent of the area of the floor on which it is constructed and shall not interfere with the ventilation of the room under any circumstances;

15.6.2 Height- The clear headroom below the ledge shall not be less than 2.2 m.

15.6.3 The projections (cantilever) of cup-boards and shelves may be permitted and would be exempted from covered area calculations. Such projections may project upto 23 cm in the set backs for residential buildings provided the width of such cupboard/ shelves does not exceed 2.4 m and there is not more than one such cupboard/ shelf in each room.

15.7 Mezzanine Floor

15.7.1 Size - The aggregate area of the mezzanine floor shall not exceed 50% of the built up area of that floor. The minimum size of a mezzanine floor if it is used as a living room not be less than 9.5m

NOTE - Mezzanine floor area shall be counted towards FAR.

15.7.2 Height - The minimum height of a mezzanine floor shall be 2.2 m The head room under mezzanine floor shall not be less than 2.2 m (see rule no.15 .2.2.2).

15.7.3 Other Requirements - A mezzanine floor may be permitted provided that:

- a) it conforms to the standards of living room as regards lighting and ventilation in case the size of mezzanine floor is 9.5 m or more;
- b) It is so constructed as not to interfere under any circumstances with the ventilation of the space over and under it;
- c) Such mezzanine floor or any part of it shall be used as kitchen; and
- d) In no case a mezzanine floor shall be closed so as to make it liable to be converted into unventilated compartments.

15.8 Store Room

15.8.1 Size - The area of a store room in residential buildings, where light, ventilation and height are provided at special standards lower than as required for living rooms shall not be more than 3 sq. m.

15.8.2 Height - The height of a store room shall be less than 2.2 m.

15.9 Garage

- 15.9.1** The area of parking lock up garage shall be included in FAR calculations, however, the built-up area of one garage per residential plot or one garage per plot area of 500 sq. m. (5000 sq. ft.) in other zones shall not be taken into consideration for the purposes of calculating maximum allowable ground coverage.
- 15.9.2 Garage Public** - Parking places in public buildings open from all sides and having only roofs top shall be exempt both from built-up area and FAR calculations .
- 15.9.3 Garage Private** - The size of a private garage in residential buildings shall be not less than 2.5 m x 5 m and not more than 3 m x 6 m. The garage if located in the side open space shall not be constructed within 1.5 m from the main buildings (see rule 13.4.2.1).
- 15.9.4**
- a) **Height**- The maximum head room in a garage and parking area shall be 2.4 m.
 - b) The plinth of garage located at ground level shall not be less than 15 cm above the surrounding ground level.
- 15.9.5** The garage shall be set back behind the building line for the street/ road on to which the plot abut and shall not be located affecting the access ways to the building.
- 15.9.5.1 Corner Site** - When the site front on two streets, the frontage would be as on the street having the larger width. In cases where the two streets are of the same width, then the larger depth of the site will decide the frontage and open space. In such cases the location of a garage (in a corner plot) if provided within the open spaces shall be located diagonally opposite the point of intersections)

15.10 Roofs

- 15.10.1** The roof of a building shall be so constructed or framed as to permit effectual drainage of the rain-water therefrom by means of sufficient rain-water pipes of adequate size, wherever required, so arranged, jointed and fixed as to ensure that the rain-water is carried away from the building without causing dampness in any part of the walls or foundations of the building or those of an adjacent buildings.
- 15.10.2** The authority may require rain water pipes to be connected to a drain or sewer through a covered channel formed beneath the public footpath or in any other approved manner.
- 15.10.3** Terrace of buildings shall not be sub-divided and it shall have only common access.

15.11 Basement

- 15.11.1** The construction of the basement shall be allowed by the authority in accordance with the land use and other provisions specified under the Development Control Rules.
- 15.11.1.1** No basement shall be constructed within the prescribed set backs and the prescribed building lines and shall not exceed in area or the maximum permissible ground coverage of the building. Basement shall not be allowed if the Municipal Commissioner is of the opinion that the area is likely to be affected by flood.

15.11.1.2 Basement shall be allowed only for the following uses :

- a) Air Conditioning equipment and Air handling units, generator set room for the same building;
- b) Parking Spaces;
- c) Strong Room, Bank Cellars etc.

15.11.1.3 The basement shall not be used for residential purpose.

15.11.2 The basement shall have the following requirements :

- a) every basement shall be in every part at least 2.4 m in height from the floor to the underside of the roofslab or ceiling;
- b) adequate ventilation shall be provided for the basement. The standard of ventilation shall be the same as required by the particular occupancy according to Rules. Any deficiency may be met by providing adequate mechanical ventilation in the form of blowers, exhaust fans, air-conditioning system etc.
- c) the minimum height of the ceiling or any basement shall be 0.9 m and maximum of 1.2 m above the average surrounding ground level.
- d) adequate arrangements shall be made such that surface drainage does not enter the basement;
- e) the walls and floors of the basement shall be water-tight and be so designed that the effect of the surrounding soil and moisture, if any, are taken into account in design and adequate damp proofing treatment is given; and
- f) the access to the basement shall be separate from the main and alternate staircase providing access and exit from higher floors. Where the staircase is continuous in case of building served by more than one staircase the same shall be of enclosed type serving as a fire separation from the basement floor and higher floors (See Rule No.17.4.3 (p)) Open ramps shall be permitted if they are constructed within the building line subject to the provision of (d).

15.12 Chimneys

15.12.1 Chimneys, where provided shall conform the requirements of IS: 145-1960.

15.12.2 Notwithstanding the provisions of rule no. 15.3.1 the chimneys shall be built at least 0.9 m above flat roofs provided the top of the chimney shall not be below the roofs provided the top of the chimney shall not be below the tops of adjacent parapet wall, in the case of sloping roofs, the chimney top shall not be less than 0.6 m above the ridge of the roof in which the chimney penetrates.

15.13 Lighting and Ventilation of Rooms

15.13.1 Lighting and Ventilation of Rooms : All habitable rooms including kitchen shall have, for the admission of light and air. one or more apparatuses, such as windows and fan lights, opening directly to the external air, or into an open verandah, not more than 2.4m in width.

15.13.2 Where the lighting and ventilation requirements are not met through day lighting and natural ventilation the same shall be ensured through artificial lighting and mechanical ventilation as per latest version of Part VIII Building Services Section / Lighting and Ventilation on National Building Code of India published by the Indian Standards Institution.

In the case of special types of buildings requiring artificial lighting and air-conditioning for special types of manufacturing or other process the requirements about natural day lighting and ventilation may be relaxed.

15.13.3 The minimum aggregate area of openings of habitable rooms and kitchens excluding doors, shall be not less than 1/8 of floor area.

15.13.4 No portion of a room shall be assumed to be lighted if it is more than 7.5 m from the opening assumed for lighting that portion.

15.13.5 Ventilation Shaft - For ventilating the space for water closures and bath room, if not opening on the front side, rear and interior open spaces, shall open on to the ventilation shaft, the size of which shall not be less than the values given below :

Height of Building 1m	Minimum Area of Ventilation Shaft in sq. m.	Minimum Side of Shaft in m
Upto 12	3.0	1.5
18	4.5	1.8
24	6.0	2.4
30	9.0	3.0
50	16.0	4.0
Above 50	25.0	5.0

Note : For building above 50m. mechanical ventilation system shall be installed besides the provisions of minimum ventilation shaft.

15.13.5.1 In the residential lodging hotels, where attached toilets are provided with mechanical ventilation system installed as per rule no.15.13.2, the size of the ventilation shaft may be relaxed by the Authority.

15.14 Parapet- Parapet walls and handrails provided on the edges of roof terraces, balcony etc. shall not be less than 1.05 m and not more than 1.20 m in height.

15.15 Cabin - The size of a cabin shall not be less than 3.0 sq. m. The clear passages within the divided space of any floor shall not be less than 0.75 m. and the distance from the farthest space in a cabin to any exit shall not be more than 18.5 m. In case the sub-divided cabin does not derive direct lighting and ventilation from any open space / mechanical means, the maximum height of the cabin shall be 2.2 m.

15.16 Wells - Wells, intended to supply water for human consumption or domestic purposes, where provided shall comply with the requirement of rule no. 15.16.1 and 15.16.2.

15.16.1 Location - The well shall be located:

- a) not less than 15 m from any ash pit, refuse pit, earth closet or privy and shall be located on a site upwards from the earth closet or privy;
- b) not less than 18 m from any cesspit, soakway or borehole latrine and shall be located on a site upwards from the earth closet or privy;
- c) that contamination by the movement of sub-soil or other water is unlikely; and
- d) not under a tree unless it has a canopy over it so that leaves and twigs do not fall into the well and rot.

15.16.2 Requirements - The well other than a bore well or a tube well shall:

- a) have a minimum internal diameter of not less than 1 m.;
- b) be constructed to a height not less than 1 m above the surrounding ground level to form a parapet or kerb to prevent surface water from flowing into a well and shall be surrounded with a paving constructed of impervious material which shall extend for a distance of not less than 1.8 m in every direction from the parapet or the kerb forming the well head and the upper surface of such a paving shall be sloped away from the well;
- c) be of sound and permanent construction (PUCCA) throughout, temporary or exposed (KUTCHA) wells shall only be permitted in fields or gardens for purpose of irrigation; and
- d) the interior surface of the lining or walls of the well shall be rendered, impervious for a depth of not less than 1.8 m measured from the level of the ground immediately adjoining the well head.

15.17 Septic Tanks - Where a septic tank is used for sewage disposal, the location, design and construction of the septic tank shall conform to requirements of 15.17.1 and 15.17.2

15.17.1 Location of Septic Tanks and Subsurface Absorption Systems : A subsoil dispersion system shall not be closer than 18 m from any source of drinking water, such as well, to mitigate the possibility of bacterial pollution of water supply. It shall also be as far removed from the nearest habitable building as economically possible but not closer than 6 m, to avoid damage to the structure.

15.17.2 Requirements:

- a) **Dimensions of Septic Tanks** - Septic Tanks shall have minimum width of 0.75 m minimum depth of one meter below water level and a minimum liquid capacity of one cubic meter, length of tanks shall be 2 to 4 times the width;
- b) Septic tanks may be constructed of brickwork, stone masonry, concrete or other suitable material as approved by the authority;
- c) Under no circumstances should effluent from a septic tank be allowed into an open channel, drain or body of water without adequate treatment;

- d) Minimum nominal diameter of pipe shall be 100 mm. Further, at junctions of pipes in manholes, direction of flow from a branch connection should not make an angle exceeding 45 degree with the direction of flow in the main pipe;
- e) The gradients of land drains, under drainage as well as the bottom of dispersion trenches and soak ways should be between 1 : 300 and 1 : 400;
- f) Every septic tank shall be provided with ventilating pipe of at least 50 mm diameter. The top of the pipe shall be provided with a suitable cage of mosquito proof wire mesh.

The ventilation pipe shall extend to a height, which would cause no smell nuisance to any building in the area. Generally, the ventilating pipe may extend to a height of about 2 m when the septic tank is at least 15 m away from the nearest building and to a height of 2 m above the top of the building when it is located closer than 15 meters;

- g) When the disposal of septic tank effluent is to seepage pit, the seepage pit may be of any suitable shape with the least cross sectional dimension of 90 cm and not less than 100 cm in depth below the invert level of the inlet pipe. The pit may be lined with stone, brick or concrete blocks with dry open joints which should be backed with at least 7.5 cm of clean coarse aggregate. The lining above the inlet level should be finished with mortar. In the case of pits of large dimensions, the top portion may be narrowed to reduce the size of the RCC cover slabs. Where no lining is used, specifically near trees, the entire pit should be filled with loose stones. A masonry ring may be constructed at the top of the pit to prevent damage by flooding of the pit by the surface run off. The inlet pipe may be taken down a depth of 90 cm from the top as an anti-mosquito measure; and
- h) When the disposal of septic tank effluent is to a dispersion trench, the dispersion trench shall be 50 to 100 cm deep and 30 to 100 cm wide excavated to a slight gradient and shall be provided with 15 to 25 cm of washed gravel or crushed stones. Open jointed pipes placed inside the trench shall be made of unglazed earthenware, clay to concrete and shall have minimum internal diameter of 75 to 100 mm. No dispersion trench should be longer than 30 m and trenches should not be placed closer than 1.8 m.

15.18 Boundary Wall/ Compound Wall:

- a) Except with the special permission of the Authority the maximum height of the compound wall shall be 1.5 m above the centerline of the front street. Compound wall up to 2.4 m height may be permitted if the top 0.9 m is of open type construction of a design to be 2.4m – 0.9 m = 1.5 meter approved by the authority.
- b) In case of a corner plot the height of the boundary wall shall be restricted to 0.75 m for a length of 10m on the front and side of the intersection and balance height of 0.75m, if required in accordance with (a) may be made up of open type construction (through railings) and of design to be approved by the authority and

- c) the provisions of (a) and (b) are not applicable to boundary walls of jails, industrial buildings, electric sub-stations, transformer stations, institutional buildings like sanatoria, hospitals, industrial buildings like workshops, factories and educational buildings like schools, colleges, including the hostels and other uses of public utility undertakings height more than 2.4 m may be permitted by the authority.
- d) Compound gate should open entirely inside the property and shall not open any access/pathway/road/ street.

15.19 Office-cum-Letter Box Room - In the case of multistoried multifamily dwelling apartments constructed by existing and proposed Co-operative Housing Society or Apartment Owners Association, limited companies and proposed societies, an office-cum-letter box room of maximum dimension 2 m x 3 m shall be provided on the ground floor or under stilts.

15.20 Meter Rooms - For buildings identified in Rule No. 6.2.6.1. (m) provision shall be made for an independent and ventilated meter (service) rooms, as per requirements of electrical (service) supply undertakings on the ground floor with direct access from outside for the purpose of termination of electrical supply from the licenses service and alternate supply cables. The door/ doors provided for the service room shall have fire resistance of not less than two (2) hours.

15.21 Recycling of Waste Water - Installation of system of recycling of waste water from bathrooms & kitchen sinks (excluding water closet) is mandatory in building layouts having net plot area (excluding area under D. P. Reservations, D. P. Roads / Road widening) of 4000 sq. m. & above. The recycling system shall be installed as per the norms & specifications decided by the Municipal Commissioner from time to time. The treated water may be used for gardening & for all purpose other than drinking.

DOD

16. PROVISION OF LIFTS

16.1 Provisions of lifts shall be made for all buildings more than 16 m in height (See Rule No. 23.2). Provided however that the lift shall be provided in public hospital buildings exceeding 8 m in height.

16.2 **Lifts** - Wherever lift is required as per existing provisions in addition to that for the public buildings and facilities, used by the public, provision of at least one lift shall be made for physically handicapped persons for the wheel chair user with the following cage dimensions of lift recommended for passenger lift of 13 person capacity of - Bureau of Indian Standards.

Clear Internal Depth : 1100 mm.

Clear Internal Width : 2000 mm.

Entrance Door Width : 900 mm.

- a) A hand rail not less than 600 mm. long at 1000 mm. above floor level shall be fixed adjacent to the control panel. In the building meant for the predominant use of children, it will be necessary to suitably alter the height of the handrail, fittings and fixtures etc.
- b) The lift lobby shall be of an inside measurement of 1800 mm. or more.
- c) The time of an automatically closing door should be minimum 5 second and the closing speed should not exceed 0.25 m/sec.
- d) The interior of the cage shall be provided with a device that audibly indicates the floor the cage has reached indicating that the door of the cage for entrance / exit is either open or closed.

16.3 In the case of building more than 24.0 m. height at least two lifts shall be provided for every dwelling except those situated on the ground and first floor without having to climb or to go down more than one floor.

16.4 In multi storied and high rise building more than 36 m. in height, one of the lift installed shall be where in one dimension is of 2.5 m. length so as to accommodate a stretcher in case of emergency.

□□□

17. EXIT REQUIREMENTS:

17.1 **General-** The following general requirements shall apply to exists :

- a) Every building meant for human occupancy shall be provided with exits sufficient to permit safe escape of occupants in case of fire or other emergency.
- b) In every building exits shall comply with the minimum requirements of this part except those not accessible for general public use.
- c) All exit way shall be free of obstructions.
- d) No building shall be altered so as to reduce the number width or protection of exits to less than that required.
- e) Exits shall be clearly visible and the routes to reach the exits shall be clearly marked and sign posted to guide the population to floor concerned.
- f) All exit ways shall be properly illuminated.
- g) Firefighting equipment where provided along exits shall be suitably located and clearly marked but must not obstruct the exit way and yet there should be clear indication about its location from either side of the exit way.
- h) Alarm devices shall be installed for buildings above 15 m. in height (See Rule No. P-11) to ensure prompt evacuation of the population concerned through the exits.
- i) All exits shall provide continuous means of access to the exterior of a building or to an exterior open space leading to a street and
- j) Exits shall be so arranged that they may be reached without having to pass through another occupied unit, except in the case of residential buildings.
- k) In multi storied high rise and special buildings access to main stair case shall be gained through at least half an hour fire resisting automatic closing doors, placed in the enclosing walls of the staircases they shall be swing type doors opening in the direction of the escape.
- l) In multi storied high rise and special buildings exit signs with arrows indicating the escape route shall be provided at height of 1.5 m. from the floor level on the wall and shall be painted with fluorescent paint. All exit way signs should be flush with the wall and so designed that no mechanical damage to them can result from the moving of furniture or other heavy equipment.

17.2 **Type of Exits:**

- a) Exits shall be either of horizontal or vertical type. An exit may be doorway, corridor, passageway, to an internal staircase or external staircase, ramps or verandah and/ or terrace which have access to the street or to the roof of a building. An exit may also include a horizontal exit leading to an adjoining building at the same level; and
- b) Lifts and escalators shall not be considered as exits.

17.3 **Number and Size of Exits -** The requisite number and size of various exits shall be provided, based on the population in each room area and floor based on the occupant load capacity of exits, travel distance and height of buildings as per provisions of rule no. 17.3.1 to 17.3.3.

17.3.1 Arrangement of Exits - Exit shall be so located so that the total travel distance on the floor shall not exceed 22.5 m for residential, educational, institutional and hazardous occupancies and 30 m for assembly, business mercantile, industrial and storage occupancies. Whenever more than one exit is required for a floor of a building, exit shall be placed as remote from each other as possible. All the exits shall be accessible from the entire floor area at all floor levels.

17.3.2 Occupant Load - The population in rooms, area of doors shall be calculated based on the occupant load given in table 8.

17.3.3 Capacity of Exits - The capacity of exits (doors and stairways) indicating the number of persons that could be safely evacuated through a unit exit width of 50 cm shall be as given in Table 9.

17.3.4 For all buildings identified in rule no. 6.2.6.1, there shall be minimum of two staircases. They shall be of enclosed type stairways. At least one of them shall be on the external wall of building and shall open directly to the exterior, interior open space or to any open place of safety.

17.3.5 Staircase shall be of the following minimum width:

a) Residential Buildings (Dwellings) 1.0m.

NOTE - For Duplexes, pent houses and row houses with 2 storeys the minimum width shall be 0.75 m.

b) Residential Hotel Buildings 1.5m.

c) Assembly Building like auditoria theaters and cinemas 1.5m.

d) Educational Buildings 1.5m.

1) Not Exceeding 24 m.

TABLE NO. 8
OCCUPANTS LOAD

Sr. No. (1)	Group of Occupancy (2)	Occupant Load* Gross Area in m ² / Person (3)
1.	Residential	12.5
2.	Educational	4
3.	Institutional	15+
4.	Assembly:	
	(a) with fixed or loose seats and dance floors	0.6++
	(b) without seating facilities including dining rooms	1.5++
5.	Mercantile:	
	(a) street floor and sales basement	3
	(b) upper sale floors	6
6.	Business and Industrial	10
7.	Storage	30
8.	Hazardous	10

* The gross area shall mean plinth area of covered area.

+ Occupant load in dormitory portions or homes for the aged, orphanages, insane, asylums, etc., where sleeping accommodation is provided, shall be calculated at not less than 7.5 m² gross area/ person.

++ The gross area shall include, in addition to the main assembly room or space, any occupied connecting room or space in the same storey or in the storeys above or below, where entrance is common to such rooms and spaces and they are available for use by the occupants of the assembly place. No deductions shall be made in the gross for corridors closets or other sub-divisions; the area shall include all spaces serving the particular assembly occupancy.

TABLE 9
Occupants Per Unit Exit Width

Sr. No. (1)	Group of Occupancy (2)	Numbers of Occupants	
		Stairways (3)	Doors (4)
1.	Residential	25	75
2.	Educational	25	75
3.	Institutional	25	75
4.	Assembly	60	90
5.	Business	50	75
6.	Mercantile	50	75
7.	Industrial	50	75
8.	Stores	50	75
9.	Hazardous	25	40

- e) Institutional Buildings like hospitals
 - Upto 10 Beds - 1.5 m.
 - More than 10 Beds - 2.0 m.
- f) All Other Buildings - 1.5 m.

17.4 Other Requirements of Individual Exits-The detailed requirements of individual exits are given in Rule No. 17.4.1 to 17.4.6.

17.4.1 Doorways:

- a) Every exit doorway shall open into an enclosed stairway, a horizontal exit or corridor or passageway providing continuous and protected means of egress;
- b) No exit doorway shall be less than 100 cm in width. Doorways shall be not less than 200 cm in height. Doorways for bathrooms, water closets, stores etc shall be not less than 75 cm wide;
- c) Exit doorways shall open outwards, that is way from the room but shall not obstruct the travel along any exit. No door, when opened, shall reduce the required width of stairway of landing to less than 90 cm. Over head or sliding door shall not be installed.
- d) Exit door shall not open immediately upon a flight of stairs. A landing equal to at least the width of the door shall be provided in the stairway at each doorway. Level of landing shall be the same as that of the floor which it serves;

17.4.2 Revolving Doors:

- a) Revolving doors may be used as required exit only in residential, business and mercantile occupancies, but shall not constitute more than half the total required door width;
- b) When revolving doors are considered as required exit way the following assumptions shall be made.
 - 1) each revolving door shall be credited one half a unit exit width; and
 - 2) revolving doors shall not be located at the foot of a stairway. Any stairway served by a revolving door shall discharge through a lobby or foyer.

17.4.3 Stairways :

- *a) Interior stairs shall be constructed of non-combustible materials throughout.
- *b) Interior stairs shall be constructed as a self contained unit with at least one side adjacent to an external wall and shall be completely enclosed.
- c) A staircase shall not be arranged round a lift shaft unless the latter is entirely enclosed by a material of fire-resistance rating as that for type of construction itself. For building more than 15 m in height, the staircase location shall be to the satisfaction of Chief Fire Officer, Pimpri Chinchwad Municipal Corporation, Fire Brigade.
- d) Hollow combustible construction shall not be permitted.
- e) The minimum width of an internal staircase shall be 100 cm subject to provisions of Rule No. 17.3.5.
- f) The minimum width of tread without nosing shall be 25 cm for an internal staircase for residential buildings. In the case of other buildings the minimum tread shall be 30 cm. The treads shall be constructed and maintained in a manner to prevent slipping.
- g) The maximum height of riser shall be 19 cm in the case of residential buildings and 15 cm in the case of other buildings. They shall be limited to 12 per flight. For Low Income Housing Scheme in the narrow plots, the risers may be provided in one flight.
- h) Handrails shall be provided with a minimum height of 90 cm from the center of the tread. In the case of public offices, assembly halls, hospitals etc., an additional low rail shall be provided at a height of 75 cm.
- i) The minimum head room in a passage under the landing of a staircase and under the staircase shall be 2.2m.
- j) No living space, store or other fire risk shall open directly into the staircase or staircases.
- k) Internal exit door of staircase enclosure at ground level shall open directly to the open space or shall be such as can be reached without passing through any door other than a door provided to form a draught lobby.

- l) In case of single staircase it shall terminate at the ground floor level and the access to the basement shall be by a separate staircase. Wherever the building is served by more than one staircase, one of the staircases may lead to basement level provided the same is separated at ground level by either a ventilated lobby or a cut Off screen wall without opening, having a fire resistance of not less than 2 hours with discharge point at two different ends or through enclosures (See Rule No. 15.11.12 (f)). It shall also be cut off from the basement area at various basement levels by a protected and ventilated lobby / lobbies. The staircases shall be lighted and ventilated and the minimum size of openings on walls abutting to open spaces shall be 0.3 sq. m. per landing.

17.4.3.1 Stair Ways : One of the stair-ways near the entrance/exit for the physically handicapped shall be made in addition to existing provisions for all the public buildings and facilities used by the public have the following provisions :-

- a) The minimum width shall be 1350 mm.
- b) Height of the riser shall not be more than 150 mm. and width of the tread 300 mm. The steps shall not have abrupt (square) nosing.
- c) Maximum number of risers on a flight shall be limited to 12.
- d) Hand rails shall be provided on both sides and shall extend 300 mm. on the-top and bottom of each flight of steps. In the buildings meant for 'the predominant use of the children, it will be necessary to suitably alter the height of the handrail and other fittings and fixtures.

17.4.4 Fire Escape or External Stairs - For buildings above 15 m in height fire escape stairs shall be provided subject to the following conditions :

- a) Fire escape shall not be taken into account in calculating the evacuation time of a building.
- b) All fire escapes shall be directly connected to the ground.
- c) Entrance to fire escape shall be separate and remote from the internal staircase.
- d) The route to fire escape shall be free of obstructions at all times, except a doorway leading to the fire escape which shall have the required fire resistance.
- e) Fire escape shall be constructed on non-combustible materials.
- f) Fire escape stairs shall have straight flight not less than 75 cm wide with 25 cm treads and risers not more than 19 cm. The number of risers shall be limited to 16 per flight.
- g) Handrails shall be of a height not less than 90 cm.

17.4.5 Spiral Stairs (Fire Escape) - The use of spiral staircase shall be limited to low occupant load and to a building of height 9 m unless they are connected to platform, such as balconies and terraces to allow escapes to pause.

A spiral fire escape shall be not less than 150 cm in diameter and shall be designed to give adequate headroom.

17.4.6 Ramps

- *a) Ramps with a slope of not more than 1 to 10 may be substituted for and shall comply with all the applicable requirements of required stairways as to enclosure, capacity and limited dimensions. Ramps shall be surfaced with approved non slipping material. Provided that in the case of public offices, hospitals, assembly halls etc. The slope of the ramp shall not be more than 1 in 12.
- b) The minimum width of the ramps in hospitals shall be 2.25 m.
- c) Handrails shall be provided on both sides of the ramp.
- d) Ramps shall lead directly to outside open space at ground level or courtyards or safe place.

17.4.7 Corridors

- *a) The minimum width of corridors shall not be less than 0.9 m in the case of 2 storey row housing residential building and in the case of other buildings an actual width shall be calculated based on the provision of rule no 17.3.1 to 17.3.3.
- b) In case of more than one main staircase of the building interconnected by a corridor or other enclosed space, there shall be at least one smoke stop door across the corridor or enclosed space between the doors in the enclosing walls or any two staircases.

17.4.7.1 Corridor Connecting the Entrance/ Exit for the Physically Handicapped : The provisions shall be made in addition to existing requirements for all public building and facilities used by the public.

The corridor connecting the entrance / exit for the physically handicapped leading directly outdoors to a place where information concerning the overall use of the specified building can be provided to visually impaired person's either by a person or by signs, shall be provided as follows :

- a) Guiding floor materials shall be provided or devices that emit sound to guide visually impaired persons.
- b) The minimum width shall be 1500 mm.
- c) In case there is a difference of level slope ways shall be provided with a slope of 1: 12.
- d) Hand rails shall be provided for ramps/ slope ways.

17.4.8 Refuge Area - For all buildings exceeding 24 m. in height one refuge area shall be provided as follows.

- a) For floors 24.00 m. to 36.00 m. - One refuge area on the floor immediately after 24.00 m.
- b) For floors 36.00 m. to 70.00 m - One refuge area immediately after 36.00 and on every seventh floor thereafter.

17.4.8.1 Refuge area shall be provided on periphery of the floor and open to air at least on one side protected with suitable railings. Each refuge area shall be minimum 1/4th of the maximum coverage of building. This refuge area shall not be counted in FSI.

17.4.9 Lifts

- a) All the floors shall be accessible for 24 hours by the lifts. The lift provided in the building shall not be considered as means of escape in case of emergency.
- b) Grounding switch at ground floor level to enable the fire service to ground the lift cable in an emergency shall also be provided.
- c) The lift machine rooms shall be separate and no other machinery shall be installed therein.

DOD

18. FIRE PROTECTION REQUIREMENTS

- 18.1** Buildings shall be planned designed and constructed to ensure fire safety and this shall be done in accordance with part IV fire protection of national building code of India, unless otherwise specified in these rules. In the case of buildings identified in rule no 6.2. 6.1. The building scheme shall also be cleared by the chief fire officer Pimpri-Chinchawad Municipal Corporation Fire Brigade.
- 18.2** The additional provisions related to fire protection of building more than 15 m in height and building identified in rule no 6.2 6.1 shall be as given in Appendix P.

