About Us

- Green Building Councils are free, non-benefit associations speeding up the take-up of maintainable structures.
- As individuals from Global Green Building Council, they gather organizations and state run administrations to by and large drive ecological, financial and social effect inside the assembled climate on a public, local and Globalwide scale.
- Right now, there are Independent & Autonomous 50+ part Green Building Councils all over the planet, each at various phases of their own green structure venture. There are three enrollment levels for Green Building Councils:
 - Set up – a completely evolved and functional association that is running significant green structure projects of work – conveying change on a public level, and accepting best practice administration, responsibility, and straightforwardness.
 - Arising – an association open to participation and which has a solid establishment, for example, a chosen board and staff to oversee everyday activities. It is relied upon to advance to Established status inside two years.
 - Planned – an association at the beginning phases of improvement yet which has set up a complete system on how it will work and propel green structure in its country. It is relied upon to advance to Emerging status inside two years.