ODD

19. SPECIAL REQUIREMENT OF OCCUPANCIES

19.1 Special Requirement of Educational Building

19.1.1 No class room shall admeasure less than 38 sq .m with a minimum dimension 5.5.m

19.1.2 The height of any class room shall not be less than 3.6 m

19.1.3 **Exit requirement:** This shall conform to rule 17 and 17.3.5

19.1.4 **Requirements of Water Supply, Drainage and Sanitation :** These shall be conform to requirement of rule no 24.2 and 24.3 and tables 10 and 15.

19.1.5 **Parking Spaces :** These shall conform to rule 14 and table 6

19.2 Special Requirement of Institutional Buildings (Hospitals, Maternity Homes and Health center, Sanatoria).

19.2.1 No special room in the Hospital building shall admeasure less than 9.5 sq. m. in area with no side less than 3 m.

19.2.2 Area of the general wards shall not admeasure less than 40 sq mt with no side less than 5.5m.

19.2.3 **Exit requirement:** This shall conform to rule No. 17 and 17.3.5

19.2.4 **Requirements of Water Supply Drainage and Sanitation :** These shall be conform to requirement of rules, No. 24.2 and 24.3 and tables 10 ,16 and 17

19.2.5 **Parking Spaces :** This shall conform to rule no. 14 and Table 6.

19.3 Special Requirements of Cinema Theaters (Assembly Halls)

19.3.1 They shall conform to the provisions of Maharashtra Cinema (Regulation) rules 1966, as amended from time to time.

19.3.2 **Exit requirement:** These shall conform to rule No. 17 and 17.3.5

19.3.3 **Requirement of Water Supply, Drainage and Sanitation :** These shall be conform to requirements of rule no. 24.2 and 24.3 and Tables 10, 11 and 20

19.3.4 **Parking Spaces:** These shall conform to rules No. 14 and 14.7 and Tables 6

19.4 Special Requirements of Mercantile Buildings

19.4.1 Minimum area of the shop shall be 6 sq. mt. in R - 1 Zone with minimum width of 2.0 m. and 10 sq. mt. in R2 and other zones with a minimum width of 3 m.

19.5 Special Requirement of Industrial Buildings

19.5.1 In addition to provisions of these rules/regulations prescribed under factory Act shall be applicable.

- 19.5.2** In case of Industrial Building with different operations/process, the different (Gaseous, solids, liquid) effluents shall be so treated, Subject to the approval of Maharashtra water Prevention of Pollution Board and Chief Inspector of Steam Boilers and Smoke Nuisance, before letting it out on the air. Ground or water course.
- 19.5.3 Exit requirement:** These shall conform to rules no 17 and 17.3.5.
- 19.5.4 Requirements of Water Supply, Drainage and Sanitation :** These shall be conform to rule no 24.2 and 24.3 and tables 10, 11 and 23
- 19.5.5 Parking Loading and Unloading Spaces :** These shall be conform rule nos. 14, 14.5 and tables 6.
- 19.6** Special requirements for buildings above 21 m and high rise buildings, which will be permitted only in non-congested area irrespective of road widening F. S. I. for all types of buildings except industrial buildings.
- 19.6.1 HIGH RISE BUILDING -** High rise building means building of a height of 24.00 m. or more, above average surrounding ground level.
- (Provided that the building, if it is more than 24 m. built for Slum redevelopment scheme for accommodation existing slum dwellers situated on a site occupied by the existing slum dwellers, shall not be treated as High Rise Building).
- 19.6.2 Buildings of height above 21 m & below 24 m**
- a) Minimum area of the plot shall be 1000.00 sq. m.
 - b) Front set back (minimum) shall be 6.00 m.
 - c) Side or rear margin (minimum) shall be 7.50 m.
 - d) Ground coverage (maximum) shall be 1/4 of the plot, which shall be measured above the stilt.
 - e) Minimum width of access road shall be 9.00 m. which shall join another street of equal or greater width.
 - f) Entire building shall be on stilts only, and area of which shall be maximum 50% of the plot (Basement shall be permitted)/
 - g) Fire-protection measures shall be as per Appendix P, subject to the clearance of Chief Fire Officer, PCMC & payment of premium as decided by the Municipal Commissioner.
- 19.6.3 High Rise Building, Building above 24 m & up to 30.60 m.**
- a) Minimum area of the plot shall be 1000.00 sq. m.
 - b) Front set back (minimum) shall be 7.50 m.
 - c) Side or rear margin (minimum) shall be 7.50 m.
 - d) Ground coverage (maximum) shall be 1/5 of the plot, which shall be measured above the stilt.
 - e) Minimum width of access road shall be 12.00 m. which shall join another street of equal or greater width.

- f) Entire building shall be on stilts only, and area of which shall be maximum 50% of the plot (basement shall be permitted).
- g) Additional fire protection requirements mentioned in Appendix P shall be applicable, subject to the clearance of Chief Fire Officer, PCMC & payment of premium as decided by the Municipal Commissioner.
- h) Appointment of Structural Engineer shall be made while applying for building permission, and his structural stability certificate shall be furnished, while applying for plinth checking certificate and part or full occupancy certificate or whenever directed by the Municipal Commissioner.

19.6.4 High Rise Building, Building above 30.60 m. & up to 36.00 m.

- a) Minimum area of the plot shall be 2000.00 sq. m.
- b) Front set back (minimum) shall be 7.50 m.
- c) Side or rear margin (minimum) shall be 7.50 m.
- d) Ground coverage (maximum) shall be 1/5 of the plot, which shall be measured above the stilt.
- e) Minimum width of access road shall be 12.00 m. which shall join another street of equal or greater width.
- f) Entire building shall be on stilts only, and area of which shall be maximum 50% of the plot (basement shall be permitted)
- g) Additional fire protection requirements mentioned in Appendix P shall be applicable, subject to the clearance of Chief Fire Officer, PCMC & payment of premium as decided by the Municipal Commissioner.
- h) Appointment of Structural Engineer shall be made while applying for building permission, and his structural stability certificate shall be furnished, while applying for plinth checking certificate and part or full occupancy certificate, or whenever directed by the Municipal Commissioner.
- i) High rise building above 30.60 m. and up to 36.00 m. shall be permitted only after the Municipal Commissioner is satisfied that the fire fighting system is well equipped and strengthened to meet the requirements.

- NOTE**
- 1) No fire brigade premium will be charged for Slum Redevelopment Schemes approved as per "Appendix - T".
 - 2) Two tier stilt may be permitted with ramps clear of marginal open spaces.
 - 3) Notwithstanding anything contained in these rules, the Municipal Commissioner may grant or reject the permission of High Rise Buildings in cases where the site situation so demands.

**D. C. Regulation No. 19.6.5
High-Rise Building Table**

Sr. No.	High-Rise Building Permissible Height	Minimum Area of Plot Required	Minimum width of Access Road Required in mts.	Marginal Open Spaces On Other Sides in mts	Front Set Back in Mts.
1	2	3	4	5	6
1	Above 36 m. and upto 40 m.	2000	12	9	9
2	Above 40 m. and upto 50 m.	4000	15	9	12
3	Above 50 m. and upto 70 m.	6000	18	10	12

Note:

- a) H - is overall height of the building as measured from surrounding average ground level of the plot.
- b) For buildings having height more than 36 mts. the required marginal distances, parking requirements and firefighting requirements shall not be relaxed by municipal commissioner.
- c) Before permitting such high-rise buildings/ tower like structure on the lands which fall under the extended lines of Airport or Gliding Centre Air funnel No Objection Certificate from the concerned Airport Authority shall be obtained.
- d) 1) More than two basements may be permissible.
2) If basement parking is provided and is sufficient for parking then stilt shall not be insisted.
- e) Additional fire protection requirement mentioned in appendix (P) annexed hereto shall be applicable as subject to clearance of Chief Fire Officer and payment of premium as may be decided by the Municipal Commissioner.
- f) Appointment of structural engineer of special category as certified by the Pimpri Chinchwad Municipal Corporation shall be made while applying for building permission and his structural stability certificate shall be furnished while applying for plinth checking certificate.
- g) In case of two or more high-rise buildings proposed on a single site, the set back shall be applied considering them as a common building. In such cases, the distance between the two buildings shall be open space required for single highest building.
- h) High-rise building above 36.0 m. and upto 70.00 m. shall be permitted only after the Municipal Commissioner is satisfied that the firefighting system is well equipped and strengthened to meet the requirements.
- i) The access road mentioned in table above should join another street of equal or greater width.
- j) Separate provision of service and fire lifts shall be necessary.
- k) Service auditing in each year is compulsory for high-rise building.
- l) Any provision which is not covered under this regulation shall be governed by the National Building Code.

- m) Basement or podium shall not be permissible within required front and other marginal open spaces.
- n) No construction of any sort shall be permissible within minimum required marginal distances (for example Otta, Chabutara, Stairs, water tank, podium, basement, ramp etc.)
- o) Soft copy of the structural design shall be submitted to Municipal Corporation at the time of submission of building plan and shall be preserved by the Municipal Corporation carefully.
- p) Municipal Corporation shall charge 'Fire Infrastructure Charges' as given below. Fire infrastructure charges shall be deposited in the separate account under the Head of Fire Infrastructure Charges and such amount shall only be used for establishment and expansion of Fire Infrastructure facilities.

Height of the Building	Fire Infrastructure Charges Per sq. mt. Built-Up Area
From 40 mts. upto less than 60 mts.	Rs. 1,000/-
From 60 mts. upto less than 70 mts.	Rs. 1,500/-

- q) While calculating fire infrastructure charges, the rates given for the height specified in the table shall be made applicable. For example while calculating Fire Infrastructure Charges for building of 70 mts., height rate of Rs. 1,000/- sq. mtrs. shall be applied for first 20 mtrs. rate of Rs. 1,500/- sq. mtrs. for next 10 mtrs.
- r) Any of the provisions of these rules may be relaxed by Government except F. S. I.

19.6.5 For all buildings exceeding 24.0 m. in height i.e. for high rise buildings refuge floor shall be provided at 8th floor or in between 24 m. and 27 m. height as per the direction of the Municipal Commissioner from time to time.

Refuge floor area will not be taken in FAR calculations. Height of the refuge floor shall not be permissible more than 2.4 m.

19.6.6 In the case of multi-storied / multi-family dwelling apartments having height more than 24 m. from ground level, separate garbage chutes for dry and wet garbage shall be provided with proper garbage collecting room at ground floor.

19.7 Special requirements of lodging hotels, hostels.

19.7.1 Minimum area of habitable room / lodging room shall be 12 sq. m. including combined toilet.

□□□

PART - III : STRUCTURAL SAFETY AND SERVICES

20. STRUCTURALDESIGN

- 20.1** The structural design of foundations elements made of masonry, timber, plain concrete reinforced concrete, prestressed concrete and structural steel shall be carried out in accordance with part VI Structural Design, Section 1 - Loads, Section 2 - Foundation, Concrete, Section 3 - Wood, Section 4 - Masonry, Section 5 - Concrete, Sections Steel of National Building code of India.

ODD

21. QUALITY OF MATERIALS AND WORKMANSHIP

- 21.1** All materials and workmanship shall be of good quality conforming generally to accepted standard of public works Department of Maharashtra and Indian Standard Specification and codes as included in part V Building Materials and part VII Constructural Practices and safety of National Building code of India.
- 21.2** All borrow pits dug in the course of construction & repair of buildings, roads, embankments etc shall be deep and connected with each other in the formation of a drain directed towards the lowest level and properly stepped for discharge into a river stream, channel or drain and no person shall create any isolated borrow pit which is likely to cause accumulation of water which may breed mosquitoes.

DOD

22. ALTERNATIVE MATERIALS, METHODS OF DESIGN AND CONSTRUCTION AND TESTS:

- 22.1** The provisions of the rules are not intended to prevent the use of any material or method of design or construction not specifically prescribed by the rules provided any such alternative has been approved.
- 22.1.1** The provisions of these rules are also not intended to prevent the adoption for architectural planning and layout conceived as an integrated development scheme.
- 22.2** The authority may approve any such alternative provided it is found that the proposed alternative is satisfactory and conform to the provisions of relevant parts regarding material, design & construction and that material, method or work offered is, for the purpose intended at least equivalent to that prescribed in the rules in quality, strength, compatibility, effectiveness, fire and water resistance durability and safety.
- 22.3 Tests :** Whenever there is sufficient evidence of compliance with the provisions of the rules or evidence that any material or method of design or construction does not conform to the requirement of the rules or in order to substantiate claims for alternative materials, design or methods of constructions, the Authority may require test sufficiently in advance as proof of compliance. These tests shall be made by an approved agency at the expense of the owner.
- 22.3.1** Test methods shall be as specified by the rules for the materials or design or construction in question. If there are no appropriate test methods specified in the rules, the authority shall determine the test procedure. For methods of test for building materials, reference may be made to relevant Indian Standards as given in the National Building code of India published by Indian standards institution. The latest version of the national building code of India shall be taken into account at the time of enforcement of these rules.
- 22.3.2** Copies of the results of all such tests shall be retained by the authority of a period of not less than two years after the acceptance of the alternative mater.

ODD

23. BUILDING SERVICES

23.1 The planning, design and installation of electrical installation, air conditioning and heating work shall be carried out in accordance with part VIII Building Services Section 2 - Electrical Installation, Section 3 - Air Conditioning and Heating, of National Building code of India.

23.2 The planning design including the number of lifts type of lifts .capacity of lifts depending on occupancy of buildings population on each floor based on occupant load height of building shall be in accordance with Section 5 - Installation of Lifts and Escalators and National Building code of India. In existing buildings, in case of proposal for one additional floor, existing lift may not be raised to the additional floor.

23.2.1 Maintenance of Lift in Working - The lift shall be maintained in working order in line with provision of rules no. P-5 (see rule no. 10.1).

23.3 Special Provisions for Installation of Water Heating Systems

Solar Water Heating System should be made in the Building for Hospitals, Hotels, Guest House, Police Men /Army Barracks, Canteens, Laboratories and Research Institutions, Hostels of School and Colleges and other Institutions.

23.3.1 The solar water heating systems should be mandatory in the hospitals and hotels, where the hot water requirement is of continuous nature. In these buildings the system must be provided with auxiliary back-up.

23.3.2 The use of solar water heating system is also mandatory in the following type of buildings in Government / Semi Government and Institutional buildings where the hot water requirement may not be continuous/permanent

- i) Guest Houses
- ii) Policemen, Army Barracks
- iii) Canteens
- iv) Laboratory and Research Institutions where hot water is needed
- v) Hostels, Schools, Colleges and Other Institutes

The installation of the electrical back up in all such water heating systems shall be optional depending on the nature of requirement of hot water.

It is suggested that solar water heating systems of the capacity of about 100 liters per day based on the thermosyphon with necessary electrical back up be installed at residential buildings like hostels.

23.3.3 In order to facilitate the installation of the solar water heating systems, the new buildings of aforesaid types shall have following provisions :

- a) All such buildings where solar water systems are to be installed will have open sunny roof area available for installation of solar water heating system.

- b) The roof loading adopted in the design of such building should be at least 50 kg. per sq. mt. for the installation of solar water heating system.
- c) Solar water heating can also be integrated with the building design. These can either be put on the parapet or could be integrated with the south facing vertical wall of the building. The best inclination of the collector for regular use throughout the year is equal to the local latitude of the place. The collectors shall be facing south. However, for only winter use, the optimum inclination of the collector would be (latitude + 15 degrees of the south). Even if the collectors are built in the south facing vertical wall of the building the output from such Collectors during winter month is expected to be within 32% out put from the optimum inclined Collector.
- d) All the new buildings of aforesaid types to be constructed shall have an installed hot water line from the rooftop and also insulated distribution pipelines to each of the points where hot water is required in the building.
- e) The capacity of the solar water heating system to be installed on the buildings shall be described on the basis of the average occupancy of the buildings. The norms for hospitals, hotels and other functional buildings are given below :

Sr.No.	Type of Buildings	Per Capita Capacity Recommended (Liters Per Day)
1	Hospital	100
2	Hostels	150
3	Hostels & other such buildings	85
4	Canteens	As required
5	laboratory & Research Institutions	As required

- f) An open area of 3 sq. mt. would be required for installation of a Collector which supplies about 100 liters of water per day. At least 60 percent of the roof area may be utilised for installation of the system.
- g) The specification for the solar water heating system laid down by the Ministry of Non-Conventional Energy Sources can be allowed. Flat plate Collector conforming to IS No. 12933 shall be used in all such solar water heating systems.

Note 1 : The commissioner may add to the list of buildings mentioned above on which installation of solar water heating system can be made mandatory.

Note 2 : The Commissioner shall insist on installation of Collectors, Solar Heating System on the terraces of the buildings whenever existing use of any building is proposed to be changed had utilized for the purposes as per the list mentioned above for harnessing solar energy for purposes other than water heating as well.

□□□

24. PLUMBING SERVICES

24.1 The planning, design, construction and installation of water supply, drainage and sanitation and gas supply systems relevant rules of the corporation in force and in absence of rules as per National Building Code of India.

24.2 **Requirement of Water Supply in Building** - The total requirement of supply shall be calculated based on the population as given below:

Occupancy	Basis
Residential Building	- 5 person/tenement
Other Buildings	- No of Person based on Occupant Load and Area of Floors given in Tables 8

24.2.1 The requirement of water supply for various occupancies shall be as given in table 10, 11 and 12 or as specified by the authority from time to time.

24.2.2 **Drinking Water** : Suitable provision of drinking water shall be made for the physically handicapped near the special toilet provided for them, in the public buildings and facilities used by public.

24.3 **Requirement of Sanitary Fittings** - The sanitary fitting and installations for different occupancies shall be as given in table 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23 & 24.

24.3.1 The total requirement shall be calculated based on the population as rule no 24.2

24.4 Rain Water Harvesting

24.4.1 All the layout open spaces / amenity spaces of housing societies and new constructions / reconstructions / additions on plots having area not less than 300 sq. m. in non gaothan areas shall have one or more Rain Water Harvesting structures having a minimum total capacity as prescribed in sub rule 24.4.4 provided that the Municipal Commissioner may approve the Rain Water Harvesting structures of specification different from those in sub rule 24.4.4 subject to the minimum capacity of Rain Harvesting ensured in each case.

24.4.2 The owner/ society of every building mentioned in the sub rule 24.4.1 above shall ensure that the Rain Water harvesting structure is maintained in good repair for storage of water for non-potable purposes or recharge of ground water at all times.

24.4.3 The Municipal Commissioner may impose a levy of to exceeding Rs. 1,000/- per annum for every 100 sq. m. of built up area for the failure of the owner of any building mentioned in the sub rule 24.4.1 above to provide or to maintain rain water harvesting structures as required under these bye laws.

24.4.4 Rain water harvesting in a building site includes storage or recharging into ground of rain water falling on the terrace or on any paved or unpaved surface within the building site.

- 1) The following systems may be adopted to harvesting the rain water drawn from terrace and the paved surface.
 - i) Open well of a minimum 1.00 m. diameter and 6.00 m. in depth into which rain water may be channeled and allowed after filtration for removing silt and floating material. The well shall be provided with ventilating covers. The water from the open well may be used for non-potable domestic purposes such as washing, flushing and for watering the garden etc.
 - ii) Rain Water Harvesting for recharge of ground water may be done through a well around which a pit of one meter width may be excavated up to a depth of at least 3.00 mt. And refilled with stone aggregate and sand. The filtered rain water may be channeled to the refilled pit for recharging the bore well.
 - iii) An impervious surface / underground storage tank of required capacity may be constructed in the setback or other open space and the rain water may be channeled to the storage tank. The storage tank shall always be provided with ventilating covers and shall have draw-off taps suitably placed so that the rain water may be drawn off for domestic, washing, gardening and such other purposes. The storage tanks shall be provided with an overflow.
 - iv) The surplus rain water after storage may be recharged into ground through percolation pits or trenches or combination of pits and trenches. Depending on the geomorphologies and topographical condition, the pits may be of the size of 1.20 mt. Width x 1.20 mt. length x 2.00 mt to 2.50 mt. Depth. The trenches can be of 0.60 mt. Width x 2.00 to 6.00 mt length x 1.50 to 2.00 mt. depth. Terrace water shall be channeled to pits or trenches. Such pits or trenches shall be back filled with filter media comprising the following materials :-
 - a) 40 mm stone aggregate as bottom layer up to 50 per cent of the depth.
 - b) 20 mm stone aggregate as lower middle layer up to 20 per cent of the depth.
 - c) Coarse sand as upper middle layer up to 20 per cent of the depth.
 - d) A thin layer of the sand as top layer.
 - e) Top 10 per cent of the pits / trenches will be empty and a splash is being provided in this portion in such a way that roof top water falls on the splash pad.
 - f) Brick masonry wall is to be constructed on the exposed surface of pits / trenches and the cement mortar plastered.
The depth of wall below ground shall be such that the wall prevents loose soil entering into pits / trenches. The projection of the wall above ground shall at least be 15 cms.
 - g) Perforated concrete slab shall be provided on the pits / trenches.
- xii) If the open Space surrounding the building is not paved, the top layer up to a sufficient depth shall be removed and refilled with coarse sand to allow percolation of rain water into ground.

- 2) The terrace shall be connected to the open well/ bore well/ storage tank/ recharge pit/ trench by means of HOPE/ PVC pipes through filter media. A valve system shall be provided to enable the first washings from roof or terrace catchment as they would contain undesirable dirt. The mouths of all pipes and opening shall be covered with mosquito (insect) proof wire net. For the efficient discharge of rain water, there shall be at least two rain water pipes of 100 mm diameter for a roof area of 100 sq. mt.
- 3) Rain water harvesting structures shall be sited as not to endanger the stability of building or earthwork. The structures shall be designed such that no dampness is caused in any part of the walls or foundation of the building or those of an adjacent building.
- 4) The water so collected / recharged shall as far as possible be used for non-drinking and non-cooking purpose.

Provided that when the rain water in exceptional circumstances will be utilized for drinking and/ or cooking purpose, it shall be ensured that proper filter arrangement and the separate outlet for by passing the first rainwater has been provided.

Provided further that it will be ensured that for such use, proper disinfectants and the water purification arrangements have been made.

DDD

TABLE 10

PER CAPITA WATER REQUIREMENTS FOR VARIOUS OCCUPANCIES/ USES

S No. 1)	Type of Occupancy 2)	Consumption Per Head Per Day (in Liters) 3)
1	Residential	
	a) Inlivingunits	135
	b) Hotels with Lodging accommodation (per bed)	180
2	Educational	
	a) Day Schools	45
	b) Boarding Schools	135
3	Institutional (Medical Hospitals)	
	a) No. of Beds not Exceeding 100	340
	b) No. of Beds Exceeding 100	450
	c) Medical Quarters and Hostels	135
4	Assembly- Cinema Theaters, Auditoria etc. (Per Seat of Accommodation)	15
5	Government or Semi - Public business	45
6	Mercantile (Commercial)	
	a) Restaurants (Per Seat)	70
	b) Other Business Buildings	45
7	Industrial	
	a) Factories where Bath Rooms are to be Provided	45
	b) Factories where Bath Rooms are to required to be Provided	30
8	Storage (Including Warehousing)	30
9	Hazardous	30
10	Intermediate/ Stations (Excluding Mail and Express Stops)	45 (25)*
11	Junction Stations	70(45)*
12	Terminal / Stations	45
13	International and Domestic Airports	70

* The values in paranthesis are for stations where bathing facilities are not provided.

Note : The number of persons for Sr. no (10) to (13) shall be determined by the average number of passengers handled by the station daily. Due consideration may be given to the staff and workers likely to use the facilities.

TABLE 11
FLUSHING STORAGE CAPACITIES

Sr. No. (1)	Classification of Building (2)	Storage Capacity (3)
1	For tenements having common convenience	900 Liters net per w. c. seat
2	For residential premises other than tenements having common convenience	270 Liters net for one w.c. seat and 180 for each additional seat in the same flat.
3	For factories and workshops	900 Liters per w.c. seat and 180 Liters per urinal seat
4	For Cinemas, public assembly halls etc	900 Liters per w.c. seat and 350 Liters per urinal seat

TABLE 12
DOMESTIC STORAGE CAPACITIES

Sr. No. (1)	No. of Floors (2)	Storage Capacity (3)	Remarks (4)
For Premises Occupied as Tenements with Common Conveniences			
1	Floor 1 (Ground)	Nil	Provided no down take fittings are installed
2	Floors 2, 3, 4, 5 and Upper Floors	500* Liters Per Tenements	
For Premises Occupied as Flats or Blocks			
1	Floor 1	Nil	Provided no down take fittings are installed
2.	Floors 2, 3, 4, 5 and Upper Floors	500*Liters	

- Note :**
- 1) If the premises are situated at a place higher than the road level in front of the premises, storage at ground level shall be provided on the same lines as on floor.
 - 2) The above storage may be permitted to be installed provided that the total domestic storage calculated on the above basis is not less than the storage calculated on number of down take fittings according to the scales given
 - Down take Taps - 70 Liters each
 - Showers - 135 Liters each
 - Bath Tube - 200 Liters each

Subject to provisions of water supply and drainage rules.

TABLE 13
SANITATION REQUIREMENTS FOR SHOPS AND COMMERCIAL OFFICES

Sr. No. (1)	Fitments (2)	For Personnel (3)
1	Water Closet	One for every 25 persons or part thereof exceeding 15 (including employees and customers). For female personnel 1 per every 15 persons or part thereof exceeding 10.
2	Drinking Water	One for every 100 persons with a minimum of one on each floor.
3	Wash Basin	One for every 25 persons or part thereof. One of such wash basins on each floor shall be fixed at height of 80 ems with tap at 100 ems above finished floor level for the use of handicapped disable, old and infirm persons
4	Urinals	Same as Sr. No. 3 of Table 15
5	Clearness Sink	One per floor minimum preferably in or adjacent of sanitary rooms
<p>Note : No. of customers for the purpose of the above calculation shall be the average number of persons in the premises for a time interval of one hour. During the peak period, for male-female calculation and ratio of 1 : 1 may be assumed.</p>		

TABLE 14
SANITATION REQUIREMENTS FOR HOTELS

Sl. No.	Item	For Residential Public	For Public Rooms		For Non-Residential Staff	
			For Males	For Female	For Males	For Females
1	2	3	4	5	6	7
1.	Water Closets	One per 8 persons committing occupants of the room with attached water closet, minimum of 2 in both sexes lodged.	one per 100 persons upto 400 persons; for over 400 add at the rate of one per 250 persons or part thereof	2 or 100 persons upto 200 persons; over 200 add at the rate of 1 per 100 persons or part thereof	one for 1-15 persons two for 16-35 persons three for 36-65 persons four for 66-100 person	1 for 1-12 persons 2 for 13-25 persons 3 for 26-40 persons 4 for 41-57 persons
2.	Abduction Taps	One in each Water Closet	one in each water closet	one in each water closet	one in each water closet	one in each water closet
		1 water tap with draining arrangements shall be provided for persons every 50 or part thereof in the vicinity of water-closet and urinals.				
3.	Urinals	—	one for 50 persons or part	—	Nil upto 6 persons 1 for 7 - 20 persons 2 for 21 - 45 persons 3 for 46 - 70 persons 4 for 71 - 100 persons	—
4.	Wash Basins	One per 100 persons omitting the wash basins installed in the room suite	one per water closet and urinal provided	one per water closet provided	1 for 1-15 persons 2 for 16-35 persons 3 for 36-65 persons 4 for 66-100 persons	1 for 1-12 persons 2 for 13-25 persons 3 for 26-40 persons 4 for 41-57 persons 5 for 58-77 persons 6 for 78-100 persons

(87)

**FORM FOR FIRST APPLICATION FOR DEVELOPMENT UNDER SECTION
44/45/58/69 OF MAHARASHTRA REGIONAL AND TOWN
PLANNING ACT, 1966 AND TO ERECT.
A BUILDING UNDER SECTION (253) OF (B. P. M. C.) ACT, 1949**

(With Rs 10 /- P Court Fee Stamp)

To,
The Municipal Commissioner/Administrator
Pimpri-Chinchwad Municipal Corporation,
Pimpri411018.

Sir,

I hereby give notice that I intend to carry out development in the site/to erect, re-erect/
to demolish/to make material alterations in the building _____ on/in plot
no _____ TownandRevenueNo _____ C.T.S.No. _____
situated at Road/ Street _____ City _____ and in accordance
with section 44/45/58/69 of Maharashtra Regional and Town Planning Act, 1966 section (253) of
(B.P.M.C.)Act, 1949.

I forward herewith the following plans and statements (Item 1 to 6) wherever applicable,
in quadruplicate signed by me and? (Name in Block Letters) _____
_____ the licensed Architect/Engineer/Structural Engineer,
the License No _____ who had prepared the plans, designs and copy of other
statements/documents/as applicable (item 7 to 10).

- 1) Key Plan (Location Plan)
- 2) SitePlan
- 3) Building Plan
- 4) Service Plan
- 5) Sub Division/Layout Plan
- 6) Particulars ofDevelopment in Form
- 7) Ownership Title
- 8) Attested Copy ofReceipt for Payment ofBuilding Permission
- 9) Clearance Certificate ofTax Arrears
- 10) No objection Certificate, where required

I request that the proposed development construction may be approved and permission
accorded to me to execute the work.

Signature of Owner _____

Name of Owner _____

Dated _____

Address of Owner _____

**FORM GIVING PARTICULARS OF DEVELOPMENT
(PART OF APPENDIX A-ITEM 6)**

- 1) a) 1) Full Name of Applicant: _____
 2) Address of Applicant: _____
 b) Name and Address of Licensed Architect/Engineer Employed. _____
 c) No. and Date of Issue of License _____
- 2) In the plot affected by any reservations or road lines. If yes, are these correctly and clearly marked on the block plan?
- 3) *a) What is the total area of the plot according to the document? _____
 *b) Does it tally with the Revenue/ C. T. S. Record? _____
 *c) What is the actual area available on site inspected by Licensed Architect/Engineer/ Structural Engineer? _____
 d) Is there any construction in the original area of the plot on account of road lines or reservation. Please state the total area of such deductions? _____
 e) If so, what is the net area? _____

NOTE- (TO INDICATE DETAILS OF THE SITE / BUILDING PLANS IN PROFORMA)

- 4) Are all plans as required under Rule No. 16.2 enclosed?
- 5) a) Is the plot part of a City Triangulation Survey No., Revenue Survey No. _____ or Hissa No. of a Survey No. or a Final Plot No. of a Town Planning Scheme or a part of an approved layout? _____
 b) Please state Sanction number and date of Sub-Division/Layout. _____

*The permission shall be based on the area whichever is minimum.

- 6) a) In what zone does the plot fall?
 b) What is the permissible F. A. R. of the Zone?
 c) What is the number of Tenements per hectare permissible in the Zone?
- 7) a) Is the use of every room in the proposed work marked on the plans? _____
 b) Is it in accordance with the rules? _____
 c) Does the use of the building, fall in the category of special types of buildings like cinema halls, theaters, assembly halls, stadia, buildings for religious purposes, hospital buildings, educational buildings, markets and exhibition halls etc. as per rule no. N-1.4 and N-2.2? _____
8. If the work is in connection with industry
 a) Please briefly describe the main and accessory process. _____
 b) Please state the maximum number of workmen and the total horse power likely to be employed per shift in the factory. _____
 c) What industrial classification does it fall under, giving reference to relevant Rule No.? _____

- d) Is the proposal for relocation of an existing Industry and if so give the name and address of the existing Industry? -----
- e) Will the building be at least 9 m away from the boundary of a residential or commercial zone? -----
- f) Is the proposal for a service industrial estate on a plot reserved for service industries? -----
- g) Nature and quantum of industrial waste/effluents and methods of disposal. _____
- 9) a) What is the Average? _____
 i) prescribed, and _____
 ii) existing width of the street _____
- If the plot abuts two or more streets, the above information in respect of all streets should be given.
- b) What is the height of the building?
 i) above the centre of the street. _____
 ii) above the average ground level of the plot. _____
- c) Does it comply with Rule No. 13.5? _____
- 10) a) If there are existing structures in the plot
 i) are they correctly marked and numbered on the site plan? _____
 ii) are those proposed to be demolished immediately coloured yellow? -----
 iii) What is the plinth area and total floor area of all existing structures to be retained. Please append Statement 1 giving details. -----
 iv) What is the number of existing tenements in structures to be retained. -----
- b) What is the plinth area and total floor area of the proposed work? Please append Statement 2 giving details. -----
- c) What is the number of tenements proposed? _____

NOTE : TO INDICATE DETAILS ON THE BUILDING PLAN AS IN PROFORMA 1.

- 11) a) Please state the plinth area and total floor area existing and proposed [total] of Item Nos. 10 (a) [iii] and 10 (c). -----
- b) Please state the overall F. A. R. (item 11 (a) divided by item 3 (c)). _____
- c) Does the work consume the full F. A. R. of the plot, as given in the Item 6 (b)? _____
- d) Is the building proposed with setback on upper floors? _____
- e) What is the total number of tenements (item 10 (a) plus item 10 (c))? _____

NOTE : TO INDICATE DETAILS ON THE BUILDING PLAN IS IN PROFORMA 1.

- 12) a) What is the width of the front open spaces? If the building abuts two or more streets does the front open spaces comply with rule no.13.1.2? _____
- b) Please state which of the following Rules is applicable for the front open spaces: N -2.2.1 to N -2.2.8. _____
and does the front open space comply with that rule? _____
- 13) a) What is:
1) the width of side open space (s) ? _____
2) the width of rear open space (s)? _____
3) the distance between buildings ? _____
- b) Are there two or more wings to the buildings and if so are the open spaces separate or distinct for each wing as required under rule no.13.1.4? _____
- 14) a) What are the dimensions of the inner or outer chowk? _____
- b) i) Is any room dependent for its light and ventilation on the chowk? _____
If so, are the dimensions such as are required for each wing of the building ? _____
- ii) If not, is the area equal to square of minimum width for the height as per rule no.13.2? _____
- 15) If the height of the building is greater than 16 m above the average ground level, are provisions for lift (s) made ? _____
- a) If so, give details of Lift. _____
- | Type | Passenger | No. of Lifts | Type of Door |
|-------|-----------|--------------|--------------|
| _____ | _____ | _____ | _____ |
- b) Details of Fire Lift. _____
- 16) a) Does the building fall under the purview of Rule 6.2.6.1 ? _____
- b) If so, do the proposed fire protection requirements confirm to Appendix P? _____
- c) If not, give reasons for non-conformity _____
- a) _____
- b) _____
- c) _____
- d) _____
- 17) a) i) What are the requirements for parking spaces under the Rules? _____
- ii) How many are proposed? _____
- iii) How many lock-up garages are proposed? _____
- b) i) Are loading-unloading spaces necessary under Rule No. 14.5? _____
- ii) If so, what is the requirement? _____
- iii) How many are proposed? _____

NOTE : INDICATE DETAILS ON BUILDING PLAN AS IN PROFORMA 1.

- 18) a) i) What are the maximum widths of balconies? _____
 ii) Will they reduce the required open spaces to less than the provisions of Rules? _____
 iii) Do they serve as a passage to any part of the building? _____
 iv) What is their total area? _____
 b) What is the maximum width of weather-frames, Sunshades (Chajja), Sun Breakers, Cornice, Eaves or other projection? _____
 c) i) Are any porches proposed? _____
 ii) Are they in compliance with Rule No. 13.4.2.1? _____
- 19) a) What is the width of the means of access? _____
 b) What is its clear height? _____
 c) Will it be paved, drained and kept free of encroachment? _____
- 20) Is recreational or amenity open space provided as required under Rule Nos. 11.3.1 and 11.3.2? _____
- 21) a) Are any accessory buildings proposed? If so for what purpose? _____
 b) What are their heights? _____
 c) Are they 7.5 m away from the street or front boundary and if located within the open spaces, 1.5 m from other boundary? _____
 d) Is their area calculated in F. A. R. ? _____
- 22) a) What is the proposed height of the compound wall? Is it at a junction? _____
 b) Is it in-compliance with Rule 15.18? _____
- 23) i) Is the proposal in the Air Port Zone? _____
 ii) Is a no objection certificate for height and character of smoke from chimneys obtained from chief Inspector of boilers and smoke, nuisance? _____
- 24) Does the proposal fall in any of the restricted zones? _____
- 25) a) Does any natural water source pass through the land under development? _____
 b) Is the necessary setback, provided as per Rule No. 9.1? _____
- 26) Please explain in detail in what respect the proposal does not comply with the Development Control Rules and the reasons therefore, attaching a separate sheet if necessary. _____
- 27) Is the plinth level proposed to be above the level of the surrounding ground level? _____

- 28) The materials to be used in construction with specifications : _____
- Room -----
- Floors, -----
- Walls -----
- Columns -----
- 29) The number of Water Closets, Urinals, Kitchens, Baths to be provided.
- | | | | | | |
|----------|---------------|-------|---------|----------|-------|
| | Water Closets | Baths | Urinals | Kitchens | |
| Existing | ----- | ----- | ----- | ----- | ----- |
| Proposed | ----- | ----- | ----- | ----- | ----- |
- 30) The source of water to be used in the construction. _____
- 31) Distance from the sewer. _____
- 32) How much Municipal land will be used for stacking building material. _____

I hereby declared that I am the owner-leasee/mortgagee in possession/ _____ of the plot on which the work is proposed and that the statement made in this form are true and correct to the best of my knowledge.

	33) Manufacture of rubber balloons, hand gloves and allied products.	2	9	50	
VIII	NON METALLIC MINERAL PRODUCTS				
	34) Manufacture of structural stone goods, stone dressing, stone crushing and polishing.		INOT INCLUDED		
	35) Manufacture of earthen and plaster states and images, toys and art wares.		INOT INCLUDED		
	36) Manufacture of cement concrete building components; concrete jellies, septic tank, plaster of Paris work, lime mortar, etc.		INOT INCLUDED		
IX	METAL PRODUCTS				
	37) Manufacture of furniture and fixture primarily of metal.		INOT INCLUDED		
	38) Plating & polishing and buffing of metal products.		INOT INCLUDED		
	39) Manufacture of metal building components such as grills, gates, doors, and window frames, water tanks, wire nets, etc.		INOT INCLUDED		
	40) Manufacture and repair of sundry ferrous electrical products done by jobbing concerns such as mechanical works, shops with lathes, drills, grinders welding equipment etc.		INOT INCLUDED		
	41) Total sharpening and razor sharpening works	1	9	25	Operation shall be permitted only between 8.00 hrs. to 20.00hrs.

(137)

X	ELECTRICAL GOODS 42) Repair of various electrical appliances such as radio set, television set, tape recorders, heaters, irons, shavers, vacuum cleaners, refrigerators, air conditioner elect, cooking ranges, motor rewinding washing machine, works etc,	3	9	50	i) Operation shall be permitted only between 8.00 hrs. to 20.00hrs. ii) No spray painting permitted
XI	TRANSPORT EQUIPMENT 43) Manufacturing of push cart, hand cart, etc. 44) a) Servicing of motor vehicles and motor cycles with no floor above b) Repair of motor vehicles and motor cycles with no floor above. c) Battery charging and repair 45) Repair of bicycles and cycle Rickshaws	5 5 5 5	NOT INCLUDED 9 9 6 6	50 50 25 50	Operation shall be permitted only between 8.00 hrs. to 20.00hrs. No spray painting permitted No spray painting permitted
XXI	OTHER MANUFACTURING AND REPAIR INDUSTRIES & SERVICES 46) Manufacture of jewellery and related articles 47) Repair of Watch Clock and Jewellery. 48) Manufacture of sports and athletic goods. 49) Manufacture of musical instrument and its repair 50) Mass manufacture of miscellaneous products such as costume jewellery, costume novelties, feather, plumes, artificial flowers, brooms, brushes lamp shades, tobacco pipes, cigarette holders and ivory goods badges wings and similar articles.	3 3 3 3	9 9 NOT INCLUDED 9 NOT INCLUDED	50 50 50 50	Operation shall be permitted only between 8.00 hrs. to 20.00hrs. Operation shall be permitted only between 8.00 hrs to 20.00hrs. Operation shall be permitted only between 8.00 hrs and 20.00hrs.

(138)

51) a)	Repairs of locks, stoves umbrellas, sewing machines, gas burners, buckets and other sundry household equipment.	3	9	50	Operation shall be permitted only between 8.00 hrs. and 20.00hrs.
b)	Optical glass grinding and repairs.	3	9	50	--- do ---
52)	Petrol filling stations	10	9	i) 30.5 x 16.75 m ii) 36.5 x 30.5 m	Plot size to be in line with IRC recommendation depending on services bay or not.
53)	Laundries, Laundry services and cleaning, dyeing, bleaching and dry cleaning	4KW	9	50	i) Cleaning & dyeing fluid used shall not have flash point lower than 1380° F ii) Operation shall be permitted between 8.00hrs. to 20.00hrs. iii) Machinery having day load capacity of 20 kg and above.
54)	Photo processing laboratories	5	9	50	Operation shall be permitted between 8.00 hrs. to 20.00 hrs.
55)	Electronic Industries of assembly type (and not of manufacturing type including heating load)	10	20	250	In independent structure on independent plot with special permission of the Commissioner
NOTE : The Municipal Corporation may from time to time add to or alter or amend the above list.					

M-6 INDUSTRIES ZONE

M-6.1 Industries shall include any buildings or part of a building or structure, in which products or materials of all kinds and proportion are fabricated assembled or processed e.g. assembly plants, laboratories, dry cleaning plants, power plants, pumping stations, smoke house, laboratories, gas plants refineries, dairies, sawmills etc.

M-6.2 Use Provisions in Industries Zone (1) - Building or premises in industrial zone may be used for any industrial as also accessory uses like banks, canteens welfare centers and such other common purposes considered necessary for the industrial workers, except for any dwelling other than dwelling quarters of watchman, caretakers or other essential staff required to be maintained on the premises as may be allowed by the Commissioner.

The following industries may be permitted only with the special permission of the Commissioner who may grant it after such security as may be necessary to ensure that the location is appropriate and is not likely to cause nuisance and hazard to adjoining owners. Before granting any such permission, Commissioner may prescribe special condition about minimum size of plot and minimum buffer open spaces from the industrial Building/ Industrial use space which shall not, how ever, be 25 m (75').

1. Acetone manufacture;
2. Acetylene gas manufacture and storage;
3. Acid manufacture;
4. Air-crafts (including parts) manufactures;
5. Alcohol manufacture;
6. Ammoniamanufacture;
7. Amline Dyes manufactures;
8. Arsonal;
9. Asphalt- manufacture or refining;
10. Automobiles, trucks and trailers (including parts) manufacture and engine re- building, except motor body building not employing pneumatic riveting;
11. Blast furnace;
12. Bleaching powder manufacture;
13. Boiler works manufacture or repairs, excepting repairs to boilers with heating surface not exceeding 5 sq m.;
14. Brick, tiles or terra cotta manufacture;
15. Building materials such as prefabricated houses : composite wall boards, partitions and panels manufactures;
16. Carbide manufacture;
17. Caustic soda and compound manufacture;
18. Celluloid or cellulose manufacture of treatment and articles manufacture;
19. Cement manufacture;
20. Manufacture of charcoal and fuel briquettes;

21. Coke manufacturing ovens;
22. Chlorine manufacture;
23. Concrete products manufacture including concrete control mixing and proportions plants;
24. Cotton ginning, cleaning refining or pressing and manufacture of cotton wadding or light; except cotton cleaning for the purpose of preparing mattresses;
25. Concrete manufacture or treatment;
26. Disinfectants manufacture, except mixing of prepared dry ingredients;
27. Distillation of bones, coal or wood;
28. Dye stuff manufacture except mixing of dry powders and wet mixing;
29. Exterminator or pest poison manufacture, except mixing of prepared ingredients;
30. Emery cloth and sand paper manufacture;
31. Explosive or fire works manufacture of storage except storage in connection with retail sales;
32. Fat rendering;
33. Fertilizer manufacture;
34. Flour mill with motive power exceeding 25 H.P. grain crushing or processing mill with motive power exceeding 50 H.P., Masala grinding mill with motive power exceeding 15 H.P. or a combination of any of the above mills with aggregate motive power exceeding 60 H.P. and each one mill using motive power in excess of the above limits.
35. Forges, Hydraulic and mechanically operated;
36. Garbage or dead animals reduction, dumping or incineration;
37. Gas manufacture and storage in cylinders except manufacture of gas as an accessory to a permissible industry;
38. Glass manufacture except manufacturing of glass products from a manufactured glass;
39. Glue, sizing material or gelatine manufacture;
40. Graphite and graphite products manufacture;
41. Gypsum or plaster of Paris manufacture;
42. Hair, felt, fur and feather, bulk processing, washing, curing and dyeing;
43. Hydrogen and oxygen manufactures;
44. Printing ink manufacture;
45. Industrial alcohol manufacture;
46. Junk (iron, aluminum, magnesium or zinc), cotton waste or rag storage and baling;
47. Jute, hemp, sisal, coir and cork products manufacture;
 - i) Lamp black, carbon-black or bone-black manufacture;
 - ii) Lime manufacture;
 - iii) Match manufacture;

48. Metal foundries with an aggregate capacity exceeding 10 tons a day;
49. Metal processing (including fabrication and machinery, manufacturing). Factories employing such machine tools or processes as power hammer forging machine, pneumatic drilling or riveting, sheet working with heavy sledge hammers etc; or processes expressly prohibited herein;
50. Metal finishing, enameling, anodizing; japanning plating, galvanising, lacquering grinding, polishing, rust-proofing and heat treatment;
51. Paint, oil, shellac, Turpentine or varnish manufacture except manufacture of edible oils and paint making (not including turpentine or varnish making).
52. Oil cloth or linoleum/ manufacture excepting water-proofing of paper or cloth;
53. Paper cardboard or pulp manufacture;
54. Petroleum or its products refining or wholesale storage;
55. Plastic materials and synthetic resins manufactures;
56. Pottery or ceramics manufacture other than the manufacture of handicraft products only;
57. Potash works;
58. Tyrexilin manufacture or products;
59. Rolling Mills;
60. Rubber (natural or synthetic) or gutta-percha manufacture except manufacture of latex goods and small rubber products and synthetic treated fabric such as washers, gloves, footwear, bathing caps, atomizers, hoses, tubings, wire insulation toys and bolls, but including manufacture of tyres and tubes and type-recapping;
61. Salts works except manufacture of common salt from sea water;
62. Sand, clay or gravel quarrying except under Government or Municipal agencies or control;
63. Smelting, reduction, refining and alloying of metal and metal ores except of rare and precious metals;
64. Soap manufacture other than cold mix;
65. Soda and compound manufacture;
66. Starch glucose or dextrine manufacture;
67. Stock yard or slaughter of animals or fowl, except the slaughter of fowls incidental to a retail business;
68. Stone crushing and quarrying;
69. Shoe polish manufacture;
70. Sugar manufacture or refining;
71. Tallow, grease or lard manufacture;
72. Tanning, curing or storage of raw hides or skins;
73. Tar distillation or manufacture;
74. Tar products manufacture;
75. Textiles manufacture exceeding 50 H. P. total;

76. Vegetable oil manufacturing and processing plants;
 77. Wood and timber, bulk processing and wood working including saw mill and mills excelsior, plywood and veneer and wood preserving treatment except the manufacture of wooden articles with saw or machine;
 78. Wax products manufacture from paraffin;
 79. Wool pulling or scouring;
 80. Yeast Plant;
 81. In general these use which may be obnoxious or offensive by reason of omission of odour, liquid effluvia, dust, smoke gas, noise, vibration or fire hazards;
 82. With the approval of the Corporation, the commissioner may from time to time add to or alter or amend the above list.
- M-6.3**
- i) Fertilizer manufacture from organic materials provided however that these provisions shall not apply to the manufacture of fertilizers from previously processed materials which have no noxious odours or fumes and which do not produce noxious odour or fumes on the compounding or manufacture thereof;
 - ii) Sulphurous, sulphuric, citric, nitric hydrochloric or other corrosive acid manufacture or their use or storage except as accessory to a permitted industry;
 - iii) Blast furnace;
 - iv) Ammonia manufacture;
 - v) Incineration, reduction or dumping of offal, dead animals garbage or refuse on commercial basis or the establishment of loading and transfer platform except where restricted regulated or controlled by duly constituted Government or Municipal authorities having the power to restrict, regulate or control the same;
 - vi) Tar distillation or manufacture;
 - vii) Lime manufacture;
 - viii) Manufacture of explosive or inflammable products of cellulose;
 - ix) Celluloid manufacture or treatment;
 - x) Manufacture of photographic films;
 - xi) Cement manufacture;
 - xii) Chlorine manufacture;
 - xiii) Bleaching powder manufacture or treatment;
 - xiv) Gelatine or glue manufacture or processes involving recovery from fresh or animal offal;
 - xv) Aluminum magnesium, tin, copper, zinc or iron smelting;
 - xvi) Manufacture of storage of explosives of fireworks;
 - xvii) Match manufacture;
 - xviii) Fat rendering;
 - xix) Candle or paraffin wax products manufacturing;
 - xx) Fat, tallow, grease or lard refining or manufacturing;

- xxi) Manufacture of explosive or inflammable product or pyroxylyse;
- xxii) Pyroxylysis manufacture;
- xxiii) Dyestuff manufacture;
- xxiv) Turpentine, varnish or size manufacture or refining;
- xxv) Gypsum plaster or plaster of Paris manufacture;
- xxvi) Drive-in-Theatres, Cinema or Theatres, subject to the provision of separate entries and exits for the cars, required sanitary and water supply arrangement, car parking arrangements as per rules in force.

M-6.4 Non-Viable Plots in Industrial Zone (I) - If some plots or parts thereof become unbuildable for factory purpose because of restrictions due to zonal set-back regulations the following users may be permitted on such plots :

- i) Petrol Pumps and Service Station;
- ii) Parking lots;
- iii) Electric Sub-Station;
- iv) Building of public utility concerns except residence;
- v) The branches of Scheduled Banks;
- vi) Service Industries;
- vii) Storage Building.

M.6.5 Notwithstanding anything contained above.

- a) With the previous approval of Municipal Commissioner and on such conditions as deemed appropriate by him, the existing or newly built-up area of unit, in the industrial zone may be permitted to be utilised for an office or commercial purposes.
- b) With the previous approval of the commissioner, any open land or lands or industrial lands in the Industrial zone. May be permitted to be utilised for any of the permissible users in the Residential zone (R-1 Zone) or the Residential zone with shop front (R-2 Zone) or for those in the commercial zone (C1 & C2 zone) subject to the following.
- c) The conversion of Industrial Zone to Residential / Commercial Zone in respect of close industries shall not be permitted unless NOC from Labour Commissioner, Maharashtra State, Mumbai stating that all legal dues have been paid to the workers or satisfactory arrangement between management and workers have been made, is obtained. Provided that where conversion has been permitted on the basis of this certificate, occupation certificate will not be given unless a no dues certificate is granted by Labour Commissioner.
- d) The layout or sub division of such land measuring up to 2.00 Ha. Shall be approved by the Commissioner, who will ensure that 5% land for public utilities and amenities like electric sub station, bus station, sub post office, police out post and such other amenities as may be considered necessary will be provided therein.

- e) In such layouts or sub-divisions having area more than 2 Ha. But less than 5 Ha. 20% land for public utilities and amenities like electric sub section, bus station, sub post office, police out post, garden, playground, school, dispensary and such other amenities shall be provided.
- f) In such layout of sub-division each more than 5 Ha. In area, 25% of land for public utilities and amenities like electric substation, Bus station, sub post office, police out post, garden, playground, school, dispensary and such other amenities shall be provided. These areas will be in addition to the recreational space as required to be provided under these regulations.
- g) The required segregating distance as prescribed under these regulations shall be provided within such land intended to be used for residential or commercial purpose.
- h) Such residential or local commercial development shall be allowed within the permissible FSI of the nearby residential or commercial zone.
- i) Provision for public utilities and amenities shall be considered to be reservation in the Development Plan and transferable development rights as regulation No. N. 2.4 or FSI of the same shall be available for utilisation on the remaining land.
- j) Note:**
 - 1) Conversion from Industrial zone to residential / commercial zone shall be applicable to the entire land holding and layout shall be approved for the entire land holding and not in part. Mixed user shall not allowed.
 - 2) The existing reservation of Development Plan, if any (within the percentage mentioned above, for public amenities and utilities) will be extinguished and they will be covered in new regulation.
 - 3) Out of the total area proposed to be utilised for residential development 20% of the same shall be built for residential tenements having built up area upto 50 sq. mtrs.

DOD

M-7 GREEN ZONE (other than Hills and Hill Slopes)

M-7.1 The following uses shall be permitted in Green Zone.

- i) All agricultural uses including stabling of Cattle and - buffalows upto the limit of 10 animals per hectare.
- ii) Poultry farms.
- iii) Forestry and Nursery.
- iv) Golf Clubs and Links.
- v) Public parks, Private Parks, play fields, for recreation of all types.
- vi) Brick tile or pottery manufacture.
- vii) Fish farming.
- viii) Sand, clay gravel quarrying
- ix) Storage and drying of fertiliser.
- x) Public utility establishments such as electric sub-stations, receiving stations, sewage disposal, water works along with residential quarters for essential staff for such works proposed to be located in the zone.
- xi) Farm house subject to the following condition
 - a) the land in which it is constructed is actually put under agricultural use.
 - b) the area under agricultural use is at least 0.8 ha;
 - c) the built up area for residence of farmer is not more than 80 sq. m. and that for cattle shed, animal shed, barn etc. is not more than another 80 sq. m. (aggregate 160 sq.mt.)
- xii) Swimming pools /sports and games health club, service restaurant tennis courts etc. amusement park.

Note : Maximum floor space area shall not exceed 4% of the plot with ground floor structure only.

ODD

M-8 GREENBELTS

The following uses shall be permissible in the Green Belts.

- 1) All agricultural uses;
- 2) Forestry and Nursery;
- 3) Play fields for recreational of all types;
- 4) Public utility establishments such as electric sub-stations receiving stations, sewage disposal, waterworks etc.;
- 5) The storage of L. P. G. cylinders may be allowed in the land with the special permission of Municipal Commissioner. However total FAR shall not exceed 4% of the plot area.

ODD

M-9: Commercial use shall be permissible in Public/Semi-Public Zone as given in the table below -

Area of Plot	Permissible Commercial use in percentage
upto 1000 sq. mtrs.	7.5percent
1001 to2500sq.mtrs.	10percent
2501 to4000sq.mtrs.	12percent
4001 and above	15percent

Commercial use shall be allowed on following conditions -

- 1) Convenient shopping, branch of bank, small hotels etc. shall be permitted but shops/hotels for wine, pan, cigarette, tobacco, lottery tickets and such others users which do not serve public purpose similarly domestic gas shops / godowns which are dangerous to public health shall not be permitted.
- 2) The income from such commercial uses shall be utilized for main users for which the development has taken place or would taken place.
- 3) Such commercial development shall take place in such a way that it shall not affect the view of the main development on the land, similarly such a commercial user shall be permitted upto 50 percent length of the plot.
- 4) The Planning Authority shall ascertain that for parking places and for traffic, sufficient area is kept in the plot.
- 5) Additional FSI shall be allowed only on the plot area remained after deducting the plot area utilized for commercial user.
- 6) The planning Authority shall not allow sub-division of Survey No., Gat No., Plot No., on which such a development which may cause / had take place / would take place.
- 7) In such layouts or sub-division having area more than 2 Ha. but less than 5 Ha., 20 percent land shall be provided for public utilities and amenities like electric sub-station, bus-station, sub-postoffice, police out post, garden, playground, school, dispensary and such other amenities shall be provided.
- 8) The commercial user shall be permitted upto a depth of 12 mtrs.
- 9) The land owner/developer/institution shall give guarantee in writing to the Planning Authority for following all the stipulated conditions scrupulously.
- 10) The plots in which there is an existing development, such commercial use shall be restricted to maximum 20 percent of the balance potential.

□□□

APPENDIX-N

N-2 OPEN SPACE, AREA & HEIGHT LIMITATIONS

N-2.1 Open spaces and area & Height limitations for plots held on Gaothan tenure & semi-gaothan area.

N-2.1.1 General - Area under the gaothan / congested area shall be intended mainly for residential purpose, All other users as listed out under residential use in land use classification order, shall be permitted on plots held on gaothan tenure / congested area.

N-2.1.2 Residential-

- a) **Floor Area Ratio** - The permissible F. A. R. shall be 1.5 for purely residential building and 2.00 for building with mixed residential and commercial user subject to maximum tenement density of 375 tenements per hectare, provided in building with mixed residential and commercial user, the commercial user will be permitted only on the ground floor and the residential user and commercial user shall not exceed F. A. R. 1.5 and 0.5 respectively. However in the case of entire building constructed on stilts, the stilt floor may be allowed for the 0.5 commercial user.

Provided further that in the redevelopment Scheme of a property in gaothan.

- i) the size of the tenements in re-development scheme should not be smaller than 15 sq. mt. and larger than 155 sq. m. in area;
 - ii) where the number of existing tenements exceeds the permissible density of 250 tenements per hectare, the re-development scheme should accommodate all the existing tenements, as far as possible, subject to condition that the proposed FAR does not exceed 25 percent above the permissible FAR of 1.5;
 - iii) where the existing tenement density is less than 250 tenements per hectare the re-development scheme may accommodate the number of tenements so that the far does not exceed 1.5 and the tenement density does not exceed 250 per hectare.
 - iv) Permissible tenement density shall be 375 per hectare instead of 250 for congested area.
- b) **Front Open Spaces** - The minimum setback from existing or proposed road shall be as under
- i) For streets of width 4.5 mtr. And above existing or proposed - 1.5 m
 - ii) In - R2 zone where shops / commercial users is proposed - 2.25 m
 - iii) For lanes less than 4.5 m width a set back of 2.25 m.
 - iv) Structural projections such as balconies, cornices, weather sheds, projections etc. shall be allowed in the set back distance prescribed.

Such projections will not be taken into consideration for calculation of built over area. However, in cases of N 2.1.2 (b) (iii) no such projections will be allowed.

- v) Front open spaces on the following roads shall be minimum 6.00 m. for all types of buildings instead of Rule No. N-2.1.2 (b) (i) and (ii).
 - 1) Pune-Mumbai National Highway
 - 2) Pune-Mumbai National Highway via Aundh
 - 3) Pune-Nashik Highway
- c) **Height** - The height of the building shall not be more than 18 m and shall also be governed by the width of the road in front as per Rule 13.5
- d) **Ground Coverage**- The maximum ground coverage shall be 2/3rd of the plot area.

N-2.1.3 Educational, Public Health and Charitable Building-

- a) **Floor Space Index** - Normally the F. S. I. permissible for above buildings would be 1.5. However in case of special circumstances additional F. S. I. up to 50% may be permitted by the Municipal Commissioner on 1.5 i. e. up to the maximum of 2.25.
- b) **Open Spaces** - A clear open space of 3 m all round the above building shall be provided.

N-2.1.4 Pathway for Access to the Internal Building or Interior Part of the Building-

The pathway shall not be less than 3.6 m [12'] in width & no portion of any building shall overhang or project below a height of 3.6 m [12'] from the surface of such passage if the length of such passage or the number of building served by such passage requires such extra width or such clear height to be provided in the opinion of the Commissioner.

N-2.1.5 The provisions of N-2.1.2, N-2.1.3 [b] and N-2.1.4 may be relaxed by the Commissioner in special circumstances. However if the width of property is less than 3.6 m [12'] the entire ground floor shall be on stilts.

N-2.2 Open space and Area & Height limitations, for plots held on other than gaothan tenure and congested area.

N 2.2.1 Residential Buildings -

- a) The provisions as given in Table 27 shall apply for residential building, residential-cum-office or shop building permissible on plots held on other than gaothan tenure and congested area and residential building permissible in industrial areas;
- b) **Minimum Distance between main and Accessory Building** - A clear distance of at least 1.5 m shall be left between the main building and any accessory building such as an out house garage etc constructed in one building plot.
- c) **Number of Main and Single Storeyed Accessory Building in a Plot** - Only one main building either a tenement house or a block of flats or dwelling house together with such outhouses garages etc. as are reasonably required for the bonafide use and enjoyment of the occupants of such main building and their domestic servants and

which shall not be separately let out shall be permitted to be erected in any plot these provisions are not applicable to Group Housing schemes. Provided that this restriction shall not prevent erection of two or more main building on the same plot. If the plot is upto twice or thrice as the case may be [according to the number of buildings] of the minimum size of building plot as laid down under table 27 upto a plot measuring 900 sq. m. in area.

- 1) Subject to the condition that a row housing plot at the junction of two roads shall be larger to maintain to set backs from both roads and subject to the condition that not more than 8 and less than 4 plots shall be allowed in each block of the row, each block shall be separated from the other by 6 m. and buildings shall conform to type design to be approved by the Pimpri-Chinchwad Municipal Corporation.
- 2) Subsidiary structures such as car park, garage, out house, independent sanitary block etc. shall not be permitted in plot having area below 250sq.m.
- 3) Tenement size means the total built up area including thickness of walls and internal passages etc. but excluding common corridor, passages and staircase, lift rooms etc.
- 4) Construction of ottas, steps, railings barricades or supporting column for canopy or porch shall not be allowed in front marginal open space. However, ottas and steps may be permitted within 1.2 mt from the building line.
- 5) In case of weaker section housing scheme, providing all tenements of 30 sq. m. each or less a tenement density upto 300 tenements / hector will be allowed,
- 6) All the plots sizes mentioned in the table for categories 1 to 5 are minimum. In case where actual size of the plots is more than the provisions for the respective plot sizes will be made applicable irrespective of road widths on which the plot fronts.
- 7) Shops and other commercial use will be permitted upto 0.33 FSI. In case the plot front on road of width 12 mt and above provided that offset street parking provision is made as per the rule, with a provision of additional visitors parking in front margin of the building The parking spaces must be levelled, metalled, paves as directed by the Municipal Commissioner.
- 8) R-1 shops will be permitted only on the plots fronting on between roads having width of 6 mt upto 9 mt with a front setback of 7.5 mt
- 9) Only residential users shall be permitted on plot fronting on roads with width less than 6 mt
- 10) The minimum tenement density for EWS / LIG category (at sr. no. 8) shall be 300 tenement per hectare and the construction shall be with a common service verandah for each other
- 11) In case of building / buildings with additional FAR in lieu of area under road widening or TDR, the Height of Building / Buildings may be relaxed upto 21 mt. irrespective of the area of additional FAR.

TABLE 27 (1) & 27 (2)

F. S. I., Front / Side Margin/ Tenement Densities/ Heights to Different Categories in Non-Congested Residential Zones

Sr. No.	Description of Road	Min plot size in sq.mt.	Min. frontage in mt.	Min Setback from road front in mt.	Min.Side& rear open space in mt.	Max. permissible ground coverage in sq.mt.	Max. Height permissible in mt.	FSI	Tenement density/max no. of storeys permissible	Remarks

Note :

1. Subject to the condition that a row housing plot at the junction of two roads shall be larger to maintain to set backs from both roads, and subject to the condition that not more than 8 and less than 4 plots shall be allowed in each block of the row, each block shall be separated from the other by 6 m and buildings shall conform to type design to be approved by the Pimpri-Chinchwad Municipal Corporation.
2. Subsidiary structures such as car park, garage, out house, independent sanitary block etc. shall not be permitted in plot having area below 250 sq. m.
3. Tenement size means the total built up area including thickness of walls and internal passages etc., but excluding common corridors, passages and stair cases, lift rooms etc.
4. Construction of ottas, steps, railings barricades or supporting column for canopy or porch shall not be allowed in front marginal open space. However, steps may be permitted within 1.20 mt from the building line
5. In case of weker section housing scheme, providing all tenements of 30 sq. m. each or less, a tenement density upto 300 tenements / Hector will be allowed.
6. All the plots sizes mentioned in the table for categories 1 to 5 are minimum. In case where actual size of the plots is more than the provisions for the respective plot sizes will be made applicable irrespective of road widths on which the plot fronts.
7. Shops and other commercial uses will be permitted upto 0.33 FSI. In case the plots fronts on roads of width 12 mt. and above provided that off-set street parking provision is made as per the rules, with a provision of additional visitors parking in front margin of the building. The parking spaces must be levelled, metalled paves as directed by the Municipal Commissioner.
8. R-1 shops will be permitted only on the plots fronting on between roads having width of 6 mt. upto 9 mt. with a front setback of 7.5 mt.
9. Only residential users shall be permitted on plots fronting on roads with width less than 6 mt,
10. The minimum tenement density for EWS/LIG category (at Sr. No. 8) shall be 300 tenements per hectare, and the construction shall be with a ~~minimum~~ service verandha for each other.
11. In case of building / buildings with additional FAR in lieu of area under road widening or TDR. The height of building / buildings may be relaxed upto 21,00 mt. irrespective of the area of additional FAR.

N-2.2.2 Educational Buildings:

- a) **Built up Area** - The maximum permissible built up area shall be not more than 1/3rd of plot area,
- b) **F. A. R.** - The minimum F. A. R. shall be 1.*
- c) A minimum open space of 6 m shall be left on all sides from boundaries of the plot.

N-2.2.3 Institutional Buildings (Hospitals, Maternity Homes, Health Centres):

- a) **Built up Area** - The built up area shall not be more than 1/3rd of the area of the plot.
- b) **F. A. R.** - The minimum F. A. R. shall be 1.**
- c) There shall be a minimum open space of 6 m on all sides.

**However an extra F. S. I. up to 0.5 may be permitted for buildings used exclusively for Educational and Registered Charitable Trust Hospital purpose. Permissible height of 16 m may be relaxed up to 20 m only to enable extra F. S. I. being available of.

N-2.2.4 Cinema Theatres/Assembly Halls:

- a) **Open Spaces**
 - i) **Front Set Back** - A set back of 12 m from road shall be left.
Note : Further in cases of plots facing National Highway and Major District Roads the buildings shall be 37m** from the center line of existing or proposed road or 12 m from plot boundary whichever is more.
 - ii) **Side and Rear Open Space** - Side and rear marginal distance to be left shall be 6m. The above shall be exclusive of parking spaces.
- b) No Cinema Theatre/ Mangal Karyalaya / Assembly Hall shall be permitted unless the minimum distance between boundary of the site for cinema theatre / assembly halls etc. and boundary of educational, institutional and other Government Business Buildings is at least 60 m.
- c) Maximum F. A. R. shall be 1.
- d) Minimum width of Access road shall be 15 m.

N-2.2.5

- i) **Public Entertainment Hall/ Mangal Karyalaya and Like Buildings :**
 - a) **Built up Area** : The maximum permissible built up area shall be 1/3rd.
 - b) **Access Roads** : The minimum width of access roads shall be 15 m and the plots shall abut on this road.
 - c) **F.A. R.** : Maximum F. A. R. shall be 1.
 - d) **Open Space** :
 - 1) Front Open Space: 12 m
 - 2) From all the Three Boundaries: 6m
**or as prescribed by highway authority

- ii) **Luxury Hotels** - For luxury hotels with a rating of 3 stars and above as certified by the Department of Tourism of G. O. I as per the norms prescribed by tourism department of G. O. M. and providing at least for the minimum amenities as prescribed by that Department Constructed on plots held other than the gaathan tenure in R-2 Zone maximum F. S. I of 1.5 may be permitted provided the plot admeasure not less than 900 sq. m. provided further that such extra F. S. I shall be subject to the payment of premium at the rate as may be determined from time to time by Municipal Commissioner, Pimpri Chinchwad Municipal Corporation in consultation with the Director of Town planning for additional built up area in excess of normally permissible F. S. I of 1.00 Permissible height of 16 m may be relaxed up to 20 m only to enable extra F. S. I as above being availed of. Minimum width of Access road shall be 15 m.

N-2.2.6 Petrol Filling Station with or without Service bays:

- a) 1) The land on which a petrol filling station with or without bays is proposed shall be on independent premise/building/plot of approved layout.
- 2) Accessory uses consistent with principal users permissible with zone subject to clearance from controller of explosives and chief fire officer and observance of such conditions as they may be prescribed and with permission of commissioner.
- b) Petrol station shall not be permitted within a distance of 90 m from any junction of Roads.
- c) Petrol station shall not be sited on the convex side of a road curve unless the curve is relatively flat and cars moving out of the station are completely visible to the traffic from a distance of at least 90 m and vice-versa.
- d) Petrol station shall not be sited within a distance of 90 m from the nearest gate of a school, hospital, theatre, place of assembly or stadium.

N-2.2.7 Building in Commercial Zone-

- a) **Means of Access** - When two or more buildings are constructed in the same plot every building shall be provided with independent means of access of not less than 6 m width. The means of access shall not be considered as part of marginal open spaces required to be left around the buildings.
- b) **Built up Area** - Maximum plot coverage shall be half of the plot size.
- c) **F. A. R. and V. P. R.** - Maximum F. A. R. permissible shall be one. For the purpose of F. A. R. net area of land excluding open space and areas covered by internal roads shall only be considered. Provided that in gaathan congested areas, F. A. R. may be permitted to be increased to 1.50. Further the area and height limitations shall be subject to a maximum volume to plot ratio (V. P. R.) of 4 m.

- d) **Open Spaces** - Marginal open spaces along periphery of land or plot shall be 4.5 m minimum provided that in case of land / plot fronting on classified roads, set back prescribed under Ribbon development rules or 4.5 m whichever is more shall be observed.

NOTE : The provisions of note under Rule No. N-2.2.4 (a) (i) shall apply for front open space in the case of storage Buildings.

N-2.2.8 Industrial Buildings -

- a) Minimum size of plot, maximum built up area, minimum marginal open space to be left in a plot, minimum width of plot and maximum number of storeys, to be provided in a plot shall be as in Table 28.

Table 28 : Area, Height Limitations for Industrial Buildings

Sr. No.	Plot Size insqmt	Max Built up Area%	Min Marginal Open Spaces	Min Width ofPlotm	Max F. S.I.	MaxNo. ofStoreys
1	2	3	4	5	6	7
1.	300-500	50	3.0	15	1	3
2.	501-1000	50	4.0	20	1	3
3.	1001-2500	50	4.5	25	1	3
4.	2501-5000	50	6.0	35	1	3
5.	Above5001	50	9.0	50	1	3

NOTE : 1) The provisions of Note under Rule No. N-2.2.4 (a) (i) shall apply for front open space given in Col. (4).

2) The maximum built up area shall be 50% of ground coverage.

- b) In Industrial Zone actual factory or workshop Building and storage or godown shall not be constructed within a distance of 10 m from the boundary of the Industrial Zone, where it separates two zones. Such distance shall be measured from the opposite edge of the road where the zone abuts on an existing or proposed road, such distance may extend up to 25 m or more in the case of special Industries listed in N 6.3, provided further that ancillary buildings, such as essential staff quarters, canteen, garages, electricity stations, water tanks etc. may be permitted in such open spaces provided minimum distance of 10 m is left free from the boundary.

N 2.2.9 For narrow plots relaxations in marginal open spaces as prescribed in Table no. 29 and 29 (A) shall apply.

N 2.2.10 Shopping Mall/ Commercial Complex and like Building-

- a) **Built up Area** - Maximum permissible ground coverage shall be half of the plot size.
- b) **Access Roads** - The minimum width of access road shall be 15 m. and above the plot shall about on this road.
- c) **F. A. R.** - Maximum FAR. shall be 1.
- d) **Open Space** -
 - i) **Front Open Space** - minimum 6 m.
 - ii) **Side and Rear Open Space** - minimum 6 m. or as required as per the Rule No.13.1.3 (b) whichever is higher.

N - 2.3 Additional F. S. I. in Lieu of Area Required for Roads -

The Municipal Commissioner shall permit additional floor space index on 100% area required for road widening or for constructing new roads proposed under Development plan or those proposed under any provision of B. P. M. C. Act, 1949 if the owner (including a lessee) of such land handover such area free of all encumbrances for road widening or constructing new roads without claiming any compensation therefore, F. S. I. on such 100 per cent of the area going under such widening or road construction shall, however be 40 per cent of the net build able plot area of the plot remaining after release of the land required for such road widening or road construction. This concession would also be available in all Development Zones, Permissible height of 18 m. may be relaxed up to 21 m. This additional F. S. I. shall be granted only after the owner constructs a W. B. M. road on the area handed over as per the specifications prescribed by the Commissioner or after payment of amount required for such construction as decided by the Municipal Commissioner.

N-2.4 TRANSFERABLE DEVELOPMENT RIGHTS (TDR)

Regulations for the grant of Transferable Development Rights (T. D. R.s) to owners / developers and conditions for grant of such rights.

N-2.4.1 The owner of a plot of land reserved for a public purpose in the development plan provided In accordance with the regulations excepting in the case of an existing or retention user or to any required compulsory or recreational open space shall be eligible for the award of transferable Development Rights (T. D.R. s) in the form of Floor Space Index (F. S. I.) to the extent and on the conditions set out below. The area under jurisdiction of Pimpri Chinchwad Municipal Corporation is divided into three zones i.e. from zone namely A, B & C marked on the plan annexed here to this Rule, Such award will entitle the owner of the land to F. S. I. in the form of Development Rights Certificate (D. R. C.) which he may use for himself or transfer to any other person.

N-2.4.2 Subject to the regulations -1 above where plot of land is reserved for any purpose specified in section 22 of Maharashtra Regional and Town Planning Act. 1966 the owner will be eligible for Development Rights (T. D. R. s) after the said land is surrendered free of cost as stipulated in regulation 5 in this rule and after completion of the development or construction as regulation in this rule if he undertakes the same.

- N-2.4.3** Development Rights (D.R. s) will be granted to an owner or a lessee only for reserved land which are retain able/ non-retainable under the Urban Land Ceiling & Regulations Act 1976 and in respect of all other reserved land to which a provisions of the aforesaid Act do not apply and on production of a certificate to this effect from the Competent Authority under the Act before a development right is granted. In the case of non-retainable lands the grant of development right shall be such extent and subject to such conditions as Government may specify. Development Rights (D. R. s) are available only in case where development of a reservation has not been implemented.
- N-2.4.4** Development Rights Certificates (D.R. C.) will be issued by the commissioner himself. They will state in figures and in words the F. S. I. credit in sq. mtr. of the built up area to which owner or lessee of the said reserved plot is entitled the place under user zone in which the D. R. s are earned under the areas in which such credit may be utilised.
- N-2.4.5** The built up area for the purpose of F. S. I. credit in the form of a D.R. C. shall be equal to the gross area of the reserved plot to be surrendered and will proportionately increase or decrease according to the permissible F. S. I. of the zone where from the T. D. R. has originated.
- N-2.4.6** When an owner/ lessee also develops or constructs the built up area on the Surrendered Plot at his cost subject to such stipulation as may be prescribed by the commissioner or the appropriate authority as the case may be and to their satisfaction and hands over the said developed/ constructed built up area to the commissioner/ appropriate authority free of cost he may be granted a further D.R. in the form of F. S. I. equivalent to the area of the Construction / Development done by him utilization of which etc will be subjected to the regulation contained in this rule (The Option of availing of T. D. T. / Development as per Gazette Note Appendix R-7 as amended shall be the owners).
- N-2.4.7** A D. R. C. will be issued only on the satisfactory - Compliance of the conditions prescribed in the rule.
- N-2.4.8** A holder of a D.R. C. who desires to use the F. S. I. credit their on a particular plot of land shall attach to his application for development permissions Valid D.R. C's to the extent required.
- N-2.4.9** **The following rules shall apply for the use of D. R. C.**
- a) D.R. C's shall not be used in zone 'A' amenity areas in other sectors of city.
 - b) D. R. C's shall not be used on plot for housing schemes of slum dwellers for which additional F. S. I. is permissible under appendix T and the areas where the permissible F. S. I. is less than 1.00.
 - c) D. R. C's from any TDR zone in sanctioned DP of PCMC including additional area limit, shall be allowed to be used in BRT corridor on the payment of the premium charges on will be decided by the commissioner PCMC on time to time as specified at N.2.5.2

- d) Subject to restrictions mentioned in (a), (b), (c) and above
 - i) D.R. C's originating from zone 'A' maybe used in zone 'B' or 'C'.
 - ii) D.R. C's originating from zone 'B' maybe used in zone 'B' or 'C'.
 - iii) D.R. C's originating from zone 'C' maybe used in zone 'C' only.

N-2.4.10 D.R. C's may be used on one or more plots of land whether vacant or already developed or by the erection of additional storied or in any other manner consistent with these regulations but not so as exceed in any plot a total built up F. S. I. higher than that prescribed.

N-2.4.11 The F. S. I. of a receiving plot shall be allowed to be exceeded by not more than 0.4 in respect of a D.R. available respect of the reserved plot and up to a further 0.4 in respect of A.D. R. available in respect of land surrendered for road widening or construction of new roads as prescribed.

N-2.4.11 (a) However, such F. S. I. on the receiving plots under prescribed regulation shall be allowed to 100% of the gross plot area without deducting the required public amenity space.

N-2.4.12 D.R. shall be Granted and D.R. C. 's issued only after the reserved land is surrendered to the Corporation free of cost and free of encumbrances and entered in the name of PCMC in the land records and after the owner or lessee has levelled the land to the surrounding ground level and after he has constructed a 1.5 m. height compound wall (or at height stipulated by the commissioner) with a gate at the cost of the owner and to the satisfaction of the Commissioner. In case, the owner does not want to level the land and construct a compound wall and gate, he shall have to pay to the PCMC its cost to be decided by the Municipal Commissioner. In case of D. R. C's to be granted for new roads / road widening, the owner shall have to construct a W. B. M. road on the area handed over as per the specifications prescribed by the Commissioner or after payment of amount required for such construction as decided by the Municipal Commissioner.

N-2.4.13 With an application for development permission where an owner seeks utilization of D.R. she shall submit the D.R. C. to the commissioner who shall endorse thereon in writing in figures and words quantum of the D.R. proposed to be utilized before granting development permission and when the development is complete the commissioner shall endorse on the D. R. C. in writing in figures and words the quantum of the D. R. s actually utilized and the balance remaining there after if any before issue of occupation certificate.

N-2.4.14 A D. R. C. shall be issued by the commissioner himself as a certificate printed on a bond paper in an appropriate form prescribed by the commissioner. Such a certificate will be transferable negotiable instrument after due authentication by the commissioner. The commissioner shall mention a register in a form considered appropriate by him of all transactions etc. relating to grant of utilization of D. R. C.

N-2.4.15 The surrendered reserved land for which a D. R. C. is to be issued shall vest in the corporation / appropriate authority and such land shall be transferred in survey records in the name of corporation / appropriate authority. The surrendered land so transferred to the corporation who is not the appropriate authority for implementation of the proposal the appropriate authority may on application there after be allowed by the corporation to transfer the land in favour of that appropriate authority on appropriate terms as may be decided by the corporation. The area under the planning jurisdiction of Municipal Corporation is divided into three TDR zones as mentioned below:

- i) All gothans areas as shown on DP of PCMC.
- ii) **TDR 'B' Zone:** All the remaining area of the villages namely Pimpri, Chinchwad, Bhosari, Akurdi, Nigdi, Ravet, excluding the area of the above villages falling under 'A' Zone of TDR.
- iii) **TDR 'C' Zone :** All the remaining area of the villages namely Sangavi, Pimple Saudagar, Pimple Gurav, Pimple Nilakh, Wakad, Rahatni, Thergaon, Moshi, Chikhali, Dapodi & the remaining area under the planning jurisdiction of Municipal Corporation except area falling under TDR 'A' Zone & 'B' Zone.

Note : In case of any discrepancy regarding the TDR Zones, the Municipal Commissioner is empowered to interpret the same.

N-2.5 BRT Corridor

The area upto 100 mtrs. width along the proposed D. P. road boundary on both the sides of the B. R. T. routes will be called as "B. R. T. Corridor" as shown on the plan. Following roads are included in the "B. R. T. Corridor."

For BRT Routes

- | | |
|---------------------------|---|
| 1) Aundh - Ravet Road | 2) Mumbai - Pune Road |
| 3) Nasik Phata to Wakad | 4) Kalewadi Phata to Dehu - Alandi Road |
| 5) Dehu - Alandi Road | 6) Nasik Phata to Indrayani River (Moshi) |
| 7) Vishrantwadi to Alandi | 8) Telco Road |

For Feeder Routes

- | | |
|--------------------------------|---|
| 1) Expressway to Bhakti Shakti | 2) Hinjewadi I. T. Park to Talwade I. T. Park |
| 3) Spine Road | 4) Road Parallel to Aundh - Ravet Road |

N-2.5.1 Additional FSI on BRT Corridor

As per the provision of the sanctioned Development Control Regulations N - 2.3, if the proposed plot is affected by DP road or road widening or any road proposed under provisions of BMC Act, 1949 additional FSI to the extent of maximum 40 percent of the net plot area is allowed.

The receiving plot in the BRT Corridor shall be allowed such additional FSI along with the TDR so that the permissible total FSI shall not exceed 2.00 irrespective of plot size / area and width of access road (FSI of the D P Road upto 0.40 shall be without any premium charges).

The plot in the BRT Corridor irrespective of whether affected or not by road widening or by proposed road shall be allowed to be exceeded by not more than 1.00 FSI on the net plot area in addition to the original 1.00 FSI in respect of a Development Rights available of DP reservation or DP roads.

All the receiving plot in the BRT Corridor shall be allowed maximum 2.00 FSI as mentioned below:-

Area of Plot	Normal FSI 1.00
TDR or FSI in Lieu of Widening of Road, DP Road	Maximum 0.40
TDR of Reserved Sites	Maximum 0.40
Slum TDR	Maximum 0.20

N-2.5.2 TDR Utilization on Payment of Premium Charges

TDR generated from any of the zone, from the sanctioned Development Plan of old and extended limit shall be allowed in the BRT Corridor on the payment of premium charges, which should not be less than those decided vide General Body Resolution No. 452, dated 18th September 2008. These premium charges are to be decided by the Commissioner, Pimpri-Chinchwad Municipal Corporation from time to time. Premium shall not be charged for the 0.40 FSI of road widening area of receiving plot.

N-2.5.3 Parking Provisions

For the proposed buildings on the plots along within the BRT Corridor, the area for the parking shall be provided twice the provision of the parking area given in the Table No. 6 of the existing Development Control Regulations 14.2 where plot size is more than 1000 sq. m. it shall be binding on the plot owner / developer to develop the parking area and 25 percent of such developed parking area on ground floor shall be handed over to the Corporation free of cost. For plot size less than 1000 sq. m. instead of taking 25 percent small parking areas, premium should be taken for this area at the rate fixed by the Municipal Corporation.

N-2.5.4 Set Back/Front Margins

Set Back / Front Margin for all proposed development/buildings in the BRT Corridor shall be kept as 7.5 metres or that required as per the provision of existing sanctioned DCR whichever is higher.

N-2.5.5 FSI for DP Reservations

For DP Reservations in the BRT Corridor the FSI shall be allowed to be exceeded by not more than 0.80.

N-2.5.6 Modifications in Existing Regulations

In addition to the above rules for the BRT Corridor, for the other matters which are not included in this notification, the provisions of the sanctioned existing Development

Control Regulations shall be applicable. In addition to the above following changes in existing Development Control Regulations are modified and sanctioned.

Regulations No.	Existing DCR Rules	Proposed Rules
N.2.4.9©	<p>D. R. C's shall not be used on plot fronting on the following roads upto a 40 mtrs. from the road boundary.</p> <p>1) Pune to Mumbai National Highway 2) Pune to Nashik National Highway 3) Pune to Mumbai via Aundh National Highway</p>	<p>DRC's from any TDR Zone in sanctioned DP of PCMC including additional area limit, shall be allowed to be used in BRT Corridor on the payment of the premium charges as will be decided by the Commissioner, PCMC from time to time as specified at N.2.5.2</p>
N.2.4.15	<p>TDR'A' All the properties fronting on the both sides of the following roads upto depth of 40 mtrs. from the proposed road widening line as earmarked the sanctioned Development Plan of PCMC</p> <p>1) Pune to Mumbai National Highway 2) Pune to Nashik National Highway 3) Pune to Mumbai via Aundh National Highway</p>	<p>TDR'A' All gaothans areas as shown on the DP of PCMC</p>

The above modifications are approved/ sectioned by the government with the following conditions-

- 1) Maximum care should be taken to avoid accidents on the BRT Corridors. For this purpose grade separations as far as possible for pedestrians using the BRT should be adopted. Service roads are must. Wherever grade separation is not done, signaled, zebra crossing should be provided and the same should be manned by a traffic constables or traffic wardens depending on the volume of traffic.
- 2) The 100 meters ball dress on either sides of the BRT Corridor should be properly planned and developed. An action plan for development of these belts should be prepared in advance by the Municipal Corporation incorporating sufficiently wide roads, open space and other infra structural facilities, strictly adhering to the norms of the D. C. regulations.
- 3) The funds generated from premium should strictly be used for the development for BRT corridors and a separate account should be maintained for this purpose.

□□□

APPENDIXO

Temporary permissions may be granted for structures or for users other wise permissible as per development plan zoning

- a) The following types of structures may be considered for grant of temporary permission
- 1) Masons permission either for protection from rain or covering of the terrace to protect from rain during the monsoon only
 - 2) Pendls allowed for various fairs ceremonies religious functions etc.
 - 3) Structures for godown/storage temporary site office only during construction work
 - 4) Temporary exhibition/circus etc
 - 5) Watchman's chowky constructed for protection of land
 - 6) Storage of important machinery in case of factories in industrial land before installation etc.
 - 7) Structures for ancillary work for quarrying in conforming zone
 - 8) MAFCO stalls milk booths and such other type of stalls etc
 - 9) Transit accommodation for persons to be rehabilitated during construction Period
 - 10) No such permission should be granted for a period of more than 1 year at a time and for an aggregate period of more than 3 years for (3) (5) (6) (7) (8) and (9)

It is desirable to grant permission for construction of structures on a permanent basis if F. S. I. available instead of continuing temporary permission from year to year.

DOD

APPENDIX P
(Rule No. 20.2)

ADDITIONAL FIRE PROTECTION REQUIREMENTS FOR BUILDING MORE THAN 15 MIN HEIGHT AND BUILDINGS AS COVERED BY RULE NO 6.2.6.1

P-1 GENERAL

P-1.1 In addition to the provisions of part iv fire protection of National Building code of India the chief fire officer Pune fire brigade may insist on suitable provisions in building from fire safety and fire fighting point of view depending on the occupancy and height of buildings

P-2 CONSTRUCTION

P-2.1 BUILDING MATERIALS

P-2.1.1 Load bearing elements of construction and elements of construction for which the required fire resistance is one hour or more shall be of noncombustible material. Interior finish material [wall paneling, floor coverings etc.] may be permitted of material having there ratting for flame sprayed and smoke developed not exceeding a very low flame sprayed limit in accordance with IS 1642-1960 [class i] ceiling linings shall be of non-combustible or of plasterboard.

P-2.1.2 Stairways and corridor shall not contain combustible materials.

P-2.2 Structural members such as supports and bearing valves shall have fire resistance rating of 3 hours, transoms and ceilings 2 hours to 4 hours.

P-2.3 Internal walls and partitions separating corridors from areas of floor that are used for any purpose other than circulation shall have fire resistance of not less than 1 hour. There shall be no openings in such walls other than half for doors or delivery hatchery with fire resistance not less than an hour to one hour. Fire sections [fire walls] subdividing the building to prevent fire sprayed shall have a fire resistance ratting not less then 2 hour.

P-2.4 Facades shall consist of non-combustible building materials. A fire must bridge a distance of at least 0.9 m between storeys.

P-3 STAIRCASE ENCLOSURES FOR BUILDINGS MORE THEN 15 MIN HEIGHT

P-3.1 The internal enclosing wall of staircase shall be of brick or R. C. C. construction having fire resistance of not less than 2 hours. All enclosed staircases shall be reached via ventilated lobby and shall have access through self closing doors of at least half hour fire resistance. These shall be single swing doors opening in the direction of the escape. The door shall be fitted with check action door closers.

P-3.2 The staircase enclosure on external wall of the building shall be ventilated to atmosphere at each landing.

P-3.3 Permanent vent at the top equal to 5% of the cross sectional area of the enclosure and openable ashes at each landing level with area not less than 0.5 sq m on the external wall shall be provided. The roof of the shaft shall be at least 1 m above the surrounding road. There shall be no glazing or glass bricks in any internal enclosing wall of a staircase. If the staircase is in the core of the building and can not be ventilated at each landing a positive pressure of 5 mmw. g by an electrically operated blower/ blowers shall be maintain the mechanism for pressurizing as staircase shaft shall be so installed that the same shall operate automatically and also with manual operation facilities when the automatic fire alarm (see rule no. p-13.1.3) operator.

P-4 LIFT ENCLOSURES

P-4.1 The wall enclosing lift shaft shall have a fire resistance of not less than two hours shafts shall have permanent vents at the top not less than 1800 sq. m. (0.2 sq. m.) in clear area, lift motor rooms preferably be sited at the top of the shaft and shall be separated from lift shafts by the enclosing wall of the shaft or by the floor of the motor rooms.

P-4.2 Landing doors in lift enclosures shall open in the ventilated or pressurised corridor lobby.

P-4.3 The number of lifts in one lift bank shall not exceed four. Shaft for fire in a lift bank shall be separated from each other by a brick masonry or R. C. C. of wall of fire resistance of not less than two hours.

P-4.4 If the lift shafts and lift lobby are in the core of the building a positive pressure of not less than 2.5 m and not more than 3 mm w.g by an electrically operated blower/ blowers shall be maintained in the lift lobby and positive pressure of not less than 5 mm w. g. shall be maintained in the lift shaft. The mechanism for pressurizing the lift shaft and lobby shall be so installed that shall operate automatically when the automatic fire alarm operate.

P-4.5 Exit from the lift lobby if located in the core of the building shall be through a self closing smoke stop door of half hour fire resistance.

P-4.6 The lift machine room shall be separate and no other machinery shall be installed therein.

P-4.7 Lift shall not normally communicate with the basement. However, one of the lift may be permitted to basement level is pressurized and separated from the best of the basement area, by smoke actuated fire resisting door of two hour fire resistance. These doors can I also be kept in hold-open position by an electro magnet device to be linked with smoke detector.

P-5 External Windows

P-5.1 Areas of the openable external windows on a floor shall be not less than 2¹/₂ % of the floor area. The locks for these windows shall be fitted with budget lock of the carriage key type (which can be opened with the point of fireman's axe).

P-6 FIRE LIFTS

The following provision shall be made for a fire lift.

- a) To enable fire services personnel to reach the upper floors with minimum delay, one or more of the lift shall also be designated as to be available for the exclusive use of such personnel in an emergency and be directly accessible to every dwelling / lettable floor space of each floor.
- b) The lift shall have a floor area of not less than 1.4 sq. m. with a minimum dimension of 1.2 m. It shall have a loading capacity of not less than 545 kg. (8 persons lift) with automatic closing doors.
- c) There shall be an alternate electric supply from a generator of an adequate capacity, cables shall run in route safe from fire i.e. within the lift shaft. In case of failure in normal electric supply, Information Technology shall automatically trip over the supply, however for apartment building this change over of supply could be done through a manually operated change over switch.
- d) The operation of fire lift shall be by a simple toggle or two button switch situated in a glass fronted box adjacent to the lift at the entrance level. When the switch is on, landing call points will become inoperative and the lift will be a car control only or on priority control device. When the switch is off, the lift will return to normal working. This lift can be used by the occupants in normal times.
- e) The words FIRE LIFT shall be conspicuously displaced in fluorescent paint on the lift landing doors at each floor level.
- f) Collapsible gates shall not be permitted for lifts, the lifts shall have solid doors with fire resistance of at least one hour.
- g) The speed of the fire lifts shall be such that it can reach the top floor from ground level within one minute.

P-7 BASEMENTS

- P-7.1 Each basement shall be separately ventilated. Vents with cross sectional area (aggregate) not less than 2.5% of the floor area spread evenly round the perimeter of the basement shall be provided in the form of grills or breakable stall boards lights or pavement lights or by way of shafts. Alternatively a system of air inlets shall be provided at basement floor level and smoke outlets at basements ceiling level. Inlets and extracts may be terminated at ground level with stall boards or pavement lights as before but ducts to convey fresh air to the basement floor level have to be laid stall boards and pavement lights should be in positions easily accessible to the fire brigade and clearly marked 'smoke outlet' or 'air inlet' with an indication of area served at or near the opening.

- P-7.2** The staircase of basements shall be of enclosed type having fire resistance of not less than two hours and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such positions that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storeyes of the building and shall communicate with basement through a lobby provided with fire resisting self closing doors of one hour fire resistance. If the travel distance exceeds 18.50 m additional staircase at proper place shall be provided.
- P-7.3** In multi storeyes basements intake ducts may serve all basement levels but each Basement and compartment shall have separate smoke outlet duct or ducts.
- P-7.4** Mechanical extractors for smoke venting system from lower basement levels shall also be provided The system shall be such design as to operate on actuation of heat sensitive detectors or sprinklers if installed and shall have the standard units. It should also have an arrangement to start it manually and shall be designed to function at a temperature not less than 550° c.
- P-7.5** Kitchens working on gas fuel, departmental stores, and shops shall not be permitted in basement/ sub-basement.
- P-8 COMPARTMENTION (FIRE SECTIONS)**
- P-8.1** If the uncompartmented floor space on a floor exceed 750 sq. meters it shall be separated in compartments each not exceeding 750 sq. meters by means of fire walls of not less than two hours fire resistance. In extended buildings, fire walls should be erected at distances not exceeding 40 meters. For floors with sprinklers, the area mentioned above may be increased by 50 percent.
- P-9 SERVICEDUCTS**
- P-9.1** Service ducts shall be enclosed by walls having a fire resistance of not less than two hours. Doors for inspection or access shall also have a fire resistance not less than two hours.
- P-9.2** If the cross sectional area exceeds 1 sq. m. shall be sealed where it Passes a floor by carrying the floor through the duct. The floor within the duct shall be pierced for any service pipe or ventilation trunk and shall fit as closely as possible around any such pipe or trunk.
- P-9.3** A permanent vent shall be provided at the top of the service shaft of cross sectional area of not less than 460 sq cm. or 6.25 sq. cm. For each 900 sq. cm. of the area of the shaft whichever is more.
- P-10 REFUSE CHUTES AND REFUSE CHAMBERS**
- P-10.1** Hoppers to refuse chutes shall be situated in well ventilated position and the chutes shall be continued upwards with an outlet above roof level with an outlet above roof and with an enclosure wall of non-combustible material with fire resistance not less than two hours. The hoppers shall not be located within the staircase enclosure.

P-10.2 Inspection panel and hopper (charging station) opening shall be fitted with tight fittings metal doors, covers, having a fire resistance of not less than one hour.

P-10.3 Refuse chutes shall not be provided in staircase walls, air conditioning shafts etc.

P-10.4 Refuse chambers shall have walls and floors or roofs constructed of non-combustible and impervious material and shall have a fire resistance of not less than two hours. They shall be located at a safe distance from exit routes.

P-11 BUILDING SERVICES

P-11.1 Electrical services

- a) The electric distribution cables / wiring shall be laid in separate duct. The duct shall be sealed at every alternative floor with non-combustible materials having the same fire resistance as that of the duct.
- b) Water mains, telephone lines, inter-com-lines, gas pipes or any other service line shall not be laid in the duct for electric cables.
- c) Separated circuits for water pumps, lifts, staircases and corridor lighting and blowers for pressurizing system shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes so that fire in one circuit will not affect the others. Master switches essential services circuits shall be clearly labelled.
- d) The inspection panel doors and any other opening in the shaft shall be provided with airtight fire doors having the fire resistance of not less than two hours.
- e) Medium and low voltage wiring running in shafts, and within false ceiling shall run in metal conduct.
- f) An independent and well ventilated service room shall be provided on the ground floor with direct access from outside or from corridor for the purpose of termination of electric supply from the licensee service and alternate supply cables. The doors provided for the service room shall have fire resistance of not less than two hours.
- g) If the licensees agree to provide meters on upper floors, the licensee cables shall be segregated from consumers cable by providing a partition in the duct. Meter rooms on upper floors shall not open into staircase enclosures and shall be ventilated directly to open air outside.
- h) PVC cables should have an additional sheathing or protection provided by compounds sprayed on after installation because of the notorious secondary damage in case of fire.

P-11.2 Town Gas / LP Gas Supply Pipes

Where gas pipes are run in the building the same shall be run in separate shafts exclusively for this purpose and these shall be on external walls, away from the staircases : There shall be no interconnecting of this shaft with the rest of the floors. Gas meters shall be housed in a suitably constructed metal cupboard located at well ventilated space at ground level.

P-11.3 Staircase and Corridor Lightings

- a) The staircase corridor lighting shall be on separate circuit and shall be independently connected so as it could be operated by one switch installation on the ground floor easily accessible to fire fighting staff at any time irrespective of the position of the individual control of light points, if any.
- b) For assembly, institutional buildings, the alternative source of supply may be provided by battery continuously trickle charged from the electric mains.
- c) Suitable arrangements shall be made by installing double throw switches to ensure that the lightings installed in the staircase and the corridor do not get connected to two sources of supply simultaneously. Double throw switch shall be installed in the service room for terminating the stand by supply.
- d) Emergency lights shall be provided in the staircase / corridor for assembly and institutional buildings.

P-11.4 Alternate Source of Electric Supply

A stand by electric generator shall be installed to supply power to staircase and corridor lighting circuits, fire lifts, and stand by fire pump, pressurization fans and blowers, smoke extraction and damper systems in case of failure of normal electric supply. The generator shall be capable of taking starting current of all the machines and circuit stated above simultaneously. If the stand by pump is driven by diesel engine, the generator supply need not be connected to the standby pump. Where parallel HV / LV supply from a separate substation is provided with appropriate transformer for emergency the provisions of generator may be waived in consultation with the Chief Fire Officer, Pimpri-Chinchwad Municipal Corporation.

P-11.5 Transformers

- a) If transformers are housed in the building below the ground level it shall be necessarily in the first basement in separate fire resisting room of 4 hours rating. The room shall necessarily be at the periphery of the basement. The entrance to the room shall be provided with a steel door of 2 hours fire rating. A curb (sill) of a suitable height shall be provided at the entrance in order to prevent the flow of oil from ruptured transformer into other parts of the basement. The direct access to the transformer room shall be provided preferably from outside. The switch gears shall be housed in a separate room separated from the transformer bays by a fire resisting wall with fire resistance not less than four hours.
- b) The transformer if housed in basement shall be protected by an automatic high-pressure water spray system. (Mulsifyre System).
- c) In case the transformers housed in the basements totally segregated from other area of the basements by 4 hours fire resisting wall/walls with an access directly from outside it may be protected by carbondioxied or B. C. F. fixed installation system.

- d) When housed at ground floor level it/they shall be out off from the other portion of premises by fire resisting walls of 4 hours fire resistance.
- e) They shall not be housed on upper floors.
- f) A tank of RCC construction of capacity capable of accommodating entire oil of the transformers shall be provided at lower level, collect the oil from the catch-pit in case of emergency, The pipe connecting the catch-pit to the tank shall be of non combustible construction and shall be provided with flame-arrestor.

P-11.6 Air-Conditioning

- a) Escape routes like staircase, common corridors, lifts lobbies etc. shall not be used as return air passage.
- b) The ducting shall be constructed of substantial gauge metal in accordance with ii: 655-1963 Metal Air Ducts (Revised).
- c) Wherever the ducts pass through fire walls or floors the opening around the ducts shall be sealed with fire resisting materials such as asbestos rope, vermiculite concrete glass wool etc.
- d) As far as possible metallic ducts shall be used even for the return air instead of space above the false ceiling.
- e) The materials used for insulating the duct system (inside or outside) shall be of non combustible materials such as glass wool, spun glass with neoprene facing.
- f) Area more than 750 sq. m. on individual floor shall be segregated by a fire wall and automatic fire dampers for isolation shall be provided where the ducts pass through fire, walls, The fire dampers shall be capable of operating manually.
- g) Air ducts serving main floor areas, corridors, etc. shall not pass through the stair-case enclosures.
- h) The air handling units shall as far as possible be separate for each floor and air ducts for every floor shall be separate and in no way interconnected with the ducting of any other floor.
- i) If the air handling unit serves more than one floor, the recommendations given above shall be complied with in additions to the conditions given below.
 - i) Proper arrangements by way of automatic fire dampers working on smoke detectors for isolating all ducting at every floor from the main riser shall be made.
 - ii) When the automatic fire alarm operates the respective air handling units of the Air Conditioning system shall automatically be switched off.
- j) Automatic fire dampers shall be provided at the inlet of the fresh air duct and the return air duct of each compartment on every floor.
- k) Automatic fire dampers shall be so arranged so as to close by gravity in the direction of the air movement and remain to tightly close upon operation of a smoke detector.
- l) The air filters of the air-handling units shall be of non-combustible materials.
- m) The air handing unit room shall not be used for storage of any combustible materials.
- n) Inspection panels shall be provided in main trucking to facilitate the cleaning of ducts of accumulated dust and to obtain access for maintenance of fire dampers.

- o) No combustible materials shall be fixed nearer than 15 cm to any duct unless such duct is properly enclosed and protected with non-combustible material (glass wool or spunglass with neoprene facing enclosed and wrapped with aluminum sheeting) at least 3.2 mm thick and which would not readily conduct heat.

P-11.7 Boiler Room

Provisions of boiler and boiler rooms shall conform to Indian boiler act. Further the following additional aspects may be taken into account in the location of boiler/ boilers room;

- a) The boilers shall not be allowed in sub-basement but may be allowed in the basements away from the escape routes.
- b) The boilers shall be installed in a fire resisting room of 4 hour fire resistance rating, and this room shall be situated on the periphery of the basement. Catch pits shall be provided at the low level.
- c) Entry to this room shall be provided with composite door of 2 hours fire resistance.
- d) The boiler room shall be provided with fresh air inlets and smoke exhausts directly to the atmosphere.
- e) The furnace oil tank for the boiler of located in the adjoining room shall be separated by fire resisting wall of 4 hour rating. The entrance to this room shall be provided with double composite doors. A curb of suitable height shall be provided at the entrance in order to prevent the flow of oil into the boiler room in case of tank rupture.
- f) Foam inlets shall be provided on the external walls of the building near the ground level to enable the fire service to use foam. In case of fire.

P-12 PROVISIONS OF FIRST AID FIRE FIGHTING APPLIANCES

P-12.1 The first aid fire fighting equipment shall be provided on all floors including basements : life rooms etc in accordance with IS 2217-1963 Recommend actions for providing First aid fire fighting arrangements in public building in consultation with the chief fire officer Pimpri Chinchwad Municipal Corporation.

P-12.2 The fighting appliances shall be distributed over the building in accordance with IS : 2190-1971 code of practice for selection installation and maintenance portable first-aid fire appliances.

P-13 FIXED FIRE FIGHTING INSTALLATIONS

P-13.1 Building above 15 m in height depending upon the occupancy use shall be protected by wet riser, wet riser cum - down comer, automatic sprinkler installation high pressure water spray or foam generating system etc. as per details given in P-13.2 to P-13.7.

□□□

TABLE 29**Open Space Relaxations in Narrow Plots in Residential and Commercial Zones**

Sr. No.	Plot Site/ Dimension	Relaxation	Restriction on Building
1)	Depth is less than 15 m.	Rear open space may be reduced to 3 m.	No room except store room and staircase derives light and ventilation, from reduced open space.
2)	Width less than 15 m. but more than 11.5 m.	Side open space may be reduced to 3 m.	No room except store room and staircase derives light and ventilation, from reduced open space.
3)	Depth less than 11.5m but more than 9 m.	Front open space may be reduced to 3 m. and rear open space reduced to 1.8m.	i) Depth of the building not to exceed 5.5 m. ii) Height not to exceed 3 storeys or 10m.
4)	Width less than 11.5m but more than 9 m.	One side open space may be reduced to 3 m. and the other side open space may be reduced to 1.8 m.	i) Width of the building not to exceed 5.5 m. ii) Height not to exceed 3 storeys or 10m.
5)	Depth or width less than 11.5m.	Semi detached structure on adjoining plots with open spaces as at Sr. Nos. 3 or 4 above.	i) Depth of the building not to exceed 5.5 m. ii) Height not to exceed 3 storeys or 10m.
6)	Depth or width less than 9 m.	Open space may be reduced to 1.5 m. all around	Only ground floor structure.

Rule No. P-13.2 - The wet riser / wet riser-cum-down comers installations with capacity of water storage tanks and fire pumps shall confirm to the requirements as specified in Table 30.

Table No. 30
Firefighting Installation / Requirements

Sr. No.	Types of Building/ Occupancy	Type of Installation	Water Supply		Pump Capacity	
			Underground Static Tank	Terrace Tank	Near the Underground Static	At the Terrace Level
1	2	3	4	5	6	7
1)	Apartment Buildings below 15m. in height.	NIL	NIL	NIL	NIL	NIL
2)	Apartment Buildings a) Above 15.00m. but not exceeding 24.00m.	Wet-riser-cum-down comer with provision of fire service inlet only near ground level.	NIL	10000 liter	NIL	100 liters per minute giving a pressure not less than 1.5 kg/cm ² at the topmost hydrant
	b) Exceeding 24.00m. but not exceeding 45.00m.	Wet-riser-cum-down comer	50000 liter	20000 liter	1400 liters per minute giving a pressure not less than 3.2kg/cm ² at the topmost hydrant	450 liters per minute giving a pressure not less than 2.1 kg/cm ² topmost hydrant
	c) Above 24.00m. not exceeding 36.00 m. shopping are upto 250 sq. m and restricting the shopping area to the ground floor only	Wet rise -cum-down comer	50000liter	20000 liter	1400 liters per minute giving a pressure not less than 3.2 kg/cm ² at the topmost hydrant	450 liters per minute giving a pressure not less than 2.1 kg/cm ² at the topmost hydrant

	d)Above 24.00m. and not exceeding 35m. with shopping area exceeding	Wet riser-cum-down comer	100000 liter	20000 liter	2400 liters per minute giving a pressure not less than 3.2 kg/cm ² at the topmost hydrant	900 liters per minute giving a pressure not less than 2.1 kg/cm ² at the topmost hydrant
	e)Above 45.00m. andnot exceeding 60.00m.	Wet riser -cum-down comer	75000 liter	20000 liter	2400 liters per minute giving a pressure not less than 3.2 kg/cm ² at the topmost hydrant	900 liters per minute giving a pressure not less than 2.1 kg/cm ² at the topmost hydrant
	f)Above 60.00m. in height but not exceeding 70.00m.	Wet riser -cum-down comer	100000 liter	20000 liter	2400 liters per minute giving a pressure not less than 3.2 kg/cm ² at the topmost hydrant The pump provided should be of multistage type with suction and delivery sizes not less than 6" dia with low level riser upto 15 storeys and high level riser delivery for upper floors	900 liters per minute giving a pressure not less than 2.1 kg/cm ² at the topmost hydrant
3)	Non apartment buildings					
	a) Industrial storage and hazardous upto 15 m. in height	NIL	50000 liter	NIL	NIL	NIL

	b) Above 15m in height but not exceeding 24.00m. excepting educational buildings	Wet riser-cum-down comer	50000 liter	10000 liter	350 liter per minute giving a pressure not less than 3.2 kg/cm ² at the topmost hydrant except for institution business and educational buildings	450 liter per minute giving a pressure a less than 2.1 kg/cm ² at the topmost hydrant
	c) Educational buildings above 15m. but not exceeding 24.00m in height	Wet riser cum down comer	NIL	10000 liter	NIL	NIL
	d) Above 24.00m. but not exceeding 35m.	Wet riser cum down comer	75000 liter	20000 liter	2400 liter per minute giving a pressure not less than 3.2kg/cm ² . The pump provided will be of multistage type with suction and delivery sizes not less than 6" dia with low level riser up to 10 storey and high level riser delivery for upper floors.	
	e) Above 35.00 m. but not exceeding 500 m.	Wet riser (Fully charged with adequate pressure at all times and automatic in	100000 liter	NIL	1. 2400 liter per minute giving a pressure not less than 3.2 kg/cm ² . The pump	NIL

		operation)			provided will be of multistage type with suction and delivery sizes not less than 6" dia with low level riser up to 10 storey and high level riser delivery for upper floors.	
f) Above not exceeding 70.00m	Wet riser (fully charged) with adequate time and automatic in operation		150000 liter	NIL	1) 2400 liter per minute giving pressure not less than 3.2kg/cm ² the pump provided will be of multi stage type with suction and delivery sizes not less 6" dia with low level riser up to 10 storey and high level riser delivery for upper floor 2) A standby capacity of equal capacity shall be provided on alternate source of supply.	

Note :

- 1) Any of the above categories may incorporate an automatic sprinkler/drencher system, if the risk is such that requires installation of such protective methods.
- 2) Minimum of two hydrants shall be provided within the courtyard.
- 3) Wet-riser-cum-down comer is an arrangement for firefighting within the building by means of vertical rising mains not less than 10.00 cm. Internal diameter with hydrant outlets and hose reel on each floor / landing connected to an overhead water storage tank

for firefighting purpose through a booster pump, check valve and non return valve near the tank end and a fire pump gate and non return valve over the underground static tank. A fire service inlet at ground level fitted with non- return valve shall also be provided to the rising main for charging information technology fire services pump in case of failure of static fire pump over the underground static tank.

- 4) The performance of pumps specified above shall be at R. P. M. not exceeding 2000.
- 5) The above quantities of water shall be exclusively for firefighting and shall not be utilized for domestic or other use. The layout of underground water static tank shall be as per sketch attached.
- 6) Size of the riser shall be as under (internal diameter):
 - a) **Apartment Buildings:**
 - i) Up to 45 m-10 cm. with single hydrant outlet and hose reel on each floor.
 - ii) Above 45 m-15 cm. with twin hydrant outlet and hose reel on each floor.
 - b) **Non-Apartment Buildings:**
 - i) Up to 24 m-10 cm. with single hydrant outlet and hose reel on each floor.
 - ii) Above 24 m-15 cm. with twin hydrant outlet and hose reel on each floor.
- 7) A facility to boost up water pressure in the riser directly from the mobile pump shall be provided to the wet riser system with a suitable fire services inlets (collecting breaching with 2 numbers of 63 mm inlets with check valves for 15 cm diameter rising main) and a non return valve and a gate valve.
- 8) Hose reel internal diameter of rubber hose for hose reel shall be minimum 19 mm. A shut off branch with nozzle of 4.8 mm size shall be provided.

Provided that no automatic detector shall be required in any room or portion of a building which is equipped with an approved installation of automatic sprinklers.

ODD

P-13.3.1 Static Water Storage Tank

A satisfactory supply of water for the purpose of fire fighting shall always be available in the form of under ground static storage tank with capacity specified for each building with arrangements of replenishment by ground main or alternative source of supply at 1000 liters per minutes. The static storage water supply required for the above mentioned purpose should entirely be accessible to the fire engines of the local fire service. Provisions of suitable numbers of manholes shall be made available for inspection repairs and inspection of suction hose etc. the covering slab shall be able to withstand the vehicular load of 18 tons.

The domestic suction tank connected to the static water storage tank shall have an overflow capable of discharging 2250 liters per minute to a visible drain point from which by a separate conduits the overflow shall be conveyed to a storm water drain.

P-13.3.2 To prevent stagnation of water in the static water storage tank the suction tank of the domestic water supply shall be fed only through an overflow arrangement to maintain the level therein at the minimum specified capacity (see fig.2).

P-13.3.3 The static water storage tank shall be provided with a fire brigade collecting breaching with 4 nos 63 dia (2 Nos - 63 mm dia for pump with capacity 1400 liters / minute) instantaneous male arranged in a valve box at a suitable point at street level and connected to the static tank by a suitable fixed pipe not less than 15 cm dia to discharge water into the tank when required at a rate of 2250 liters per minute.

Rule No. P-13.3 (A)- Wet Riser Installation

They shall conform to IS 3644 - 1966 code of practice for installations of internal fire hydrants in multistoried or high rise buildings. In addition the wet riser shall be designed for zonal distribution enduring that unduly high pressure does not develop in risers and hose pipe. In addition to wet riser, wet riser cum down comer, first aid hose reels shall be installed on the floors of buildings above 24 m. and shall conform to IS 884-1969. Specifications for first aid hose reel for firefighting (fixed installation) the couplings of landing valves directly to the wet risers in the case of single outlet of the wet riser installations by means a adapter.

P-13.4 Automatic Sprinklers

Automatic sprinklers shall be installed

- a) In basement used as car parks if the area exceeds 500 sq. m.
- b) In multi-storeyed basements used as car parks and for housing essential services ancillary, to a particular occupancy.
- c) Any room or other compartment of a building exceeds 750 sq. m.
- d) Departmental stores or shops that totally exceeds 750 sq. m.
- e) All non-domestic floors of mixed occupancy considered to constitute a hazard and non provided with staircases independent of the remainder of a building.
- f) Godown and warehouses as considered necessary.
- g) On all floors of the building other than apartment buildings if the height of the building exceeds 60 m.
- h) Dressing rooms scenery docks stages and stage basements of theaters.

P-13.5 Automatic High Pressure Water Spray (Mulsifyre) System:

This system shall be provided for protection of indoor transformers of a substation in a basement area.

P-13.6 Foam Generating System :

This system shall be provided for protection of boiler rooms its ancillary storage of furnace oils in basement.

P-13.7 Carbon-Di-Oxide Fire Extinguishing System :

Fixed CO₂ fire extinguishing installation shall be provided as per IS : 63 82-1971 code of practice for design and installation of fixed CO₂ fire extinguishing system on premises where water or foam can not be used for fire extinguishment because of the special nature of the contents of the buildings / areas to be protected. Where possible BCF (Bromochlorodifluoromethane) installation may be provided instead of CO₂ installation.

P-14 FireAlarmSystem

All buildings mentioned below shall be equipped with fire alarm system as given below:-

- a) Special building above 15m. in height and businesses and industrial building above 24 m. in height.
 - i) Such buildings shall be equipped with a manually operated electrical fire alarm system with one or more call boxes located at each floor. The call boxes shall be also located that one or the other of them shall be accessible to all occupants of the floor without having to travel more than 22.5 m.
- b) The call boxes shall be of the break glass, type without any moving parts where the call is transmitted automatically to the control room without any other action on the part of the person operating the call box.
- c) All call, boxes shall be wired in closed circuit to a control panel in the control room located as given in this rule so that the floor number where the call box is actuated is clearly indicated on the control panel. The circuit shall also include one or more batteries with a capacity of 48 hours normal working at full load. The battery shall be arranged to be continuously trickle charged from the electric mains. The circuit may be connected to an alternate source of electric supply as in sub regulation (4) in Regulation 11 in this Appendix.
- d) The call boxes shall be arranged to sound one or more sounders so as to ensure that all occupants of the buildings are warned whenever any call box is actuated.
- e) The call boxes shall be so installed that they do not obstruct the exit-ways and yet their location can easily be noticed from either direction. The base of the call box shall be at a height of 1 m. from the floor level.
 - ii) All other buildings exceeding 24m. height excluding those mentioned in clause (1) above.

These buildings shall, in addition to the manually operated electrical fire alarm system be equipped with an automatic fire alarm system. The latter shall be in addition to any automatic fire extinguishing system installed in any particular occupancy in accordance with IS 2189-1976 code of practice for Automatic Fire Alarm System or any other Indian Standard prescribed from time to time.

P-15 LIGHTING PROTECTION OF BUILDINGS:

P-15.1 The lighting protection for building shall be provided based on the provisions of Part III of the national building code of India- 1970.

Rule No. P-16: Control Room

For all buildings mentioned in Regulation in P - 14, in this appendix except residential building, there shall be a control room on the entrance floor of the building with communication system (suitable public address system) to all floor planners along with details of the firefighting equipment and installation shall be maintained in the control room. The control room shall also have facilities to detect a fire on any floor through indicator board connection the fire detecting and alarm system on all floors. The staff in charge of the control room shall be responsible for the maintenance of the various services and firefighting equipment and installation. Control room shall be manned round the clock.

P-18 HOUSEKEEPING

P-18.2 To eliminate fire hazard a good house keeping inside the building and outside the building shall be strictly maintained by the occupants and/or the owner of the building.

P-19 FIRE DRILLS AND FIRE ORDERS

P-19.1 Fire notices/ orders shall be prepared to fulfil the requirements of the fire fighting and evacuation from the building in the event of fire and other emergency. The occupants shall be made thoroughly conversant with their action in the event of the emergency by displaying fire notices at various points. Such notices should be displayed prominently in broad lettering.

Rule No. 20(A):

With the prior approval of Government the Commissioner in consultation with the Chief Fire Officer may from time to time, add to or alter or amend the provisions in this

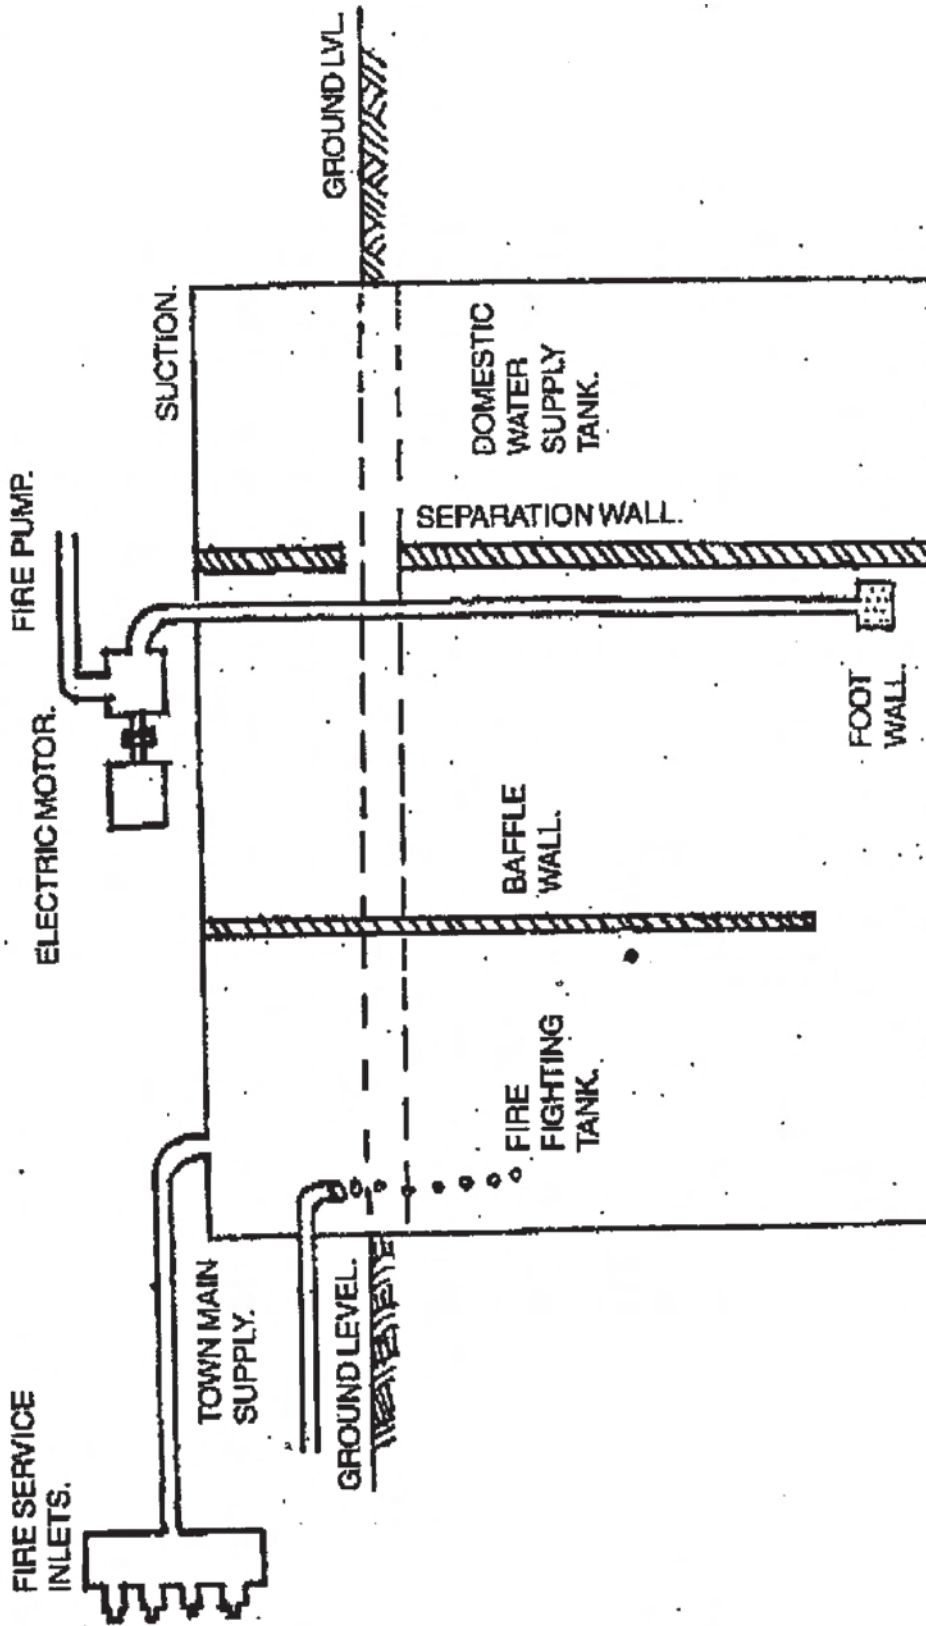

FIG. 1 : ARRANGEMENT FOR PROVIDING COMBINED
FIRE FIGHTING AND DOMESTIC
WATER STORAGE TANK.
AS PER RULE NO. P.13.3.3.

FIG. 2 : APARTMENT BUILDINGS
EXCEEDING 16 m.

FIG. 3 : APARTMENT BUILDING
EXCEEDING 16 m.

APPENDIX-R

Policies / Development Strategies for lands included in the EWS / HDH reservation Pimpri Chinchwad Municipal Corporation schools in rental premises-public participation for effective implementation of the development plan and mini urban renewal project for reservations of encumbered properties in gaathan.

The policies / development strategies herein below mentioned shall be deemed to constitute an integral part of the development plan/development control rules.

- R-1** In cases of bonafide and registered housing societies whose lands purchased prior to the publication of the draft revised development plan fall in site reserve for EWS Housing corporation may permit rehabilitation of the member of such housing societies.
- a) On part of the same land purchased by the society or on an alternative land in the same reservation or elsewhere
 - b) In case of plotted development or group housing pattern, maximum size of the housing site shall not exceed 2000 sq. ft. (185 sq. mt.) per member for individual housing.
 - c) In case of flatted development maximum tenement density of 120 tenements per ha is reached and no tenements exceed 80 sq. mt. (860 sq. ft.) in any case
 - d) Such rehabilitation shall be restricted to the number of members as existing on the roll of the society immediately prior to the draft revised development plan.
 - e) Such rehabilitation will be considered only in those cases where the lands purchased by the societies were unreserved lands from the residential zone of the 1966 dev plan not from the & green zone or reservations.
- R-2** In case of land owners whose lands are reserved for HDH the corporation may permit rehabilitation of the original owners in lands included in HDH reservations subject to the following conditions.
- a) The owner/ owners whose lands are included in the HDH reservation are otherwise rendered completely landless.
 - b) The land to be permitted for such rehabilitation shall be on the basis of maximum plot area of 2000 sq. ft. (185 sq. mt.) per family plus approach roads if required.
- R-3** Sites reserved of EWS housing may be exploited by the corporation or by any development authority which may be set up for such purpose in future,

R - 4 Primary School In Rented Premises In Gaothan

Where existing buildings in gaothan have been occupied by PCMC for municipal school on rental basis wholly or partly and where reservation of the building in the development plan has been made on the basis of such occupation by the municipal school the owner may be allowed to redevelop the property use the permissible FSI for compatible other purposes and hand over to the PCMC newly built up area not less than the area occupied by the school with such specifications of constructions as may be directed by the corporation on the same old rent subject to the condition that the owner shall be permitted in such cases an extra FSI to the extent if area occupied by the rented school but limited to 40 % of the normally permissible FSI on the remaining area the regulation about maximum height of building may also be relaxed in such cases and upto 20 m may be permitted only if required to enable the extra FSI being availed of.

R - 5 Public Participation

Reservations for non remunerative purpose like garden school play ground hospital etc. may be allowed - by the PCMC to be exploited by any recognised registered public institution working in the field of reservation by such institution is assured to be at same level and norms if it were implemented by the PCMC itself.

R - 6 Mini Urban Renewal Project for Reservations of Encumbered Properties in Gaothan

Almost all sites reserved in the gaothan contain few or more structures such reservations viz for the purposes of school, dispensaries, shopping centers, family planning clinics where they are on encumbered land may be developed by the corporation by treating them as mini urban renewal projects where under part of the site (not more than 50 per cent in any case) may be used by the corporation for rehabilitation of the existing occupants Such a treatment will not however be permitted in case of reservations for open spaces, playground, parking spaces, children's play ground etc where the intention is to create completely open spaces through the reservations.

R - 7 Shopping Center

APPENDIX-S

In the context of the policy, the information Technology Industry, Industry, IT Services and IT Enabled Services as defined below :

IT taskforce of Government of INDIA has defined IT software as follows :

- a) **IT Software** : IT Software is defined as any representation of instruction, data, sound or image, including source code and object code, recorded in a machine readable form and capable of being manipulated or providing interactivity to a user, with the means of a computer.
- b) **IT Hardware** : IT Hardware covers approximately 150 I. T. products notified Directorate of Industries.
- c) **IT SERVICES AND IT ENABLED SERVICES** : These include various IT Services and are defined by the IT Task force of the Government of India as follows :

"IT Service including IT Enabled Service is defined as any unit that provides services that result from the use of any IT Software over Computer System for realizing any value addition."

The directorate of Industries has prepared and published an illustrative list of such IT Enabled Services which is to be updated from time to time.

Notwithstanding anything contained in these regulations any telemetric equipment storage erection facility can have a height as required for effective functioning of that system.

Any covered antenna / dish antenna / communication tower will be allowed to be erected free of F. S. I. if used for Telecom (basic cellular or satellite telephone) or ITE purposes, which shall include equipment relating to earth station V-Sat, Routes, Transponders and similar IT related structures or equipment.

"Notwithstanding anything contains in these regulations, IT/ ITES on the plots premises fronting on roads having width more than 12,0 metre." shall be allowed.

"IT/ITES shall be permitted in 1-1 zone and services Industrial Estates on all plots fronting on roads having width more than 12 metre."

"IT/ITES shall be permitted on all plots fronting on roads having width more than 12metre."

Development of IT / ITES with ancillary residential development shall be allowed in No Development Zone subject to the following :-

- i) The total F. S. I. shall not exceed 0.20.
- ii) Residential Development shall not exceed one third of the total built-up area.
- iii) Construction of ITE/ ancillary Residential use may be permitted (in a suitable location so as to keep as much of remaining space open) up to 20 per cent on 10 per cent of the area of plot On remaining 90 per cent plot, trees shall be planted at the rate of 500 trees per hectare.

- iv) Sub-division of land shall be permitted with area of the plot so sub-divided being not less than 4000 sq. mt.
Subject to approval by Director of Industries, the Commissioner/ Chief Officer or as the case may permit the floor spaces indices specified in these regulations to be exceeded to the extent of 100 per cent over and above the permissible F. S. I. as under (including for IT / ITES units located in NDZ / Green Zone / Agriculture Zone proposed in the Development Plan or Regional Plan).
- i) 100 per cent additional F.S.I, shall be made available to all IT/ITES units in public IT parks.
 - ii) 100 per cent additional F. S. I. shall also be made available to all registered IT/ ITES units located in Private IT parks approved by the Directorate of Industries.
 - iii) Permission for erecting towers and antenna up to the height permitted by the Civil Aviation Department shall be granted by the concerned municipal bodies at the time and as a part of approval of building plan itself.
 - iv) Additional F. S. I. to IT/ ITES units would be available only upon full utilization of basic admissible F. S. I.
 - v) Additional F. S. I. to IT / ITES units would be available to IT / ITES Parks duly approved by the Directorate of Industries.
 - vi) The additional F. S. I. shall be granted upon payment of premium which shall be paid in the manner as may be determined by the Government, such premium shall be recovered at the rate of 25 per cent of the present day market value of the land under reference as indicated in the Ready Reckoner.
 - vii) 25 per cent the total premium shall be paid to the Government and remaining 75 per cent amount shall be paid to the said respective Municipal Corporation, Municipal Councils, Special Planning Authority or New Town Development Authority. Where no such Planning Authority exists the share of premium shall be paid to the MIDC.
 - viii) The premium so collected by the Planning Authorities/ MIDC shall be primarily used for development/ up gradation of offsite infrastructure required for the IT/ ITES Park and the utilization of this premium shall be monitored by the empowered committee.
 - ix) In the event, the developer comes forward for provision of such offsite-infrastructure at his own cost, then the respective Planning Authority or the MIDC as the case may be shall determine the estimated cost of the works and shall also prescribe the standards for the work. After completion of the works the said Planning Authority/ MIDC shall verify as to whether the same is as per prescribed standards and thereafter, by deducting the cost of works, the balance amount of premium shall be recovered by the said planning authority MIDC.
 - x) Users / Services ancillary to the IT / ITES. While developing site for IT / ITES with additional F. S. I. user ancillary to the principal user, as may be approved by the directorate of industries shall also be allowed.
 - xi) No condo nation in the required open spaces, parking and other requirements prescribed in these regulations shall be allowed in case of such additional F. S. I.

APPENDIX-T

SPECIAL REGULATIONS FOR REDEVELOPMENT OF SLUMS WITHIN THE JURISDICTION OF PIMPRI CHINCHWAD MUNICIPAL CORPORATION

T-1 Applicability

Provisions of this Appendix shall be applicable to slums and the slum dwellers staying therein which, are censured and having photo passes as per 1987 census or those whose names have appeared in the Legislative Assembly Voter's list of 1985 which have been declared and notified as "SLUMS" by the Component Authority under the provisions of the Maharashtra Slum Areas (improvement, Clearance and Redevelopment) Act 1971. The provisions of the Appendix shall prevail over the corresponding provisions of the Development Control Rules. In respect of all matters NOT specifically mentioned in this Appendix, the Development Control Rules shall be applicable.

T-1 (1) The applicability of this appendix shall also be subject to the approval and written consent of the Committee, appointed as per T - 6.

T-1 (2) The provisions of this appendix shall NOT apply to slum areas existing on any lands earmarked as Hill Tops/Hill Slopes, Green Belts, No Development Zones and Reservations for any public purpose in the development plan and in open space of approved layouts wherein residential land use and development is otherwise not permissible. Such slums are to be evicted.

T-1 (3) The owner of the land shall be allowed to redevelop the slum area subject to the provisions laid down in this Appendix - T.

T-2 F. S. I./ FAR. (Floor Area Ratio)

The permissible floor area ratios for Redevelopment Schemes of Slum areas shall be as follows.

T-2 (1) Permissible FAR in congested and non-congested area shall be upto 2.50, out of which maximum FAR 0.50 may be utilised only for convenience shopping shall be permitted only on the Ground floor, irrespective of whether the site is located in R-1 or R-2 zone.

T-3 Tenement Density

Additional tenements over and above the existing number of tenements rehabilitated in a slum site, shall be permitted in a slum re-development scheme, subject to maximum permissible tenement density. Purely commercial units provided on ground floor shall NOT be counted as tenements computation of tenement density.

T-3 (1) The maximum tenement density should not exceed 500 tenement per net Hectare on the basis of F. S. I. 1.00. The number of tenement per Hectare shall be increased in proportion to the permitted.

T-3 (2) All eligible existing tenements in the slum site, as far as possible be re-settled in the same plot, subject to the maximum tenement density permissible. The terms and conditions or re-settlement of such existing tenements shall be as governed by the Maharashtra slum areas (Improvement, Clearance and Re-development) Act 1971.

T-3 (3) The surplus tenements remaining after rehabilitation of the existing, eligible, tenements shall be allowed to be sold in the open market, provided 10% of this surplus is surrendered to the Pimpri Chinchwad Municipal Corporation at the construction cost plus 15% of the cost of construction to be decided by the Committee mentioned in T - 6.

T-4 Development Control Regulations

The rules for redevelopment of slum areas shall be as follows:-

T-4 (1) Layout of Development - Every slum site shall be developed with a layout of buildings. For the computation of FAR and Tenement Density in sites measuring 3600 sq. mt. or more, the NET plot area shall be 90% of the gross plot area.

T-4 (2) Open Space - Open spaces shall be maintained as per Development Control Rules and the net plot area shall be the gross plot area less the area of such open space.

T - 4 (3) Layout Roads - Roads in the layout of slum area redevelopment sites shall be of widths prescribed in the Development Control Rules and their corresponding length. The area of such internal layout roads shall not be deducted in the computation of the net plot area for the permissible FAR and tenement density.

T-4 (4) Ground Coverage - The ground coverage, shall be subject to the prescribed marginal distances from the plot boundaries.

T-4 (5) Marginal Distances and Setbacks - The marginal distances from the front side and rear boundaries of the land shall be maintained as follows :

- a) **Front Marginal Open Space:** If the slum redevelopment site fronts upon one or more roads, every side abutting on such road shall be treated as the front side and the marginal distances prescribed below for such front road site shall apply. The front road side marginal distance shall be measured from the proposed road widening line in the plot, if any.
 - i) In congested areas the front road side marginal distance shall be minimum 2.25 mt. for purely residential buildings and 6.00 mt. for mixed use buildings.
 - ii) In non-congested areas the front road side marginal distance shall be minimum 4.50 mt. for purely residential buildings and 6.00 mt. for mixed use buildings.
- b) **Side and Rear Marginal Open Space :** Marginal distances from the side and rear boundaries of the plot shall be as prescribed in the Development Control Rules.

T-4 (6) Maximum height permissible will be as per Development Control Regulations. In the event of proposed road widening height of building shall be relaxed by the Municipal Commissioner, Pimpri Chinchwad Municipal Corporation on merits of each case for such road area going under road widening as per Development Control Rules as N.2.3

T-5 Building Control Regulations

Building Control Rules in any slum re-development proposal shall be as follows :

T-5 (1) The scheme shall provide that each slum dweller shall be given a treatment of minimum carpet area of 80 sq. ft. (16.75 sq. mt.) (including toilet but excluding common areas) and shall not exceed 30 sq. mt.

T-5 (2) In any scheme of re-development shop area for the project affected / slum dwellers shall not exceed the areas which existed prior to the redevelopment of the property.

T-5 (3) The construction of the building for the rehabilitation of slum dwellers and tenements to be made available to the appropriate authority shall be as per the designs and specifications approved by the Committee specified in T-6.

T-5 (4) Multi Purpose Room- A multi purpose room shall be allowed with size upto 12.5 sq. mt. with a minimum width of 2.4 mt.

T-5 (5) Cooking Space (alcove) - Provision of a separate kitchen shall not be necessary. However, cooking space shall be allowed with a minimum size of 2.4 sq. mt. with minimum width of 1.2 mt.

T-5 (6) Combined Toilet - A combined toilet shall be permitted for more than one tenement with a minimum area of 1.85 sq. mt. with minimum width of 1.85 sq. mt. with minimum width of one meter.

T-5 (7) Height - The average height for a habitable room with slopping roof shall be minimum 2.6 mt. with minimum height of two meters at eaves. In the case of a flat roof, minimum clear height shall be 2.6 meter for habitable rooms. Kitchen area shall have minimum clear height/average height of 2.4 mt. and bath and water closet (without loft) shall have a clear minimum height of 2.2 mt.

T-5 (8) Plinth - The minimum plinth height shall be 30 cm. And in areas subject to flooding the plinth shall be higher than the high flood level.

T-5 (9) External Walls - 115 mt. thick external brick wall without plaster shall be permitted.

T-5 (10) Staircase - Single flight staircase without landing between the two floors shall be permitted.

T-5 (11) Front Open Space - The front open space from roads having width of 9.14 mt. and below shall be of a minimum of 1.5 mt. for buildings with heights upto 10 mt

T- 5 (12) Pathways - The width of pathways shall be as follows :

- i) 1.5 mt. width for pathways upto 20 mt. in length
- ii) 2.0 mt. width for pathways upto 30 mt. in length
- iii) 2.5 mt. width for pathways upto 40 mt. in length
- iv) 3.0 mt. width for pathways upto 50 mt, in length

T-5 (13) Flushing Cistern - In water closets, flushing cistern shall not be essential and toilets without this provision may be permitted.

T- 5 (14) Water Closet Plan Size - The water closet seat shall be of a minimum of 0.46 m (18 inches) in length.

T-5 (15) Septic Tank and Leaching Pits (Soak Pits) - Aseptic tank shall be provided with a capacity of 141.6 liters (five cubic feet) per capita. Where the municipal services are likely to be available within four to five years or so, pour flush water seal latrines (NEERI type) shall be permitted where the municipal sewerage system is not available and the water table in the area is not high.

T- 5 (16) In the case of multi stored structures constructed for rehabilitation of the slum dwellers and for the tenements to be made available to the appropriate authorities as mentioned in this Appendix the provisions of Regulations T - 5 (7) to T - 5 (13) in this Appendix shall not apply to that portion of the construction not intended for rehabilitation and such constructions shall be governed according to the normal provisions of these Development Control Regulations.

T- 5 (17) The above special regulations shall also be eligible for further relaxation by written permission of the Municipal Commissioner as per Development Control Rule 6.6.2.2 in specific cases where genuine hardship is clearly demonstrated. The Municipal Commissioner shall give such concession in consultation with the committee mentioned in T - 6.

T - 6 Approval to the scheme as per this appendix shall be given by the committee comprising of the Municipal Commissioner, Vice-President and Chief Executive Officer, PHAD, Collector, Pune Deputy Director of Town Planning, Pune Division, Pune of which Municipal Commissioner shall be the Chairman.

ODD

APPENDIX-U

Explanatory Notes

GUIDING/WARNING FLOOR MATERIAL

The floor material to guide or to warn the visually impaired persons with a change of colour or material with conspicuously different texture and easily distinguishable from the rest of the surrounding floor materials is called guiding or warning floor material. The material with different texture gives audible signals with sensory Warning when a person moves on this surface with walking stick. The guiding / warning floor material is meant to give the directional effect or warn a person at critical places. This floor material shall be provided in the following areas.

- a) The access path to the building and to the parking area.
- b) The landing lobby towards the information board, reception, lifts, stair-cases and toilets.
- c) Immediately at the beginning/ end of walkway where there is a vehicular traffic.
- d) At the location abruptly changing in level or beginning/ end of a ramp.
- e) Immediately in front of an entrance/ exit and the landing.

PROPER SIGNAGE

Appropriate identification of specific facilities within a building for the handicapped persons should be done with proper signals. Visually impaired persons make use of other senses such as hearing and touch to compensate for the lack of vision. Whereas visual signals benefit those with hearing disabilities.

Signs should be designed and located so that they are easily legible by using suitable letter size (not less than 20 mm. high). For visually impaired persons, information board in braille should be possible to approach them closely. To ensure safe walking there-should not be any protruding sign which creates obstruction in walking. Public Address System may also be provided in busy public areas.

The symbols / information's should be in contrasting colour and properly illuminated because people with limited vision may be able to differentiate amongst: primary colours: International symbol mark for wheel chair as shown below be installed at the lift, toilet, staircase, parking areas etc., that have been provided for the handicapped.

APPENDIX-Y
REGULATIONS FOR DEVELOPMENT OF
SPECIAL TOWNSHIPS IN AREA UNDER
PIMPRI-CHINCHWAD MUNICIPAL CORPORATION

A) GENERAL REQUIREMENTS:

- 1) APPLICABILITY :** These Regulations would be applicable the area under sanctioned Pimpri-Chinchwad Development Plan area.

1.1 AREA REQUIREMENT : Any suitable area free from all encumbrances having sufficiently wide means of access (not less than 18 mt wide) can be identified for the purpose of development as "Special Township" The area under the Special Township shall not be less than 40 Ha (100 Acres) at one place, contiguous, unbroken and uninterrupted which shall not include the area under the forest, hill top, hill slope, water bodies like river, creek canal, reservoir, lands falling within the belt of 100 mt from the HFL of major lakes dams and its surrounding restricted area lands in the command area of irrigation projects and falling within the belt of 200 mt. from the Archeological importance, Archeological monuments, Heritag precincts and places, any restricted areas, notified National parks, existing and proposed industrial zone, goathan areas or congested areas.

1.2 MANNER OF DECLARATION : Any area identified above and if found suitable can be Notified by Government in Urban Development Department by flowing procedure under section 37 of the Maharashtra Regional and Town Planning Act. 1966 and also in such other manner as - may be determined by it for the purpose of development as "Special Township Project."

However, in cases where the proposal of Special Townships is submitted by the land owners by themselves or by the Developer who holds rights to develop the whole land under the Special Township, the procedure under section 37 of the said Act shall not be necessary.

1.3 INFRASTRUCTURE FACILITIES : The entire Township should be an integrated one with all facilities within the boundaries of declared townships. All the onsite infrastructures, i. e. roads, including D. P. roads approach road, street lights, water supply and drainage system shall be provided and maintained in future by the developer till urban local body is constituted for such area and the developer shall also carry out development of amenity or proposals, if any designated in the Development plan, in accordance with the prevailing regulations.

- (a) **Water Supply :** The developer shall be required to develop the source for drinking water {excluding the groundwater source) or secure firm commitment from any water supply authority for meeting the daily water requirement of minimum 140 liters per capita per day exclusive of requirement of water for

fire fighting and gardening. The storage capacity of the same shall be at least 1.5 times of the actual required quantity as determined by expected population (Resident and Floating) and other uses. The developer would be required to develop proper internal distribution and maintenance systems and shall specially undertake rain water harvesting, groundwater recharging and waste water recycling projects within the Township.

(b) **Drainage and Garbage Disposal** : The developer shall make suitable and environment friendly arrangements for the disposal and Treatment of sewage and solid waste as per requirement of Maharashtra Pollution Control Board & Pimpri-Chinchwad Municipal Corporation. Recycling sewage for gardening shall be undertaken by the developer.

The developer shall develop Eco-friendly garbage disposal system by adopting the recycling and bio-degradation system in consultation with Maharashtra Pollution Control Board and Pimpri-Chinchwad Municipal Corporation.

(c) **Power** : The developer shall ensure continuous and good quality power supply to township area. The developer may draw the power from existing supply system or may go in for arrangement of captive power generation with the approval from existing supply system or may go in for arrangement of captive power generation with the approval from concerned authority. If power is drawn from an existing supply system, the developer shall before commencement of development, procure a firm commitment of power for the entire township from the power supply company.

1.4 ENVIRONMENT : The development contemplated in townships shall not cause damage to ecology. Environment clearance shall be obtained from the Ministry of Environment and Forest, Government of India as per directions issued by the MOEF's notification dated 7th July 2004 and as amended from time to time. The township shall provide at least 20% of the total area as park / garden / playground as mentioned in 4 (f) below, with proper landscaping and open uses designated in the Township shall be duly developed by owner/developer. This amenity shall be open to general public without any restriction or discrimination.

2) SPECIAL CONCESSIONS

(a) **N. A. Permission** : Non-agriculture permission will be automatic. As soon as the scheme is notified, lands notified under Special Township area as per Regulation No. 1.2 will be deemed to have been converted into non-agriculture and no separate permission is required. Non-Agriculture assessment however will commence from the date of sanction of scheme as per Regulation No. 7 (c).

(b) **Stamp Duty** : The stamp duty rates applicable in Notified Special Township area shall be 50% of the prevailing rates of the Mumbai Stamp Act.

(c) Development Charges: A Special Township Project shall be exempted from payment of Development charges to the extent of 50%.

(d) Grant of Government Land : Any Government land falling under township area shall be leased out to the developer at the prevailing market rate on usual terms and conditions, without any subsidy.

(e) Relaxation from Mumbai Tenancy and Agriculture Land Act : The condition that only the agriculturist will be eligible to buy the agriculture land shall not be applicable in Special Township area.

(f) Ceiling of Agriculture Land : There shall be no ceiling limit for holding agriculture land to be purchased by the owner/developer for such project.

(g) Exemption from Urban Land (Ceiling and Regulation Act, 1976) : Special township Projects will be exempted from the purview of Urban Land (Ceiling and Regulation Act, 1976).

(h) Scrutiny Fee : A Special Township Project shall be partially exempted from payment of scrutiny fee being levied by the Pimpri-Chinchwad Municipal Corporation for processing the development proposal on certain, terms and conditions as may be decided by the Pimpri-Chinchwad Municipal Corporation.

(i) Floating F. S. I. : There will be floating F. S. I. in the township. Unused F. S. I. of one plot can be used anywhere in the whole township.

(j) Special Benefits / Concessions in respect of Star Category Hotels, Hospitals and Multiplexes/ Property Tax shall be provided.

3) **PLANNING CONSIDERATIONS**

The Township project has to be an integrated township project. The project should necessarily provided land for following users -

- (a) Residential
- (b) Commercial
- (c) Educational
- (d) Amenity Spaces
- (e) Health Facilities
- (f) Parks, Gardens & Play Grounds
- (g) Public Utilities

4) **GENERAL NORMS FOR DIFFERENT LAND USES**

The overall planning of the special townships shall be such that the project shall meets with the specifications spelt out in the prevailing planning standards approved by Government. Further, the planning of Special Township shall take care of following land uses in particular.

(a) Residential : The residential area should be well defined in cluster or neighborhoods or in plotted development with proper road grid. Out of the total built-up-area proposed to be utilized which is permissible as proportionate to zoning of area under such township as least 60% of the area shall be used for purely residential development and further out of the total built up area proposed to be utilized for residential development 10% shall be built for residential tenements having built up area upto 40 sq. mt.

(b) Commercial : The commercial area shall be properly distributed in hierarchical manner such as convenient shopping, community centre etc.

(c) Educational: Comprehensive educational system providing education from primary to secondary should be provided as per the requirement. The area allocation should be on projected population base and as far as possible the educational complex should not be concentrated at one place. All such complexes should have adequate allocation area for playground. Minimum area required for educational purpose shall be as per prevailing planning standards.

(d) Amenity Spaces : The area allocation for amenity space providing amenities like market, essential shopping area, recreation centers, town hall, library etc. should not be less than 5% of gross area and should be evenly placed.

(e) Health Facilities : Adequate area allocation for health facilities for primary health shall be provided. Minimum area required for health facilities shall be as per prevailing planning standards.

(f) Parks, Gardens and Play Grounds : The township shall also provide at least 20% of the gross area of township as parks/ gardens/ play grounds without changing the topography. This should be exclusive of the statutory open spaces to be kept in smaller layout and should be distributed in all residential clusters This 20% should be developed by the developer for such purposes and kept open to general public without any restriction or discrimination.

(g) Public Utilities: Appropriate area allocation should be provided for (a) power receiving station / sub station, (b) water supply system, (c) sewerage and garbage disposal system, (d) police station, (e) public parking, (f) cemetery/ cremation ground, (g) bus station, fire brigade station, and other public utilities as per requirements.

(h) Transport and Communication : The entire area of township shall be well knitted with proper road pattern, taking into consideration the linkages with existing roads within the township and outside area as well. All such roads shall be developed by the developer as per standard and road widths shall be as given below.

Classified Road - as prescribed

Main road / Ring Road - Minimum 18 to 24 meter wide

Internal Road - as per prevailing bye laws applicable to development plan subject to minimum road width 9 mt.

(i) **Service Industries** : In the Special Township area, lands required for commercial uses, industrial uses, permissible in residential user, may also be earmarked. However, the predominant land use shall be residential use.

Notes:

- i) All the amenities referred to above shall be inclusive of designated amenities and Amenity space required as per regulation of Development Plan.
- ii) Location of Development Plan reservation can be shifted anywhere in the Township Area with the approval of the Municipal Commissioner.
- iii) Development Plan reservations in the Township area, shall not be handed over to the Planning Authority but the same shall be developed by the developer for the designated amenity.
- iv) Development Plan roads in the township area shall be developed and maintained by developer and the same shall be always open for general public without any restrictions thereupon.
- v) Minimum parking shall be provided as per DCR of Pimpri-Chinchwad Municipal Corporation provided that for hotel, restaurant, college, school, educational institute, educational classes, hospitals, polyclinics and diagnostic centres, offices, mangal karyalaya, town hall, clubs, etc. onsite parking shall be provided. For buildings having mixed user regular parking area a 3.0 mt. wide strip within the area along the road on front side shall be provided for visitor's parking.

5) DEVELOPMENT CONTROL REGULATIONS

Prevailing Development Control Regulations of sanctioned Developed Plan amended from time to time shall be applicable mutandis except those expressly provided in these Special Regulations.

5.1 Special Township in Residential, Residential with Agricultural / Green Zone / No Development Zone.

(i) The Total Built Up Area / F. S. I. of entire gross area of the Special Township declared as per -Regulation No. 1.1 excluding the area under Agriculture / Green Zone / No Development Zone, if any included in the project shall be 1.00. The F. S. I. for Agriculture / Green Zone / No. Development Zone if any included in Special Township Zone shall be 0.2 only in proportion to area of the zone. There will be no limit of total built up area / F. S. I. for the development of individual plots. Height of building shall be as per prevailing Development Control Regulations for Pimpri-Chinchwad Municipal Corporation. However, it may be increased subject to provisions of fire fighting arrangements with prior approval of Chief Fire Officer, Pimpri-Chinchwad Municipal Corporation utilisation of DRC's originated from any other area i.e. outside Special Township area shall not be permissible in Special Township area.

(ii) In case are Notified under Special Township falls in Residential Zone and partly in Agricultural/ Green Zone/ No Development Zone the provisions applicable to such scheme shall be proportionate to the area under the respective zoning as per sanctioned Development Plan.

5.2 Special Townships in Agricultural/ Green Zone / No Development Zone

(i) Development of Special Township Project in Agricultural/ Green Zone/ No Development Zone contained in the Development plan shall be permissible subject to conditions that 50% of the gross area of the project shall be kept open while the project of Special Township shall be executed on the remaining 50% land with gross built up area/ F. S. I. of 0.20 worked out on the entire gross area of the project. Further, while developing such projects, it would be obligatory on the part of the developer to provide and develop all the infrastructure facilities including sites required for public purpose as per the prescribed planning norms. As regards 50% of land which is required to be kept open the same shall be made free of encumbrances and no development except town level open amenities shall be permissible therein.

(ii) All provision of Regulations except 4 (f) shall apply to the development of Township in Agricultural/ Green Zone/ No Development Zone.

5.3 General Regulations :

(i) In the event the special township project contains sites reserved for public purposes. (buildable reservations) in Development Plan, for which the Appropriate Authority is any department of State Govt. / Central Govt. or any Government undertaking, the developer shall construct the amenity as per requirement of the concerned department and handover the constructed amenity free of cost to that Department. Upon such handing over the constructed amenity the developer would be entitled to utilise additional floor space over and above the F. S. I. permissible within the township (equivalent to the built up area of the constructed amenity) anywhere within the special township project.

(ii) In every Special Township proposal the structural designer of developer has to submit declaration with project report to Pimpri-Chinchwad Municipal Corporation about the construction of building as below -

I have confirmed that the proposed construction in the scheme is as per norms as specified by Indian Standard Institute, for the resistance of earth quake fire safety & natural calamities.

(iii) Upper and lower ground floor type construction shall not be allowed.

(iv) In special Township schemes under Residential zone and Agricultural / Green Zone / No Development Zone trees at the rate of minimum 150 trees per ha and 400 trees per ha respectively shall be planted and maintained by the developer.

(v) Once the proposal for special Township is submitted to the Government under Regulation No. 7 (A) no change of zone proposal in such Township area shall be considered by Government.

6) SALE PERMISSION:

It would be obligatory on the part of the developer firstly to provide for basic infrastructure and as such no permission for sale of plot/ flat shall be allowed unless the basic infrastructure as per Regulation no. 1.3 is provided by the developer to the satisfaction of the Commissioner, Pimpri-Chinchwad Municipal Corporation. In case the development is proposed in Phases & sale permission is expected after completion of Phase wise basic infrastructure, such permission may be granted by the Pimpri-Chinchwad Municipal Corporation. Before granting such sale permission, Developer had to submit undertaking about the basic infrastructure to be provided & completed phase wise. The plots earmarked for amenities, facilities, and utilities shall be also simultaneously developed phase wise along with residential /allied development.

7) PROCEDURE:

(a) Locational Clearance : The proposal for development of Special Township alongwith details of ownership of land or Development rights of lands in the proposed scheme, site plan, part plan of sanction development plan, shall be submitted to Government in Urban Development Department alongwith a copy to Director of Town Planning Maharashtra State, Pune Environment Department of Maharashtra State, for grant of locational clearance. Upon receipt of such proposal, depending upon the merits of the case, locational clearance may be granted by Government u/s 45 of M.R. & T.P Act, 1966 in consultation with the Director of Town Planning and Environment Department and other respective departments of the state Government within a period of 90 days from the date of receipt of the proposal & after completion of all prescribed procedure specified in Regulation No 1.2 above and compliance of any such document as may be required by Government. This locational clearance will be valid for one year from the date of issue and if within such period the letter of intent and final approval is not taken or not applied for, such clearance/approval will stand lapsed unless it is renewed by Govt. for sufficient reasons. Application for renewal has to be made to Govt. before expiry of one year, These special Regulations shall not be applicable to the area on which clearance / approval has lapsed.

(b) Letter of Intent : Upon receipt of locational clearance from the Government the developer shall submit the proposal in respect of Special Township to Commissioner, Pimpri-Chinchwad Municipal Corporation, Pimpri alongwith the environmental clearance as mentioned in Regulation No. 1.4 for Issue of letter of intent. The proposal shall contain ownership rights / development rights, document in respect of as least 50 % of area under scheme and other particulars as decided and

directed by Commissioner, Pimpri-Chinchwad Municipal Corporation, Pimpri. Details of qualified technical staff and consultant in technical and law field. Letter of intent shall be issued within a period of 45 days from the date of receipt of the final proposal, complete in all respect. The letter of intent shall be valid for six months unless renewed.

- (c) (i) **Final Approval** : The Developer shall submit the layout plan of the entire township area, sector - wise detailed building plans and details of phasing for final sanction of the Commissioner, Pimpri-Chinchwad Municipal Corporation, Pimpri. The developer shall also submit an undertaking and execute an agreement about development and maintenance of basic infra structural amenities in future with bank guarantee of 15% of its development costs. The Commissioner, Pimpri-Chinchwad Municipal Corporation, Pimpri shall conduct proper enquiry and ensure the correctness of title and ownership etc. Only after such verification, Commissioner, Pimpri-Chinchwad Municipal Corporation, Pimpri, shall grant approval to layout plan and sector wise detailed building plan in consultation with Deputy Director of Town Planning, Pune Division, Pune within the stipulated period on terms and conditions as may be determined by Commissioner, Pimpri-Chinchwad Municipal Corporation, Pimpri.

The period required for Technical consultant with Deputy Director of Town Planning, Pune Division, Pune shall not be computed.

Any one aggrieved by an order passed under prevailing Development Control Regulations may within forty days of the date of communication of the order prefer an appeal to the State Government.

(ii) **Every Application** shall be accompanied by -

- a) Ownership Document 7/12 extract/ Property Card, Ownership right Document in original with list of such documents
- b) Extent of Area Village maps showing the extent of area and authenticated measurement plan/ gut book of the land in original and list of such documents.
- c) Authenticated copies of locational clearance and letter of intent.
- d) Layout and Building (Prepared & signed by experts in respective field and team headed by an architect Town Planner) i) Layout plan showing all details of area utilized under roads, open spaces, parks, garden playground & other amenities.

- ii) Detailed layout plan, building plans of all development with area of all sector and individual plots and built up area /FSI proposed on each sector and plot.
- iii) Detailed Report comprising of expected population, requirement of amenities proposed amenities with reference to prevailing planning standards approved by Government sources of all basic amenities and details of implementation maintenance, Taxation etc.
- iv) Details of zoning and area under such zone
- v) Details of FSI / Total built up area proposed to be utilized in scheme.
- vi) Details of Eco friendly amenities provided.
- vii) Plan showing road hierarchy and road widths, pedestrian, facility, street furniture, plantation, side walk, subways with details.
- viii) Details of solid waste management plan.
- ix) Plan showing HFL of major lakes, river of any certified by irrigation Department.
- x) Plan showing details of distribution of total built up-area/ space.
- xi) Plan showing water supply distribution system including reservoirs recycling system, details of rainwater harvesting system.
- xii) Details of storm water drainage scheme.
- xiii) Details of fire fighting mechanism, fire brigade station.
- xiv) All other documents as determined and directed by Commissioner, Pimpri-Chinchwad Municipal Corporation, Pimpri.

Note : The above prescribed periods shall be computed after compliance of all the requirements listed above and any other additional information called for from the owner / developer by the Government/ Collector/ Commissioner.

B) Implementation & Completion

- i) Development of Basic infrastructure & amenity shall be completed by the developer to the satisfaction of the Commissioner, Pimpri Chinchwad Municipal Corporation, Pimpri as per phases of scheme. Development of the scheme shall be completed within 10 years from the date of final sanction to the layout plan of scheme.
- ii) No building in the scheme is permitted to be occupied in any manner unless occupancy's certificate is issued by Commissioner, Pimpri-Chinchwad Municipal Corporation, Pimpri.
- iii) Final completion certificate for the scheme is to be issued by Commissioner, Pimpri-Chinchwad Municipal Corporation, Pimpri in consultation with Maharashtra Pollution Control Board, Tree Authority as far as tree plantation is concerned and Chief Fire Officer of Pimpri-Chinchwad Municipal Corporation.
- iv) Application for occupation certificate or final completion certificate shall be submitted alongwith a declaration and undertaking by the developer and his structural consultant, Architect Town Planner as follows :
 - i) We confirm that all buildings contracted in the scheme area are as per norms as specified by Indian Standard Institute for the resistance of earthquake, fire safety and natural calamities.
 - ii) Work is done as per sanctioned plan
 - iii) Built up area and FSI ~~consumed~~ in scheme is as per sanctioned plan of the scheme.
 - iv) If it is found that extra built up area / FSI is consumed in the scheme at any time, it shall be demolished by developer at his own cost as directed by Commissioner, Pimpri-Chinchwad Municipal Corporation, Pimpri within one month.

9) Interpretation :

If any question or dispute arises with regard to interpretation of any of these regulations, the matter shall be referred to the State Government. The Government after considering the matter and if necessary, after giving hearing to the parties, shall give a decision on the interpretation of the provisions of the Regulations. The decision of Government on the interpretation of these Regulation shall be final and binding on all concerned.

DOD

All the New Proposals to be Submitted Online for Building Permission

The brief procedure is as follows :

- Architect / License Engineer need to enroll their names at PCMC and collect their Login ID and Passwords from Building Permission Dept. of PCMC.
- The submission drawing should be a .dwg. file in pre-defined format.
- Once the drawing is ready user need to login to PCMC website at www.pcmcindia.gov.in
- When clicked on "Building Permission" link, proposal can be submitted using the "New Application" option.
- By entering the Login ID and password, user can manage all types of proposal submissions related to Building Permission from his console.
- The status of all his proposals can be seen from in console.

CHAPTER I

ADMINISTRATION

1.1. Extent And Commencement

1.1.1. Title

These regulations shall be called the Development Control Regulations for Mumbai Metropolitan Region, 2016 (hereinafter referred to as "these Regulations").

1.1.2. Jurisdiction

These regulations shall apply to development of any land situated within the Mumbai Metropolitan Region as defined in the Government of Maharashtra's Notification no. MPC-2010/CR-129/2011/UD-30 dated 23.04.2012 excluding the areas where Development Plans, Planning Proposals or Layouts have been prepared and sanctioned.

1.1.3. Commencement

These regulations shall come into force on the day of sanctioning of Regional Plan and shall replace the Development Control Rules contained in the Regional Plan for Mumbai Metropolitan Region 1996-2011 sanctioned by the Government by its Notification no, TPS-1297/1094/CR-116/97/UD-12 dated 23rd September 1999.

1.2. Definition of Terms and Expressions

1.2.1. Unless otherwise stated, the terms and expressions in these regulations shall have the meaning as defined hereinafter:

(1) "Authority" means Mumbai Metropolitan Region Development Authority.

(2) "Environment Impact Assessment (EIA)" means a statement indicating probable changes in the environment, such as, changes in the air quality, water quality, soil quality, noise levels, vegetation and wild life, landscape quality, land use, vehicular traffic, infrastructure, population, economic activity, etc. which may result from any development either during the course of development being carried out, or thereafter.

(3) "Environmental Management Plan" means a course of action designed to minimize the unavoidable adverse environmental impacts both during the construction and operational phases of the project.

(4) "Floor space index (FSI)" means the ratio of the combined gross floor area of all floors to the gross area of the plot, viz :-

$$\text{Floor Space Index (FSI)} = \frac{\text{Total covered area on all floors}}{\text{Gross Plot area}}$$

(5) "Gaathan" means the land included within the site of a village, town or city as determined by the Collector or survey officer under the general or special orders of the State Government.

(6) "N.A. Permission" means permission granted under Section 44 of the Maharashtra Land Revenue Code, 1966, to use any agricultural land for non-agricultural purpose.

- 1.2.2.** The terms and expressions other than those defined in Regulation 1.2.1 shall have the same meaning as indicated in the following legislations and codes:
- i) The Maharashtra Regional and Town Planning Act, (hereinafter referred to as the "MR&TP Act") 1966, the MMRDA Act, 1974 and the Rules made there under
 - ii) The Maharashtra Land Revenue Code, 1966, as the case may be.

1.3. General

- 1.3.1.** No person shall, on or after these Regulations come into force, carry out any development of the types other than those stated under the proviso to Section 43 of the MR&TP Act, 1966, without obtaining permission from the Planning Authority, including Municipal Corporation, Municipal Council, Nagar Panchayat, Special Planning Authority or other Planning Authority under whose jurisdiction the land is situated;
- 1.3.2.** No authority shall grant a permission or No Objection Certificate (NOC) for any development otherwise than in conformity with these Regulations and the Regional Plan for Mumbai Metropolitan Region, 2016-2036 except in the areas included in the jurisdiction of Municipal Corporation, a Municipal Council, or a Nagar Panchayat or a Special Planning Authority or other Planning Authority for which Development Plans or Planning Proposals have been prepared and sanctioned.
- 1.3.3.** Any person who intends to carry out any development of the type listed below in the area governed by these regulations, shall submit to MMRDA a copy of the application for development permission submitted by him/her to the Planning Authority concerned, along with the information in the form prescribed in Annexure-1 and obtain MMRDA's "No Objection Certificate". If the environmental screening based on this information indicates that the proposed development will have significant impact on the environment, the MMRDA may, at its discretion, call upon the applicant to submit an Environment Impact Assessment (EIA) and Environment Management Plan (EMP) report for such development. The EIA report shall be prepared in accordance with the guidelines issued by the Ministry of Environment and Forest (MoEF), Govt. of India from time to time.
- a) Quarrying for stone, murum, and earth, including sand dredging from rivers, creeks and estuaries
 - b) Hotels, Holiday Homes, and Health Farms/Centre, Amusement Parks and Motels in Green Zone 1 on land admeasuring more than 0.4 ha
 - c) Development of land for industrial purpose in Urbanisable Zone and Green Zone-1
 - d) Any development of wetlands including reclamation, bunding etc. for salt pans, fish farms etc.
 - e) Film and video shooting sites on land admeasuring 2.5 ha or more
- 1.3.4.** No development of any land shall be permitted unless the owner undertakes to provide at his/her own physical and social infrastructural facilities, such as roads, water supply, sewage disposal system, solid waste collection and disposal system, electricity, recreational open space, playground, school, etc. as may be reasonably required for the proposed development in the opinion of the Planning Authority, , and provided that the owner also undertakes to maintain these facilities for a reasonable period specified by the Planning Authority. Where the Planning Authority decides to provide and/or maintain any of the aforesaid infrastructural facilities, the owner shall surrender to the Planning Authority or any other agency nominated by it, free-of-cost the land required for such facilities.

1.3.5. Validity of Prior Permissions

- 1.3.5.1. Notwithstanding Regulation 1.3.2, the Development Permissions may be granted according to the Development Control Regulations for MMR, 1999 and practices prevailing prior to the publication of these Draft Regulations in the following cases:
- a) where sale permission for N.A. use has been granted prior to the date of publication of these Draft Regulations provided the development permission is sought for the same use as the one for which sale permission was granted.
 - b) subsequent revision of layout plan where N.A. Permission, layout or sub-division permission and building permission has been granted prior to the date of publication of these Draft Regulations;
 - c) building permission on individual plot or plots of layout or subdivision of land approved prior to the date of publication of these Draft Regulations;

Provided that N.A. permission or sale permission in the above a, b, and c shall not have been lapsed.

- 1.3.5.2. All developments existing on or prior to coming into force of these Regulations which are authorized under MR&TP Act, 1966, and Maharashtra Land Revenue Code, 1966, but which are not in conformity with the use provisions of the Regional Plan or these Regulations shall be allowed to continue as if they are in conforming zone and shall also be allowed reasonable expansion within the existing land area and within the FSI limits prescribed by these Regulations.

- 1.3.6. Notwithstanding anything stated in these Regulations, no development of the land situated in the Coastal Regulation Zone (as defined by the Ministry of Environment and Forests (MoEF), Govt. of India's notification dated 6th January 2011, (enclosed as Annexure-2) issued under the provisions of the Environment (Protection) Act, 1986), or any subsequent amendment thereof from time to time, shall be permitted unless it is in conformity with the said notification and the Coastal Zone Management Plan (CZMP) approved by the MoEF.

1.4. Discretionary Powers

- 1.4.1. The Metropolitan Commissioner shall be the final authority for interpretation of the provisions of these regulations in conformity with intent and spirit; and his decision shall be final. In cases of genuine hardship the Metropolitan Commissioner may use his discretion to condone provisions of these Regulations except the provisions related to FSI by recording the reasons.

CHAPTER II

LAND USE ZONING AND PERMISSIBLE ACTIVITIES

2.1. Land-use Zoning

2.1.1. The Mumbai Metropolitan Region is divided into the following 7 zones:

- 1) Urbanisable Zone (U)
- 2) Industrial Zone (I)
- 3) Institutional Zone (In)
- 4) Green Zone 1 (G1)
- 5) Green Zone 2 (G2)
- 6) Forest Zone (F)
- 7) Coastal Wetlands Zone (CW)

2.1.2. The Urbanisable zone, Industrial Zone and Green Zone - 1 falling in the jurisdiction of Municipal Corporation, Municipal Council, Nagar Panchayat, Special Planning Authority or other Planning Authority, shall be developed in conformity with the Development Plans and Development Control Regulations of their respective jurisdictions.

2.2. Permissible Activities in Various Land-use Zones

The activities permitted in each zone are listed below:

2.2.1. Urbanisable Zone (U)

2.2.1.1. The activities in the Urbanisable Zone shall be permitted on plots admeasuring 500 sq.m. or more. Sub-division shall be allowed if the land parcel is 1,000 sq.m. or more. The minimum size of the plot in such sub-division plan shall be 200 sq. m. A maximum permissible building height of 15.0 m shall be permitted in the Urbanisable Zone.

2.2.1.2. The following activities shall be permitted in Urbanisable Zone:

- (i) Agriculture and Allied Activities:
 - Agriculture, Plantation and allied activities
- (ii) Residential:
 - Detached or semi-detached houses, row-houses, walk-ups, and apartments
 - Gaothan and Gaothan expansion scheme with development in the nature of expansion of existing gaothan on lands within 200 m from the gaothan boundary
 - Special Townships Projects (STP) governed by the Government of Maharashtra's Notification no. TPS/MMR DCR/CR-48/06/UD-12 dated 10th March, 2006 (Annexure 5)
- (iii) Commercial:
 - Home based economic activities - which do not involve use of intensive mechanical equipment or machinery and do not cause nuisance to the neighbours

- Offices of Government, local authorities and public utility concerns, and offices of the professionals
 - Personal service establishments and repair service establishments
 - Large scale commercial including wholesale shops, malls
 - Hospitality - including Hotels, Motels, Club Houses, Holiday Resorts and Holiday Homes subject to guidelines under Annexure 3
 - Retail shopping, Restaurants and Banks
 - Film and allied Production Activities - Film and Video Shooting Sites, Television/Broadcasting Studios, Film Studios on Land not less than 2.5 ha with studio and other related facilities, subject to condition that the permanent built up facilities shall not cover more than 15% of the gross land area
 - Entertainment - Art Galleries, Exhibition Centers, Convention Centers, Cinema Theatres, and other such uses for public gathering
- (iv) Public and Semi-Public Uses:
- Medical, Educational, Social, Religious and Welfare Institutions
 - Research and Development Institutions, Scientific Institutes, Laboratories and Training Institutions
 - Recreation - Parks and Playgrounds, Gardens, Golf Courses, Swimming pools, Stables, Race courses, Shooting ranges, Amusement Parks and Theme Parks
- (v) Industrial:
- All industries except obnoxious and hazardous industries as listed in sanctioned Development Control regulations for Notified Areas of MIDC, comprising layout on plot of land admeasuring not less than 10 Ha with approval from industries department and NOC from MPCB; however, no industrial development shall be allowed in environmentally sensitive areas such as forests, wetlands, water bodies, irrigation command area and within 200 m from historical monuments
 - Open Storage – Open ground storage of non-hazardous and non-obnoxious nature on the Major District Roads, State Highways or Road having width 15.00 m or more located beyond 200 m from gaathan boundary
 - Storage and warehousing of non-obnoxious and non-hazardous goods and logistic hubs with a maximum floor height of 9.0 m shall be permitted along National Highways, State Highways and other roads with a minimum width of 40.0 m subject to safety margins within the plots and environmental clearance under relevant legislation
- (vi) Public Utilities:
- Transportation and allied activities - Container Parks, Truck Terminals, Garages, Petrol Pumps, Weigh-Bridges, Service Stations and Automobile Repair Workshops
 - Highway Amenities and Services such as Petrol Pump, Small Shops, Service Stations including emergency repair services, Restaurants, Parking lots, Police check Post
 - Roads, Bridges, Jetties and Ropeways
 - Airports
 - Public Utilities and Services - Dams, Railway lines and related facilities, Heliports, Pipelines, Electricity Transmission Lines, Communication Towers, Petrol Pumps, Servicing and Repair service, Public Utilities and Services, Public Toilets etc.
 - Public Amenities - Solid Waste Treatment and Disposal Facilities along with essential support activities, Gas Works, Fire Brigade, Police Station, Telephone Exchange, Terminals, Depots, Cemeteries and Crematoria.

2.2.1.3. Provision of Amenities in U zone:

- a) A proportion of the gross plot area as specified in the table below shall be provided for public amenities. The actual use, location and plot sizes of public amenity shall be specified by the Planning Authority and the land so reserved shall be handed over free of cost to the Planning Authority or any Agency specified by it free of cost.

Table 1: Minimum percentage of area to be reserved for Public Amenities

Sr. No.	Size of land parcel	Percentage area
1	4,000 and more but less than 20,000	5.0
2	20,000 and more but less than 50,000	7.5
3	50,000 and more	10.0

- b) The gross plot area shall be exclusive of the mandatory amenity area for the purpose of computation of FSI.
- c) The permissible FSI for the plots of land thus surrendered to the Planning Authority shall be 0.6.

- 2.2.1.4. Notwithstanding the provisions stated under Regulation no. 2.2.1.1, where the land under sub-division or layout exceeds 10 ha, 10% of the land area shall be reserved for plots upto 40 sq. m. area.

2.2.2. Industrial Zone (I)

- 2.2.2.1. Except for the FSI, which shall be governed by these Regulations, the development of lands zoned as Industrial shall be regulated in accordance with Maharashtra Industrial Development Corporation's DCRs.

- 2.2.2.2. Notwithstanding anything stated in the above Regulation no. 2.2.2.1, Industrial activity is not permissible within 500 m around gaothans in the Industrial Zone. Such 500 m area around gaothans in the Industrial Zone, shall be developed in accordance with the provisions of Green Zone - 1.

2.2.3. Institutional Zone (In)

- 2.2.3.1. A maximum building height of 15 meters shall be permitted in Institutional zone.

- 2.2.3.2. High intensity developments such as Special Township Projects (STP), higher FSI for educational and medical institutions shall not be permitted in the Institutional Zone.

- 2.2.3.3. The following activities shall be permissible in Institutional Zone:

- (i) Agriculture and Allied Activities:
- Agriculture, Plantation and allied activities
- (ii) Residential:
- Single family house on individual plots on plot area not less than 2000 sq. m. however, layout of single family houses is not allowed
 - Gaothan and Gaothan expansion scheme with development in the nature of expansion of existing gaothan on lands within 200 m from the gaothan boundary
 - Farm Buildings as permissible under section 41 of MLR code, 1966

- (iii) Commercial:
 - Retail shopping, Restaurants and Banks
 - Film and allied Production Activities - Film and Video Shooting Sites, Television/Broadcasting Studios, Film Studios on Land not less than 2.5 ha with studio and other related facilities, subject to condition that the permanent built up facilities shall not cover more than 15% of the gross land area
 - Entertainment - Art Galleries, Exhibition Centers, Convention Centers, Cinema Theatres, and other such uses for public gathering
- (iv) Public and Semi-Public Uses:
 - Medical, Educational, Social, Religious and Welfare Institutions along with residential quarters, and shops on plot not less than 2.5 ha however; area of such allied activities shall not exceed 25% of the permissible built-up area. Schools and health centres on plot not less than 0.4 ha.
 - Research and Development Institutions, Scientific Institutes, Laboratories and Training Institutions
 - Recreation - Parks and Playgrounds, Gardens, Golf Courses, Swimming pools, Stables, Race courses, Shooting ranges, Amusement Parks and Theme Parks
- (v) Public Utilities:
 - Highway Amenities and Services such as Petrol Pump, Small Shops, Service Stations including emergency repair services, Restaurants, Parking lots, Police check Post
 - Roads, Bridges, Jetties and Ropeways
 - Public Utilities and Services - Dams, Railway lines and related facilities, Heliports, Pipelines, Electricity Transmission Lines, Communication Towers, Petrol Pumps, Servicing and Repair service, Public Utilities and Services, Public Toilets etc.
 - Public Amenities - Solid Waste Treatment and Disposal Facilities along with essential support activities, Gas Works, Fire Brigade, Police Station, Telephone Exchange, Terminals, Depots, Cemeteries and Crematoria

2.2.4. Green Zone-1 (G1)

2.2.4.1. A maximum building height of 15 meters shall be permitted in Green Zone 1.

2.2.4.2. The following activities are permissible on lands zoned as Green Zone 1:

- (i) Agriculture and Allied Activities:
 - Agriculture, Plantation and allied activities
 - Agro-based Industries and Allied Activities like , Rice Mill, Poha Mill, Saw Mill, Cold Storage, Horticultural Project, Poultry Farms, Cattle Stables, Piggeries, Sheep farms, etc.
 - Fishing and Allied Activities
- (ii) Residential:
 - Single family house on plot not less than 2,000 sq.m. in area however, layout of single family houses is not allowed
 - Farm buildings as permissible under Section 41 of the Maharashtra Land Revenue Code, 1966;
 - Gaothan and Gaothan expansion scheme with development in the nature of expansion of existing gaothan on lands within 200 m from the gaothan boundary

- Special Townships Projects (STP) governed by the Government of Maharashtra's notification no. TPS/MMR DCR/CR-48/06/UD-12 dated 10th March, 2006 (Annexure 5)
- (iii) Commercial:
- Home based economic activities: which do not involve use of intensive mechanical equipment or machinery and do not cause nuisance to the neighbours
 - Offices of Government, local authorities and public utility concerns, and offices of the professionals
 - Hospitality - including Hotels, Motels, Club Houses, Holiday Resorts and Holiday Homes subject to guidelines under Annexure 3
 - Retail shopping, Restaurants and Banks
 - Film and allied Production Activities - Film and Video Shooting Sites, Television/Broadcasting Studios, Film Studios on Land not less than 2.5 ha with studio and other related facilities, subject to condition that the permanent built up facilities shall not cover more than 15% of the gross land area
 - Entertainment - Art Galleries, Exhibition Centers, Convention Centers, Cinema Theatres, and other such uses for public gathering
- (iv) Quarrying:
- Quarrying of Stone, Murum or Earth, Mechanized stone crushing or stone dressing, Temporary housing of laborers, Office of supervisors, Managers and other accessory buildings related to quarrying activity as per special regulations for quarrying under section 2.4.5 of this regulation
- (v) Public and Semi-Public Uses:
- Medical, Educational, Social, Religious and Welfare Institutions along with residential quarters, and shops for the staff on plot not less than 2.5 ha. and schools and health centres on plot not less than 0.4 ha.
 - Research and Development Institutions, Scientific Institutes, Laboratories and Training Institutions
 - Recreation - Parks and Playgrounds, Gardens, Golf Courses, Swimming pools, Stables, Race courses, Shooting ranges, Amusement Parks and Theme Parks
- (vi) Industrial:
- Open Storage - Open ground storage of non-hazardous and non-obnoxious nature on the Major District Roads, State Highways or Road having width 15.00 m or more subject to condition that a lay-bye is provided in the plot along the approach road.
 - Storage and warehousing of goods including obnoxious and hazardous goods and logistic hubs with a maximum floor height of 9.0 m shall be permitted along National Highways, State Highways and other roads with a minimum width of 40.0 m subject to safety margins within the plots and environmental clearance under relevant legislation
 - Small scale industries, Resource based Industries and processing plants employing local resources and giving employment to the local population in the rural areas having land requirements of not more than 4000 sq.m subject to not more than 2.0 ha in each village Service Industries as defined in the 'Standardized Development Control and Promotion Regulations for Regional Plans of Maharashtra'.
 - All type of industries shall be permitted on plot of land admeasuring not less than 10 ha area subject to Regulation no. 2.2.2.2. Highly polluting and hazardous industries are also permitted in private or public industrial estates of

not less than 10 ha area and where MIDC concurs that the proposed infrastructure facilities, effluent treatment and disaster mitigation facilities are at par with MIDC industrial estates; however, no industrial development shall be allowed in environmentally sensitive areas such as forests, wetlands, water bodies, irrigation command area and within 200 m from historical monuments

(vii) Public Utilities:

- Transportation and allied activities - Warehouses, Container Parks, Truck Terminals, Garages, Petrol Pumps, Way-Bridges, Service Stations and Automobile Repair Workshops
- Highway Amenities and Services such as Petrol Pump, Small Shops, Service Stations including emergency repair services, Restaurants, Parking lots, Police check Post
- Roads, Bridges, Jetties and Ropeways
- Airports
- Public Utilities and Services - Dams, Railway lines and related facilities, Heliports, Pipelines, Electricity Transmission Lines, Communication Towers, Petrol Pumps, Servicing and Repair service, Public Utilities and Services, Public Toilets etc.
- Public Amenities - Solid Waste Treatment and Disposal Facilities along with essential support activities, Gas Works, Fire Brigade, Police Station, Telephone Exchange, Terminals, Depots, Cemeteries and Crematoria

2.2.5. Green Zone-2 (G2)

2.2.5.1. A maximum building height of 15 meters shall be permitted in Green Zone 2.

2.2.5.2. The following activities are permissible on lands zoned as Green Zone 2:

(i) Agriculture and Allied Activities:

- Agriculture, Plantation and allied activities
- Agro-based Industries and Allied Activities like , Rice Mill, Poha Mill, Saw Mill, Cold Storage, Horticultural Project, Poultry Farms, Cattle Stables, Piggeries, Sheep farms, etc.
- Fishing and Allied Activities

(ii) Residential:

- Farm buildings as permissible under Section 41 of the Maharashtra Land Revenue Code, 1966;
- Gaothan and Gaothan expansion scheme with development in the nature of expansion of existing gaothan on lands within 200 m from the gaothan boundary

(iii) Public and Semi-public Uses:

- Recreation - Parks, Regional Parks and Playgrounds, Gardens, Golf Courses, Stables, Race courses, Amusement Parks and Theme Parks

(iv) Quarrying:

Quarrying of Stone, Murum or Earth, Mechanized stone crushing or stone dressing, Temporary housing of laborers, Office of supervisors, Managers and other accessory buildings related to quarrying activity as per special regulations for quarrying under section 2.4.5 of this regulation

(v) Public Utilities:

- Highway Amenities and Services such as Petrol Pump, Small Shops, Service Stations including emergency repair services, Restaurants, Parking lots, Police check Post

- Roads, Bridges, Jetties and Ropeways
- Airports
- Public Utilities and Services - Dams, Railway lines and related facilities, Heliports, Pipelines, Electricity Transmission Lines, Communication Towers, Petrol Pumps, Servicing and Repair service, Public Utilities and Services, Public Toilets etc.
- Public Amenities - Solid Waste Treatment and Disposal Facilities along with essential support activities, Gas Works, Fire Brigade, Police Station, Telephone Exchange, Terminals, Depots, Cemeteries and Crematoria

2.2.6. Forest Zone (F)

2.2.6.1. Where any land in the Forest Zone is situated in the Reserved Forests or Protected Forest as defined under the Indian Forests Act, 1947, or the forest acquired under the Maharashtra Acquisition of Private Forests Act 1975, such lands may be used for activities specified by the Forest Department.

2.2.6.2. Where any land in Forest zone is situated outside the designated Forest, with due confirmation of the Forest Department, the development of such land shall conform to the Regulations applicable to the adjacent zone; if abutting more than one zones, the provisions of the zone with the lowest development potential shall apply. If the plot is entirely surrounded by forest, the provisions of Green Zone 2 shall apply.

2.2.6.3. The boundary of the Matheran Eco-sensitive Zone is revised in the draft Regional Plan based on the updated information obtained from the Forest Department. The same shall come into effect after confirmation from Forest department, government of Maharashtra and subsequent approval by the Ministry of Environment and Forests, Government of India.

2.2.7. Coastal Wetlands Zone (CW)

Activities permitted in the CRZ-1 as notified from time to time by the Ministry of Environment and Forests, Government of India shall be allowed in the Coastal Wetlands Zone.

2.3. Floor Space Index (FSI)

2.3.1. The maximum permissible FSI for various land use zones shall be as given in the table below. The FSI shall be calculated on gross plot area.

Table 2: Maximum permissible FSI

Zone	Maximum permissible FSI
Urbanisable Zone (U) (Details in table no. 3 below)	0.4-0.6
Industrial Zone (I)	0.4
Institutional Zone (In)	0.2
Green Zone 1 (G1)	0.2
Green Zone 2 (G2)	0.1

Special Schemes	Maximum permissible FSI
Gaothan and Gaothan Expansion Scheme	1.0
Station Area Development Scheme (SADS)	1.0

Note: The table indicates general maximum permissible FSI for all zones subject to the provisions of the CRZ regulations (Refer annexure 2).

- 2.3.2. The maximum permissible FSI in Urbanisable Zone shall increase as per plot size as stated in the Table below:

Table no. 3: Maximum permissible FSI in Urbanisable zone

Sr. No.	Area of plot in sq. m.	Maximum permissible FSI
1	Less than 10,000	0.40
2	10,000 and above but less than 25,000	0.45
3	25,000 and above but less than 50,000	0.50
4	50,000 and above but less than 100,000	0.55
5	100,000 and above	0.60

2.3.3. Additional FSI for Educational, Medical, Institutional and Starred Category Hotels

- 2.3.3.1. In the Urbanisable Zone and Green Zone - 1, with the prior approval of the Metropolitan Commissioner, the permissible FSI may be allowed to be exceeded by 100% in respect of the following activities:
- Educational, Medical and Institutional buildings of Government or Public Authorities or of registered Charitable Trusts;
 - Three and more Star Category Hotels built on independent plot and approved by the Department of Tourism, Gol (in case of Starred Category Hotels).
- 2.3.3.2. Such additional FSI shall be permissible on payment of premium at the rate decided by the Government from time to time.
- 2.3.3.3. Out of the total premium, 50% shall be payable to the Authority and the remaining 50% to the Government of Maharashtra.

Table 4: Summary of Permissible Activities and FSI in various Land-use Zones

Name of Zone	Maximum Permissible FSI	Maximum Permissible Height in m.	Permissible Uses																															
			1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	
			Agri. & allied			Residential				Commercial						Public & Semi-public			Industrial					Public Utility										
			1			2				3						4			5					6					7					
Urbanisable Zone (U)	0.4 to 0.6	15.0	√			√	√		√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√
Industrial Zone (I)	0.4	In accordance with MIDC's Development Control Regulations																																
Institutional Zone (In)	0.2	15.0	√			√*	√	√				√			√	√	√**	√	√										√	√	√	√	√	√
Green Zone - 1 (G-1)	0.2	15.0	√	√	√	√*	√	√	√	√	√		√	√	√	√**	√	√		√	√	√	√	√	√	√	√	√	√	√	√	√	√	
Green Zone - 2 (G-2)	0.1	9.0	√	√	√		√	√											√#							√		√	√	√	√	√	√#	
Forest Zone (F)	As permitted by Forest Department																																	
Coastal Wetlands Zone (CW)	As permitted in CRZ 1																																	
Gaothan Expansion Scheme (GES)	1.0	24.0	√	√	√	√			√			√	√	√			√		√			√					√#				√#	√#		
Station Area Dev. Scheme (SADS)	1.0	24.0	√			√	√		√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	√	

√** Educational, medical, social, cultural and religious institutions along with residential quarters, and shops for the staff on plot not less than 2.5 ha.;

√# Only certain activities allowed, Refer Regulation no. 2.2 for details

2.4. Special Regulations

2.4.1. Gaothan and Gaothan Expansion Scheme

2.4.1.1. Gaothan

2.4.1.2. Notwithstanding anything stated in foregoing regulations, the developments within the boundary of the existing gaothan located within the jurisdiction of these Regulations (excluding the Gaothans that are located in the jurisdiction of Municipal Corporations, Municipal Councils, Nagar Panchayats Special Planning Authorities and New Town Development Authorities) and the Gaothan Expansion Scheme (GES) shall be governed by these Regulations.

2.4.1.3. For the purpose of these Regulations, the boundary of the existing gaothan shall be as shown in the revenue maps or as notified under the provisions of Maharashtra Land Revenue Code, 1966 from time to time.

2.4.1.4. The lands in gaothan may be used for any of the following purposes:

- a) Agriculture and Allied Activities
 - Agriculture, Plantation and Allied Activities including Stables for domestic animals subject to limit of 5 animals on each plot, Storage of crop, fodder, manure, agricultural implements and other similar needs;
 - Agro-based Industries and Allied Activities like , Rice Mill, Poha Mill, Saw Mill, Cold Storage, Horticultural Project, Poultry Farms, Cattle Stables, Piggeries, Sheep farms, etc.
 - Fishing and allied activities
- b) Residential:
 - Detached/semi-detached houses, row-houses, walk-ups, and apartments
- c) Commercial:
 - Home based economic activities which do not involve use of intensive mechanical equipment or machinery and do not cause nuisance to the neighbours
 - Retail shopping, Restaurants and Banks
 - Offices of the Government, Local Authorities, Public Utility Concerns and Professionals
 - Personal service establishments and repair service establishments
- d) Public and Semi-Public Uses
 - Educational, Social, Medical, Religious and Welfare institutions
 - Recreation - Parks and playground;
- e) Public Utility
 - Transportation and allied activities: Warehousing and cold storage permitted on plot not more than 2000 sq. m.
 - Public Utilities and Services - Electricity Transmission Lines, Communication Towers, Petrol Pumps, Servicing and Repair service, Public Utilities and Services, Public Toilets etc.
 - Public Amenities - Gas Works, Fire Brigade, Police Station, Telephone Exchange, Transport Terminals, Depots, Cemeteries and Crematoria

2.4.1.5. Gaothan Expansion Scheme

- 2.4.1.6. The development in the nature of expansion of existing Gaothan shall be permitted within 200 m. from the boundaries of the existing Gaothan on payment of premium. Such premium shall be calculated considering 30% rate of the said land as prescribed in the Annual Statement of Rates of the year of granting such developments. Such premium shall be deposited in the concerned branch office of the Town Planning Department for crediting the same into the Government treasury.

Provided further that where more than 50 per cent of the area of the survey number/gut number is covered within the above 200 m distance, then the remaining whole of such survey number/gut number within one ownership shall be considered for development under this regulation on payment of premium as above.

- 2.4.1.7. The lands included in Gaothan Expansion Scheme shall be used for the following:
- All uses permitted in Gaothans as stated in Regulation 2.4.1.4.
 - Service industries as stated in the Standardized Development Control and Promotion Regulations for Regional Plans of Maharashtra.

2.4.1.8. Floor Space Index (FSI) and Maximum Height of Buildings in Gaothan and Gaothan Expansion Scheme

- The maximum permissible FSI shall be calculated on the Gross area of the plot.
- The maximum permissible FSI and maximum height of the buildings in gaothan and gaothan expansion schemes shall be as given in the table below:

Sr. No.	Location	FSI	Max. permissible height
1	Gaothan,	1.0	24.0 m
2	Gaothan Expansion within 200 m from Gaothan boundary		
3	Gaothan Expansion Scheme as declared by the Collector		

- Where the owner surrenders free-of-cost, any land for main roads, social facilities and amenities, public utilities and services to the Planning Authority, Local Authority or the Collector or an agency nominated by them, an additional incentive F.S.I. of 0.2 of the land so surrendered shall be permissible in Gaothan and Gaothan Expansion scheme.
- Other features of the development shall conform to the 'Standardized Development Control and Promotion Regulations' for Regional Plans of Maharashtra'.

- 2.4.1.9. The minimum size of plots in Gaothan and Gaothan Expansion Scheme shall be as mentioned in the table below:

Sr. No.	Land use	Type of Development	Minimum Plot area (Sq. m.)	Minimum width of Frontage (m)
1	Residential	Row houses	25.0	3.0
	Retail	Semi-detached	40.0	4.5
	Shopping and Restaurant	Detached	150.0	9.0
2	Industrial	Semi-detached	200.0	9.0
3	Others	Detached	300.0	15.0

2.4.2. Station Area Development Scheme (SADS)

2.4.2.1. Notwithstanding anything stated in the foregoing regulations, the development of lands located within 500 meters from the centre of existing operational suburban and metro railway stations, as indicated in the Proposed Land Use Plan shall be treated as the Station Area Development Scheme (SADS).

2.4.2.2. The area under such scheme shall be governed by the following regulations:

- a) A maximum FSI of 1.0 shall be permissible in the Station area Development Scheme subject to payment of premium calculated at 30% of the land rate as prescribed in the Annual Statement of Rates of the year of granting such developments. The premium shall be charged on FSI granted over and above the permissible Zonal FSI. Out of the total premium, 50% shall be payable to the Authority and 50% to the State Government.
- b) The first 100 m of the 500 m shall be earmarked for the railway operations, traffic dispersal facilities and parking lots and no individual developments shall be permitted within this area.
- c) In case of land parcels within 500 m but partly located within the 100 m belt, the owner shall be permitted to use the full development potential on lands located beyond 100 m from the station.
- d) Land under the said scheme shall be governed in accordance with the provisions for the U zone.
- e) A maximum building height of 24.0 meters shall be permitted in the Station Area Development Scheme.
- f) Minimum right of way of any existing road within the 500 m shall be maintained as 24.0 m and accordingly, no construction shall be permitted within 12.0 from the center of the road.

2.4.3. Buffer along water courses and water bodies

No construction shall be permitted within 30 m. of

- (a) the high flood line of the rivers and nallas, subject to the provisions of the sanctioned Coastal Zone Management Plan (CZMP)
- (b) Water bodies – ponds, talavs, etc.

2.4.4. Hill Slopes

No development shall be permitted on hill slopes with a slope above 22.5°.

2.4.5. Heritage Sites

The developments in the heritage site of Elephanta Island, Gharapuri shall be governed by S.O. No. 5681 dated 29th November, 1985 of the Archaeological Survey of India and the approved Coastal Zone Management Plan.

2.4.6. Quarrying

No quarry which involves blasting shall be permitted within 500 m. from any public road, railway line or residential area including gaathan. Temporary structures such as housing for laborers, office of the supervisors and other quarry- related structures shall be located more than 500 m. away from the place of blasting.

No quarrying permission shall be granted unless the application for quarrying is accompanied by an excavation and restoration plan prepared in accordance with the guidelines given in Annexure - 4. The applicant shall also have to furnish an undertaking

and observe all necessary care and precaution during quarrying operations as required by these guidelines.

2.4.7. Buffer around Forest Zone

In respect of development of lands abutting the Forest Zone, no construction shall be permitted within the first 30 m from the edge of the Forest Zone.

2.4.8. Development along Highways

2.4.8.1. Notwithstanding anything stated in the foregoing Regulations the accesses to and developments along the Expressway (EW), National Highway (NH), State Highway (SH) and other roads outside the boundaries of towns and cities in the Region, shall conform to the following Regulations.

2.4.8.2. No development abutting EW, NH, SH or other roads shall be permitted without obtaining the NOC for access to such development from National Highway Authority of India or Highway Authority under the Bombay Highways Act, 1955. The development shall have to be separated from such highway by a parallel service road at least 12.00 m. wide.

2.4.8.3. Essential highway amenities and services namely, petrol pump, service station including emergency repair services, restaurants, parking lots, motels, police check-post, toll station, Octroi post shall be permitted on the EW, SH and other roads. However no direct access to such amenities shall be permitted from the EW or SH. Access shall be provided with proper lay-by as per the guidelines specified by the Indian Road Congress and the Highway Authority under the Bombay Highways Act, 1955.

2.4.8.4. Access to the essential highway amenities stated in Regulation 2.2.6.3 and private properties along the NH shall be permitted in accordance with the guidelines issued by the Ministry of Road Transport and Highways (MoRTH) by its circular letter no. R/NH 33023/19/990-DO III dated 31st August 2000 and any modifications and revisions thereof from time to time.

2.4.8.5. On classified roads, no building shall be constructed within setback distance mentioned in the Government Resolution No. RBD/1081/871/Road-7 dated 9th March 2001 by the Public Works Department of GoM or any modifications or revisions thereof from time to time.

The land under the setback shall be planted with tress at the rate of 15 trees per 1000 sq. m. excluding service roads.

2.4.8.6. The display of advertising signs within the boundaries of the EW, NH and SH, or within 30 meters from such boundaries, shall be in accordance with Part X, sign and Outdoor Display Structure, National Building Code of India.

2.5. Other features of development

2.5.1. Other features of development shall conform to the 'Standardized Development Control and Promotion Regulations for Regional Plans of Maharashtra'.

Annexures

Annexure 1

**Form for submission of information for Environmental Assessment
and Environmental Screening of the Development Proposal**
(refer Regulation 1.3.3)

1. Name and Address of the person proposing development
2. Particulars of the proposed development:
 - a) Brief description
 - b) Justification or need for the proposed development
 - c) Objective
 - d) Size and Magnitude
 - e) Cost
 - f) Present status
 - g) Time schedule for completion of development
3. Employment:
 - a) During development stage
 - b) During operational stage
4. Location of the proposed development:
 - a) Revenue Survey No./Hissa No.
 - b) Name of the village/tehsil/district
 - c) (7x12 extract and village map showing location essential)
5. Land Area:
 - a) Existing (in the case of expansion)
 - b) Proposed
6. Physical Setting:
 - a) Natural and man-made features (map essential)
 - b) Topography indicating gradient aspect and altitude. (map essential)
 - c) Soil type and texture (map optional)
 - d) Flood prone areas of the site. (map essential)
7. Land Uses:
 - a) Existing land use of the site (Area statement and map at larger scale essential)
 - b) Existing land use covering an area of 10 km radius around the site (map at smaller scale essential)
 - c) Proposed Development (Area statement and map at larger scale essential).
 - d) Proposed Development showing proposed accesses, land uses of the surrounding area. (map at smaller scale essential)
8. Ecologically Sensitive Areas:
 - a) Proximity to National Park, Wild Life Sanctuary, nature reserves, mangrove forests and reserved, protected or other forests, biosphere reserve, swamp and wetlands. (indicate distance from the site and identify on map)
 - b) Does the development involve any forest land?
 - c) Proposals for compensatory afforestation plan
 - d) Does the proposed development involve reclamation of wetlands?
 - e) Is the site situated within catchment area of water reservoir?
 - f) Is the site situated within existing or potential command area of irrigation project ?

9. Air:
 - a) Ambient area quality data at the site (for SO₂, Nox, SPM)
 - b) Major air pollution sources within 10 km. radius from the site
 - c) Nature and concentration of likely emissions from the proposed development
 - d) Pollution abatement measures proposed

10. Water
 - a) Total daily water requirement
 - b) Source of water supply with details of competing users
 - c) If ground water is used at source, details of quality and quantity available and present extraction
 - d) Quantity of waste water expected
 - e) Method of treatment and disposal of waste water proposed
 - f) Present quality of water in receiving bodies

11. Solid Waste
 - a) Nature and quantity of solid waste expected
 - b) Nature and quantity of any toxic and hazardous waste
 - c) Method of collection, transport and disposal of solid waste proposed

12. Noise and Vibrations
 - a) Ambient noise level.
 - b) Noise and vibration levels expected during development phase and thereafter.
 - c) Source of noise and vibrations.
 - d) Noise and vibration abatement measures proposed.

13. Risk and Disaster
 - a) Does the development involve any hazardous process?
 - b) Does the development involve any storage or transportation to and from the site of any toxic or hazardous material?
 - c) Assessment of risk for (a) and (b) above.
 - d) Details of Disaster Management Plan.

14. Rehabilitation
 - a) Does the proposed development involve rehabilitation of local population?
 - b) Details of rehabilitation plan, if any.

Annexure 2

Coastal Zone Regulations
Ministry of Environment & Forests
(Department of Environment, Forests & Wild Life)
 (refer Regulation 1.3.6)

notification under section 3(1) and section 3(2)(V) of the environment (protection) act, 1986 and rule 5(3)(D) of environment (protection) rules, 1986, declaring coastal stretches as coastal regulation zone (CRZ) and regulating activities in the CRZ

NOTIFICATION

New Delhi, the 6th January, 2011

S.O.19(E).-WHEREAS a draft notification under sub-section (1) of section and clause (V) of subsection (2) of section 3 of the Environment (Protection) Act, 1986 was issued inviting objections and suggestions for the declaration of coastal stretches as Coastal Regulation Zone and imposing restrictions on industries, operations and processes in the CRZ was published vide S.O.No.2291 (E), dated 15th September, 2010.;

AND WHEREAS, copies of the said Gazette were made available to the public on 15th September, 2010;

AND WHEREAS, the suggestions and objections received from the public have been considered by the Central Government.; Now, therefore, in exercise of the powers conferred by sub-section (1) and clause (v) of sub-section (2) of section 3 of the Environment (Protection) Act, 1986 (29 of 1986), the Central Government, with a view to ensure livelihood security to the fisher communities and other local communities, living in the coastal areas, to conserve and protect coastal stretches, its unique environment and its marine area and to promote development through sustainable manner based on scientific principles taking into account the dangers of natural hazards in the coastal areas, sea level rise due to global warming, does hereby, declare the coastal stretches of the country and the water area upto its territorial water limit, excluding the islands of Andaman and Nicobar and Lakshadweep and the marine areas surrounding these islands upto its territorial limit, as Coastal Regulation Zone (hereinafter referred to as the CRZ) and restricts the setting up and expansion of any industry, operations or processes and manufacture or handling or storage or disposal of hazardous substances as specified in the Hazardous Substances (Handling, Management and Transboundary Movement) Rules, 2009 in the aforesaid CRZ.; and

In exercise of powers also conferred by clause (d) and sub rule (3) of rule 5 of Environment (Protection) Act, 1986 and in supersession of the notification of the Government of India in the Ministry of Environment and Forests, number S.O.114(E), dated the 19th February, 1991 except as respects things done or omitted to be done before such supercession, the Central Government hereby declares the following areas as CRZ and imposes with effect from the date of the notification the following restrictions on the setting up and expansion of industries, operations or processes and the like in the CRZ,-

- (i) The land area from High Tide Line (hereinafter referred to as the HTL) to 500mts on the landward side along the sea front.

- (ii) CRZ shall apply to the land area between HTL to 100 mts or width of the creek whichever is less on the landward side along the tidal influenced water bodies that are connected to the sea and the distance upto which development along such tidal influenced water bodies is to be regulated shall be governed by the distance upto which the tidal effects are experienced which shall be determined based on salinity concentration of 5 parts per thousand (ppt) measured during the driest period of the year and distance upto which tidal effects are experienced shall be clearly identified and demarcated accordingly in the Coastal Zone Management Plans (hereinafter referred to as the CZMPs).

Explanation - For the purposes of this sub-paragraph the expression tidal influenced water bodies means the water bodies influenced by tidal effects from sea, in the bays, estuaries, rivers, creeks, backwaters, lagoons, ponds connected to the sea or creeks and the like.

- (iii) The land area falling between the hazard line and 500mts from HTL on the landward side, in case of seafront and between the hazard line and 100mts line in case of tidal influenced water body the word 'hazard line' denotes the line demarcated by Ministry of Environment and Forests (hereinafter referred to as the MoEF) through the Survey of India (hereinafter referred to as the Sol) taking into account tides, waves, sea level rise and shoreline changes.
- (iv) Land area between HTL and Low Tide Line (hereinafter referred to as the LTL) which will be termed as the intertidal zone.
- (v) The water and the bed area between the LTL to the territorial water limit (12 Nm) in case of sea and the water and the bed area between LTL at the bank to the LTL on the opposite side of the bank, of tidal influenced water bodies.

2. For the purposes of this notification, the HTL means the line on the land upto which the highest water line reaches during the spring tide and shall be demarcated uniformly in all parts of the country by the demarcating authority(s) so authorized by the MoEF in accordance with the general guidelines issued at Annexure-I. HTL shall be demarcated within one year from the date of issue of this notification.

3. Prohibited activities within CRZ,- The following are declared as prohibited activities within the CRZ:

- (i) Setting up of new industries and expansion of existing industries except,
